He found the could get nothing without an order from Aguinaldo so he went to his headquarters and one of The Destination and Probable Time Aguinaldo's aides told him that the insurgent leader was indisposed and could not see him. This was known to be a threadbare trick, but Major Jones went again to headquarters and asked to see Aguinaldo. This time he was informed that he was asleep. Major Jones then wrote a letter to Aguinaldo, saying General Anderson needed men, carts and animals. The Americans, he added, were here to expel the Spaniards and to give all the people in the Philippinos a good, stable government. The Philippinos ought, therefore, to be willing to help them. Maximo Gomez, my resignation as commander of this section of our army. "Awaiting his return, I withdraw my forces to Jiguari.

Very respectfully yours, "CALIXTA GARCIA"

The greater part of Garcia's army leaves here at daybreak tomorrow. Notwith tanding Gen. Garcia's bitter

complaint that he had been ignored and that the restoration of the Spanish civil authority in the city of Santiago was unequivocal and determined voice in the most offensive to him, and that in consequence of all this he had been forced to tender his resignation as a general in the Cuban army, the insurgent general is going on with his preparations for a contest with the Spanish forces at Horguin and Manzanillo quite as though nothing had happened. Tomorrow Gen. Garcia will issue a decree authorizing all the Cubans who have been driven from their plantations and country homes by the Spaniards and who have taken refuge for safety in the cities and towns to return to the country and go to work upon their farms and plantations assuring them of protection by his forces. He has added like permission to those in the ranks who were recruited from the farm lands or who were employed in the fields at the outbreak of the war.

Altogether it must be confessed that Gen. Garcia's attitude is inexplicable. His permission to the men in his ranks to

go back to work on the farms is contrued to mean an effort to disband his ores. But this may not be altogeher ustified. It is certain that a great many of them will continue to fight.

SERIOUS RESULTS FEARED.

Washington, July 22.—The war department has not yet been informed that Gen. Shafter's Cuban allies have quit the American lines for the reason sent out in the printed letter by Gen. Garcia, but it is scarcely doubted that such is the case, for the friction has been growing more pronounced every day since the fall of Santiago and it is feared that a severance of relations cannot long be avoided.

The Hero of the Merrimae in Washington On Business.

New York, July 22-Naval constructor Hobson of Merrimac fame reached port this morning on the cruiser St. Paul. He took the Staten Island ferry boat for New York, where he arrived at 9.45 this would be. morning. He was accompanied by two men, who carried several hand bags and the party at once took a carriage and it is presumed proceeded at once to Washington by the way of the Pennsylvania railroad. It is possible that Hobson is the bearer of Admiral Sampson's report of the naval engagement off Santiago.

When Hobson left the ferry boat at the foot of Whitehall street it took but a few moments to learn of his identity and a crowd soon gathered and cheered the young hero of Santiago bay. Accom panying Lieutenant Hobson was Congressman J. W. Wadsworth, of Geneseo, N.Y., who was at the surrender of Santiago.

During the trip across the Hudson river to the Pennsylvania station, the lieutenant said he had inspected the wrecked prompt action is taken, two of them. the Chistobal Colon and Maria Teresa can be saved. That is why I am hurrying to Washington to explain to the officials the necessity of making contracts at once for the raising of the warships. They doubtless will do so when they understand the situation as I can explain it."

The lieutenantitook occasion to say that while in Admiral Cervera's custody, he and his companions had been well treated and he expects to visit Annapolis and under different circumstances, thank the distinguished prisoner for his kindness. While in charge of General Toral, Lieutenent Hobson says he did not fare so well, until after the American troops had surrounded Santiago. Then he was visited by several of the prominent military officers and was better treated.

Lientenant Hobson said that he expected to remain in Washington for a couple of days and that there is a likelihood that he may be ordered to Santiago to look after the raising of the Spanish warships as soon as the contracts have been made. Word that the hero of the Merrimac was aboard the Washington express soon passed among the passengers and trainmen and when the train started on its journey the big depot rang with

Tomorrow General Garcia will issue a decree, authorizing all Cubans who have been driven from their plantations and country homes by the Spaniard, and who have taken refuge for safety in the cities and town, to return to the country and go to work on their farms and plantations, assuring them of protection by his forces. He has added a like permission to those in his ranks who were recruited from the farm lands.

OPINIONS EXPRESSED AT THE CABINET MEEING.

Washington, July 22 .- A letter written by General Garcia was read at the cabinet meeting today and discussed at some length and the opinion was expressed that it evidently was based upon a wrong conception of the purposes and metives of our people. These, it was said, should have been explained to him and to all the Cuban leaders If it was true, as had been reported, a

ritorial legislature, or a government of the people. I do not think that that can be done with those people, and I think it will be introducing a new system of gov-ernment into this country. Again, I think it would compel an unnecessary inernment into this country. Again. I think it would compel an unnecessary increase in our army. I do not know but that some increase is needed. We would be bound to have a large increase in our navy, and I do not like the idea of this country considering itself a military Power. I think it we had a large army and a large navy we would be getting into trouble with other nations. It is human nature for an army officer and a navy officer to want promotion, and if it does not come rapidly enough he wants a war to bring it about.

In so far as the Philippines are concerned especially, it seems to me that it would be a black eye to the Monroe Doctrine. When we said that the European nations must not take possession of any territory in this continent it was a sort of implied declaration that we would not take any possessions in their continent. If we would reach out into Asiatic countries and take the islands there it would look as though we could not say anything if European nations, reach over here and take possession of territory.

There is another thing in this connection I want to talk about. I have seen in a good many religious papers, and heard in a few sermons, that because we have the best civilization in the world it was our destiny and our Christian duty to reach out and make other nations actions, via Maine Central railroad—Arrive at 2.00 and 9.00 m., 21.50 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.30 and 6.00 p. m.; close at 6.00 and 10.15 and 11.30, a. m., 12.3

was our destiny and our Christian duty to reach out and make other nations accept our civilization. It seems to me that the best way we could make our civilization of value to others is by example and not by force. We could make it valuable to the country of the not by force. We could make it valuable to the world a great deal better by example than by appropriating territory.

The three special government and the whole country places cavalry regiments commanded by Colonels Roosevelt, Torrey and Grigsby have been integrity of Spanish territory and the recruited to their full strength and there are hundreds of applicants for any vacancies that may occur in them.

Congress authorized the enlistment of 10,000 yellow fever immunes and of the number 9138 have been mustered into the ervice. All of the ten regiments are complete with the exception of the seventh, eighth and tenth and they probably will not be recruited to their full strength.

Of the 3500 engineers authorized by the special act of Congress, 2,649 have been nustered. The first regiment contains 58 officers and 1090 men, the second 53 officers and 1100 men and the third regiment 53 officers and 300 men. It is expected that the regiment will be recruited to its full strength in a few days.

The recruiting, mustering, equiping and placing in the field of the present great army of 300,000 men in less than 90 lays-every man having to undergo a strict examination—is regarded by army experts as a wonderful achievement. Officers representing the great armies of European nations have been amazed at he work accomplished and admit frankly that Europe contains little of such fighting material as is to be found in abundnce in the United States.

OUR TROOPS AT HONOLULU.

San Francisco, July 22.—Secretary of War Alger through Adjutant General Corbin is in correspondence with Gen. Merriam in regard to barracks, officers' marters and army hospitals at Honolulu. The site of the proposed hospital was purchased by Gen. Merritt under instructions from the war department while in Honolulu recently en route to Manila. Adjutant General Corbin has a idea that barracks and officers' quarters for about 2000 officers and men should be built and a hospital for the proper care of 90 patients at a time. Gen. Merriam is to make proper recommendations on the subject, but will not be able to do so until he

After the surrender of Santiago barely a week has preceded the sailing of the Porto Rico forces, but meanwhile the President's proclamation opening Santiago to trade on terms singularly favorable to inhabitants there and the rush to build up business in eastern Cuba, are occupying the thoughts of many enterprising firms. Reduction of one-half in the tax heretofore paid, with an honest instead of a Spanish administration brings home to Cuban residents the meaning of the change and they also learn to use money of which a paper dollar is as good as gold, which for them is a step forward.

THE ENGLISH NAVY.

Government's Programme Stated.

London, July 22.—The eagerly expected statement of the first lord of the admiralty, Mr. George J. Goschen, on the supplementary naval programme was made today in the House of Commons. He reviewed the original programme which was considered sufficient when it was framed, being based upon the two power system, that the navy of Great Britain must be equal to the combined fleets of any two powers. But in consequence of the action of Russia on the same system the government was compelled to present a supplementary programme paralleling the Russian increase of six battleships which Russia proposed to begin in 1898. Only two battleshipswere taken into account in the original British programme and the first lord of the admiralty now asked the

House to grant four more battleships. (Cheers.) Continuing Mr. Goschen remarked:

'The Russian programme provides for four cruisers. We propose to build four and also 13 destroyers. It is estimated that the cost of the new programme will be \$40,000,000, making the entire expenditure for new ships \$75,000,000. The battleships will be especially adapted for the passage of the Suez canal." marked:

NO OIL SPRINKLING AT PRESENT. Boston & Maine Will Await the Result of

Recent discussion of the merits of oilsprinkling as a means of allaving dust on the roadbeds of through transportation lines led a Boston Transcript reporter to ask Assistant General Manager Barr of the Boston & Maine railroad if his road Mrs. Winslow of Bath is the guest of had any idea of adopting that method. tives were watching the experiments, but that at present the road would do nothing toward using oil on its lines.

"The experiments." he said. "have not proved that the plan had so many points in its favor as the first rather glowing descriptions of it went to show; and we are waiting, ready to make some advances if oil-sprinkling eventually proves desirable for us. As 'a matter of fact, I think our passengers suffer comparatively little from dust, for our readbeds have been renewed very lately, and are now covered chiefly with a gravel so heavy and with so little dust in it that there is hardly any thing in it that will blow about much." descriptions of it went to show; and we cycle factory is enjoying a two weeks' es if oil-sprinkling eventually proves de-

hardly any thing in it that will blow about much."

Mr. Barr doubted if the plan would be generally used on many of the roads in New England. Most of the experiments, he said, had been performed on the roads south and west of New York, where there was more trouble from dust on railroad lines than in this section.

The Boston & Albany Railroad company is the first New England road to try the experiment of using oil on its roadbed to lay the dust. Last week the company covered a portion of its four track way with a preparation of petroleum and it proved so satisfactory that it has been decided to treat its entire line from Lake crossing to the city.

It has been stated that the use of oil on a steam roadbed not only kept down the dust but also acted as a preservative of the ties. The latter claim is disputed by practical railroad men, as they argueithat the greatest wear on a tie comes from the pounding of the locomotive and the cars, and it would matter little if the tie were protected from decay, as this would not serve to overcome the cutting and splintering where the rail comes in contact with the timber construction.

to our sending Watson and his fleet to Spain. We are under no obligation to confine our attacks to her provinces, but may with perfect propriety attack the home country. If any European nation were at war with her they would invade her home territory, and what is lawful for them is as lawful for us. Europe may not like to see us coming over there with a fleet, just as she did not like to see us going to Manila, but she can offer no objection that will hold water. As to the wisdom of sending a fleet to Spain, there is room for difference of opinion. Those who favor the expedition do so because they expect that bringing the war nearer home will hasten peace. the hills, and announcing that hereafter they will fight independently, for the very good reason that they have never furnished us any. After viewing the Cubans at close range for several weeks, Gen. Shafter pronounces them "sulkers, looters, utterly worthless. "Apparently all they have done is to eat our rations and growl when any working or fighting was required of them. No doubt Gen. Shafter and his soldiers would much rather have them out of their camp than in it, and we may be sure there will be no effort to call them back. There is, however, something disquieting about their withdrawing from all association with the American troops and acting independently, because the suggests the possibility that as time goes on and they come to realize that they will fight in the come acrost a basemint with lights in it, and rolled this kag down on top iv Wolfe Tone Haggerty, the shoemaker, who was peggin' boots on his bench. The total authorized mortgage is \$500,000, of which \$75,000 has been reserved in our hands, to take up an equal amount of 6 percent, bonds, due in 1904. \$100,000 additional has also been reserved for future improvements. Of the balance (\$325,000) \$125,000 has been sold to private parties, leaving the above \$200,000 now offered on the market.

The capital stock is \$500,000, a majority of which is owned by Pertland capitalists. There is no floating debt. The road has a franchise for fifty years.

Weston F. Milliken. Treasurer Henry P. Cox, and Secretary Edward Woodman—all of Portland.

Joilet is a city of 40,000 people, which, with Lockpoat, having a population of 5,000 and which is reached by this load, is one of the most prosperous cities of Illinois. It has large manufacturing interests, and the growth, although steady, has been very rapid.

The length of track is over 21 miles, making the bonded debt less than \$20,000 per mile. This compares most favorably with the Portland Street Railroad, and its physical condition is first-class in every respect.

The Portland Trust Company bought this issue of bonds after a most careful investigation, employing as an expert Mr. E. A. Newman, the Manager and Treasurer of the Portland Street Railroad, who visited Joilet for three days, and whose full report is on file at our office for inspection. The Secretary of the Trust Company also made a personal examination of the books and plant in Joilet.

The gross and netearnings are rapidly increasing (the current pet earnings being about 30 per cent. over those of 1897), so that the road is now earning net upwards of \$40,000 a year. The interest charges are \$20,750, or about one-half of the net earnings. The future promises net earnings of \$50,000 to \$60,000 per annum, which will enhance still more the margin of security above interest charges.

on the qui vive, owing to the announcesent Alexandre Dumas's masterpiece, the great emotional drama "Camille," with the favorite and popular actress Miss At the 4.30 p. m. concert gave more general satisfaction or created more discussion than this one, and every one seems anxious to see this charming artist in this great role affording her as it does ample opportunity to display the great emotional talent that she has shown she possesses in many characters less exacting than Camille. Mr. Pascoe too is the subject of much speculation relative to his impersonation of the intense and frenzied lover Armand Duval. In San Francisco last winter he was pronounced the best in this role that San Franciscans had ever seen and he can be of its value. Agents report satisfactory depended on in the production for the effort of his career in this city. Of Miss Leigh's impersonation of "Camille," the same thing will be found true. She has won an enviable reputation in this character and has been favorably compared to all the great artists in the part. Although "Camille" has been presented here many times it has never been pre-sented by any of the great artists and this production will certainly prove a revelation and give local theatre-goers an opportunity to see what a really great play on Sunday. This will be the last rehear- Mr. and Mrs. Swett might live to see "Camille" is. More Cases of Sickness and Fears They are Serious.

A despatch from Chickamauga Park to the Boston Globe, dated July 21, says: The First Maine sent six more cases to the division hospital today. Bears are en tertained that they may develop into typhoid fever. Col. Kendall will make an effort to

change his camp. It is now located on low ground, and is practically a catch basin for a watershed on all sides. Whether the sickness is in anyway due to this fact is not known, but whether it is or not Col. Kendall does not propose to take any risk and will move his regiment to a more desirable location in the near future.

The cases at Leiter hospital are said to be rapidly improving, and those now at the division hospital have not developed langerous symptoms.

Lieut. Col. Morton today selected a site for the brigade rifle range, and tomorrow and every day thereafter except Sunday, letails will be sent from the different companies for practice. This is a welcome innovation and will serve to break the monotony of camp life.

I had measles and pneumonia both at the same time, and came near dying, and as soon as I was able to go out I was taken with grip, and then followed consumption. My physician did all he could for my relief but I received none. I tried everything that I could hear of that was good for a cough but grew worse, and would have died soon had I not commenced using the 'Golden Medical Discovery.' I felt improved before the first bottle was finished. I took six bottles, and after that I felt better and stronger than in ten years before. That was six years ago, and to-day do not feel any symptoms of a return of the disease. I remain cured, and I think I am the cause of a friend being cured by using the same medicine. LAW RESCRIPTS.

The following rescript has been received by Clerk of Courts Stone:

Hancock, ss.
Ella C. Kingsley vs H. A. Siebrecht.
Savage, J. In an action upon a contract in which the plaintiff alleged that the defendant agreed to pay her for an assignment of a written lease followed by pay, the defendant pleaded the statute of frauds and also that the contract as al-leged became inoperative by reason of a subsequent and independent contract made between the parties essentially dif-erent from that as stated and claimed by the plaintiff and which he, the defendant, was always ready to perform, but that the

But where, as in this case, the lease which is tiself in writing, discloses these terms, both the time when the leasehold interest began and when it was to end, it is so connected with the other writings, (the letters and telegrams between the parties) as to become a part of the memorandum. and when the connection becomes apparent from a comparison of the writings themselves without the aid of parol testimony a perfect contract is made out. The court decide that the contract de-clared on and the failure of the defendant to perform it are both proved by the requisite evidence, and assess the damages at four hundred dollars. Defendant defaulted for four hundred

The mines in the Patapsco are shaped somewhat like the head of a musbroom, the circular base being about three feet in diameter and the height being about eighteen inches. They are made of cast iron, and contain 20 pounds of dynamite. They are of the tyvegof the ground mines which have been adapted as the best for harbor defense in this country. They were invented at the School of Engineers at Willet's Point, N. Y., in the seventies, when Gen. Henry L. Abbott was in command there, and he is generally given the credit for the idea.

Three of these destroyers were exploded simultaneously by the touch of an electric button on shore, and the effect was terrible. The mines were about 100 feet apart, and an immense triangle of solid water was thrown to a height of 110 feet in the air. The instantaneous pressure on the side or bottom on the side or bottom of a ship would have been at leat 12,000 punds to the square inch, and this is said by the authorities to be a "disabling blow" to modern ironclads.

A contract for the purchase of an assizument of a written lease is within the statute of frauds, K. S., c. 111, 1, par. 4, and must therefore be in writing, signed by the parties, etc., to be binding; but a sufficient "memoranduru or note thereof in writing?" may be evidenced by letters and telegrams.

The statute of frauds does not change the law as to the rights and liabilities of principals and agents, either as between themselves or as to third persons. The provisions of the statute are complied with if the names of competent contracting parties appear in the writing, and if the parties be an agent, it is not necessary that the name of the principal shall be disclosed in the writing.

If a contract, within the statute of frauds, be made by an agent, whether the agency be disclosed or not, the principal may sue or be sued thereon as in other cases, and it is accordingly held; that the plaintiff in this case may show by parol that she was the real agent, appeared to be such in the writing.

In order to constitute a sufficient memorandum under the statute of frauds, the subject matter of the contract must be so certainly described that no oral testimony is needed to supply any necessary terms or conditions.

Held, that the date of a lease and its furnation are essential elements of a contract and the want of them in a memorandum cannot be supplied by parol. But where, as in this case, the lease which is where, as in this case, the lease which is

GREAT SPORT AT RIGBY. All Run Down, Could Not Eat

Tired, Heavy Feeling Every Morning. SOLON, ME. - "I was all run down and hardly able to sit up. I had a very lame back, could eat hardly anything, and had a tired, heavy feeling every morning. When I had taken half a bottle of Hood's Sarsaparilla I was better. I had a good appetite, the lameness was relieved, and I could rest well. I continued taking Hood's Sarsaparilla and after two bottles I was all right." MRS. E. WILSON.

MONEY.

Money accomplishes wonderful things. Kingdoms are bought and betrayed by it. Laws are passed and repealed through its influence. Death is about the only thing that money doesn't control to a more or less degree.

But the boundless power of money is shown by an insurance policy in is shown by an insurance policy in a sound company. The policy is only a bit of paper with a little printonly a bit of paper and a fatter princing and writing upon it, and it costs only a few dollars. But that bit of paperalinereases in value thousands of times in a few minutes in case of fire. The wealth that goes up in smoke is transferred to the paper.

We sell the kind of insurance that insures.
