Pres. W. J. Kerr,
Logan, Utah.

Dear Sir: -

I write to ask if there is an opening for another instructor in Mathematics in the Agricultural College of Utah.

I am a graduate of University of Missouri and of Radcliffe College and have done graduate work in Mathematics in Harvard and University of Chicago. I have taught for three years, one as Stephen College in Columbia, and two as Assistant in Mathematics in University of Missouri. I am now teaching in the summer school of the University.

If there is any possibility of a vacancy in your Mathematical department, I shall be glad to make formal application for it.

Very truly yours,
Frances B. Hatcher

July 21, 1904.

Miss Frances B. Hatcher,
1201 Paquin St., Columbia, Mo.

Dear Madam:-

Replying to your favor of the 9th inst. regarding the probability of there being an opening for you in the department of mathematics in the Agricultural College of Utah, will say that our arrangements have practically been completed for next year's work, though there will probably be an opening for an assistant in the department of mathematics, who would be required to take about three-fifths work. It may be that we could use the entire time of the assistant after the College opened, but I would be unable at this time to guarantee to do that.

If you think you would care to come to the College for the position of assistant in mathematics, with the prospects of working into a permanent position should your work prove satisfactory, I shall be pleased to have you write me at once, stating about what compensation you would expect, and giving any other information that may be desired in considering your application.

Yours truly,

President.
