This Article is brought to you for free and open access by the Jefferson Digital Commons. The Jefferson Digital Commons is a service of Thomas Jefferson University's [Center for Teaching and Learning \(CTL\)](#). The Commons is a showcase for Jefferson books and journals, peer-reviewed scholarly publications, unique historical collections from the University archives, and teaching tools. The Jefferson Digital Commons allows researchers and interested readers anywhere in the world to learn about and keep up to date with Jefferson scholarship. This article has been accepted for inclusion in Jefferson Digital Commons Reports by an authorized administrator of the Jefferson Digital Commons. For more information, please contact: JeffersonDigitalCommons@jefferson.edu.

Jefferson Digital Commons Quarterly Report: October-December 2019

Another year has come to a close, and what a year it was! The JDC closed the final quarter of 2019 with 1,619 new items added and a record-breaking number of works posted for the year. These high numbers were in large part because of a [major digitization grant](#) the Jefferson Archives received and the addition of [1,800 historical photos](#) this summer. Here is the 2019 breakdown:

- **654,098** downloads
- **4,424** works posted
- **219** countries visited the site
- **18,204** institutions accessed content

New Collection Alert: Early Medical Education Records

Over 14,000 pages from 1,358 unique medical works from the early to mid-1800s were added to the Jefferson Digital Commons (JDC) this quarter, thanks to [a CLIR grant](#) awarded to Jefferson and six collaborating institutions last winter.

The collection of records provides a comprehensive look at the history of medical education in Philadelphia through the end of the Civil War. It offers a glimpse of the voices of medical greats such as Thomas Mütter, Samuel Gross, and George McClellan, as well as the often unheard voices of students. Records include class notes and dissertations, matriculation records, commencement addresses, faculty lecture notes and more. You can browse all CLIR materials [here](#).

What People are Saying About the Jefferson Digital Commons

Articles:

- [A prospective, multi-center, randomized comparison of iron isomaltoside 1000 versus iron sucrose in patients with iron deficiency anemia; the FERWON-IDA trial.](#)
- [A prospective study of maternal, fetal and neonatal outcomes in the setting of cesarean section in low- and middle-income countries.](#)
- [Iron isomaltoside is superior to iron sucrose in increasing hemoglobin in gynecological patients with iron deficiency anemia.](#)
- [Associations between feeding practices and growth and neurodevelopmental outcomes](#)
- [Pioneers in Dermatology and Venereology: an interview with Prof. Lawrence C. Parish.](#)
- [The Practice of Dermatology Ain't What It Used To Be: The Preauthorization Catastrophe.](#)
- [Speaking Good \(and Safe\) Dermatologic English](#)
- [Jewish dermatologists in Nazi Germany.](#)
- [Continuation of angiotensin converting enzyme inhibitors on the day of surgery is not associated with increased risk of hypotension upon induction of general anesthesia in elective non-cardiac surgeries.](#)
- [Ethical standards for cardiothoracic surgeons' participation in social media.](#)
- [Antibody responses against the vaccine antigens Ov-103 and Ov-RAL-2 are associated with protective immunity to Onchocerca volvulus infection in both mice and humans.](#)
- [Inactivated Rabies Virus-Based Ebola Vaccine Preserved by Vaporization Is Heat-Stable and Immunogenic Against Ebola and Protects Against Rabies Challenge.](#)
- [High-fat diet fuels prostate cancer progression by rewiring the metabolome and amplifying the MYC program.](#)

- Editorial: Cancer Ecosystems.
- Excision repair cross-complementing group-1 (ERCC1) induction kinetics and polymorphism are markers of inferior outcome in patients with colorectal cancer treated with oxaliplatin.
- Long-Distance Axon Regeneration Promotes Recovery of Diaphragmatic Respiratory Function after Spinal Cord Injury.
- Immunomodulatory and neuroprotective mechanisms of Huangqi glycoprotein treatment in experimental autoimmune encephalomyelitis.
- Astragaloside IV protects neurons from microglia-mediated cell damage through promoting microglia polarization.
- Mechanisms of simvastatin myotoxicity: The role of autophagy flux inhibition.
- Validation of a Miniaturized Permeability Assay Compatible with CRISPR-Mediated Genome-Wide Screen.
- Targeted Epidural Blood Patches Under Fluoroscopic Guidance For Incidental Durotomies Related To Spine Surgeries: A Case Series.
- Effect of Verbal Directions on Grip Strength Evaluated Using the Handheld Dynamometer
- Prevalence of Suspected Hereditary Cancer Syndromes and Germline Mutations Among a Diverse Cohort of Probands Reporting a Family History of Prostate Cancer: Toward Informing Cascade Testing for Men.
- Impact of Tumor Regional Involvement on Active Surveillance Outcomes: Validation of the Cumulative Cancer Location Metric in a US Population.
- Comparison of MRI- and TRUS-Informed Prostate Biopsy for Prostate Cancer Diagnosis in Biopsy-Naive Men: A Systematic Review and Meta-Analysis.
- Twitter and Academic Urology in the United States and Canada: A Comprehensive Assessment of the Twitter-verse in 2019.
- Incorporating mpMRI biopsy data into established pre-RP nomograms: potential impact of an increasingly common clinical scenario
- Conceptualization of a Parasympathetic Endocrine System
- Recovery priorities in degenerative cervical myelopathy: a cross-sectional survey of an international, online community of patients.
- Maternal Characteristics Affect Fetal Growth Response in the Women First Preconception Nutrition Trial.
- Teaching an old pain medicine society new tweets: integrating social media into continuing medical education.
- Prognostic Significance of Tumor-Associated Macrophage Content in Head and Neck Squamous Cell Carcinoma: A Meta-Analysis.
- Nucleus pulposus primary cilia alter their length in response to changes in extracellular osmolarity but do not control TonEBP-mediated osmoregulation.
- Dysregulation of Mitochondrial Ca²⁺ Uptake and Sarcolemma Repair Underlie Muscle Weakness and Wasting in Patients and Mice Lacking MICU1
- Meta-Analysis a Myriad of Data - Is It Helpful?
- Variable levels of drift in tunicate cardiopharyngeal gene regulatory elements.

- Trial of canakinumab, an IL-1 β receptor antagonist, in patients with inclusion body myositis.
- Mitochondrial calcium exchange links metabolism with the epigenome to control cellular differentiation.
- Clinical, Cytogenetic, and Molecular Findings in Two Cases of Variant t(8;21) Acute Myeloid Leukemia (AML).
- Irisin functions to inhibit malignant growth of human pancreatic cancer cells via downregulation of the PI3K/AKT signaling pathway.
- Association of β -Amyloid Burden With Sleep Dysfunction and Cognitive Impairment in Elderly Individuals With Cognitive Disorders.
- Ossification of the Posterior Longitudinal Ligament: Surgical Approaches and Associated Complications.
- Clinical Outcome Assessments Toolbox for Radiopharmaceuticals.
- Incorporating mpMRI biopsy data into established pre-RP nomograms: potential impact of an increasingly common clinical scenario.
- Chemical Disaster Preparedness for Hospitals and Emergency Departments
- Aneurysm Formation, Growth, and Rupture: The Biology and Physics of Cerebral Aneurysms.
- Control of CCND1 ubiquitylation by the catalytic SAGA subunit USP22 is essential for cell cycle progression through G1 in cancer cells.
- Therapeutic effect of Rho kinase inhibitor FSD-C10 in a mouse model of Alzheimer's disease.
- Prenatal tobacco and marijuana co-use: Impact on newborn neurobehavior.
- False in Name Only-Gastroduodenal Artery Pseudoaneurysm in a Recurrently Bleeding Patient: Case Report and Literature Review.
- Cervical assessment by ultrasound for preventing preterm delivery.
- Case 22-2019: A 65-Year-Old Woman with Myopathy.
- Structural and functional analysis of parameters governing tankyrase-1 interaction with telomeric repeat-binding factor 1 and GDP-mannose 4,6-dehydratase.
- Perturbed mitochondria-ER contacts in live neurons that model the amyloid pathology of Alzheimer's disease.
- Gilteritinib or chemotherapy for relapsed or refractory FLT3-mutated AML
- Heat shock factor 1-mediated transcription activation of Omi/HtrA2 induces myocardial mitochondrial apoptosis in the aging heart.
- Markers of bone and lipid metabolism with eslicarbazepine acetate monotherapy.
- Relating the gut metagenome and metatranscriptome to immunotherapy responses in melanoma patients.
- Induction techniques that reduce redistribution hypothermia: a prospective, randomized, controlled, single blind effectiveness study.
- Hypotrichosis with juvenile macular dystrophy: Combination of whole-genome sequencing and genome-wide homozygosity mapping identifies a large deletion in CDH3 initially undetected by whole-exome sequencing-A lesson from next-generation sequencing.

- Progression-Free but No Overall Survival Benefit for Adult Patients with Bevacizumab Therapy for the Treatment of Newly Diagnosed Glioblastoma: A Systematic Review and Meta-Analysis.
- Characterization of resistance to a potent D-peptide HIV entry inhibitor.
- 3,3'-Diindolylmethane enhances apoptosis in docetaxel-treated breast cancer cells by generation of reactive oxygen species.
- Competence in Endoscopic Ultrasound and Endoscopic Retrograde Cholangiopancreatography, From Training Through Independent Practice.

- Lecture and Matriculation Tickets
- Medical Student and Faculty Lectures Notes
- Notes on Arguments for a Charter for the Jefferson Medical College

Grand Rounds and Lectures:

- Contemporary Midwifery: Education, Research, and Practice
- Valvular Heart Disease
- Up in the Air
- A Primary Care Approach to Gun Violence
- A Swan Song: Advances in Hemodynamic Monitoring
- Appendicitis in 2019
- Current Trends in Minimally Invasive Surgery, and the Impact Upon Surgical Training
- How low can we go? In search of the transfusion threshold in neonates undergoing surgery
- Management of Diverticulitis in 2019
- From DNA through FDA and EMA: Development of the first approved gene therapy for an inherited blinding disease
- BMI Matters! Where we are, where we've been, what will our Legacy be?
- Ketamine Use in Palliative Care
- Pre-participation cardiac assessment: Physiologic vs Pathologic ECG changes in athletes
- Balint Groups: How to Incorporate "Dealing with Difficult Patients" into a Residency Curriculum
- Mind, Body and Cancer Care: The Data and the Questions
- Cultural Considerations in Palliative and End of Life Care
- The Hip
- Hypertensive Disorders of Pregnancy
- Using Jefferson's New Community Health Needs Assessment & Improvement Plan to Build Health Equity: A Crossroads Ripe for Scholarly Inquiry and Innovation
- Design for Everybody: Creative Ideas for Wellness and Inclusion
- Management of Adnexal Masses
- Scribes in Primary Care
- Gynecology in the Courts
- Practical Diabetes Management
- SGLT2 inhibitors and Cardiovascular Outcomes: Journal Club
- Polypharmacy and Deprescribing in the Older Adult
- Prophylactic Bilateral Salpingectomy: Are you better off without your Fallopian tubes?
- Psychosocial Care Surrounding Gender Affirming Surgery
- The Exciting World of ARV Drug-Drug Interactions
- Evidence-Based Nutritional Approaches to Preventing Cardiovascular Disease
- Interprofessional Pain Care
- Keystone First Diabetes Initiative: January 2019-June 2019

- The Convergence of Law, Religion, and Medicine: Public Policy Implications
- Substance Use Disorder: Geriatric Edition
- The NIH Grant Machine
- Men's Health: Diet and Nutrition Considerations for Midlife and Beyond
- Optimizing Rehabilitation for People with Acquired Cognitive Impairments
- Ethics, Science, and Medical Apartheid - Six Lessons from History
- Magnetic Sphincter Augmentation for Chronic GERD

Journals and Newsletters:

What People are Saying About the Jefferson Digital Commons:

Name: Kimberly S.

Country: US

Role: LCSW

Resource URL: <https://jdc.jefferson.edu/jeffjpsychiatry/vol3/iss1/12/>

Comments: Thank you. I have a new client, 23years old, separated at age 7 from identical twin brother by TN foster care system. Client is experiencing symptoms of dissociative disorder, depression and social anxiety. Trying to find answers.

Name: Damon C.

Country: US

Role: Family of Former Student

Resource URL: <https://jdc.jefferson.edu/skmccommencement/35/>

Comments: My grandfather graduated from Jefferson in 1932 with his medical degree. He is featured in the document you scanned and posted. He won the prize for the best surgery graduate in 1932. It is a remarkable piece of family history, and I am so lucky you scanned it in and made it available free of charge. What a wonderful service, and credit to local history

Name: Paula W.

Country: US

Role: student

Resource URL: <https://jdc.jefferson.edu/otfp/13/>

Comments: I was unable to access this article directly through my university's databases and wanted to reference this in a dissertation. Thank you!!
