5 MINUTE HEALTH TIP

Protect your Hearing

According to the CDC, 48 million people in the U.S. have trouble hearing with one (or both) of their ears. Take steps to protect your hearing from your noisy surroundings!

LOWER THE VOLUME

Keep music at a volume which won't force people to shout in order to hold a conversation. If listening with headphones, listen for no more than 60 minutes per day at 60% volume.

MOVE AWAY FROM THE NOISE

Distance from the source of the sound and the length of time you are exposed can play a role in hearing loss. If possible, move away from the source of the noise if you can't reduce it yourself.

WEAR HEARING PROTECTORS

If you can't distance yourself from the source of the noise, wear earplugs or other protective devices when involved in a loud activity.

Learn More About Our Diverse Team

You may have noticed that our library team is made up of quite a few people - eleven to be exact! While it may seem as though we all play very similar roles in the library, you might be surprised to know that each of our jobs is very unique; our library would not be the same without the contributions of each and every one of us!

Perhaps more importantly, the diversity of Team HSL is what makes us the dynamic, problem-solving force that we are. We are an inclusive group; we embrace our uniqueness and celebrate our differences.

We encourage you to get to know each member of our library team on an individual level - we are each so much more than your friendly neighborhood librarians!

Leftover Halloween Candy? Donate it to the library!

Enjoy the candy jar at the front desk? Help us keep our candy stock healthy! We happily accept candy donations all throughout the year. Every little bit helps!
