of Prof. Vladimir M. Veliov

EDITED BOOKS

[119] Dynamic Games in Economics. Edited by J. Haunschied, V. M. Veliov, and S. Wrzaczek. Springer series Dynamic Modeling and Econometrics in Economics and Finance (to appear).

[118] Dynamic Optimization in Environmental Economics. Edited by E. Moser, W. Semmler, G. Tragler, and V. M. Veliov. Springer series Dynamic Modeling and Econometrics in Economics and Finance (to appear).

[117] Modeling Techniques for Uncertain Systems. Edited by A. B. Kurzhanski and V. M. Veliov. Progress in Systems and Control Theory vol. **18**, Boston, Birghäuser, 1994.

[116] Set-Valued Analysis and Differential Inclusions. Edited by A. B. Kurzhanski and V. M. Veliov. Progress in Systems and Control Theory vol. **16**, Boston, Birghäuser, 1993.

JOURNAL PUBLICATIONS

[115] Metric regularity and stability of optimal control problems for linear systems. *SIAM J. Contr. Optim* **51**, No 5 (2013), 4118–4137 (with M. Quincampoix).

[114] Optimal immigration age-patterns in populations of fixed size. *J. Math. Anal. and Appl.*, **405**, No 1 (2013), 71–89 (with C. Simon and B. Skritek).

[113] Needle Variations in Infinite-Horizon Optimal Control. In: Proceedings of the Contemporary Mathematics series of the AMS (IMCP/CONM), 2013 (to appear); Preprint: RR 2012-04, ORCOS, TU Wien, 2012, `http://orcos.tuwien.ac.at/research/research_reports` (with S. Aseev).

[112] An Euler-Newton continuation method for tracking solution trajectories of parametric variational inequalities. *SIAM J. Control Optim.*, **51**, No 3 (2013), 1823-1840 (with A. L. Dontchev, M. Krastanov and R.T. Rockafellar).

[111] Model predictive control, the economy, and the issue of global warming. *Annals of Operations Research*, DOI 10.1007/s10479-011-0881-8, 2012 (with T. Bréchet and C. Camacho).

[110] Markets for Emission Permits with Free Endowment: a Vintage Capital Analysis. *Optimal Control, Applications and Methods* **33**, No 2 (2012), 214–231 (DOI: 10.1002/oca.988) (with T. Bréche and T. Tsachev).

[109] Optimal education in an age-structured model under changing labor demand and supply. *Macroeconomic Dynamics* **16**, No 2 (2012), 1–15 (with A. Prskawetz and T. Tsachev).

[108] Maximum Principle for Problems with Dominating Discount. *Dynamics of Continuous, Discrete and Impulsive Systems, Series B* **19**, No 1–2b (2012), 43–63 (with S. Aseev).

[107] Optimal age-specific election policies in two-level organizations with fixed size. *Central European Journal of Operations Research* **20** (2012), 649–677 (with G. Feichtinger, A. Krasovskii and A. Fürnkranz-Prskawetz).

[106] Optimal control of heterogeneous systems with endogenous domain of heterogeneity. *Applied Mathematics and Optimization*, **64** (2011), 287–311 (with A. Belyakov and T. Tsachev).

[105] Metric regularity for Newton's iteration. *SIAM J. Control Optim.* **49** (2011), 339-362 (with F. J. Aragón Artacho, A. L. Dontchev, M. Gaydu and M. H. Geoffroy).

[104] Gustav Feichtinger celebrates his 70th birthday. *Central European Journal of Operations Research* **18** (2010), 437–451 (with H. Dawid, E. Dockner, R. F. Hartl, J. Haunschmied, U. Leopold-Wildburger, M. Luptacik, A. Mehlmann, A. Prskawetz, M. Rauner, G. Sorger, G. Tragler and F. Wirl).

[103] On the Relationship Between Continuous- and Discrete-Time Control Systems. *Central European Journal of Operations Research* **18** (2010), 511–523.

[102] Applying the Leitmann-Stalford Sufficient Conditions to Maximization Control Problems with Non-Concave Hamiltonian. *Applied Mathematics and Computation* **217** (2010), 1017–1022 (with G. Feichtinger and A. Novak).

[101] Metric regularity under approximations. *Control and Cybernetics* **38**, No 4 (2009), 1283–1303 (with A. L. Dontchev).

[100] Keeping a Learned Society Young. *Demographic Research* **20**, No 22 (2009), 541–558 (with H. Dawid, G. Feichtinger and J. R. Goldstein).

[99] On the Discretization of Switched Linear Systems. *Systems&Control Letters* **58** (2009), 395–399 (with A. Pietrus).

[98] Optimal Control of Heterogeneous Systems: Basic Theory. *J. Math. Anal. Appl.* **346** (2008), 227–242.

[97] Role of Endogenous Vintage Specific Depreciation on the Optimal Behavior of Firms. *International Journal of Economic Theory* **4**, No 3 (2008), 381–410 (with C. Saglam).

[96] Optimal Harvesting Time in a Size-Heterogeneous Population. *Ecological Modelling* **210**, No 1–2 (2008), 161–168 (with E. Gasca-Leyva and J. M. Hernandez).

[95] Financially constrained capital investments: the effects of disembodied and embodied technological progress. *Journal of Mathematical Economics* **44** (2008), 459–483 (with G. Feichtinger, R. F. Hartl and P. M. Kort).

[94] On a Distributed Control Problem Arising in Dynamic Optimization of a Fixed-Size Population. *SIAM J. Optim.* **18**, No 3 (2007), 980–1003 (with G. Feichtinger).

[93] Age specific dynamic labor demand and human capital investment. *Journal of Economic Dynamics and Control* **31** (2007), 3741–3777 (with A. Prskawetz).

[92] Prevention and medication of HIV/AIDS: The case of Botswana. *Central European Journal of Operations Research* **15**, No 1 (2007), 47–61 (with C. Almeder, G. Feichtinger and W. Sanderson).

[91] Cycles of violence: a dynamic control analysis. *European J. Oper. Res.* **181**, No 1 (2007), 350–361 (with J. Caulkins, G. Feichtinger and G. Tragler).

[90] Anticipation effects of technological progress on capital accumulation: a vintage capital approach. *J. Econom. Theory* **126** (2006), 143–164 (with G. Feichtinger, R.F. Hartl and P.M. Kort).

[89] Capital accumulation under technological progress and learning: a vintage capital approach. *European J. Oper. Res.* **172**, No 1 (2006), 293–310 (with G. Feichtinger, R. F. Hartl and P. M. Kort).

[88] Error analysis of discrete approximations to bang-bang optimal control problems: the linear case. *Control and Cybernetics* **34**, No 3 (2005), 967–982.

[87] Environmental policy, the Porter hypothesis and the composition of capital. *Journal of Environmental Economics and Management* **50**, No 2 (2005), 434–446 (with G. Feichtinger, R. F. Hartl and P. M. Kort).

[86] On the effect of population heterogeneity on dynamics of epidemic diseases. *Journal of Mathematical Biology* **51** (2005), 123–143.

[85] On the controllability of switching linear systems. *Automatica* **41**, No 4 (2005), 663–668 (with M. Krastanov).

[84] Optimal control of uncertain systems with incomplete information for the disturbances. *SIAM J.Contr. Optim.* **43**, No 4 (2005), 1373–1399 (with M. Quincampoix).

[83] Age-structured optimal control in population economics. *Theoretical Population Biology* **65** (2004), 373–387 (with G. Feichtinger and A. Prskawetz).

[82] Maximum principle for age and duration structured systems: a tool for optimal prevention and treatment of HIV. *Mathematical Population Studies* **11**, No 1 (2004), 3–28 (with G. Feichtinger and Ts. Tsachev).

[81] Newton's method for problems of optimal control of heterogeneous systems. *Optimization Methods and Software* **18**, No 6 (2003), 689–703.

[80] Optimality conditions for age-structured control systems. *J. Math. Anal. Appl.* **288**, No 1 (2003), 47–68 (with G. Feichtinger and G. Tragler).

[79] Solution tubes to differential inclusions within a collection of sets. *Control and Cybernetics* **31**, No 3 (2002), 847–862 (with M. Quincampoix).

[78] Optimal control in presence of unobservable uncertainties. *C. R. Acad. Bulgare Sci.* **55**, No 8 (2002), 11–16 (with M. Quincampoix).

[77] Optimal control of discrete-time uncertain systems with imperfect measurement. *IEEE Trans. Automat. Control* **47**, No 11 (2002), 1909–1914 (with R. Moitie and M. Quincampoix).

[76] Second-order Runge-Kutta approximations in control constrained optimal control, *SIAM J. Numerical Anal.* **38**, No 1 (2000), 202–226 (with A. L. Dontchev and W. W. Hager).

[75] On the effect of neglecting sensor dynamics in parameter identification problems. *SIAM J. Control and Optim.* **38**, No 4 (2000), 1309–1321 (with A. L. Dontchev and M. P. Polis).

[74] A dual method for parameter identification under deterministic uncertainty. *IEEE Trans. Automat. Control* **45**, No 7 (2000), 1341–1346, (with A. L. Dontchev and M. P. Polis).

[73] On qualitative stability in optimization and optimal control. *Set-Valued Analysis* **8** (2000), 31–50 (with A. L. Dontchev, W. W. Hager and K. Malanowski).

[72] Uniform convergence and mesh independence of the Newton method in optimal control. *SIAM J. Control and Optim.* **39**, No 3 (2000), 961–980 (with A. L. Dontchev and W. W. Hager).

[71] Open-loop viable control under uncertain initial state information. *Set-Valued Analysis* **7**, No 1 (1999), 55–87 (with M. Quincampoix).

[70] Control systems with constraints and uncertain initial conditions. *Pliska Stud. Math. Bulg.* **12** (1998), 1001–1014 (with M. Quincampoix).

[69] Discrete approximations of differential inclusions. *Mitteilungen der GAMM* **21**, No 2 (1998), 101–135 (with F. Lempio).

[68] Discrete approximations of differential inclusion. *Bayreuther Mathematische Schriften* **54** (1998), 149–232 (with F. Lempio).

[67] Stability-like properties for differential inclusions. *Set-Valued Analysis* **5**, No 1 (1997), 73–88.

[66] Convergence of the solution set of singularly perturbed differential inclusions. *Nonlinear Analysis, TMA* **30** (1997), 5505–5514.

[65] Generalization of the Tikhonov theorem for singularly perturbed differential inclusions. *J. of Dynamical and Control Systems* **3**, No 3 (1997), 291–319.

[64] On the time-discretization of control systems. *SIAM J. Control Optim.* **35**, No 5 (1997), 1470–1486.

[63] On the Lipschitz continuity of the value function in optimal control. *J. Optimization Theory and Applications* **94**, No 2 (1997), 335–361.

[62] On the stabilization problem for differential inclusions. *Comptes Rendus de l'Academie Bulgare des Sciences*, **49**, No 9–10 (1996), 51–54.

[61] Differential inclusions with stable subinclusions. *Nonlinear Analysis, TMA* **23**, No 8 (1994), 1027–1038.

[60] Computation of integrals of uncertain vector functions. *Interval Computations* (the present *Reliable Computing*) No 4 (1993), 143–153.

[59] Sufficient conditions for viability under imperfect measurement. *Set-Valued Analysis* **1** (1993), 305–317.

[58] Parametrisations of integrals of set-valued mappings and applications. *J. Math. Anal. and Appl.* **179**, No 2 (1993), 483–499 (with B. D. Doitchinov).

[57] Local controllability of state constrained linear systems. *Acta Universitatis Lodziensis, Folia Mathematica* **5** (1992), 103–112 (with M. Krastanov).

[56] Second order discrete approximations to linear differential inclusions. *SIAM J. Numer. Anal.* **29**, No 2 (1992), 439–451.

[55] Asymptotic procedure for solving boundary value problems for singularly perturbed linear systems with impulses. *Bull. Inst. Math. Acad. Sinica* **20**, No 3 (1992), 211–229 (with D. D. Bainov and M. A. Hekimova).

[54] Discrete Approximations to Integrals of Multivalued Mappings. *C. R. Acad. Bulgare Sci.* **42**, No 12 (1989), 51–54.

[53] Second order discrete approximations to strongly convex differential inclusions. *Systems & Control Letters* **13** (1989), 263–269.

[52] Asymptotic procedure for solving boundary value problems for singularly perturbed linear impulsive systems. *International J. of Theoretical Physics* **28**, No 2 (1989), 209–225 (with D. Bainov and M. A. Hekimova).

[51] On the controllability of control constrained linear systems. *Mathematica Balkanica, New Series* **2**, No 2–3 (1988), 147–155.

[50] Boundary value problem for a singularly perturbed system of linear differential equations with impulses. *Proceedings of the Edinburgh Mathematical Society* **31** (1988), 107–126 (with D. Bainov and M. A. Hekimova).

[49] On the bang-bang principle for linear control systems. *C. R. Acad. Bulgare Sci.* **4**, No 2 (1987), 31–33.

[48] On the convexity of integrals of multivalued mappings: applications in control theory. *J. on Optimization Theory and Applications* **54**, No 3 (1987), 541–563.

[47] Continuity of the family of trajectories of linear control systems with respect to singular perturbations. *Dokladi Acad. Nauk SSSR*, **293**, No 2 (1987), 274–278 (in Russian); English translation in: *Soviet Math. Dokl.* **35**, No 2 (1987), 283–286 (with A. L. Dontchev).

[46] Controllability of piecewise linear systems. *System & Control Letters* **7** (1986), 335–341 (with M. Krastanov).

[45] Singular perturbations in differential inclusions—I. Convergence of the Trajectories. *University Annual – Appl. Math.* **22**, No 4 (1986), 9–21 (with A. L. Dontchev, in Bulgarian).

[44] Singular perturbations in differential inclusions—II. Continuity of the Solution Set. *University Annual – Appl. Math.* **22**, No 4 (1986), 23–33 (with A. L. Dontchev, in Bulgarian).

[43] Singular perturbations in differential inclusions—III. Continuity of the marginal function. *University Annual – Appl. Math.* **22**, No 4 (1986), 35–45 (with A. L. Dontchev, in Bulgarian).

[42] A Regularized conditional gradient method applied to singularly perturbed optimal control systems. *Serdica Bulg. Math. Publ.* **11**, No 2 (1985), 180–185 (with M. G. Dmitriev and A. L. Dontchev).

[41] Singular perturbations in linear control systems with weakly coupled stable and unstable fast subsystems. *J. Math. Anal. and Appl.* **110**, No 1 (1985), 1–30 (with A. L. Dontchev).

[40] On the local properties of the Bellman's function for nonlinear time-optimal control problems. *Serdica Bulg. Math. Publ.* **10**, No 1 (1984), 68–77.

[39] On the behaviour of solutions of linear autonomous differential inclusions at infinity. *C. R. Acad. Bulgare Sci.* **36**, No 8 (1983), 1021–1024 (with A. L. Dontchev).

[38] Singular perturbations in Mayer's problem for linear systems. *SIAM J. Control and Optim.* **21**, No 4 (1983), 566–581 (with A. L. Dontchev).

[37] Singularly perturbed optimal control problems with fixed final state and constrained control. *Control and Cybernetics* **11**, No 1–2 (1982), 19–28 (with A. L. Dontchev).

[36] On the effect of the control inertianess in time-optimal control problems. *Serdica Bulg. Math. Publ.* **5**, No 4 (1979), 362–369 (with T. Gičev, in Russian).

[35] Estimations of the influence of regular perturbations and the inertianess in linear time-optimal control problems. *Univ. Annual – Appl. Math.* **15**, No 1 (1979), 83–97 (in Russian).

PAPERS IN BOOKS AND PROCEEDINGS

[34] The Euler Method for Linear Control Systems Revisited. In: Large-Scale Scientific Computing (Eds I. Lirkov, S. Margenov, J. Wasniewski) Lecture Notes in Computer Science, 2013 (with A. Pietrus).

[33] Pontryagin's type optimality conditions for a distributed control problem arising in endogenous growth theory. In: Large-Scale Scientific Computing (Eds I. Lirkov, S. Margenov, J. Wasniewski), Lecture Notes in Computer Science, 2013 (with B. Skritek and T. Tsachev).

[32] Adaptive Model-Predictive Climate Policies in a Multi-Country Setting. (with T. Bréchet and C. Camacho, to appear).

[31] Necessary optimality conditions for improper infinite-horizon control problems. In: Operations Research Proceedings 2011 (Eds D. Klatte, H.-J. Lüthi, K. Schmedders) Springer, 2012, 21–26 (with S. M. Aseev).

[30] High-order approximations of nonholonomic affine control systems. In: Large-Scale Scientific Computing (Eds I. Lirkov, S. Margenov, J. Wasniewski), Lecture Notes in Computer Science, vol. **5910**, Springer, 2010, 294–301 (with M. I. Krastanov).

[29] The role of information pattern in the approximation of control systems. Proceedings of BG SIAM'09 – 4nd Annual Meeting of the Bulgarian Section of SIAM, 20–21.12.2009, Sofia, 2010, 123–128.

[28] Prices Versus Quantities in a Vintage Capital Model. Dynamic Systems, Economic Growth, and the Environment. (Eds J. Crespo Cuaresma, T. Palokangas, A. Tarasyev) Series: *Dynamic Modeling and Econometrics in Economics and Finance*, Vol. **12**, (ISBN: 978-3-642-02131-2), Springer, 2009, 141–159 (with T. Bréchet and T. Tsachev).

[27] On the numerical integration of systems with deterministic uncertainties. Proceedings of BG SIAM'07 – 2nd Annual Meeting of the Bulgarian Section of SIAM, 20–21.12.2007, Sofia, 2008, C-64–C-67.

[26] Numerical optimal control of size-structured systems. In: Numerical Analysis and Applied Mathematics,(Ed. T. Simos) American Institute of Physiscs Coference Proceedings, vol. **936**, 2007, 590–592.

[25] Control of size-structured systems. Lecture Notes in Computer Science vol. **3743** (Eds I. Lirkov, S. Margenov, J. Wasniewski.) Springer, 2006, 263–270 (with O. C. Tarniceriu).

[24] Approximations with error estimates for optimal control problems for linear systems. In: Large-Scale Scientific Computing: 5th International Conference (Eds I. Lirkov, S. Margenov, J. Wasniewski), LSSC 2005, Sozopol, Bulgaria, June 6–10, 2005, Lecture Notes in Computer Science, vol. **3743**, Springer, 2006, 263–270.

[23] Sub-optimal control in presence of unobservable disturbances. In: Proceedings of the 44th IEEE Conference on Decision and Control, and the European Control Conference 2005, Seville, Spain, Dec. 12–15, 2005, 5877–5882 (with M. Quincampoix).

[22] Emission control in single specie air pollution problems. In: Advances in Air Pollution Modeling for Environmental Security (Eds I. Fargo, K. Georgiev, and A. Havasi) NATO Science Series, IV Earth and Environmental Sciences vol. **54**, Springer, 2005, 219–228 (with K. Georgiev and S. Margenov).

[21] Workshop on "Age-Structured Models in Population Dynamics and Economics", Vienna Institute of Demography, Vienna, Oct. 27–28, 2003. Vienna Yearbook of Population Research, 333–337, 2004 (with G. Feichtinger, A. Füernkranz-Prskawetz).

[20] Dynamic investment behavior taking into account aging of the capital good. In: Dynamical Systems and Control (Eds F. Udwadia et al.) Chapman & Hall/CRC, 2004, 379–391, (with G. Feichtinger, R. F. Hartl and P. M. Kort).

[19] On the stabilizability of control constrained linear systems. In: Numerical Methods and Applications (Eds I. Dimov, I. Lirkov, S. Margenov, and Z. Zlatev), LNCS 2542, Springer, 2003, 238–245 (with M. Krastanov).

[18] Viability with a target: theory and applications. In: Applications of Mathematics in Engeneering (Eds B. I. Cheshankov and M. D. Todorov) Proc. XXIII Summer School, Sozopol'97, Herron Press, Sofia, 1998, 47-54 (with M. Quincampoix).

[17] Attractiveness and invariance: the case of uncertain measurement. In: Modeling Techniques for Uncertain Systems (Eds A. B. Kurzhanski and V. M. Veliov) PSCT 18, Birkhäuser, Boston, 1994, 277–288.

[16] Perturbation techniques for uncertain dynamics and control. Proc. European Control Conference, Gröningen, 1993, 822–824 (with A. B. Kurzhanski).

[15] Funnel equations and regulation of uncertain systems. In: Set-Valued Analysis and Differential Inclusions (Eds A. B. Kurzhanski and V. M. Veliov) PSCT 16, Birkhäuser, Boston, 1993, 183–199.

[14] Approximations of control/uncertain differential systems by means of discrete-time systems. In: The Second Colloquium on Differential Equations (Eds D. Bainov and V. Covachev) World Scientific Singapore, 1992, 233–254.

[13] Parametric and functional uncertainties in dynamical systems: local and global relationship. In: Computer Arithmetic and Enclosure Methods (Eds L. Atanassova and J. Herzberger) Proc. of the Third Internat. IMACS-GAMM Symposium on Computer Arithmetic and Scientific Computing, Oldenburg, Germany, 1–4 October 1991, Amsterdam, North-Holland, 1992.
