TEXAS A&M UNIVERSITY
Libraries

Quick and easy access to disaster health information is needed during all four phases of the emergency management cycle:

- Preparedness
- Response
- Recovery
- Mitigation

Several organizations, including the National Library of Medicine (NLM), develop and provide authoritative, high-quality health information and tools for disaster management.

Match the app to your disaster management role!

Check out more apps on the ReDiReCT Disaster Response Toolkit!

Acknowledgments

ReDiReCT: Integrating NLM Resources into Disaster Preparedness and Response Cross-Disciplinary Training, has been supported in part or in full by Federal funds through the National Library of Medicine of the National Institute of Health under award number UG4LM012345 with the University of North Texas Health Science Center. The content is the responsibility of the authors and does not necessarily represent the official views of the NIH.
