If You Are Planning To Build Call Our Engineers First

Architects, electrical contractors, builders and building owners, should call a telephone engineer before building.

When provision for telephone wiring is not made in the original building plans, it may be necessary for the building owners to make extensive, costly and unsightly alterations after completion of the building, in order to conceal the Let wires Luff H C, r w Maddock's Ma running through the halls, rooms or corridors, for furnishing telephone service.

The engineers of this company will be pleased, at any time, to give architects, owners, electrical contractors or builders the benefit of their experience in such matters without charge and assist them in planning the proper system for telephone service wiring in each individual case.
