ABSTRAK

Agriculture is one of the important sectors in Indonesia and one of them is the durian farmers. But often the community particularly the province of Lampung Regency Tanggamus Communities often have difficulty in determining what quality durian seeds to in farming. From some descriptions the problem, then made a Web-based Expert system for Determining Seed Quality Durian In Tanggamus that will assist users in determining the quality of seeds they will use. This research uses the MySQL as easy PhP application media maker application expert system. The form of implementation of research results in the form of websites that provide recommendations to determine in the selection of high-quality durian seeds needed by farmers.

Keywords:*Farmer, PhP, Tanggam.*
