---

The following Utah plants are not included in Tidestrom's "Flora of Utah and Nevada," nor are any listed specifically for Utah in Rydberg's "Flora of the Rocky Mountains and Adjacent Plains." Specific localities are given for each species, followed by the herbaria where it may be found. The University of Utah Herbarium is designated by the letter "U", the A. O. Garrett Herbarium by the letter "G", and the Brigham Young University Herbarium by the letter "Y." This list does not include a rather large number of species known to occur in Utah and listed in Tidestrom, but not specifically for Utah.
