CHRISTIAN REFORMED SYNOD.

The general synod of the Christian Reformed church has voted to increase the curriculum of the seminary in Grand Rapids and make it a full fledged college. There is a specially large endowment fund for this purpose. The school will be called John Calvin Jr. college. It was voted to call a fifth professor for the literary department and Dr. Ralph Jansen of Zeeland, Mich., was appointed permanent professor in theology. He has taught in the schools two years. He is a graduate of Hope college and obtained his doctor's degree in Berlin university.

Dr. Samuel Schwarz, a representative of the National Christian association, which is a strong anti-secret society organization, addressed the general synod in an effort to renew the enthusiasm among the delegates against secret societies.

The following were appointed on the board of heathen missions: The Rev. J. A. Westerveld, Hackensack, N. Y.; J. Dozema, Hudson, N. Y.; J. B. Hoekstra, H. Beets, Grand Rapids; H. Wolcott, Muskegon; J. Post, Holland; H. Vanderwerp, representing Illinois classics; J. Vandell, Iowa classics; C. Bode,riesland. The board will have special charge of the Indian missions.

The synod took an excursion yesterday afternoon on one of the Graham & Morton steamers. The Sunday school teachers and superintendents, the consistency members and their wives and members of the Ladies' Aid societies from the three Christian Reformed churches in the city and all the city officials and their wives were also invited.

Wednesday the synod discussed Christian education in the lower branches and in the evening the Rev. C. Van Goor of Patterson, N. J., spoke on that subject.

The question of unionism was debated at considerable length. The Rev. T. Vander Ark, of the Commerce Street church, Grand Rapids, read a long report prohibiting members of the Christian Reformed church from joining labor unions when they find that the unions bind them by oath to obey the union in preference to church, state or home; when the union officially disregards the Sabbath by holding business meetings or excursions on that day; when the union gives the right to pickets to use violence or itself through strikes and boycotts advocates violence; if the union forbids actions that ought to be done by Christian confessions; when the union obtains money through dances, card playing or Sunday excursions; if the union has a ritual or oath binding members and known to them only. After some vigorous objections from the members from the cities the report was adopted as presented.

Yesterday morning the synod appointed a committee to report on the question of the denomination recognizing willful desertion as sufficient grounds for divorce.

The consistories of the several churches can use their discretion as to whether ministers of other denominations are to be permitted to fill the pulpits of the Christian Reformed churches.

A committee will correspond with the church in the Netherlands in regard to a revision of the rules of church government.

Dr. Ralph Jansen sent word that he accepted the appointment to a professorship in the Grand Rapids theological seminary.

Psalms are to be adopted in the churches and unauthorized hymns discarded.

A Christian workmen's union is to be organized, to work along the same lines as ordinary unions.

A committee reported against the use of church choirs in church services.

A new liturgy and standards is to be published.

Prof. A. J. Rooks of the Grand Rapids seminary has been granted a year's leave of absence which he will probably spend at the college at Edinburgh, Scotland.

Rev. Samuel Schwarz, a representative of the National Christian association, made an address against secret societies. He stated that no member of the church could consistently belong to a secret order.

CELEBRATE WITH CARE.

Mayor Geerlings has come out with a proclamation against the use of explosives and other dangerous ways of celebrating on July 4th. Violators of ordinances and rules will be arrested. The proclamation is as follows:

"Whereas the use of explosives is sometimes carried on in a careless and dangerous manner by a few thoughtless or reckless persons who at the moment are unmindful of the danger to human life and property, and

"Whereas such improper diversions or noises are contrary to the peace and good order of the city, and prohibited by the ordinances thereof, I do hereby issue warning, that the use of explosives of any kind that will endanger life or property, either by reason of the nature of such explosives or the quantity used, will be punished according to law by the proper officers of this city. Attention is especially called to the use of a compound of chlorate of potash and sulphur which from its nature is particularly dangerous.

"The marshal and other police officers of this city are hereby requested to enforce the ordinance relating to the offenses referred to above."

Ball playing upon the streets is also touched upon by the mayor as follows: "I desire to call attention to the following ordinance: 'Playing or pitching ball' is forbidden on any street, alley, park or public place except upon such streets or parts of streets as may from time to time be designated by the city marshal."

POISONER IN PEACH PLAINS.

Three Horses Killed.

There is great excitement in Peach Plains today because of the poisoning of the horses of three different farmers in that community last night.

Some time during the hours of late last night or early this morning the barns of Harry Deremo, James Payne and John Kleft were entered and Paris green deliberately scattered in the mangers. This morning the respective farmers named, found their horses dead in their stalls. There was one horse in each barn. The men named are all brother-in-laws.

About the time of the discovery of the poisoning Mrs. John Q. Deremo, who lives on the banks of Grand River in Peach Plains found that some intruder had been about her place during the night. A screen in one window had been broken and an iron thrown into the room. Outside the house paper was found, upon which was scribbled in printed letters a note to the effect that her berries were poisoned.

Suspicion points to the guilt of John Q. Deremo, better known locally as "Quin" Deremo, and a warrant has been issued for his arrest. Deremo is the husband of Mrs. Deremo. Harry Deremo, one of the victims of last night's chimerical maliciousness is a son and Mrs. Kleft and Mrs. Payne are his daughters. Deremo and his wife have not lived together for some time. Last fall Mrs. Deremo commenced divorce proceedings against her husband and some of her allegations were startling and unprintable. The matter dropped, however, but the family have been in a constant brawl and the son and son-in-law have naturally been drawn into the family fracas.

Deremo left some time ago and has been stopping at a neighbor's and has also been out of the county. Mrs. Deremo has been living alone on the place with a little daughter and has a hired man. Harry Deremo, her son, lives not far away on the main road with his wife.

It is known that a Deremo was in town yesterday and there is every reason to believe that if he could be captured light would be thrown on last night's terrible affair. The note found by Mrs. Deremo would naturally throw light on the author, but Mrs. Deremo says she could not identify the handwriting and says she has not known her husband to write for years.

The people of the Plains are greatly afraid that the trouble in the Deremo family will lead to murder unless arrests are made. Some of them are also greatly worried lest the poison throwing criminal should visit their places and poison their stock or burn their barns, and the arrest of last night's cowardly criminal is demanded for the safety of the entire community.

This afternoon the officers are scouring the country in the vicinity of Peach Plains and are following a clue that leads to the north side of the river.

At three o'clock this afternoon Mrs. Deremo discovered that a horse she had just purchased from Henry Sprick, was very ill, and it will undoubtedly die.—Grand Haven Tribune.

INSISTED UPON FIXED PRICE FOR DOCTORS.

The Board of Supervisors finished up their business Saturday afternoon and adjourned without delay. The principal part of the day was taken up in the reports of the committees to whom the various matters have been referred. As was expected, the committee on miscellaneous claims and accounts did some cutting in the contentious disease bills. All of the doctors' bills which were above the board's mark of \$2.50 a visit, were cut to that figure. In many cases the bills ran up to five dollars a visit, and the board evidently will attempt to establish a precedent at this time. All watchmen bills were rejected yesterday and cities and towns will have to pay them if the accounts are to be settled.

The committee to whom the petition from Sheriff Dykhuis, asking that prisoners be raised from thirty to forty cents per day, recommended that the rate remain the same.

Mr. Ward of Holland, moved as an amendment that the rate be fixed at forty cents a day but the motion was lost. Upon the motion of Mr. Gordon the original report was adopted, all members voting yes with the exception of Mr. Ward of Holland and Mr. Ferguson of Grand Haven city. The committee on buildings and grounds recommended that new tables be purchased for the drain commissioner's office and that a light be placed in the vault. The matter of buying new vault shelving was deferred.

The probate court was allowed a new desk, and the county treasurer was authorized to borrow money for the county show if it be necessary.

All business was done up quickly at this session and the board adjourned with a clean path before them.—Tribune.

VALUATION OVER \$200,000 HIGHER

The total valuation of the Holland real estate and personal property, from the records of the board of review, is \$5,335,225, or \$200,470 higher than in 1903. The first district has \$1,120,800 in real estate and \$174,400 in personal and the second district has \$2,753,950 in real estate and \$1,286,075 in personal. The new business blocks put up last year and the gas plant erected the past year constitute most of the increase in the valuation.

MORE SMALLPOX IN THE TOWN.

Bert Van Lente, residing near the Pine Creek school, was taken ill with smallpox Monday. Health officer J. W. Vanden Berg at once quarantined the home. It is feared that many have been exposed.

ROOSEVELT AND FAIRBANKS.

The Republican national convention in Chicago yesterday, re-nominated President Roosevelt, and Senator Fairbanks of Indiana was nominated for vice president.

Rogers' Knives and Forks at Stevenson's Jewelry Store.

PERSONAL.

Mr. and Mrs. John Den Herder and Miss Johanna and Minnie Bartels and Henry Kronmeyer attended the wedding of J. H. Ter Avest and Miss Henrich Lubbin at Coopersville Thursday last.

Hon. G. J. Diekema, Geo. E. Kollen, J. B. Mulder and G. Van Schelven attended the Republican national convention this week.

Mrs. C. J. Klievit of Clifton, N. J., is visiting her sister, Mrs. D. R. Drukker. Attorney A. Visscher was in Ann Arbor this week attending the commencement exercises at the state university.

Rev. and Mrs. J. H. Karsten entertained Mr. and Mrs. Herman Leemkull of Oshkosh, Wis., this week.

Frank Boonstra, the Zeeland clothier, was in town Wednesday.

Isaac Van Lee of Zeeland attended the synod here yesterday.

Rev. Jas. F. Zwoemer is in Wisconsin in the interests of Hope college.

Mr. and Mrs. John Vander Sluis visited in Chicago this week.

H. Bradshaw was in Chicago on business this week.

B. E. Scott was in Allegan on business Wednesday.

Prof. K. D. Dimmet of Hope College, has been to Chicago for the summer vacation.

Mr. and Mrs. John Hoffman returned Tuesday from a visit with relatives in Milwaukee and Chicago.

Mrs. A. Boot and son who have been visiting in Chicago, returned this week, accompanied by Mrs. Woodruff, daughter of Governor Peck of Wisconsin, who will spend some days here visiting.

OTTAWA CIRCUIT COURT.

Judge Padgham convened circuit court Monday and from the time court was called in the afternoon until it adjourned in the evening the cases were piled off at a rapid rate. The court managed to finish up everything in time to adjourn without delay.

Horace M. Seeley, who was arrested for bigamy in Port Huron this spring by the sheriff, was sentenced to not less than twelve months nor more than two years in the Ionia Reformatory. Seeley's wife live at Port Huron and Holton respectively and wife No. 1 has secured a divorce and married again since Seeley's arrest and confinement in jail here. The prisoner claims to be a victim of a misunderstanding. He claims to have sent an attorney in Port Huron \$25 with which to secure a divorce from wife No. 1 and he supposed he was a free man when he married the Holton wife.

George Gildner, who pleaded guilty to a violation of the liquor law, was sentenced to a fine of \$25 and costs, the total of which was \$31.25. Charles Reghel was fined \$15 and costs for violation of the liquor law and he paid a total of \$20.

Judge Padgham denied the defendant's motion to dismiss in the case of Ira McKenzie against Alexander McKenzie and allowed \$1000 to be paid to the plaintiff.

MAY REORGANIZE COMPANY.

A reorganization of the Grand Rapids Holland & Lake Michigan Railway company may be effected at a meeting to be held in Detroit Thursday. It is reported that it is the intention to effect an exchange of preferred and common stock with the second mortgage bondholders, cleaning up all debts other than the first mortgage bonds amounting to \$1,500,000, and provide for additional capital by the increase of capital stock from \$1,000,000 to \$1,600,000. Those who will be present at the meeting are I. E. Cockran and J. P. Crozer of Philadelphia, J. S. Rowison, J. K. Andrews and Frank C. Andrews of New York, Benjamin Hanchett of Grand Rapids and the Hendries of Detroit.—Grand Rapids Post.

CHARLES B. SCOTT, DEAD.

The Daily Press of Plainfield, N. J., states that Charles B. Scott died Sunday afternoon of typhoid malaria. He was a son of Dr. Charles Scott, late president of Hope College. He received his A. B. at Rutgers and M. A. at the University of Michigan. He had held many positions such as member of staff of the State Geological Survey of Pennsylvania, teacher of science at the St. Paul High School and Osego Normal School, was in charge of the newly established schools of the American Missionary Association, in Porto Rico, principal of the A. M. A. school at Savannah, Ga., and the past year taught at the Hyannis, Mass., Normal School, where he had lately accepted a professorship for the coming year. He was 43 years old and leaves a wife and three children, a mother and sister, Mrs. Daniel Van Pelt, with whom he was living, and two brothers, A. W. Scott of Fort Collins, Colorado, and E. B. Scott of this city. The funeral took place Tuesday and the interment at Shawangunk, Ulster Co., N. Y.

SCHOOL GRADUATES.

Wednesday evening the class day exercises of the class of 1904 took place at Hope church and the large audience present was well satisfied with the fine program rendered. The music rendered by the high school chorus was excellent.

The salutatory was given by Sears McLean and was a worthy effort and well rendered. Hans L. Giesse delivered the class oration, Miss Rose Schwarz read the class essay, a production of merit, Miss Margaret Bottschaefer gave the class poem and received well merited applause. The class history was given by Miss Gertrude Habing gave the class prayer, Miss Vera Allen rendered an interesting production, "The last will and testament" of the class and Miss Kerna Hooper the valedictorian, who secured applause for her talented effort.

Superintendent J. D. Clark and his able corps of assistants, this week closed one of the most successful years the Holland schools have ever had.

REPUBLICANS ARE IN CONVENTION

Delegates to the National Gathering Now in Session at Chicago.

COLISEUM BUILDING IS PACKED

Henry C. Payne Opens the Convention and Introduces Temporary Chairman Root.

Synopsis of the Address of the New York Man—What He Has to Say on the Questions of Trusts.

Chicago, June 21.—At 10:30 a. m. today the doors of the big Coliseum building were thrown open and the ticket holders began to pass in. Soon the delegations to the Republican national convention began to make their appearance, and there was applause as well known politicians and statesmen marched down the aisles to their stations. The big building was elaborately decorated and packed to its capacity.

Promptly at 12 o'clock Henry C. Payne, chairman of the national committee, rapped the big convention to order. Prayer was offered by the Rev. Timothy P. Frye, after which the call for the convention was read by Secretary Elmer Dover. The temporary chairman, Ellihu Root of New York, was then introduced and was received with enthusiasm by the delegates. When the cheering had partly subsided he began his address to the convention: He said in part:

Confidence in the Party.
"With the platform and the candidates of this convention, we are about to ask a renewed expression of popular confidence in the Republican party. We shall ask it because the principles to which we declare our adherence are right, and the best interests of our country require that they should be followed in its government. We shall ask it because the unbroken record of the Republican party in the past is an assurance of the sincerity of our declarations and the fidelity with which we shall give them effect. Because we have been constant in principle, loyal to our beliefs and faithful to our promises, we are entitled to be believed and trusted now. We shall ask it because the present policies of our government are beneficial and ought not to be set aside; and the people's business is being well done, and ought not to be interfered with."

Relieved of Tax Burden.
"Four years ago the business of the country was loaded with burdensome internal taxes, imposed during the war with Spain. By the acts of March 2, 1901, and April 12, 1902, the country has been wholly relieved of that an-

ELLIHU ROOT.

nual burden of over \$100,000,000; and the further accumulation of a surplus which was constantly withdrawing the money of the country from circulation has been prevented by the reduction of taxation.

Subject of Trusts.
"Four years ago the regulation by law of the great corporate combinations called the 'trusts' stood substantially where it was when the Sherman anti-trust act of 1890 was passed. At every election, the regulation of trusts had been the football of campaign oratory and the subject of many insincere declarations. Our Republican administration has taken up the subject in a practical way as a business rather than a political question, saying what it really meant, and doing what lay at its hand to be done to accomplish effective regulation."

The Philippine Islands.
"The last vestige of insurrection has been swept away in the Philippine islands. With their work accomplished over 55,000 American troops have been brought back across the Pacific. Civil government has been established in the archipelago. Peace and order and justice prevail. The Philippine commission, guided at first by executive order and then by wise legislation of congress in the Philippine Government Act of July 1, 1902, have established and conducted a government which

has been a credit to their country and a blessing to the people of the islands. The body of laws which they have enacted upon careful and intelligent study of the needs of the country challenges comparisons with the statutes of any country. The personnel of civil government has been brought together under an advanced and comprehensive civil service law, which has been rigidly enforced."

As to the Tariff.
After summarizing the work done by the first McKinley administration and that done by the present government, Chairman Root said:
"We challenge judgment upon this record of effective performance in legislation, in execution and in administration. The work is not fully done; policies are not completely wrought out; domestic questions still press continually for solution; other trusts must

be regulated; the tariff may presently receive revision, and if so, should receive it at the hands of the friends and not the enemies of the protective system."

He closed with an eloquent tribute to the late President McKinley, declaring that his successor followed his policy; to Senator Hanna, and to President Roosevelt.

When the temporary chairman had concluded his address the standing committees were appointed and the convention adjourned for the day.

SECOND PLACE IS FAIRBANKS

Seems Sure To Be Roosevelt's Running Mate—Anti-Convention Notes.
The nomination of Senator Charles W. Fairbanks for vice president was regarded as settled when New York decided to cast her seventy-eight votes for him. Wisconsin delegates voted at their caucus to give a complimentary vote for ex-Governor Edward Scofield for vice president. Complimentary votes will be cast for many favorite sons, although it is known that the Indiana senator will be nominated. Colorado will vote for Springer; Illinois for Hitt; Missouri for Walbridge; Nebraska for Webster.

The men who are to examine the platform, which has been in the possession of Senator Lodge for several days, have been selected by the various state delegations, and there is practically no doubt that the declaration for protection will be emphatic.

The committee on resolutions selected by state delegations at their caucuses includes the following names: Illinois, Albert J. Hopkins; Indiana, Albert J. Beveridge; Iowa, J. W. Blythe; Michigan, Andrew B. Dougherty; Wisconsin, John C. Spooner.

The new Republican national committee contains among others the following names: Illinois, Frank O. Lowden; Indiana, Harry S. New; Michigan, John W. Blodgett; Wisconsin, Henry C. Payne.

AGAINST LAFOLLETTE

Republican National Committee at Chicago Decides in Favor of Spooner.

Chicago, June 18.—By unanimous vote the Republican national committee decided to seat the delegates-at-large from Wisconsin who are members of the so-called "stalwart" faction, headed by Senators John C. Spooner and Joseph V. Quarles, and opposed to the Republicans led by Governor La Follette. While the contest is partly settled so far as the national convention is concerned the dispute among the two parties of the Badger State is by no means ended, as the Wisconsin courts are to be asked to determine which of the two conventions recently held in the state was legally the party convention.

After the national committee had decided against the supporters of the governor the leaders of La Follette's side announced their determination to carry the fight to the end, and it is probable, in spite of the decision of the committee, that the dispute will again be fought out before the committee on credentials in the national convention. The anti-La Follette men were equally determined to continue the contest, which has been exceedingly bitter. The Spooner adherents asserted that the first legal action to be taken would come from their side.

Boy Thrown in River Drowns.

Toledo, O., June 21.—Richard Harris, 17 years old, colored, was thrown into the river near the foot of Adams street by Harry Parks, aged 19 years, and drowned. Parks disappeared and has not been apprehended.

Release of Perdicaris Is Near.

Washington, June 20.—The navy department has received a cablegram from Rear Admiral Chadwick at Tangier, saying that Perdicaris and Varley probably will be released tomorrow.

THE CREAM SEPARATOR.

Reasons Why It Should Be Used on the Farm.

There are many reasons why the separation of the cream from the milk should be done on the farm, at the source of production, says W. F. McSparran in Dairy and Creamery.
I know of no way of improving the cow contentment but by the liberal and wise feeding of it year in and year out, and this has been done long enough to ascertain the capacity of each individual cow to weeding out. The rejected ones should be replaced by well bred heifers raised on the farm and always fed as good cows should be fed—enough. Intermittent good feeding is not enough to make good cows on.
Now, in this best feeding of the dairy cow as a calf there has nothing yet been discovered that approaches sweet, warm skim milk in the ration, and to get it so it becomes absolutely necessary to have the separation of the cream from the milk done on the farm. A safe estimate of the value of such milk over that of the skim milk received from the average creamery is 50 per cent and for feeding young, delicate animals 100 per cent.

At the creamery the skim milk from all the herds of all the patrons comes together. Some is naturally low in feeding value, some high, and all grades fill in between. Some of it is clean, some dirty and some dirtier, and some may have another "d" added to its dirtiness. This composite milk, even if it were all equally clean and equally fresh, could not be uniform in food constituents.

By the use of the farm separator the skim milk will be uniform in its solids after the fat is removed.
Milk changes rapidly, and there are some young stomachs so delicate that changes in this food are recorded at once. By fermentation the milk sugar, one of the most valuable nutrients, changes rapidly to acid, which frequently does not agree with the digestion of young animals, and, while there are generally calves so robust and thrifty that after they are accustomed to drinking sour milk and can do so without bowel disturbance or stomach disorder, yet every experienced and observant feeder knows that even this hardy calf will do better if fed its milk uniformly sweet and warm.

Abnormal Milk.
Although there are many Holstein-Friesian cows with official records that show an average above 4 per cent fat in the milk and at least three which have produced above sixteen pounds of butter in one week, showing an average of 5.32, 5.44 and 5.45 per cent fat in the milk, the breed as a breed has not been developed for the production of abnormal milk.

Abnormal milk is such as is too rich in fat content for the cow's own calf, for milk unsuitable for the calf is also unsuitable for human food. Animals are plastic both as to form and function in the hands of the skilled breeder, but there is a point in the abnormal development of any animal at which nature will rebel and deterioration will set in, and with milk cows that point is reached when a cow cannot be allowed to suckle her own calf.—Pacific Home-stead.

Skim Milk For Calves.

The creamery and skim station systems have been the cause of much trouble with sour milk. Where the milk is hauled several miles in the hot sun, warmed to the proper temperature for separating and then sent home at just the right temperature to sour most rapidly, it results in the milk being sour much of the time when received by the owners, especially during the hot weather. This has been one common reason for poor success in raising calves, even where the creamery system is fairly well developed.—Missouri Experiment Station Bulletin.

Stable Cleanliness.

The cheesemaker can ask the patron, especially when building a new barn, to see that the cow stable is smoothly sheathed inside to prevent the accumulation of dust and the siftings of hay dust from overhead.

Care of the Dairy Farm

Milk pails and cans should be used for no other purpose than handling milk and especially not to take back the whey in the can the milk is brought in. Empty and clean the cans as soon as they get home and don't leave them standing in the sun to do other things that seem more important.

Things to Remember.

Don't forget to whitewash the stable once a year at least, to clean it several times a year by removing all trash and dirt. Brush down the cobwebs and accumulated dust.

Remember to keep the cows clean, not allow them to wade through sloughs of black mud or liquid manure, to give them clean drinking water and not allow the barnyard to become a mudhole; also to provide clean bedding and stop that exceedingly filthy habit of wetting the teats with a little milk before milking.

Salt Cows Daily.

Cows should be salted regularly or, better still, should have constant access to salt, says Dr. G. E. Newell.

The practice of salting them once a week is not a good one, as the most of cattle will lick a little salt every day if they can get it. Thus provided they will yield more and better milk than otherwise and will also maintain a better degree of health. As salt provokes thirst, the milk animal should have as free access to water as to the saline mineral, or the latter will do her more harm than good.

Cleanliness Requisite.

Perfect, absolutely perfect cleanliness—no other one thing has so high a value in the production of gilt edge, high priced butter.

Cleanliness in buttermaking must start with the cow and end with the marketed product—clean cows, clean stables, clean feed and water, clean methods of milking, handling, churning and marketing.

The Dairy Steer.
A good dairy cow well and comfortably kept ought to pay her owner \$100 per year, says Professor Haecker in Farmer's Advocate. And when it comes down to the steer from the dairy cow there is not really as much difference as we are often told. I have at the experiment station six steers from registered dairy cows not yet two years old, fed as any farmer should feed them, that will weigh from 900 to 1,200 pounds each. They are just as good as any of your beef breeds, and the profit from them and the cow would be much greater. The condemnation of the steer of the high bred dairy cow is simply a matter of prejudice.

Weed Out the Poor Cows.

A Canadian farmer who kept twenty-four cows and two hired men tested his cows with the Babcock test and found that eight were unprofitable, says Dairy and Creamery. He disposed of them and let one hired man go and at the end of the year found that he had made as much money from the sixteen as from the twenty-four. Now he has got down to twelve good cows and expects as much from them as he made from twice that number. Now he can increase up to his original number as fast as he can find or grow good cows and increase his profits.

Dairy Creamery

THE CREAM SEPARATOR.

Reasons Why It Should Be Used on the Farm.

There are many reasons why the separation of the cream from the milk should be done on the farm, at the source of production, says W. F. McSparran in Dairy and Creamery.
I know of no way of improving the cow contentment but by the liberal and wise feeding of it year in and year out, and this has been done long enough to ascertain the capacity of each individual cow to weeding out. The rejected ones should be replaced by well bred heifers raised on the farm and always fed as good cows should be fed—enough. Intermittent good feeding is not enough to make good cows on.
Now, in this best feeding of the dairy cow as a calf there has nothing yet been discovered that approaches sweet, warm skim milk in the ration, and to get it so it becomes absolutely necessary to have the separation of the cream from the milk done on the farm. A safe estimate of the value of such milk over that of the skim milk received from the average creamery is 50 per cent and for feeding young, delicate animals 100 per cent.

At the creamery the skim milk from all the herds of all the patrons comes together. Some is naturally low in feeding value, some high, and all grades fill in between. Some of it is clean, some dirty and some dirtier, and some may have another "d" added to its dirtiness. This composite milk, even if it were all equally clean and equally fresh, could not be uniform in food constituents.

By the use of the farm separator the skim milk will be uniform in its solids after the fat is removed.
Milk changes rapidly, and there are some young stomachs so delicate that changes in this food are recorded at once. By fermentation the milk sugar, one of the most valuable nutrients, changes rapidly to acid, which frequently does not agree with the digestion of young animals, and, while there are generally calves so robust and thrifty that after they are accustomed to drinking sour milk and can do so without bowel disturbance or stomach disorder, yet every experienced and observant feeder knows that even this hardy calf will do better if fed its milk uniformly sweet and warm.

Abnormal Milk.
Although there are many Holstein-Friesian cows with official records that show an average above 4 per cent fat in the milk and at least three which have produced above sixteen pounds of butter in one week, showing an average of 5.32, 5.44 and 5.45 per cent fat in the milk, the breed as a breed has not been developed for the production of abnormal milk.

Abnormal milk is such as is too rich in fat content for the cow's own calf, for milk unsuitable for the calf is also unsuitable for human food. Animals are plastic both as to form and function in the hands of the skilled breeder, but there is a point in the abnormal development of any animal at which nature will rebel and deterioration will set in, and with milk cows that point is reached when a cow cannot be allowed to suckle her own calf.—Pacific Home-stead.

Skim Milk For Calves.

The creamery and skim station systems have been the cause of much trouble with sour milk. Where the milk is hauled several miles in the hot sun, warmed to the proper temperature for separating and then sent home at just the right temperature to sour most rapidly, it results in the milk being sour much of the time when received by the owners, especially during the hot weather. This has been one common reason for poor success in raising calves, even where the creamery system is fairly well developed.—Missouri Experiment Station Bulletin.

Stable Cleanliness.

The cheesemaker can ask the patron, especially when building a new barn, to see that the cow stable is smoothly sheathed inside to prevent the accumulation of dust and the siftings of hay dust from overhead.

Care of the Dairy Farm

Milk pails and cans should be used for no other purpose than handling milk and especially not to take back the whey in the can the milk is brought in. Empty and clean the cans as soon as they get home and don't leave them standing in the sun to do other things that seem more important.

Things to Remember.

Don't forget to whitewash the stable once a year at least, to clean it several times a year by removing all trash and dirt. Brush down the cobwebs and accumulated dust.

Remember to keep the cows clean, not allow them to wade through sloughs of black mud or liquid manure, to give them clean drinking water and not allow the barnyard to become a mudhole; also to provide clean bedding and stop that exceedingly filthy habit of wetting the teats with a little milk before milking.

Salt Cows Daily.

Cows should be salted regularly or, better still, should have constant access to salt, says Dr. G. E. Newell.

The practice of salting them once a week is not a good one, as the most of cattle will lick a little salt every day if they can get it. Thus provided they will yield more and better milk than otherwise and will also maintain a better degree of health. As salt provokes thirst, the milk animal should have as free access to water as to the saline mineral, or the latter will do her more harm than good.

CULTIVATORS
The Kraus Pivot-Axle Cultivators are taking the lead with the best posted farmers. I have handled it for eight years and find that it is giving the very best of satisfaction.
I handle the BUCKEYE Mowers and Binders and have yet to hear from the first complaint.
The above machinery is not made by trust companies and I can give you prices that are right.
Also the Ohio Farmer's High Grade Fertilizer can be secured from me.
John Koops, Fillmore Centre, Mich.

The Graham & Morton Trans. Co

Until further notice two of the palace steamers of this Line will run between Holland and Chicago on the following schedule:—
Leave Holland daily at 9 p. m. Chicago daily at 8 p. m. Making close connections with the Pere Marquette Ry., and G. R., H. & L. M. Interurban. Fare \$1.50 each way.

Grand Rapids to St. Louis Exposition rates via Chicago & Alton Ry., Wabash Ry., or Illinois Central Ry. from Chicago:
Season limit ticket.....\$15.70
60 day limit ticket..... 13.20
15 day limit ticket..... 12.00
7 day limit ticket..... 9.65

The seven day ticket is limited to sale twice a week in Michigan, Tuesday and Thursday.
On the St. Joseph division steamers leave St. Joseph every day at 5 p. m. and 10 p. m. Fare \$1.00 each way.

The right is reserved to change this schedule without notice.
J. S. MORTON, Sec'y & Treas. **J. H. GRAHAM, Pres. & Gen. Mgr.**
FRED ZALSMAN, Local Agent.
Chicago Dock foot of Wabash Ave. Chicago Telephone 2162 Central.

THE LANSING SILO
Manufactured by the
SEVERANCE TANK WORKS
A few reasons why it is the best silo:
1. It has a continuous opening.
2. It has a permanent iron ladder.
3. It has NO bolts, nuts or screws to unfasten the door.
4. It takes but a minute to open or close the door.

The agent who sells them here does not require to make his living by selling these silos, so the buyer gets the agent's profit.
If you think of building a silo, then write or call on the local agent.
HENRY H. BOEVE,
R. R. 5. HOLLAND, MICH.

LOTS For Sale

Twelve lots on 14th and 15th street, between Maple st. and First ave., for

Putting in and Repairing Pumps a Specialty.

Sexine Pills

For years this remedy has been the standard nerve restorative. Thousands of happy men owe their newly found strength to its use.

Sexine Pills replace weakness and exhaustion with strength and vigor; the brain becomes clear; the nerves steady and calm; gloomy forebodings are banished and perfect vitality is fully restored.

If you are suffering as above, try a box; you'll be encouraged by its effect to take the full course of six boxes—then if you are not entirely cured, we will refund your money. This satisfactory offer is one of the factors of our success.

\$1.00 per box; 6 boxes (with guarantee to cure or money back), \$5.00, mailed in plain packages. Book free. FRANK MEDICINE CO., CLEVELAND, OHIO.

Sold by W. C. Walsh, Druggist, Holland.

The happiest couple in the world should be a deaf husband and a blind wife, both taking Rocky Mountain Tea. Keeps peace in the family. 35 cents. Haan Bros.

There was a big sensation in Leesville, Ind., when W. H. Brown of that place, who was expected to die, had his life saved by Dr. King's New Discovery for Consumption. He writes: "I endured insufferable agonies from Asthma, but your New Discovery gave me immediate relief and soon thereafter effected a complete cure. Similar cures of Consumption, Pneumonia, Bronchitis and Grip are numerous. It's the peerless remedy for all throat and lung troubles. Price 50c and \$1.00. Guaranteed by W. C. Walsh, Druggist. Trial bottles 10c.

BRUTALLY TORTURED.

A case came to light that for persistent and unmerciful torture has perhaps never been equaled. Joe Golobick of Colusa, Calif., writes: "For 15 years I endured insufferable pain from Rheumatism and nothing relieved me though I tried everything known. I came across Electric Bitters and it's the greatest medicine on earth for that trouble. A few bottles of it completely relieved and cured me." Just as good for Liver and Kidney troubles and general debility. Only 50c. Satisfaction guaranteed by W. C. Walsh, Druggist.

THE MIXING OF CREAM.

Combine of Hand and Factory Skim
Lowers Quality of Butter.

Whether hand or factory skimmed cream should be mixed would depend, first, upon the quality of the cream; second, upon the kind of market for the butter; third, upon the amount of hand separator cream when compared with the amount of cream from the milk, and, fourth, upon general creamery conditions, writes C. Larsen of the Iowa Butter school.

If the cream comes to the creamery in just as good condition as that obtained from the whole milk skimmed at the factory, then there is no danger of mixing the two kinds of cream, while, on the other hand, if it comes in a poor condition, as most hand separator cream does, then precaution should be taken. A buttermaker friend told the writer a short time ago that he favored the mixing of the two kinds of cream because if the hand separator cream was churned separately it produced a quality of butter which was very poor, while, on the other hand, if the two were mixed a better quality as a whole was obtained. There is no question that the above is true, but evidently if the butter from the hand separator cream was raised that from the whole milk was lowered, so the quality of butter received from both was poorer than that which could have been obtained from the whole milk if kept separately.

If the creamery operator is working strictly for quality and the butter is sold on that basis, then it certainly would not be a good idea to mix the two. On the other hand, if the butter is sold on a market where the butter is not graded closely, then it might pay. By mixing the two it might be possible to raise the quality so as to bring all of it on the market at so much above creamery extras, while if the cream from the whole milk was kept separate perhaps no greater price could be obtained for that butter. If the butter from the poor hand separator cream was placed on the market by itself, evidently it would not command the same price as that made from the whole milk or the mixed.

Decline of Oleomargarine.

Previous to the enactment of the new oleomargarine law the annual output of the "oleo" factories in the United States amounted to 126,300,000 pounds. During the year after the passage of the law there was manufactured only 71,200,000 pounds, showing a decrease of 44 per cent. This law is a blessing to the dairy industry.

Forage Crops and the Silo

Alfalfa may be sown in the early spring, or if the land contains enough moisture to germinate and develop the young plant it may be sown in the fall. If fall sowing is practiced it should be done in August or the first part of September, so that the plants will make sufficient growth in the fall to enable them to withstand the winter. Alfalfa is usually seeded at the rate of twenty pounds of seed to the acre.—Farmer's Advocate.

Rye a Milk Producer.

For fall and very early spring pasture rye is doubtless the best crop that can be used. Winter wheat is also useful for this purpose, but where pasture alone is desired more can be obtained from rye, says T. M. Lyon of Nebraska experiment station. From the middle of September until the middle of May or even later cattle may be pastured on rye. Experiments have shown rye when pastured to induce a large flow of milk and butter fat. In this respect it is one of the best of the annual forage plants. Some think for this purpose rye is best seeded with a press drill at the rate of one and one-half bushels of seed per acre about the latter part of August or first part of September. For hay rye is not so desirable as many other crops.

Corn For Summer Feeding.

Among the varieties of corn best suited for supplementary feeding with pasture is the Thoroughbred White Flint, says Dr. Voorhees of the New Jersey experiment station. First, because it is a rapid grower and will be ready for feeding if planted early by the middle or latter part of July, and second, because it stools largely and does not make coarse, heavy stalks, thus permitting of its entire consumption by the cattle.

Silo For Ten Cows.

A silo for ten cows will be 12 by 25 or 30 feet. The height is not so important so it is above twenty feet, says a correspondent of Farmer's Advocate. The higher the silo is the more pressure can be obtained and the better the silage will keep. A silo of the size given will hold fifty tons if twenty-five feet deep and will feed ten cows ten months. In case there is any silage left when grass comes it will keep until fall or can be used in the summer for silage purposes in case the grass becomes dry and short. I give the diameter twelve feet because the ensilage in a silo of less diameter does not keep so well.

Mixing Corn and Sorghum.

In answer to the query. What do you think of planting two rows of corn to one of sorghum for filling a silo? Hoard's Dairyman says: We do not know that there would be any gain in planting corn and sorghum in such a manner. Sorghum does not make as good silage, but in some localities an under some conditions, especially in dry seasons, sorghum will make the larger yield. It is therefore the custom of some farmers to plant more or less sorghum. Sometimes in harvesting they mix the corn and sorghum by cutting alternate loads into the silo, and at other times they put in the corn by itself and then the sorghum and finish out with more corn.

MICHIGAN MATTERS

Items of General Interest to Our Own People Received by Telegraph.

STATE HAPPENINGS RECORDED

News of Michigan Prepared for the Benefit and Convenience of Our Readers.

Bay City, Mich., June 20.—Sugar beets are thriving at present, the warm weather bringing the young plants out of the ground with a rapidity that is pleasing to the farmers. A gentleman conversant with the situation says he has made several trips to farms adjacent to the city and has found without exception that the beets are in better condition now than at this season for the past three seasons. The rains of the early spring gave the farmers a temporary chill, but the warm weather has caused their gloom to disappear.

Says the City Dads Were Rude.

Bay City, Mich., June 20.—Mrs. Victoria Meyers is suing the city for \$5,000 damages for injuries resulting from falling into a catch basin on Saginaw street. The aldermanic committee reported that Mrs. Meyers did not receive them very cordially, and would not speak, on the advice of her attorney, H. C. Haller. The latter says the aldermen were extremely rude, and as Mrs. Meyers was sick from the effects of the fall the aldermen's cross-fire of questions tired her out. The case will go to the courts.

Bay City People Raise Sheep.

Bay City, Mich., June 20.—Five carloads of sheep and lambs, more than 3,000 head, passed through here last week to Alcona county. A number of Bay City people are interested in sheep raising in that district on a large scale, and the success of the first venture has been such as to induce others to enter the field. The herders are mostly Bay City residents.

Salt Plant To Be Rebuilt.

Bay City, Mich., June 20.—The Michigan Manufacturing Co.'s salt making plant on the middle ground, recently destroyed by fire, will be rebuilt. The plant is owned by the Nelson, Morris & Co., of Chicago, meat packers. The fire loss has been adjusted at \$57,000.

Opening a New Coal Mine.

Bay City, Mich., June 20.—Work has been begun on another coal mine on the Saginaw county line, south of this city.

HOSPITAL CORPS IN CAMP

First One Ever Organized for the Michigan National Guard To Be at Work This Summer.

Lansing, Mich., June 21.—Dr. Ralph C. Apter, of the medical staff of the Second Regiment of the Michigan National Guard, has been directed by Brigadier General William T. McGurkin to recruit a regimental hospital corps to go to camp with the military companies this summer. This hospital corps will be the first organized in the Michigan National Guard. General McGurkin suggests that selections be made from among medical students and drug clerks.

It has been the custom to detail privates to this work, and sometimes the work was distasteful to the men so detailed, and they were not particularly suited to the work. Under the present plan the men will be picked and recruited for this one purpose, and when they enlist it will be in the hospital corps and not in the regular ranks.

Mistrial for Conger.

Grand Rapids, Mich., June 17.—After being out twenty-four and one-half hours the jury in the case of E. D. Conger, manager of The Herald in this city, charged with conspiracy in connection with the Lake Michigan water deal, came into court and reported a disagreement. They were discharged. It is learned that the final ballot stood six for acquittal, five for conviction and one blank. The next case for trial is that of Charles S. Burch, manager of The Evening Press.

Will Entertain 1,000 Friends.

Kalamazoo, Mich., June 17.—President S. J. Dunkley, of the Dunkley-Williams company, will entertain in a novel manner next Sunday. Invitations have been issued to 1,000 friends and acquaintances in Kalamazoo to be his guests. He will take the guests from Kalamazoo to South Haven, and then they will be taken on the steamer City of South Haven to St. Joseph, where the day will be spent.

Doctor "Looped the Gap."

Charlotte, Mich., June 20.—Dr. W. H. Rand, while making a call with his automobile ran into a telephone pole and broke the pole entirely off and never damaged his machine aside from the dashboard. The doctor proved himself the equal to the average circus performer by "looping the gap" and landing on his stomach some distance ahead.

Four Drowned in Teal Lake.

Marquette, Mich., June 21.—Mrs. Archie Orr, Gordon Piper, Florence Crane and Roy Mitchell, all of Negaunee, were drowned in Teal Lake at Negaunee, a small capsizing the boat. A boy of the name of Rankin, of Marquette, another member of the party, saved himself and Beatrice Crane, a younger sister of Florence.

DISTINCTION OF C. E. HILLS

Enlisted in the Union Army When He Was But 13 Years Old—Michigan G. A. R. Encampment.

Battle Creek, Mich., June 18.—C. E. Hills, of this city, is very proud of the fact that he was the youngest veteran at the state G. A. R. encampment just closed, and probably the youngest man who saw active service in the war of the rebellion. The question of age came up often, but not one of all those who compared records with him but were most four years older. Hills enlisted in Toledo, O., under Provost Marshal Kent on Jan. 18, 1864. He was 13 years of age on the Christmas before.

Governor Bliss, Senator Russell A. Alger and Congressman Washington Gardner walked in the old soldiers' parade. The Detroit man put up the most soldierly appearance of the three soldier-politicians, walking as straight as if his years were less than half the number. He was crowded closely by Representative Gardner, who is a fine-looking man. The three received much attention. The parade is said to have been one of the largest ever held by the organization.

Major George H. Hopkins, of Detroit, was the only candidate for commander when it came to the election of officers, and he was elected unanimously. The other officers were chosen as follows: Senior vice commander, John J. Cornwell, Battle Creek; junior vice commander, D. J. Wilson, of Jackson; chaplain, Rev. William Putnam, of Lansing; medical director, W. W. Root, of Mason.

SALARIES OF THE POSTMASTERS

Michigan Men Think That Those of the Third and Fourth Classes Are Not Adequate.

Lansing, Mich., June 20.—The postmasters of Michigan, especially the third and fourth class men, think they have a grievance against Uncle Sam, and it was voiced by President W. E. Holt, of the State Postmasters' association, in his address to the convention. He said there were many inequalities in the service, that fourth-class postmasters get inadequate salaries and that some third-class offices should have allowance for additional clerk hire.

He said rural free delivery had deprived many small offices of a large share of their receipts and that several hundred fourth-class offices had been closed in consequence. The postmasters were entertained at the Industrial School for Boys.

Weaver Had a Close Call.

Flint, Mich., June 21.—Marcus Weaver, a section hand on the Grand Trunk railway, whose home is at Duffield, was thrown from the rear platform of a caboose in the yards here, when a loaded car struck the caboose. He fell in front of the moving car, but was just over the rail. So close was he to the moving wheels that the brim of his hat touched the wheels as the car went by. Weaver received some very severe bruises and will be laid up several weeks.

He Stole His Oration.

Ladington, Mich., June 20.—Claude Watson has been convicted of plagiarizing bodily from Ridpath's history in his prize oration on "Monarchy of Man, or a Plea for Republican Government," which won for him the first prize in both the state and district high school oratorical contests at Muskegon May 13. Watson represented Alma college.

Time Cut to Five Days a Week.

Escanaba, Mich., June 20.—After cutting the working day from nine to eight hours three weeks ago the Northwestern railroad officials have instituted a five-day working week in all of the company's shops here. Over 250 men are affected and the cut came without notification of any kind.

Why Dr. Alice Resigned.

Ann Arbor, Mich., June 17.—Dr. Alice Gray Snyder, who recently resigned her position as director of the Women's gymnasium of the University of Michigan, was married Wednesday to Dr. Hugh Thompson, a physician of New York city, at the home of Seth Snyder in Coshocton, O.

New Town: Name, Oleogarry.

Sherman, Mich., June 18.—The Manifeste and Northeastern has platted the land one mile west of town where it will locate a station, and it has named the site Glengarry. It is now handling all the freight in and out from that point and for that purpose keeps an agent there permanently.

Kohn To Do the Continuous.

Kalamazoo, Mich., June 20.—Harry Kohn, wanted in half a dozen states, was arrested by Sheriff Shipman, of Kalamazoo, at the door of the Joliet (Ill.) prison, where he had just finished a term for forgery. Kohn will be tried here for forgery committed seven years ago.

Coal Found Near Standish.

Standish, Mich., June 20.—A series of shafts is being sunk along the Rifle river, north and east of here, for coal. Some very good samples have been taken out in the past and it is thought that large beds of fine coal underlie this section.

She Wants to Keep the Child.

Pontiac, Mich., June 17.—Nina B. Corey, who has filed a bill for divorce from Walter B. Corey, has also applied for an injunction to restrain the husband from running away with their child. Judge Smith granted the injunction.

Curiosity Over an Alleged Poisoner.

Coldwater, Mich., June 17.—Many women are being drawn into court to see Mrs. Katie Ludwick, the alleged 18-year-old murderer of her husband of three weeks. The lawyers are having a hard time finding suitable jury.

HARDY RHODODENDRONS.

Collected and Shipped From Their Natural Habitat—The Hybrids. While the hybrid rhododendrons must produce the varied coloring that is sought for from this class of plants.

RHODODENDRON HYBRID MINNEAPOLIS. of Kalmia latifolia, have become an industry of considerable importance where these plants grow naturally.

Rhododendron maximum will stand shade with less injury than any other species, though, on the other hand, it will thrive in sunny exposed situations where few other plants will succeed.

Rhododendron maximum ranges in its native growth from Nova Scotia to Georgia, there being one or two isolated groups of the plants reported in Nova Scotia.

In southern Rhode Island occurs a considerable tract, and they are shipped in considerable quantities from this source. The range in color of Rhododendron maximum is from pure white to dark rose.

American Gardening, the source of the foregoing, gives a list by W. Butcherbach of New Jersey of what have proved the twelve best hardy hybrid varieties with him, including the one illustrated: Boule de Neige, white; Mme. Masson, white with yellow streaks; Michael Waterer, scarlet; Minnie, pink and orange spotted; Sir Charles Napier, rose; Vanhau, mauve and yellow blotches, a fine flower; Stella, lilac; Sir Robert Peel, crimson; Joseph Whitworth, purple; Blatteum, a beautiful, large crimson of fine form; Limbatum, bluish; Quadroona, rose.

Leaf Spot of the Currant. The fungi causing leaf spot of currant and gooseberry are common and destructive to the foliage.

FILLMORE CENTER.

The above cut does not represent our horse.

CORRESPONDENCE.

NEW HOLLAND.

Mrs. D. P. De Jong and Mrs. R. A. Hyma of Zeeland, spent last week Tuesday with friends here.

Henry Van Slooten of Pocatello, Idaho, and his mother and sister spent a few hours with Dr. and Mrs. J. W. Vanden Berg last week Tuesday. Mr. Van Slooten taught the school here for two years previous to going to Idaho.

John Meeuwse, Henry Siersema and Dr. Van den Berg attended the fair meeting at Holland on Monday.

Henry Van den Berg, who is attending the medical department at the state university, arrived home Friday for a short vacation. He will return Tuesday for the summer school which lasts six weeks.

At a general meeting held Saturday evening at our school for the purpose of receiving reports of all the committees which were appointed to act for our 4th of July celebration, all reported favorably and we can now expect a good time. Hon. Myron H. Walker of Grand Rapids will be the orator of the day and all should come to hear the able speaker. The Crisp cornet band has been secured to furnish the music from start to finish. Good stands will be on the grounds to furnish refreshments and a good program has been arranged. The committee on fireworks have made a good selection and you should not miss it but come and be satisfied. Our fire chief expects to be ready with his men in case of fire and we generally have one on such a day. The following are the officers of the day: President, J. W. Vanden Berg; vice-president, Henry Siersema; chaplain, Rev. A. Strabbing; marshal, John Meeuwse; secretary, Miss Henrietta Stegenga; treasurer, K. Weener.

Mrs. Bert Underhill of Holland and Henry Van den Berg and sister Ethel of this place, made a good catch of perch at Macatawa Park, Monday.

Farmers are complaining about the dry spell. Pickles and beets are not doing as well as usual on this account.

The flag staffs here were taken down Friday to be repainted, and new ropes were put in. They will look better on the 4th.

Fight Will be Bitter.

Those who will persist in closing their ears against the continual recommendation of Dr. King's New Discovery for Consumption, will have a long and bitter fight with their troubles, if not ended earlier by fatal termination. Read what T. R. Beall of Beall, Miss. has to say: "Last fall my wife had every symptom of consumption. She took Dr. King's New Discovery after everything else had failed. Improvement came at once and four bottles entirely cured her." Guaranteed by W. C. Walsh, Druggist. Price 50c and \$1.00. Trial bottles, 10c.

DRENTHE.

Drenthe will celebrate. Everything is getting in trim for it. The day will be spent in a most pleasant way. Two orators have been asked and many of our young people take part in the program. Our music will no doubt be good, both instrumental and vocal. Drenthe has a fine chance for a glorious 4th, come all and make it a success. Not only the program but the amusements will be good; the fireworks will surely be of a delight to all. Take your friends. It will be a regular 4th of July basket picnic. Bring the children, let them have a day of mirth, tell them about the 4th and why we celebrate. Come one, come all, and celebrate the day with us.

Mrs. H. Mast had her barn raised last Tuesday.

Quite a number of our Drenthe folks went to Salem to attend the graduating exercises, June 10.

Our factory will soon start up to can peas. This is a promising crop.

Annis Kamps, the only child of the 8th grade, passed a very successful examination and has her diploma. Success.

Eddie Hunderman, Ted De Vries, Tony Ver Hulst, Jacob Wiggers, Jemima Strabbing, Maggie Kaslander, Gerrit Branderhorst and Bert Roelofs are home from their summer vacations. De Vries and Roelofs are graduates.

While Dr. Rooks was tending to a horse, last week, the animal jumped up and fell down to the ground, so that Jacob Roelofs had to suffer a broken leg. Dr. Broer was immediately called to attend.

George De Vries, who has been confined to his home, is improving nicely.

A Frightened Horse.

Running like mad down the street, dumping the occupants, or a hundred other accidents are every day occurrences. It behooves everybody to have a reliable Salve handy and there's none as good as Bucklen's Arnica Salve. Burns, Cuts, Sores, Eczema and Piles disappear quickly under its soothing effect. 25c at W. C. Walsh's Drug Store.

FAROWE.

Last week Thursday occurred the funeral of an old pioneer, H. J. Newenhouse. He died at the insane asylum at Kalamazoo, where he was brought a week ago. He is survived by a wife and nine children: Mrs. J. Bergsma, Mrs. Kemp, Mrs. B. Fisher, Mrs. E. Niggle, Bert, John, Henry, Reka and Alice. The funeral was largely attended. It was held at the South Blendon Reformed church, the Rev. D. Scholten officiating. Interment at Blendon cemetery.

Mrs. Jacob Van Eyck of Holland, visited relatives here a few days.

The Rev. William Stegeman of Perkins, South Dakota, visited relatives here.

The farmers here are all longing for rain.

Sadie and Reka Nieuwsma left for Holland Saturday to spend the summer.

GRAAFSCHAP.

At the Republican county convention held at Allegan some days ago, Bert Bunker and Gerrit Sink were among those elected as delegates to the state convention and J. H. Slotman, Gerrit Hagelskamp and Henry Lubbers among the delegates to the judicial convention to be held at Saginaw, Sept. 7th.

A Costly Mistake.

Blunders are sometimes very expensive. Occasionally life itself is the price of a mistake, but you'll never be wrong if you take Dr. King's New Life Pills for Dyspepsia, Dizziness, Headache, Liver or Bowel troubles. They are gentle yet thorough. 25c at W. C. Walsh's Drug Store.

M. M. Austin of Winchester, Ind., knew what to do in the hour of need. His wife had such an unusual case of stomach and liver trouble, physicians could not help her. He thought of and tried Dr. King's New Life Pills and she got relief at once and was finally cured. Only 25c, at W. C. Walsh's Drug Store.

LOST.
Saturday, on the road between Holland and East Holland, a puppy, black and brown breast, with white toes. Return to 147 West Fifteenth street.

There's nothing like doing a thing thoroughly. Of all the Salves you ever heard of, Bucklen's Arnica Salve is the best. It sweeps away and cures Burns, Sores, Bruises, Cuts, Boils, Ulcers, Skin Eruptions and Piles. It's only 25c, and guaranteed to give satisfaction by W. C. Walsh, Druggist.

It's a mistake to imagine that itching piles can't be cured; a mistake to suffer a day longer than you can help. Doan's Ointment brings instant relief and permanent cure. At any drug store, 50 cents.

No one would ever be bothered with constipation if every one knew how naturally and quickly Barcock Blood Bitters regulates the stomach and bowels.

Dr. Porter's Cough Syrup
Cures all CHRONIC COUGHS.

FRUIT AND FLOWERS

BIRDS AND INSECTS.

A Presentation of the Fruit Grower's Case Against the Birds.
We have actually listed 8,500 species of insects from New Jersey, and at least 500 more will be found, but of these less than 10 per cent are in any way injurious to the agriculturist. Of the injurious species none of our scales is food subject for birds, and few of our injurious plant lice.

Now, a bird is not beneficial to the agriculturist merely because it eats insects—in fact, its habits may be such that it is really injurious. To be of direct benefit to the fruit grower a bird must feed upon insects that cause him injury. An excellent example of this type is the American cuckoo, which feeds by preference upon tent caterpillars, fall webworms and other hairy larvae. This bird is not a fruit eater at any time; hence its benefits are positive, and it deserves every possible encouragement.

Many insectivorous birds are indiscriminate feeders. They take anything that comes in their way, and some of them eat more beneficial and harmless species than those that are harmful. In fact, this must be so if we consider the small number of really injurious forms in proportion to the whole number.

As a matter of actual fact, is the grower of tree fruits actually beholden to birds in any way and could he not do entirely without them?

Not a bird tackles the San Jose or pernicious scale or any of the other fruit scales. I know of none that eats apple lice, peach or other root lice or grape leaf hoppers. There is no bird that gets effectively at the peach borer, none that digs out the round head apple borer, none that gets at the sinuate pear borer, none that takes the pear psylla, none that eats curculionids enough to save a plum crop and none that exercises any effective control over the codling moth. Now, here we have most of our chief orchard pests, and if every bird were given an absolutely free hand and if each did its best the fruit grower would yet be apt to lose fruit or tree, or both, according to the species of insect involved.

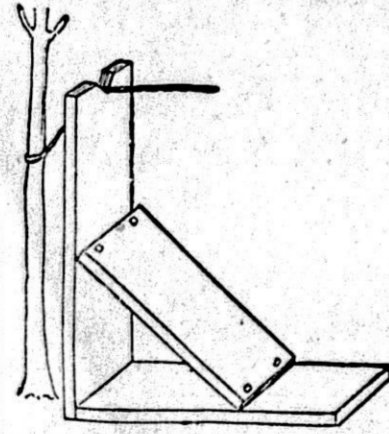

In other words, no matter how many birds are in an orchard, the fruit grower would yet have to spray just exactly as he does now, and were every bird removed he would not have to spray much, if any more.

The robin is especially mentioned here because this bird has become so numerous and so bold in our state that it is now a veritable pest to the fruit grower. All kinds of small fruits are taken, beginning with strawberries and cherries in spring and ending with grapes in the fall. Thousands upon thousands of dollars' loss was caused by them in the summer of 1903. It is fair to question what benefit they rendered in return.

The answer is positive. To the horticulturist they rendered none at all. In the entire list of insects found in robin stomachs there is none that is a real orchard pest, and there are none that feed upon small fruits that could not have been much more cheaply controlled by the horticulturist had they occurred in troublesome numbers. I would not for a moment suggest any general relaxing of the protection now accorded to any bird, but it is fair to realize that as some of the protected birds make no return for the fruits they destroy the fruit grower should be allowed to protect his property, but no more. There should be no opening that would allow of wanton destruction.—Dr. John B. Smith, Entomologist of the New Jersey Experiment Station, Before the State Horticultural Society.

To Lift Out a Tree.

The jacking shown in the illustration is used for lifting out dead peach stumps and small grubs of all kinds. Any handy man can make one. The upright is two and a half feet long, three inches thick and eight inches wide. The bottom plank is one and a half feet long and the same dimensions as the upright. The brace is of same

FOR LIFTING OUT A TREE.

material and is twenty-two inches long and put in place as shown in the cut. Cut into the upright and the base enough to give a good shoulder to the brace. Secure the same with one and a half inch bolts, and if made of good hard wood it will stand the strain of the strongest team, according to American Agriculturist. The advantage of the jack is that it raises the object to be pulled straight up.

The Effective Gladiolus.

One of the most attractive and effective of flower beds is that of gladiolus. Under the manipulations of the hybridizer gladiolus has developed a flower stalk varied in form and color beautiful beyond expectations. Under good cultivation the bulbs increase rapidly, and large showy beds in the lawn or garden are possible with a small outlay of money.

FRUIT AND FLOWERS

CHERRY CULTURE.

Crops That May Be Grown in the Orchard—Use of Disk Harrow.

For the first five years the cherry orchard should be kept cultivated. But at the same time nearly enough vegetables, root crops or small fruits may be grown to pay for the cultivation. Potatoes, beans, beets, carrots and squashes make ideal crops for young orchards. They are low growing, require hand cultivation and do not impoverish the land. Strawberries, raspberries and blackberries are sometimes successfully grown in young orchards. They should never be allowed to grow less than four feet from a tree and as the trees grow and take

WEIR'S NO. 29.

the ground they should be removed from the orchard altogether. Oats, wheat or field corn should never be grown in a cherry orchard under any consideration.

For the cultivation of the orchard it is always an advantage to have the rows farther apart one way than they are the other. This only permits of cultivation one way, but with a small amount of hand work the orchard can be kept clean.

After the first five years the cultivation of the orchard depends somewhat on circumstances. If the soil of the orchard is very rich and the trees are making too vigorous growth or the ground is so situated that it is liable to be washed by rains, it is best to seed the ground to clover, orchard grass or timothy and to keep it in sod for three or four years. In no case should a heavy blue grass sod be allowed in the orchard. While the orchard is seeded down the grass should be kept mowed and the trees heavily mulched.

If the ground is of medium fertility and is not subject to washing, it is better to keep the orchard cultivated, and after the fifth year nothing should be grown in the orchard. The ground should be plowed shallow or disked in the spring and kept stirred until the middle of July and then seeded to a cover crop. One of the best implements for orchard cultivation is the extension disk harrow, of which there are several makes. These permit working the ground close to the trunks of the trees without danger of injury from the bars or singletrees rubbing the trees.

The fruit shown is Weir's No. 29, or Northwest. It originated with Mr. D. B. Weir of Illinois. The fruit is round, obscurely heart shaped, one and a quarter to one and a half inches; skin moderately thick, color dark red to almost black at maturity, stone small, flavor acid and slightly astringent, quality medium, season a little earlier than Early Richmond. The tree resembles English Morello very much in size and habit of growth.

Many growers prize this cherry highly, believing that its productiveness, good size and color recommend it for commercial orchards.

Rhododendron, or Mountain Laurel.

Shipment of rhododendrons to the city markets is an industry recently developed in Wayne, Monroe and other mountainous counties of northeastern Pennsylvania. During the spring months many engage in digging these shrubs from the pastures and along the creeks and loading cars for shipment. The plants grow in bunches around which a string is tied to keep the branches together; then by means of axes the sod is cut around the base, and the plants and roots are removed from the ground with from twenty-five to forty pounds of soil and sod. The shrubs are sent to New York and other cities to be transplanted in public parks and on lawns. The rhododendron, or great laurel, is one of the most attractive and prolific shrubs native to the Pennsylvania mountain regions. Its magnificent white flowers, clustered in bouquets among dark green, velvety leaves, are in the fullness of beauty during July and August. Nowhere else does it grow in such luxuriance and attain so high a degree of perfection as on our Appalachian mountain slopes.—Cor. American Cultivator.

Some Good Old Roses.

For variety some of the old favorites of a few years ago might very well be resurrected and brought to the front. Some of them are so good that if they were offered us under a new name we would snap them up eagerly. Among them I would mention Mme. de Watteville, Mme. Hoste, Papa Gontier and Bon Silene. A grower in one of our western cities told me confidentially last spring that Bon Silene was one of the best varieties on the list. Meteor is still a good all the year round rose, and many who discarded it for Liberty are returning to their first love. If well grown La France would sell as well now comparatively as it did fifteen years ago.—R. Simpson.

ORDER OF PUBLICATION.

State of Michigan, the Probate Court for the County of Ottawa.

At a session of said court, held at the Probate office, in the City of Grand Haven, in said county, on the 14th day of June, A. D., 1904.

Present: Hon. Edward P. Kirby, Judge of Probate.

In the matter of the estate of William Zonnebelt, deceased.

Geertje Zonnebelt having filed in said court her petition praying that a certain instrument in writing, purporting to be the last will and testament of said deceased, now on file in said court be admitted to probate, and that the administration of said estate be granted herself or to some other suitable person. It is ordered that the 11th day of July, A. D., 1904, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition.

It is further ordered that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Ottawa County Times, a newspaper printed and circulated in said county.

EDWARD P. KIRBY,
Judge of Probate.
FANNY DICKINSON,
Probate Clerk.

MORE FIGHTING LOOMS UP AHEAD

Indications That Kuropatkin Will Have His Hands Full at the Front.

KUROKI AND OKU TO COMBINE

Explanation of the Jap Campaign in the Liao Tung Peninsula.

Oku Not to Attack Port Arthur, but Another Army Under Kogi-Lowes, at Vafangow—Skrydloff Squadron Safe.

Liao Yang, June 21.—A general engagement is proceeding near Kai-Chou. The first train bearing wounded men has passed through here, going northward.

Chefoo, June 20.—There is current here a Chinese rumor that the Japanese have captured one of the inner forts at Port Arthur, losing 1,000 men in the engagement. It cannot, however, be confirmed.

St. Petersburg, June 21.—The war office expects news of a fight with General Kuroki. It is believed that General Oku is pursuing General Stakelberg.

St. Petersburg, June 21.—The general staff believes it probable that Generals Kuroki and Oku are meditating a combined attack on General Kuropatkin before he is further reinforced.

Washington, June 21.—An explanation of the Japanese campaign on the Liao Tung peninsula, especially with reference to Port Arthur, is contained in an advice that has reached this city from a source believed to be absolutely reliable. The Japanese tactics which have so puzzled the Russians are intended to isolate Port Arthur, but do not contemplate an attack on the place by General Oku's army.

New Army to Attack Port Arthur.

The actual work of reducing Port Arthur will be confided to another Japanese army, under command of General Nogi, which will be landed on the peninsula (and indeed may even now be landed) at a point south of General Oku's position, and considerably nearer Port Arthur. On the 1st of June no less than twenty-six transports had been gathered at one of the Japanese ports to embark this army, and it is probable that the vessels attacked by the Vladivostok squadron were of this number.

Japs Advancing Northwest.

St. Petersburg, June 20.—Lieutenant General Sakharoff, in command of the First Siberian army corps, has sent the following dispatch to the general staff under date of June 19: "Since June 16 indications have begun to manifest themselves that the Japanese are preparing to advance by three roads to the northwest."

Casualties at Vafangow.

London, June 21.—A St. Petersburg dispatch says that General Kuropatkin has telegraphed to the emperor under date of June 18 that General Stakelberg reports that the Russian loss at Vafangow, after two days' fighting, was, so far as reported, 604 officers and men killed and 1,705 officers and men wounded. Tokio advisers say the Russian total loss in killed, wounded and prisoners will reach 10,000 at Vafangow, while the Japanese loss is less than 1,000.

Skrydloff's Ships Are Safe.

St. Petersburg, June 21.—Under date of June 21 Vice Admiral Skrydloff sent the following message to the emperor: "The cruiser division has returned to Vladivostok without losing any men or sustaining any damage."

JAPS LOSE TRANSPORTS AND MEN

Skrydloff's Squadron Sinks Two Ships Carrying 1,400 Soldiers.

Tokio, June 17.—There seems no doubt that the Russian Vladivostok squadron has been doing damage to the Japanese. The squadron has sunk, it is reported, two Japanese transports carrying 1,400 soldiers and a quantity of stores. The transports were the Hachihi and Sado. The captain of the transport Hino, who has arrived at Moji, reports that he saw the transport Hachihi, Captain Campbell, being attacked by a Russian warship with four funnels.

Details obtainable from the survivors of the ill-fated transports show that the Hachihi and the Sado met three Russian warships near Iki Island, at 10 o'clock Wednesday morning. The Russians fired on the Japanese ships and stopped them, and soon afterward they torpedoed and sank the helpless transports. Over 100 men escaped in the boats and landed in Japan. A message has been received here from Hagi, saying that the survivors of the Hachihi had drifted north to Shimonoseki and been saved. The transport Izumi is still missing.

Fatally Shot His Brother.

Rock Falls, Ill., June 21.—Edward Hardesty, 28 years old, a contractor and builder, shot and probably fatally wounded his brother George, aged 30, whom he accused of abusing their mother.

STILL FINDING BODIES

Search for Victims of the General Slocum Disaster Being Conducted All Along East River.

New York, June 21.—All along the East river, from North Brother Island down to what are known as the Sunk-

GRAPPLING FOR BODIES.

en Meadows, search was made for bodies of unfortunates who lost their lives in the disaster to the excursion steamer General Slocum last Wednesday. Although more than 630 bodies had been recovered, reports from the first few minutes of work added five more to the total.

These were found at widely separated points and the searchers were of the opinion that before the day ended the list of missing would be considerably decreased. They believe that the big steamers and other crafts will so stir up the water as to cause bodies lying along the bed of the river to rise to the surface.

New York, June 21.—The list of those who perished on the General Slocum is growing. Up to 1 a. m. today 102 additional bodies had been recovered. This brings the total number of bodies recovered up to 734, and yet there are something like 323 persons unaccounted for. A number of these are among the unidentified at the morgue and over on North Brother Island, and the "unrecognizable" that have been buried in the Lutheran cemetery on Long Island.

YOUNG MURDER CASE

Mrs. Nan Patterson Formally Arraigned on the Charge of Killing the Bookmaker and Pleads Not Guilty.

New York, June 21.—A formal plea of not guilty was made by Mrs. Nan Patterson, when she was arraigned in

NAN PATTERSON.

the court of general sessions, charged with the murder of "Caesar" Young, the bookmaker. At the same time counsel for Mrs. Patterson served notice on the district attorney that a motion would be made for the court to direct an early trial for the defendant.

He said that the physical condition of Mrs. Patterson was such that it was a hardship to keep her in prison, and said he would like to have the trial held in July. Judge Newburger said he was not going to sit next month and that it would hardly be fair to ask another judge to hear the case. He suggested that counsel confer and arrange for an early trial.

Woven Wire Fence Decision.

Joliet, Ill., June 21.—The Bates Machine company has been awarded \$55,800 damages against A. J. Bates in the Will county circuit court. The company claimed Bates' woven wire fence patents under a contract, but he disposed of the patents elsewhere, and the company sued for recovery. A. J. Bates will appeal to the appellate court.

Jury Could Not Reach Agreement.

Bloomington, Ill., June 21.—The jury in the case against Mrs. Annie Colton Works, of Helena, Mont., charged with the murder of her husband, Michael Colton, here in 1897, came in with the announcement of their inability to agree and were dismissed. A new trial will be necessary. The vote stood 8 to 4 for acquittal.

Fatal Fire at Cleveland.

Cleveland, O., June 21.—Two persons were burned to death and six others injured in a fire that partially destroyed a saloon and boarding house at 428 Columbus street. The dead are: Annie Movatski, 39 years old, domestic, burned to death; Fritz Wolf, 45 years old, porter, burned to death.

Derby Won in Record Time.

Chicago, June 20.—W. M. Scheffel's bay colt Highball won the seventeenth American Derby by one length and a half in front of Woodson; Rapid Water was third, a length back, with English Lad, the favorite, fourth. The time, 2:23, equalled the record; the race paid the winner \$26,575.

For some time to come the greater portion of the skim milk at creameries will be used as food for the lower animals. How to treat it so as to have it returned to the farmer in good condition is a very important question. Possibly I cannot do better than give an outline of the method followed in the dairy department of the Ontario Agricultural college, Guelph, Canada, says Professor Dean of that college.

The whole milk is heated by a Danish pasteurizer to a temperature of 180 to 185 degrees F. The milk flows directly into a cream separator, where the cream and skim milk part company. The skim milk drops into a small tank, and from there it is elevated by means of a rotary pump to a galvanized iron skim milk tank in the attic of the dairy building. Before the milk goes into the pipes some water is first pumped through in order to cleanse and wet the pipes. The pipes are also washed after the milk has been pumped. This is allowed to flow out of the skim milk tank before any milk goes in.

Once a week a strong soda solution is pumped through the pipes to cleanse them. As soon as there is sufficient skim milk for the patrons to begin drawing out they insert checks into a skim milk weigher, which delivers eighty-five pounds of skim milk for each 100 pounds of whole milk sent to the creamery. This hot skim milk is run directly into the patrons' cans, and we request them to set the skim milk in tanks of cold water as soon as they reach the farm and to keep the vessels clean into which the skim milk is put. By following this plan we have been able to furnish our patrons with a quality of skim milk nearly equal to hand separator milk.

Champion Guernsey Bull.

A magnificent specimen of the Guernsey breed is the bull Prince Rosendale 4291, says American Agriculturist, from which the illustration is copied. He is at the head of the herd of Clayton C. Taylor of Erie county, N. Y., and was bred in Wisconsin by Charles L. Hill. At the Pan-American he was the champion of the herd, winning twenty-two prizes on an exhibit of

PRINCE ROSENDALE 4291.

twenty-three head. He is a large, thrifty, vigorous animal of great substance and constitution, very deep bodied, good length and fine handler, large development and well placed rudimentaries and considered by many expert judges a wonderfully strong dairy type.

Speed in Milking.

The quicker the milker the richer the milk if the work is done well and completely. Two milkers, one rapid and the other slow, will get about the same quantity of milk, but the former will get more fat. The difference between a rapid and a slow milker counts in butter or money.—Dairy and Creamery.

Buying Dairy Cows.

In buying a dairy cow look well to the udders. They should be well up in front and high up in the rear, teats of good size and well placed and far enough apart so that the animal can be milked without constantly hitting knuckles, says Farmer's Advocate. Fat, fleshy udders are objectionable. They should milk down well and be soft and flexible, having plenty of tissue to perform their work. The price of ordinary cows ranges from \$30 to \$60, but there may be more profit in the \$35 one than in the one costing \$60. The main consideration is whether she will make 150 or 350 pounds of butter in a year or give 1,000 or 7,000 pounds of milk, and a difference of a few dollars is unimportant if you get the best cow for the expenditure.

Dairy Notes.

Since the largest amount of contamination comes from the udder during milking, it is important that all udders be washed before milking.

No product of the farm is a greater delicacy or more palatable than really gilt edge butter, and the time spent in learning to make it is profitably used.

If the buttermaker would thoroughly please his patrons and secure from them the highest prices, his butter must not only be of good quality, but uniformly good.

All dairy utensils and everything with which the milk comes in contact should be rinsed, thoroughly washed and sterilized after each using.

CREAMERY ICEHOUSES.

Modern Construction Favours Insulation of the Walls.

A reader of Cold Storage Inquires of that paper, "Can we build an icehouse for a creamery without covering the ice with sawdust or packing material of any kind?"

To this inquiry Madison Cooper, the refrigerating expert, answers: "It is comparatively simple to construct an icehouse even on a small scale, such as would be required by a small creamery, without using packing material around or on the ice. This can be accomplished by insulating the floor, walls and ceiling of the room with from ten to fifteen inches of mill shavings, dry sawdust, cut straw or any similar packing material. It is immaterial what form the building takes and whether built with gable roof or flat roof. If you use a flat gravel roof, it might be advisable to have an attic story above the ceiling of the ice room, which will give space for the circulation of the air by providing suitable ventilators on the ends and sides of the building. This will protect the ice room from the sun beating on the roof. A gable roof will give slightly better ventilation than a flat roof by placing a reasonably large ventilator at the peak of the roof and slit ventilators of liberal proportions at the ends. With a gable roof the ceiling of the ice room may extend up to the rafters and ventilators be placed in end of each gable. This makes an economical construction, more so than a flat roof. If you desire to make the building more fireproof than the shingle roof would be, the roof may be covered with slate or with galvanized iron.

"The construction of icehouses by insulating the walls instead of using covering material on the ice will be more universal in the future than in the past, even on the small capacity icehouses. The loss for meltage is no more than with the old method of covering the ice with sawdust or similar material, and the advantages are so great that, even though the building cost more at first, it would be cheaper in the end. In constructing a building with insulated walls care should be taken that the walls be made air tight both on the exterior and interior surfaces by using a good grade of insulating paper."

Feeding For Milk Production

Many farmers frequently feed pumpkins to dairy cattle with satisfactory results, while others feed them with comparatively little benefit, says Professor Watson of the Pennsylvania experiment station in American Agriculturist. It has frequently been observed that pumpkins may be fed with good effect if the cows do not have good pasture. Pumpkins are frequently given to dairy cows to supplement insufficient pasture during the latter part of the season. Undoubtedly they may be fed most advantageously in connection with other foods. Nearly all of the succulent cattle foods are fed with the greatest economy with other foods with the exception of pasture grasses and soiling crops.

Corn and Cob Meal.

The New Jersey experiment station several years ago made experiments to determine whether it is more economical to grind corn, cob and all, for milk cows than to feed ear corn. In this experiment one cow was fed twelve days ear corn that had been run through a feed cutter, and another was fed corn and cob meal. This process was then reversed, giving each cow the other form of grain. The yield of milk on the corn and cob meal ration was 9.3 per cent greater than with the ear corn, while the yield of butter fat was 4.9 per cent greater.—Breeder's Gazette.

Corn Stover For Cows.

Two hundred and eighty pounds of cornmeal and 392 pounds of wheat bran fed in connection with 2,374 pounds of corn stover produced at the Wisconsin experiment station 1,120 pounds of milk, from which fifty-seven pounds of butter were made.

Feed Ration For Dairy Cattle.

For dairy cattle, if it comes to a choice between bran and oats at \$22 for the former and \$25 for the latter, then the bran is much the cheaper, says Breeder's Gazette. By feeding the cows corn and cob meal, bran and oil-meal a highly satisfactory ration of concentrates may be prepared. Unless the cows are milking heavily a ratio of 1 to 6 is eminently satisfactory.

Cows on Pasture Need Grain.

Feed some grain to cows on pasture. It may not apparently be of advantage in the summer, but the cows will winter better.—Farmer's Advocate.

Supplemental Summer Feed.

Good pasture grass carries an ample supply of protein, but is deficient if at all in the carbohydrates. Theoretically this would call for corn alone, but we add bran to extend or dilute the concentrated ground corn. Also give the cows a little hay for its hygienic effect. Cows are as crazy for dry forage in summer as for grass in early spring.—Hoard's Dairyman.

Grinding Feed For Dairy Cows.

While there is considerable difference of opinion as to the advisability of grinding grain for some farm animals, it is generally conceded that it pays to grind for the dairy herd. A cow giving a large flow of milk needs all her energy to secrete her milk and to digest the large amount of feed which must be used for that purpose. It is for this reason important to make the process of digestion as easy and rapid as possible. A good grinder, with suitable power to run it, should be part of the equipment of every well conducted dairy farm.—Missouri Experiment Station.

OF LOCAL INTEREST.

Some People We Know, and We Will Profit by Hearing About Them.

This is a purely local event. It took place in Holland, not in Buffalo or New York. You are asked to investigate it. Asked to believe a citizen's word; to confirm a citizen's statement. Any article that is endorsed at home is more worthy of confidence than one you know nothing about, endorsed by unknown people.

Mrs. D. Van Houten, of 287 West 13th street, says: "I had constant heavy aching pains through the loins, in the muscles of my back and under the shoulder blades. My back tired easily from exertion and if I stooped or lifted anything heavy sharp twinges caught me in the region of my kidneys. I could not rest comfortably in any position and when I first got up mornings I felt as tired and worn out as I was the night previous. I tried a great many remedies, but if any of them benefited me it was very temporary. I was advised to use Doan's Kidney Pills and went to J. O. Doeburg's drug store and got a box. I did not take them long before I noticed an improvement which steadily continued until I was in good health."

For sale by all dealers. Price 50c. Foster-Milburn Co., Buffalo, N. Y., sole agents for the U. S. Remember the name, Doan's, and take no substitute.

FINE WATCH AND JEWELRY REPAIRING.

We are prepared to do the finest repairing on watches and jewelry that can be done anywhere. We have had years of experience as gold and silversmiths. We carry a fine line of watches and jewelry and will compete with any watchmaker or jeweler in the city. Our prices are reasonable. All work warranted. We have just received a splendid line of silverware. The finest repairing and engraving in the city.

C. Pieper & Son, 230 River St., Holland.

DAIRY LUNCH AND RESTAURANT

Lunches of all kinds and short order work. Billiards and Pool in connection. Convenient to stop at. 100 Monroe Street, Corner Ionian, GRAND RAPIDS, MICH.

Does your stomach trouble you? Are your bowels regular? Are you bilious? It cures Indigestion, Dyspepsia, Constipation, Piles, Biliousness, Headache. 25c per bottle at Heber Walsh's Drug Store.

QUESTIONS ANSWERED.

Yes, August Flower still has the largest sale of any medicine in the civilized world. Your mothers' and grandmothers' never thought of using anything else for indigestion or biliousness. Doctors were scarce, and they seldom heard of Appendicitis, Nervous Prostration or Heart failure, etc. They used August Flower to clean out the system and stop fermentation of undigested food, regulate the action of the liver, stimulate the nervous and organic action of the system, and that is all they took when feeling dull and bad with headaches and other aches. You only need a few doses of Green's August Flower, in liquid form, to make you satisfied there is nothing serious the matter with you. You get this reliable remedy at W. C. Walsh's. Price 25c and 75c.

Mary Jennings, N. Yamhill, Oregon—Could not get along without Rocky Mountain Tea. Makes women strong and beautiful. Keeps them well. 35 cents. Haan Bros.

Get a bottle of Rexall Cough Syrup for that cough. Satisfaction guaranteed; 25c at HAAN BROS.

House For Sale.

A fine nine room and basement brick house, on good residence street, for sale. Cement walks and everything first-class. For particulars apply at this office.

A Remarkable Record.

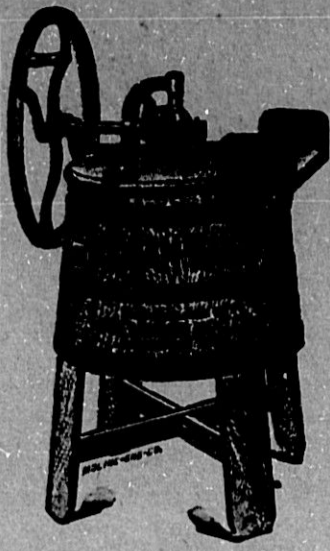

Chamberlain's Cough Remedy has a remarkable record. It has been in use for over thirty years, during which time many million bottles have been sold and used. It has long been the standard and main reliance in the treatment of croup in thousands of homes, yet during all this time no case has ever been reported to the manufacturers in which it failed to effect a cure. When given as soon as the child becomes hoarse or even as soon as the croupy cough appears, it will prevent the attack. It is pleasant to take, many children like it. It contains no opium or other harmful substance and may be given as confidently to a baby as to an adult. For sale by W. C. Walsh, Holland, Van Bree & Son, Zeeland.

While opening a box, J. C. Mount, of Three Mile Bay, N. Y., ran a ten penny nail through the fleshy part of his hand. "I thought at once of all the pain and soreness this would cause me," he says, "and immediately applied Chamberlain's Pain Balm and occasionally afterwards. To my surprise it removed all pain and soreness and the injured parts were soon healed." For sale by W. C. Walsh, Holland, and Van Bree & Son, Zeeland.

The differences of the Macatawa Park Co. and the Pere Marquette R. R. Co., have been settled and the Macatawa ferry boats will land at Ottawa Beach.
The West Michigan band has broken up and a new band has been organized with the following members: William Van der Hart, John K. Van Leente, Gerrit Van Leente, Albert C. DeVries, Albert Hoeksema, Tom Nienhuis, Cornelius Dalman, William Westveer, William Ten Brink, Marius Mulder, Henry B. Brikman, Henry Steunberg and Peter Notier.
The marriage of Arie Van Doesburg of this city and Miss Nellie Kammeraad took place Thursday evening last at their future home, 277 Pine street. The ceremony was performed by Rev. G. H. Dubbink. The bride is a daughter of Mr. and Mrs. B. Kammeraad, residing near Pine street. The young couple have the congratulations of a large circle of friends.

W. J. Danson, the postoffice clerk has received a raise in his salary from \$500 to \$600 a year.

Sugar beets are reported to stand well in the surrounding country. The sugar company with its additional sheds now can store 8,000 tons of beets.

Dr. Brulmsma of Olive was in town a few days ago with Myron Stevens, the latter, while cutting wood having cut off the first finger of his left hand.

The dredging at the harbor has made a 90 foot channel from 15 to 15 feet deep. The cut will be widened to 120 feet.

M. Jonkman has rented his house at 136 West 14th street to the new school principal, Mr. Lee. Mr. and Mrs. Jonkman will occupy their new house at 63 West 15th street.

Warm weather is coming. John Vanderaluis has prepared for it by putting in a stock of dimittes and lawns. He also has a line of hose for children which he is selling at 10c a pair.

N. Haan of Grand Rapids, aged 73 years, fell and broke his right arm a few days ago. He is the father of John and Jacob Haan, the druggists here.

W. H. Sutphin has bought about 3,000 pounds of wool this season. Outside buyers have been through the country and bought up nearly all of it.

Mr. and Mrs. Albert Veghter celebrated their fifth wedding anniversary Wednesday evening and entertained a large party of friends. Many tokens of regard were left by the visitors.

The corner stone of the new Dutch Reformed church at Graaafschap was laid Tuesday afternoon. Rev. Wolvius, Dr. N. M. Steffens and Rev. G. H. Dubbink conducting the services.

Members of the board of supervisors suggest that tramps sent to the county jail should be put in solitary confinement. It is believed this will help to overcome the tramp nuisance.

G. B. Wanders, who has been in company with Mr. Brower laying cement walks, has bought a 47 acre farm near Hamilton for \$2,000 and moved there Monday. A Mr. Vander Hoop has gone into partnership with Mr. Brower.

Miss Mae M. Sweemer, daughter of Dr. Wm. Sweemer, formerly of this city but now at Milwaukee, is a graduate at the School for the Deaf at Milwaukee. The commencement exercises take place June 30.

The residence of W. H. Horning, north side, was saved from burning Saturday by the timely work of several men. It is supposed that a spark from a beach train set the grass on fire near the house.

Miss Margaret De Roo and a number of friends gave a "kitchen shower" at her home Wednesday evening to their friend, Miss Alice Michmershuizen. The latter is to be married June 29 to Geo. Hyma.

Mr. and Mrs. J. W. Bosman celebrated the 51st anniversary of their wedding Monday, at their home, East Ninth street. The highly esteemed couple have the best wishes of the community.

Du Mez Bros are showing a well selected line of ladies' wash shirts, which are just the thing for warm weather. They come in a variety of styles and colors. See advertisement on last page regarding prices, etc.

The Ottawa County Sunday School convention re-elected the old officers: J. B. Wells of Coopersville, president; A. Lahuis, Zealand, vice president; J. C. Lehman, Coopersville, secretary and treasurer; Mrs. B. Dubbin, Coopersville, primary superintendent.

The Hope church parsonage will be remodeled and finished in first-class shape. Rev. J. T. Bergen has sold his residence on East Twelfth street to Rev. T. W. Hazenberg and the parsonage will again be occupied by Rev. Bergen.

The county Sunday school convention opened at Grand Haven Tuesday. There were about 1,500 in the line of parade. Henry Van der Ploeg headed the Holland delegation. The program included a song service led by Rev. T. W. Mullenberg, addresses, games, etc.

Gerrit Lugies of Filmore was adjudged insane in the probate court last Monday and was taken that afternoon to the asylum at Kalamazoo by Under-Sheriff Barney. This is the second time Lugies has been committed to the asylum.—Gazette.

The greenhouse property at Grand Haven which has for many years been occupied by George Hancock & Son, was sold at public auction Saturday for \$5,225 to Mrs. Buswell, the heirs of John T. Davis, deceased, and Margaret G. Davis, who held claims against it.

H. Van Dyk, the contractor, has finished the pavilion for P. McCarthy at Jensen Park, a cottage for J. Newton Ninde at Ottawa Beach, a cottage for Mrs. Fyfe at Evanston Park and is building a cottage for Mr. Crique at Macatawa Park.

Rev. James Wayer will be installed as pastor at the Ebenezer church on Thursday evening next. The services will be in charge of Rev. G. H. Dubbink, pastor of the Third Reformed church, Rev. DeJong of Zealand and Rev. James F. Zweekers.

Deputy Sheriff Richard Overweg has accepted a position as special night police at Macatawa Park during the resort season at a salary of \$50 a month and car fare. J. C. Brown is police officer at Jensen Park.

A beautiful alligator skin, 12 feet long is on exhibition in the window of the S. A. Martin estate drug store. The animal was caught by C. A. Bresie of Cleveland, O., and was tanned here at the Cappon & Bertsch tannery. It will be sent east to be made up into purses and goods for the holiday trade at that popular store.

Tony De Kruff, the wellknown Zealand druggist, was severely bruised Tuesday by being struck by a runaway horse. He was standing in the street with a friend when the runaway came along. Mr. DeKruff stepped aside but the horse swerved toward him and knocked Mr. De Kruff down. He is confined to the house but the injuries are not serious.

Rev. James Wayer of Muskegon and Miss Margaret E. Maring were married at Muskegon Thursday last. Rev. J. Luxen of that city and Rev. J. J. Van Zanten of this city performed the ceremony. They will make Ebenezer their home, where he has accepted the pastorate.

The severe drought has greatly hurt the strawberry crop and the fruit is not as plentiful as it was expected. The price has dropped to seven cents a quart retail. Hundreds of cases are brought in by the interurban line from Saugatuck and Douglas to be shipped from here by boat to Chicago.

Miss Bessie and Master Joie Hieftje are visiting relatives in Grand Haven.

Mrs. J. Hieftje returned Friday from a few days visit in Grand Haven, and while there she attended the graduation exercises.

Marshal Fred Kamferbeek and Deputy Van Oort drove to Waverly Wednesday and rounded up seven tramps. The marshal drove back to town while the deputy was to take the vags along the track to town. A freight train conveniently happened along and five of the tramps climbed aboard, the two remaining ones being crippled and unable to follow their comrades.

P. Verplank of Grand Rapids, last Tuesday formed a partnership with C. DeJonge of this place, known as the Verplank Mfg. Co., of which the first named is president and manager while Mr. DeJonge is secretary and treasurer. They will manufacture and design wood carvings, ornaments, etc., and will locate on the second floor of Mr. DeJonge's factory building on Main street for the present. Mr. Verplank was formerly of this place and is well known here. Success.—Zeeland Record.

C. J. Vander Vries, of Caledonia, has adopted a new way of advertising that will bring a crowd to town at least, if not paying results to his store. Last Saturday he threw twelve bundles of merchandise from the roof of his store building, letting the crowd play a game of grab. One of the packages contained a ten dollar suit of clothes. During the fun a band was employed to furnish music. The practice is to be continued.—Coopersville Observer.

The Pearle creamery is getting its business started in good shape and is evidently going to make a live of it. About 5,700 pounds of milk are taken in each day and from that about 275 pounds of butter are made. The butter is sold in Chicago on commission and were made on the basis of 17 cents per pound for the butter. The factory now has about 90 patrons and more are expected to come in soon.—Fennville Herald.

Come and join us in our Fourth of July celebration on which will be held under the auspices of the Anti-Saloon people. Fine music will be rendered by a brass band. The opening address will be delivered by Mayor Goering, president of the day. Other prominent speakers have been provided for. The band will play on the corner of River and Eighth street at 10 a. m., and from there will march to the beautiful grove, Lincoln Park, corner Ninth street and Columbia avenue, where the exercises of the day will be held. Bring your dinner basket with you. Coffee will be served free. All are invited.

June 17-18

It is said of John Wesley that he once said to Mistress Wesley: "Why do you tell that child the same thing over and over again?" "John Wesley, because once telling is not enough." It is for this same reason that you are told again and again that Chamberlain's Cough Remedy cures colds and grip; that it counteracts any tendency of these diseases to result in pneumonia, and that it is pleasant and sure to take. For sale by W. C. Walsh, Holland, and Van Bree & Son, Zealand.
