Abstract:

The following is a bibliography of the works of Errett H. Callahan and works about him. This is has been written to accompany the biography written by Hugo Nami (this issue).

Keywords: Errett Callahan; modern knapper; experimental archaeology; bibliography; biography

A brief introduction to the bibliography

This article is intended to be a comprehensive list of publications by and about Errett Callahan. It was written to accompany the biography written by Hugo Nami which is published in this same issue. Every effort has been made to include all publications by Dr. Callahan and it is presumed that almost all (if not all indeed) have been included. All of his major publications appear in this bibliography. If other publications are later found to be missing, please inform me so that they can be added to the list in some way. Regarding publications about Dr. Callahan, considering his long and illustrious career, and the many people who he trained, worked with, and influenced, it is very likely that there are publications missing from this list. If missing publications are noticed, please inform me of these as well so that they may be added. The bibliography will be made available as an RIS file and EndNote compressed library for easy use in bibliographic software.
