HOLD FOR BINDING  
UNIVERSITY OF MAINE  
JANUARY  
THE LIBRARY

1939

# *Yours for Good Service*

The people use the telephone—  
in this country nearly everybody.

The people operate the tele-  
phone—about 300,000 of them in  
the Bell System.

The people own the telephone  
business. There are about 750,000  
owners of Bell System securities.

All of this works together to  
give you the best telephone ser-  
vice in the world at the lowest  
possible cost.

## Just Talking Things Over . . . . .

That Historical Corner in last month's issue seemed to have created considerable interest. The several who assisted by suggesting the names of those in the picture were not in entire agreement. This month we offer another one, somewhat more of a puzzle.

Perhaps few alumni outside of those in Augusta realize how many graduates and former students are in the service of the State. The article, "Under The Dome" in this issue will give *Alumnus* readers a fairly comprehensive idea of the situation. It is all but impossible to give a complete statement even of those who are located in the State House a considerable part of the time. From the Governor right down through the many departments of state, one finds alumni in places of responsibility. The list is an impressive one both in numbers and in positions.

If the list were expanded to include also those in municipal, county, and federal governmentals, as well as scores of others employed by the state but located outside of Augusta, its extent doubtless would surprise even the best informed and be astounding to the uninitiated.

It must be gratifying to the University administration to have graduates and former students so prominent in the service of the State. One of the acid tests of the value of the University to the State is in its service both to the people of Maine as a whole and to the State. To be sure, this is but one test of many, nevertheless it is an important one. Periodically it is hoped that *The Alumnus* may feature other branches of service which the limited space of a single issue forbids.

While on the subject of service to the State, there is one course at the University about which our alumni know relatively little and which is in fact being of great help to many Maine

families. This course features the practical with touches of the theory. It emphasizes the need and opportunity to put farming on a more efficient and therefore more profitable basis. We refer to the two-year agricultural course which is again enjoying a period of large enrollment such as it had two decades ago.

Most of the students who take the course come from farm homes. They are generally of the earnest, hard-working type. Some have found after undertaking the course that they wish to broaden their work to the four-year curriculum. The University has now organized the course so that a student can transfer from the two-year to the four-year course without much loss of time.

Many graduates of this course have achieved positions of distinction. A vast majority of them are operating their own farms. They have become substantial citizens of their communities and a force for the improvement of agriculture. It is our pleasure this month to present a story about one of the men whose position of leadership places him high in the agricultural councils of the State of Maine.

If by chance you have tucked that dues reminder off in a corner, may we suggest that a good way to start the New Year is to send your dues along by next mail.

FRONT COVER: Coburn Hall houses the Department of Botany and Entomology, the Department of Zoology, and Wildlife Conservation. It was named for the Hon. Abner Coburn, Skowhegan, a former president of the Board of Trustees and benefactor of the University. The building, completed in 1888, was designed by Frank E. Kidder of the class of 1879.

SERVICE TO THE STATE OF MAINE

# UNIVERSITY OF MAINE

## College of Technology

### THE STATE OF MAINE

is well served by the College of Technology which trains its students for logical, accurate, and precise thinking; and for intelligent participation in industry and in civic and state affairs. Its graduates in the State of Maine are employed and active in the business, professions, and industries which follow:

Accountants	Geologists	Advertising
Actuaries	Lawyers	Antiques
Architects	Photographers	Bakeries
Athletic Coaches	Physicians	Commercial Farming
Bankers and Brokers	Politicians	Commercial Laundries
Chemists	Publishers	Electric Shops
City Managers	Reporters	Foundries & Machine Shops
Contractors	Salesmen	Game Preservation
Educators	Statisticians	Insurance
Principals, Teachers,	Surveyors	Lumbering
Superintendents and		Manufacturing of
University Administrative officers		Foods, Pulp and Paper,
Engineers		Steel and Wood products,
Acoustic, Aeronautic,		Textiles
Bridge and Highway,		Merchandising
Chemical, City, Civil,		Plumbing
Consulting, Electrical,		Printing
Heating and Ventilating,		Public Utilities
Mechanical, Power,		Electric, Gas, Power,
Sanitary, Telephone,		Railroads and Water
Traction, and Transmission		Real Estate
		Textile Bleaching

### CURRICULA AND DEGREES

The College of Technology offers four-year curricula in  
Chemical, Civil, Electrical,  
General, and Mechanical Engineering  
Chemistry and Pulp and Paper Technology

Degrees conferred:

Bachelor of Science

Master of Science

Professional degrees conferred:

Chemical Engineer

Electrical Engineer

Civil Engineer

Mechanical Engineer

### MAINE TECHNOLOGY EXPERIMENT STATION

The Maine Technology Experiment Station acts as a testing laboratory for the Maine State Highway Commission; the station is also prepared to and does carry on investigations and research for private individuals, public utilities, and industry.

The College of Technology and the Maine Technology Experiment Station sponsored Maine Research Day held in Augusta May 20, 1938.

# SOIL MECHANICS IN MAINE

By EARL F. BENNETT, '28

WITHIN the past ten years the teaching of soil mechanics has spread rapidly through the technical colleges of the United States. Massachusetts Institute of Technology was the first to offer formal instruction in this subject. Now this instruction is either established or under consideration in practically every civil engineering department in the country. The development of laboratories has had the same rapid progress, with the bulk of the testing centered at the larger institutions.

The University of Maine and the Maine State Highway Commission are keeping pace with this development of soil mechanics. The rapid progress in establishing this work both in the academic and the applied fields is due to their fine co-operation. Mr. Lucius D. Barrows, '07, chief engineer for the Maine State Highway Commission, Dean Paul Cloke, H '34, of the College of Technology, Professor Weston S. Evans, '18, head of the Department of Civil Engineering, and Professor H. Walter Leavitt, '15, professor of Highway Engineering and testing engineer for the Highway Commission, have given their support to the establishment of this work.

In 1934 the writer began to develop the use of soil mechanics in highway and bridge engineering for the Maine State Highway Commission. During this time lectures were given to the civil engineering students on the subject. These lectures have gradually developed into an applied course in foundations and one in soil mechanics and a laboratory course in soil testing. These courses are now offered to both undergraduate and graduate students, as well as the opportunity to carry on thesis studies.

## History and Application

The study of soil Mechanics, a comparatively new branch of Civil Engineering developed during the last twenty-five years, deals with the structural properties of soil. Engineers have always recognized a problem with this material of construction whether in a foundation for a highway or a large building.

Progressive engineers have for years written their observations on the subject but dismissed it as too complicated. A small group of scientists inspired by Professor Karl von Terzaghi, an able leader in this field of research and practical application of soil mechanics, have, during the past decade developed structural soil tests. The theoretical and laboratory work has been extended to the actual construction of earth structures and foundations. This group of investigators

is enlarging and the science is developing rapidly.

There is a natural reluctance among engineers to accept this new science but as failures are corrected or prevented by

EARL F. BENNETT '28

Instructor in Soil Mechanics for the department of Civil Engineering and soils engineer for the State Highway Commission.

its methods, the interest in it is increasing. Soil mechanics is broadening in its scope continually. At first only foundation problems were considered. Gradually, as soil factors became better understood, it was found that these principles could be applied to other engineering problems.

The structural engineer needs to know the characteristics of the foundation for his structure, including bearing capacity,

settlement analysis, and rate of settlement. His was one of the first problems to be solved by soil mechanics. Some foundations appear to be of excellent quality, when actually below the footings there are deep layers of compressible soil. Deep compressible soil layers cause unequal settlement of the structure, repeated maintenance costs, and general dissatisfaction with the designer and builder. Proper soil investigations and settlement analyses will predict settlement difficulties and means can be taken during design and construction either to eliminate them or care for them properly.

The hydraulic engineer has recently turned to large earth-fill dams for water storage and flood control. Soil mechanics is used by him to determine the stability and settlement of the structure, the control of the compaction, and the study of the seepage of water through and under the dam. The solution of these problems has been a constant source of research for the soil mechanics investigators. The shearing strength of the soil is the fundamental problem in analysis of stability. Due to the limitations of the size of the laboratory tests and the difficulty in getting absolutely representative samples of soil, several machines and procedures have been designed for this test. Constant research is being carried on to improve these machines and methods. Sufficient progress has been made, however, in determining the shearing strength of the soil to be of definite value to the designing engineer.

*(Continued on Page 10)*

Some of the modern equipment in the new soil laboratory, from left to right: the direct shear testing machine for light normal loads, consolidation testing apparatus for settlement analysis, apparatus for making triaxial compression tests. The operator is alumnus Earl Bennett '28, author of the accompanying article.

# New Girls' Dormitory Announced

The University has been given a Public Works Administration grant of \$176,000 toward the construction of a new girls' dormitory, according to word received by President Hauck. The estimated cost of the hall is \$342,500 with additional costs for service lines, landscaping, and equipment. It will accommodate 160 girls. It is understood that two of the old wooden girls' residence halls will be discontinued. The University is to finance its part of the cost under a self-liquidating plan.

The new unit, one of the largest buildings at the University, will be located at the south end of the campus beside the present girls' dormitories.

Governor Lewis O. Barrows, '16 and Senator Wallace White were most helpful in bringing this project to the attention of the PWA officials, the Governor having made a special trip to Washington for this purpose.

Already the University has advertised for bids. Work must be started on Jan-

uary 1 to meet the requirements of the law under which the appropriation is made available.

This announcement came just as the *Alumnus* was going to press. A complete story will appear in the next issue.

## Memorial Plates To Be Ordered

With the receipt of orders for the University's Commemorative plates totaling, at the present time, over ninety dozen, the Alumni Committee has voted to proceed with the plans for production as early as possible. At a recent meeting the Committee completed selection of the various center designs. Due to a number of requests, the committee at this meeting decided to increase the number of center designs available to a total of eight, adding, in addition to the six center views already planned, views of Stevens Hall and Merrill Hall.

With the addition of two more centers, those alumni who wish to do so may now order a complete set of eight plates.

## Local Associations

**Western Massachusetts Alumni** met on December 2 in Holyoke with an attendance of nineteen. Ted Curtis '23 Faculty Manager of Athletics, as guest speaker, related recent campus events and showed moving pictures of the fall's football games. Color films of the campus during Commencement were also shown by Carl Johnson '17. During the business meeting plans were started for raising an association scholarship.

Alumni in St. Louis, Missouri, greatly enjoyed an informal picnic at Moselle in June Thirteen people, representing three alumni families, were able to attend.

**Worcester County Alumni** of Massachusetts held a meeting on December 6 with Mr. and Mrs. George Hansen '17 as host and hostess. Moving pictures of the Mame-Colby game were one of the features of the evening enjoyed by the ten couples present. The next meeting of this group will be held Jan. 10 at the residence of Dr. and Mrs. James E. Masterson at 1241 Main St., Worcester.

**Boston Alumni** are holding regular Friday noon weekly luncheons again this year. The main dining room on the 14th floor of the Chamber of Commerce building every Friday at 12:30. Visiting alumni or faculty are always sure of a welcome.

**Waldo County Alumni** under the leadership of President Spurgeon Benjamin '35, in co-operation with the Women's League of the local church, are planning a dance on December 30. Proceeds will be used to continue the scholarship which the association has awarded in recent years.

## Local Association Alumni Meeting Schedule

- 1st Monday each month—Cumberland County Alumni, 12 noon, Columbia Hotel
- 1st Friday each month—Philadelphia Alumni, Moravian Inn, 1511 Moravian St., Philadelphia, 6:30 p.m.
- Every Friday—Boston Alumni Luncheon Chamber of Commerce Bldg., 14th Floor
- 1st Thursday each month—Portland Alumnae, 8 p.m., Columbia Hotel
- January 10—Worcester County, at home of Dr. and Mrs. James E. Masterson, 1241 Main St., Worcester
- January 14—Hancock County Association
- February 2—Portland Alumnae, 8 p.m., Columbia Hotel, Dr. J. H. Huddleston, guest of honor

(Continued on Page 15)

## The History Corner

When the University Library was in the southeast corner of Coburn Hall, formerly the Physics Laboratory, studiousness would appear to have been the order of the day. The very intent though presumably friendly young man in the picture has been identified as Herbert L. Niles '96. Of his fair companions several suggestions but no definite clue has been given. The year 1895-6 is indicated by the class motto *en avant* which appears in the original photograph on the right hand wall.

At one time confined to the room seen through the door at the back of this picture, the library, growing with the growth of the University, overflowed into the room in the foreground. Today, still keeping pace with the institution, it crowds its quarters in the library building.

Any clues to the identity of the studious and modishly dressed co-eds will be welcome. Also, any alumni with old photographs of people or places wishing to contribute them to the History Corner may send them to the Alumni Office, Fernald Hall. Use will be made of them as far as circumstances may permit.

# UNDER THE DOME

FEW facts can indicate how deeply the University has rooted itself through the years into the life and thought of the State of Maine as well as a study of the influence of alumni in the policies and work of the administrative departments of the state government. Some suggestion of this influence can be gained by a study of the alumni in the employ of the state in directing or carrying out the details of state administration. To this end the Assistant Alumni Secretary was detailed last month to make a survey of alumni employed in the State House. *Under the Dome* is the narrative of his visit to the Capitol for this purpose. Considerable effort has been made both by the editors and those alumni who so generously assisted in the study to name all the alumni who are employed in the State House; any omissions or inaccuracies which may be called to the editor's attention will be most sincerely appreciated.

My first thought as I climbed the gray stone steps of the State House was to find the Department of Agriculture, and Alumnus Erlon Newdick '18, who had very generously offered to take me under his wing as guide and interpreter through the unfamiliar mazes of the building. I knew that he was chief of the Division of Plant Industry and I soon found that the Department of Agriculture was on the third floor. Arrived there, I read the signs on the various doors. No Department of Agriculture. Finally, on the third try, the thought came that one of the several offices standing so hospitably open so that the sign was invisible must be the one sought. I tried one. Mr. Newdick, I was courteously informed, was in the next office to the right. So he was, busy with his morning correspondence. As soon as my errand was made known, however, correspondence was put aside and the question of alumni in the State House occupied the center of attention.

Appropriately the Department of Agriculture received first consideration. Not only was it first at hand and most familiar to Mr. Newdick through his years of work there, but also it lists an impressive proportion of alumni among its many workers. George Babb, Class of 1890, is a veteran Inspector and Lecturer;

Stanley Painter, '31, is State Horticulturist with Edward D. Johnson, '27, as an assistant. Clayton Osgood, '24, is Dairy Inspector. In fact, this division of dairy inspection includes Kenneth Johnson, '33, Frank Small, '23, and Carl Titcomb, '35, who are mostly on the road in various parts of the state. Roy Bacon, '06, of Oakland, Franklin Chapman, '36, of Bethel, and Robert Stubbart, '33, as a market inspector, are also contributing to the vital work of this department. And directing the activities of the department from the next office is Commissioner of Agriculture Frank P. Washburn, a trustee of the University.

## At the Top of the List

It seemed next a proper move to start, so to speak, at the top of the list, so we climbed the stairs to the Governor's office. Lewis O. Barrows, '16, was in important conference at the time, but we looked into the Council Chamber with the massive chair of state under the golden eagle from where this alumnus guides the destinies of his native state. A few minutes later, however, we did have the pleasure of meeting his Secretary of State, Frederick Robie, '16. He shook hands cordially while Mr. Newdick ("Dick" to almost all the people we met that day) explained the purpose of the visit. We spoke of his right-hand assistant, Deputy Secretary of State Harold Goss, '09, and asked if any more alumni were in his office. Yes, Burtus Fowler, of the Class of 1915, a Captain in the State Police, was assigned there as a chief inspector.

A few minutes later as we passed down one of the corridors nearby, we saw the office of the Attorney General with the name of Franz U. Burkett, '16, on it; Mr. Burkett was in Portland that day, however, so we could only glance into his office.

Down on one of the lower floors we passed by the Department of Inland Fish-

eries and Game where Commissioner George Stobie, '14, veteran conservationist, directs the extensive activities of this department assisted by Deputy Commissioner Archer Grover, '99. Relations between this department and the University have in recent years been greatly strengthened by the attendance of all wardens at special short courses held on the campus, so that now, in a manner of speaking, the large force of field workers in this important state activity are foster-alumni.

Closely related to the work under the direction of Alumnus Stobie is that of the Forestry Department. Here I was introduced to Walter O. Frost, '06, still remembered in Maine athletic circles for his baseball pitching. With a hearty welcome and cordial interest in the purpose of my visit, he carefully explained his position and wrote out his official title. There may be longer titles borne proudly under the great dome of the state capitol, but I, at least, didn't meet any. It is, I think *in toto*, Associate Pathologist, State Leader Blister Rust Control, United States Department of Agriculture, Bureau of Entomology and Plant Quarantine, co-operating with the Maine State Forestry Service. The length of the title, however, is fully supported by the importance of the position, as any one will know after discussing white pine blister rust with alumnus "Jack" Frost. In the same office are alumni George Faulkner, '19, George Gruhn, '25, and Austin Wilkins, '26, all forest supervisors charged with the responsibility of various districts throughout the state.

In passing we glanced into the now deserted legislative rooms for the House and the Senate, soon to be the scene of busy activity, and noted the office of President of the Senate with the name of J. Frederick Burns, '22, on the door. Just then from the elevator stepped an energetic, intent figure, alumnus Frank Southard.

(Continued on Page 15)

# CAMPUS EVENTS

## Removed—

Green ties, special hats, and restricted regulations on freshman men were removed unexpectedly by the Senior Skulls on December 14, just previous to the Christmas vacation. Freshman regulations, mild in comparison to the older years, denied the first-year men opportunity to smoke on the campus, talking with coeds, walking on the grass, and other criminal offenses. For the balance of the year, the class, being judged sufficiently initiated, will participate in the normal University existence. Rules for freshman girls were removed several weeks previously.

## Elected—

Dana Drew, of Patten, athlete and honor student, was chosen president of the Senior Class during class elections last month. For the other classes, Harold Gerrish, of Lisbon Falls, will preside for the Juniors, Charles Arbor, of Rumford, for the Sophomores, and Edward Barrows, of Augusta, son of Governor Barrows '16, for the Freshmen. All four presidents are outstanding athletes and leaders in campus activities.

Elected with them for the offices of vice president, secretary, and treasurer were the following students: Seniors—Paul Brown, of Bethel, Ethelyn Parkman, of Lynn, Mass., Artemus Weatherbee, of Bangor, Juniors—Donald Smith, of Faston; Alice Ann Donovan, of Houlton, Malcolm Roberts, of Alfred, Soph-

omores—Brooks Brown, of Augusta, son of Brooks Brown '16, Barbara Ashworth, of Orono, James Harris, of Winchester, Mass.; Freshmen—Parker Small, of South Portland, Virginia May, of Wellesley Farms, Mass., and Nathaniel Crowley, of Winthrop, Mass.

## Christmas—

The Holiday Season was welcomed in by students during the pre-vacation week by a variety of appropriate campus activities. Women's dormitories celebrated with Christmas trees, carol singing, and dinner parties. Under the direction of Albion Beverage, new M. C. A. secretary, a program of Vespers was held on December 11 consisting mostly of musical selections. In front of the President's house on Tuesday evening students gathered for singing of the old carols. Special music, including a violin quartet and vocal solos, added to the program. Contributing to the spirit of the season some of the fraternities and sororities provided Christmas cheer in the form of parties and gifts for children in the vicinity.

## Commissioned—

Elizabeth Kruse, of Bangor, a junior, was duly elected and commissioned Honorary Lieutenant Colonel of the ROTC unit on the campus at the annual Military Ball on December 9. Selected by popular vote of the students, Miss Kruse will serve as Honorary Lieutenant Colonel for the year. The announcement of her

selection was followed by the award of the commission and a silver cup, made by Virginia Maguire, of Portland, last year's holder of the honor. The ceremony of award was a colorful and impressive one with members of the Scabbard and Blade, student officers of the ROTC, participating in the presentation.

## Chosen—

David W. Trafford, of Portland, a senior in the Arts and Sciences College majoring in History and Government, represented the University as one of two students from this State at the New England District Rhodes Scholarship meeting on December 17. Trafford, selected with a Bates College student from a group of ten who took the preliminary examinations, has been an outstanding student.

## Awarded—

To Jane Holmes, of West Winfield, N. Y., a member of the Junior Class, was awarded last month the University of Mame Seal by the Women's Athletic Association, the highest athletic award available for coeds. The Mame Seal, coveted recognition of versatility and ability in women's athletics, is awarded on the basis of points earned in participation in various sports. Miss Holmes, with 1215 points earned during her two and a half years, is the first woman this year to earn the silver seal.

## Hibernation—

Twenty-eight senior foresters and Wildlife Conservationists took up residence in the University's winter forestry camp near Princeton, Maine, for eight weeks of practical field work on November 20. Time will be spent in studying forest conditions and problems and laboratory practice in the woods under regular camp conditions. Bearded and seasoned, the seniors will return from hibernation the latter part of January.

## Invited—

At the close of the formal sorority rushing period just previous to Christmas vacation, the coed section of the campus was full of excitement as sororities and prospective sisters made and accepted membership invitations. A total of more than forty freshmen and other students finally accepted invitations issued by the sororities and became pledge sisters. According to newspaper accounts, the following number of pledges were announced for each group: Phi Mu, five; Pi Beta Phi, four; Delta Delta Delta, eleven; Chi Omega, seven; Alpha Omicron Pi, fourteen.

# He Makes Farming a Business

THE University's Two-Year Course in the College of Agriculture is described in the University Catalogue as "a course of training for young men who wish to become practical farmers . . . dairymen, poultrymen, fruit-growers, or gardeners. . ." When Harold J. Shaw, of Sanford, received his certificate in this two-year course and became an alumnus of the University in 1914, he must have taken very seriously the prophetic dicta of the catalogue, for today, as owner of Shaw's Ridge Farm of 150 tillable acres, 80 head of cattle, 1200 hens, and 500 apple trees, he has fulfilled all the requirements of his course; he is a dairyman, a poultryman, a fruit grower, a planter of many acres of gardens, and above all a recognized, successful practical farmer.

## Outstanding Farmer

All these and many other details add up to show the reason why, in 1937 during the annual Farm and Home Week at the University, alumnus Harold Shaw was selected to receive from the hands of President Hauck a certificate as "Outstanding Farmer." In the citation made at that presentation, President Hauck said in part: "You have made of farming not only a vocation but a business . . . you were one of the first dairy men in Maine to practice pasture rotation successfully. You have developed a herd of registered Holsteins which ranks among the best in New England because of your careful attention to selection and breeding."

Recognition of Mr. Shaw's leading position in Maine agriculture has been indicated also in the various appointments held by him in various agricultural activities. He was selected in 1935 as Chairman of the Maine Milk Control Board at the creation of that body by the state legislature and has served in that capacity continuously since then. He is a member of the State Agricultural Conservation Committee and the State Land Use Committee.

His position and contributions to Maine and New England Agriculture are recognized beyond the confines of his native state in his appointment as a member for Agriculture of the New England Council. He has always been an active worker for the University's Agricultural Extension Service and his co-operation has received the enthusiastic praise of Director Arthur L. Deering '12. In this connection he has served for six years as treasurer of the York County Farm Bureau, and is also president of the York County Agricultural Conservation Association.

Born and reared on a small farm in

Harold J. Shaw '14, graduate of the two-year agriculture course, received an "outstanding farmer" citation last year for his services to Maine agriculture and the successful operation of Shaw's Ridge Farm.

Sanford, he knew intimately the ways and problems of Maine farmers. At the University he earned his way through college working in the dairy barns on the University's herd, supplementing his classroom training with invaluable experience. As a member on one of the University's leading stock judging teams, he early demonstrated his knowledge of good cattle.

In 1914 he became one of Maine's early county agents, serving in Androscoggin and Sagadahoc counties until 1920. In this work he demonstrated time and again his rare ability to work hours without limit to lead others and to understand and improve farming methods.

He has filled many other offices also, including positions in the York County Alumni Association, in which he has always been active.

Shaw's Ridge Farm, the result of his labors, stands beside his own old home in Sanford. Its acreage now comprises the two farms which he owns and three others that are leased. From the first, Mr. Shaw aimed to know and employ the best and most modern farming methods and equipment. His herd improvement testing program dates continuously from 1928 and his record of production over a ten-year period shows almost continual advance. The average butterfat production of his herd in 1929 was 398 pounds, in 1938, 483 pounds, a significant gain from an already high average.

The visitor to Shaw's Ridge Farm finds the most modern equipment housed in neat, clean, attractive buildings. Milking, bottling, and cleaning are all carried on by mechanical means for both sanitation and lowered costs. The dairy handles over 500 quarts of milk daily which is supplied to schools, hospitals, and homes in the vicinity and produces some 7,000 gallons of home-made ice cream annually. The entire atmosphere of Shaw's Ridge Farm, under the energetic, competent management of its owner is one of efficiency and progress; to the vision, energy, and executive ability of alumnus Harold Shaw, trained in Maine Agriculture by the University, go the entire credit for a living proof that farming can be "not only a vocation but a business."

A glimpse of Shaw's Ridge Farm showing a portion of the modern stone dairy, the barn, housing one of Maine's leading Holstein herds, and the farmhouse.

## Committee of Alumni To Study Library Needs

An alumni committee of five members has been appointed by Fred D. Knight, president of the General Alumni Association, to study jointly with Trustee and Faculty Committees what can be done to improve the present serious library situation at the University.

Harry E. Sutton, '09, of Boston, is chairman of the alumni committee. The other members are George O. Hamlin, '00, of New York City and Boothbay Harbor, George S. Williams, '05, of Augusta, Dr. Harry Butler, '20, of Bangor, and Frank W. Hussey, '25, of Presque Isle. In this committee President Knight has secured both geographical and class representation as well as a wide diversity of interest.

Edward E. Chase, '13, president of the University Board of Trustees, is to appoint a Trustee committee, and President Arthur A. Hauck is to name a Faculty group. The first meeting—a joint session—is to be held in January on the campus to give consideration to the serious problem which confronts the University.

The Library has constantly grown in importance in the academic life of the institution. With the increase in the number of students during the past decade, the problems of service, storage, etc., have become more acute.

### Soil Mechanics in Maine

(Continued from Page 5)

Closely related to the shearing strength of the soil is the degree of compaction obtained during construction. Tests have been designed to measure the degree of compaction necessary to obtain stability. The movement of water in the soil, better known as permeability, also enters into the stability of the structure, for failure may be caused by excessive seepage, uplift, or piping. Studies of these factors give the engineer a definite basis from which to proceed in design.

The highway engineer turns to soil mechanics to solve the problem of fill compaction, stability of embankments and slopes, fill settlement and the foundation for the highway. Above all else he constantly deals with the movement of water through the soil and its action with the soil in forming ice lenses which account for much of the heavy damage done to highways during the winter season.

A recent problem in soil mechanics is the stabilization of soils with various admixtures. These admixtures range all the way from molasses, through bituminous materials, to cotton cloth. This subject requires a vast amount of research both in the preparation of the stabilized mix and in the use of it as base courses and wearing surfaces for a low cost type of highway.

Such are some of the uses and problems of the study of soil mechanics. The soil

engineer and the soil mechanics laboratory place the result of this research at the disposal of engineers in the various branches of civil engineering. The laboratory soil tests are designed to give, as closely as possible, data on the actual behaviour of the soil under field conditions.

### Laboratory in Lord Hall

During the last summer, in order to provide more adequate facilities for soil testing and research and to relieve crowded conditions in the highway testing laboratory, the University remodeled the basement of Lord Hall to provide room for the soil mechanics laboratory and the sanitary engineering laboratory. The soil mechanics laboratory occupies the entire north half of the basement, an area of about 1400 square feet. Within the laboratory is provided an office, a moist room, a weighing and stock room, and a refrigerator room.

The soil mechanics laboratory is equipped to make routine soil tests and carry on research in soil testing and soil properties. The soil tests and laboratory equipment are divided into two groups, the first includes those tests primarily used for classification purposes, and the second comprises the structural tests which give results used in actual design of soil structures and foundations.

The following tests are all designed to give the stress-strain relationship of a soil, taking into consideration the adjustment of the soil mass to load. In the soil mass consisting of solid particles and water-filled voids, there is a definite time lag in compression due to the rate of escape of water from the voids. The consolidation test gives the amount and

rate of settlement by applying a load to a soil sample confined in a cylinder between two porous discs. The direct shearing test is made by observing the horizontal force required to shear a soil sample subjected to a vertical force. The triaxial compression test from which the shearing strength of a soil can be computed is a compression test made on a cylindrical sample confined by a hydrostatic pressure.

The permeability test and capillarity test determine the amount and rate of water passing through the soil. These tests are made by subjecting samples of the soil to the hydraulic conditions similar to those in the field. Models of typical sections of dams are studied for the flow net of seepage.

Of special interest in the laboratory is the refrigerator room for frost heaving studies on different types of soil and highway materials. The room is maintained at a constant temperature of about 50 degrees F. corresponding to the temperature in the soil several feet below the surface while inside special cabinets the temperatures can be maintained to below zero, thus a temperature gradient in the soil sample can be had similar to that in the ground. The top of the sample is exposed to a low temperature corresponding to the air temperature in winter and the bottom of the sample is supported on a metal plate which receives the 50 degree F. temperature. Hence the zone of ice segregation between 26 and 32 degrees F. is maintained within the sample.

### Research in Highway Problems

Research will be carried on in the laboratory as well as routine soil testing. The field of soil mechanics is one of constant research, building up a background of tests, designs, and field observations to keep the tests of practical value for practicing engineers. The laboratory of the University is equipped and ready to contribute its share toward this goal.

The main research endeavor of this laboratory will be to apply soil mechanics to highway problems, study the design and use of stabilized soils, develop more uniform testing methods of stabilized materials, find the action of frost heaving and traffic on soils. This field of research in highway engineering has hardly been touched.

The laboratory stands ready to serve the state in the development of low-cost stabilized roads adaptable to the severe winter conditions of the state. It is prepared to study Maine soils, to perform routine soil testing for private, city, or state institutions, to make frost heaving investigations, and most important of all to teach student engineers to carry on and develop the science of soil mechanics in the future.

### Missouri Still Leads

For the second consecutive month the alumni in the Missouri local association have the highest percentage of dues payments. Their lead, however, was cut to less than 1% by the Western Pennsylvanians who added 16% to their figure during the past month. Southern California alumni jumped right into the middle of the leaders, thus forcing Rhode Island out of the high ten. Here's the mid-December standing of the ten associations having the highest percentage of members who have paid dues for the current year.

Missouri	38.7
Pittsburgh	37.5
Lehigh Valley	31.8
Northeastern N. Y.	30.0
Southern California	28.2
Illinois	28.1
Minnesota	26.9
Maryland	26.1
Michigan	25.3
Western New York	25.0

# WITH THE TEAMS

## VARSITY TRACK

### Sophomores 80 $\frac{2}{3}$ —Freshmen 54 $\frac{2}{3}$

The second-year men of Coach Jenkins' indoor track squad decisively defeated the yearlings in the first indoor track meet of the winter cinder season on December 3. Three first places won by sophomore Franklin Dexter, of Martinsville, N. J., in the high jump, pole vault, and javelin, placed him as high point winner for the afternoon. Several double winners appeared in the competition, including Blaine Hodgkins, of Salisbury Cove, in the 100 and 220 yard dashes, Bob Bennett, of Cranston, R. I., in the 35 pound weight and the discus, both sophomores, and William Gilman, son of Madison Gilman '15, of Augusta, in the 45 yard high and 100 yard low hurdles, for the freshmen.

In the pole vault Dexter was pressed to win by freshman Benjamin Graham, of Milton, Mass., and in the javelin throw, he nosed out, in the last throw, frosh Ed Barrows, of Augusta, son of Gov. Lewis O. '16. The freshmen showed strength in the hurdles, with Gilman winning handily and Robert Healy, of Augusta, taking third in both races. The sophomores made a clean sweep in the 880 yard run while the first-year men cleaned up all three places in the broad jump.

### Seniors Win

Seniors 44, juniors 41 1/6, sophomores 39 $\frac{2}{3}$ , freshmen 18 $\frac{1}{2}$  were the scores of the annual Interclass Meet in the field house on December 10. One of the closest class meets in recent years, the fourth year men only nosed out the strong junior squad by a first place win in the pole vault, final event, where state champion Herb Leonard, of Thorndike, easily bested the opposition. Five double first winners included William Gilman, of Augusta, for the freshmen, who repeated his previous wins in both low and high hurdles, Bob Atwood, a junior, won both 25 yard and 100 yard dashes, Bill McCarthy, son of Matthew McCarthy '00, of Rumford, a senior took both high and broad jump events, Ken Blaisdell, of Ellsworth, cross country star, won in the mile and mile and a half, and Harold Dyer, of Portland, a senior, placed first in shot put and discus. High score honors, however, went to Mel McKenzie, of Lewiston, a senior, who showed his versatility by placing first in the 100, second in the high and low hurdles, the broad jump, and the 220, and third in the 25 yard dash. No records were established though Don Smith, of Easton,

## ATHLETIC SCHEDULE

### Varsity Basketball

- Jan. 7 Colby at Orono  
12 Rhode Island at Kingston  
13 Connecticut at Storrs  
14 Northeastern at Boston  
20 Northeastern at Orono  
21 Bates at Lewiston  
Feb. 11 Connecticut at Orono  
15 Bates at Orono  
18 New Hampshire at Orono  
22 Rhode Island at Orono  
24 Colby at Waterville  
25 New Hampshire at Durham
- ### Varsity Track
- Dec. 3 Freshman-Sophomore Meet  
10 Interclass Meet  
Jan. 21 Intramurals  
Feb. 11 B.A.A. Meet at Boston  
18 New Hampshire at Orono  
25 Colby at Waterville  
Mar. 4 Bates at Orono  
11 Northeastern at Orono

attempting in the half mile, missed by about a second. Stan Johnson, of Brunswick, a junior, fouled six tries with the 35 pound weight, one of which would have set a new record and probably won the meet for the juniors.

### Prospects

In facing the indoor track season, Coach Jenkins finds a small nucleus of veterans around which to build the team. The Aroostook Flyer, Don Smith, will be one of the regularly dependable middle and long distance runners and will be ably supported, apparently, by sophomore Ken Blaisdell, of Ellsworth, who won his spurs on the cross country course this fall. Senior William McCarthy, of Rumford, in the high jump will be a strong asset and this year will probably be counted on for points in the broad jump also with Johnny Gowell graduated. Herb Leonard, of Thorndike, a senior, last year's state champion pole vaulter, will be on hand. Harold Dyer, of Gorham, also a senior, should contribute some valuable points in field events, as also should Stan Johnson, of Brunswick, a junior.

From the ranks of the sophomores come several men who have not yet shown what they can do in varsity competition. Bob Bennett, of Cranston, R. I., in the weight events, Howard Ehrlenbach, of Tonawanda, N. Y., in the middle distance races, and Franklin Dexter, of Martinsville, N. J., in the javelin, pole vault, and high jump give promise.

## VARSITY BASKETBALL

Varsity basketball will get into full swing shortly after the Christmas holidays with a full schedule of first-class competition facing the squad from which Coach Bill Kenyon hopes to pick a winning combination. With four men graduated from his first five and a total of only six lettermen to pick from, Kenyon still hopes to turn out a group of fast and accurate players. Much of this prospect will depend on the performance of sophomores from last year's fine freshman team.

No definite lineup is at present named but the veteran seniors Louis Bourgoin, from Frenchville, and Dana Drew, of Patten, as forwards, Ed Stanley, of Rockville Center, N. Y., at center, and Elwood Millett, of Norway, at guard are doing good work and have valuable experience. Phil Curtis, of Caribou, and Charles Wilson, of Eastport, also guards, both juniors, are the only other veterans on the squad and should see plenty of action.

Up from the ranks of last year's freshmen are coming such men as Sam Tracy, of Northeast Harbor, captain of last year's frosh, Harvard Whitten, of Mars Hill, and football star Roger Stearns, of South Paris, working out for forwards; at center, Vernon Kent, of Fort Kent, tennis star and flash of the freshman team last year, is giving Stanley ample competition; Charley Arbor, of Rumford, former Hebron star, and Bruce Mackay, of Winter Harbor, who both saw service under Freshman Coach Bill Wells, are looking promising.

### Captains Chosen

At a big recognition banquet on December 14 more than 140 participants in fall athletics receiver recognition for services rendered. Football and cross country athletes, both varsity and freshmen, were guests of the University as coaches and officials gave out letters, numerals, and other insignia of recognition for the season's services, and announced the election of honorary captains for the fall sports.

Dana Drew, of Patten, a senior, backfield star of the football team all fall, was chosen honorary varsity football captain; Don Smith, of Easton, New England Champion, captain of cross country; Ed Barrows, of Augusta, son of Governor Lewis O. '16, co-captain of freshman football with Ervin Ballou, of Cumberland Center. Freshman cross country was captained by Mark Ingraham, of Rockport, and junior varsity football by Alvah Pangburn, of Caribou.

# THE HONOR ROLL

Again the classes of 1911 and 1910 are having a merry chase for the Honor Roll leadership. On December 27 the class of 1911 had 44, with 1910 only one less. A year ago these two classes were tied, each having 41 names in the list; 1911 finally gaining the lead at the close of the year. There are 1135 names in the preliminary Honor Roll, as compared with 1050 a year ago, or a gain of 85. The final total for 1937-38 was 1186.

Closely following 1910 is 1916 with 41 names, which is hard pressed by 1914, 1917, and 1936, each having 40 names. The 1916 class is a newcomer in the top five, having displaced 1912. The classes of 1909 and 1915, which have recently been among the leaders, could regain easily a place in this select group.

The class of 1885 leads the Roll when measured on a percentage basis. Their mark of 57.1 is near the 60% record established a year ago. 1879 follows with 50% and the others in order are 1894 with 41.6%, 1887 with 37.5%, and 1884 with 33.3%. Following is the Honor Roll as of December 27. It includes the names of all who have paid dues each of the last three years (1938-39 included).

**1876**  
Blanding, Edward M.

**1878**  
Webster, Otis C.

**1879**  
Clergue, Francis H.  
Decker, Wilbur F.  
Gibbs, Charles W.  
Libby, Mark D.  
Moise, Charles A.

**1881**  
Adams, Harry W.  
Andrews, Mrs. Lillian  
Ring  
Osborn, Edwin W.  
Simpson, Charles S.

**1882**  
Reed, Fred M.

**1884**  
Cutter, Leslie W.  
Pattangall, William R.  
Webber, William

**1885**  
Chamberlain, George W.  
Hart, James N.  
Keyes, Austin H.  
Russell, Fremont L.

**1886**  
Twombly, Sidney S.

**1887**  
Black, Mrs. Alice  
(Hicks)  
Clark, Irving M.  
Kennedy, James S.  
Trask, Frank E.  
Vose, Charles T.  
Williams, John S.

**1888**  
Eastman, Fred L.  
Lord, Edwin B.

**1889**  
Haggett, Eben R.  
Reed, John

**1890**  
Drew, Albert W.  
Farrington, Horace P.  
Gould, George P.  
Hardison, Allen C.  
Harvey, Chandler C.  
Heath, E. Fenno  
Quincy, Frederick G.

**1891**  
Bailey, William M.  
Patten, William N.

**1892**  
Holden, William C.  
Nealley, Calvin H.

**1893**  
Crosby, Walter W.  
Gould, Harris P.  
Murphy, Charles C.  
Rowe, George F.

**1894**  
Bowler, Frank C.  
Gilbert, Charles E.

Jose, Wallace H.  
Ricker, John H.  
Wood, Edward B.

**1895**  
Atwood, Gustavus G.  
Boardman, Harold S.  
Folsom, Leroy R.  
Martin, James W.  
Moulton, Albion  
Sawtelle, William O.

**1896**  
Black, Frederick F.  
Kidder, Elmer E.  
Palmer, Perley B.  
Pride, Frank P.  
Randlette, Joseph W.  
Rogers, Lore A.  
Sargent, Paul D.  
Starr, John A.  
Weston, Charles P.  
Weymouth, Frank E.

**1897**  
Bryer, Charles S.  
Cosmey, Stanwood H.  
Holyoke, William L.  
McCrillis, William G.  
Porter, Dr. Byron F.  
Stevens, Howard E.  
Urann, Marcus L.

**1898**  
Crowell, C. Parker  
Dearborn, John W.  
Dow, Leroy E.  
Edwards, Llewellyn N.  
Lawrence, George W.  
Libby, Albion D. T.

### Under the Dome

'11, who serves in the important position of Chairman of the Public Utilities Commission. He greeted us cordially and remarked that he had just completed his latest "course" at the University where he has been giving a series of lectures on public utilities. Two other alumni serve on the Commission, also, we learned, Harold Gerrish, '25, as an Assistant Engineer, and Leshe Little, '04, as a Consulting Engineer.

Co-operating with the Public Utilities Commission is the U. S. Geological Survey, located nearby where Miner Stackpole, '17, works as District Engineer, Water Resources Branch, studying water resources and power. With him as a Junior Engineer is Kenneth Young, '38, who from point of service is probably the "baby" of the entire state house list.

### Education

"Where should we go next?" inquired our omniscient and tireless guide, Mr. Newdick. Time was running away and the names and faces of alumni met or heard of were growing more and more bewildering. The Department of Education was near at hand, certainly one of the most vital factors in the life of the state, so there we went next. But this time everyone happened to be engaged, so we did not stop. We took note, however, of the alumni there, from Commissioner of Education Bertram Packard, '10, through Deputy Commissioner Edward Roderick (M. A., '38), Stephen Patrick, '03, (Honorary '36), Director of Vocational Education, Howard Norwood, '23, Supervisor of Adult Education, Adelbert W. Gordon (Honorary '34), Agent Unorganized Territory, and Richard J. Libby (Honorary '33), Agent Rural Education.

Then we hurried on to the State Library to meet genial, friendly State Librarian Oliver Hall (Honorary '27), who passed a pleasant word about his affiliation with the youthful class of 1927, and regretted the absence of alumna Elizabeth Gardner, '37, an apprentice in the library. In passing we glanced into the "Hub of Hell," headquarters of the news reporters during legislative sessions, now a quiet place of empty desks tenanted by one bored reporter and a steadily ticking machine typing out news bulletins over the wire. With time running so fast we found it impossible to meet personally all the alumni. We had to pass by the State Auditing Department where Lloyd Koonz, '35, is listed as a Junior Auditor; we could not stop to call on B. West Lewis, '16, who, as Supervisor of Motor Vehicles, has the tremendous responsibility of most of the state-owned automobiles. Former President Harold Boardman, '95, administering the multiple details of the state's liquor control as Chairman of the Liquor Commission, assisted by Charlotte Fuller, '36,

as secretary, we could not see. We did, however, hurry out of the main building into the annex where part of the Department of Health and Welfare is housed and found, among the test-tubes, burners, vials, and other apparatus of the sanitary engineering laboratories, white-coated James Fuller, '32, chemist, and Raymond Wendell, '32, assistant engineer for the Sanitary Engineering Division. Other alumni, too, work here, James "Spec" Hale, '29, sanitary engineer, Joseph Cyr, '37, chemist, and also, in this field, a number of alumni workers not properly "under the dome" for inclusion in this article.

Likewise in the annex are stationed the State Police where Francis "Pat" McCabe, '32, as Director of Highway Safety is doing valiant work to decrease Maine's accident toll. The Highway Commission, too, is in this building. Here, however, alumni names grow so numerous that it seemed best to reserve this particular state activity for a separate article in the future, dealing in detail with the work of the score of engineers and experts building the state's bridges and roads. Sufficient in passing is the mention of the two ranking men of the Commission, Lucius Barrows, '07, Chief Engineer, and Max Wilder, '14, Bridge Engineer. Near here also is the office of the Highway Planning Survey where we find Gerald Welch, '15, Traffic Manager.

At this point I said a regretful goodbye to the generous and well-informed Dick Newdick whose co-operation and helpfulness contributed so much to this visit. There remained before me the numerous divisions of the Department of Health and Welfare, housed in the wooden building still known as the old shirt factory, and in offices on Water Street. These I must undertake alone, so to the old shirt factory I went. There in his office on the second floor, immersed in a rush of cases and problems of relief, sat Harold G. Wood, '11, head of the Division of Poor Relief. Following his helpful advice I met Mrs. Delphene Andrews Hatch, '28, of the Division of Social Welfare, a Division Supervisor, and learned of Leroy Folsom, '95, attorney for the department, and Mrs. Frances Fuger Northgraves, '31, Supervisor of Settlements.

A few more alumni remained, located on Water Street, where Harry Henderson, '19, is Director of the Division of Old Age Assistance, and Mrs. Marion H. Goodwin, '19, is in the file department. Here, too, is the Social Security Board with John Guice, '29, as Assistant Manager, and Frank Haines, '13, State Supervisor of the Bureau of Old Age Insurance. Robert Clark, '05, former alumni secretary, works in this building, too, as manager of the Augusta office of the Unemployment Compensation Commission.

Though not actually "under the dome" of the State House, Bob is contributing his share to the work of unemployment relief and placement, as are many other

### Local Associations (Continued from Page 6)

#### Penobscot Valley Alumni

registered an attendance of one hundred forty at the Bangor House for a stag dinner meeting on December 6. At the head table toastmaster Charles P. Weston '96 introduced the list of speakers which included Governor Lewis O. Barrows '16, President Hauck, Dean Edward Allen, of the Arts and Sciences College, James Wallace '06, Bangor City Manager, Coach Chester Jenkins, and Alumni Secretary Charles Crossland. A novelty was introduced in the program when undergraduates Ted Sobel, of New York City, and Mavis Creamer, of Calais, demonstrated latest dance steps. Following the dinner moving pictures of the season's football games were shown. Officers elected were Albert Nutting '27, president; Ralph Brown '25, vice president; Samuel Calderwood '33, treasurer.

#### Portland Alumnae

extend a welcome to all alumnae to attend their regular monthly meetings, held the first Thursday each month at 8:00 p.m. in the Columbia Hotel. Among the programs planned for the future will be a talk by Mrs. Gerhardt Koschembahr, of Cape Elizabeth, a refugee from Germany, in January. Officers of the group this year are: president, Mrs. Olive Chase O'Brien '20; first vice president, Mrs. Margaret Merrill Pratt '32; second vice president, Mrs. Christine Elliott Stanford '35; secretary, Miss Dorothy Frye '35; treasurer, Mrs. Freda Weaver Prouty '29; assistant treasurer, Mrs. Phyllis Thompson Roberts '23.

#### Portland Alumni

held their fall meeting at the Columbia Hotel, November 17, with ninety men present. Coach Fred Brice was the chief speaker and also commented on the football movies which were shown. Alumni Secretary Charles Crossland spoke of campus and alumni events. A report of the Scholarship Committee showed real progress was being made.

alumni field workers in various offices through the state.

Also in this Commission are Clayton Sullivan, '32, as an auditor, and Irving Weymouth, '21, of the Claims Department.

With the assignment completed, note book full of jotted names and titles, memory stored with jumbled recollections of friendly faces and warm welcomes, your roving reporter returned to the Alumni Office in the deep conviction that alumni are certainly returning to the state and its people in most encouraging measure and an impressive variety of fields the skills and ideals fostered at the University.

# ALUMNI PERSONALS

## DEATHS

### 1886

Elmer Lenfest, of Snohomish, Wash., a native of Bradley, Maine, died at his home after an extended illness on September 25. Following his graduation from the University, Mr. Lenfest entered engineering work in Minnesota and later engaged in railroad survey work in Montana. He opened a civil engineering office in Snohomish in 1888 and practiced his profession actively in that section until two years before his death. In 1890 he was named county engineer and was re-elected in 1895. He also served several years as city engineer. Actively identified with many fraternal, professional, and civic organizations, Mr. Lenfest was highly regarded in his adopted state. Member of the fifty-year class, he returned to the University in 1936 for Commencement, serving as marshal during the Commencement activities.

### 1905

Orman L. Keyes, prominent attorney in Caribou, died at his home on November 19 at the age of 60. A native of Stetson, he attended and graduated from the University Law School in 1905, passing the Maine Bar examinations the same year. In 1907 he became a member of the U. S. District Court. He was an active leader in the community, serving as president of the Chamber of Commerce for five years. He was also a member of the Democratic State Committee and served on the Board of Education for many years. Highly regarded in his profession, he served for more than twenty years as Librarian of the Law Library of the Caribou Court, as vice president of the Aroostook Bar Association, and many other positions.

### 1917

The death of William J. Gorham, of Grosse Point, Mich., has been reported to the alumni office. Mr. Gorham died at the Cottage Grove Hospital in that city on July 27, 1936.

## BY CLASSES

### 1885

## 1918

### Next Reunion, June, 1943

George M. Carter, of Caribou, was unanimously elected a vice president of the Federated Sportsmen's Club of Maine at its meeting in Bangor in early December. He was also nominated president of the Aroostook section of the Federation of Fish & Game Clubs.

The lost is found—George C. Cameron is a consulting engineer with office at 331 S. Euclid St., Oak Park, Ill. His residence is 212 S. Marion St. in Oak Park. Mr. Cameron does most of his travelling by plane.

Dr. and Mrs. Edward L. Herlihy ('16) accompanied by their children, Edward, Jr., and Mary Ellen, joined the tour of the American Express for doctors and their families and attended the sessions of the American Medical Association at San Francisco in June. En route they visited Santa Fe, N. M.; Grand Canyon, Arizona; Los Angeles, and Yellowstone National Park.

## 1920

### Next Reunion, June, 1942

Mrs. Henry C. Knowlton, of Bangor, is Girl Scout Commissioner, and was in charge of the investiture ceremony of Troop Two, Girl Scouts, of which Mrs. Coffin '17 is Captain, and which has been written about under the '17 personals.

Walter C. Sturtevant is now located at 4125 So. Figueroa St., Los Angeles, Calif. Dr. Flavia L. Richardson's new address is Colby Junior College, New London, N. H.

Stan Currier, formerly with Montgomery Ward Co., has become owner-manager of N. O. Langlois and Sons Department Store, Lebanon, N. H. His address is 2 Lewis Court.

Biography of the month is Francis H. (Chink) Friend, r. Skowhegan, Maine. Bus., timberlands and pulpwood. Three terms in House of Representatives; two in Senate; recently elected for third term. Pres Skowhegan Fair and State of Maine Fair Association. M. Elizabeth Lineken (Maine. 1925; Phi Mu) Two daughters, 9 and 6.

Walter W. Chadbourne  
U. of M.  
Orono

## 1921

### Next Reunion, June, 1941

Jerome C. Burrows, of Rockland, was recently re-elected County Attorney for Knox County to serve his fourth term.

Mrs. Rena C. Bowles, of Bangor, expert in home economics and formerly of the home economics faculty at the University, was guest speaker at a tea sponsored by the Homemakers Club of the First Congregational Church in Bangor. She talked to a large gathering on matters intimately concerned with making the home more attractive; she had illustrations in color showing her points which added materially to the event.

## 1922

### Next Reunion, June, 1941

During the sessions at the Teachers Convention, students from Garet Schenck High School, of East Millinocket, presented a one-act play entitled "Three Pills in a Bottle." This was under the directorship of Pearl E. Johnson who is principal of Schenck.

John H. Needham was chairman of the Orono annual Red Cross drive.

Stephen A. Griffin, principal of Livermore Falls High School, has recently been elected president of the Androscoggin County Teachers' Association.

Mrs. Searle Perry (Frances Curran) was elected president of the Phi Mu

alumni club at the annual meeting of said club in Bangor during the early days of December.

## 1923

### Next Reunion, June, 1941

The big news is that our class columnist, Elizabeth Ring, has resigned from her position on the campus with the M. C. A., and is doing very interesting work with the Historical Records Survey, Division of Women's and Professional Projects, Works Progress Administration. She says that she has also resigned as class columnist, but I think we'd better persuade her to un-resign. She's in Portland, living at the Y. W. We miss her very much on the campus.

Bea Cleaves Stevens is membership chairman of the Portland College Club.

Mildred Lombard Welch has given up her position at New York University and is living in Bar Harbor. Her husband is with the National Park Service.

George Blanchard was elected president of the Presque Isle chapter of the American Red Cross in October.

Clarence Beckett, of Calais, has been elected to the next Maine Senate.

During the fall, Albert Weymouth, of Belfast, was elected secretary-treasurer of the Waldo County Teachers Association.

Paul Whitcomb, of Ellsworth, was recently nominated Hancock County probate officer to succeed James MacKeen.

Wasson Tapley has been tracked down by some alumni sleuth. He is married, lives in East Orange, N. J., and has been with the New York Trust Company, 100 Broadway, N. Y. C., for eleven years.

Richard Stuart, who has been an engineer with the T.V.A. at Pickwick, Tennessee, was married in September to Anne Griffin, of Decatur, Alabama, a secretary in the T.V.A. construction service at Pickwick. The marriage took place at Corinth, Mass. No report of their present address.

Evelyn McGlauffin's address is 88 Horatio Street, N. Y. C.

State Senator Roy Fernald was elected, in June, county chairman of the reorganized Young Republican Club of Waldo County.

Lendal Pomeroy, chemical engineer with the Johns Manville Corporation, was married during the summer to Edith Ader, of Winston-Salem, N. C., an English teacher at South Side High School, Newark, N. J. The Pomeroy's will live in Newark. Mr. Pomeroy is a past master of Americus Lodge No. 83, F. and A.M., chairman of the house committee of the lodge, and a member of American Craftsman's Club, Inc.

Everett Mansur, of Los Angeles, California, made, this summer, his first visit to the campus in twelve years.

Ted Curtis has been elected to the executive committee of the New England Conference on Athletics. This conference includes twenty-nine of the New England Colleges.

## 1925

### Next Reunion, June, 1940

Dear Classmates,

"Bill" Elliott's dad, W. C. Elliott '02, sends us information about Stanislaus J. Smart. "Stan" is chief engineer, International Falls, Ltd., Montreal, P. Q., and resides at 3488 Marcl Ave., Notre Dame de Grace, Montreal. Let us hear some more about your work, Stan.

Dr. Stephen S. Brown, of Portland, was elected vice president of the Maine Hospital Association at the annual meeting of that group in Augusta.

Harold L. Gerrish, electrical engineer for the Maine Public Utilities Commission, gave an address on "Rates and Rate

Making" at the University on November 17

Reginald F. Cratty was elected vice president of the Maine Hotel Association at their annual meeting in November

Mr. and Mrs. Robert McCobb announce the birth of Priscilla Hastings McCobb on August 18, 1938. Mr. McCobb is a teacher at Camden, N. J. His home address is 3414 Baring St., Philadelphia, Pa.

John LaPlante, principal of Winthrop High School, has been elected a member of the executive committee of the Kennebec County Teachers Association.

Mr. and Mrs. Samuel White (Mildred Osborne '25) and daughter Jean, of Danielson, Conn., spent Thanksgiving with Rev. and Mrs. Stanley B. Hyde (Arelene Ware), of Ludlow, Vermont. Mr. White is superintendent of schools in Danielson. Donald "Jiggs" Dressel and Mrs. Dressel called at the Registrar's Office in September. Mrs. Dressel is the former Iola Young Simon, of Montreal, Canada. The Dressels reside at 41 Richardson Ave., Wakefield, Mass.

Mildred "Browne" Schrumf  
University Place, Orono

1926

Next Reunion, June, 1940

Classmates,

Frances Brewer has resigned from her teaching position at St. Luke's Hospital, New York City, and is at her home at Bar Harbor, Maine

Maurice H. Burr and Miss Janet Holmes were married November 29. They are living on Milbrook Rd., Northeast Harbor, Maine. Maurice is superintendent of the Northeast Harbor Water Co.

Leone Dakin was elected secretary-treasurer of the Maine Home Economics Association at the annual spring meeting.

Joseph F. Kolouch, who is principal of Mapleton High School, has been elected president of the local parent-teachers association.

Herbert H. Sawyer is employed as engineer, bridge division, Maine State Highway Commission. His residence address is 30 Elm St., Waterville, Maine.

Mr. and Mrs. Charles A. Sherer announce the birth of a daughter, Margaret Ellen, on October 15 at Greenville, Mississippi.

The engagement of Karl F. Swizer and Miss Barbara R. Whitmore has been announced. Miss Whitmore is a graduate of Wheaton College, is teaching in the Longfellow School, and conducts the Fessenden Park Nursery School in Portland. Karl is connected with the city of Portland Park Commission.

Edwin C. Waterhouse, special agent for the Aetna Insurance Co., has been transferred from Connecticut. His new address is 425 Walnut St., Philadelphia, Pa.

Carroll F. Wilder has received his Master of Arts degree in Education. "An Investigation of Two Different Methods of Reading Laboratory Notes in High School Chemistry" was the subject of his thesis.

Gerald and Katherine Atkins Wing announce the birth of a son, Stephen A. Wing, June 20. They are living at North Anson, Maine.

Beulah O. Wells  
60 Oak St.  
Orono, Maine

1927

Next Reunion, June, 1940

Dear Classmates,

Judging from the blank space for 1927 in the last issue of the *Alumnus*, it would seem that my news was tardy. And I

haven't much to add for this issue. (Apologies are in line from the Alumni Office—personals for this class became lost and only a few days ago were they found attached to other *Alumnus* material. We are sorry about this and are publishing them this month.)

It is reported that Carleton Hackett, of Tarrytown, N. Y., trains and leads a New York City police band. Carleton is Band Director at Washington Irving High in Tarrytown.

Fred D. Armes is employed in the engineering department of Hyde Windlass Co., Bath, Maine. He receives mail at Box 113, Topsham.

Harry F. Culbertson is now employed with the Bureau of Ordnance, Navy Dept., Washington, D. C., as assistant mechanical engineer. Home address, 4220-37th St., N. W.

During the summer I noticed that Lucy Farrington Sheive was substituting as home demonstration agent and although I haven't heard personally from Lucy I understand that she and her husband now own a hardware business in Skowhegan. I think the home address is still 36 Pleasant St.

Ruth Hitchings Allee has made another European move and, although I don't have any details as yet, her new address is c/o Near East Foundation, 2 August 4th St., Thessalonike, Greece. And just when I get used to Kavaja, Albania.

Edith O'Connor Thaxter was over for a call. She is living here at 27 Princeton Street and it is hard for me to believe that son Richard is 9 years old.

In the newspaper I noticed an item to the effect that Mr. and Mrs. Carleton Hackett and son Paul had been visiting in Maine. Carleton had been counselor at Camp Ossipee on Lake Ossipee in New Hampshire for the summer and was returning to his teaching position at Tarrytown, New York.

At the same time I read that Leita French Hamilton and daughter, Grace, had visited in Brewer and were returning to Memphis, Tenn. Wish I could have seen them.

Through the Alumni Office I learned that John O'Neil is Construction Foreman on the Pittsburg Dam for B. Perini and Son at Pittsburg, New Hampshire. That Elmer Kelso is with the U. S. For-

est Service at Edinburg, Va. And that Roy Hobson lives at 1159 Erieview Road, Cleveland Heights, Ohio. He is a development engineer for National Malleable

and Steel Castings Co., 10600 Quincy Avenue, Cleveland.

Several times this fall I've seen Hazel Wood Snow, but we've both been in a hurry and all I learned was that Hazel is still living in Bluehill, Maine.

Went to the Bowdoin-Colby; Maine-Colby; and Bowdoin-Maine games but either I'm near-sighted or the games were too exciting, for the only '27er I saw to speak to was Sally Palmer who is living in Orono and working at the University library. Sally sat right in front of me and I couldn't miss her, due to a lovely long feather from which I took an occasional nibble when the game got the better of me. At a distance I saw Nate Epstein—and to the best of my knowledge Nate is still teaching and coaching in Caribou.

Put me on your Christmas card list, and right now I'll wish you a Merry Christmas and a Happy New Year.

#### Next Reunion, June, 1939

Dear Classmates,

Clayton Hunnewell is principal of St. George High School, Tenant's Harbor. He is also president of the Knox County Teachers Association.

George Cunningham is principal of Rockport High School. He is also connected with the Knox County Association with the office of vice president.

Mr. and Mrs. George Mahoney announce the arrival of a daughter born in September.

Reggie Merrill is to be thanked for this bit of information. Frank Foggia is town manager of Woodland, Maine. This job carries with it the jobs of chief of police, collector of taxes, road commissioner, and sundry others.

Reggie, incidentally, is now a member of the New Haven, Conn., Philatelic Society. He is living at 358 Winthrop Ave., New Haven.

Say, 1929ers, our column is getting

### 1930

#### Next Reunion, June, 1939

Members of 1930,

Mr. and Mrs. Kenton R. Condon (Madelyn Whitney) are living in Brunswick at 11 Longfellow Ave. Mr. Condon is assistant chemist for the Pejepscot Paper Co. in Topsham.

Daniel Connelly, of Hartland, was returning from the Colby-Maine game when, some four miles from Newport about midnight, a 13-point buck rushed out of the woods, charging the lights. The impact was so great that the deer went flying by the windows, struck on the rear fender and dropped dead. When Mr. Connelly tried to start his car he found the rear fender so bent around the rear wheel that it would not move. He had the deer and a car without lights or reflector and badly damaged fenders.

Carrie Williams Fowler (Mrs. Ralph W.) is now located at 624 Pennsylvania Ave., Denver, Colorado.

Mr. Edward DeHart Hunt was married to Miss Mary Catharine Scott on Saturday, September, 3, at Adams Mills, Ohio.

A daughter, Meredith, was born November 2 to Mr. and Mrs. Fred L. Lamoreau, of 38 Penobscot St., Orono.

Myron C. Lucas is with the New York Tel. Co. and is living at 47-24-39th St., Long Island City, N. Y.

Elizabeth Mason is a social case worker with the New Hampshire Children's Aid and Protective Association. She lives at 671 Chestnut St., Manchester, N. H.

Albert Modery has been transferred from Little Rock, Arkansas, to Fort Peck Dam at Fort Peck, Montana. Mr. Modery is employed by the United States Engineers of the War Dept.

Mr. and Mrs. Maxwell K. Murphy (Ursula Sprague) are residing at Apt. 401, 381 Covington Drive, Detroit, Mich. Mr. Murphy has a position with the patent counsel of Chrysler Corporation.

Miss E. Christine Norwood, teacher of English at Edward Little High School, Auburn, has been appointed dean of girls at the school. Her appointment met with wide approval and, according to the school paper, Station ELHS, she plans to visit outstanding schools in New England this year.

Milton L. Vose is a representative of Landers, Frary and Clark, of New Britain, Conn., at 31 Main St., Bangor. He is living at 43 Palm St., Bangor.

Polly Hall Leech  
Homer Folks Hospital  
Oneonta, N. Y.

### 1931

#### Next Reunion, June, 1939

Dear Classmates,

Here's the Alumni Office demanding news for the January issue and I haven't even finished my Christmas shopping.

Wish I were in New York with Ermo and Molly Scott; then I'd be able to get bargains. Ermo has a half year's leave of absence from Castine Normal which he's using in study at N. Y. U. toward a doctorate in Education.

Don Goode is vice president of the Bangor chapter of American Institute of Banking during his spare time from clerking at the Penobscot Savings Bank in Bangor.

Hubert Tracy has recently been appointed assistant county agent in Aroostook. He is to specialize in dairy and

livestock problems in the St. John River section with headquarters at Fort Kent. He has been manager of the Kenduskeag Valley Creamery, of Bangor, so that he has practical experience to combine with his college courses.

Rev. Leon A. Dean has the distinction of being pastor of the First Congregational Church at Wellfleet, Mass. The church is over 200 years old.

Les Holdridge has been back to Orono making some calls. He has just returned from Porto Rico where he has been conducting research work in forestry.

It's a boy, William Prentis Hamblet, who arrived on Columbus Day to live with Mr. and Mrs. Bill Hamblet at 36 Livingston Road, East Hartford, Conn. Our "Billy Cal" sends congratulations to another holiday baby. For the fun of it answer roll call, all the rest of you holiday babies of 1931.

A nice letter came from Norm Webber the other day. Norm is already making plans for reunion in June. What about the rest of you folks? Norm is still with the Hartford Fire Insurance Company, as a special agent, and his duties certainly have variety. He advises agents about life insurance on horses and cows, helps with rain insurance for football games, hail insurance on crops, and losses on greenhouses. Evidently the hurricane kept him plenty busy.

He manages to see many Mainiacs in his rambles, and tho he mentions several non-'31ers I'm going to tuck them in here as news of friends.

Norm wrote of spending the last week-end with Dr. and Mrs. Don Marshall at Rochester, N. Y. Guess I told you a while ago what Don is doing, but Norm adds that he is fortunate to be specializing with one of the leading doctors in ureno-genital surgery.

Dr "Mun" Romansky has recovered from a severe attack of pneumonia and is back in the harness studying general medicine.

Parker Spear is still with the Traveler's Insurance Company in Philadelphia as assistant cashier.

Herb Trask is now a full-fledged lawyer with the same company.

Ronnie Young is now a special agent with the Hartford Insurance Company in Newark, N. J.

Phil Havey is with the Hartford Accident and Indemnity Co. Engineering Department.

Norm adds that his own family, Cris Dana and Susie, are all in school now and thereby concludes a grand newsy letter. Thanks, loads.

The girls in our class aren't wholly left out of this letter. Beryl Bryant has recently graduated from Peter Bent Brigham hospital in Boston, and plans to remain on at the hospital.

On August 17 Polly Longley became the bride of Louis A. Schleicher, of New Haven, Conn. Polly has been teaching in the N. H. High School and will continue. Mr. Schleicher is an engineer in the Conn Highway Department and is attached to the material testing laboratory at Portland, Conn.

Whew—a nice long letter—please someone else be as kind as Norm.

Happy New Year to you all,  
Mary C. Stiles  
110 Revere St.  
Portland

### 1932

#### Next Reunion, June, 1939

Dear Classmates,

Many thanks for the news items you sent to us—please send more.

John Barry is living at 6429 Primrose Ave., Hollywood, Calif. John has been

doing some radio announcing on the Mutual Broadcasting System, coast-to-coast. Mr. and Mrs. David (Spud Churchill) Randles have moved to Wyoming. The new address is 3814 House Ave., Cheyenne, Wyoming. Mr. Randles is in the instrument department with the United Air Lines, in Cheyenne.

Albert A. Dekin is principal of Danforth High School. For several years he has been teaching at Machias High School.

Mr. and Mrs. Richard (String Randall) Churchill announce the birth of a son, Geoffrey, on Nov. 7th. They are living at 8904 34 Ave., Jackson Heights, Long Island, N. Y. "String" writes that Peg Hammel Shea also lives in Jackson Heights and has a 15 mo. old daughter. Nearby is Harriet Cross Henniger, with her 8 mo. old daughter, Harriet. Caroline (Cac) Cousins Granger is living in Jersey and has a young son, Bill, Jr. Quite a colony of next generation "Mainiacs" has strated in New York.

Mr. and Mrs. Milton (Anna Lyon) Sims are happy to announce the arrival of a daughter, Linda Lyon Sims, on Dec. 4th in Boston. Ann and Milt are living at 77 Albrain St., Melrose Highlands, Mass.

Mr. and Mrs. Russell (Marjorie Deane Stevens) Tilley have moved to 225 Tremart St., Newton, Mass.

Roland J. Tibbetts is now living at 19 Pine St., Great Barrington, Mass.

Helen Hincks  
36 Main Street  
Orono, Maine

1933

Next Reunion, June, 1942

Mr. and Mrs. William A. Tryon recently announced the engagement of their daughter, Betty, to Winthrop C. Libby, of Orono. Mr. Libby graduated from the University of Maine in 1932, and received his M.S. degree from the University in 1933. Since 1935, he has been Assistant Professor of Agronomy at the University.

Annie Ansur, of Dover-Foxcroft, is employed at the American Woolen Company (Brown Mills).

Vinny Ashton and wife, Thurley Tucker Ashton, are still living in Norway where Vinny is engaged in business as a merchant. They are the parents of three children.

Marge Lovely holds the position of Home Management Supervisor, Farm Security Administration, U. S. Department of Agriculture, in Amherst, Massachusetts. Her home address is 166 Lincoln Ave., Amherst.

Alvin Hoffman, excuse me, Doctor Alvin Hoffman, has left Chicago and is serving his internship at the Baptist Hospital, Winston-Salem, North Carolina. Good luck, Alvin.

Eloise Young has, to my mind, an exceedingly interesting position. Eloise is Director of Rehabilitation of the Tuberculosis Sanatorium away out in Cleveland, Ohio.

Barbara L. Ward became the bride of Gregg McLeod, of Old Town, on September 11th.

Beatrice Titcomb is having a grand time for herself—seeing America first, I should say. Beatrice has been teaching in Ajo, Arizona, after some extensive traveling. After this year, she will complete her studies at Teachers College, Columbia University, for her Master's degree in Educational Administration and Personnel Guidance.

Doris Smart has accepted a position in the Home Economics Dept. at the New Britain, Connecticut Junior High School. At present she is working for her Master's degree at Columbia University.

Ruth L. Moore, of Pittsfield, became the bride of Thomas B. Fox, of Skowhegan, on September the 24th. Mrs. Fox is a graduate of Maine Central Institute and Farmington Normal School. Thomas is in the lumber business with his father in Skowhegan.

Clifton W. Walker was married on September 14th to Ellen B. Childs, of Newcastle, Maine. They are living on their farm in Alna, Maine, and their address is R.F.D. #1, Wiscasset.

Lauris P. McGown, of 64 Cedar Street, Bangor, is located with Sears Roebuck and Company in the radio department.

Charlotte Moir, of Presque Isle, was married to Clayton Currie, of Houlton, recently. Mrs. Currie is a graduate of Houlton High School and Ricker Junior College. Mr. Currie is connected with the Dunn Furniture Company in Caribou.

The Portland College Club held a "Swing" last evening—and while I regret very definitely that these kind of affairs must always take place on Friday nights (the working class, you know) I'll remain awake long enough, at my desk here this morning, to impart to you a few "Winchellisms." Many Maine grads attended—not all in our class, but most of you will recall the names. Among those seen truckin' and a shaggin' were the following: Kay and Art Lufkin, Wally Harwood, Helen Abbott, John Sturgis, Peg Humphrey, Bill and Myrilla Daley, Virginia and Noddy Lamb, Al Harmon, Helen Findlay Cousens, Dr. Phil Anderson, and Charlotte Fifield.

That's all this time.

Doty Findlay  
28 Sheffield St.  
Portland, Maine

1934

Next Reunion, June, 1943

Classmates,

What a whirl! There certainly are moments when I think I belong back in the slow-moving days when people had time to think it over. A single day presents such a variety of things to be done. What will 1939 be like? I guess that is what we'd all like to know—anyway it's fun speculating. It is certainly surprising how the class of 1934 has changed in such a short time. Since I am one who, by compulsion, has been leading the sheltered life for the past three years, my contacts with the *Alumni* have let me in on how the rest of the class has been living, and it certainly sounds good to me. Travel, interesting positions, further education, families, etc., I know it's a little tardy to mention people seen at the Bowdoin game but since they were not mentioned last month, it's still news. With all my threatenings to Kay and Dick, their information was still more of a personal than professional nature—who was with whom and Kay's reports of what they wore (typically feminine observations). Bea Cummings was there with Roger Burke. Time hasn't changed a thing. Merle and Jack Leddy, needless to say, well and happy. The Charlie Bunkers were mentioned, nearly saw them a while ago but the "Fates" were against it, I guess. Marie Archer and Paul McDonald were there together. The rest of the news is supposed to be factual but by now it may be ancient history.

Bill Crockett is submaster in the Stockton Springs High School where he is instructor of Latin, French, English, and commercial law, I'll say the boy is versatile.

Boyd Stratton has moved his poultry farm from Belfast to Hancock, and Larry Chatto is senior executive assistant in Soil Conservation Service at the University. The Chottos have a little girl, Peggy-Ann, born August 19th.

Charlie Sleeper is maintenance engineer in the Brass Yeast Co., Newark, N. J. John Venskus is safety engineer for the Liberty Mutual Ins. Co., in South Portland. I find I have so much to learn. I didn't know they had engineers in yeast and insurance companies, or maybe "enr" doesn't mean engineer, am thinking seriously of taking a course in contemporary abbreviations.

Although this is unseasonable news and baseball is over, it's too good to keep—"Twinkle-Toes" Osgood, "Red" to you, was the leading batter for Fort Fairfield in the Northern Maine League this year. Even with that name, Red gets my vote for not letting old age creep up on him. I've been competing with the teen-age myself and know what it takes.

Now that the first snows have fallen and the birds have started south, Jackies Good and the horses have followed close behind, maybe there's something to these horse races besides an empty pocketbook. Any job that takes you where it's warm and sunny has something in it. Jack says that Bruce Moyer has everything he's been wanting, including a house in the country and even a garden—and if you've never lived in the heart of Greenwich Village, you don't know how wonderful that is. While waiting for the New York bus to come in Thanksgiving I saw Mac Oliver. Mac is engaged to a girl in Peterboro, N. H., and we chatted while waiting for our busses. Mac is working for the National Youth Administration and has his office in the Park Square building. I've finally found out that Bill Rossing is still in the north. I thought he'd gone back to Mississippi but he has stayed here and is working for an insurance company (I always miss on the details).

Hazel Feero is teaching in Lisbon High School, Lisbon, Maine.

Roger Hodgkins is chief engineer at the transmitter house of radio station WGAN in Portland and head of the operating department. He directed erection of the complicated broadcasting and transmission devices.

A birth announcement on August 21 to John Pease and Ruth Walenta Hodgkin,

a son. I hope I will be forgiven for such tardy announcements but it is often quite a bit late when I finally get the news.

The rest is romance. The engagement of Rachel Adams to Nathaniel Barker, of Presque Isle, has been announced. I guess those 4 H's really do mean what they say.

Art Hoyt was married on October 24 to Ruth Dow, of Caribou. Mrs. Hoyt has been secretary to superintendent of schools and has recently been employed at the re-employment office in Caribou. They are living in Presque Isle where Art is engaged in farming.

Ted Earle was also married October 24 to Janet Whittemore, of Southwest Harbor. Mrs. Earle graduated from Punahan Academy in Honolulu, Hawaii, in 1933 and attended Wheaton College and the Academy of Allied Arts in New York City. Ted is with the Bath Iron Works.

### 1936

#### Next Reunion, June, 1942

Dear Classmates,

I suppose that you all will have had a marvelous Christmas by the time you receive this *Alumnus*, but at the time of writing, I'm wondering if there will be snow enough.

Snow or not, several of our class have reason to be happy this year.

Mr. and Mrs. Harold Lord (Alice Crowell) have a daughter, Koren, born November 12. They are living in Portland on 77 Brentwood St. Harold is employed by the Personal Finance Co.

Mr. and Mrs. George Cobb (Arlene Higgins) also have an addition to the family. Their's is a boy—Ralph Edward, born Nov. 20th.

Another big event in the Higgins family recently was the marriage of Clyde to Ruth Libby '35. They were married in Caribou Nov. 26th and are now living in Augusta.

Ann Eliasson was in Lewiston over the Thanksgiving holidays. She is teaching in Nedham, Mass. She and Marie Archer, who is a technician in the C. M. G. hospital, came over here for an all too short call.

I just received a letter from Libby Philbrook Ingraham who says that I have neglected to tell you all of Don Brown's marriage. I was sure that I had had that news in, but just in case—Don was married this fall to Helen Bailey, of Pittsfield, Maine.

Barbara Sanborn was married Thanksgiving Day to S. Peter Kneeland, of Hartford. Janet Goldsmith '37 was one of the bridesmaids.

Jack Thompson was married Oct. 29th to Harriette Malic, of Boston. Jack is employed as bacteriologist at the laboratories of Swift & Co., in Boston. The couple are residing in Medford, Mass.

Carolyn Currier is president of the Bangor Junior Women's Club.

Winifred Lamb is teacher of reading and hygiene at Rockland Junior High School.

Rosemary Boardman is employed by the Monroe Loan Society of Maine, in Bangor.

We must have longer columns than this one hereafter. Won't some of you please send me a postcard or letter (the latter preferred) and tell me of yourselves and other '36ers?

Happy New Year to you all—  
Phylis Webster  
338 Pine Street  
Lewiston, Maine

### 1937

#### Next Reunion, June, 1939

Dear Classmates,

By the time this reaches you Christmas will be over and perhaps some of our perfectly good New Year's Resolutions will be broken. I do hope you all had grand holidays.

I received a nice long letter from Phil Bower and I want to thank you for it, Phil. Apparently, you must be a seasoned traveler by now. Phil is employed by the Scott Paper Co. in Chester, Penn. But before you make a mental note of that address let me give you his present residence. He is now at the Institute of Paper Chemistry, having been sent for a year for some specialized study in the chemistry of pulp and paper. His address there is 733 East Alton St., Appleton, Wisconsin. There should be a lot of winter sports for you out there, Phil. Hope you have more snow than we have.

George Weatherbee received his Master of Arts degree in English last June. Congratulations.

Leroy Barry is now in his first year of Medical School at Boston University. We're going to have quite a few doctors among our Classmates, aren't we?

Another marriage which took place this summer was that of Louise Calderwood and Joe Cyr. This took place on Aug. 27, 1938, in Bath. Carol Stevens was one of Louise's bridesmaids. They are living at 88 Grove Street in Augusta.

Margaret Crouse was married this fall, Oct. 28, to Sidney Briscoe. They are to live in Wilmington, Del., I imagine, as that is where he is employed as sales manager for Pusey-Jones Corp.

Nolan Jackson and Doris Hunt, of Norway, have been married this fall, too. Congratulations to all you newly wedded folks.

Alfred Schreiber, who attended the University one year, is a senior at the Baltimore Dental School.

Employed by the Great Lakes Paper Company is Andrew Poulson. He is a dealer and cruiser of the Woods Department and his address is 240 N. Archibald Street, Fort William, Ontario.

Marian Larsen is in South Paris where she is Dean of Girls and English teacher at the High School.

### They Meet in June

The following classes hold reunions at Commencement in 1939

1872

Richard Briggs is employed as a store clerk for G. W. Spalding, at East Sumner. You can reach him by writing to Box 222, Canton, Maine.

I would have had very little news for this month's column if the Alumni office hadn't sent me a lot of clippings. Do please write and tell me what you're doing or what someone else is doing.

Lib Hoyt  
29 Maple Ave.  
Farmington, Me.

### 1938

#### Next Reunion, June, 1940

Hello, Everyone,

Sid Hurwitz (4 Dennison St., Roxbury) is working for his dad with the hope of taking over the business when his father retires.

Here is a letter from an English teacher, so prepare yourselves, but not for the usual appearance of the species. It is Don Mayo, teaching in Denver, Colorado. Also helping with coaching, he says. A letter will reach him at 2973 No. Speer Boulevard.

Ralph Viola has been very busy with his poultry business at the Vineyard on the route to Bangor.

Stan Fuger is to be married, I hear. The girl is Miss Viola D. Smith, of White Plains, N. Y. Miss Smith is a graduate of Lasell Junior College, of Auburndale, Mass., and is now attending Gray's Business College. Stan is working for Travelers' Insurance in Hartford, address 157 Four Mile Rd., West Hartford. You all are entitled to a free cigar at the above address.

John Hooper has won a scholarship and is going to study at Washington State College. It is a two-year fellowship in chemistry. He is also going to do laboratory teaching.

A letter from Frances Nason (Mrs. Richard Byther). Frances has a baby boy 21 months, Robert Nason. Dick is doing promotional work for The Eastern Furniture Company, of Bangor, Me. Their address is now Essex Junction, although they say they expect to be moved to N. Y. State soon.

Frances Jewell (Mrs. Kempton White) is keeping house—and a husband at 945 Forest Ave., Portland, Maine. She was married about a year ago, as I remember.

Dick Bucklin—Aeronautical University of Chicago, Ill. This, I think, explains itself. The residence address is 446 Oakenwood Ave.

June Clement is in training for a nurse at the Deaconess Hospital. Address, 276 Grove Ave., Wellesley, Mass.

Laurence Denning (427 W. 162nd St., N. Y. C.) is working for W. T. Grant Company.

Marion Hatch is in Boston in Filenes. You could find her at 338 W. Emerson St., Melrose, Mass., after business hours.

Sara Littlefield is teaching Home Ec. in Dexter High.

Nelson Carter and Geo. Philbrook are graduate fellows in the Dept. of Chemistry and Chemical Engineering at Maine.

Roger Bouchard is Field Man for the Federal Land Bank at Springfield, Mass., with headquarters in Caribou. Address, 46 Bridge St.

"Wally and Betty" are engaged. Of course, Wally Gleason and Betty Drummond. The engagement was announced Thanksgiving Day and the wedding will "take place next June."

A Merry Christmas to you all and a Happy New Year.

Mary Deering  
70 W. Chippewa St.  
Buffalo, N. Y.

# The MAINE PLATES

by WEDGWOOD

now include *eight* separate center designs and an exclusive First Edition back stamp on each plate.

With the addition of views of Stevens Hall and Merrill Hall to the center designs of the Maine Commemorative Plates, alumni desiring "eights" may obtain complete sets of different centers.

A distinctive back stamp will mark each plate as a "first edition" for all orders received before production begins. The back stamp will bear the name of the building featured in the center, the date of construction, and the date of issue.

The eight centers, created exclusively for the University by Wedgwood, will show views of Alumni Hall, the Library, Wingate Hall, Winslow, Coburn, the Alumni Memorial, Stevens, and Merrill Hall. Each center will be framed in the Greek border design called Walls of Troy, symbol of Phi Kappa Phi, Maine-founded honorary scholastic fraternity.

The border designs of the Maine Plates will feature the President's House, old Oak Hall, Mount Vernon, and the University Seal, surrounded with an appropriate evergreen motif. In color the appropriate and beautiful Staffordshire Blue, the Maine plates will fittingly and lastingly commemorate days at Maine.

By ordering at once alumni can be assured of obtaining first edition plates of definite historic value. The price is \$15 per dozen, \$10.50 for eight plates, \$8 per half dozen, plus express charges collect from Boston.

General Alumni Association, University of Maine, Orono

Please reserve for me \_\_\_\_\_ Maine Plates. Deposit\* of \$ \_\_\_\_\_ is enclosed. I shall pay the balance when Plates are ready for delivery.

Ship Plates to: \_\_\_\_\_
