TABLE OF CONTENTS

Chapter 1: Introduction.....	1
1.0 Project Background.....	1
1.1 Problem Statement	2
1.2 Project Objectives	3
1.3 Project Scope	3
1.4 Project Significance	3
1.5 Chapter Summary	3
Chapter 2: Literature Review	4
2.0 Introduction	4
2.1 i-Learn Portal	5
2.2 LMS Global Standards	6
2.2.1 SCORM	6
2.2.2 Issues in SCORM Implementation	7
2.2.3 Advantages of SCORM	9
2.2.4 SCORM Compliant LMS	9
2.2.5 Difficulties in Developing a SCORM Compliant LMS	12
2.2.6 SCORM Types	12
2.2.7 SCORM in Malaysia's University	13
2.3 LMS Standard Organizations	17
2.3.1 IMS Global Learning Consortium.....	17
2.3.2 Advanced Distributed Learning initiative (ADL)	18
2.3.3 Schools Interoperability Framework (SIF)	18
2.3.4. IEEE Learning Technology Standards Committee (LTSC)	18
2.3.5 Aviation Industry CBT Committee (AICC)	25
2.4 LMS Basic functions	26
2.5 Compare Content Analysis	27

2.6	Chapter Summary	29
Chapter 3: Research Approach and Methodology		30
3.0	Introduction	30
3.1	Research Approach and Methodology	30
3.2	Problem assessment and research study	32
3.3	Knowledge acquisition	32
	3.3.1 Interview	32
	3.3.2 Observation	32
3.4	Data Analysis	33
3.5	Knowledge representation	33
3.6	Research report writing	33
Chapter 4: Case Study		34
4.0	i-Learn	34
4.1	Components of i-Learn (as in Version 2 in April 2009)	37
Chapter 5: Result and Finding		42
5.0	Discussion	42
Chapter 6: Conclusion and Recommendation		44
6.0	Conclusion	44
6.1	Recommendation	45
6.2	Future Work	45
References		46

ABSTRACT

Online learning is known as a crucial mode of the future of educational culture. Learning Management System (LMS) is a web based application where the learners are able to log on as well as access the courses which are allocate online to them. However, most LMS will simply manage the learning contents, the learning history data, the test results, and many more without managing the learning itself. Thus, the choice of an LMS is an important part of an organization's e-learning strategy and it will affect the organization for long period of time. Sharable Content Object Reference Model (SCORM) is a standard that allows the interoperability of learning tools and course content and provides a collection of specifications adapted from multiple sources to offer a comprehensive suite of e-learning capabilities that enable interoperability, accessibility and reusability of Web-based learning content. i-Learn Portal is the LMS platform that promote information sharing and resources for the academicians and students of the University of Technology MARA (UiTM), and the portal also provides standard content for the respective courses for student's perusal, extending the discussion or lecture at a class. The i-Learn Centre (i-LeC) of UiTM realizes that there is a need to standardize the i-Learn Portal towards world recognized LMS and therefore this research is done to understand SCORM and a comparative study among other selected global standards such as IEEE LTSC and IMS Global Consortium is carried out.
