The screenshot shows the OSFHOME interface for the project 'Retractions Data Mining #1'. The top navigation bar includes 'OSFHOME', 'Search', 'Support', 'Donate', 'Sign Up', and 'Sign In'. Below the navigation bar, the project title 'Retractions Data Mining #1' is displayed with a 'Public' status and '0' views. The project metadata is repeated: Contributors: Quan-Hoang Vuong, Viet-Phuong La; Date created: 2019-02-26 06:26 PM | Last Updated: 2019-10-12 12:48 PM; Identifier: DOI 10.17605/OSF.IO/PBWV3; Category: Project; License: CC0 1.0 Universal. The 'Files' section shows a table of files:

Main Datasets:

- retrac-tion_18603.csv (version: 1).
- retrac-tion_18603.xlsx (version: 1).

Inspiration:

- RetractionWatch Database (Ivan Oransky and Adam Marcus)

Principles:

- An open database of productivity in Vietnam's social sciences and humanities for public use
- Survey data on Vietnamese propensity to attend periodic general health examinations
- Making social sciences more scientific: Literature review by structured data

Motivation:

- Breaking barriers in publishing demands a proactive attitude
- Open data, open review and open dialogue in making social sciences plausible

The project datasets, and associated files, have been used in such research studies as:

- The limitations of retraction notices and the heroic acts of authors who correct the scholarly record: an analysis of retractions of papers published from 1975-2019 (Dec 2019)
- Characteristics of retracted articles based on retraction data from online sources through February 2019 (Feb 2020)

Media mentions:

- LSE Impact of Social Sciences (Feb 20, 2020)
- The RW Daily (Feb 21, 2020)

The datasets and related files (including graphics) can be freely used as they are distributed under the Creative Commons License: CC0 1.0 Universal.
