APPENDIX 1

CATALOGUE OF SITES

The design of the data file from which the Catalogue of Sites has been prepared is discussed in chapter 4. As was stated in the Preface, this Catalogue represents the compilation of extensive data collected from a range of sources. There were two main areas of this work: research into the archaeological record and research into locational factors. In gathering information from the archaeological record the Ordnance Survey index cards and other records held in the National Monuments Record were consulted. In addition a search was made of all relevant publications. Museums were visited and museum records consulted. Research into locational factors involved recording observations made in the field during site visits. In addition extensive original map evidence was collected. The following notes give details of sources consulted, parameters coded in connection with the analysis and criteria used for inclusion of sites and for definition of location parameters.

Notes

The old county names have been retained for the different parts of the area of study in that they are still in use in the literature and in museums, as well as in the majority of the records consulted during data collection. They also form the basis of code numbers used for certain monuments and artefacts, notably chambered cairns and the sectioned stone axeheads listed in Appendix 2.

For mainland Ayrshire and Renfrewshire sites are arranged working from north to south. For the islands and peninsulas of Kintyre and Cowal files begin in the north and move round each area anti-clockwise. As is discussed in chapter 5 (5.1) the analysis was carried out for the region as a whole and for 6 sub-regions of which it is composed. In the Catalogue of Sites these are coded as follows:

Ayrshire and Renfrewshire : AY

Kintyre : KT

Cowal : CO

Arran : AR

Bute : BU

Small islands : IS

Sites are numbered within these sub-regions. Where appropriate the code and number are quoted in references to individual sites in the text.

Material from the Archaeological Record

Ordnance Survey index card numbers are recorded as already described (4.1.3). Where possible reference is also made to published records of sites and monuments, and, in the case of artefacts, to the relevant museum if this is known. In general references are given either by the name of the author (details in the References), or by the title of the journal or other publication. Journal title and other abbreviations used in the Catalogue of Sites have been listed above. Reference has been made to previous lists and classifications of monuments and artefacts as appropriate. The parameters used in coding the information are listed at

the end of these Notes.

Monuments

The classification and numbering of Neolithic cairns follows Scott (Appendix C in Meg. Enq. 1969) and Henshall (1972, Part III, Catalogue of Sites).

Descriptive definitions of stone circles are in line with those made by Burl (1976, Gazetteer of Sites).

Where appropriate the numbering used by Thom (1967, 1971) and Ruggles (1984) has been quoted for standing stones, rows and settings of stones.

Two classes of early Bronze Age burial monuments have been defined - cairns and mounds and unmarked burial sites (8.4.1). Where evidence of the structure of cairns and related monuments permits, the guidelines put forward by Ritchie and MacLaren (1972) have been followed.

The numbering of cup-and-ring marked rocks follows that used in descriptions by Morris and Bailey (1966) and Morris (1968).

Artefacts

Classification of the major styles of Neolithic pottery for the study area has been defined in relation to vessel form (cf. Henshall 1972, 166-91, Kinnes forthcoming): simple bowls and cups, lugged bowls, carinated forms (7.2.2). Scott's recommendation (1977) that style names should be those associated with the pottery found in the region has been followed in using the term 'Rothesay style' as defined by Scott (in Marshall and Taylor 1977) for simple and bipartite bowls with heavy and

ornate rims and extensive fluted or incised decoration. These are alternatively called 'Achnacree bowls' (e.g. Henshall 1972, 100-01). The term 'Beacharra bowl', also associated with the region, has been retained as well, but has been restricted to bipartite bowls with closed mouth and zoned, channelled or incised decoration such as were found at the type site (cf. Henshall 1972, 102).

Numbered lists of Bronze Age pottery quoted are the following:

Ab. = Abercromby 1912

Ch. = Childe 1946

Clarke 1970

Crichton Mitchell 1934

Ritchie 1970

Simpson 1965

Young 1951

Morrison 1968

Longworth 1984

Beaker pottery classification follows Clarke 1970 (cf. Ritchie 1970). Beakers of south-west Scotland are considered in relation to the framework put forward by Lanting and van der Waals (1972) by Ritchie and Shepherd (1973) (7.5.2). Food Vessel pottery has been classified in the two broad groupings - bowl or vase - suggested by Waddell 1976 (cf. Simpson 1965) (7.6.1). As with Neolithic pottery this avoids linking the pottery of the region with other specific areas. Within these broad groupings tripartite bowls, distinguished by Young, (1951) and Machrie vases, seen as particular to south-west Scotland (Davidson and Scott 1967) have been noted (7.6.2). Classification of cinerary urns and pygmy vessels, follows Morrison (1968) (7.8). For Collared Urns Longworth's numbering

(1984) has been noted.

Battle-axes, mace-heads and axe-hammers are classified as by Roe (1967). Flint arrowheads listed by Green (1980) have been noted.

Numbered lists of metalwork quoted are the following:

Coles 1969

Gerloff 1975

Needham 1979

Schmidt and Burgess 1981

Taylor 1980

For Early Bronze Age metalwork the classifications made in Coles' comprehensive study of the Scottish material have been followed (Coles 1969, Appendices A and C). These were defined on conventional typological criteria along with consideration of metal analyses. More recent classifications have been developed for axes by Schmidt and Burgess (1981) and for daggers (Gerloff 1975) (7.8).

Location Factors

The parameters used in coding this information are also listed at the end of these Notes. Sources of information used in determining the locational factors considered in the analysis in chapter 5 were the following:

Altitude, distance from sea, aspect and presence or absence of water:

Ordnance Survey Maps for the study area (first series, 1:50,000):

Sheets 62, 63, 64, 68, 69, 70, 71, 76, 77.

Height above sea level is quoted in metres. Distance from the sea was measured directly to the nearest coast and given in kilometres. The aspect

of sites on sloping ground was determined from the map and in the field, the minimum criterion for sloping ground being a slope of the order of 1 in 20 (occurrence of three 50' contour lines within one kilometre square). Thus the aspect recorded is that general to the area in which the site is located. Fresh water was considered to be present if a source was available within 0.5 km. of a site. On this criterion it was found that fresh water was almost invariably present, and this factor was not used in the analysis in the present study.

Parameters for solid or drift geology are based on:

Ordnance Survey Solid and Drift Geological Maps (1"=1mile):

Sheets 7 (1905), 8 (1962), 13 (1948), 14 (1905), 15 (1904),
 20 (1882), 21 (1948), 22 (1905), 23 (1905), 29 (1892),
 30 (1961).

Parameters for soil categories are based on:

Macaulay Institute for Soil Research Soil Map (1:250.000):

Sheet 6 (South West Scotland) (1982).

Parameters for present land use are based on categories of land use defined by Gauld (1980). For most sites these were determined in the field.

For ratings on prominence, which must be considered subjective, five options were selected on present evidence: sites in a prominent or commanding position for a wide area; sites in a prominent position in relation to the immediate locality; sites occupying a conspicuous but not commanding or prominent position - focal points in their immediate area; sites neither prominent nor conspicuous; sites located in present forest or other location where prominence is difficult to judge. For the last category no rating was made.

For the ratings on accessibility, also to be considered subjective, only two possibilities were allowed: accessible - in general sites on lower ground with access to a coast likely to have offered landings for boats and reached by undemanding land routes, or inaccessible - in general more remote sites on higher ground or in locations awkward to approach by land or sea.

Parameters

The parameters used in coding the information were as follows:

Information from the Archaeological Record

Type of site:

'Clyde' cairn

Passage grave

Other Neolithic cairn

Stone circle

Standing stone, stone row, stone setting

Bronze Age cairn, mound

Bronze Age burial sites apparently unmarked

Cist(s), pit(s)

Settlement site or area

Cup- or cup-and-ring marked rock(s)

Metal find

Metal hoard

Grave with metal

Working site

Site details uncertain

Structural features:

'Clyde' cairn:

Long or trapezoid cairn

Oval or round cairn

Cairn shape uncertain or unknown

Cairn orientation - 16 directions possible (entrance end
of cairn given first), or not known

Relationship to contours - along or across

Details of chamber(s)

Numbers of compartments

Facade - straight or flat, curved or horned, unknown

Presence of blocking deposits known

Stone circle:

Plain ring

Oval or ellipse

Concentric rings

Embanked stone circle

Four-poster

Graded stones

Uncertain or unknown

Standing stone(s):

Single

Alignment or group

Number uncertain

Bronze Age cairn etc.:

Round or oval cairn

Kerbed cairn

Ring-cairn

Enclosed cremation cemetery

Cairn material suggesting more than one element in
structure, but details unclear

Cairn details unknown

Cist:

Cist orientation - 16 directions possible, or not known

Rebated or grooved cist

Details of finds:

Pottery:

Neolithic pottery - simple bowls, cups, lugged bowls

Neolithic pottery - carinated

'Rothesay style' pottery

>1-6 'Rothesay style' pots

'Beacharra' bowl pottery

>1-5 'Beacharra' bowls

Peterborough Ware

Grooved Ware

Neolithic pottery ?

AOC Beaker

Several AOC Beakers

E Beaker

Several E Beakers

N Beaker

Late N Beaker (including short-necked)

Finger-tip, nail-impressed Beaker(s)

Beaker pottery ?

Beaker-Food Vessel

Bowl Food Vessel

>1-5 bowl Food Vessels

Vase Food Vessel

>1-5 vase Food Vessels

Tripartite bowl Food Vessel

Machrie vase Food Vessel

Food vessel ?

Food Vessel-Cinerary Urn

Collared Urn

>1-5 Collared Urns

Cordoned Urn

>1-5 Cordoned Urns

Enlarged Food Vessel

Biconical Urn

Bucket-shaped Urn

>1-5 Bucket-shaped Urns

>5-10 Bucket-shaped Urns

Cinerary Urn upright

Cinerary Urn inverted

Cinerary Urn ?

Urn ? - no details

Biconical Pygmy Vessel

Hemispherical Pygmy Vessel

Pygmy Vessel ?

Flint:

Leaf-shaped arrowhead(s)
 Barbed and tanged arrowhead(s)
 Flint knife(ves)
 Plano-convex flint knife(ves)
 Flint scraper(s)
 Flint flake(s)
 Flint other, uncertain

Stone:

Pitchstone
 Stone axehead
 Perforated stone mace-head
 Perforated stone axe-hammer
 Perforated stone battle-axe - Calais-Wold group
 Scotsburn group
 Stone artefact - other, uncertain
 Quartz pebbles

Jet:

Jet slider
 Jet beads - disc
 Jet beads - parts crescentic spacer-plate necklace
 Jet artefact - other, uncertain

Vitreous material:

Faience bead(s)

Metal: copper, bronze:

Axe type AB
 Axe type B

Axe type Ba

>1-5 axes type Ba

Axe type Bb

>1-5 Axes type Bb

Axe class I

Axe ?

Halberd type 4

>1-5 halberds type 4

Spearhead type A

Copper or bronze dagger or knife

Mid-rib dagger

Dagger ?

Bar armlet

Band armlet

Copper or bronze awl

Copper or bronze artefact other, uncertain

Copper or bronze ? suggested green staining

gold:

Gold pommel mount

Gold leaf

Gold ?

Organic material:

Wood or plant material

Burned material, charcoal

Worked bone

Unworked animal bones

Shells

Burial information:

Burial - adult(s)
 Burial - male
 Burial - female
 Burial - adolescent
 Burial - child, infant
 Inhumation - crouched
 ? selection or arrangement of bones
 Inhumation - extended
 Inhumation(s) - disturbed, incomplete, uncertain
 Inhumation ?
 Cremation(s)
 Cremation ?
 Burial ?, details not known

Location factors**Solid or drift geology (5.3):****Metamorphic rocks:**

Dalradian schists, Dunoon phyllites
 Green beds and metamorphic limestones, epidiorite
 and hornblende schists

Sedimentary rocks:

Ordovician and Silurian
 Old Red Sandstone
 Carboniferous calciferous sandstones, limestones and
 millstone grits

New Red Sandstone sandstones (Permian, Triassic)

Igneous:

Intrusions of granite, basalt, dolerite, felsite,
pitchstone, etc.

Ordovician, Carboniferous, Permian lavas

Drift deposits:

Blown sand

Raised beach

Freshwater alluvium and gravels

Peat - valley and basin

Glacial deposits - boulder clay, sands and gravels

Present soils (5.4):

Alluvial

Brown forest

Humus-iron podzols

Non-calcareous gleys

Peaty gleys

Peaty podzols

Peat

Scree and rock

Sands

Built-up areas

Present land use (5.5):

Agricultural - arable and pasture

present golf course

Rough grazing and moorland

Forestry plantation, woodland

Land of very limited agricultural value:

coastal - shoreline, beach, cliffs

mountain top - rock and scree

Built-up area - town, roadway, railway,

quarry. gravel pit etc.

Aspect (5.6):

Hill top or crest of ridge

Flat or gently undulating area

Sloping ground - 8 directions possible

Water:

Present

Not present

Prominence (5.6):

Prominent and/or commanding

Prominent locally

Conspicuous but not in prominent position

Not prominent or conspicuous

Prominence obscured

Accessibility (5.2):

Access easy

Access difficult

APPENDIX 2

LISTING OF STONE AXEHEADS

Notes

In general the format and guidelines were the same as for the Catalogue of Sites except that location factors were not included. This is in line with the aim of providing a broad indicator of possible Neolithic activity in the different parts of the area of study to set alongside other evidence.

County numbers for sectioned axeheads, first adopted by Livens (1959), here follow Ritchie and Scott (forthcoming). References to previous numbered lists of axeheads within the area of study are:

Frame 1978

Livens 1959

Mearns 1982

Scott 1969c (Appendix D in Meg. Enq.)

Again the Ordnance Survey index cards and museum records were consulted, and were a source of additional material.

Parameters coded were the following:

Stone axehead or rough-out

Group of stone axeheads (>1-6)

Group VI (sectioned)

Group VI (possible)

Group IX (sectioned)

Group IX (possible)

Identified as other rock

Rock type unknown

STONE IDENTIFIED AS ARENITE BY J. G. MACDONALD (EXCAVATION REPORT)

PRESENT LOCATION NOT KNOWN

REF: PSAS 112, 1982, 184, 196

NR 69 19

KINTYRE, CAMPBELTOWN, TOMAIG FARM

STONE AXE FOUND DURING TURNIP THINNING (MEG. ENQ. 1969, APP. D, 8), OF
GREYISH-BLACK STONE ? GROUP 9

PRESENT LOCATION NOT KNOWN

NR 699 207

KINTYRE, CAMPBELTOWN, MOY FARM

STONE AXE FOUND IN 1915 DURING DRAINAGE OPERATIONS (MEG. ENQ. 1969, APP.
D, 14), SECTIONED (RITCHIE AND SCOTT 1981, ARG 8) RESULT: ?
(OF GREENISH-GREY BANDED STONE)

CAMPBELTOWN MUSEUM

NR 725 196

KINTYRE, CAMPBELTOWN, KILKERRAN CEMETERY

STONE AXE FOUND IN 1882 DURING EXTENSION OF CEMETERY (MEG. ENQ. 1969,
APP. D, 11), SECTIONED (RITCHIE AND SCOTT, 1981, ARG 13) GROUP 9

CAMPBELTOWN MUSEUM (KINTYRE ANTIQUARIAN SOCIETY)

NR 71 20

KINTYRE, CAMPBELTOWN

STONE AXE (MEG. ENQ. 1969, APP. D, 24), SECTIONED (RITCHIE AND
SCOTT, 1981, ARG 17) HORNFELS

NATIONAL MUSEUM OF ANTIQUITIES (AF 398)

REF: PSAS 25, 1890-1, 6

NR 71 20

KINTYRE, CAMPBELTOWN, NEAR CAMPBELTOWN

2 STONE AXES FOUND IN NINETEENTH CENTURY, SAID TO HAVE BEEN FOUND
DURING BREAK UP OF OLD LAND, POSSIBLY WITH STONE MOULDS FOR BRONZE
CASTING (MEG. ENQ. 1969, APP. D, 22, 23) - OF 'GREENSTONE'

NATIONAL MUSEUM OF ANTIQUITIES (AF 67, 68)

REF: PSAS 6, 1864-5, 48

NR 71 20
KINTYRE, CAMPBELTOWN, MEADOWS AVENUE
STONE AXE FOUND DURING BUILDING WORK IN 1978,
NO FURTHER DETAILS,
CAMPBELTOWN MUSEUM

NR 716 204
KINTYRE, CAMPBELTOWN, GALLOWHILL
STONE AXE (MEG. ENQ. 1969, APP. D, 16) OF 'GREY SANDSTONE-LIKE STONE'
CAMPBELTOWN MUSEUM

NR 718 202
KINTYRE, CAMPBELTOWN, KNOCKBAY PARK
STONE AXE (MEG. ENQ. 1969, APP. D, 17), OF 'BROWNISH-GREY
SANDSTONE-LIKE ROCK'
CAMPBELTOWN MUSEUM

NR 716 208
KINTYRE, CAMPBELTOWN, GASWORKS
STONE AXE FOUND DURING WORKS IN 1910 (MEG. ENQ. 1969, APP. D, 5), OF
BLACK STONE ? BASALT
CAMPBELTOWN MUSEUM

NR 767 263
KINTYRE, CAMPBELTOWN, ARDNACROSS FARM
STONE AXE FOUND IN FIELD NEAR SHORE ON NORTH SIDE OF RIVER LUSSA
(MEG. ENQ. 1969, APP. D, 20), SECTIONED (RITCHIE AND SCOTT 1981, ARG 11)
GROUP 6
CAMPBELTOWN MUSEUM

NR 75 26
KINTYRE, CAMPBELTOWN, KILKEDDAN
STONE AXE FOUND DURING FORESTRY WORK IN 1973,
? GROUP 6
CAMPBELTOWN MUSEUM

NR 795 363
KINTYRE, SADDLE AND SKIPNESS, CARRADALE, TORRISDALE WATER
STONE AXE (MEG. ENQ. 1969, APP. D, 18), OF 'REDDISH BROWN SEDIMENTARY
ROCK'
CAMPBELTOWN MUSEUM

COWAL

NS 032 747
COWAL, INVERCHAOLAIN, ARDENTRAIVE
SMALL STONE AXE, NO DETAILS OF FINDING
NATIONAL MUSEUM OF ANTIQUITIES (AF 975)
REF: PSAS 91, 1957-8, 200

NR 948 705
COWAL, ARDLAMONT, LOCH ASCOG
STONE AXE SECTIONED (RITCHIE AND SCOTT 1981, ARG 4) GROUP 9
GLASGOW ART GALLERY AND MUSEUM (7C-'27)

ARRAN

NR 87 44
ARRAN, KILMORY, PIRNMILL
STONE AXE FOUND IN PIRNMILL AREA IN 1901, NO FURTHER DETAILS
GLASGOW ART GALLERY AND MUSEUM (21/35)

NR 89 34
ARRAN, KILMORY, ROWANBANK AREA OF MACHRIE MOOR
FRAGMENTS OF 2 STONE AXES AND ROUGHOUT OF 1 STONE AXE FOUND IN THIS AREA
SECTIONED (RITCHIE AND SCOTT 1981, ARN 8, 9, 10) GROUP 9
NATIONAL MUSEUM OF ANTIQUITIES (AF 1003-5; 1962, 246-50)
REF: PSAS 96, 1962-3, 364

NR 96 34
ARRAN, KILMORY, CREAGEN LEANA MUIC AREA
AREA OF FINDING OF 2 STONE AXES, SECTIONED (RITCHIE AND SCOTT
1981, ARN 7, 13) 7: GROUP 9; 13: GROUP 6
NATIONAL MUSEUM OF ANTIQUITIES (AF 718, 706)
REF: BALFOUR J. A. ED. 1910, 276, FRAME H. 1978, 56

NR 912 294
ARRAN, KILMORY, BIRCHBURN FARM
STONE AXE FOUND IN 1975 DURING PLOUGHING, ? OF DOLERITE, DAMAGED
ISLE OF ARRAN MUSEUM
REF: D&E 1976, 68, DR. H. FAIRHURST (LETTER: 28.2.85)

NR 90 27
ARRAN, KILMORY, KILPATRICK AREA
STONE AXE FOUND ABOUT 1910 IN A PIECE OF MUCH DECAYED WOOD UNDER PEAT
? OF FELSTONE
LOCATION NOT KNOWN ? LOST
REF: PSAS 59, 1924-5, 254

NR 914 268
ARRAN, KILMORY, CARMARHOME
ROUGHOUT OF STONE AXE, SECTIONED (RITCHIE AND SCOTT, 1981, ARN 14),
OF GREYWACKE
GLASGOW ART GALLERY AND MUSEUM ('55 96UB)

NR 946 240

ARRAN, KILMORY, BENNECARRIGAN

STONE AXE, NO DETAILS OF FINDING, SECTIONED (RITCHIE AND SCOTT
1981, ARN 12) GROUP 6

NATIONAL MUSEUM OF ANTIQUITIES (AF 868)

REFS: PSAS 73, 1938-9, 333, PPS 30, 1964, 52

NR 961 241

ARRAN, KILMORY, LEACAMOHR, CLACHAIG

STONE AXE FOUND IN NINETEENTH CENTURY, NO FURTHER DETAILS

PRESENT LOCATION UNCERTAIN ? IN LOCAL POSSESSION

REF: BALFOUR J. A. ED. 1910, 276

NR 949 211

ARRAN, KILMORY, CLACHAIG LIMEKILN

STONE AXE (ARN 11) FOUND DURING EXCAVATION OF NORTH COMPARTMENT OF
CLACHAIG LIMEKILN CHAMBERED CAIRN (ARN 16), IDENTIFIED AS PHONOLITE
(MR. G. COLLINS, GEOLOGICAL SURVEY) (HENSHALL)

NATIONAL MUSEUM OF ANTIQUITIES (EO 229)

REFS: PSAS 36, 1901-2, 84-91, 138-55; BALFOUR J. A. ED. 1910, 59-60,
279, HENSHALL A. S. 1972, 305, 391

NR 94 21

ARRAN, KILMORY, CLACHAIG

2 STONE AXES FOUND AT CLACHAIG, NO FURTHER DETAILS OF FINDING

PRESENT LOCATION UNCERTAIN ? IN LOCAL POSSESSION

REF: BALFOUR J. A. ED. 1910, 276

NR 987 213

ARRAN, KILMORY, WEST BENNAN

STONE AXE FOUND IN NINETEENTH CENTURY, ? OF BASALT

GLASGOW ART GALLERY AND MUSEUM

REF: BALFOUR J. A. ED. 1910, 285

NR 98 21

ARRAN, KILMORY, BENNAN

AREA OF FINDING OF 3 STONE AXES IN EARLY TWENTIETH CENTURY

PRESENT LOCATION UNCERTAIN ? IN LOCAL POSSESSION

REF: BALFOUR J. A. ED. 1910, 276

NR 983 246

ARRAN, KILMORY, AUCHELEFFAN

STONE AXE FOUND IN 1974 DURING FORESTRY WORK, OF BLUE-GREY STONE

PRESENT LOCATION NOT KNOWN

REF: D&E 1976, 68

NS 04 24

ARRAN, KILBRIDE, ? VICINITY OF GIANTS' GRAVES
SIX STONE AXES POSSIBLY FOUND IN VICINITY OF GIANTS' GRAVES NORTH
CHAMBERED CAIRN (ARN 11), ANY ASSOCIATION WITH THE CAIRN REMAINS
UNCERTAIN, SECTIONED (LIVENS 1959, BUT 1, 2, 3, 4, 5, 6)

Total		47	27	66	70	42	86
χ^2 /d.o.f.		29.6	25.7	12.8	25.4	8.9	24.7

In brackets is given the observed number per 100Km².

χ^2 measures the goodness of fit between the observed and expected numbers.

* Abbreviations: see over.

ABBREVIATIONS:

The following abbreviations have been used throughout the tables which show the results of analysis of the data file:

Monument groups:

- NC : Neolithic cairns ('Clyde'cairns, passage graves, and other chambered cairns)
- SC : Stone circles and settings
- SS : Standing stones and alignments
- BC : Bronze Age cairns and mounds
- BU : Bronze Age burial sites apparently unmarked
- CR : Cup-marked rocks

LD% : Land distribution %

O : observed number

E : expected number

d.o.f. : degrees of freedom

D : number of standard deviations by which observed and expected numbers differ

Codes used for location factors are given beside the tables in which they are used.

TABLE 5.2 ACCESSIBILITY RATINGS: ALL SITES

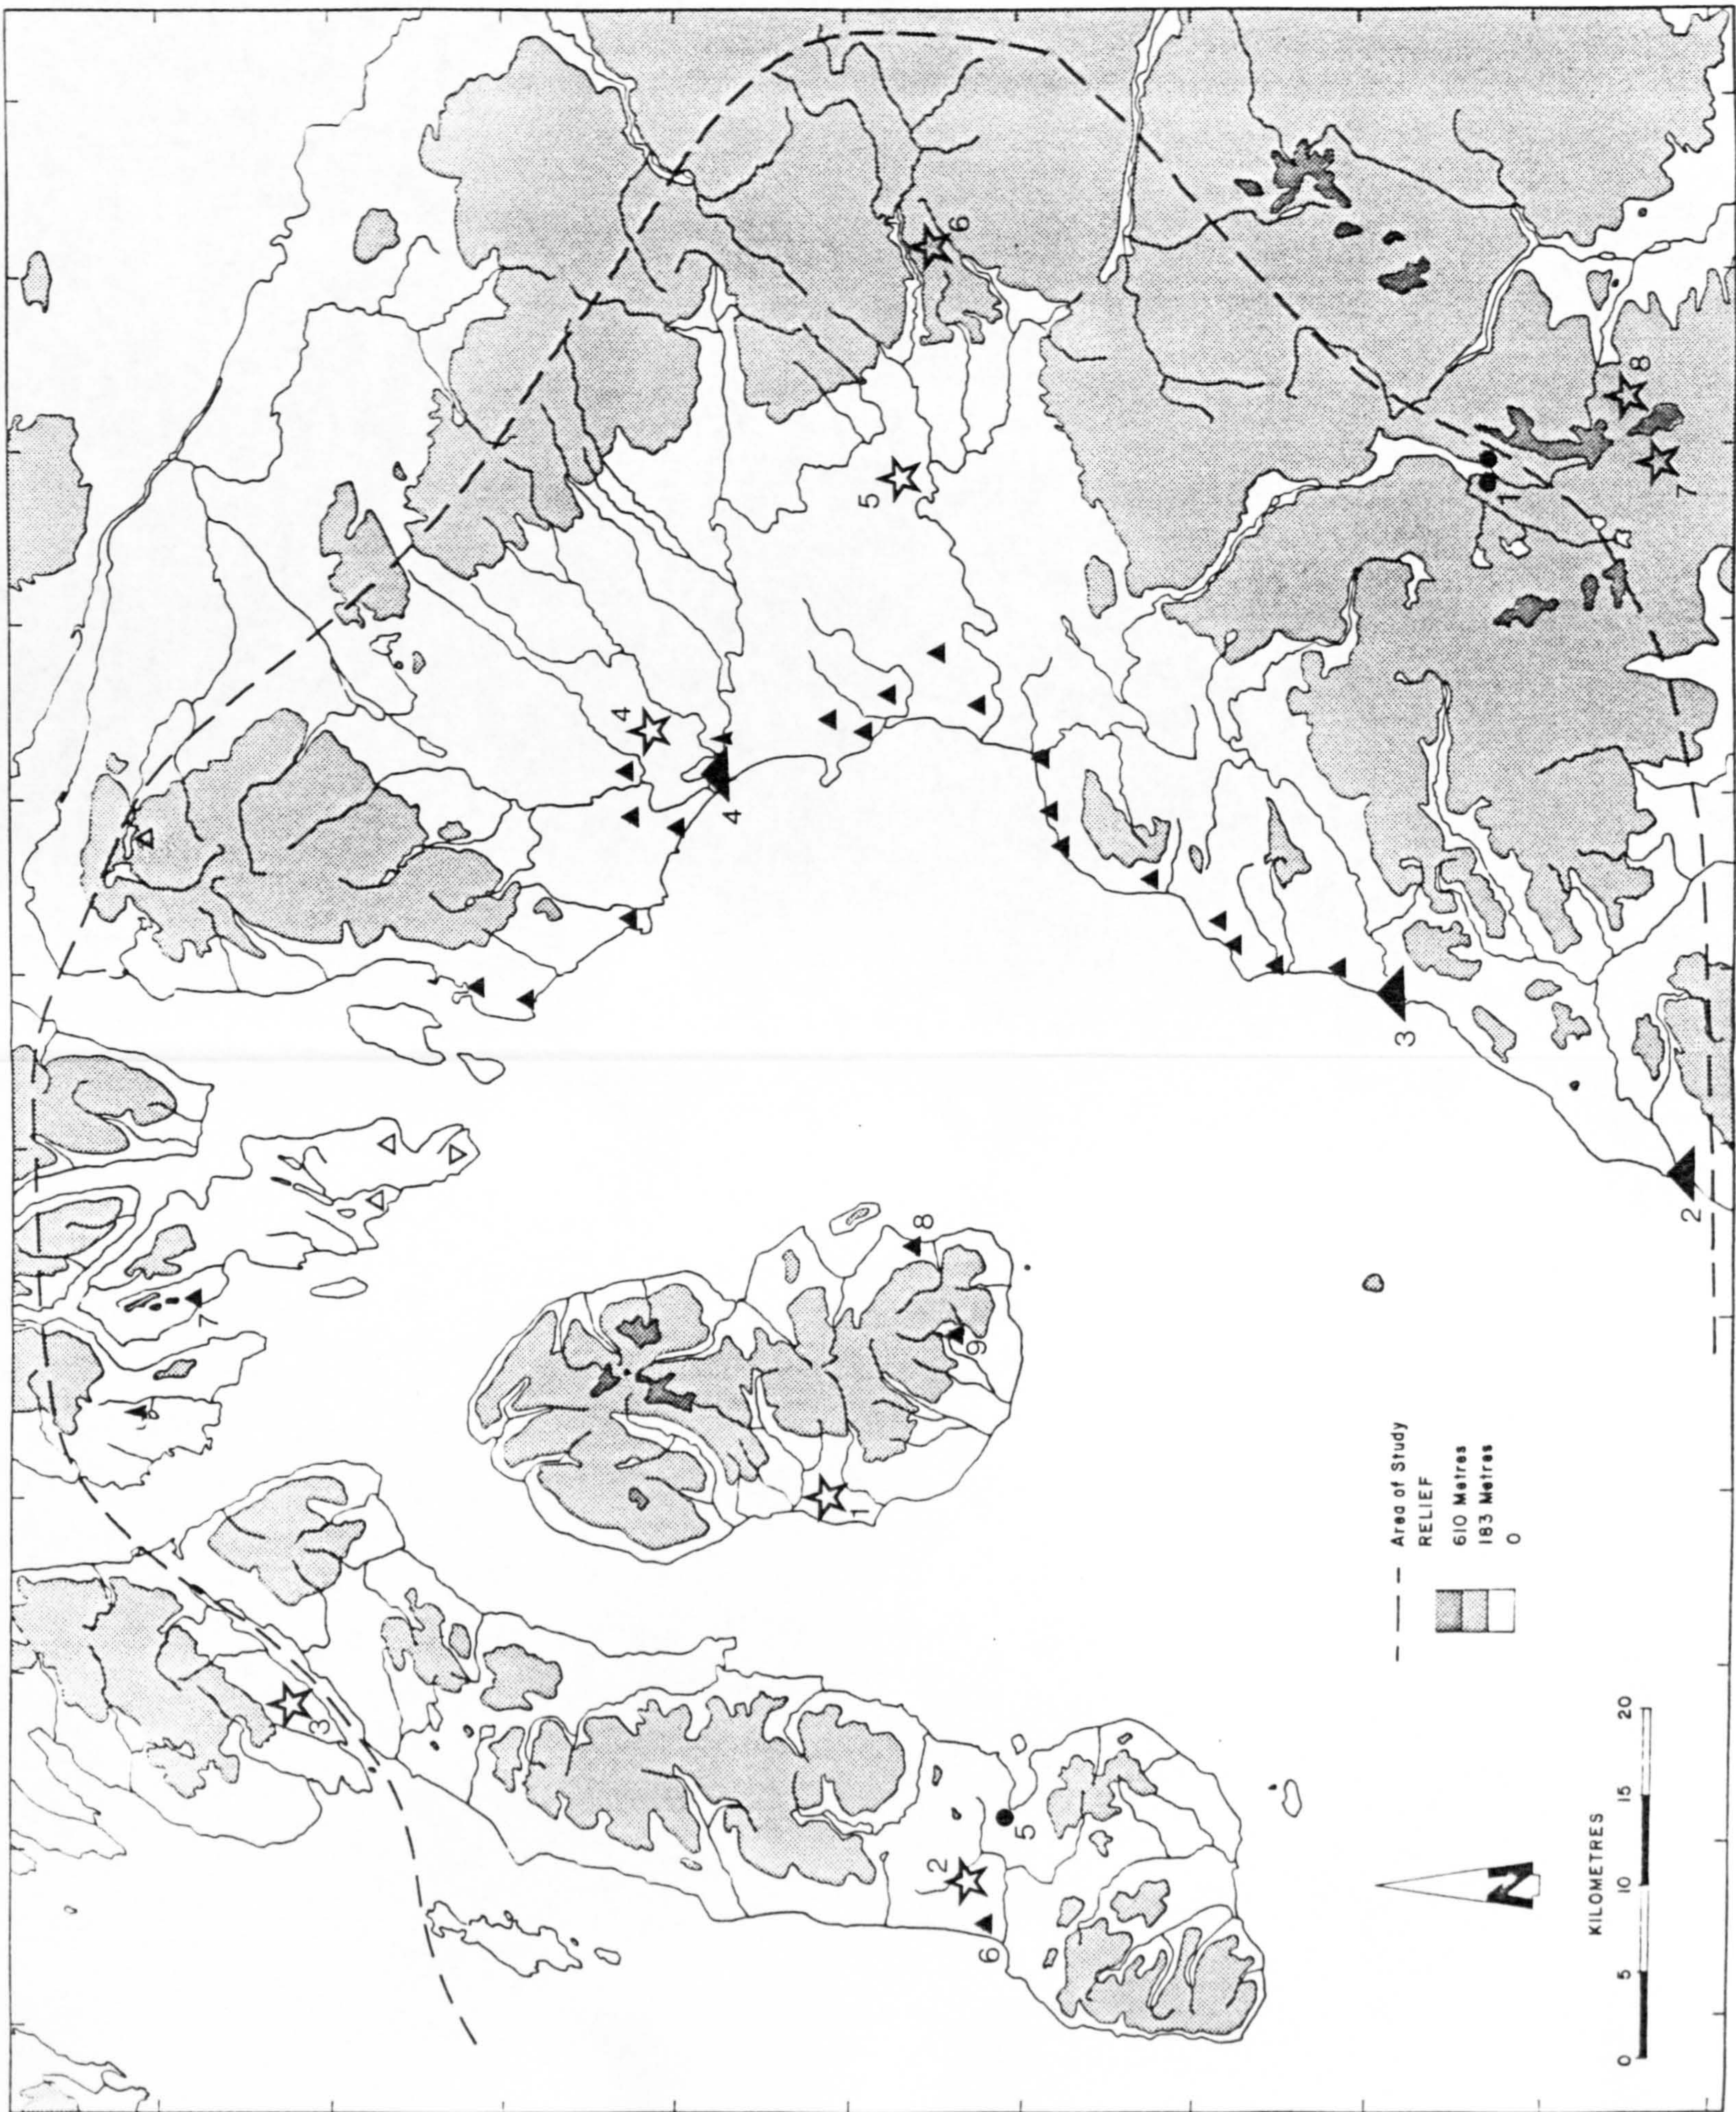

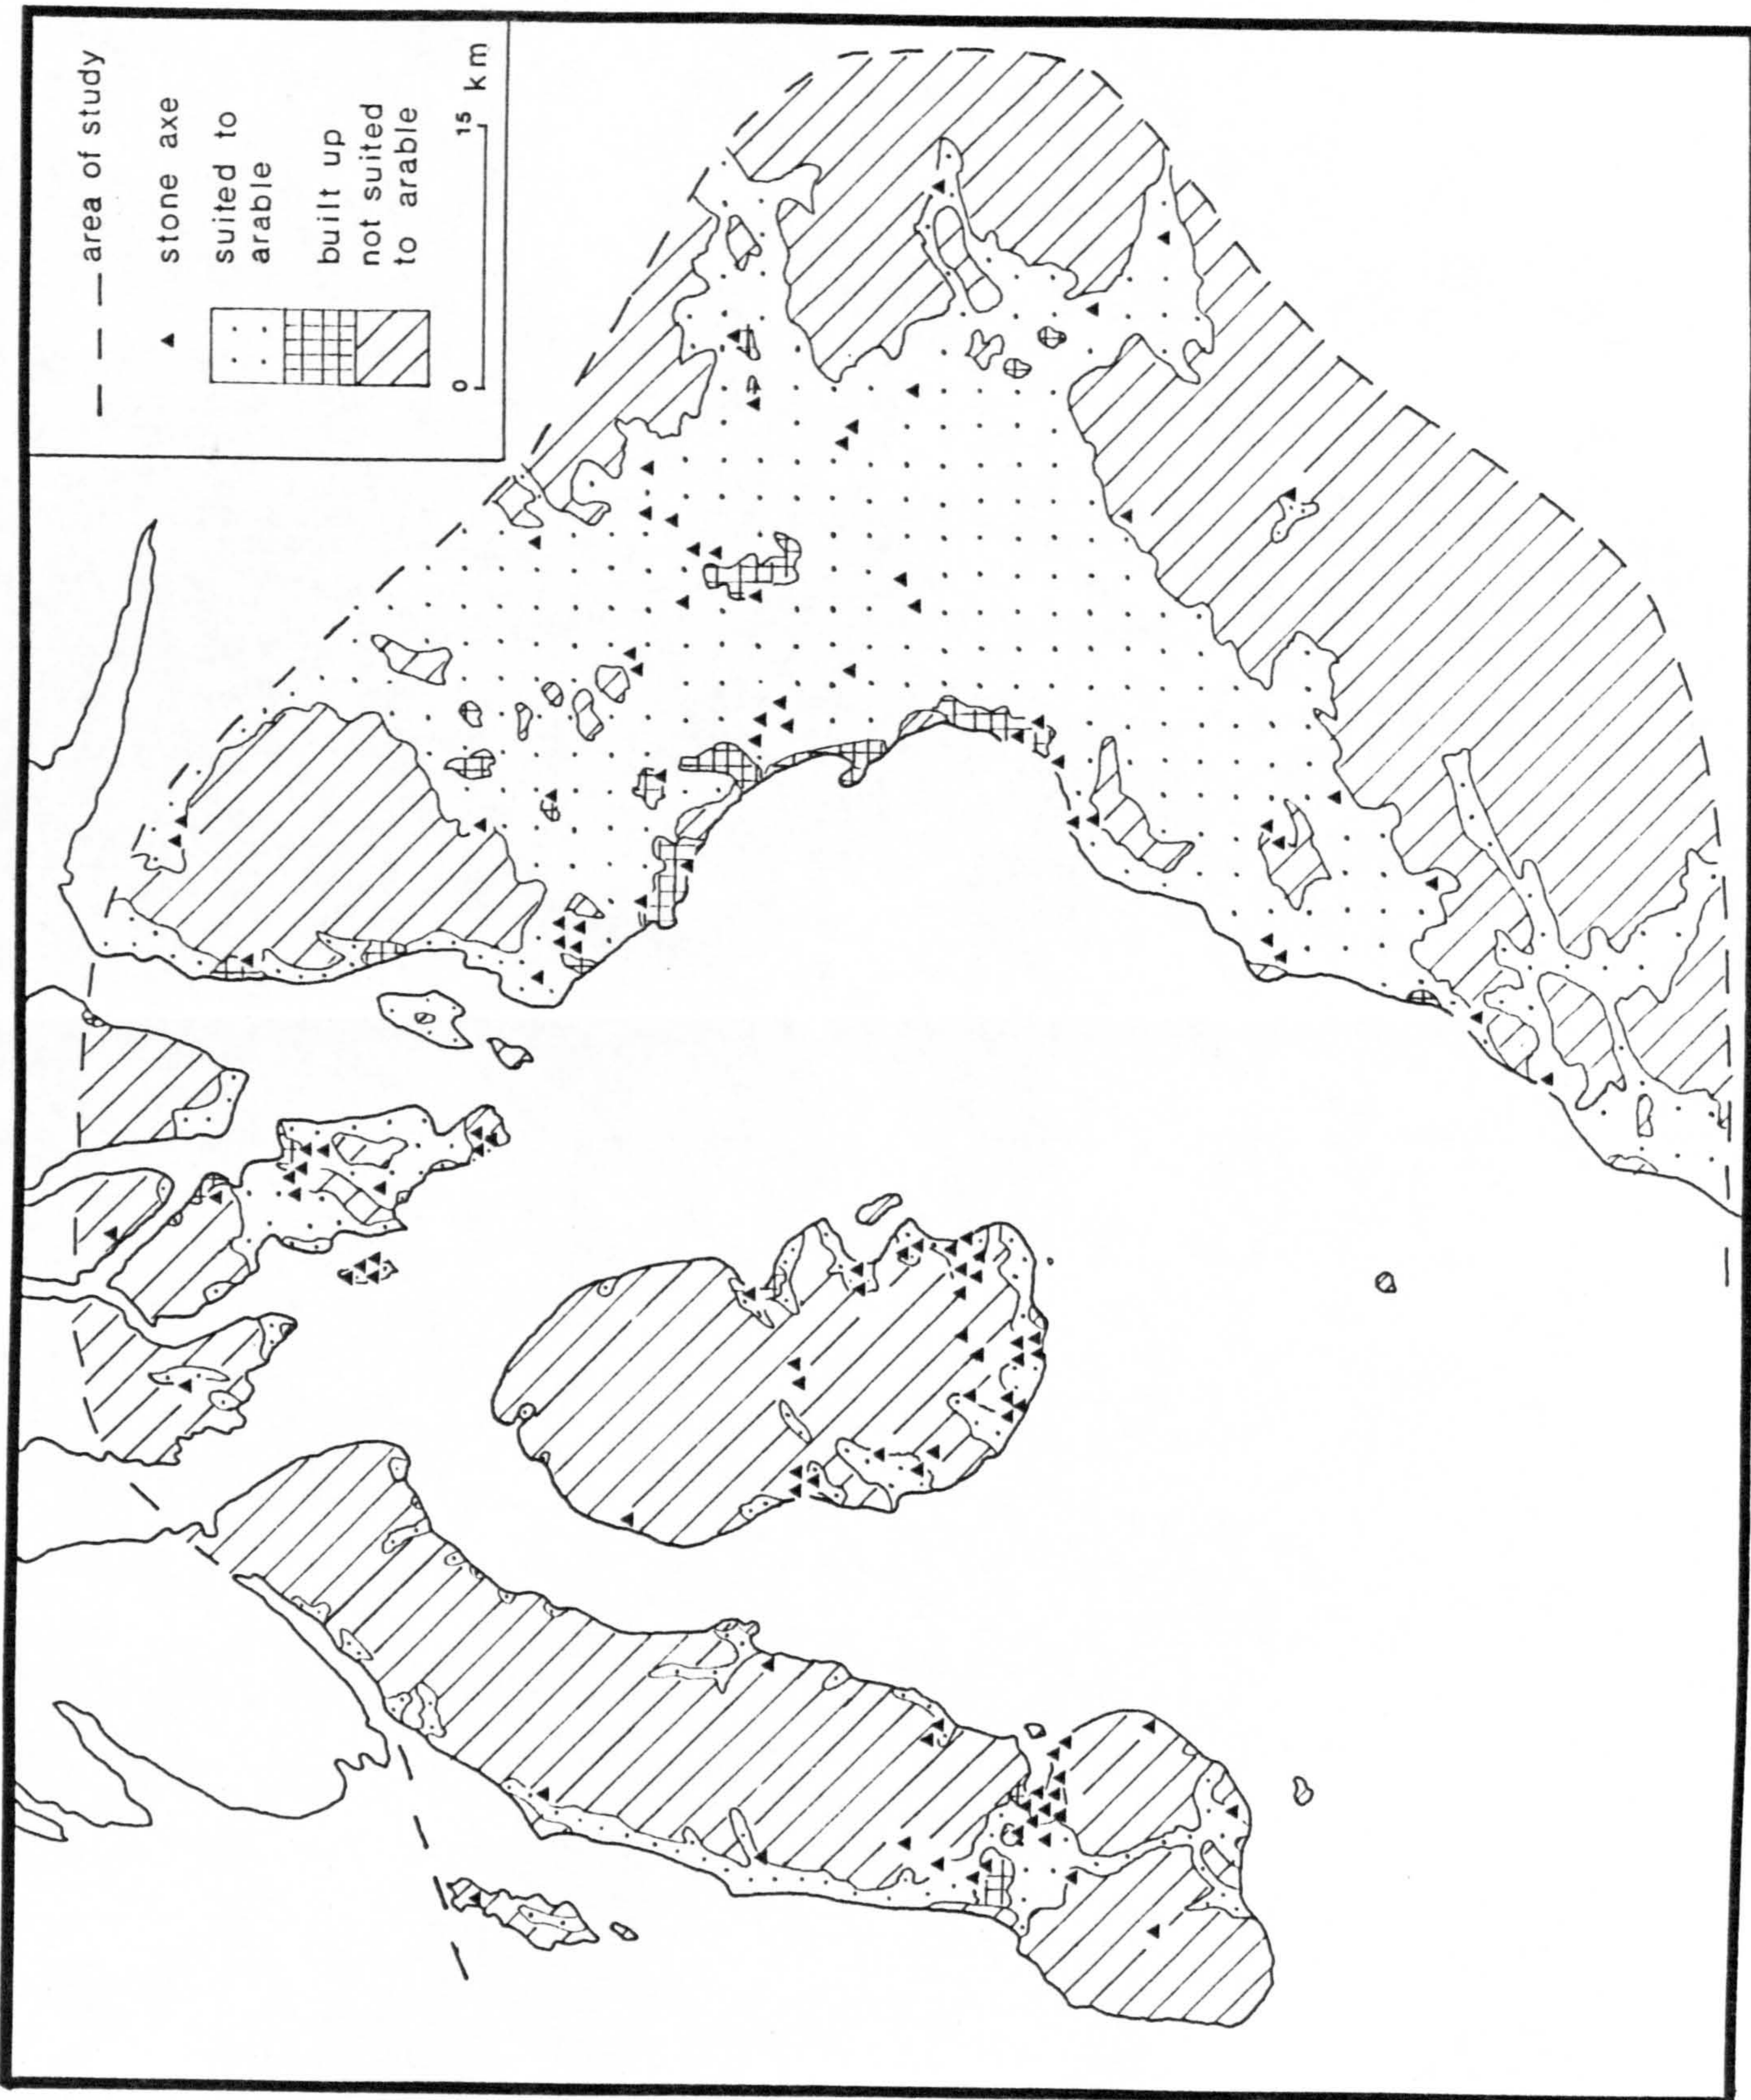

Fig. 6.2 Distribution of polished stone axeheads in relation to land suited to present-day arable agriculture (classes 2, 3, 4), and to built-up areas (based on Soil Survey of Scotland, Land Capability for Agriculture, sheet 6, South West Scotland, The Macaulay Institute for Soil Reserach, 1982, Aberdeen)

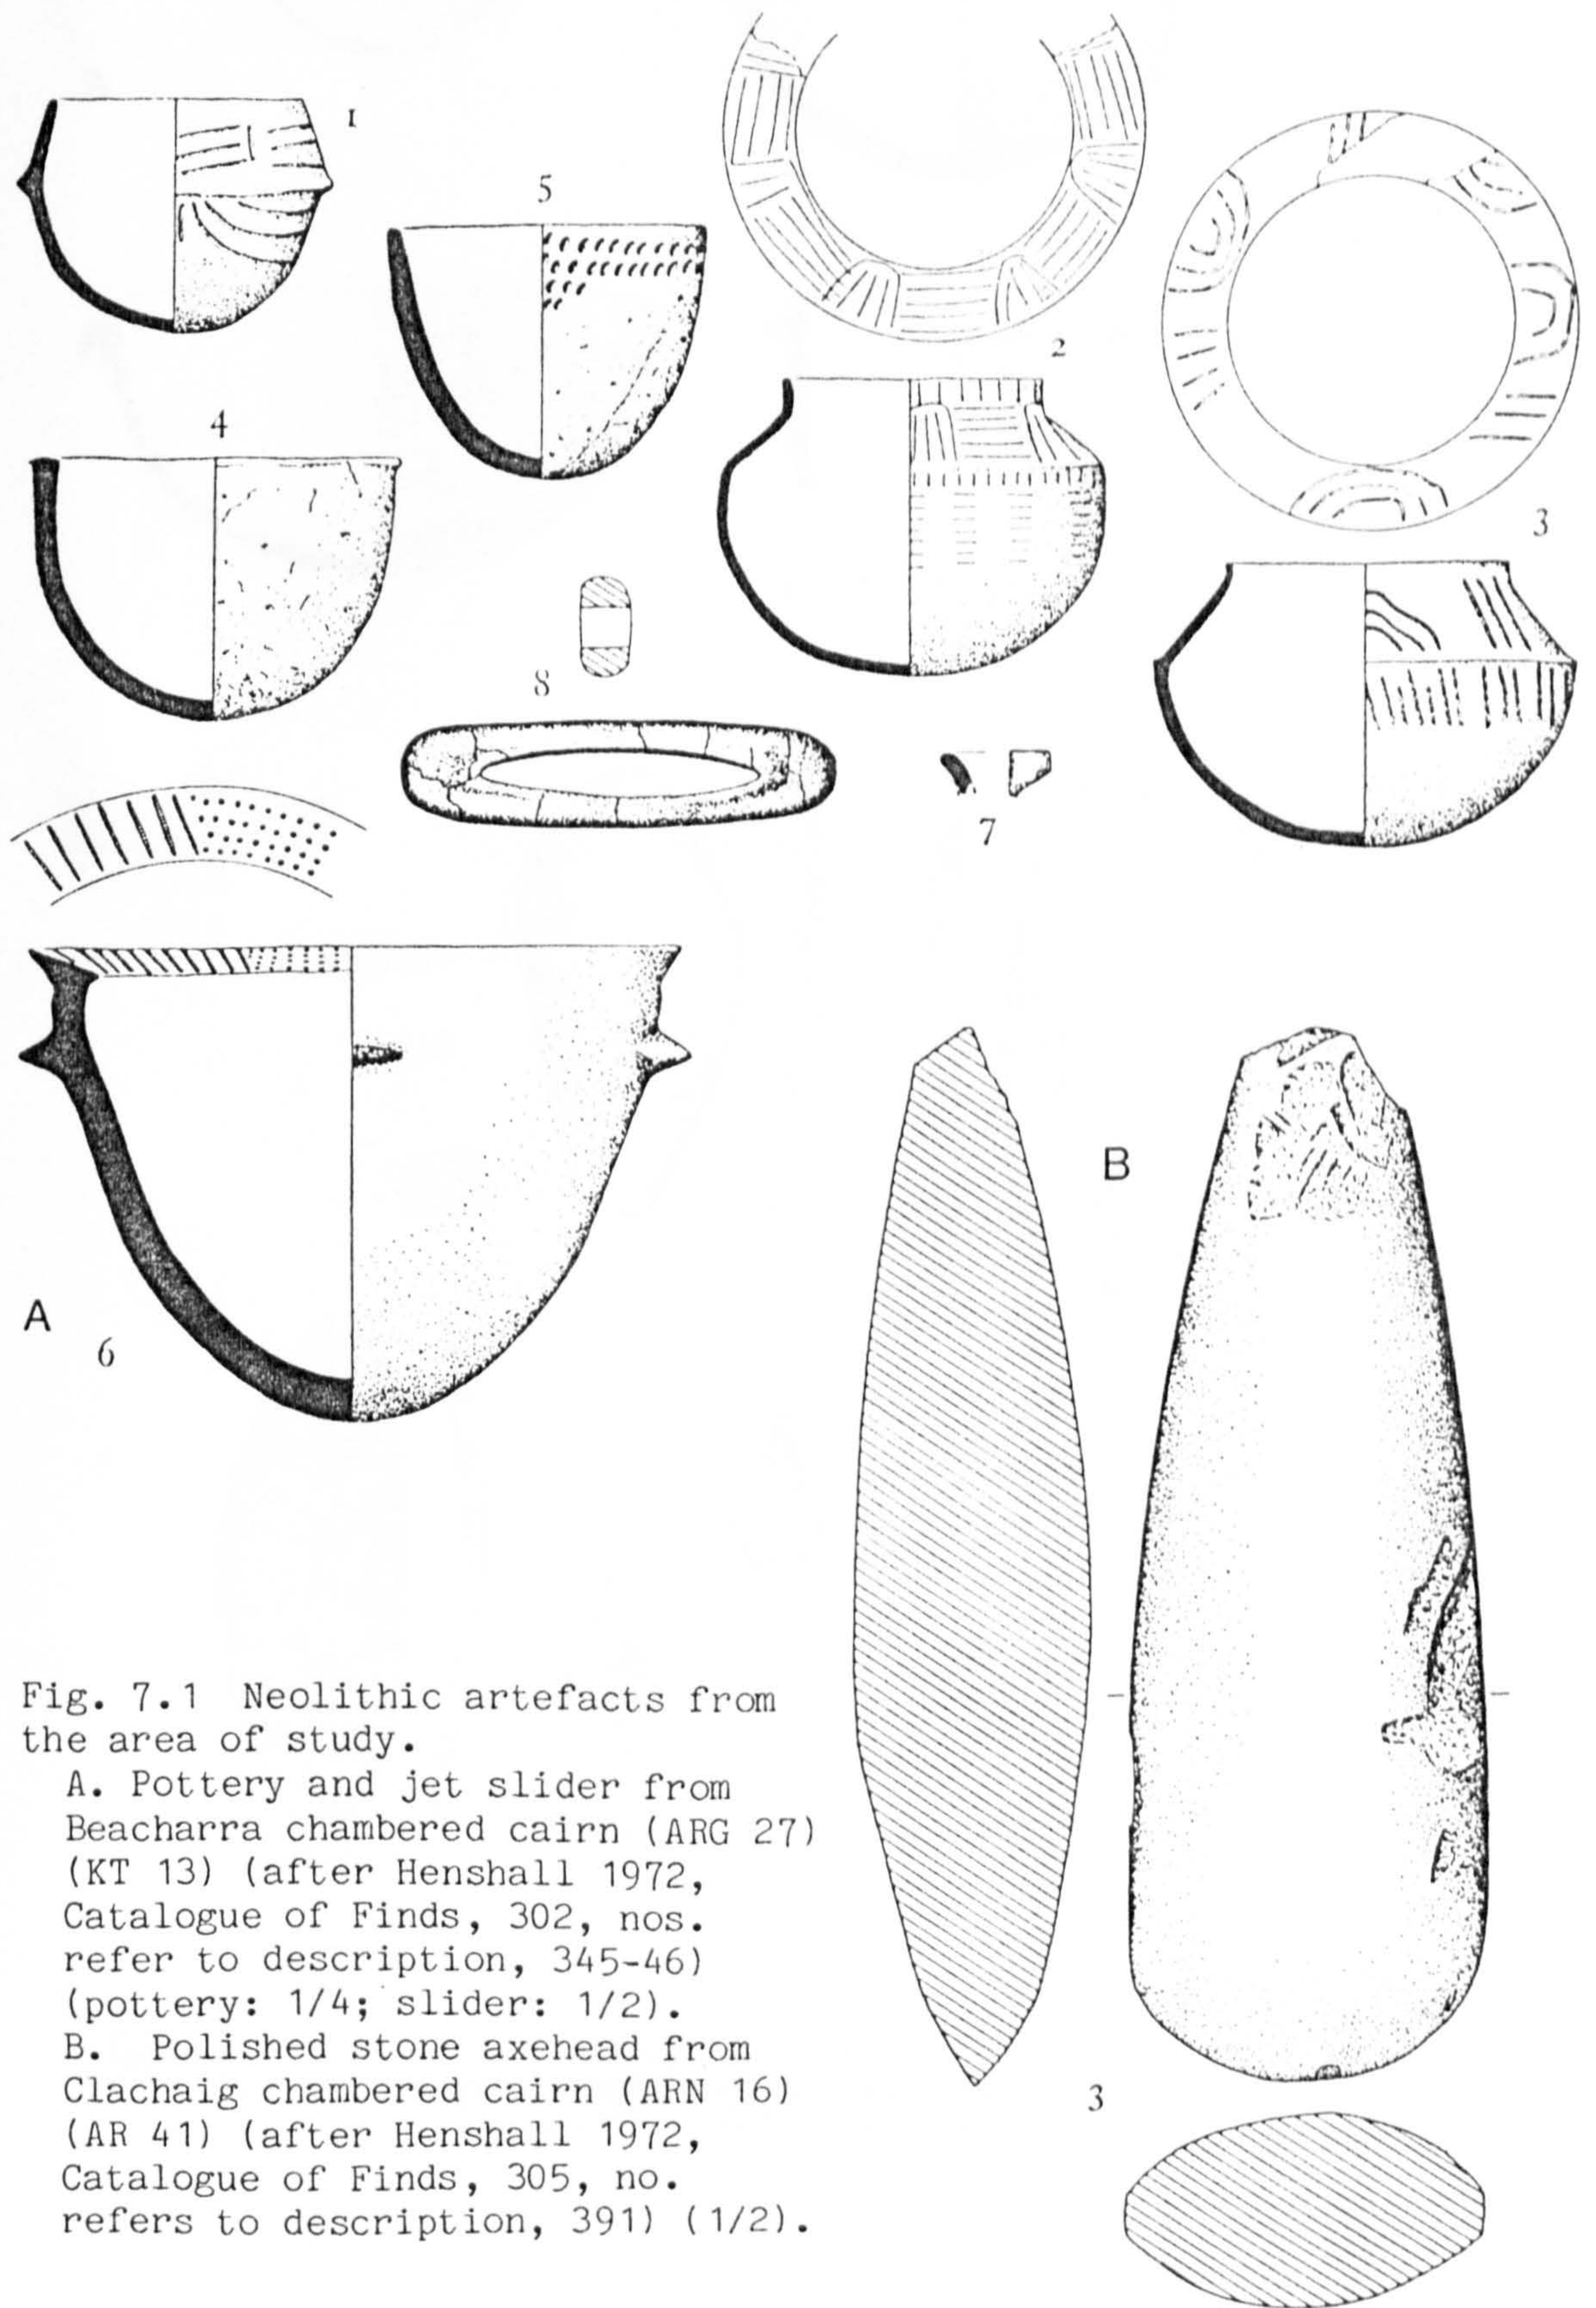

Fig. 7.1 Neolithic artefacts from the area of study.

A. Pottery and jet slider from Becharra chambered cairn (ARG 27) (KT 13) (after Henshall 1972, Catalogue of Finds, 302, nos. refer to description, 345-46) (pottery: 1/4; slider: 1/2).

B. Polished stone axehead from Clachaig chambered cairn (ARN 16) (AR 41) (after Henshall 1972, Catalogue of Finds, 305, no. refers to description, 391) (1/2).

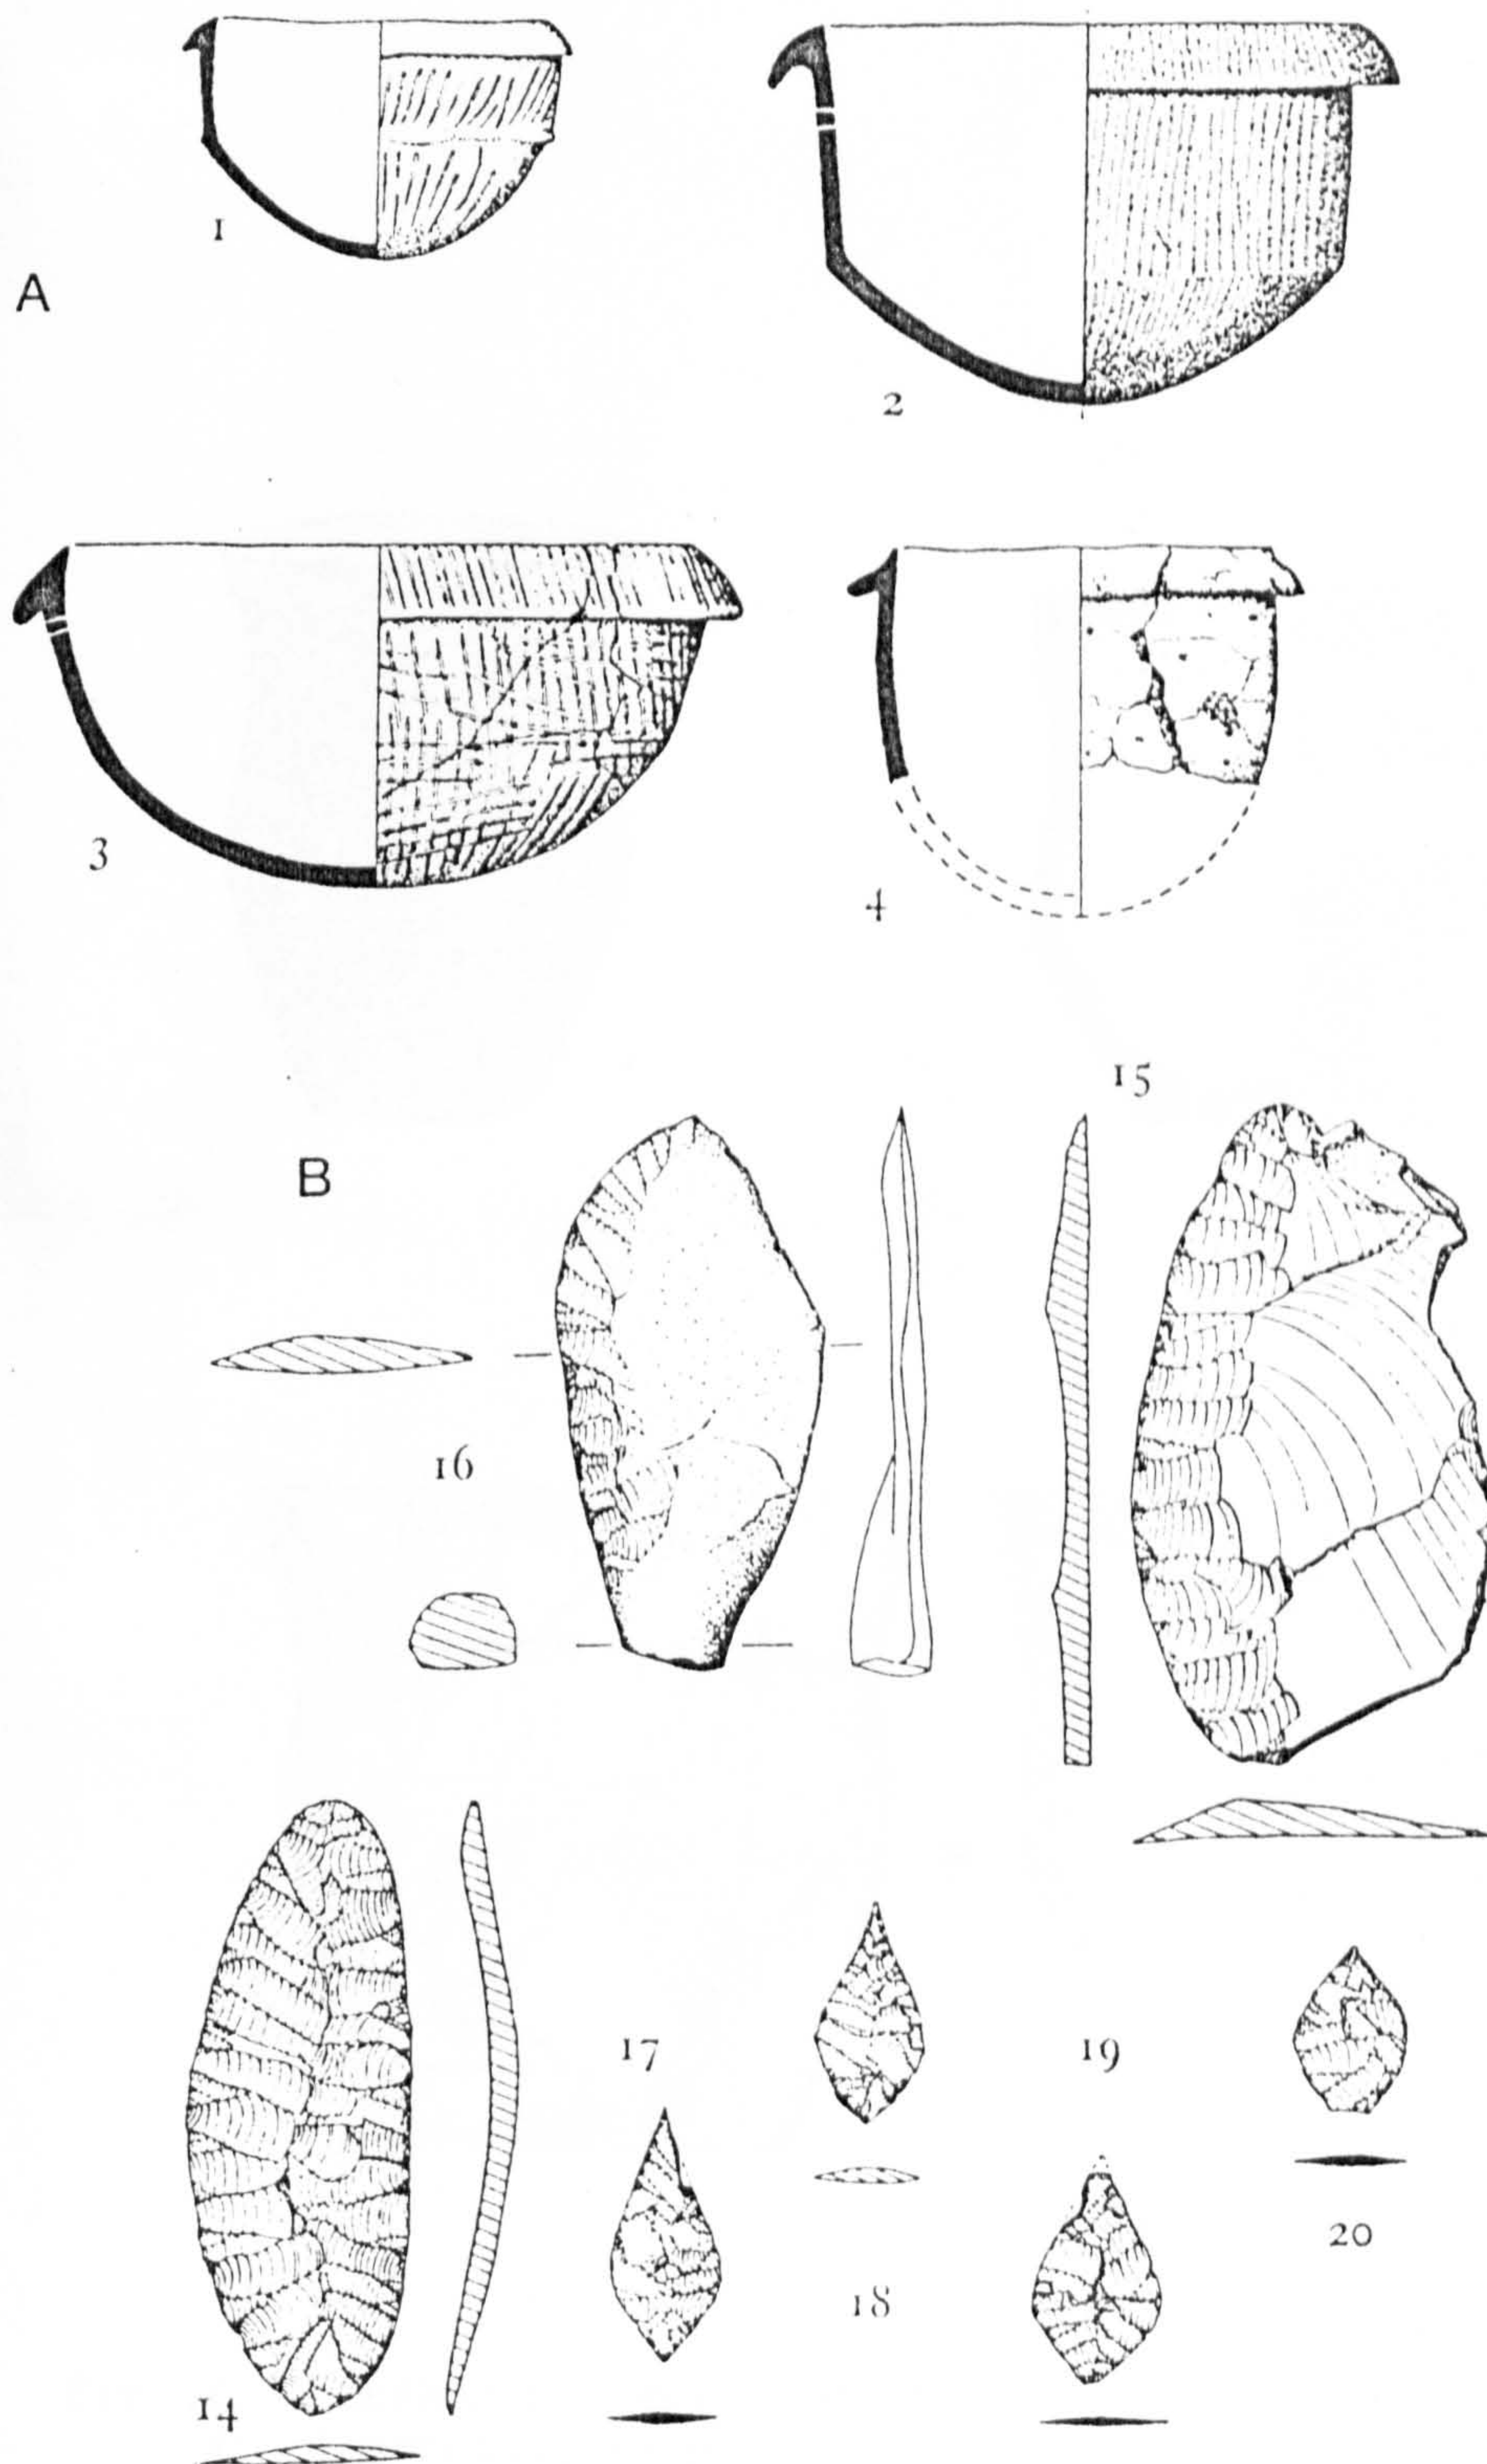

Fig. 7.2 Neolithic artefacts from the area of study.
 A. Pottery from Glenvoidean chambered cairn (BUT 1) (BU 2) (after Henshall 1972, Catalogue of Finds, 302, nos. refer to description, 408) (1/4).
 B. Flint knives and arrowheads from Giants' Graves (ARN 11) (AR 54) (after Henshall 1972, Catalogue of Finds, 304, nos. refer to description, 385) (1/2).

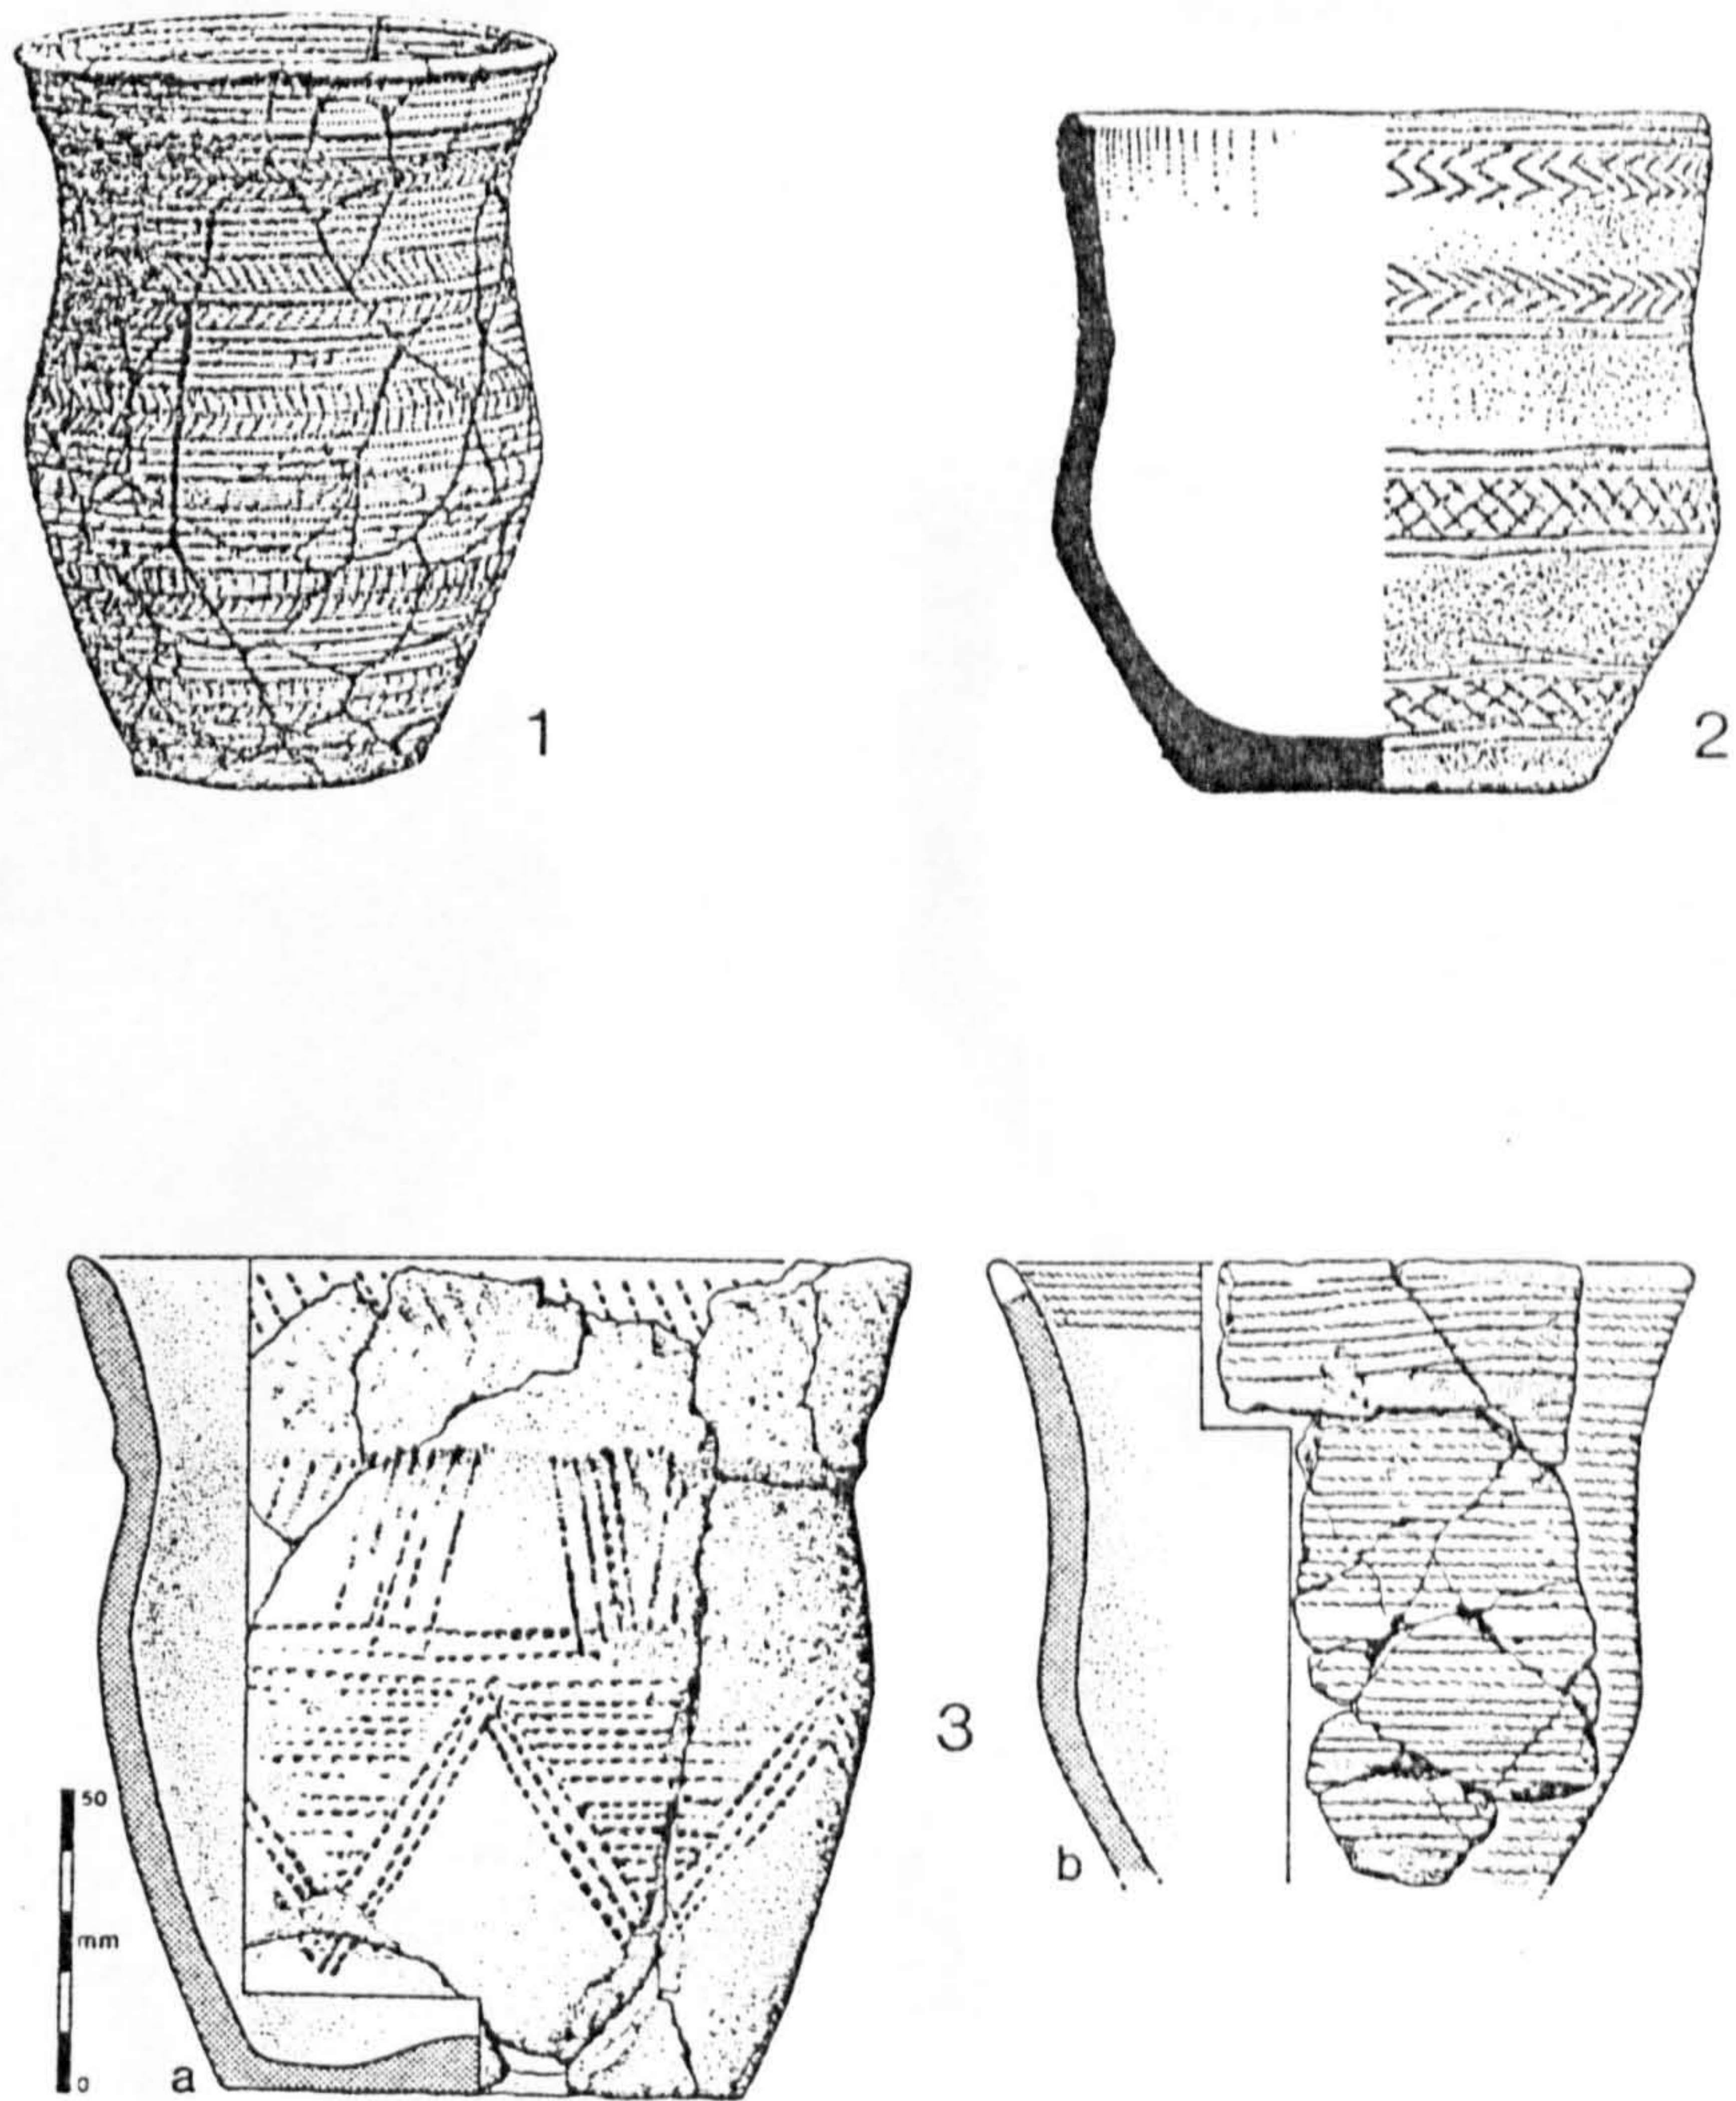

Fig. 7.3 Beaker Pottery from the area of study.
 1) Courthill, Dalry, Ayrshire (AY 25)
 (after Cochran-Patrick 1874, 285) (height: 230 mm).
 2) Balnabraid Cairn, Kintyre, cist 6 (KT 57)
 (after Ritchie 1967, fig. 3) (height: 127 mm).
 3) a. Machrie North (AR 5): beaker from simple cairn
 b. Kilpatrick (AR 38): beaker from kerb cairn
 (after Barber 1982) (scale as shown).

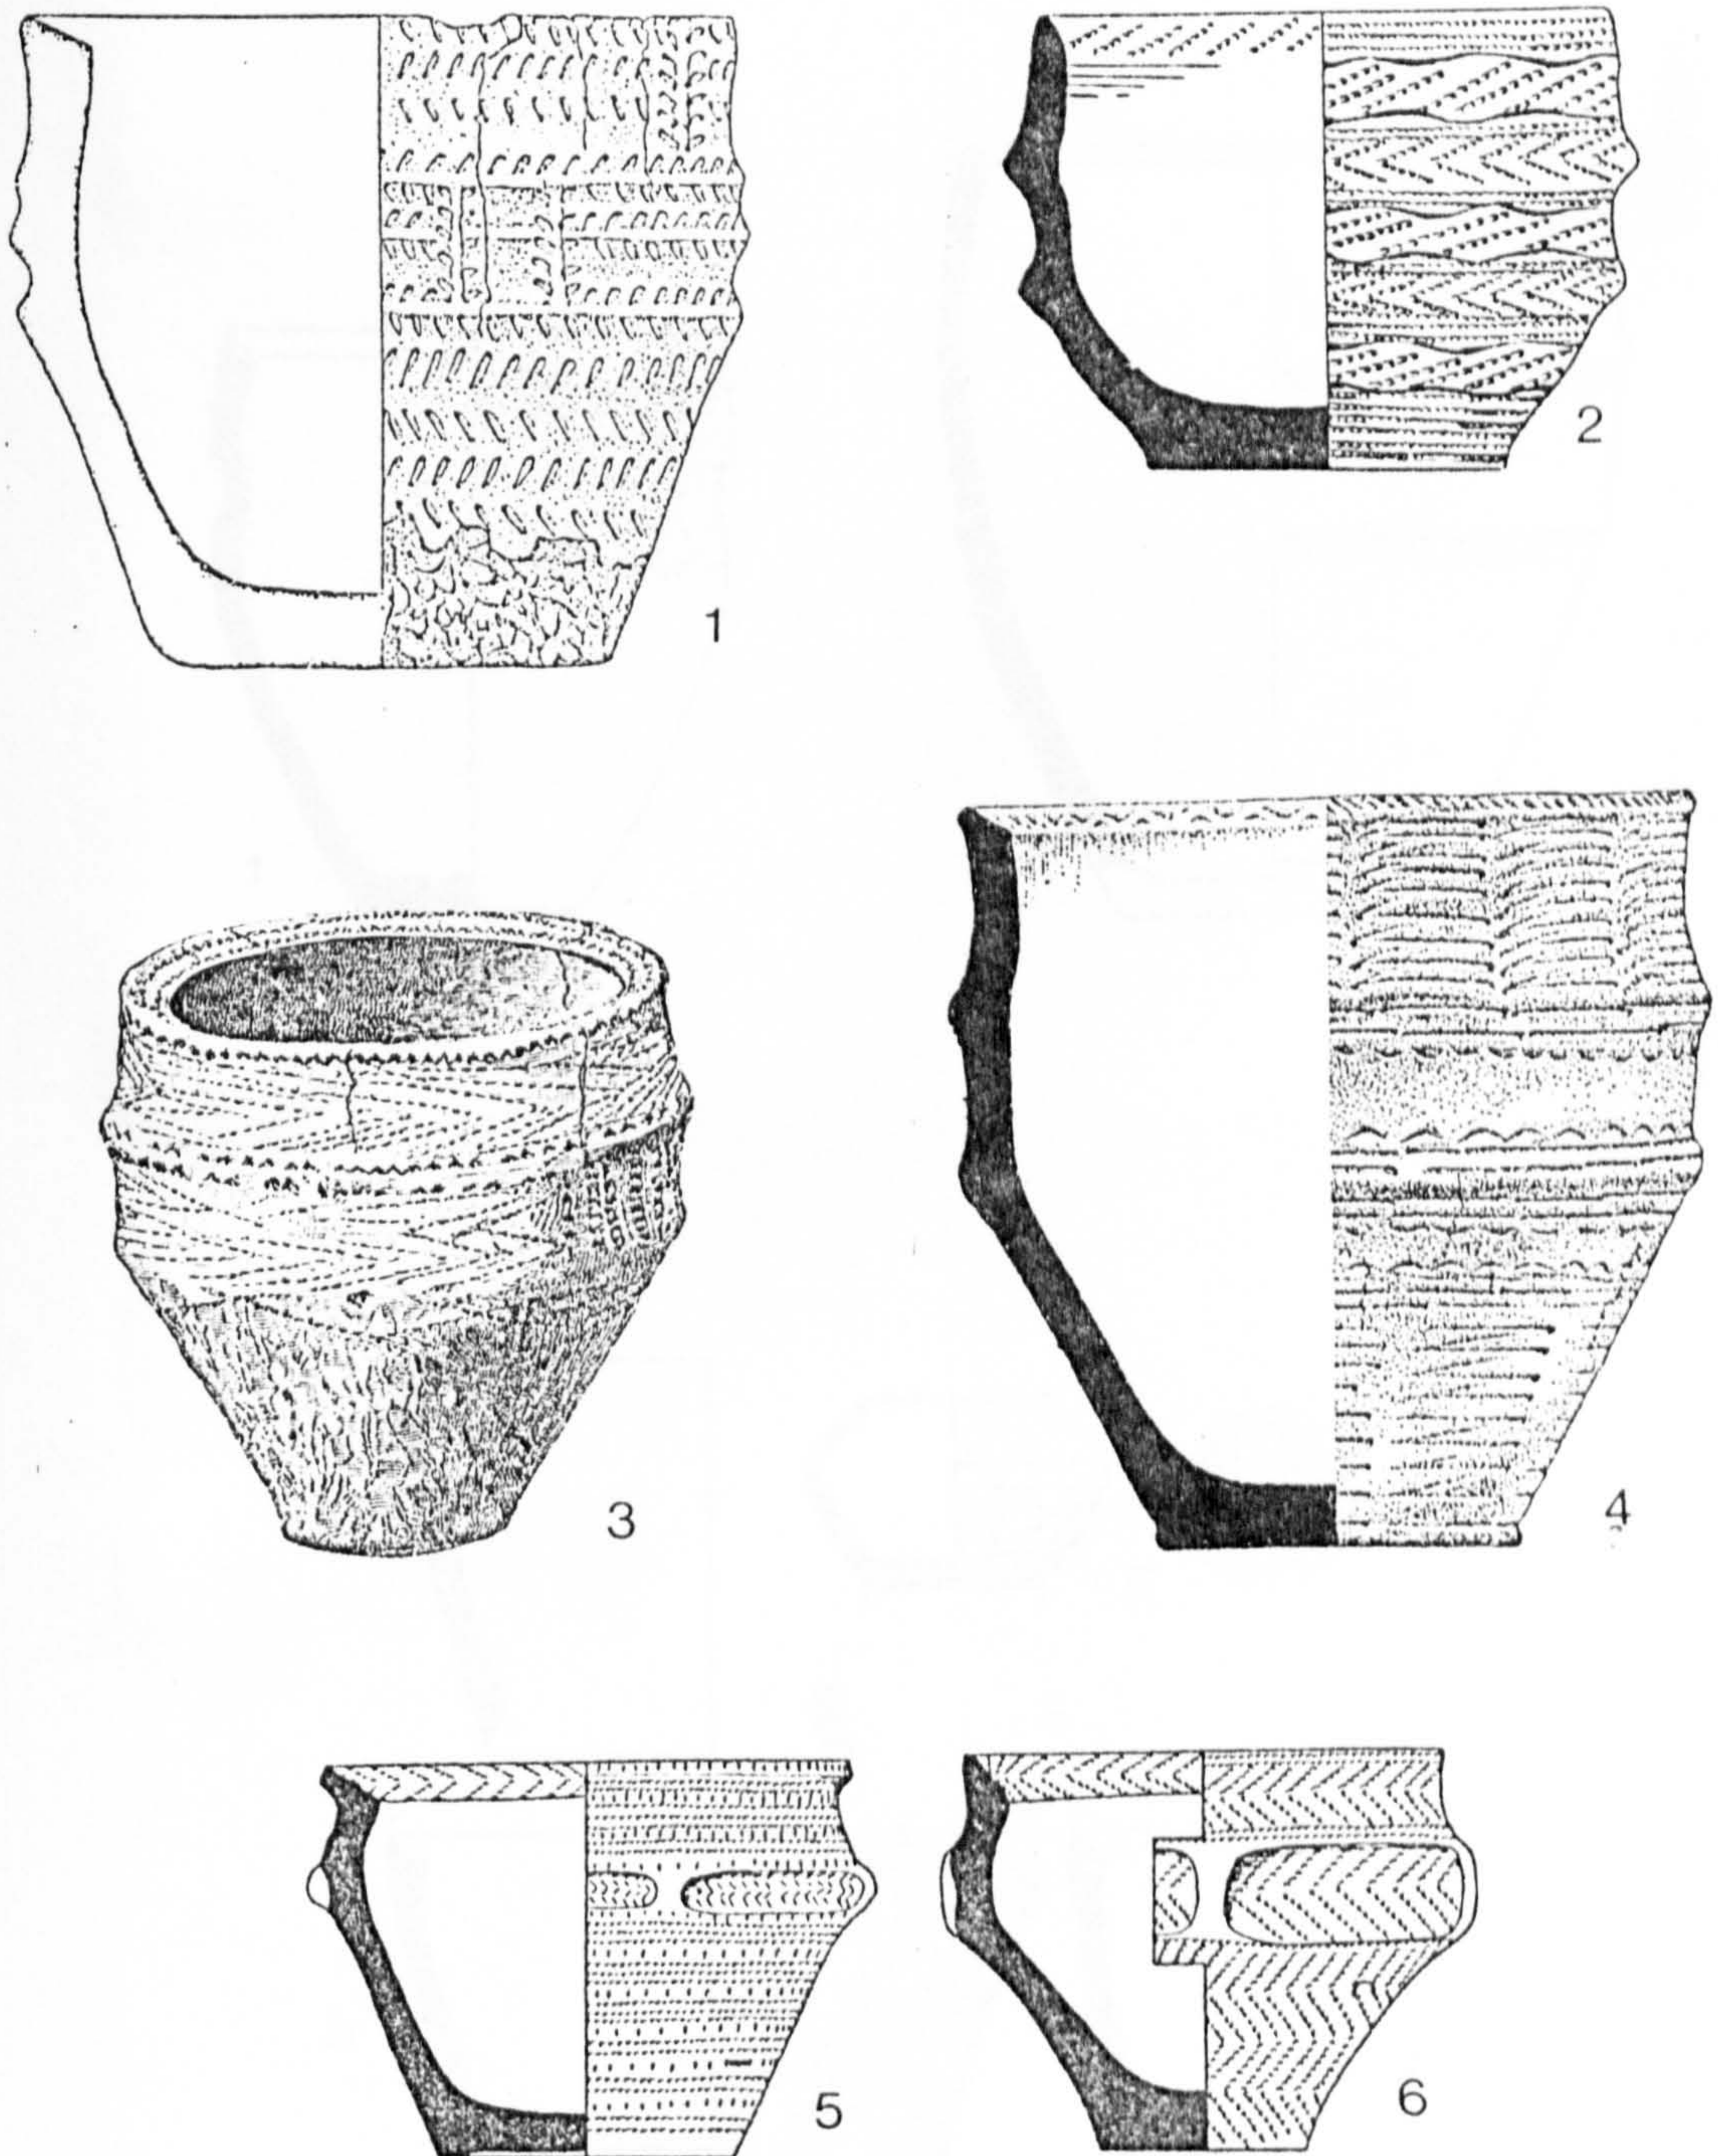

Fig. 7.4 Food Vessels from the area of study.

- 1) Bowl: Deer Park, Brodick Castle, Arran (AR 78) (Fairhurst et al. forthcoming) (by kind permission of Dr. A Morrison) (height: 108 mm).
- 2) Tripartite Bowl: Glenramskill, Kintyre, (KT 59) (after Young 1951 fig. 1, 1) (1/3)
- 3) Machrie Vase: Mount Stuart, Bute (BU 34) (after Bryce 1904, fig. 39) (height: 175 mm).
- 4) Machrie Vase: Balnabraid cairn, Kintyre, cist 4 (KT 57) (after Ritchie 1967, fig. 3) (height: 183 mm).
- 5) Vase: Ayr (AY 70) (after Simpson 1965, fig. 3, 11) (1/3).
- 6) Vase: Wallacetown, Ayr (AY 70) (after Simpson 1965, fig. 3, 12) (1/3).

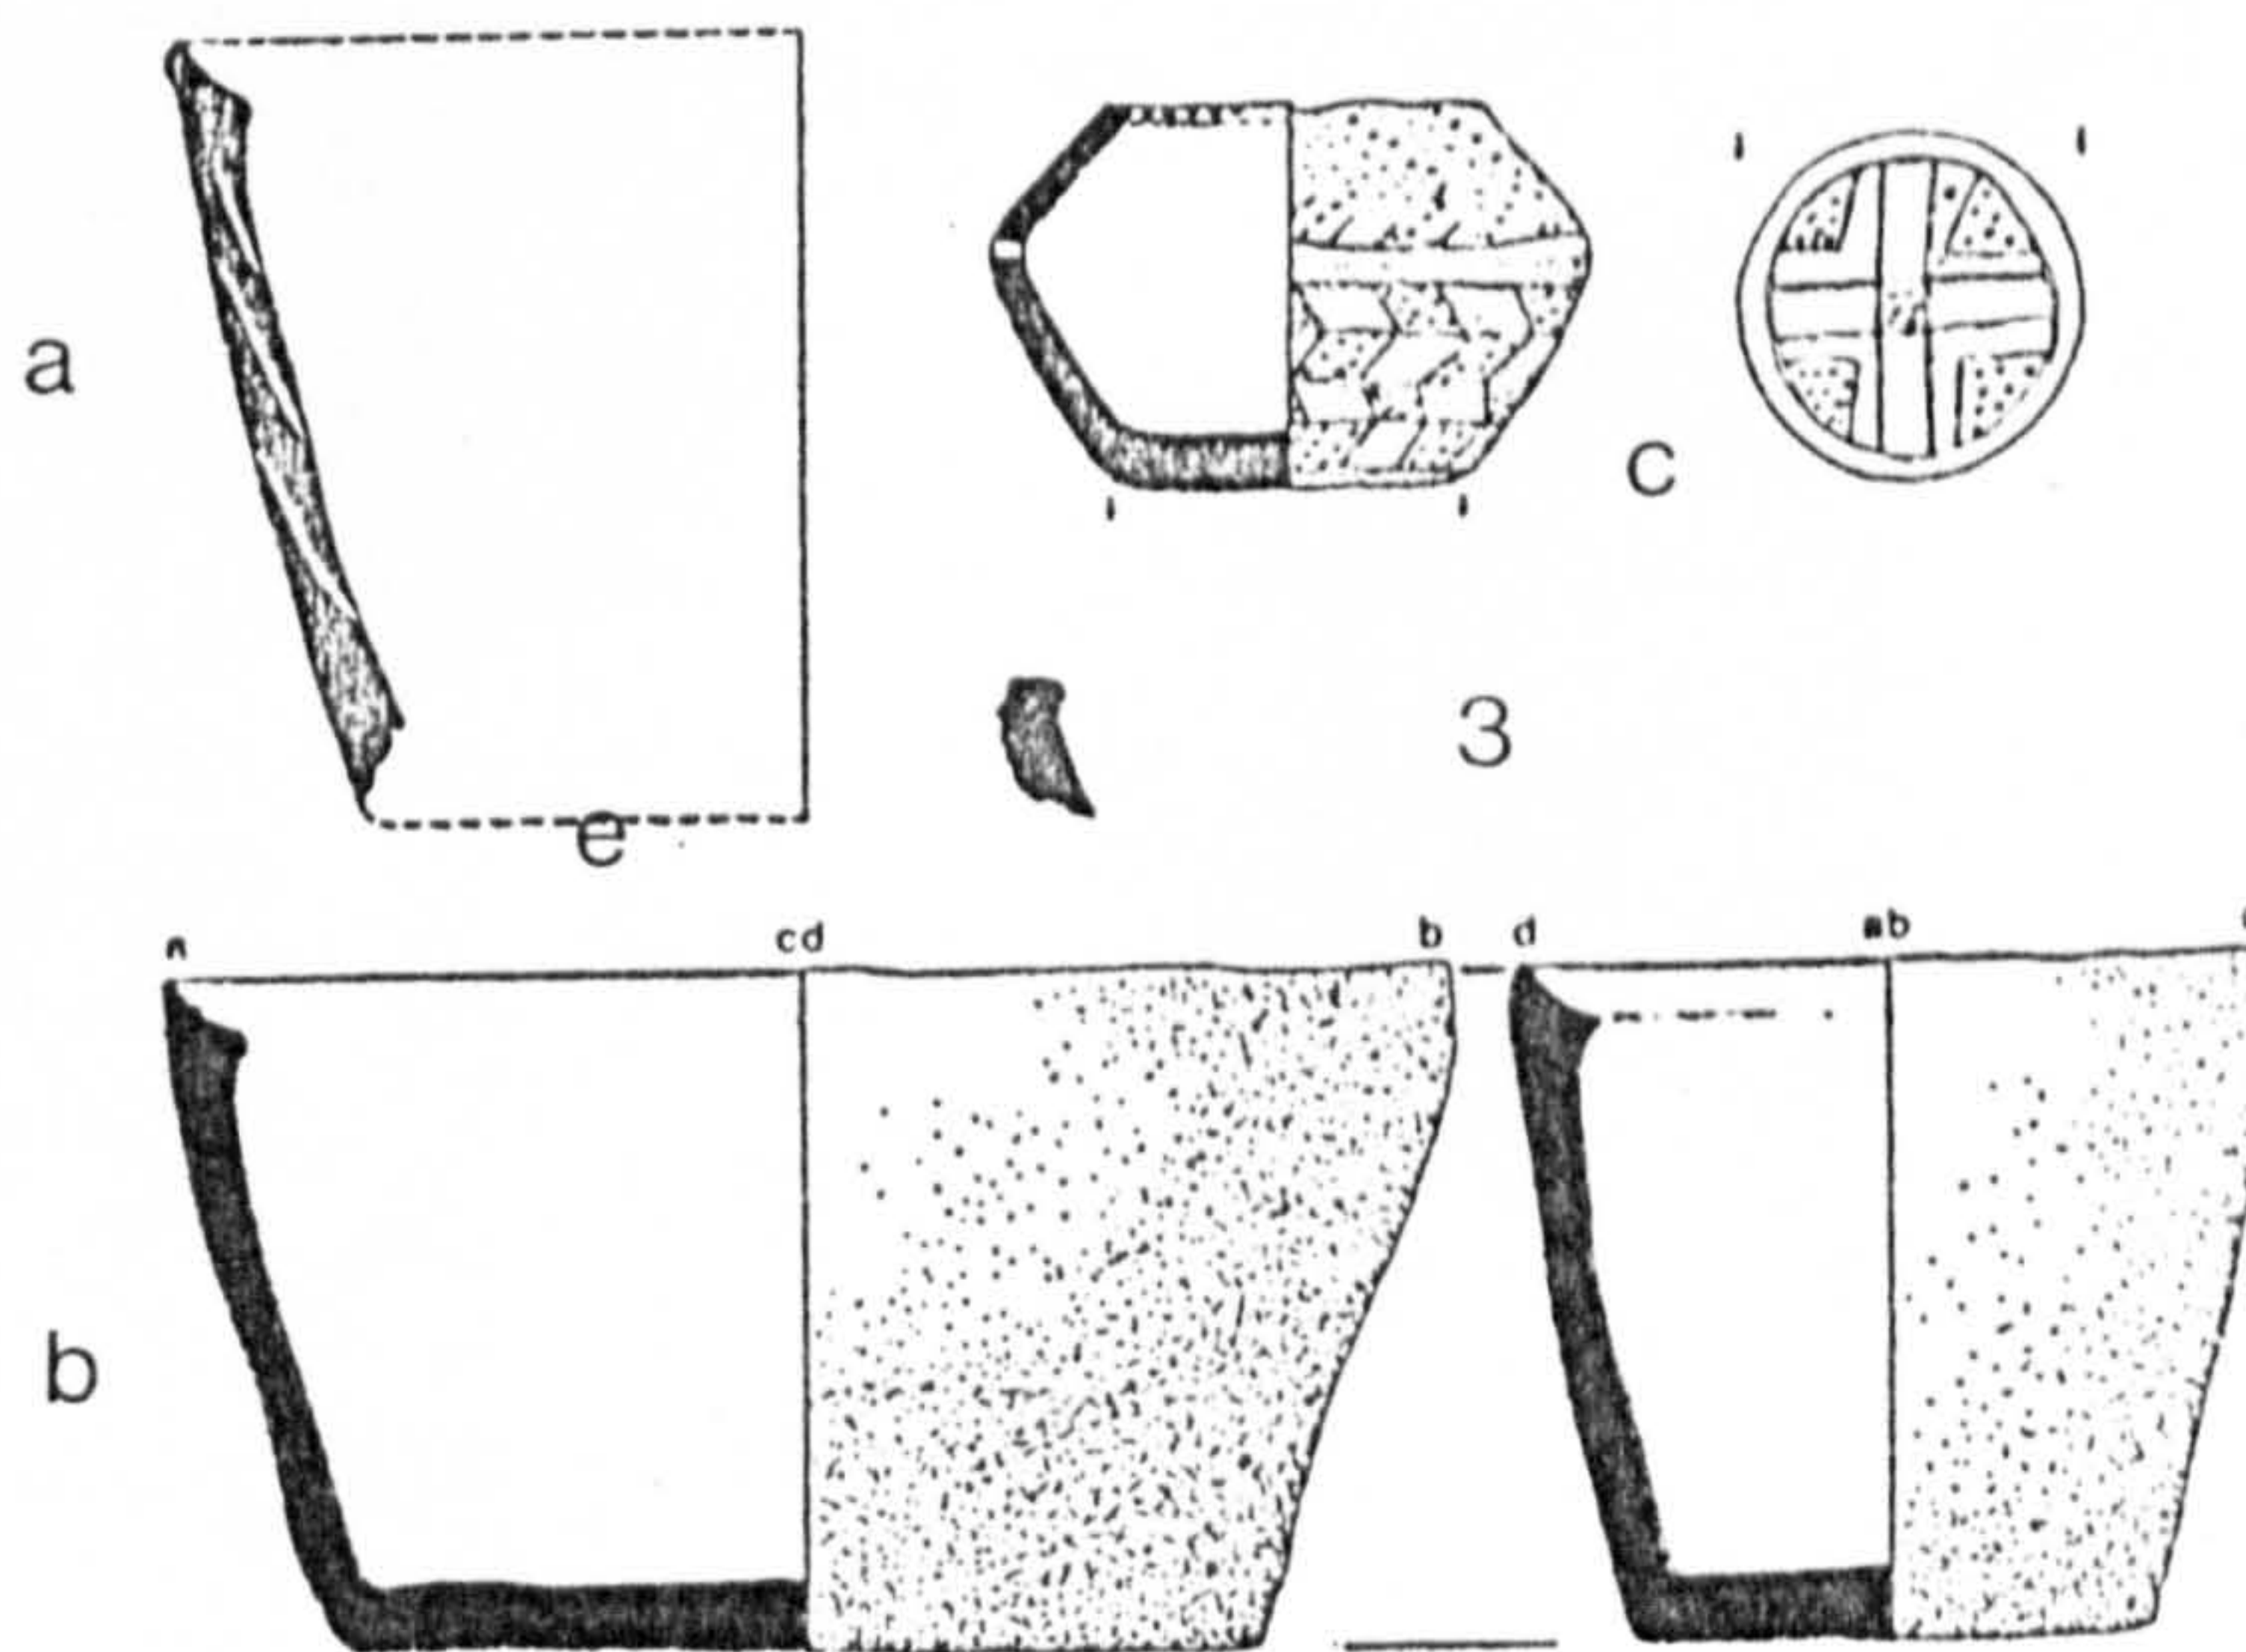

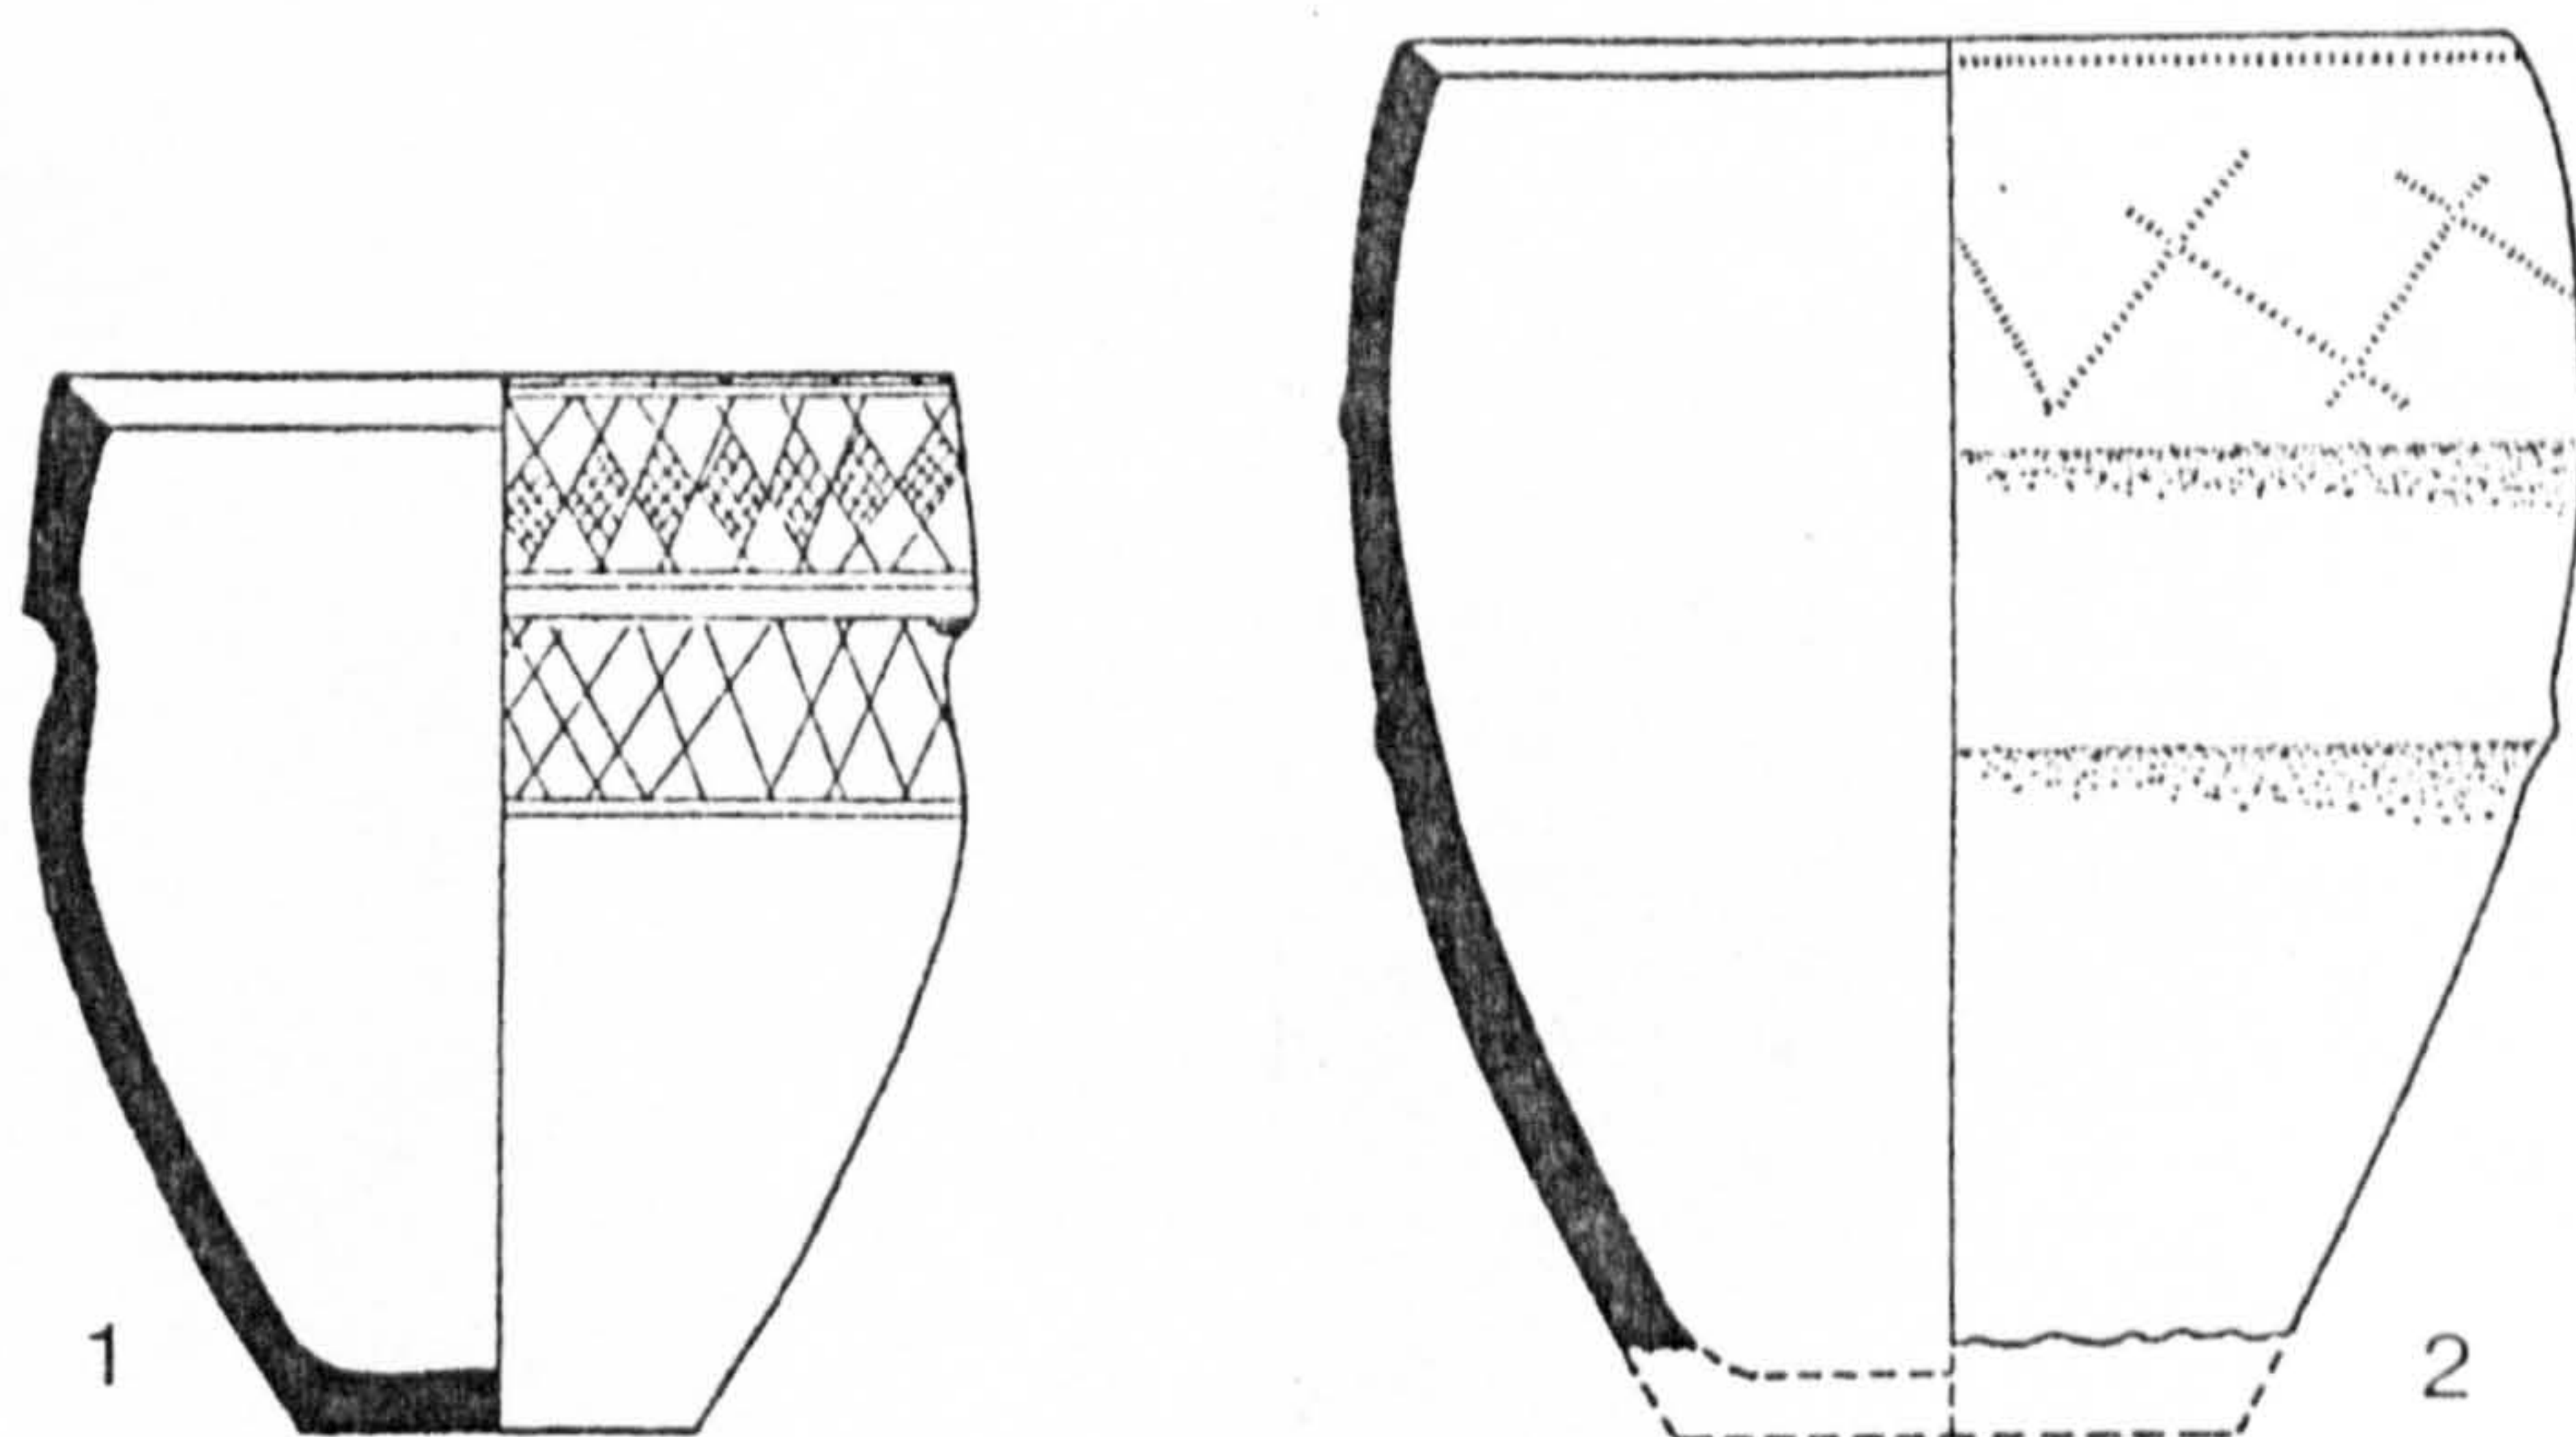

Fig. 7.5 Cinerary Urns from the area of study.
 1) Collared urn, possibly from Nelson Street, Largs (AY 11) (after Morrison 1968, fig. 2, 1) (1/6).
 2) Cordoned urn from Fences Farm, Ayrshire (AY 33) (after Morrison 1968, fig. 3, 12) (1/6).
 3) Bucket-shaped urns and pygmy vessel from Balloch Hill, Kintyre (KT 48) (after Peltenburg 1982, fig. 13) (a and b: 1/12.5; c: 1/6.25).

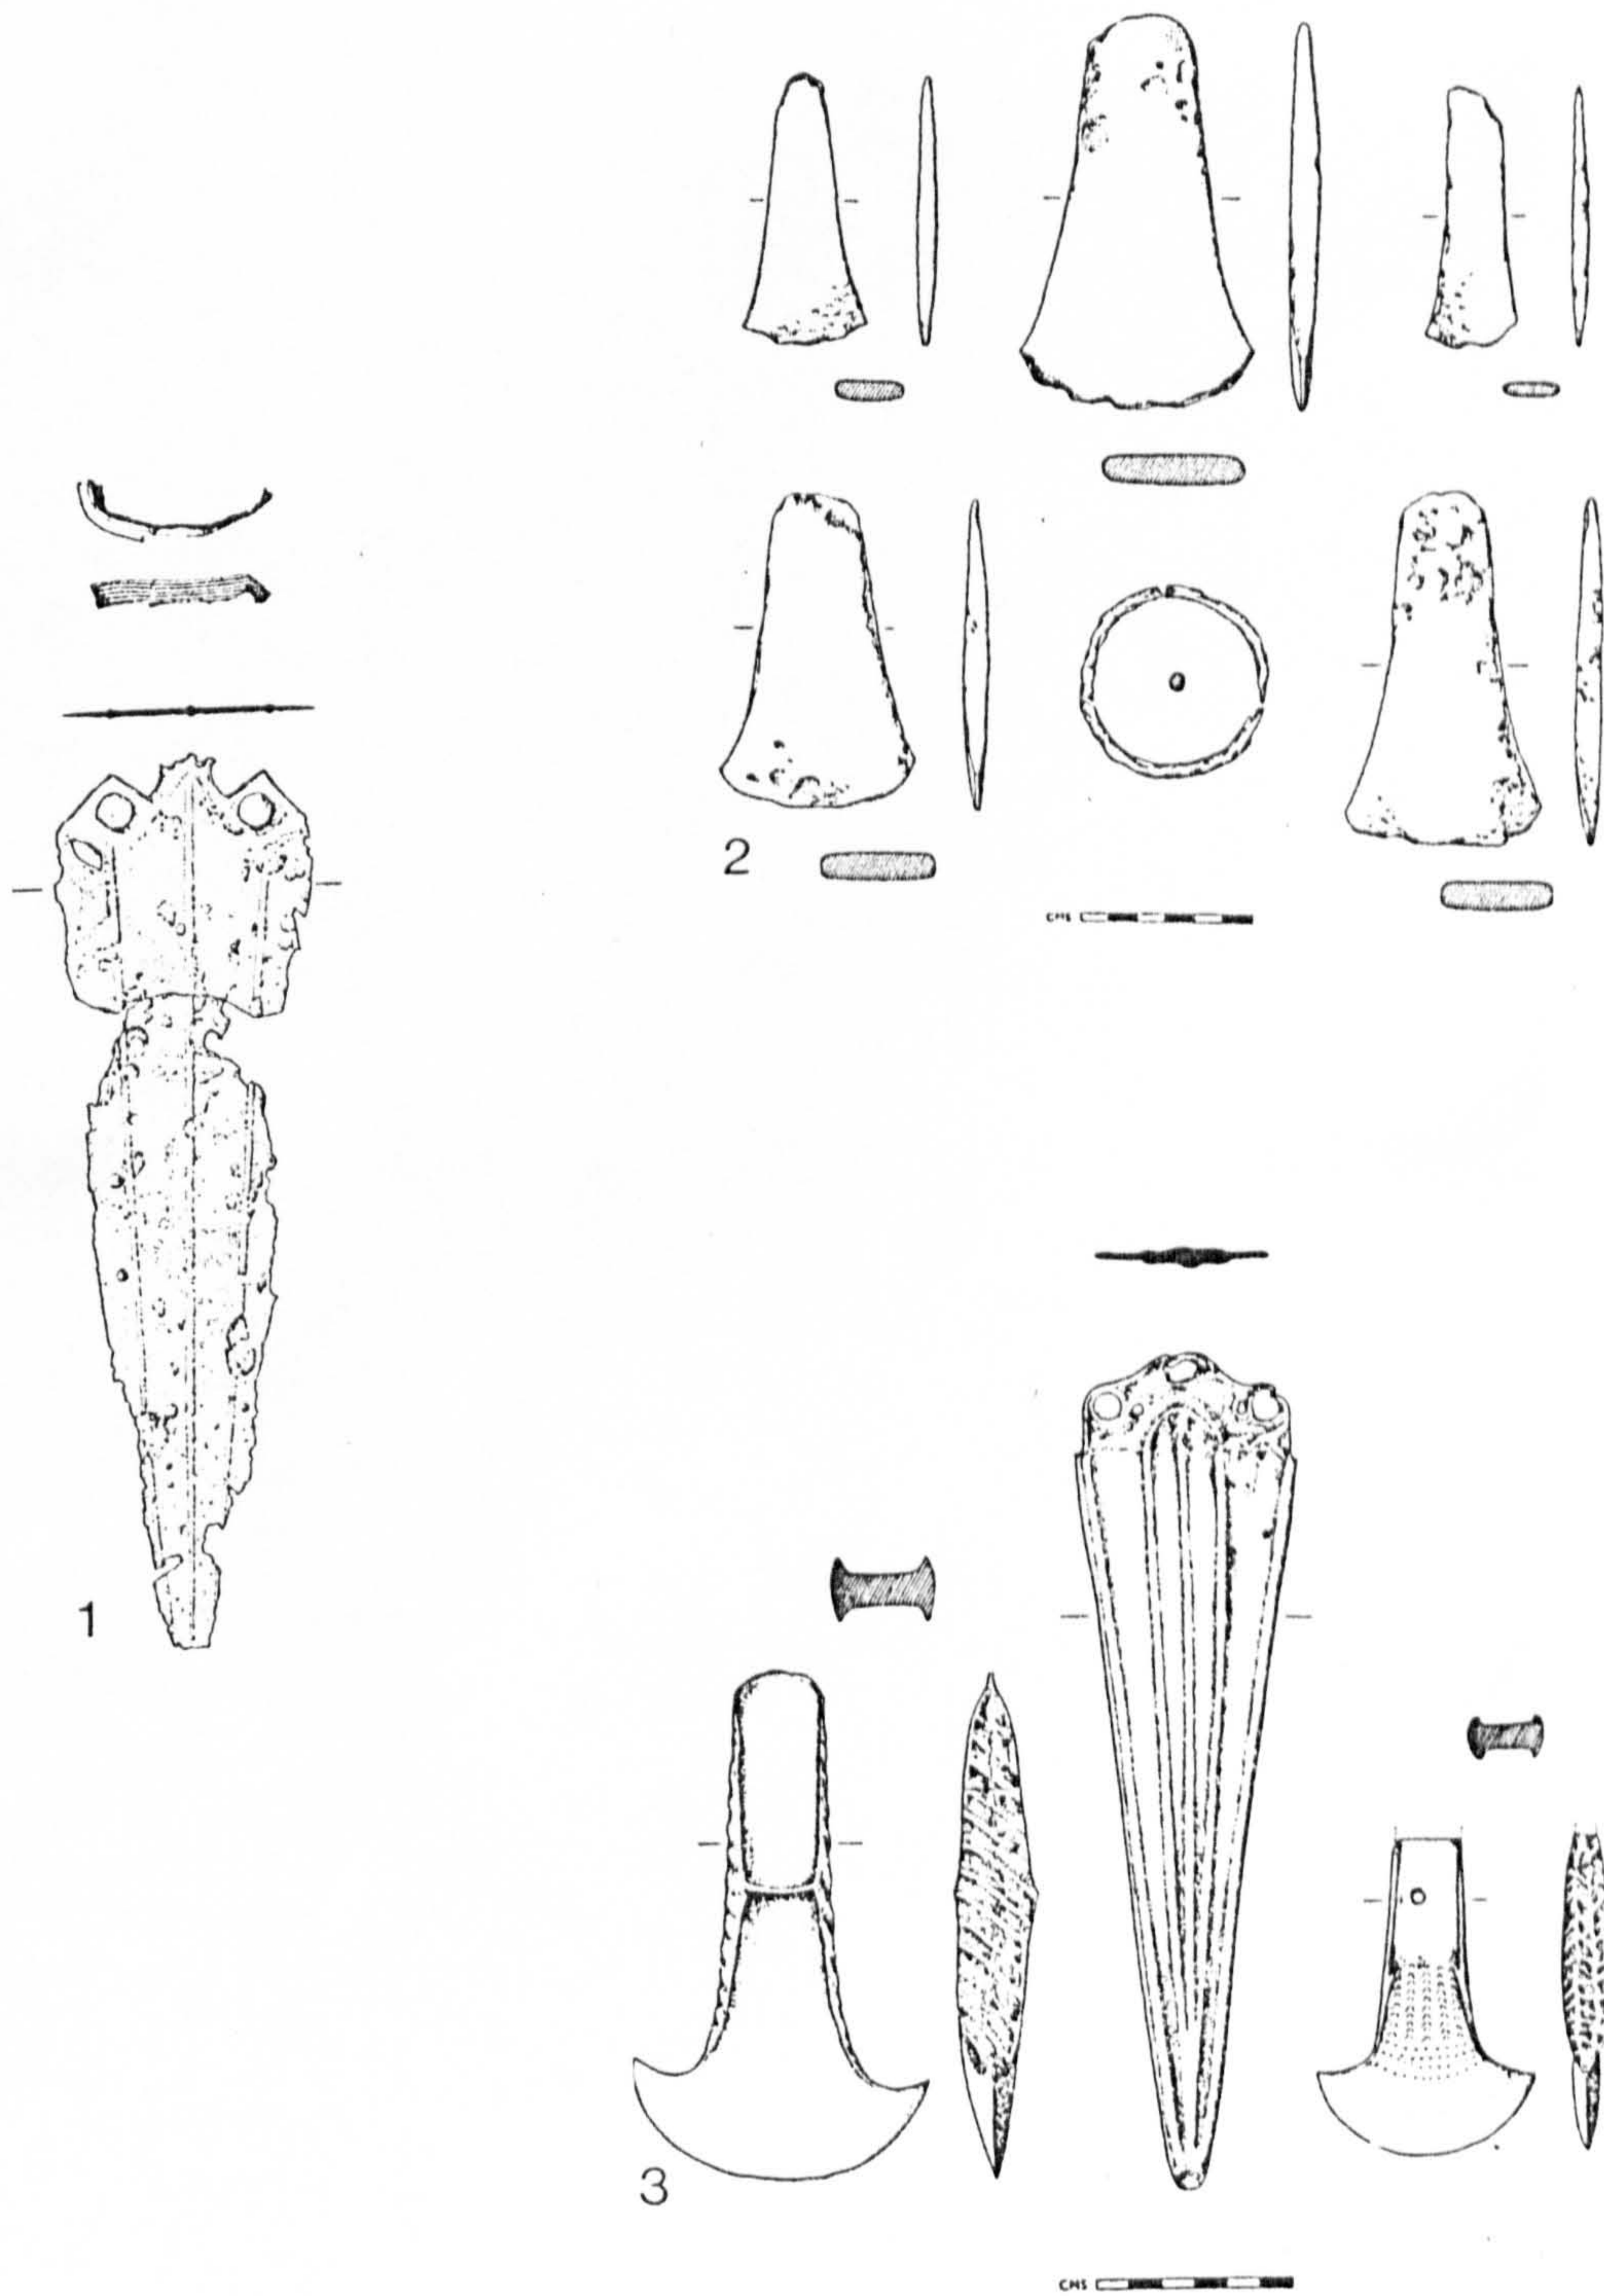

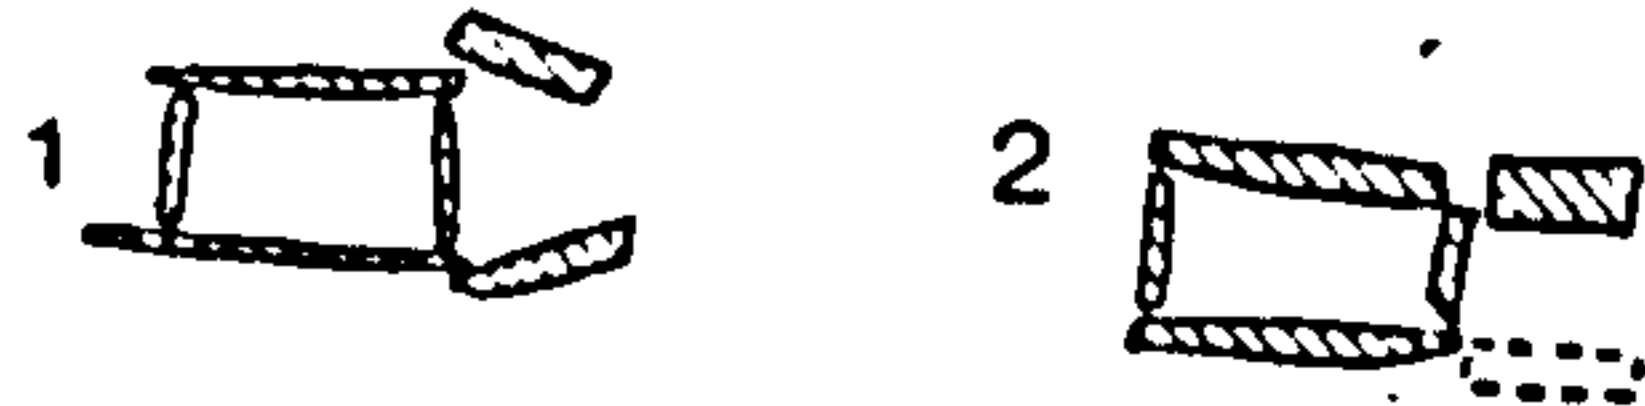

Fig. 7.6 Metalwork from the area of study.

- 1) Dagger blade and gold pommel-mount from Blackwaterfoot, Arran (AR 32) (after Henshall . 1968, fig. 42, 5) (dagger blade: existing L: 228 mm).
- 2) The Maidens Hoard, Port Murray, Ayrshire (AY 79) (after Inventaria Archaeologia GB. 31) (scale as shown).
- 3) The Gavel Moss Hoard, Lochwinnoch, Renfrewshire (AY 8) (after Inventaria Archaeologia GB. 28) (scale as shown).

Fig. 8.1 Distribution of Neolithic chambered cairns
(■) in the area of study.

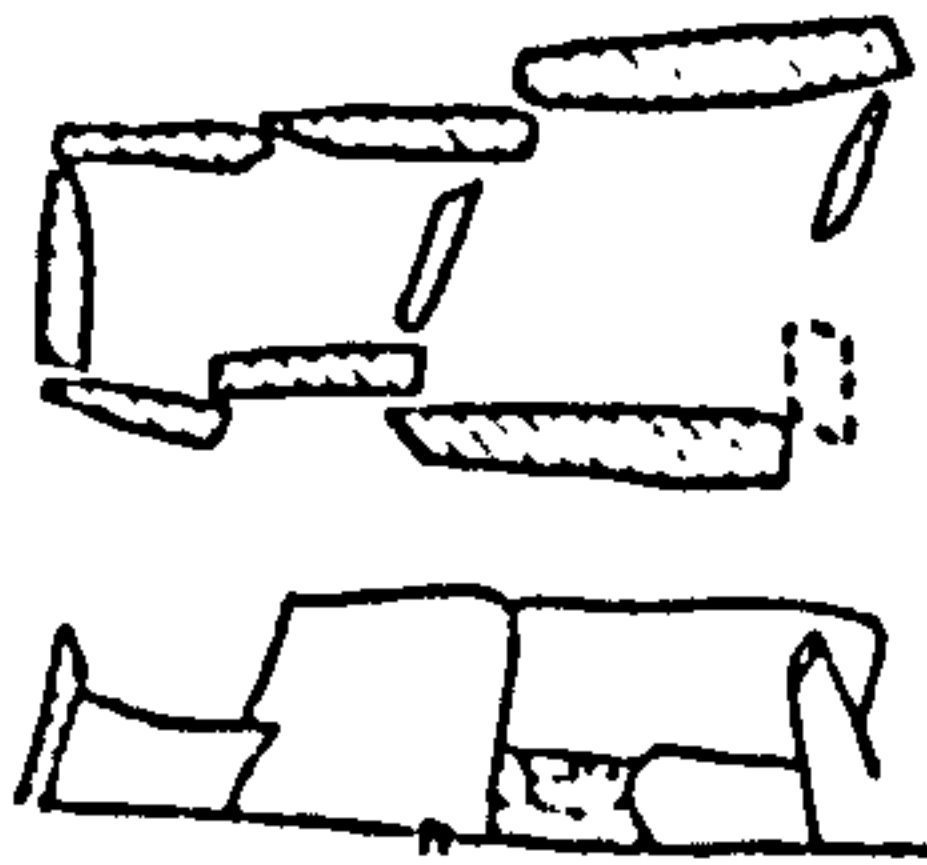

Closed chambers: 1) Ardmarnock (ARG 17) (CO 4)
 2) Carnbaan Lenihuline Wood (BUT 3) (BU 7)

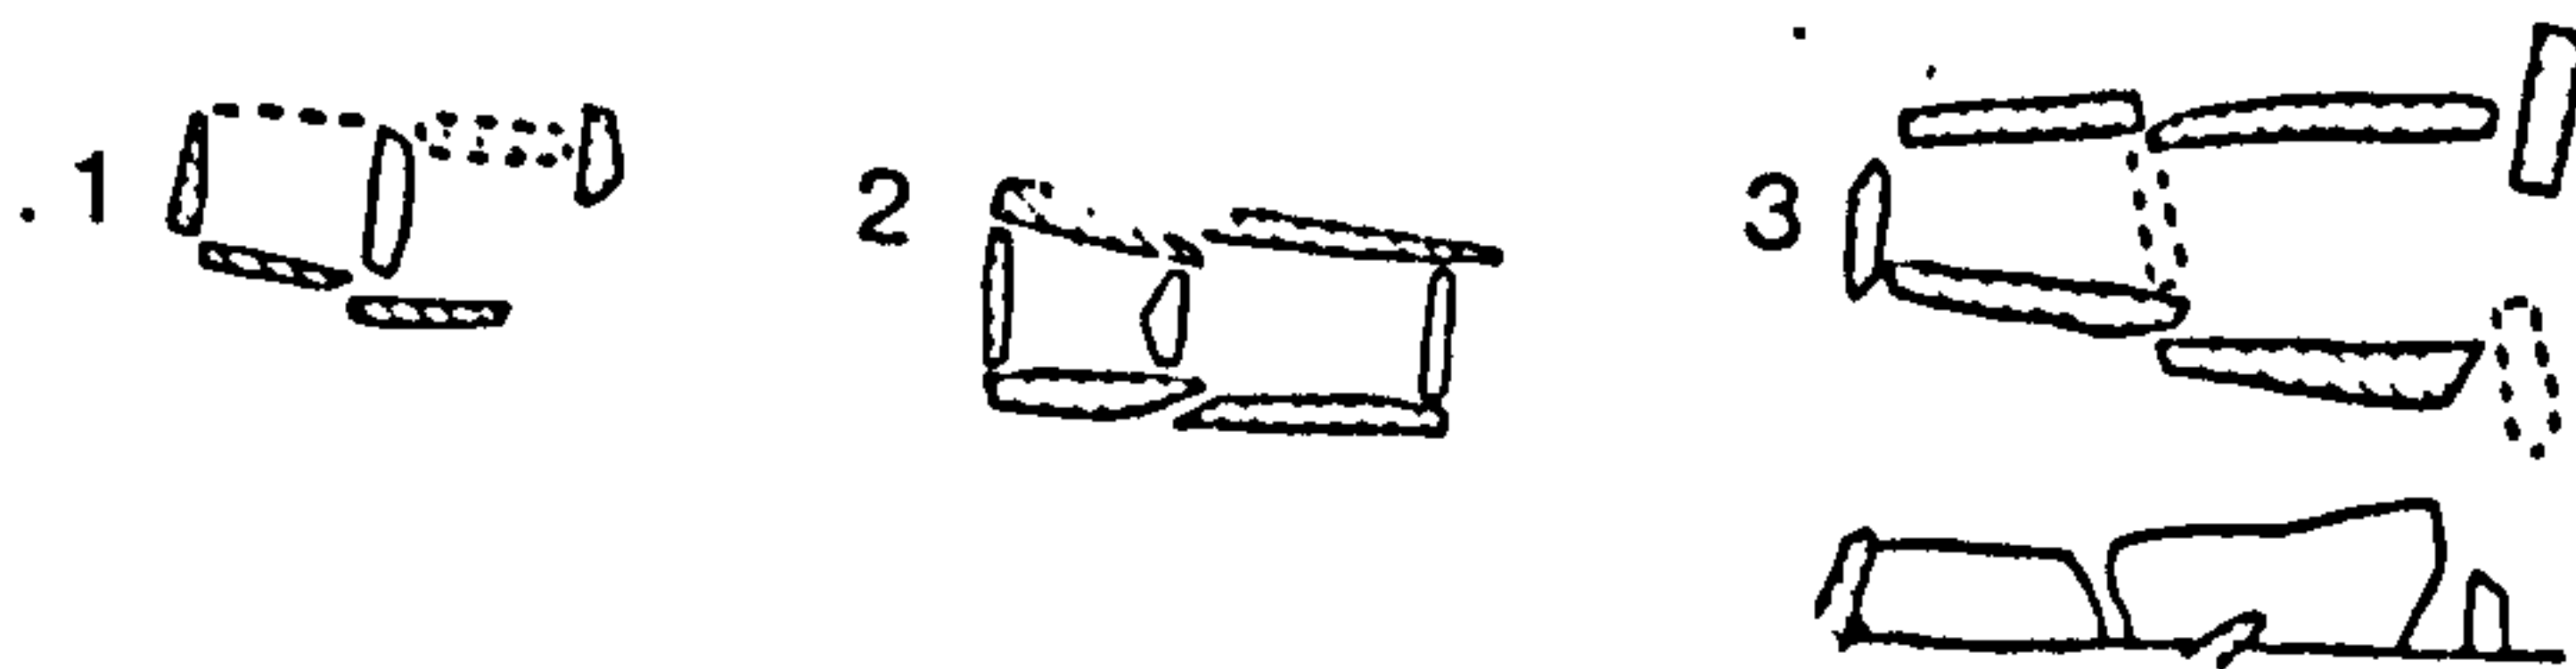

Single compartment with kerbs: 1) Glecknabae (BUT 4) (BU 8)
 2) Michael's Grave (BUT 2) (BU 6)

Two-compartment chamber probably built in two phases:
 Brackley (ARG 28) (KT 76)

Two-compartment chambers: 1) Ardnacross 1 (Arg 29) (KT 72)
 2) Dunan Beag (ARG 17) (AR 62)
 3) Gort na h'Ulaidhe (ARG 30) (KT 71)

Multi-compartment chambers: 1) Beacharra (ARG 27) (KT 13), 2) Bickers' Houses (BUT 5) (BU 17), 3) Monamore (ARN 9) (AR 58), 4) East Bennan (ARN 14) (AR 44), 5) Carn Ban (ARN 10) (AR 47)

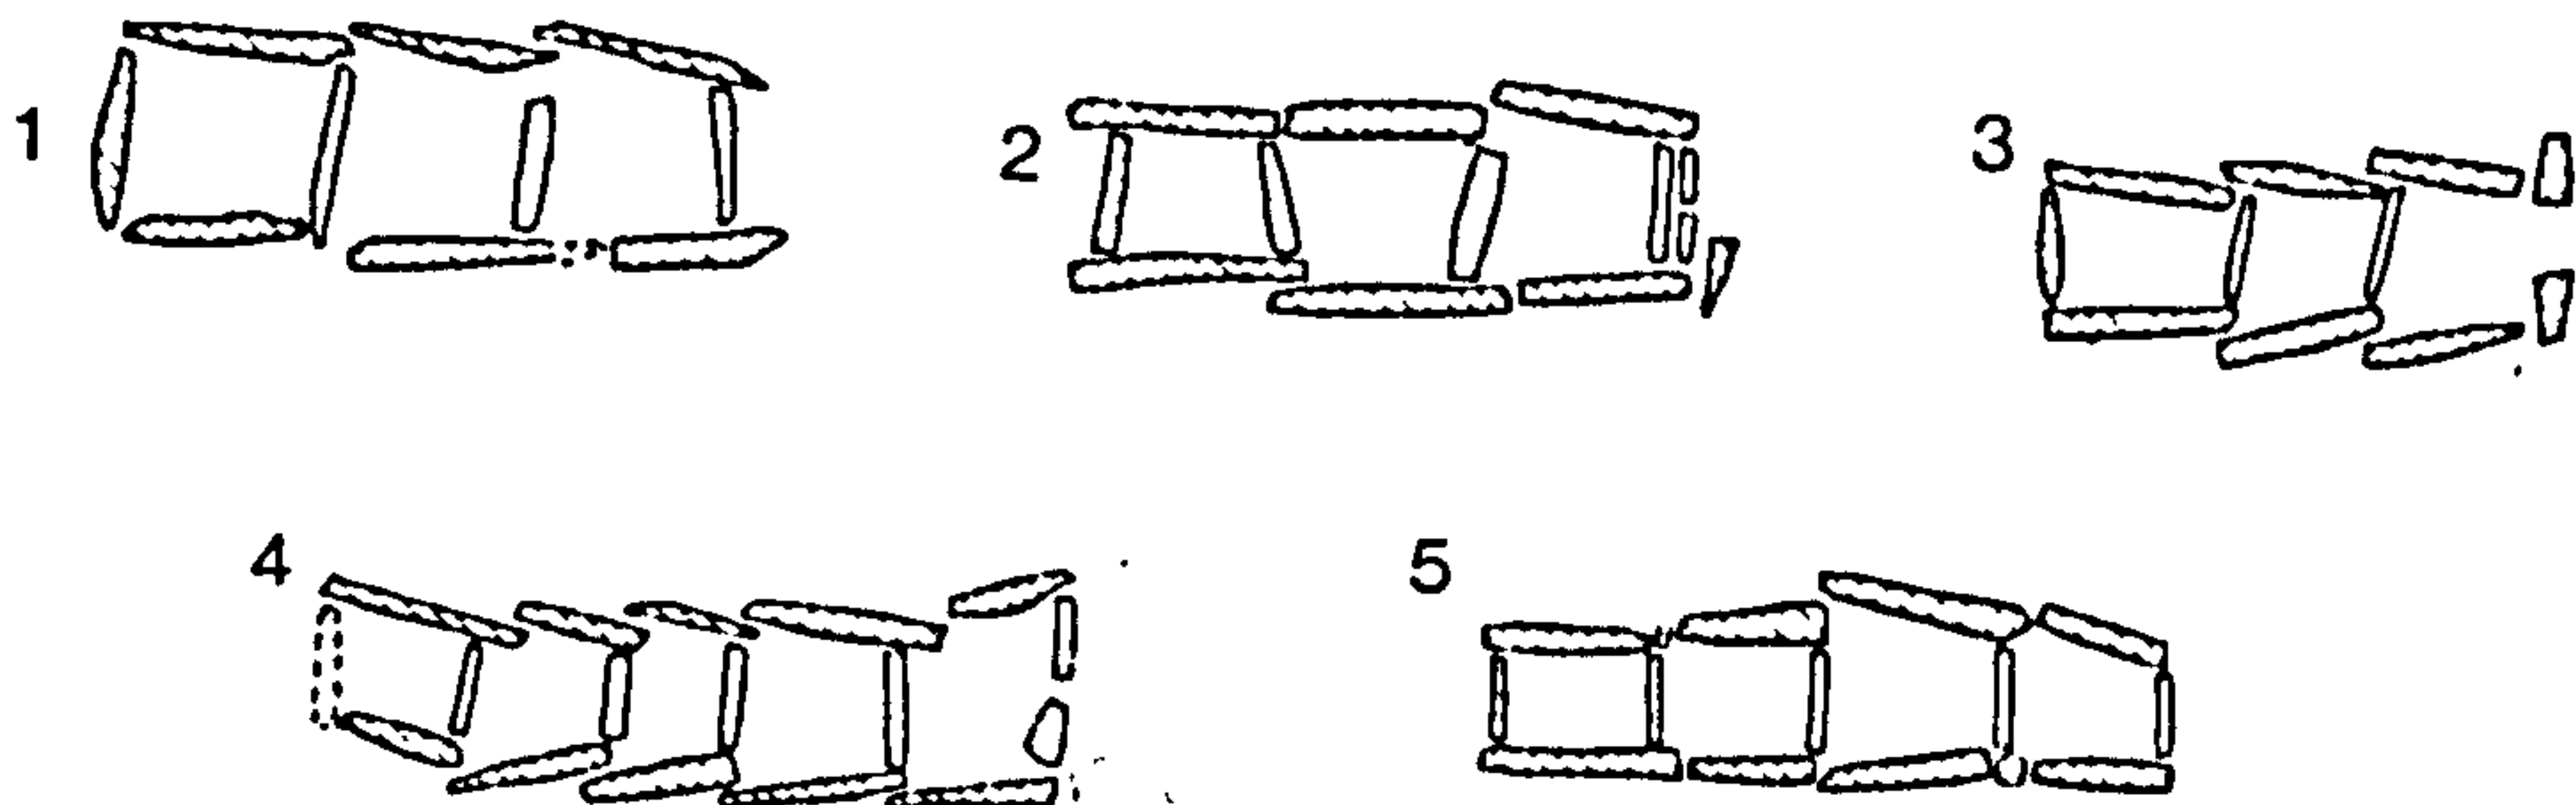

Fig. 8.2 Chambers of Neolithic cairns in the area of study (high kerb-stones hatched, low transverse stones unhatched) (selected from Henshall 1972, fig. 4) (scale 1" = 15') (Elevations after Scott).

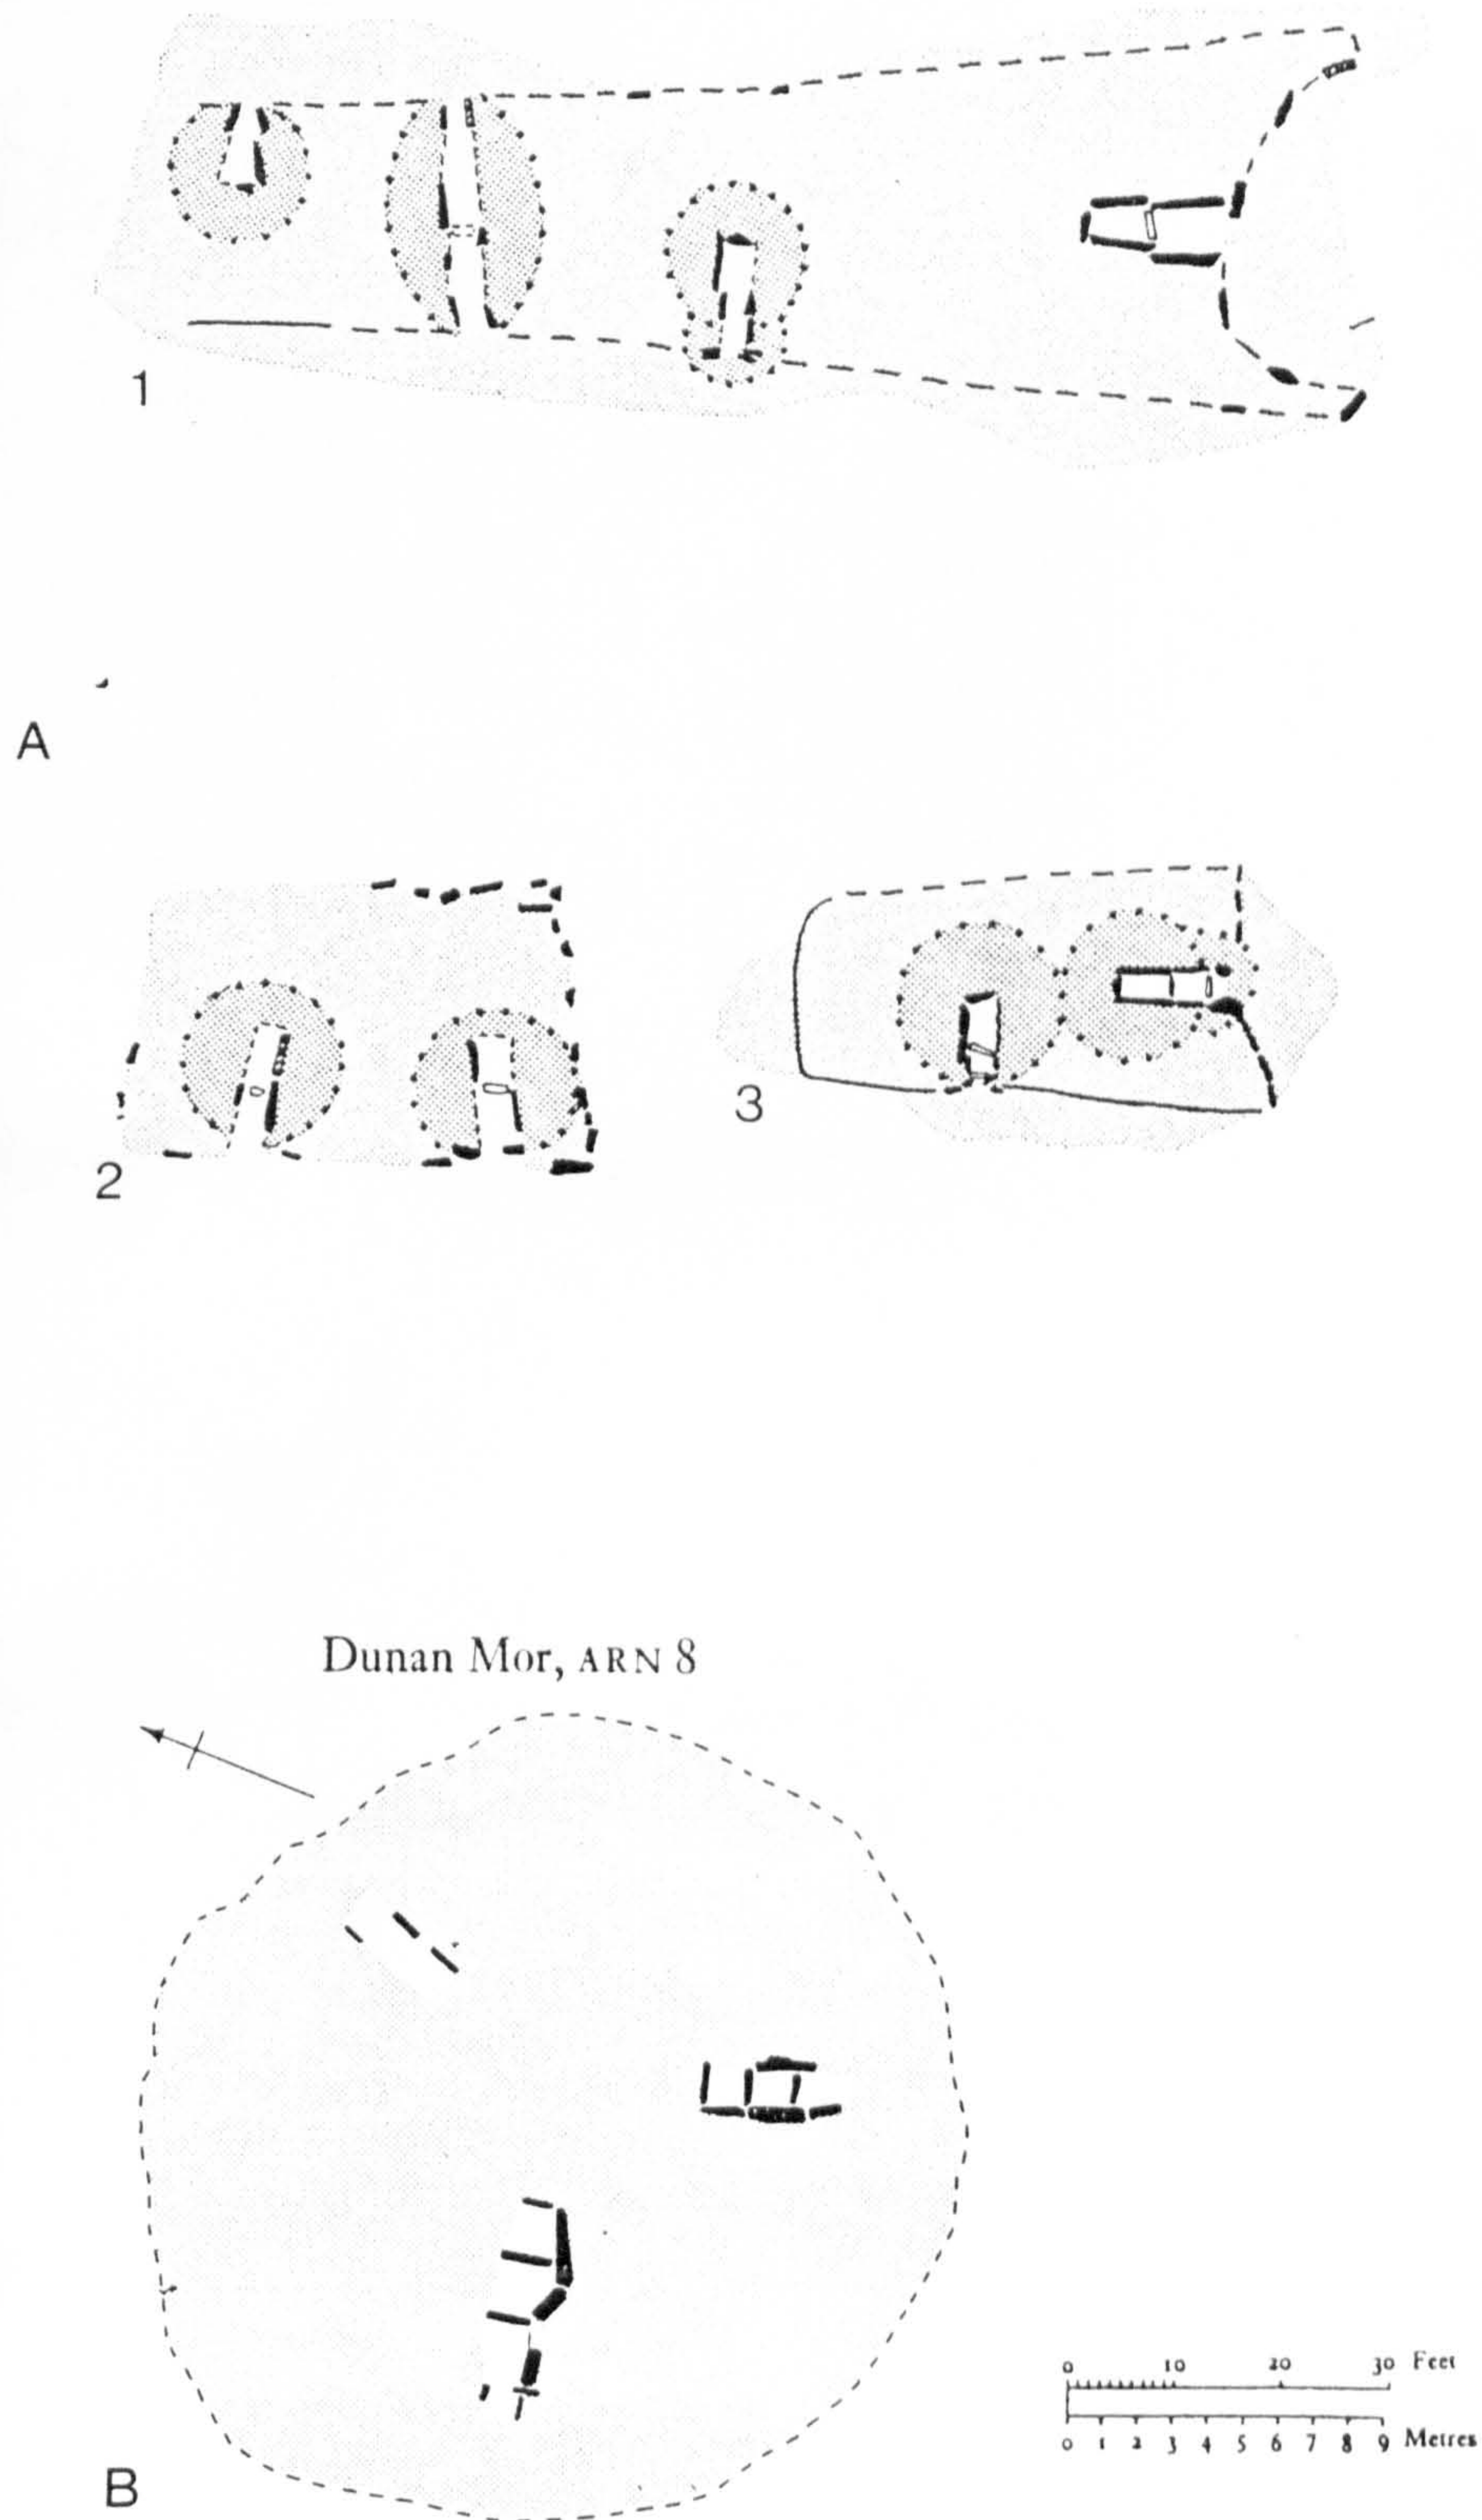

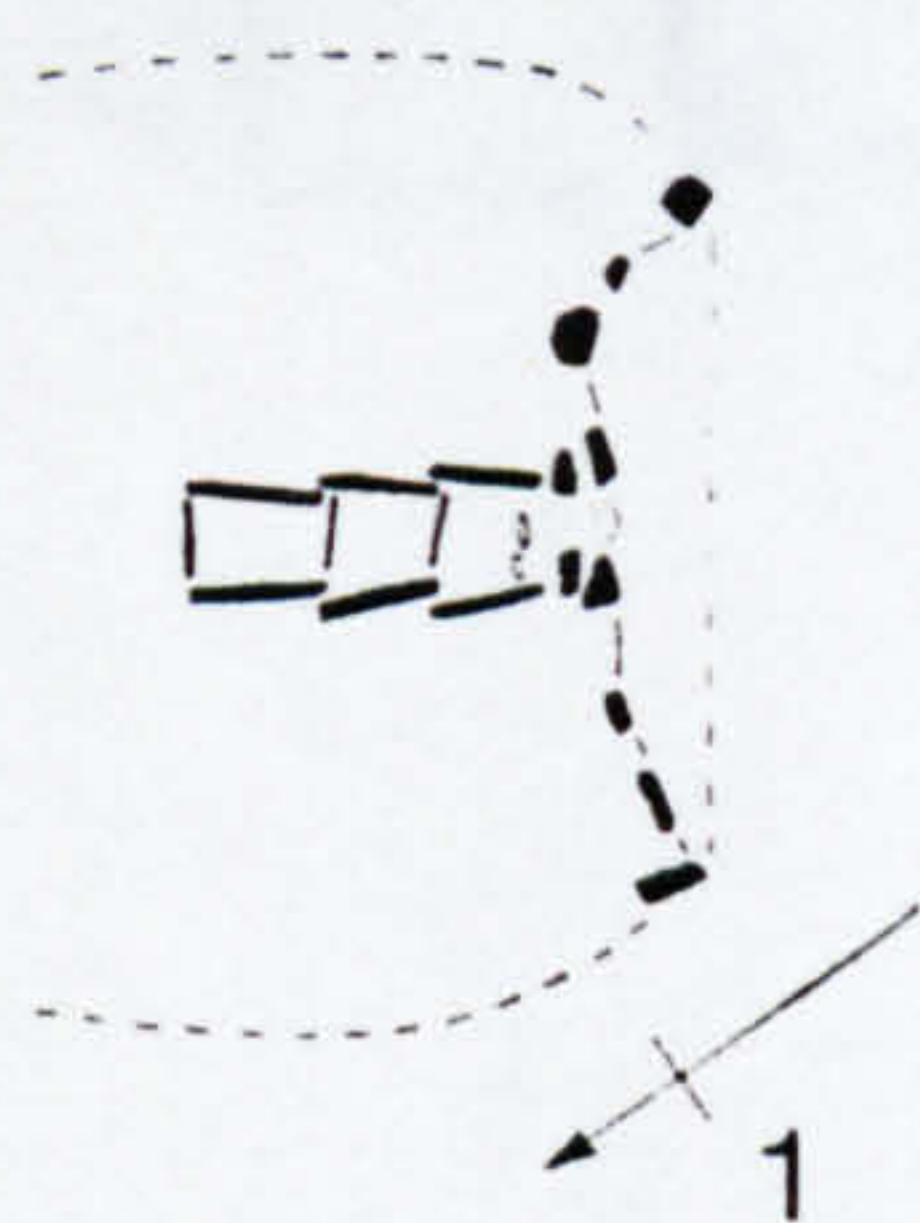

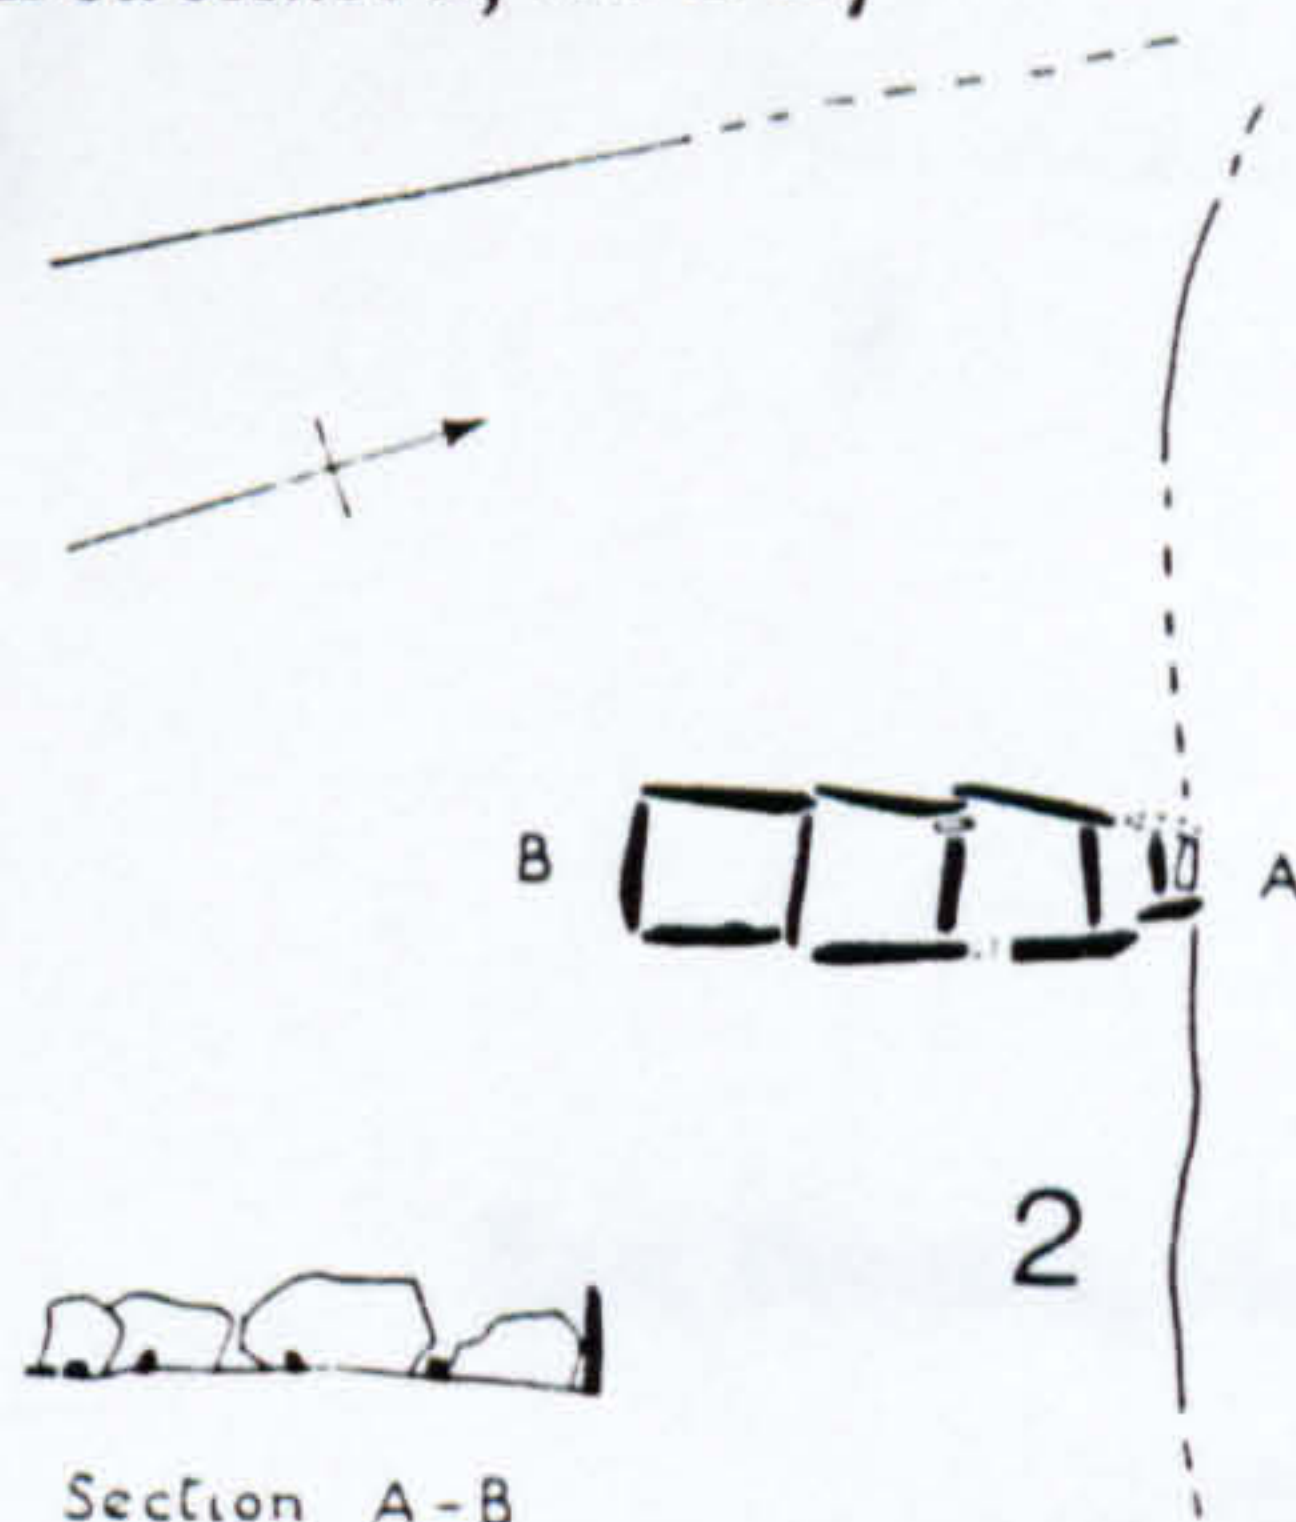

Fig. 8.3 Development of Neolithic chambered cairns.
 A. Examples of cairns in the area of study for which phases of construction, such as have been proved by excavation at Mid Gleniron, may be inferred:
 1) Gort na H'Ulaidhe (ARG 30) (KT 71), 2) Baile Meadhonach (ARN 13) (AR 48), 3) Glenvoidean (BUT 1) (BU 2) (after Henshall 1972, fig. 2) (scale: 1" = 28').
 B. Radial setting of chambers: Dunan Mor (ARN 8) (AR 63) (after Henshall 1972, Catalogue of Sites, 379) (scale as shown).

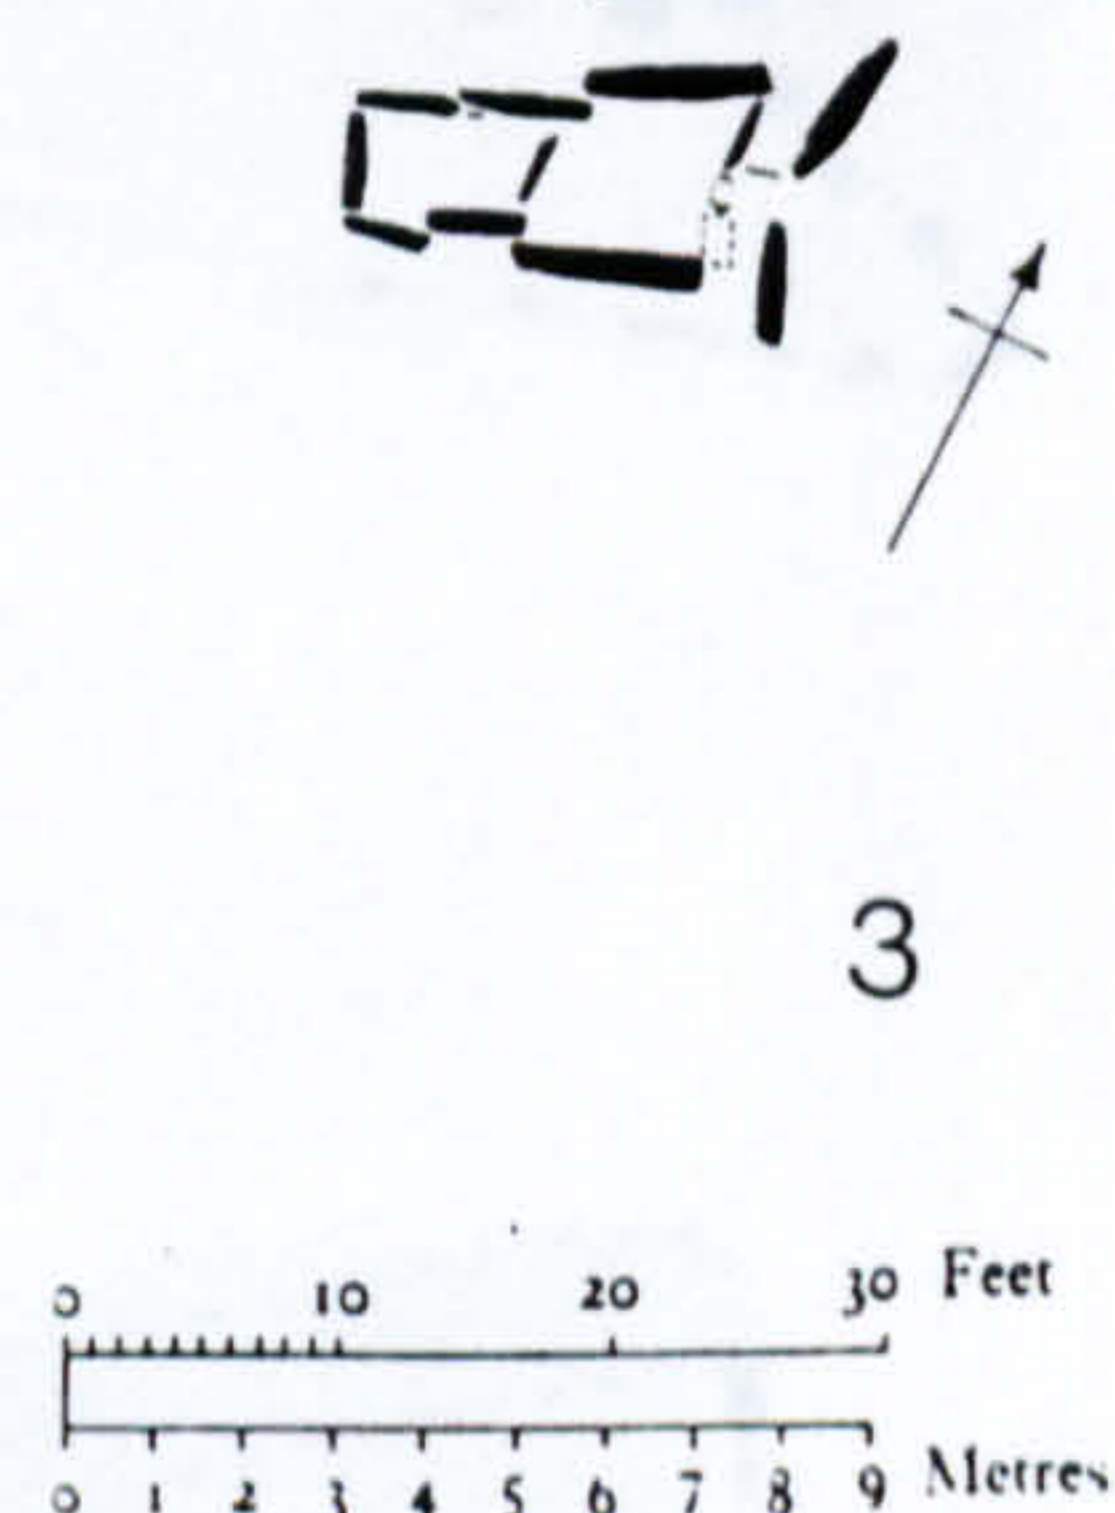

Monamore, ARN 9

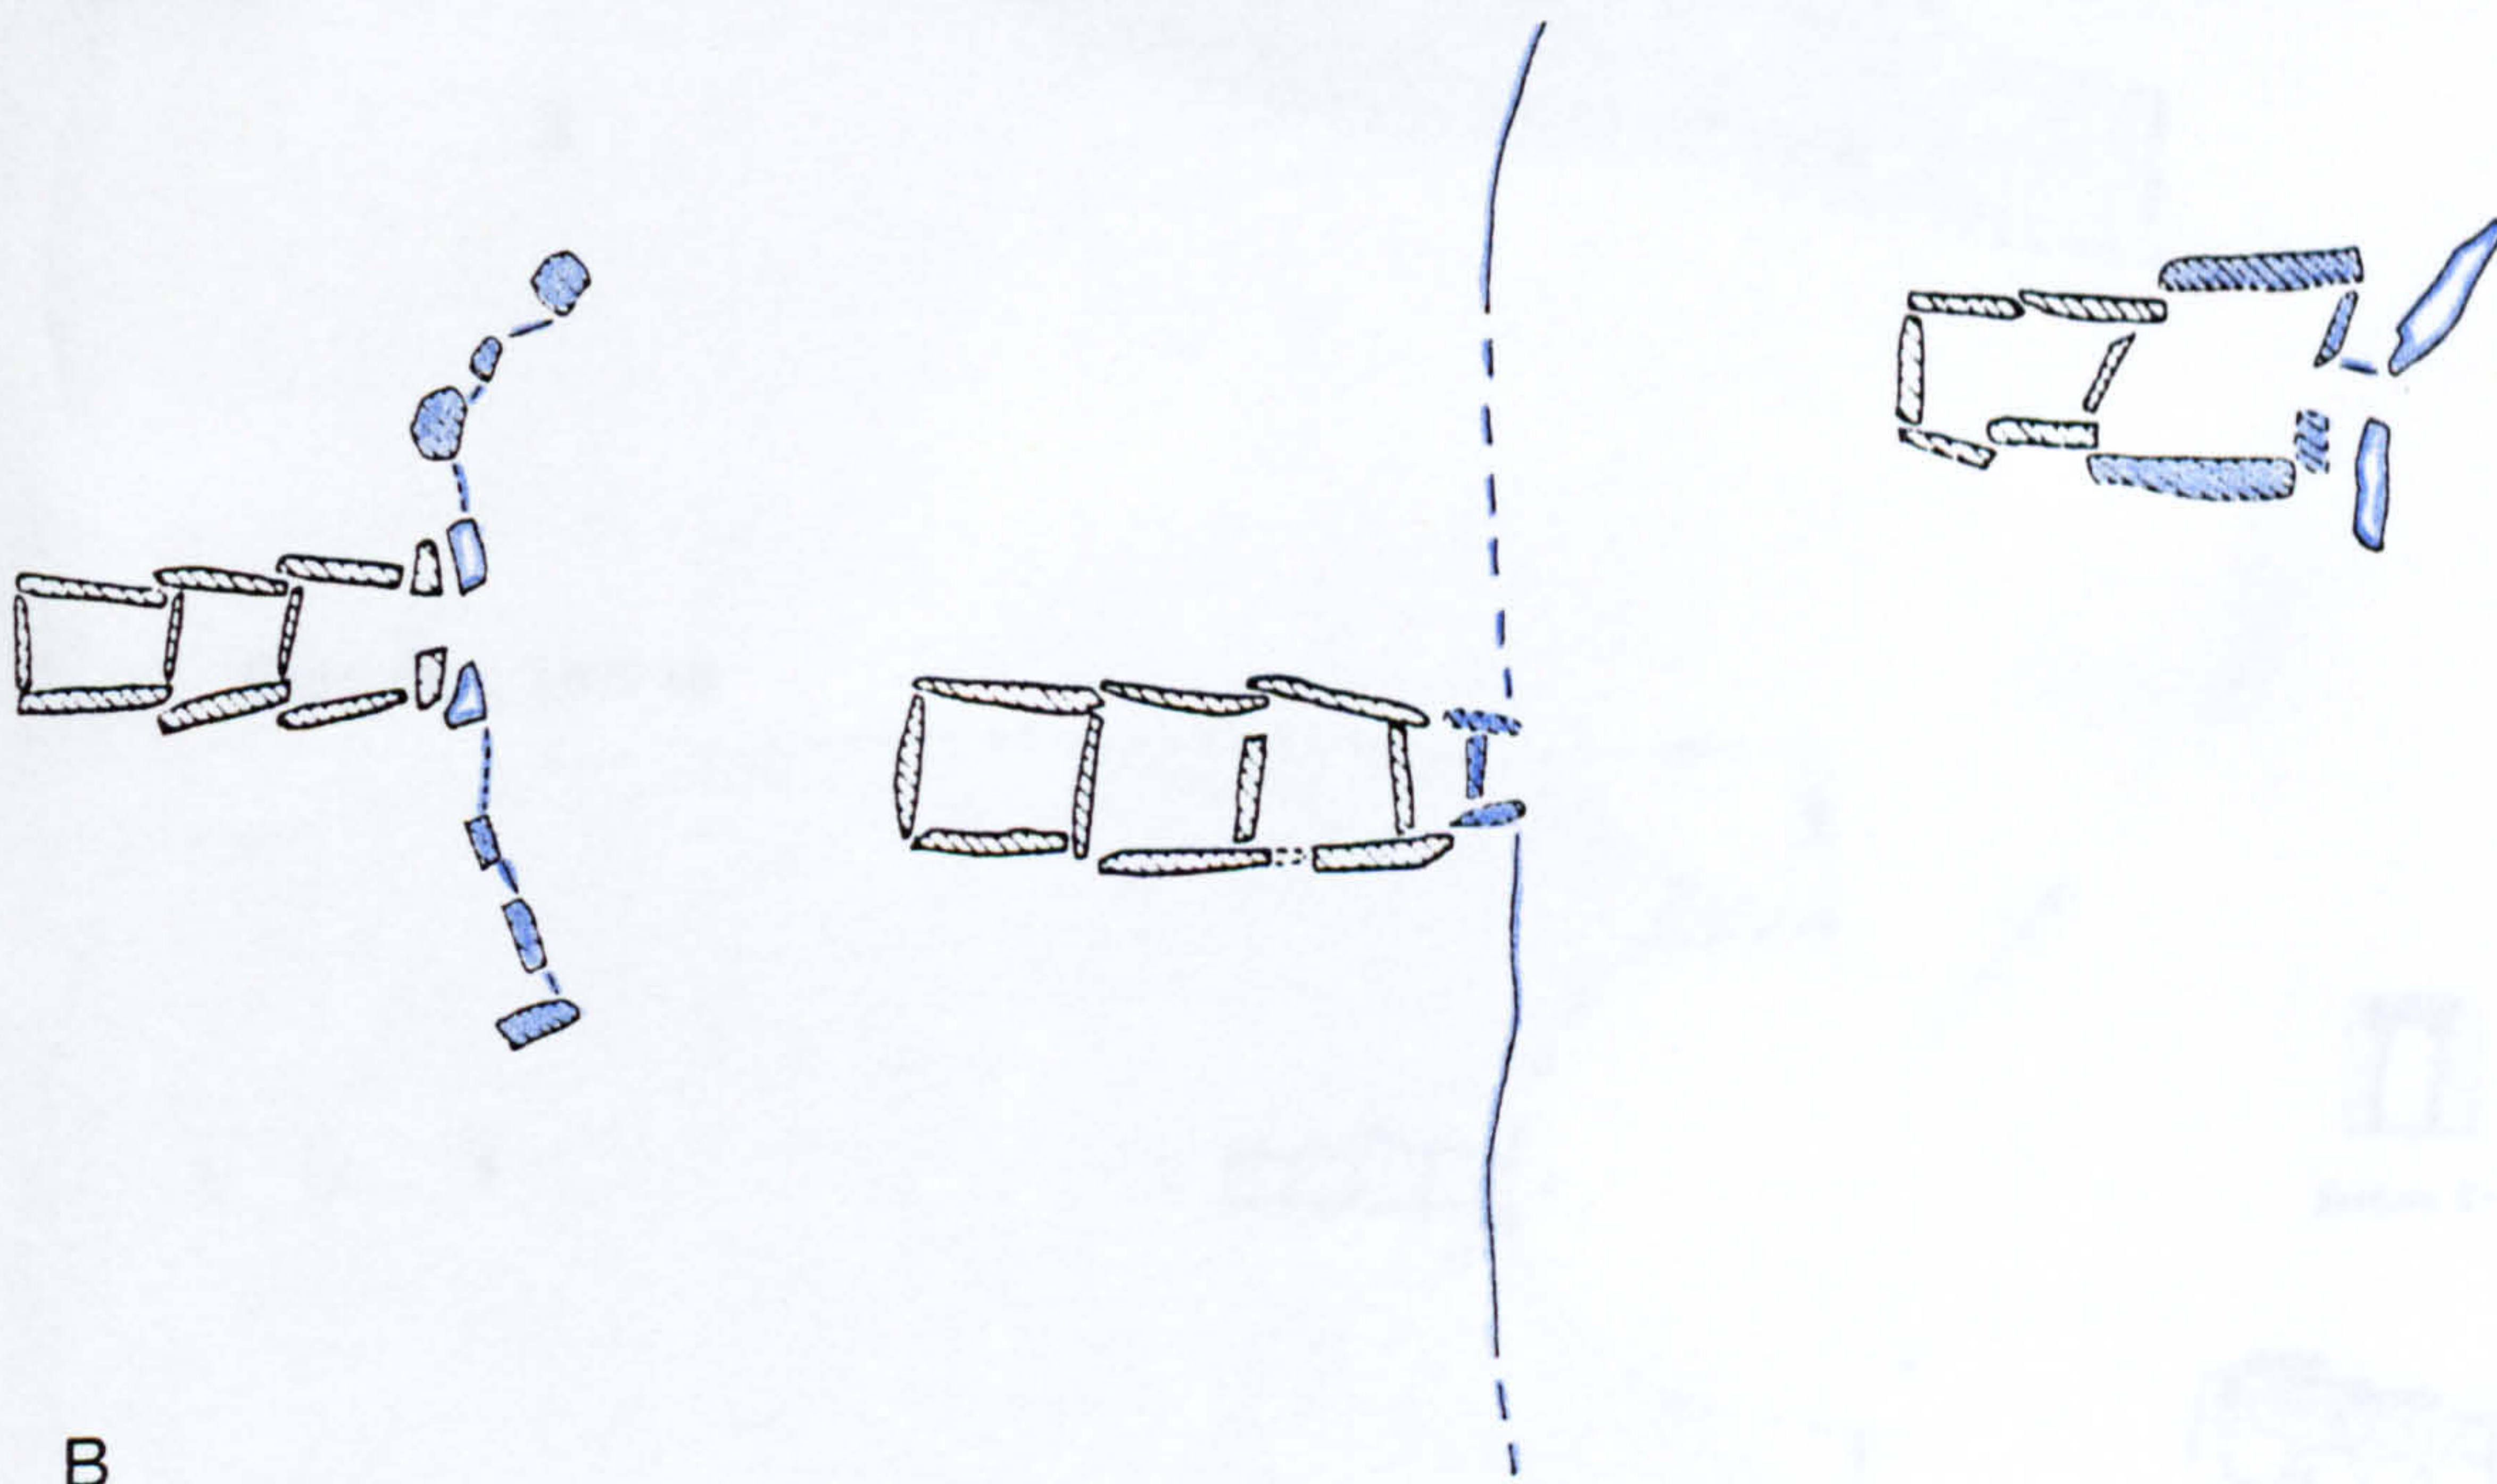

Beacharra, ARG 27

Brackley, ARG 28

A

B

Fig. 8.4 a Neolithic chambered cairns - development of portals, facades and forecourts.

A. Portals: 1) double portal, Monamore (ARN 9) (AR 58),
 2) constricted entrance, Beacharra (ARG 27) (KT 13),
 3) 'adit', Brackley (ARG 28) (KT 76) (after Henshall
 1972, Catalogue of Sites, 379, 345 (scales as shown).

B. Construction phases of chambers and facades for the
 same cairns (selected from Henshall 1972, fig. 3) (first
 addition hatched blue, later additions unhatched blue)
 (scale 1" = 15').

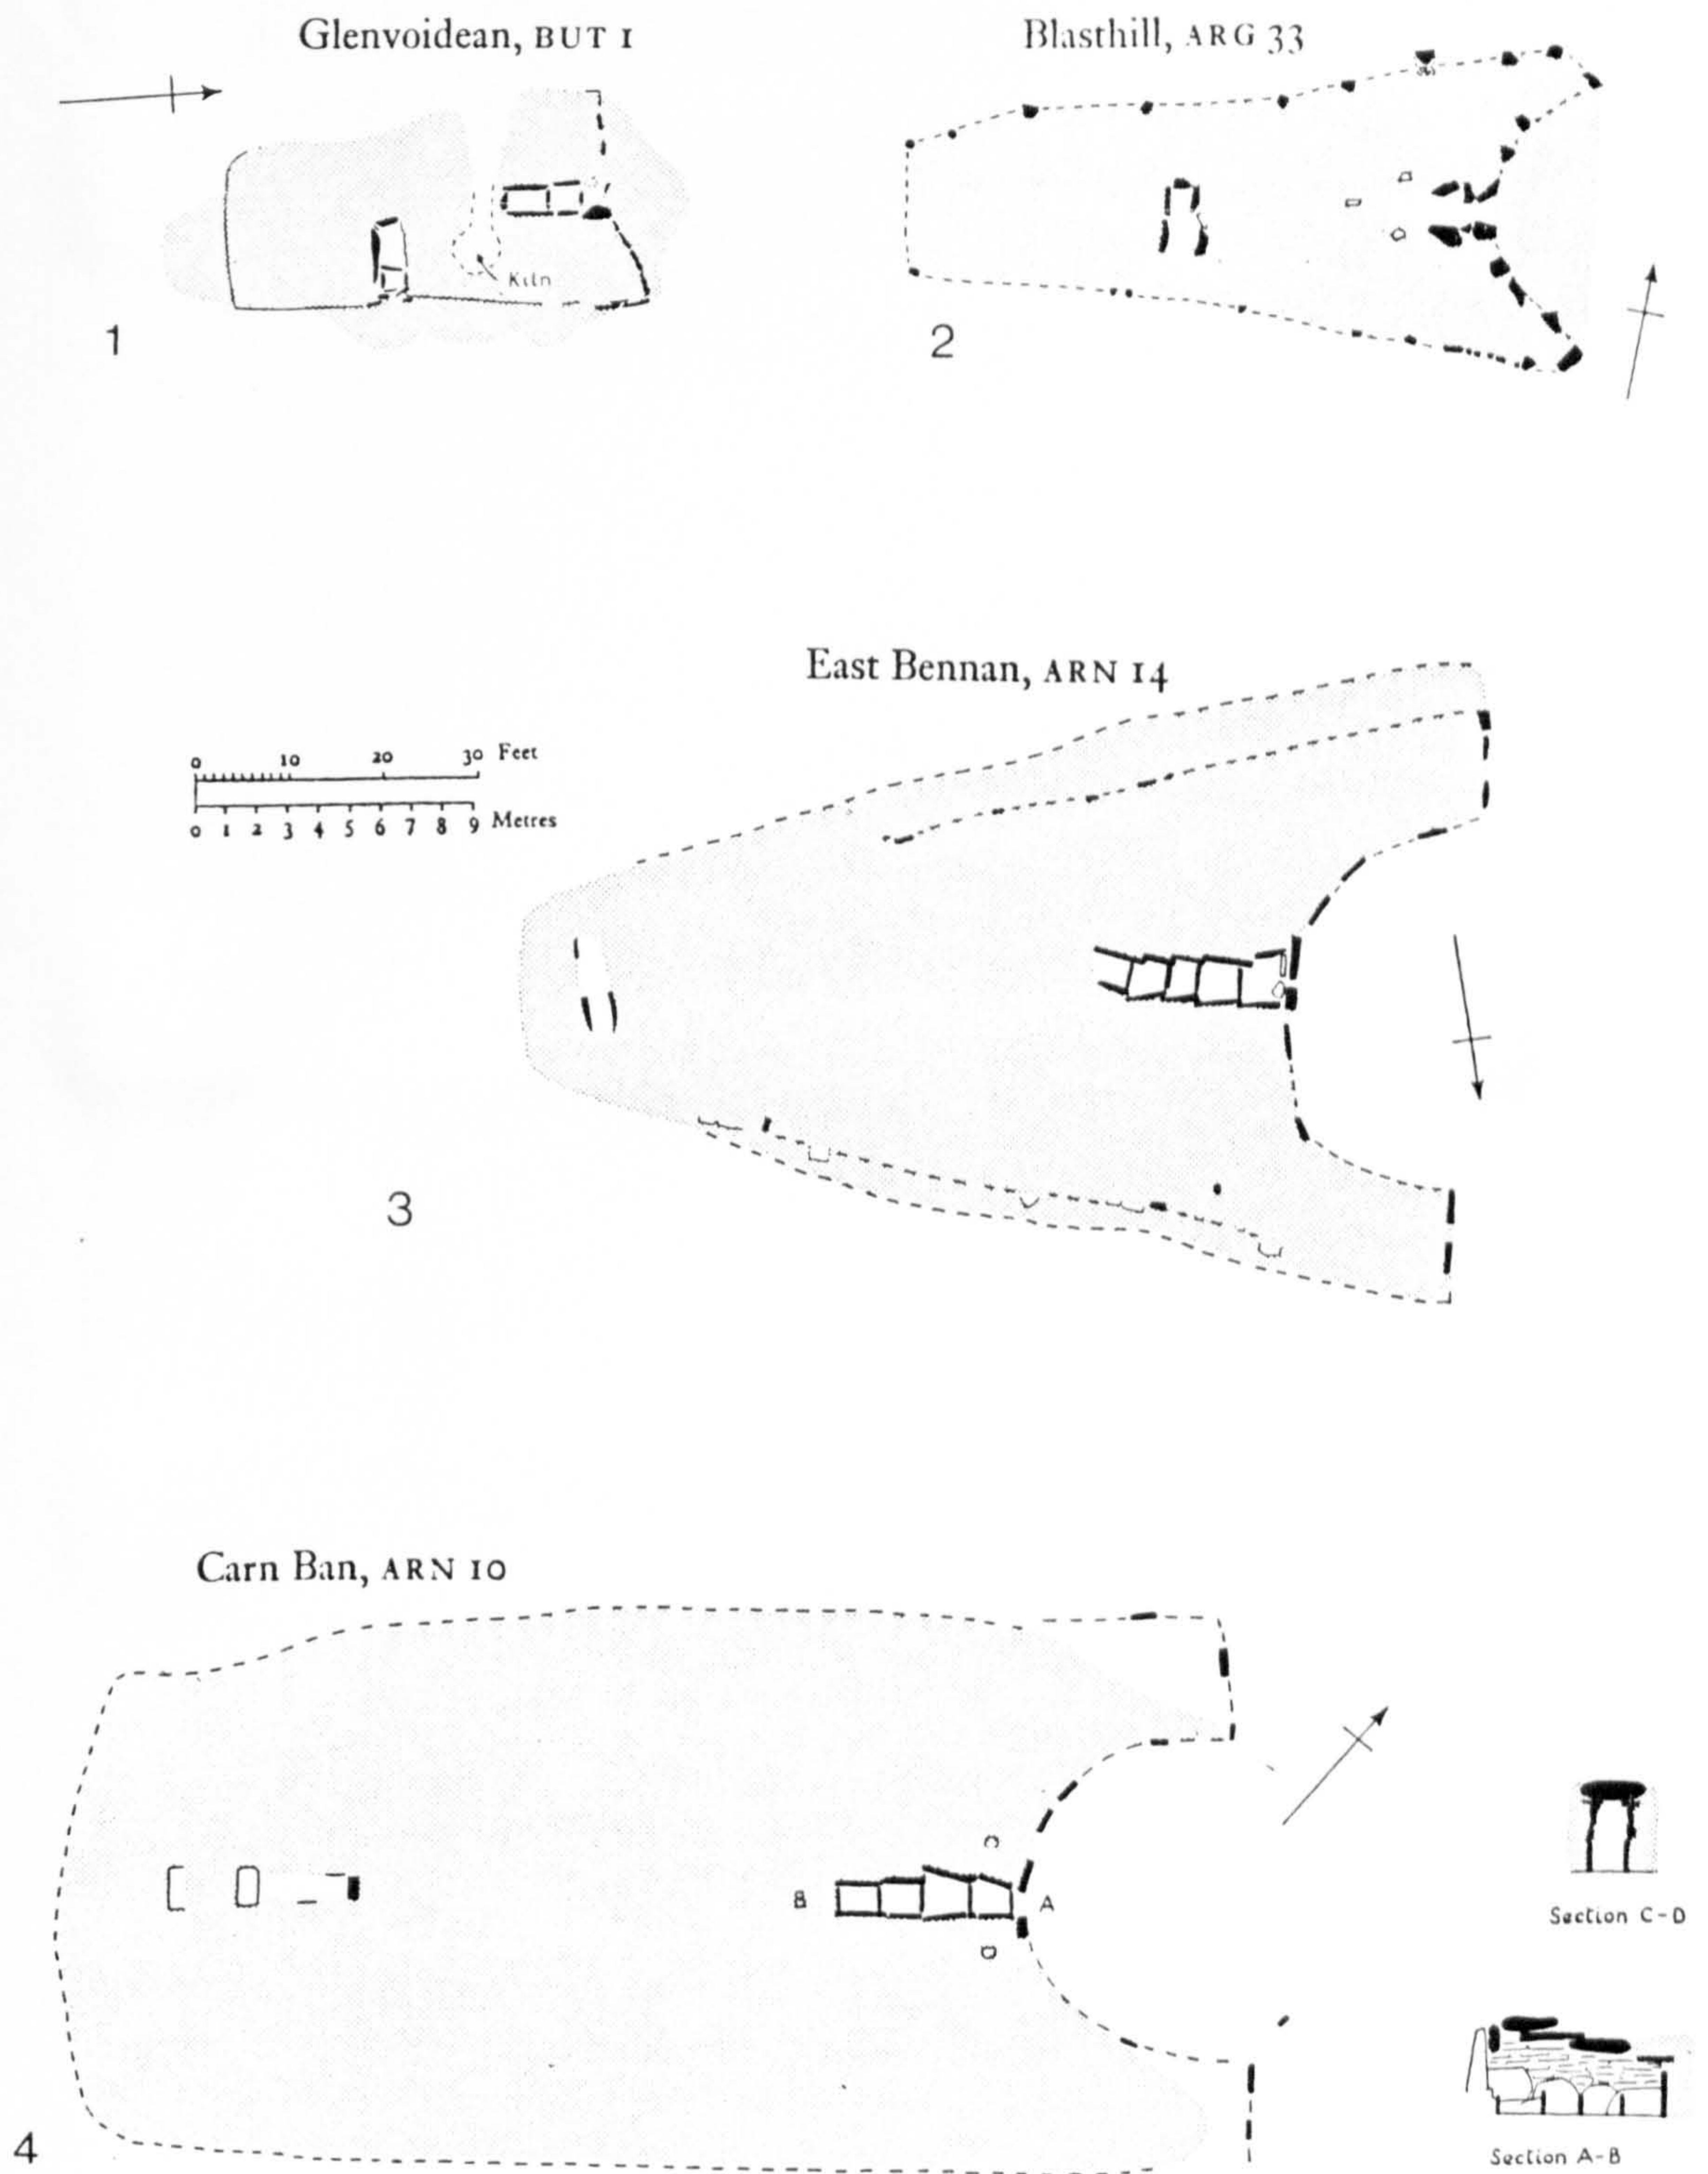

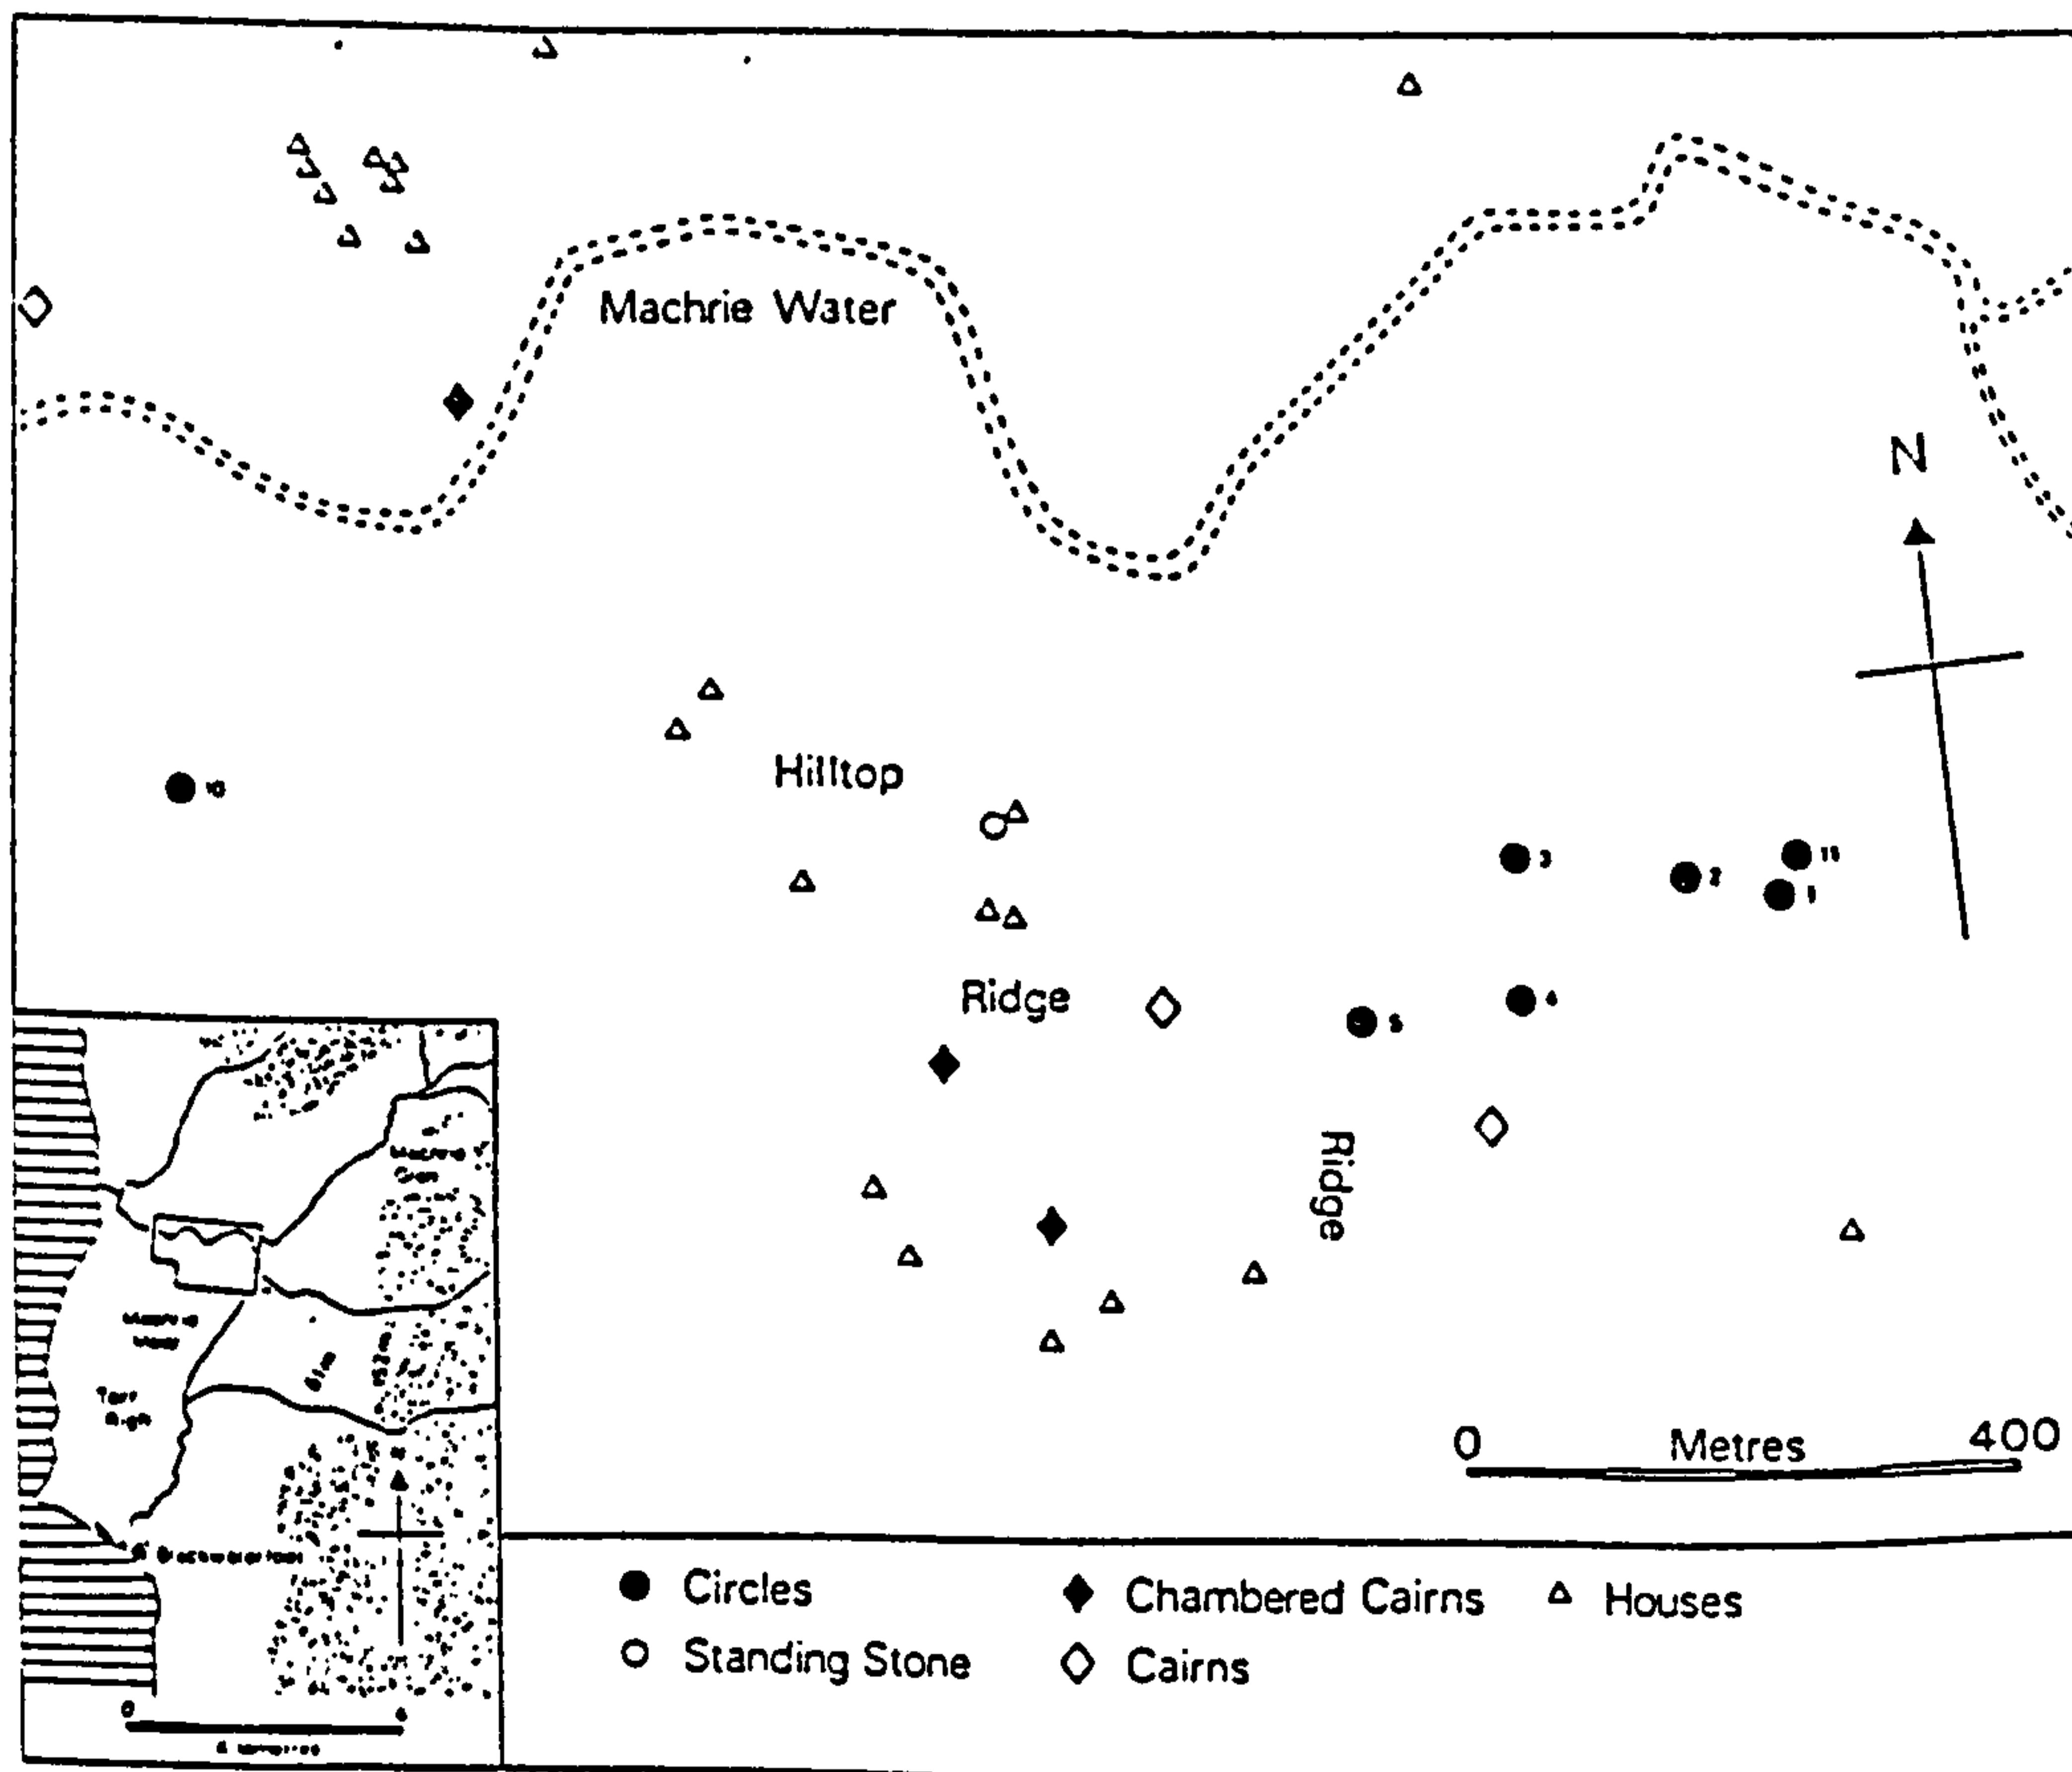

Fig. 8.4 b Neolithic chambered cairns - forecourt designs.
 1) Glenvoidean (BUT 1) (BU 2) (after Henshall 1972, Catalogue of Sites, 409)
 2) Blasthill (ARG 33) (KT 54) (after Henshall 1972, Catalogue of Sites, 353)
 3) East Bennan (ARN 14) (AR 44) (after Henshall 1972, Catalogue of Sites, 387)
 4) Carn Ban (ARN 10) (AR 47) (after Henshall 1972, Catalogue of Sites, 383)
 (scale as shown).

Fig. 8.5 Distribution of stone circles in the area of study.

- stone circle
- group of 6 stone circles on Machrie Moor, Arran (AR 17, 18, 19, 20, 21, 22)
(Bryce 1862: 5, 4, 3, 2, 1; Burl 1980b: 11)

The positions of these circles and their relationship to sites in the vicinity are shown on the map below (after Barnatt and Pierpoint 1983, fig. 1). This map shows the central area of Machrie Moor which was the test area in their study of prominence of stone circles on Machrie Moor (1983).

Sites on Machrie Moor within the test area (circles numbered after Bryce 1 - 5, 10; Burl 11).

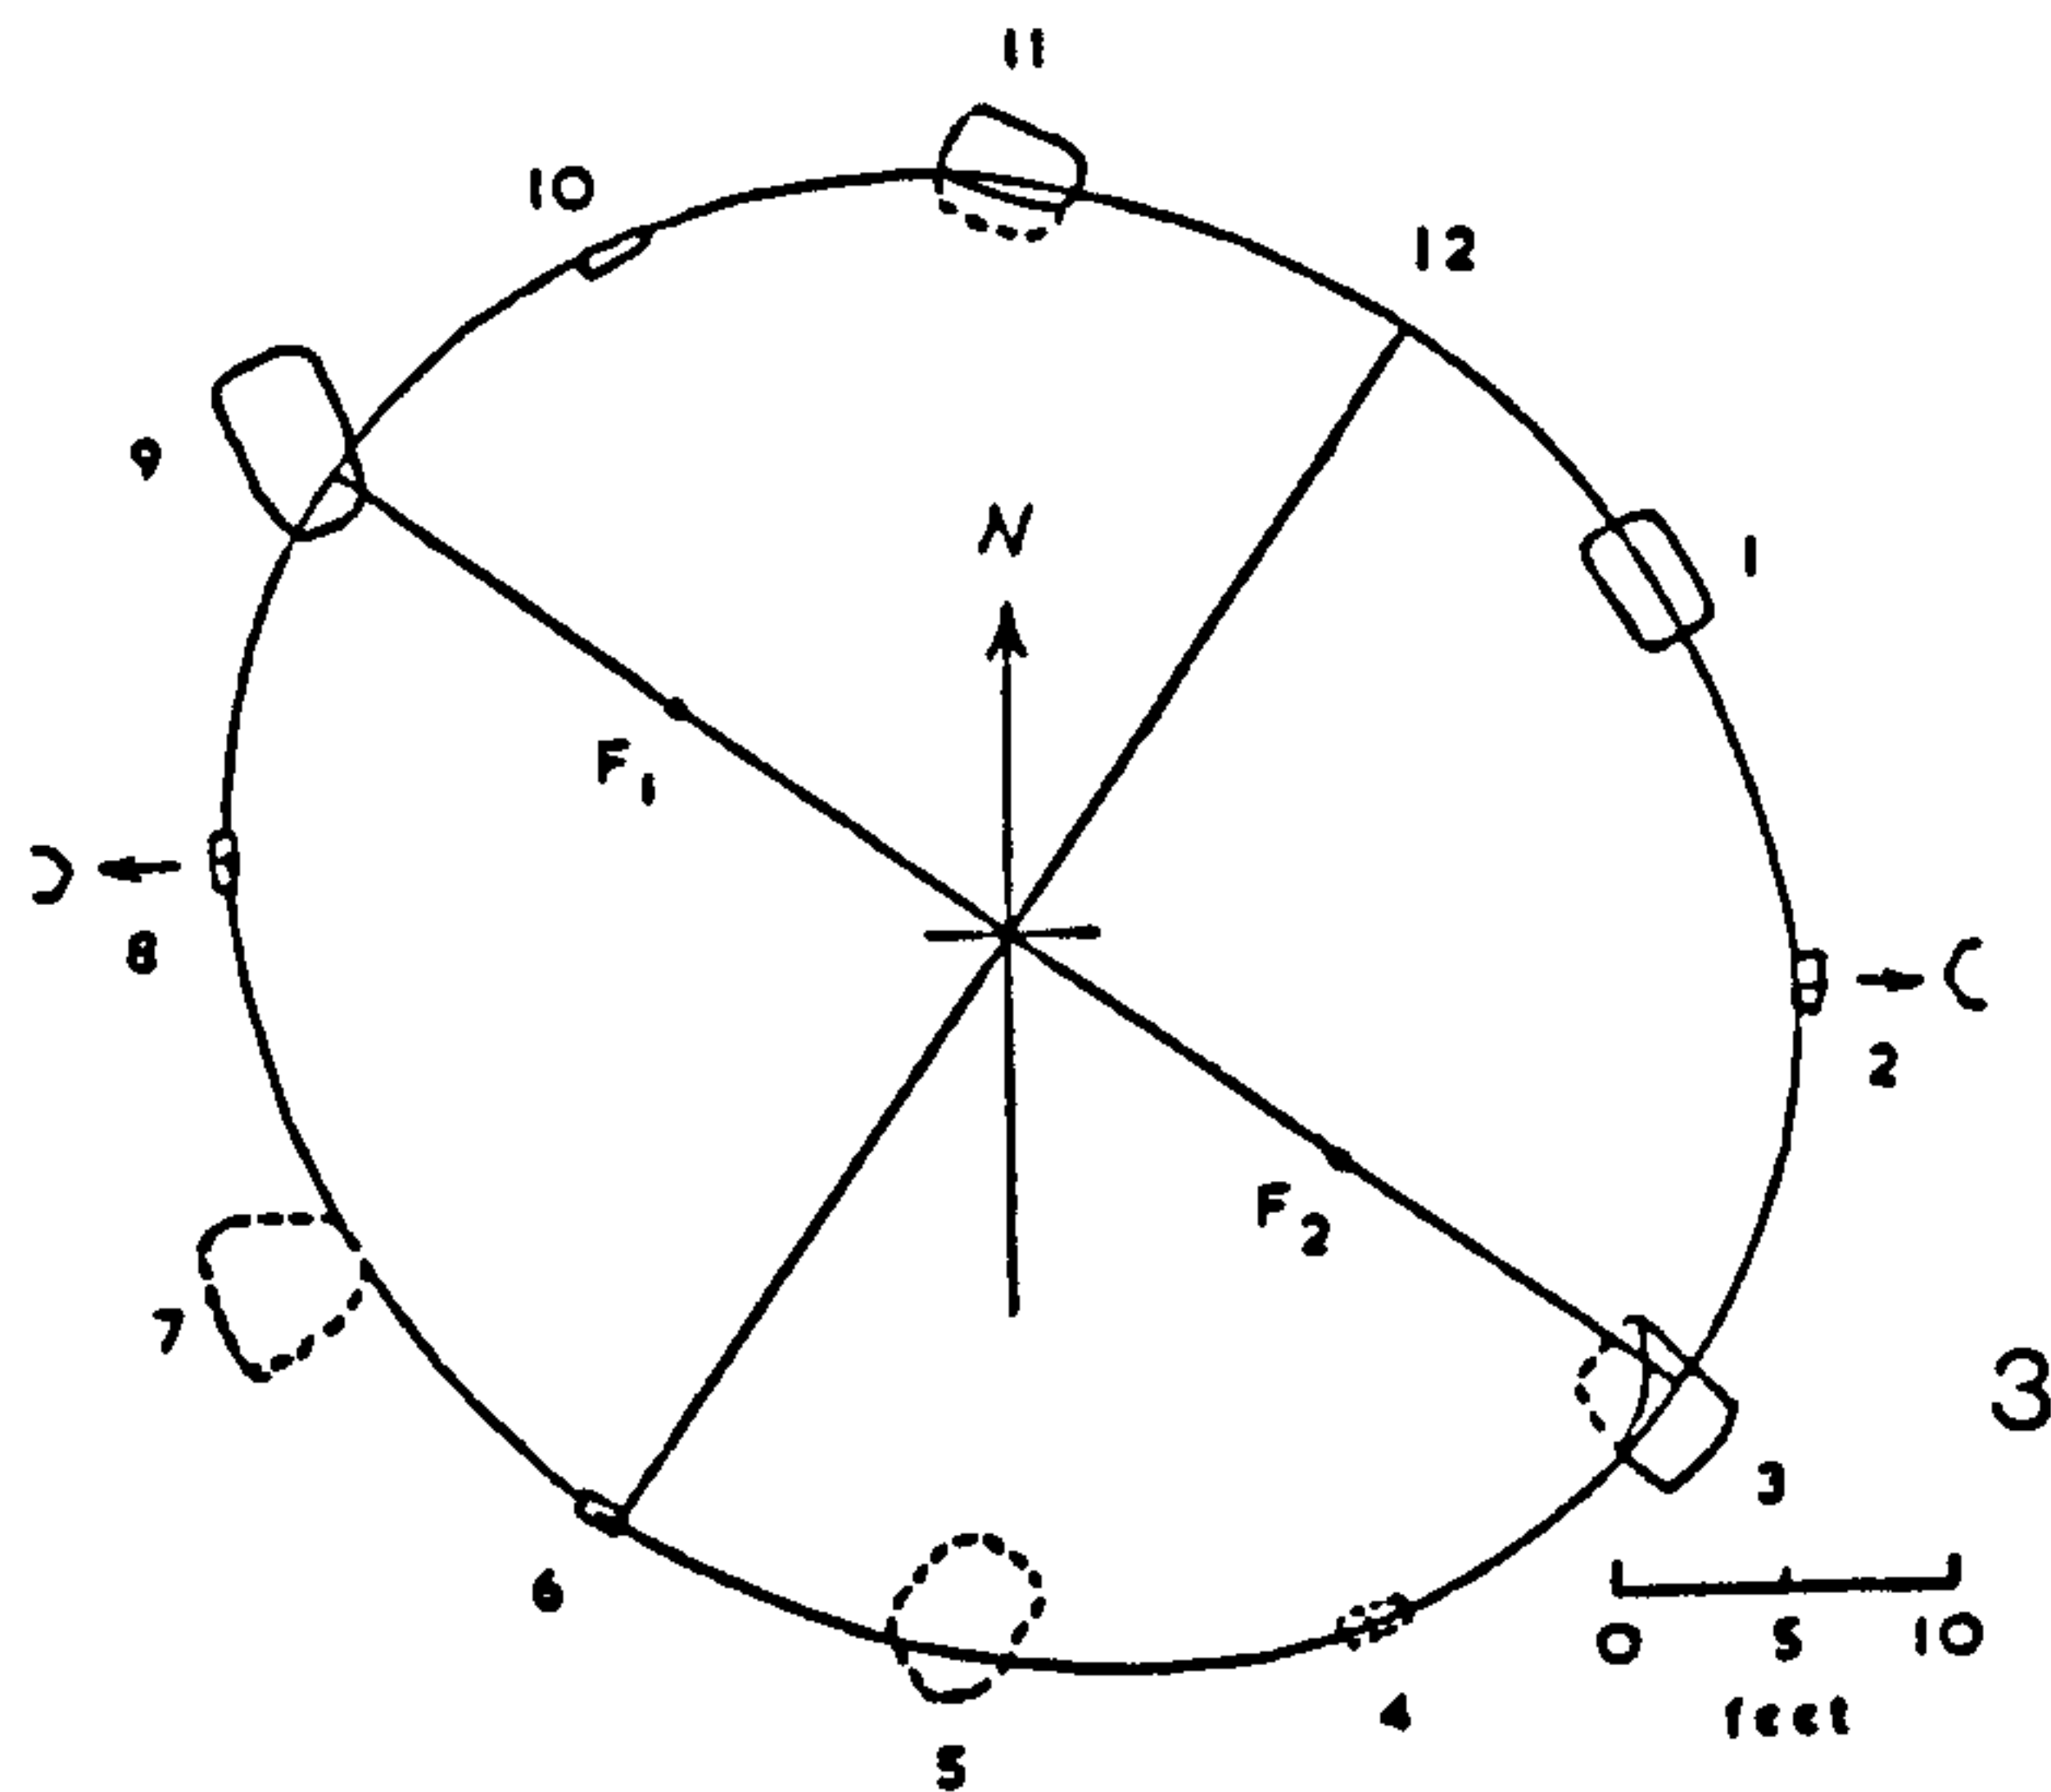

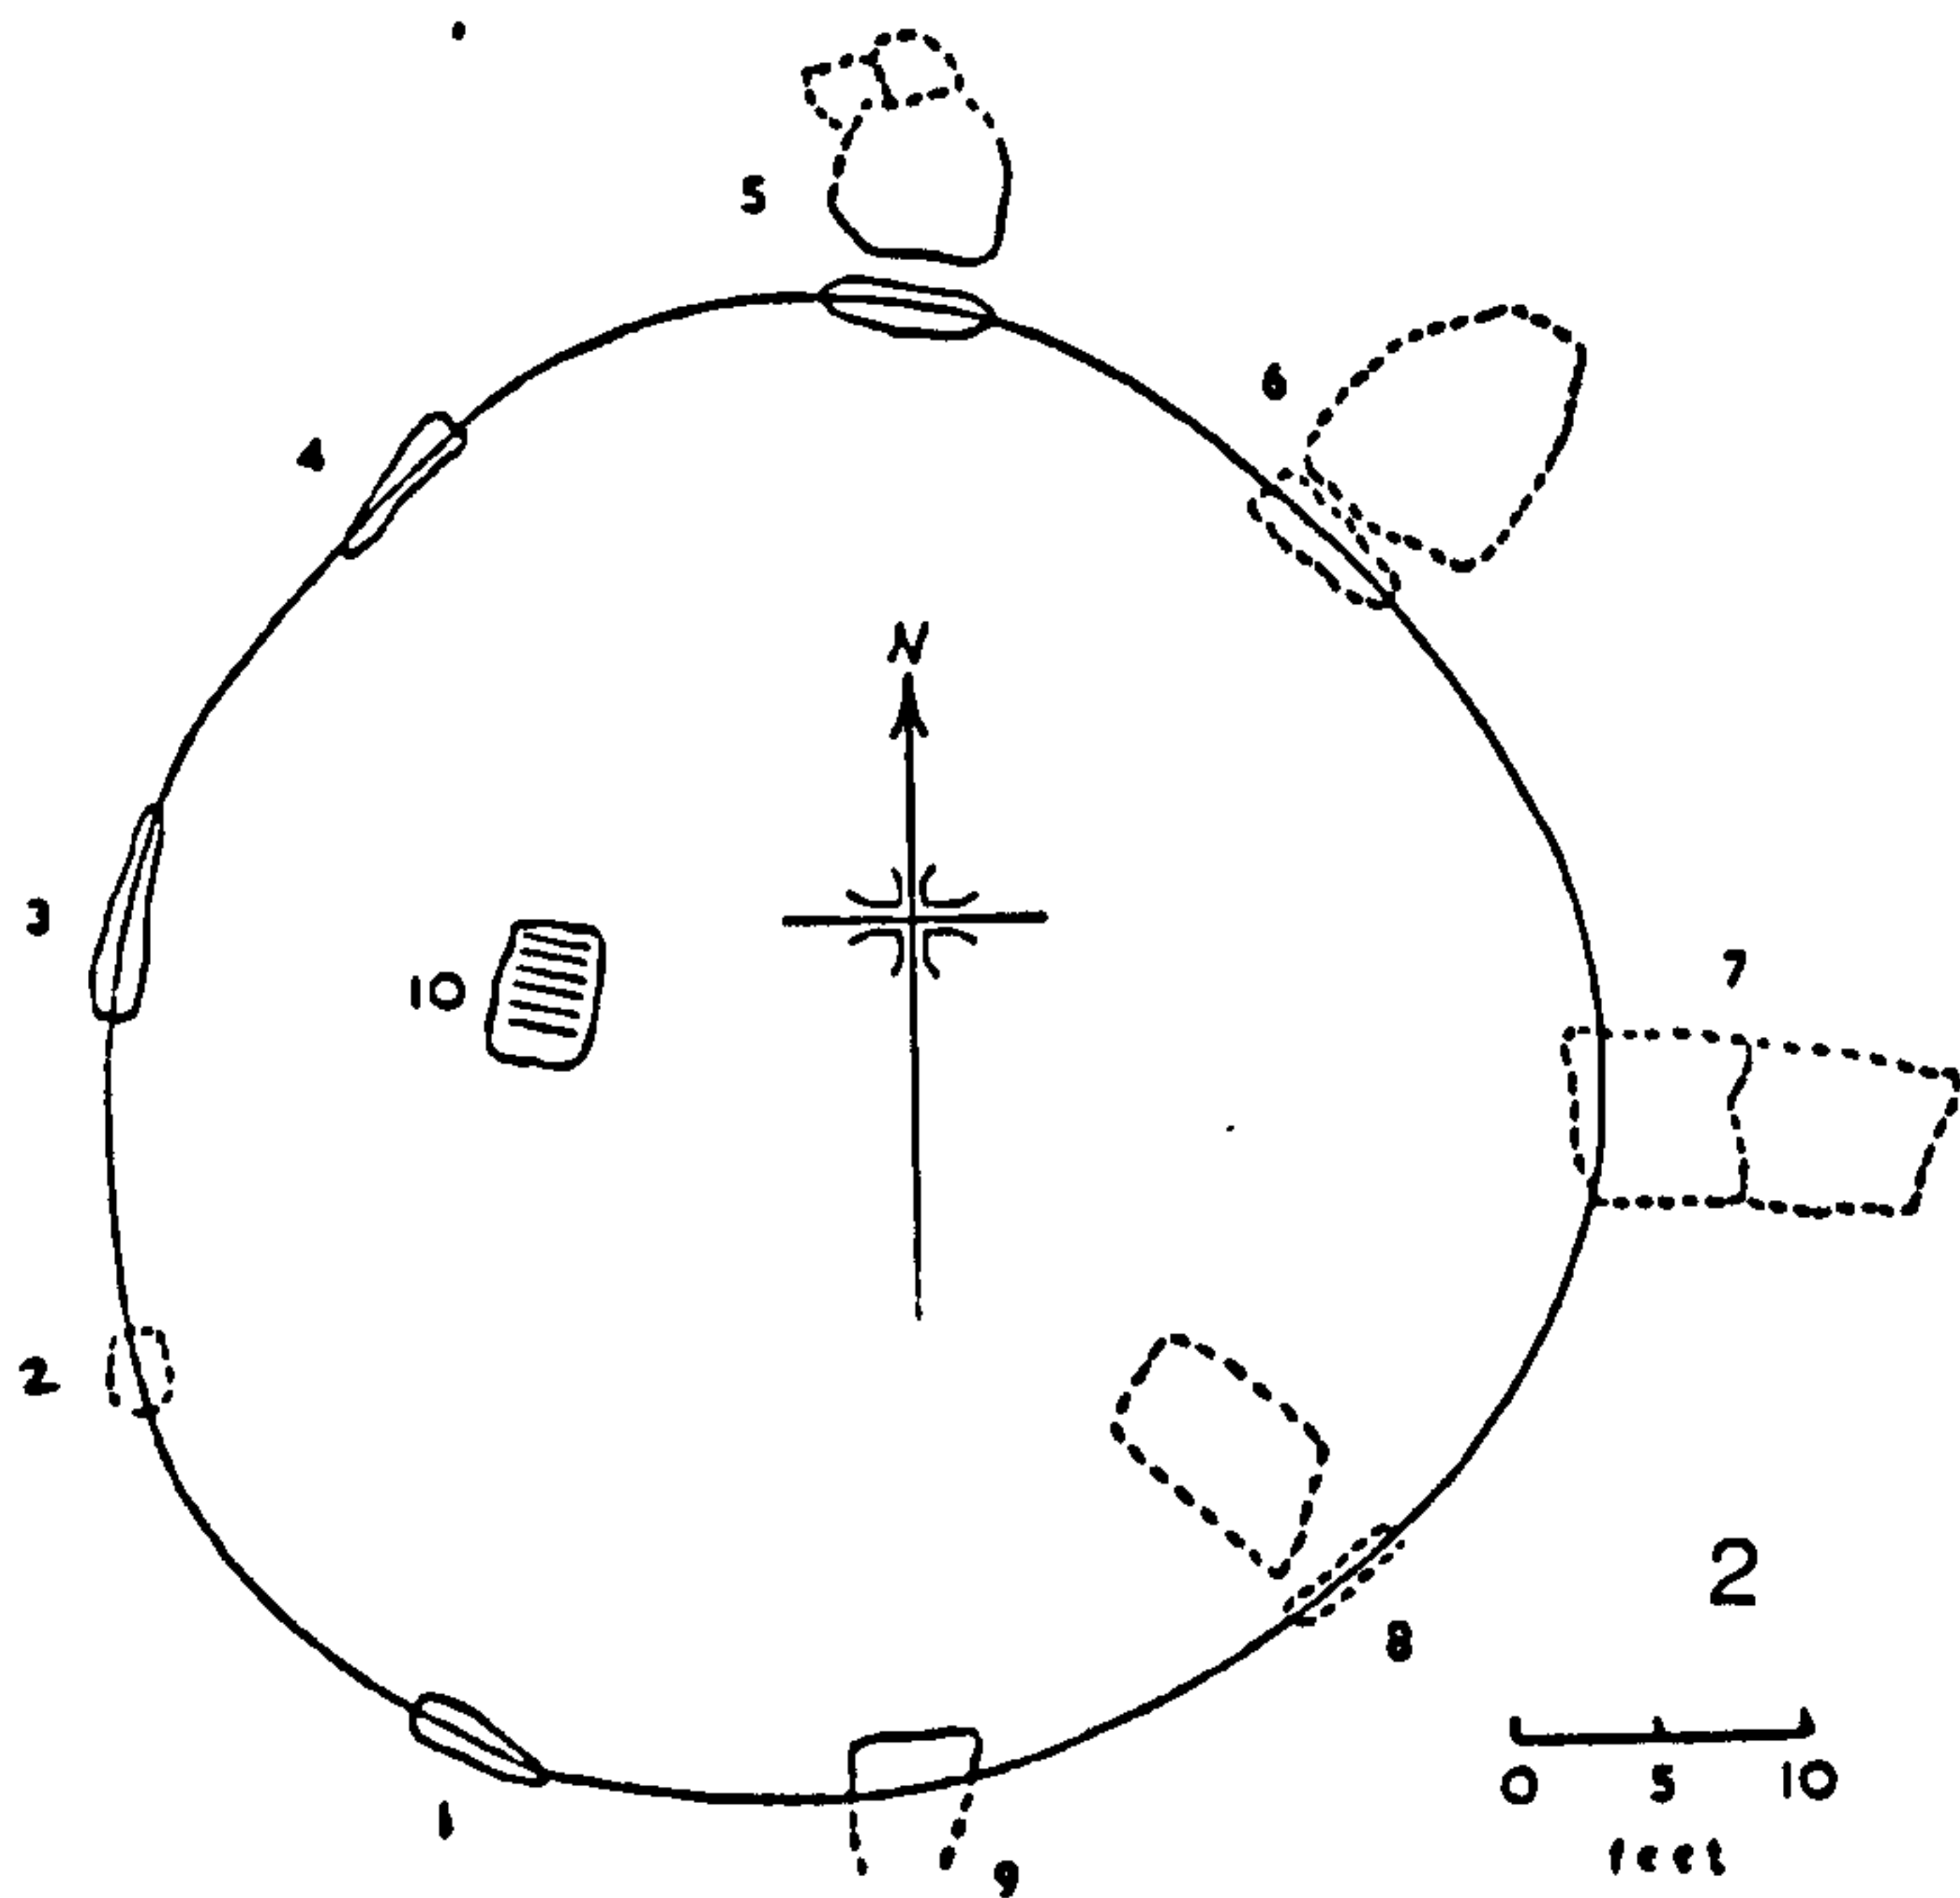

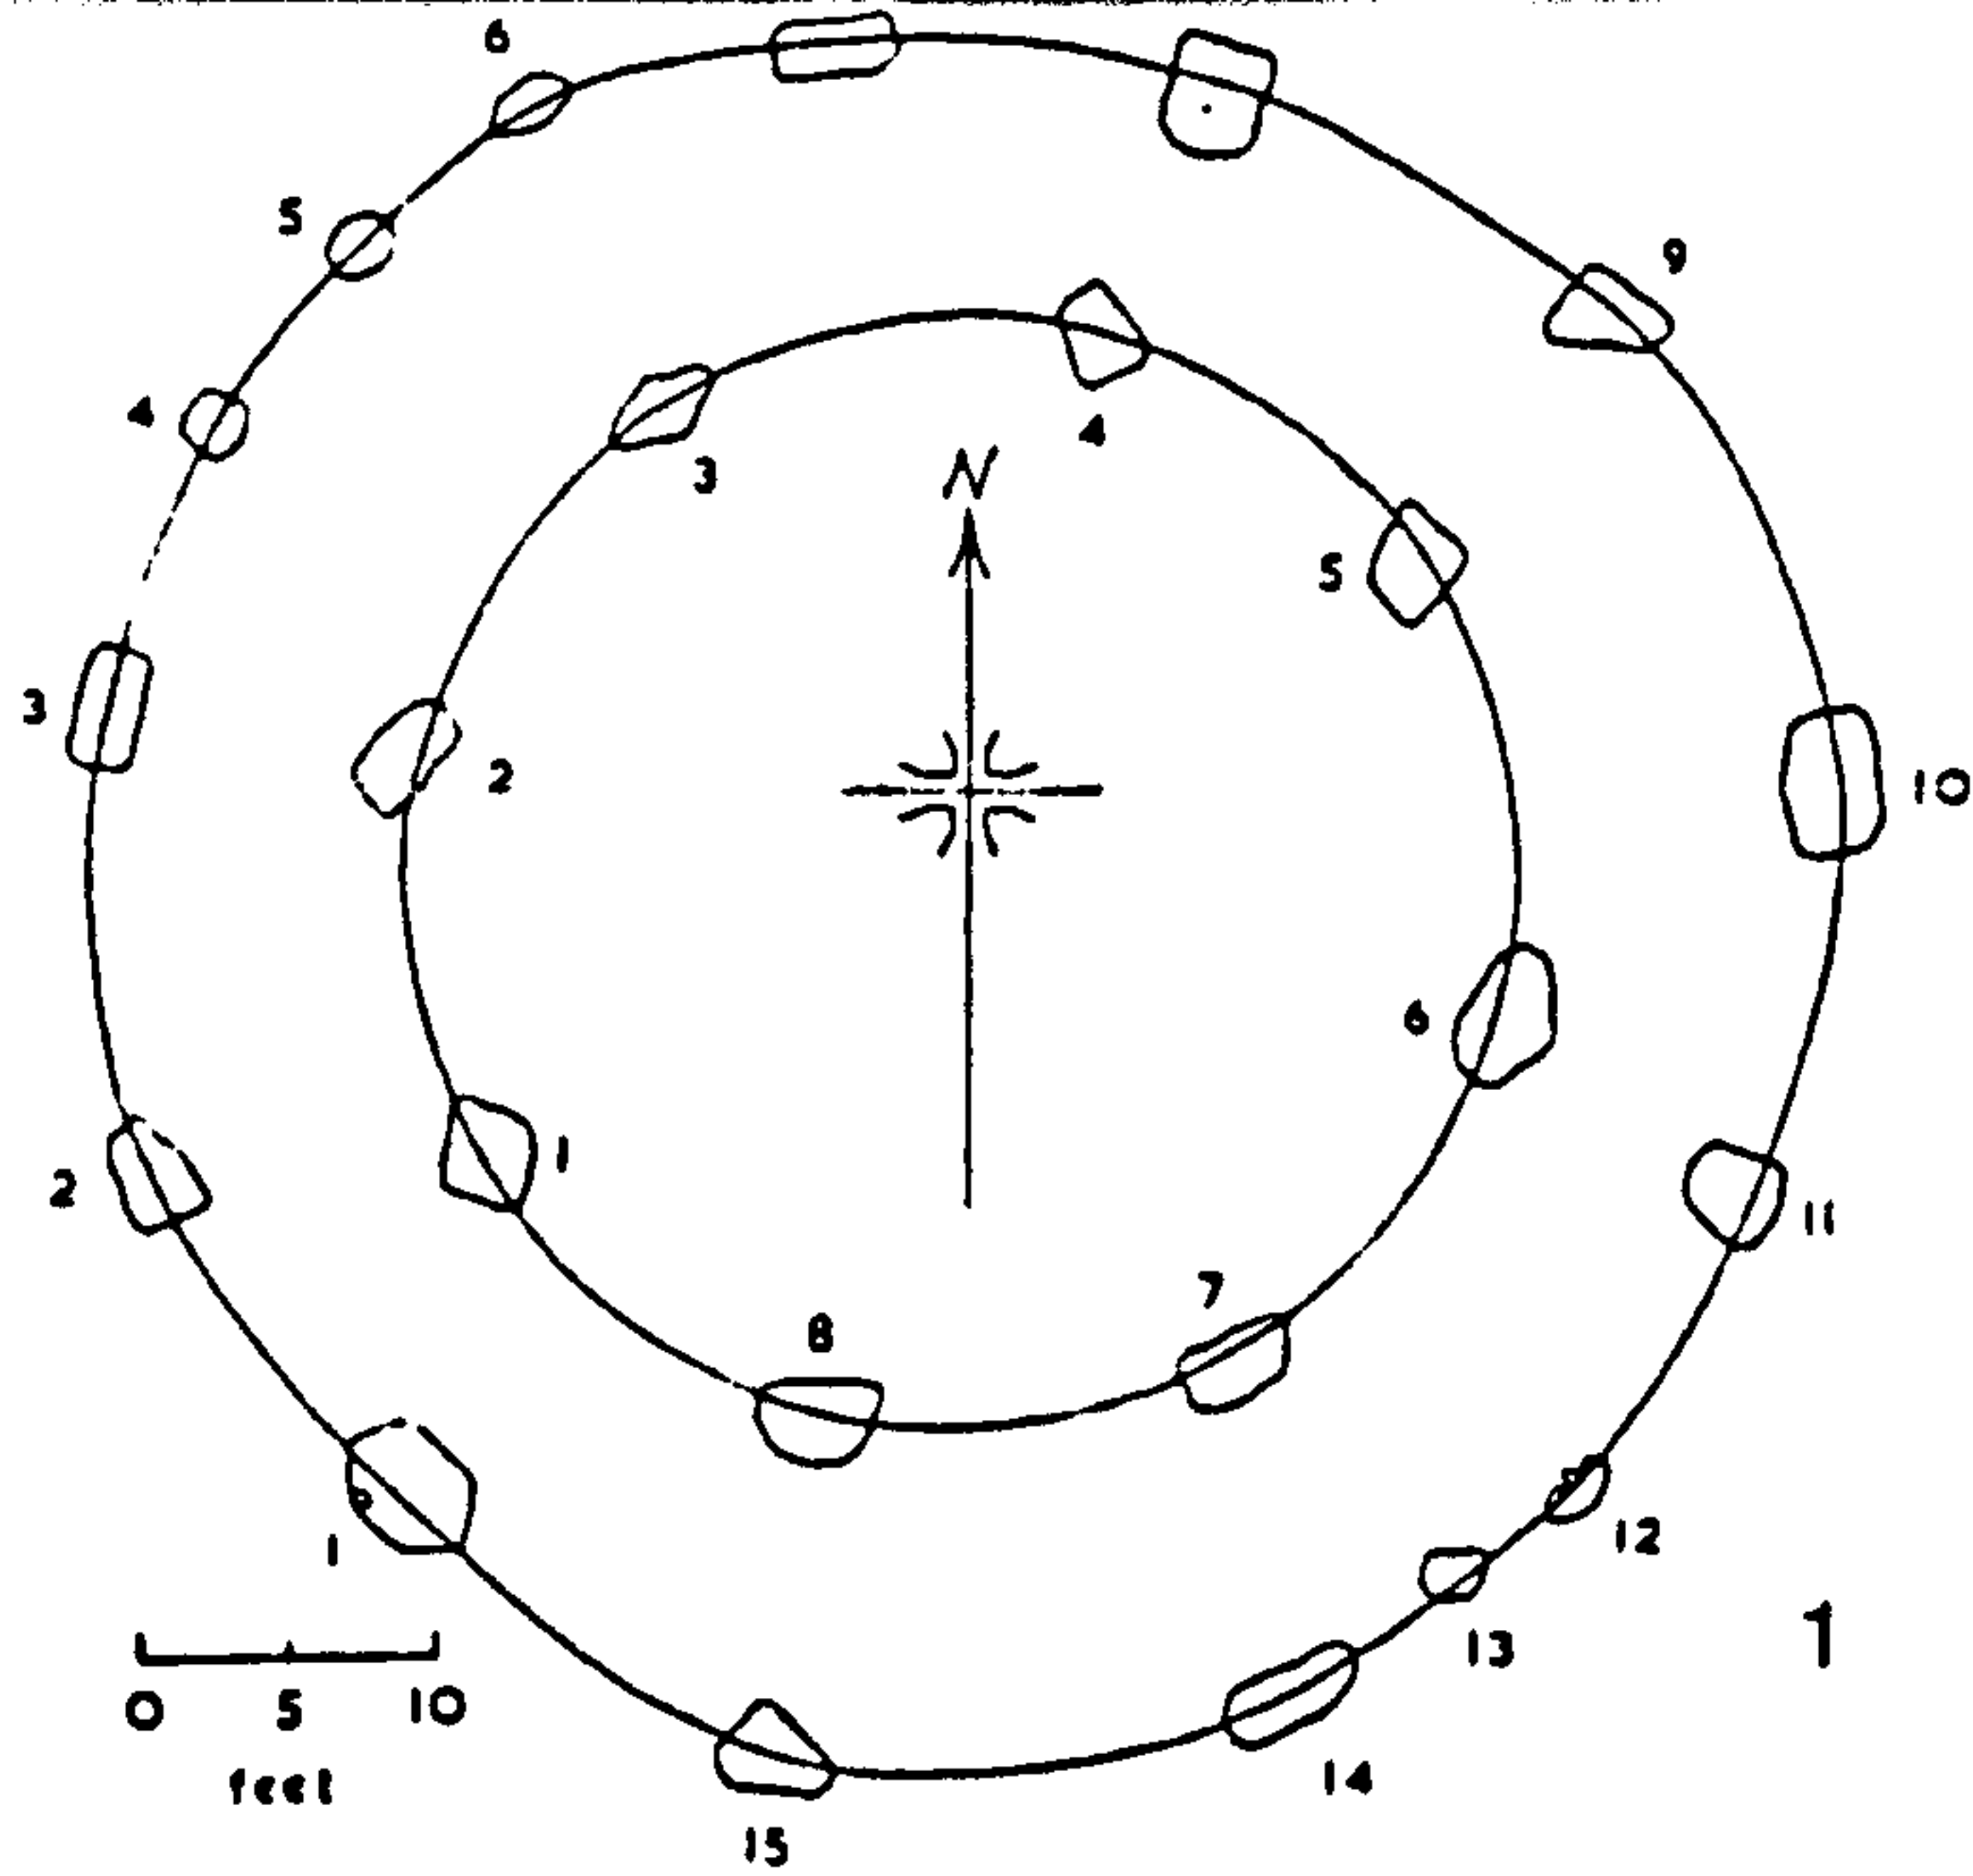

Fig. 8.6 Design of stone circles on Machrie Moor.
 1) Circle 5 (Fingal's Cauldron Seat) (AR 17).
 2) Circle 3 (AR 19).
 3) Circle 1 (AR 21).
 (all after Roy et al 1963: circle 5: fig. 1;
 circle 3: fig. 2; circle 1: fig. 4) (scale as shown).
