are continuous and texp when on two ahead. Leather has slightly yielded in some grades with scarcely any buying ahead of necessities, and hides were a shade lower last week and have not changed. There appears a gradual accommodation of prices of materials to the necessitites of boot and shoe distributors. Such an ad-justment is needed in the woolen in-dustry, for some mills are closing, and others are selling old stocks of wool, present orders for goods not warranting present prices of material. Yet other mills in equal number are starting on different lines of goods and in dress goods instead of 90 per cent plain, a large pro-portion of fancies has been taken, though a heavy auction sale, just announced, may affect the demand. Of cotton mills also, though a few have stopped, quite as many have started, and the demand for staples is increasing, and in prints and ginghams is fairly good. The yielding in cotton to 5 7.80 helps the mills and is not surprising, with present prospects of a great crop. Wheat has further declined two cents in spite of general holding of better grades by farm-ers which renders receipts low and visible supply small beyond precedents. Corn exports are gradually declining and prices are two cents lower, rather larger estimates of yield being now credited. Failures for the week have been 154 in the United States against 233 last year and 17 in Canada against 30 last year. Wooster, Ohio, a few days ago. He said: Wooster, Ohio, a few days ago. I regret to notice a disposition in Con-gress to reach out for outside territory. This ambition for the occupation of ter-ritory has been the ruin of Greece, Rome and the great nations of Asia in ancient times, and of Spain, Austria and Italy in modern times. And now the United States is in more danger from similar in modern times. And now the United States is in more danger from similar causes than all others combined. The greed of territory, and the attempt to rule it lost Great Britain the great body of what is now the United States of America. If we can be content with our vast continental possessions we can dis-pense with the islands of the seas. There is no room for them in our system of States. Their people do not speak our language. Friendly trade relations can be easily arranged, but American domi-nation, if attempted, will lead to interm-inable evils."

BOOK TREASURES IN THE NATION-AL LIBRARY.

(Washington Star).

For some months past Mr. A. R. Spofford has been engaged in preparing an exhibit in the northwest gallery of that new library building, which will be an exceedingly interesting study to all lovers of old and valuable publications. This exhibit has just been completed, and as a collection of early and rare books has no equal in this country. The exhibits are under cover of plate glass cases.

Very few of the residents of this city are aware of the rich collections when h: d for years been accumulating in the cla library quarters of the Capitol, where they were buried from public view because of the lack of space in which to dis. play them. Necessarily the exhibit in the northwest gallery of the new library building is but a very small part of the treasures of typography and rare and co: tly books, including especially what are known as incunabula (books produced in the infancy of the art of printing) and Americana, contained; in the great library of the United States. Now that abundant space is provided for these treasures, a selection of them has been made and partially classified into groups of inspection and information.

Beginning at the north end of the gallery, there are exhibited rows of specimens of early printed books representing every year from 1467, the earliest imprint, up to 1501. This exhibit illustrates by actual examples the early history of the art that is preservative of all other arts. They are by no means so numerous as such treasures in possession of the libra ry would permit being made, as the early black-letter volumes representing some of these years are very numerous in the collection. But the exhibit presents to the student of typography a most interesting and strictly continuous series of specimens of the work of the early printers.

Many, if not most of these curlosities of ancient typography came into the possession of the government with the libra-ry of that venerable and honored book lector, Peter Force of Washington. He was both a printer and a scholar, and he amassed a library of bibliographical casures which are now for the first time fully brought out to public view.

is the veriest nonsense to speak of that as an ambush, as some coffee coolers in the extreme fear at first reported. We knew just where the Spaniards were, and Gen-eral Young, with the First and Tenth Regulars, arranged with Colonel Wood, who had the Hough Bilders, that they should march by diffrent routes and hit the Spaniards' right and left wings at the same time. He struck them almost ex-actly together. It was a mountainous country covered with very thick jungle, and to force a pass, defended by double our number, of course made a brisk fight and some loss; but we forced it." **FOR SALE-Examine the fine editions of 100** sheet music for sale by HAWES, 414 Con-gress street; also music books, popular songs, superior strings and musical instruments of all kinds. tire is something of a compromise be-tween European and Chinese modes. Besides the one year out of seven that all foreign employes of the great mercan-tile houses represented in Manila have given to them as "home leave," there is a month's vacation every year, a regular holiday each month, and all the saint's days, and Spanish, French, English, Ger-man ard American holidays. saints' days, Stindays and general hou-days, there are 129 days in each year when these people do not work. Clerks earn from \$2500 to \$5000 a year, besides having lodgings found, a mess al-lowance, medical attendance and travel-ling expenses. In many cases their rooms are over the offices. They work from day-light to noon, rest two or three hours, and then work till 5 o'clock, but they have much freedom in choosing their hours and are hurried only on mail days. There are many excellent bands in Ma-nila, and open-air concerts are given every evening in fair weather. Theatri-cal companies, both native and foreign, play through the season. The Mesta chorus girl is alluring. In the cathedral and the churches the music is always good, though it is startling to the new comer to hear, as he will in some ser-vices, a Gloria from "Trovatore," the Crede with music from "Barbiere," and the Elevation from "Traviata."-Louis-ville Courier-Journal.
