

COMMUNICATION

EDITORIAL INFORMATION 2019

The role of the Nominata within the editorial context is to recognize the various types of contribution that the participants in the community have provided to the benefit of that community. We thus list, in addition to the descriptive statistics information, the names of the respective collaborators, who we thank for their effort, commitment, and competence, and without whom it would be impossible to achieve our mission. We maintained the strategy of publishing an advance edition on the first day of each four-month period, which has impacted early citations, with benefits both for the readers and for the authors. This applies both in the national and international context, where increasing citations are noted.

I wish to thank the authors, evaluators, readers, associate editors, ad-hoc editors, member of the Editorial Board, service providers, and editorial assistants who carried out their work with professionalism, confidentiality, respect, and a great deal of care in order to generate knowledge within the scope of RC&F.

We increased the number of ad-hoc editors and we view this as a successful experience in terms of the participation of researchers who acted as editors specifically for some articles submitted by professors close to the Scientific Committee or in cases of high specificity. In 2017, we added the role of ad-hoc editors for lines of research: Marcia Mendes De Luca, Bruno Salotti, Patrícia Siqueira Varela, Andrea Maria Accioly Fonseca Minardi, Raquel de Freitas Oliveira, and Francisco Henrique Figueiredo de Castro Junior. We also enjoyed the contribution of ad-hoc editors by article. Here, I wish to thank Alexandre de Pádua Carrieri and Gilberto José Miranda.

We received financial support from FINECAFI, SIBi-USP/AGUIA, CNPq, and CAPES, creating the conditions for the activities to be developed within the context of the challenges set. Similarly, I wish to thank our service providers who, with professionalism and attention to detail, contributed to the accomplishment of our work. We refer specifically to Evandro Lisboa Freire, Fernando Effori de Mello, Luiza Carvalho, Kris Gillespie, and Letra1 Serviços Editoriais.

I am particularly grateful to SciELO for its support in perfecting the ScholarOne management control system, which led to an important management level change for the journal. The support provided in implementing and improving the system was vital. In 2015, we were accepted by Scopus and this new indexation is very promising in terms of international visibility. We received 151 articles submitted between November of 2018 and October of 2019. One hundred and twenty-five evaluators analyzed 47 papers and there was a 44.8% desk rejection rate and 57.0% total rejection rate. We published 25 original articles and 3 editorials (2 international and 1 national) in editions 79, 80, and 81. It is very important for RC&F to participate in different lines of research and this distribution is emphasized in the “Accounting for external users” and “Markets” lines.

Fábio Frezatti
Editor-in-Chief

Period from November 1st, 2018, to October 31, 2019

Table 1 *Research areas*

Research areas	Submission	Percentage	Publication	Percentage
