- A response that has an overall effect on how the audit is conducted—that is, a response involving more general considerations apart from the specific procedures otherwise planned.¹¹

⁶ AS No. 5, paragraph 11.

⁷ Paragraph .85A.2 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

⁸ Paragraph .02 of AU sec. 110, *Responsibilities and Functions of the Independent Auditor*.

⁹ AU sec. 316.44.

¹⁰ AU sec. 316.41.

¹¹ AU sec. 316.48.

For example, the knowledge, skill, and ability of personnel assigned significant engagement responsibilities should be commensurate with the auditor's assessment of the risks of material misstatement due to fraud for the engagement.¹² The auditor also should consider management's selection and application of significant accounting principles, particularly those related to subjective measurements and complex transactions.¹³ Further, the auditor should incorporate an element of unpredictability in the selection from year to year of auditing procedures to be performed.¹⁴

- A response to identified risks involving the nature, timing, and extent of the auditing procedures to be performed.¹⁵ For example, the auditing procedures performed in response to identified risks of material misstatement due to fraud should vary depending upon the types of risks identified and the account balances, classes of transactions, and related assertions that may be affected.¹⁶ Such procedures may involve both substantive tests and tests of the operating effectiveness of the company's programs and controls.¹⁷
- A response involving the performance of certain procedures to further address the risk of material misstatement due to fraud involving management override of controls, given the unpredictable ways in which Audit Considerations in the such override could occur.¹⁸ For example, the auditor should examine journal entries and other adjustments for evidence of possible material misstatement due to fraud.¹⁹ The auditor also should review accounting estimates for biases that could result in material misstatement due to fraud,²⁰ and evaluate the business rationale for significant unusual transactions.²¹

The auditor's assessment of the risks of material misstatement due to fraud should be ongoing throughout the audit.²²

In an audit of internal control over financial reporting, the risk that a company's internal control over financial reporting will fail to prevent or detect misstatement caused by fraud usually is higher than the risk of failure to prevent or detect error.²³

Internal control considerations

The current environment may increase audit risk and thus require additional auditor attention regarding the effective operation of internal controls. Areas in which additional attention may be required include the company's

²¹ AU sec. 316.66.

²² AU sec. 316.68.

²³ AS No. 5, paragraph 11.

entity-level controls, such as, among other things, controls related to the control environment, and the company's risk assessment process. Additional attention also may be warranted on the controls related to certain significant accounts and disclosures and their relevant assertions, such as controls over the development of inputs and assumptions for the valuation of significant assets and liabilities; controls over the identification and review of assets for recoverability or impairment; and controls over the company's use of external specialists (for example, valuation or actuarial specialists) who assist in the determination of recorded amounts of certain assets or liabilities. In addition, some companies are responding to the current economic conditions by eliminating jobs. The loss of employees integral to the operation of internal controls may increase the risk of deficiencies in internal control over financial reporting because of, for example, lack of segregation of duties or lack of effective monitoring controls.

In an audit of internal control over financial reporting, the auditor also should evaluate whether the company's controls sufficiently address the identified risks of material misstatement due to fraud²⁴ and controls intended to address the risk of management override of controls.²⁵ Controls that might address these risks include—

- Controls over significant, unusual transactions, particularly those that result in late or unusual journal entries;
- Controls over journal entries and adjustments made in the period-end financial reporting process;
- Controls over related party transactions;
- Controls related to significant management estimates; and
- Controls that mitigate incentives for, and pressures on, management to falsify or inappropriately manage financial results.²⁶

Effect on substantive procedures

Because the current environment may increase inherent and control risks, the auditor might need to modify his or her planned substantive procedures or perform additional substantive procedures in order to reduce the level of detection risk to an acceptable level to support his or her opinion on the financial statements. Examples of modifications of planned substantive procedure include the following—

- Changing the nature of substantive tests from a less effective to a more effective procedure, such as using tests directed toward independent parties outside the company rather than tests directed toward parties or documentation within the company;
- Changing the timing of substantive tests, such as performing them at year end rather than at an interim date; and
- Changing the extent of substantive tests, such as using a larger sample size.²⁷

²⁴ AS No. 5, paragraph 14.

²⁵ AS No. 5, paragraph 14. AU secs. 316.57 to .67 describe procedures that should be performed to address the risk of management override of controls.

²⁶ AS No. 5, paragraph 14.

²⁷ Paragraph .82 of AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*.

Communications with audit committees

The auditor has a responsibility to communicate certain matters related to the conduct of the audit to the audit committee.²⁸ Some of the required communications that may be affected by current economic conditions include discussions about accounting estimates as well as the company's accounting principles.

With respect to accounting estimates, the auditor should determine that the audit committee is informed about the process used by management in formulating particularly sensitive accounting estimates and about the basis for the auditor's conclusions regarding the reasonableness of those estimates.²⁹ The auditor should discuss with the audit committee the auditor's judgments about the quality, not just the acceptability, of the company's accounting principles as applied in its financial reporting.³⁰ The discussion should include such matters as the consistency of the company's accounting policies and their application, and the clarity and completeness of the company's financial statements, which include related disclosures.³¹ The discussion also should include items that have a significant impact on the representational faithfulness, verifiability, and neutrality of the accounting information included in the financial statements.³² Examples of items that may have such an effect include the following—

- Selection of new or changes to accounting policies;
- Estimates, judgments, and uncertainties;
- Unusual transactions; and
- Accounting policies relating to significant financial statement items, including the timing of transactions and the period in which they are recorded.³³

While these and other communications are directed to the audit committee, the auditor is not precluded from communicating with management or other individuals within the company, who may, in the auditor's judgment, benefit from the communications.³⁴

Auditing Fair Value Measurements

Certain kinds of investments such as auction rate securities, commercial paper, mortgage-backed or other asset-backed securities, alternative investments (such as hedge funds, private equity investments, funds of funds, etc.), collateralized debt obligations and other investments may present complexities in valuation because of the current conditions in the financial markets. Accordingly, difficulties surrounding the measurement of fair value and the adequacy of related disclosures have come under increased focus over the past year.

Statement of Financial Accounting Standard ("SFAS") No. 157, *Fair Value Measurements*,³⁵ establishes a framework for measuring fair values for financial

²⁸ Paragraph .01 of AU sec. 380, *Communication With Audit Committees*.

²⁹ AU sec. 380.08.

³⁰ AU sec. 380.11.

³¹ *Ibid.*

³² *Ibid.*

³³ *Ibid.*

³⁴ AU sec. 380.02.

³⁵ In September 2006, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standard ("SFAS") No. 157, *Fair Value Measurements*, which is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods

(continued)

reporting purposes and expands disclosures about those measurements. On September 30, 2008, the SEC's Office of the Chief Accountant and the Financial Accounting Standards Board ("FASB") staff issued *Clarifications on Fair Value Accounting* acknowledging that "the current environment has made questions surrounding the determination of fair value particularly challenging for preparers, auditors and users of financial information."³⁶ On October 10, 2008, the FASB issued Staff Position ("FSP") No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*, which provides application guidance regarding—

- How the company's own assumptions (that is, expected cash flows and appropriately risk-adjusted discount rates) should be considered when measuring fair value when relevant observable inputs do not exist;
- How available observable inputs in a market that is not active should be considered when measuring fair value; and
- How the use of market quotes (for example, broker quotes or pricing services for the same or similar financial assets) should be considered when assessing the relevance of observable and unobservable inputs available to measure fair value.³⁷

The following matters may be particularly important for auditors in considering fair value accounting estimates—

- The extent to which fair value accounting applies to various accounts;
- The choice and complexity of valuation techniques and models;
- Judgments concerning significant assumptions that may be used by others such as specialists employed or engaged by the company or the auditor;
- The availability, or lack thereof, of information or evidence and its reliability; and
- The extent of disclosure in the financial statements about measurement methods and uncertainty.

PCAOB Staff Audit Practice Alert No. 2 ("Practice Alert No. 2"), *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists*, remains relevant in the current environment and reminds auditors of their responsibilities with regard to—

- Auditing fair value measurements,
- Classification within the fair value hierarchy under SFAS 157,
- Using the work of specialists, and
- Use of a pricing service.³⁸

(footnote continued)

within those fiscal years. The FASB deferred the implementation of SFAS No. 157 for certain nonrecurring, nonfinancial assets and liabilities for financial statements issued for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years.

³⁶ See <http://www.sec.gov/news/press/2008/2008-234.htm>.

³⁷ Paragraph 5 of FASB Staff Position ("FSP") No. FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*.

³⁸ PCAOB Staff Audit Practice Alert No. 2, *Matters Related to Auditing Fair Value Measurements of Financial Instruments and the Use of Specialists* (December 10, 2007).

In discussing the auditor's responsibilities for auditing fair value measurements, Practice Alert No. 2 refers the auditor to AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*, AU sec. 336, *Using the Work of a Specialist*, and AU sec. 342, *Auditing Accounting Estimates*.

Auditing Accounting Estimates

Accounting estimates measure the effects of past business transactions or events, or the present status of an asset or liability.³⁹ Examples of accounting estimates include net realizable value of inventories, allowance for uncollectible accounts receivable, valuation allowance for deferred tax assets, actuarial assumptions in pension and other postretirement benefit costs, the impairment analysis and estimated useful lives of long-lived assets, restructuring accruals, and assumptions used in option pricing models for share-based payments.⁴⁰ In auditing accounting estimates, the auditor normally should consider, among other things, the company's historical experience in making past estimates as well as the auditor's experience in the industry.⁴¹ However, changes in facts, circumstances, or a company's procedures may cause factors different from those considered in the past to become significant to the accounting estimate.⁴² The significance of the recent changes in the economy and the financial markets increases the likelihood that this will be the case.

The auditor is responsible for evaluating the reasonableness of accounting estimates made by management in the context of the financial statements taken as a whole.⁴³ In evaluating the reasonableness of accounting estimates, the auditor should obtain an understanding of how management developed the estimate.⁴⁴ Based on that understanding, the auditor should use one or a combination of the following approaches—

- Review and test the process used by management to develop the estimate;
- Develop an independent expectation of the estimate to corroborate the reasonableness of management's estimate;
- Review subsequent events or transactions occurring prior to the date of the auditor's report.⁴⁵

The work that the auditor performs as part of the audit of internal control over financial reporting should necessarily inform the auditor's decisions about the approach he or she takes to auditing an estimate because, as part of the audit of internal control over financial reporting, the auditor would be required to obtain an understanding of the process management used to develop the estimate and to test controls over all relevant assertions related to the estimate.⁴⁶

In evaluating the reasonableness of an estimate, the auditor normally concentrates on key factors and assumptions that are—

³⁹ Paragraph .02 of AU sec. 342, *Auditing Accounting Estimates*.

⁴⁰ See AU sec. 342.16 for other examples of accounting estimates.

⁴¹ AU sec. 342.09.

⁴² *Ibid.*

⁴³ AU sec. 342.04.

⁴⁴ AU sec. 342.10.

⁴⁵ *Ibid.*

⁴⁶ *Ibid.*

- Significant to the accounting estimate;
- Sensitive to variations;
- Deviations from historical patterns;
- Subjective and susceptible to misstatement and bias.⁴⁷

When assessing audit differences between estimates best supported by the audit evidence and the estimates included in the financial statements, the auditor should consider whether such differences, even if they are individually reasonable, indicate a possible bias on the part of the company's management, in which case the audit or should reconsider the estimates taken as a whole.⁴⁸

As part of the audit, the auditor also should perform a retrospective review of significant accounting estimates reflected in the financial statements of the prior year to determine whether management judgments and assumptions relating to the estimates indicate a possible bias on the part of management.⁴⁹ With the benefit of hindsight, a retrospective review should provide the auditor with additional information about whether there may be a possible bias on the part of management in making the current year estimates.⁵⁰

Auditing the Adequacy of Disclosures

The current economic environment may increase the risks regarding the adequacy of disclosures, including the disclosures surrounding a company's risks and uncertainties, which in turn may warrant additional auditor attention.

The American Institute of Certified Public Accountants' Statement of Position 94-6 ("SOP 94-6"), *Disclosure of Certain Significant Risks and Uncertainties*, focuses on disclosures about risks and uncertainties, that in the near term (considered to be within one year from the date of the financial statements), could affect the amounts reported in the financial statements or the functioning of the reporting company.⁵¹ SOP 94-6 provides that companies should make disclosures in their financial statements about the risks and uncertainties in the following areas—

- Nature of operations;
- Use of estimates in the preparation of financial statements;
- Certain significant estimates;
- Current vulnerability due to certain concentrations.⁵²

The presentation of financial statements in conformity with GAAP includes adequate disclosure of material matters, related to the form, arrangement, and content of the financial statements and their appended notes.⁵³ The auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which he or she is aware at the time.⁵⁴ If management omits

⁴⁷ AU sec. 342.09.

⁴⁸ AU sec. 316.63.

⁴⁹ AU sec. 316.64.

⁵⁰ Ibid.

⁵¹ Paragraph .02 of American Institute of Certified Public Accountants' Statement of Position 94-6 ("SOP 94-6"), *Disclosure of Certain Significant Risks and Uncertainties*. Paragraph .07 of SOP 94-6 defines near term as a period of time not to exceed one year from the date of the financial statements.

⁵² SOP 94-6, paragraph .08.

⁵³ Paragraph .02 of AU sec. 431, *Adequacy of Disclosure in Financial Statements*.

⁵⁴ Ibid.

from the financial statements, including the accompanying notes, information that is required by GAAP, the auditor should express a qualified or adverse opinion and should provide the information in his or her report, if practicable, unless its omission from the auditor's report is recognized as appropriate by a specific PCAOB auditing standard.⁵⁵

With respect to other information included in documents containing the financial statements, the auditor should read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements.⁵⁶ For instance, the section on management's discussion and analysis of financial condition and results of operations in Form 10-K requires discussion of liquidity, capital resources, results of operations, off-balance sheet arrangements and contractual obligations.⁵⁷ In addition, the section on controls and procedures of the Form 10-K requires discussion of management's responsibility for internal control over financial reporting and changes in internal control over financial reporting.⁵⁸ If the information in these disclosures is materially inconsistent with the financial statements, the auditor should determine whether the financial statements, the audit report, or both require revision.⁵⁹

Auditor's Consideration of a Company's Ability to Continue as a Going Concern

In the current economic environment, some companies may face challenges in their ability to continue operating as a going concern. For instance, sources of liquidity may be strained because of reduced availability of lines/letters of credit from financial institutions or because of a violation of a debt covenant or other covenant. Additionally, companies may encounter limited access to the commercial paper markets, a decrease in valuation of collateral, difficulty restructuring loans, and delays in payment from customers.

The auditor has a responsibility to evaluate whether there is a substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited.⁶⁰ The auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report.⁶¹

The auditor's evaluation includes considering whether the results obtained in planning, performing, and completing the audit identify conditions and events that, when considered in the aggregate, indicate there could be a substantial doubt about the company's ability to continue as a going concern for a reasonable period of time.⁶² It may be necessary to obtain additional information about such

⁵⁵ AU sec. 431.03.

⁵⁶ Paragraph .04 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*.

⁵⁷ Regulation S-K, Item 303, *Management's Discussion and Analysis of Financial Condition and Results of Operations*.

⁵⁸ Regulation S-K, Items 308 and 308T, *Internal Control Over Financial Reporting*.

⁵⁹ AU sec. 550.04.

⁶⁰ Paragraph .02 of AU sec. 341, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*.

⁶¹ *Ibid.*

⁶² AU sec. 341.03a.

conditions and events, as well as the appropriate evidential matter to support information that mitigates the auditor's doubt.⁶³ Conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the company's ability to continue as a going concern for a reasonable period of time include—

- *Negative trends*—for example, recurring operating losses, working capital deficiencies, negative cash flows from operating activities, adverse key financial ratios;
- *Other indications of possible financial difficulties*—for example, default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, noncompliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets;
- *Internal matters*—for example, work stoppages or other labor difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, need to significantly revise operations;
- *External matters that have occurred*—for example, legal proceedings, legislation, or similar matters that might jeopardize a company's ability to operate; loss of a key franchise, license, or patent; loss of a principal customer or supplier; uninsured or underinsured catastrophe such as a drought, earthquake, or flood.⁶⁴

If the auditor believes there is substantial doubt about the company's ability to continue as a going concern for a reasonable period of time, the auditor should obtain information about management's plans that are intended to mitigate the effect of such conditions or events, and assess the likelihood that such plans can be effectively implemented.⁶⁵ The auditor's considerations relating to management plans may include the following—

- Plans to dispose of assets;
- Plans to borrow money or restructure debt;
- Plans to reduce or delay expenditures;
- Plans to increase ownership equity.⁶⁶

Such considerations also may include the effect of federal assistance or participation in a federal program.

If, after considering identified conditions and events and management's plans, the auditor concludes there is substantial doubt, he or she should consider the possible effects on the financial statements and the adequacy of disclosure about the company's inability to continue as a going concern for a reasonable period of time, and include an explanatory paragraph in the audit report to reflect this conclusion.⁶⁷ If the auditor concludes that substantial doubt is alleviated, the auditor should consider the need for disclosure of the principal conditions

⁶³ Ibid.

⁶⁴ AU sec. 341.06.

⁶⁵ AU sec. 341.03b.

⁶⁶ AU sec. 341.07.

⁶⁷ AU secs. 341.10 and 341.12.

and events that initially caused the auditor to believe there was substantial doubt.⁶⁸

Additional Audit Considerations for Selected Financial Reporting Areas

The following discussion provides auditors with information on selected financial reporting areas that may be affected by the current economic environment. The auditor should give consideration to elevated risks related to the current economic environment and adjust his or her audit procedures as appropriate. This list is not intended to be all inclusive.

- Consolidation
- Contingencies and guarantees
- Credit derivatives
- Debt obligations
- Deferred tax assets
- Derivatives (other than credit derivatives)
- Goodwill, intangible assets and other long-lived assets
- Inventory
- Other-than-temporary impairment
- Pension and other postretirement benefits
- Receivables
- Restructuring
- Revenue recognition
- Share-based payments

Consolidation

As a result of the economic environment, some companies have provided financial support or guarantees, or have taken other actions that may cause them to have a variable interest in an entity or to have increased their exposure to the entity, and, therefore, cause them to consider or reconsider whether the entity is a variable interest entity and if so whether they are its primary beneficiary.⁶⁹ Such commitments to provide financial support or guarantees might be found in various contractual arrangements, such as leasing arrangements, supply contracts, service contracts or derivative contracts.

FASB Interpretation ("FIN") No. 46(R) (as amended), *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*, addresses consolidation by the primary beneficiary of variable interest entities. On November 21, 2008, the FASB announced plans to issue final FSP FAS 140-4 and FIN 46(R)-8, *Disclosures about Transfers of Financial Assets and Interests in Variable Interest Entities*, by December 15, 2008, which will increase disclosure requirements for public companies for reporting periods that end after December 15, 2008.⁷⁰

⁶⁸ AU sec. 341.11.

⁶⁹ Paragraphs 7 and 15 of FASB Interpretation ("FIN") No. 46(R) (as amended), *Consolidation of Variable Interest Entities—an interpretation of ARB No. 51*.

⁷⁰ See <http://www.fasb.org/news/nr112108.shtml>.

Contingencies and guarantees

Recent events in the credit markets may expose companies to additional contingencies and guarantees, which could increase the risk of unidentified or undisclosed contingencies related to, for example—

- Pending or threatened litigation;
- Asserted or unasserted claims and assessments;
- Guarantees of indebtedness of others;
- Guarantees to repurchase receivables or property previously sold or otherwise assigned;
- Violations of laws and regulations;
- Guarantees of contractual performance of others; and
- Outstanding purchase commitments at prices in excess of market values.

The audit normally includes procedures that might identify litigation, claims, and assessments, among other things.⁷¹ Examples of such procedures include the following—

- Reading minutes of meetings of stockholders, directors, and appropriate committees held during and subsequent to the period being audited;
- Reading contracts, loan agreements, leases, and correspondence from taxing or other governmental agencies, and similar documents;
- Obtaining information concerning guarantees from bank confirmation forms;
- Inspecting other documents for possible guarantees by the client.⁷²

Credit derivatives

The downturn in the credit markets can have a significant effect on the fair value of a company's credit derivatives. A credit derivative is a derivative instrument whose value derives from the credit risk on an underlying bond, loan or financial asset. The credit risk is on an entity other than the counterparty to the transaction.⁷³ This entity is known as a reference entity, which incurred the debt.⁷⁴

Credit derivatives are bilateral contracts between the buyer and seller under which the seller sells to the buyer protection against the credit risk of the reference entity.⁷⁵ Credit derivatives may be valued through the use of internally developed models or by pricing services. The assumptions used in models can

⁷¹ Paragraph .07 of AU sec. 337, *Inquiry of a Client's Lawyer Concerning Litigation, Claims and Assessments*. AU sec. 337.08 indicates that a letter of audit inquiry to the client's lawyer is the auditor's primary means of obtaining corroboration of the information furnished by management concerning litigation, claims, and assessments.

⁷² AU sec. 337.07.

⁷³ Satyajit Das, *Credit Derivatives: CDOs and Structured Credit Products*, (Singapore: John Wiley and Sons (Asia) Pte Ltd, 2005, Third Edition).

⁷⁴ Edmund Parker, "Credit Derivatives," *PLC Finance* (<http://www.mayerbrown.com/london/article.asp?id=4234&nid=1575>).

⁷⁵ *Ibid.*

be highly subjective, sensitive, and complex. A slight difference in assumptions could result in a significant change in the valuation of the derivative.

One factor that affects the fair value of credit derivatives is a decline in the credit quality of the reference entity. As a result of the deterioration in credit derivative positions insured by sellers of credit derivatives, some sellers have been required to post significant amounts of additional collateral. A seller also may be required to post additional collateral based on the deterioration of its own credit standing (regardless of changes in value of the written credit derivatives) to protect the buyer from default by the seller. In addition, the fair value of the asset included in the buyer's financial statements is affected by both the credit rating of the seller of the credit derivative (the counterparty) and the credit rating of the reference entity. The credit risk of the seller may affect the fair value of the liability in the seller's financial statements. In response to concerns from financial statement users and others that the current disclosure requirements for derivative instruments and certain guarantees did not adequately address the potential adverse effects of changes in the credit risk on the financial position, financial performance, and cash flows of the sellers of credit derivatives and certain guarantees, the FASB issued a staff position aimed at improving such disclosures.⁷⁶

The auditor should obtain evidence supporting management's assertions about the fair value of derivatives measured or disclosed at fair value.⁷⁷ In addition, the auditor should evaluate whether the presentation and disclosure of derivatives are in conformity with GAAP.⁷⁸

In addition to valuation and presentation and disclosure, other considerations relate to existence and completeness. In March 2008, the President's Working Group on Financial Markets noted "[w]hile the infrastructure of the financial markets generally has coped quite well with heightened price volatility and surging trading volumes, there have been issues with the accuracy and timeliness of trade data transmissions, the timeliness of resolutions of trade matching errors, documentation and cash settlement, electronic post-trade processing, backlogs, integrated processing, and reconciliation and valuation."⁷⁹ Sellers and buyers of credit derivatives may have made trades which may not be properly reflected in the financial statements. AU sec. 332 provides examples of substantive procedures auditors may perform to obtain evidence about whether all derivatives have been properly identified and appropriately included in the financial statements.⁸⁰

⁷⁶ Paragraph 1 of FSP No. FAS 133-1 and FIN 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161* (September 12, 2008).

⁷⁷ Paragraph .35 of AU sec. 332, *Auditing Derivative Instruments, Hedging Activities, and Investments in Securities*. AU secs. 332.35 to .48 provide further direction on auditing valuations based on fair value.

⁷⁸ AU sec. 332.49. AU secs. 332.49 to .51 provide further direction on auditing presentation and disclosure of derivatives.

⁷⁹ See pages 18 to 19 of the Policy Statement on Financial Market Developments by The President's Working Group on Financial Markets (March 2008) (http://www.treas.gov/press/releases/reports/pwgpolicystatemktturmoil_03122008.pdf). In June 2008, the Federal Reserve Bank of New York noted that "[s]tarting in September 2005, industry participants implemented a number of initiatives to improve the operational performance and infrastructure of the over-the-counter markets" and that market participants and regulators agreed on an "agenda for bringing about further improvements in the OTC derivatives market infrastructure." Federal Reserve Bank of New York, "Statement Regarding June 9 Meeting on Over-the-Counter Derivatives" (June 9, 2008), (<http://www.newyorkfed.org/newsevents/news/markets/2008/ma080609.html>).

⁸⁰ AU secs. 332.21 to .24.

Debt obligations

Companies may find it more difficult to refinance debt or it may take longer to arrange new financing in the current business environment, and compliance with debt covenants may be more challenging. Circumstances such as the following can affect the risks of material misstatement and the necessary audit procedures regarding debt obligations—

- Violations of existing debt covenants;
- Proper classification between short-term and long-term debt;
- The existence of cross default provisions, such that a violation of a covenant on one loan affects compliance with covenants for another loan;
- Exchange of debt or modifications to the terms of outstanding debt agreements;
- Concessions granted by lenders, including those that constitute a troubled debt restructuring;
- Subjective acceleration clauses;
- Embedded derivatives.

Deferred tax assets

Under current economic conditions, companies may need to record valuation allowances for their deferred tax assets. Deferred tax assets are required to be reduced "by a valuation allowance if, based on the weight of available evidence, it is *more likely than not* (a likelihood of more than 50 percent) that some portion or all of the deferred tax assets will not be realized."⁸¹

Evaluating the need for and amount of a valuation allowance for deferred tax assets requires consideration of "all available evidence, both positive and negative"⁸² to determine whether all or some portion of the deferred tax assets will not be realized. SFAS No. 109, *Accounting for Income Taxes*, provides that the more negative evidence that exists (a) the more positive evidence is necessary and (b) the more difficult it is to support a conclusion that a valuation allowance is not needed for some portion or all of the deferred tax asset.⁸³

In addition, SFAS No. 109 states that "information about an enterprise's current financial position and its results of operations for the current and preceding years ordinarily is readily available. That historical information is supplemented by all currently available information about future years. Sometimes, however, historical information may not be available (for example, start-up operations) or it may not be as relevant (for example, if there has been a significant, recent change in circumstances) and special attention is required."⁸⁴

Future realization of a deferred tax asset "ultimately depends on the existence of sufficient taxable income of the appropriate character (for example, ordinary income or capital gain) within the carryback, carryforward period available under the tax law."⁸⁵ SFAS No. 109 states that "the weight given to the potential

⁸¹ Paragraph 17e of SFAS No. 109 (as amended), *Accounting for Income Taxes*.

⁸² SFAS No. 109, paragraph 20.

⁸³ SFAS No. 109, paragraph 25.

⁸⁴ SFAS No. 109, paragraph 20.

⁸⁵ SFAS No. 109, paragraph 21.

effect of negative and positive evidence should be commensurate with the extent to which it can be objectively verified."⁸⁶

In addition, FIN No. 48 (as amended), *Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109*, defines a criterion that an individual tax position must meet for any part of the benefit of that position to be recognized in a company's financial statements.⁸⁷ The interpretation also provides guidance on measurement, derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.⁸⁸

Derivatives (other than credit derivatives)

The current environment may have a significant effect on the fair value of a company's derivative contracts. In addition, the ability for a company to use hedge accounting, including its ability to apply the short-cut method, may be affected because of the company's or the counterparty's creditworthiness.⁸⁹ Hedge accounting also may be affected because changes in the fair value of the derivative may be attributable to a risk other than the risk that is being hedged, such as company or counterparty creditworthiness.⁹⁰

Auditors should obtain evidence supporting management's assertion about the fair value of derivatives measured or disclosed at fair value.⁹¹ External factors, such as credit and market risk, may affect the valuation of derivatives. Credit or default risk exposes the company to the risk of loss as a result of the counterparty to a derivative failing to meet its obligation. Alternatively, the credit risk of the company may affect the fair value of the derivative when the derivative is in a liability position. Market risk exposes the company to the risk of loss from adverse changes in market factors that affect the fair value of a derivative, such as interest rates and foreign exchange rates. In order for a company to use hedge accounting, GAAP requires that management have an expectation that the hedging relationship will be highly effective at inception and on an ongoing basis.⁹² Counterparty default risk may affect hedge accounting as GAAP requires that consideration be given to the likelihood that the counterparty will comply with the contractual terms of the derivative contract.⁹³ If the likelihood that the counterparty will not default ceases to be probable, the company would be unable to conclude that a cash flow hedging relationship is expected to be highly effective in achieving offsetting cash flows.⁹⁴ Additionally, a change in the creditworthiness of the derivative's counterparty in a fair value hedge would affect the assessment of whether the relationship qualifies for hedge accounting and amount of ineffectiveness recognized in earnings under

⁸⁶ SFAS No.109, paragraph 25.

⁸⁷ Paragraph 2 of FIN No. 48 (as amended), *Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109*.

⁸⁸ Ibid.

⁸⁹ FASB Staff Implementation Guidance: Guide to Implementation of Statement 133 on Accounting for Derivative Instruments and Hedging Activities, Issue G10 ("DIG Issue G10"), *Cash Flow Hedges: Need to Consider Possibility of Default by the Counterparty to the Hedging Derivative*.

⁹⁰ Paragraphs 20 and 28 of SFAS No. 133 (as amended), *Accounting for Derivative Instruments and Hedging Activities*, discuss the risks that are being hedged for a fair value and a cash flow hedge, respectively. Paragraphs 25 and 29 of SFAS No. 133 indicate when to discontinue hedge accounting for a fair value and cash flow hedge, respectively.

⁹¹ AU sec. 332.35.

⁹² SFAS No. 133, paragraphs 20b and 28b.

⁹³ DIG Issue G10.

⁹⁴ Ibid.

fair value hedge accounting.⁹⁵ Under SFAS No. 133, hedge accounting ceases when a hedge is no longer highly effective on an ongoing basis.⁹⁶

When assessing hedge accounting, auditors should gather evidential matter—

- To determine whether management complied with the hedge accounting requirements of GAAP, including designation and documentation requirements.⁹⁷
- To support management's expectation at the inception of the hedge that the hedging relationship will be highly effective and its periodic assessment of the ongoing effectiveness of the hedging relationship as required by GAAP.⁹⁸
- Supporting the recorded change, for a fair value hedge, in the hedged item's fair value that is attributable to the hedged risk.⁹⁹

In addition, for a cash flow hedge of a forecasted transaction, the auditor should evaluate management's determination of whether a forecasted transaction is probable.¹⁰⁰

Goodwill, intangible assets and other long-lived assets

Market conditions during an economic downturn may result in an impairment of goodwill, other indefinite-lived intangible assets and other long-lived assets. Goodwill and indefinite-lived intangible assets "shall be tested for impairment annually, or more frequently if events or changes in circumstances indicate that the asset might be impaired."¹⁰¹ Similarly, SFAS No. 144 (as amended), *Accounting for the Impairment or Disposal of Long-Lived Assets*, states that "A long-lived asset (asset group) shall be tested for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable."¹⁰² The following are examples of such events and changes in circumstances—

- A significant decrease in the market price of a long-lived asset (asset group);
- A significant adverse change in the extent or manner in which a long-lived asset (asset group) is being used or in its physical condition;
- A significant adverse change in legal factors or in the business climate that could affect the value of a long-lived asset (asset group), including an adverse action or assessment by a regulator;
- An accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of a long-lived asset (asset group);

⁹⁵ Ibid.

⁹⁶ SFAS No. 133, paragraph 67.

⁹⁸ Ibid.

⁹⁹ AU sec. 332.54.

¹⁰⁰ AU sec. 332.55.

¹⁰¹ Paragraph 17 of SFAS No. 142 (as amended), *Goodwill and Other Intangible Assets*.

¹⁰² Paragraph 8 of SFAS No. 144 (as amended), *Accounting for the Impairment or Disposal of Long-Lived Assets*.

- A current-period operating or cash flow loss combined with a history of operating or cash flow losses or a projection or forecast that demonstrates continuing losses associated with the use of a long-lived asset (asset group);
- A current expectation that, more likely than not, a long-lived asset (asset group) will be sold or otherwise disposed of significantly before the end of its previously estimated useful life. The term more likely than not refers to a level of likelihood that is more than 50 percent.¹⁰³

Goodwill of a reporting unit shall be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount.¹⁰⁴ Examples of such events or circumstances include—

- A significant adverse change in legal factors or in the business climate;
- An adverse action or assessment by a regulator;
- Unanticipated competition;
- A loss of key personnel;
- A more-likely-than-not expectation that a reporting unit or a significant portion of a reporting unit will be sold or otherwise disposed of;
- The testing for recoverability under SFAS No. 144 of a significant asset group within a reporting unit;
- Recognition of a goodwill impairment loss in the financial statements of a subsidiary that is a component of a reporting unit.¹⁰⁵

In addition to valuation, companies may need to reassess the useful life of indefinite-lived intangible assets and other long-lived assets. SFAS No. 142 (as amended), *Goodwill and Other Intangible Assets*, requires companies to "evaluate the remaining useful life of an intangible asset that is not being amortized each reporting period to determine whether events and circumstances continue to support an indefinite useful life."¹⁰⁶ In addition, when other long-lived assets (asset group) are tested for recoverability, companies also may need to review depreciation estimates and methods.¹⁰⁷ Under SFAS No. 144, any revision to the remaining useful life of a long-lived asset resulting from that review also shall be considered in developing estimates of future cash flows used to test the asset (asset group) for recoverability.¹⁰⁸

Inventory

Current market conditions and the effect on consumer spending may result in excess or obsolete inventory or inventory with carrying amounts in excess of market values. Inventory is required to be stated at the lower of cost or

¹⁰³ Ibid.

¹⁰⁶ SFAS No. 142, paragraph 16.

¹⁰⁷ SFAS No. 144, paragraph 9.

¹⁰⁸ Ibid.

market.¹⁰⁹ The following are examples of conditions related to the current environment that might affect the risk of material misstatement of inventory valuation and the necessary audit procedures—

- An increase in inventory balances in relation to sales levels, a reduction in inventory turnover, and the aging of inventory may indicate excess or obsolete inventory balances that are not recoverable.
- Declining prices may indicate the carrying amount of inventory is in excess of market value. Accounting Research Bulletin ("ARB") No. 43 (as amended), *Inventory Pricing* (chapter 4), requires that a loss be recognized in the current period "whenever the utility of goods is impaired by damage, deterioration, obsolescence, changes in price levels, or other causes."¹¹⁰

In addition, losses on firm, uncancelable, and unhedged commitments to purchase inventory should be measured in the same way as are inventory losses and, if material, should be recognized in the accounts in the current period and separately disclosed in the income statement.¹¹¹

Other-than-temporary impairment

Many debt and equity securities have experienced significant declines in fair value. These declines in fair value may raise questions about whether such declines are other than temporary. The auditor should evaluate management's conclusion about the need to recognize in earnings an impairment loss for a decline in fair value that is other than temporary.¹¹²

In accordance with SFAS No. 115 (as amended), *Accounting for Certain Investments in Debt and Equity Securities*, a charge to earnings should be made for impairment that is "other than temporary" in held-to-maturity and available-for-sale securities.¹¹³ SEC Staff Accounting Bulletin ("SAB") No. 59, *Accounting for Noncurrent Marketable Equity Securities*, also provides the SEC staff's view and indicates that "other than temporary" should not be interpreted to mean "permanent." SAB No. 59 provides examples of factors which, individually or in combinations, may indicate that a decline is other than temporary and that a write-down of the carrying value is required, including—

- The length of the time and the extent to which the market value has been less than cost;
- The financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a segment of the business that may affect the future earnings potential; or
- The intent and ability of the holder to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in market value.

¹⁰⁹ Accounting Research Bulletin ("ARB") No. 43 (as amended), *Inventory Pricing*, chapter 4.

¹¹⁰ ARB No. 43, chapter 4, paragraph 8.

¹¹¹ ARB No. 43, chapter 4, paragraph 17.

¹¹² AU sec. 332.46.

¹¹³ Paragraph 16 of SFAS No. 115 (as amended), *Accounting for Certain Investments in Debt and Equity Securities*.

SAB No. 59 further provides that "[u]nless evidence exists to support a realizable value equal to or greater than the carrying value of the investment, a write-down accounted for as a realized loss should be recorded."

Additionally, under FASB Emerging Issues Task Force No. 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests That Continue to Be Held by a Transferor in Securitized Financial Assets*, certain beneficial interests should be written down to fair value through earnings if the security has declined below its cost and there has been an adverse change in the estimated cash flows based on a holder's best estimate of cash flows that a market participant would use in determining the fair value of the beneficial interest.¹¹⁴

Pension and other postretirement benefits ("OPEB")

Increased credit risk and reduced liquidity in the current economic environment can have a significant effect on the fair value of plan assets as well as the assumptions used to measure the pension and OPEB obligation. Companies that sponsor pension and OPEB plans are required to recognize the funded status of these plans in the statement of financial position.¹¹⁵ The funded status is measured as the difference between the fair value of plan assets and the benefit obligation.¹¹⁶ SFAS No. 87 (as amended), *Employers' Accounting for Pensions*, and SFAS No. 106 (as amended), *Employers' Accounting for Postretirement Benefits Other Than Pensions*, generally require that plan investments, whether equity or debt securities, real estate or other, be measured at fair value as of the measurement date.¹¹⁷ Therefore, the measurement requirements of SFAS No. 157 apply to defined-benefit postretirement plan assets. Several assumptions are relevant to determining a company's pension and OPEB obligation, such as discount rate, expected rate of return on plan assets, and rate of compensation increase. Significant declines in the stock market may adversely affect the fair value of the plan assets, and companies may need to consider recent shifts in the market when developing the expected rate of return on plan assets. Changes in fair value of plan assets affect the funded status of the plan.¹¹⁸ Deviations from the expected rate of return on plan assets affect a company's pension or OPEB expenses in future periods,¹¹⁹ unless gains and losses are recognized immediately.¹²⁰

Receivables

In the current economic environment, companies may face a heightened risk of non-collection of receivables. Evidence of this risk might be noted in an increase

¹²⁰ SFAS No. 87, paragraph 32 and SFAS No. 106, paragraph 59.

in days sales outstanding, the aging of receivables, or the amount of delinquent receivables.¹²¹

In addition for loans receivable, evidence of this risk might be rising loan delinquency and defaults and decreasing secondary market liquidity.¹²² These situations can affect the risk of material misstatement in the valuation of a company's receivables and the auditor's evaluation of management's estimate of the allowance.

Restructuring

Market events and their effect on liquidity have caused many companies to take actions such as restructuring to reduce costs. SFAS No. 146 (as amended), *Accounting for Costs Associated with Exit or Disposal Activities*, addresses financial accounting and reporting for costs associated with exit or disposal activities.¹²³ The risks of material misstatement may relate to recording costs in the improper period, incorrect measurement or presentation of restructuring liabilities and costs, or inadequate disclosures. Misstatements could result in understatement or overstatement of restructuring liabilities and costs.

Revenue recognition

In the current economic environment, companies may be faced with increased pressure to meet revenue targets and analysts' expectations. These pressures may cause companies to change business practices, which could affect the amount and timing of revenue recognition. Examples of business practices that could affect revenue recognition and the necessary audit procedures include, among other things, rights of return, bill-and-hold arrangements, change in payment terms, side agreements, and consignment arrangements. Also, the auditor should ordinarily presume that there is a risk of material misstatement due to fraud relating to revenue recognition.¹²⁴

Share-based payments

Current market conditions have resulted in volatile stock prices for many companies. As a result, some companies may consider modifying share-based payment awards. In addition, the changing economic environment may affect the assumptions used when valuing such awards.

¹²¹ Scott Malone, "Corporate America Taking Longer to Collect: Study" (August 24, 2008), (<http://www.reuters.com/article/reutersEdge/idUSN2745047620080827>), noted that it is taking companies longer to collect from their customers.

¹²² SFAS No. 114 (as amended), *Accounting by Creditors for Impairment of a Loan—an amendment of FASB Statements no. 5 and 15*, addresses the accounting by creditors for impairment of a loan by specifying how allowances for credit losses related to certain loans should be determined.

¹²³ As described in paragraph 2a of SFAS No. 146 (as amended), *Accounting for Costs Associated with Exit or Disposal Activities*, SFAS No. 146 does not change the accounting for termination benefits, including one-time termination benefits granted in the form of an enhancement to an ongoing benefit arrangement, covered by SFAS No. 87, SFAS No. 88 (as amended), *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits*, SFAS No. 106, and SFAS No. 112 (as amended), *Employers' Accounting for Postemployment Benefits—an amendment of FASB Statements No. 5 and 43*, FSP No. FAS 146-1 (as amended), *Determining Whether a One-Time Termination Benefit Offered in Connection with an Exit or Disposal Activity Is, in Substance, an Enhancement to an Ongoing Benefit Arrangement*, provides guidance on when additional termination benefits offered in connection with an exit or disposal activity are considered, in substance, enhancements to an ongoing benefit arrangement and, therefore, subject to the provisions SFAS Nos. 87, 88, 106 and 112. In addition, SFAS No. 144 addresses accounting for long-lived assets and disposal groups to be disposed of, including components of a company that are discontinued operations.

¹²⁴ AU 316.41.

The valuation of share-based payment awards under an option-pricing model includes significant estimates, such as expected term, pre-vesting forfeiture rate and the expected volatility of the underlying stock price. For new grants of awards, companies may need to revise these and other inputs to reflect current expectations. For example, expected volatility in an option-pricing model may be affected by recent volatility in the markets. Assumptions used in the option pricing model affect the value of the award and, consequently, the compensation expense that is recognized in the financial statements.

Modifications of share-based payment awards may result in the recognition of incremental compensation cost. Incremental compensation cost is measured as the excess, if any, of the fair value of the modified award over the fair value of the original award immediately before its terms are modified.¹²⁵

PCAOB Staff Questions and Answers ("Q&A"), *Auditing the Fair Value of Share Options Granted to Employees*, remains relevant in the current environment and reminds auditors of their responsibilities for auditing share-based payments including consideration of—

- The company's process,
- Risk factors,
- Model selection,
- Assumptions used in option-pricing models,
- Validation of data and the option-pricing model,
- Role of specialists.¹²⁶

In discussing the auditor's responsibilities for auditing the fair value of share options granted to employees, the Q&A refers the auditor to AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, AU sec. 336, *Using the Work of a Specialist*, and AU sec. 342, *Auditing Accounting Estimates*.

.04 Staff Audit Practice Alert No. 4

Auditor Considerations Regarding Fair Value Measurements, Disclosures, and Other-Than-Temporary Impairments

April 21, 2009

Staff Audit Practice Alerts highlight new, emerging, or otherwise noteworthy circumstances that may affect how auditors conduct audits under the existing requirements of PCAOB standards and relevant laws. Auditors should determine whether and how to respond to these circumstances based on the specific facts presented. The statements contained in Staff Audit Practice Alerts are not rules of the Board and do not reflect any Board determination or judgment about the conduct of any particular firm, auditor, or any other person.

On April 9, 2009, the Financial Accounting Standards Board ("FASB") issued three FASB Staff Positions ("FSP" or, collectively, "the FSPs"):

- FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* ("FSP FAS 157-4")
- FSP FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments* ("FSP FAS 115-2")
- FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments* ("FSP FAS 107-1")¹

The objectives of these FSPs are to: (1) provide "additional guidance for estimating fair value in accordance with FASB Statement No. 157, *Fair Value Measurements*, when the volume and level of activity for the asset or liability have significantly decreased" including "guidance on identifying circumstances that indicate a transaction is not orderly,"² (2) amend "the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements,"³ and (3) "require disclosures about fair value of financial instruments

¹ The respective FSPs are available at:

— http://www.fasb.org/pdf/fsp_fas157-4.pdf
— http://www.fasb.org/pdf/fsp_fas115-2andfas124-2.pdf
— http://www.fasb.org/pdf/fsp_fas107-1andapb28-1.pdf

² FSP FAS 157-4, paragraph 1.

³ FSP FAS 115-2, paragraph 2. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairment of equity securities. On April 14, 2009, the

for interim reporting periods for publicly traded companies as well as in annual financial statements."⁴

The purpose of this staff audit practice alert is to inform auditors about potential implications of the FSPs on reviews of interim financial information and annual audits. This alert addresses the following topics: (1) reviews of interim financial information ("reviews"); (2) audits of financial statements, including integrated audits; (3) disclosures; and (4) auditor reporting considerations. While this alert highlights certain areas, it is not intended to serve as a substitute for the relevant auditing standards.

In considering the effects of the FSPs on their audits and reviews, auditors should be aware that some PCAOB standards include descriptions of accounting requirements that are no longer current. The accounting standards set by the FASB are recognized by the U.S. Securities and Exchange Commission ("SEC") as generally accepted.⁵ Auditors should look to those standards and to the requirements of the SEC,⁶ rather than the standards of the PCAOB, for current accounting requirements and disregard descriptions of accounting requirements in PCAOB standards that are inconsistent with the FSPs. The PCAOB has a project on its standards-setting agenda to address the auditing standards related to auditing accounting estimates and auditing fair value measurements. In connection with this project, the PCAOB is planning to remove descriptions of accounting requirements from these standards. In general, as the PCAOB replaces or substantively revises its interim standards, it will continue to remove descriptions of accounting requirements from those auditing standards.

Reviews of Interim Financial Information

The objective of a review is to provide the auditor with a basis for communicating whether he or she is aware of any material modifications that should be made to the interim financial information for it to conform with generally accepted accounting principles ("GAAP"). A review differs significantly from an audit and consists principally of performing analytical procedures and making inquiries of persons responsible for financial and accounting matters.⁷ A review does not provide a basis for expressing an opinion about whether the financial statements are presented fairly, in all material respects, in conformity with GAAP.⁸ For an audit, PCAOB standards require that the auditor plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.⁹

SEC's staff released Staff Accounting Bulletin ("SAB") No. 111, *Other Than Temporary Impairment of Certain Investments in Equity Securities*, which amends SAB Topic 5.M. SAB Topic 5.M. now excludes debt securities from its scope while maintaining the SEC staff's views related to equity securities.

⁴ FSP FAS 107-1, paragraph 1.

⁵ SEC, *Policy Statement: Reaffirming the Status of the FASB as a Designated Private-Sector Standard Setter*, Exchange Act Release No. 34-47743 (April 25, 2003). The PCAOB has no authority to prescribe the form or content of an issuer's financial statements. Accordingly, while this staff audit practice alert describes applicable generally accepted accounting principles ("GAAP"), it does not establish or interpret GAAP.

⁶ Auditors should look to the requirements of the SEC for the company under audit with respect to the accounting principles applicable to that company. See AU sec. 411, *The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles*.

⁷ Paragraph .07 of AU sec. 722, *Interim Financial Information* ("AU sec. 722").

⁸ *Ibid.*

⁹ Paragraph .08 of AU sec. 508, *Reports on Audited Financial Statements*. An audit includes, among other things, examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements.

As part of the review, the auditor should, among other things, make inquiries of members of management who have responsibility for financial and accounting matters. If relevant to the company, the auditor should include in these inquiries questions about the implementation of the FSPs.¹⁰

The auditor also should determine whether any matters described in AU sec. 380, *Communication With Audit Committees* ("AU sec. 380"), as they relate to the interim financial information, have been identified.¹¹ If such matters have been identified, the auditor should communicate those matters to the audit committee or be satisfied, through discussion with the audit committee, that management has communicated such matters to the audit committee.¹² Matters to be communicated include: a change in a significant accounting policy affecting the interim financial information; accounting estimates and management's judgments about those accounting estimates; processes management uses to formulate sensitive accounting estimates; and the auditor's judgment about the quality, not just the acceptability, of the company's accounting policies.¹³ Depending upon the circumstances, the implementation of the FSPs may present matters that should be communicated to the audit committee.

Audits of Financial Statements, Including Integrated Audits

FSP FAS 157-4 provides additional guidance for estimating fair value when the volume and level of activity for an asset or liability have significantly decreased.¹⁴ In performing procedures under AU sec. 328, *Auditing Fair Value Measurements and Disclosures* ("AU sec. 328"), the auditor is required to, among other things, obtain an understanding of the company's process for determining fair value measurements and disclosures and of the relevant controls sufficient to assess the risk of material misstatement, and to plan the nature, timing, and extent of the audit procedures.¹⁵ Based on the auditor's assessment of the risk of material misstatement, the auditor should test the entity's fair value measurements and disclosures.¹⁶ Because of the wide range of possible fair value measurements, from relatively simple to complex, and the varying levels of risk of material misstatement associated with the process for determining fair values, the auditor's planned audit procedures can vary significantly in nature, timing, and extent.¹⁷ The auditor's substantive tests of the fair value measurements may involve (a) testing management's significant assumptions, the valuation model, and the underlying data, (b) developing independent fair value estimates for corroborative purposes, or (c) reviewing subsequent events and transactions.¹⁸

FSP FAS 115-2 amends the guidance for recognizing an other-than-temporary impairment ("OTTI") for a debt security.¹⁹ The auditor is required to evaluate a

¹⁹ FSP FAS 115-2, paragraph 7.

company's conclusions about the need to recognize an impairment loss.²⁰ When a company has recognized an impairment loss, the auditor should gather evidence supporting the amount of the impairment adjustment recorded and determine whether the company has appropriately followed GAAP.²¹ In certain circumstances, a company is required to separate the amount of the OTTI representing credit losses (as defined by FSP FAS 115-2) and the amount representing all other factors.²² In those situations, the auditor's objective is to obtain sufficient competent evidential matter to provide reasonable assurance that these estimates are reasonable in the circumstances and that they are presented and disclosed in conformity with GAAP.²³ In evaluating reasonableness, the auditor should obtain an understanding of how the company developed the estimates.²⁴ In addition, the auditor should discuss an accounting change due to FSP FAS 115-2 and other related topics (as described in the previous section related to interim financial information), with the audit committee in connection with the audit of the financial statements, including integrated audits.²⁵

Disclosures

The FSPs require additional disclosures regarding fair value measurements and OTTI. For example (1) FSP FAS 157-4 requires a company to disclose changes in valuation techniques and related inputs for fair value measurements in interim and annual periods and to provide additional disclosures under Statement No. 157, *Fair Value Measurements*²⁶ and (2) FSP FAS 115-2 requires a company to disclose information that enables users to understand the reasons that a portion of OTTI was not recognized in earnings and the methodology and significant inputs used to calculate the portion of OTTI that was recognized in earnings.²⁷ The auditor should evaluate whether the financial statement disclosures are in conformity with the FSPs.²⁸

In addition, the auditor should read the other information accompanying the interim and annual financial statements contained in reports filed with the SEC.²⁹ For example, the Management's Discussion and Analysis of Financial Condition and Results of Operations section of annual reports and other filings might include discussions regarding fair value measurements and OTTI.³⁰ The auditor should consider whether that information or the manner of its presentation is materially inconsistent with the financial statements. If the auditor

²¹ *Ibid.*

²² FSP FAS 115-2, paragraphs 29-30.

²³ Paragraph .07 of AU sec. 342, *Auditing Accounting Estimates*.

²⁴ AU sec. 342.10.

²⁵ AU secs. 380.07 and 380.11. Also, Section 10A(k) of the Securities and Exchange Act of 1934 requires the auditor to communicate certain matters to the audit committee.

²⁶ FSP FAS 157-4, paragraph 20.

²⁷ FSP FAS 115-2, paragraph 38.

²⁸ The auditor considers whether a particular matter should be disclosed in light of the circumstances and facts of which the auditor is aware at the time. See paragraph .02 of AU sec. 431, *Adequacy of Disclosure in Financial Statements*.

²⁹ AU sec. 722.18(f) and paragraph .04 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements* ("AU sec. 550").

³⁰ For example, see the discussion of critical accounting policies and critical accounting estimates, respectively, in SEC Release Nos. 33-8040, *Cautionary Advice Regarding Disclosure About Critical Accounting Policies* (December 12, 2001) and 33-8350, *Commission Guidance Regarding Management's Discussion and Analysis of Financial Condition and Results of Operations* (December 29, 2003).

concludes that there is a material inconsistency, or becomes aware of information that he or she believes is a material misstatement of fact, the auditor should determine if the financial statements, the audit report, or both require revision. If the auditor concludes that the financial statements or audit report do not require revision, the auditor should request the company to revise the other information.³¹

Auditor Reporting Considerations

FSP FAS 157-4 states that revisions resulting from a change in the valuation technique or its application are to be accounted for as a change in accounting estimate. In the period of adoption, entities are required to disclose a change, if any, in valuation technique and related inputs and quantify the total effect, if practicable, by major category.³² In addition, FSP FAS 115-2 requires the company to recognize the cumulative effect of initially applying the FSP as an adjustment to the opening balance of retained earnings, as of the beginning of the period in which FSP FAS 115-2 is adopted, with a corresponding adjustment to accumulated other comprehensive income.³³

The auditor should evaluate whether the company's accounting for and disclosure of the changes are in accordance with the FSPs. To identify consistency matters that might affect the auditor's report, the auditor should evaluate whether the comparability of the financial statements between periods has been materially affected by changes in accounting principles. A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the opinion paragraph.³⁴

SECTION 1.

GENERAL PROVISIONS

Rule 1001. Definitions of Terms Employed in Rules.

When used in the Rules, unless the context otherwise requires:

(a)(i) Accounting Support Fee

The term "accounting support fee" means the fee described in Rule 7100.

[Effective pursuant to SEC Release No. 34-48278,
File No. PCAOB-2003-02 (August 1, 2003)]

(a)(ii) Accountant

The term "accountant" means a natural person—

- (1) who is a certified public accountant, or
- (2) who holds—
 - (i) a college, university, or higher professional degree in accounting, or
 - (ii) a license or certification authorizing him or her to engage in the business of auditing or accounting, or
- (3) who—
 - (i) holds a college, university, or higher professional degree in a field, other than accounting, and
 - (ii) participates in audits;

provided, however, that the term "accountant" does not include a person engaged only in clerical or ministerial tasks.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(a)(iii) Act

The term "Act" means the Sarbanes-Oxley Act of 2002.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(a)(iv) Associated Entity

The term "associated entity" means, with respect to a public accounting firm —

- (1) any entity that directly, indirectly, or through one or more intermediaries, controls, or is controlled by, or is under common control with, such public accounting firm; or
- (2) any "associated entity," as used in Rule 2-01(f)(2) of Regulation SX, 17 C.F.R. 210.2-01(f)(2), that would be considered part of that firm for purposes of the Commission's auditor independence rules.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(a)(v) Audit

The term "audit" means an examination of the financial statements of any issuer by an independent public accounting firm in accordance with the rules of the Board or the Commission (or, for the period preceding the adoption of

applicable Rules of the Board under Section 103 of the Act, in accordance with then applicable generally accepted auditing standards for such purposes), for the purpose of expressing an opinion on such statements.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(a)(vi) Audit Report

The term "audit report" means a document or other record—

- (1) prepared following an audit performed for purposes of compliance by an issuer with the requirements of the securities laws; and
- (2) in which a public accounting firm either—
 - (i) sets forth the opinion of that firm regarding a financial statement, report or other document; or
 - (ii) asserts no such opinion can be expressed.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(a)(vii) Audit Services

The term "audit services" means—

- (1) subject to paragraph (a)(vii)(2) of this Rule, professional services rendered for the audit of an issuer's annual financial statements, and (if applicable) for the reviews of an issuer's financial statements included in the issuer's quarterly reports.
- (2) effective after December 15, 2003, professional services rendered for the audit of an issuer's annual financial statements, and (if applicable) for the reviews of an issuer's financial statements included in the issuer's quarterly reports or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements for those fiscal years.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(a)(viii) Auditing and Related Professional Practice Standards.

The term "auditing and related professional practice standards" means the auditing standards, related attestation standards, quality control standards, ethical standards, and independence standards (including any rules implementing Title II of the Act), and any other professional standards, that are established or adopted by the Board under Section 103 of the Act.

[Effective pursuant to SEC Release No. 34-48730,
File No. PCAOB-2003-05 (October 31, 2003)]

(a)(ix) Accounting Board Demand

The term "accounting board demand" means a command to produce documents and/or to appear at a certain time and place to give testimony.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(a)(x) Accounting Board Request

The term "accounting board request" means a request to produce documents and/or to appear at a certain time and place to give testimony.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(a)(xi) Appropriate State Regulatory Authority

The term "appropriate state regulatory authority" means the State agency or other authority responsible for the licensure or other regulation of the practice of accounting in the State or States having jurisdiction over a registered public accounting firm or associated person thereof, with respect to the matter in question.

[Effective pursuant to SEC Release No. 34-49787,
File No. PCAOB-2003-08 (June 1, 2004)]

(a)(xii) Auditor

The term "auditor" means both public accounting firms registered with the Public Company Accounting Oversight Board and associated persons thereof.

[Effective pursuant to SEC Release No. 34-50331,
File No. PCAOB-2004-06 (September 8, 2004)]

(b)(i) Board

The term "Board" means the Public Company Accounting Oversight Board.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(b)(ii) Bar

The term "bar" means a permanent disciplinary sanction prohibiting a person from being associated with a registered public accounting firm.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(c)(i) Commission

The term "Commission" means the Securities and Exchange Commission.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(c)(ii) Counsel

The term "counsel" means an attorney at law admitted to practice, and in good standing, before the Supreme Court of the United States or the highest court of any state.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(d)(i) Disciplinary Proceeding

The term "disciplinary proceeding" means a proceeding initiated by an order instituting proceedings, held for the purpose of determining whether or not a registered public accounting firm, or any person associated with a registered public accounting firm, has engaged in any act or practice, or omitted to act, in violation of the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards; or has failed reasonably to supervise an associated person in connection with any such violation by that person; or has failed to cooperate with the Board in connection with an investigation; and whether to impose a sanction pursuant to Rule 5300.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(d)(ii) Document

The term "document" is synonymous in meaning and equal in scope to its usage in Federal Rule of Civil Procedure 34(a), including, without limitation, electronic or computerized data compilations. A draft or non-identical copy is a separate document within the meaning of this term. In no event shall the term "document" be construed to be limited to audit work papers.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(e)(i) Exchange Act

The term "Exchange Act" means the Securities Exchange Act of 1934, as amended.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(f)(i) Foreign Public Accounting Firm

The term "foreign public accounting firm" means a public accounting firm that is organized and operates under the laws of a non-U.S. jurisdiction, government or political subdivision thereof.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(f)(ii) Foreign Registered Public Accounting Firm

The term "foreign registered public accounting firm" means a foreign public accounting firm that is a registered public accounting firm.

[Effective pursuant to SEC Release No. 34-50291,
File No. PCAOB-2004-04 (August 30, 2004)]

(h)(i) Hearing Officer

The term "hearing officer" means a person, other than a Board member or staff of the interested division, duly authorized by the Board to preside at a hearing.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(i)(i) Issuer Market Capitalization

The terms "issuer market capitalization" and "market capitalization of an issuer" mean—

- (1) Except as provided in paragraph (i)(i)(2) of this rule, the aggregate market value of all classes of an issuer's common stock that trade in the United States; or
- (2) With respect to an issuer: (i) that is registered under Section 8 of the Investment Company Act or has elected to be regulated as a business development company pursuant to Section 54 of the Investment Company Act, and (ii) whose securities are not traded on a national securities exchange or quoted on Nasdaq, the issuer's net asset value.

[Effective pursuant to SEC Release No. 34-48278,
File No. PCAOB-2003-02 (August 1, 2003)]

(i)(ii) Investment Company Act

The term "Investment Company Act" means the Investment Company Act of 1940, as amended.

[Effective pursuant to SEC Release No. 34-48278,
File No. PCAOB-2003-02 (August 1, 2003)]

(i)(iii) Issuer

The term "issuer" means an issuer (as defined in Section 3 of the Exchange Act), the securities of which are registered under Section 12 of that Act, or that is required to file reports under Section 15(d) of that Act, or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933, and that it has not withdrawn.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(i)(iv) Interested Division

The term "interested division" means a division or office of the Board assigned primary responsibility by the Board to participate in a particular proceeding.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(n)(i) Notice

The term "notice" means the document sent by the Board to an issuer, pursuant to Rule 7102, setting forth such issuer's share of the accounting support fee under Section 109 of the Act and Rules 7101 and 7102.

[Effective pursuant to SEC Release No. 34-48278,
File No. PCAOB-2003-02 (August 1, 2003)]

(n)(ii) Non-Audit Services

The term "non-audit services" means—

- (1) subject to paragraph (n)(ii)(2) of this Rule, services related to financial information systems design and implementation as defined in Rule 2-01(c)(4)(ii) of Regulation S-X, 17 C.F.R. 2-01(c)(4)(ii), and all other services, other than audit services or other accounting services.
- (2) effective after December 15, 2003, all other services other than audit services, other accounting services, and tax services.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(n)(iii) Non-U.S. Inspection

The term "non-U.S. inspection" means an inspection of a foreign registered public accounting firm conducted within a non-U.S. oversight system.

[Effective pursuant to SEC Release No. 34-50291,
File No. PCAOB-2004-04 (August 30, 2004)]

(o)(i) Other Accounting Services

The term "other accounting services" means—

- (1) subject to paragraph (o)(i)(2) of this Rule, services that are normally provided by the public accounting firm that audits the issuer's financial statements in connection with statutory and regulatory filings or engagements and assurance and related services that are reasonably related to the performance of the audit or review of the issuer's financial statements, other than audit services.
- (2) effective after December 15, 2003, assurance and related services that are reasonably related to the performance of the audit or

review of the issuer's financial statements, other than audit services.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(o)(ii) Order Instituting Proceedings

The term "order instituting proceedings" means an order issued by the Board commencing a disciplinary proceeding.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(p)(i) Person Associated With a Public Accounting Firm (and Related Terms)

The terms "person associated with a public accounting firm" (or with a "registered public accounting firm" or "applicant") and "associated person of a public accounting firm" (or of a "registered public accounting firm" or "applicant") mean any individual proprietor, partner, shareholder, principal, accountant, or professional employee of a public accounting firm, or any independent contractor that, in connection with the preparation or issuance of any audit report—

- (1) shares in the profits of, or receives compensation in any other form from, that firm; or
- (2) participates as agent on behalf of such accounting firm in any activity of that firm;

provided, however, that these terms do not include a person engaged only in clerical or ministerial tasks or a person whom the public accounting firm reasonably believes is a person primarily associated with another registered public accounting firm.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(p)(ii) Play a Substantial Role in the Preparation or Furnishing of an Audit Report

The phrase "play a substantial role in the preparation or furnishing of an audit report" means—

- (1) to perform material services that a public accounting firm uses or relies on in issuing all or part of its audit report with respect to any issuer, or
- (2) to perform the majority of the audit procedures with respect to a subsidiary or component of any issuer the assets or revenues of which constitute 20% or more of the consolidated assets or revenues of such issuer necessary for the principal accountant to issue an audit report on the issuer.

Note 1: For purposes of paragraph (1) of this definition, the term "material services" means services, for which the engagement hours or fees constitute 20% or more of the total engagement hours or fees, respectively, provided by the principal accountant in connection with the issuance of all or part of its audit report with respect to any issuer. The term does not include non-audit services provided to non-audit clients.

Note 2: For purposes of paragraph (2) of this definition, the phrase "subsidiary or component" is meant to include any subsidiary, division, branch, office or other component of an issuer, regardless of its form of organization and/or control relationship with the issuer.

Note 3: For purposes of determining "20% or more of the consolidated assets or revenues" under paragraph (2) of this Rule, this determination should be made at the beginning of the issuer's fiscal year using prior year information and should be made only once during the issuer's fiscal year.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(p)(iii) Public Accounting Firm

The term "public accounting firm" means a proprietorship, partnership, incorporated association, corporation, limited liability company, limited liability partnership, or other legal entity that is engaged in the practice of public accounting or preparing or issuing audit reports.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(p)(iii) Party

The term "party" means the interested division, any person named as a respondent in an order instituting proceedings or notice of a hearing, any applicant named in the caption of any order, or any person seeking Board review of a decision.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(p)(iv) Person

The term "person" means any natural person or any business, legal or governmental entity or association.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(p)(vi) Professional Standards

The term "professional standards" means—

- (A) accounting principles that are—
 - (i) established by the standard setting body described in section 19(b) of the Securities Act of 1933, as amended by the Act, or prescribed by the Commission under section 19(a) of the Securities Act of 1933 or section 13(b) of the Securities Exchange Act of 1934; and
 - (ii) relevant to audit reports for particular issuers, or dealt with in the quality control system of a particular registered public accounting firm; and
- (B) auditing standards, standards for attestation engagements, quality control policies and procedures, ethical and competency standards, and independence standards (including rules implementing Title II of the Act) that the Board or the Commission determines—
 - (i) relate to the preparation or issuance of audit reports for issuers; and
 - (ii) are established or adopted by the Board under section 103(a) of the Act, or are promulgated as rules of the Commission.

[Effective pursuant to SEC Release No. 34-49787,
File No. PCAOB-2003-08 (June 1, 2004)]

(r)(i) Registered Public Accounting Firm

The term "registered public accounting firm" means a public accounting firm registered with the Board.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(r)(ii) Rules or Rules of the Board

The terms "Rules" or "Rules of the Board" mean the bylaws and rules of the Board (as submitted to and approved, modified, or amended by the Commission in accordance with Section 107 of the Act) and those stated policies, practices, and interpretations of the Board that the Commission, by rule, may deem to be rules of the Board, as necessary or appropriate in the public interest or for the protection of investors.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(r)(iii) Revocation

The term "revocation" means a permanent disciplinary sanction terminating a firm's registration.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(s)(i) Securities Act

The term "Securities Act" means the Securities Act of 1933, as amended.

[Effective pursuant to SEC Release No. 34-48278,
File No. PCAOB-2003-02 (August 1, 2003)]

(s)(ii) Securities Laws

The term "securities laws" means the provisions of the law referred to in Section 3(a)(47) of the Exchange Act, as amended by the Act, and includes the rules, regulations, and orders issued by the Commission thereunder.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(s)(iii) State

The term "State" means any state of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, or any other territory or possession of the United States.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

(s)(iii) Secretary

The term "Secretary" means the Secretary of the Board.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(s)(iv) Suspension

The term "suspension" means a temporary disciplinary sanction, which lapses by its own terms, prohibiting—

- (1) a registered public accounting firm from preparing or issuing, or participating in the preparation or issuance of, any audit report with respect to any issuer; or
- (2) a person from being associated with a registered public accounting firm.

[Effective pursuant to SEC Release No. 34-49704,
File No. PCAOB-2003-07 (May 14, 2004)]

(t)(i) Tax Services

The term "tax services" means professional services rendered for tax compliance, tax advice, and tax planning.

[Effective pursuant to SEC Release No. 34-48180,
File No. PCAOB-2003-03 (July 16, 2003)]

SECTION 3.

PROFESSIONAL STANDARDS

Part 1 – General Requirements

Rule 3100. Compliance With Auditing and Related Professional Practice Standards.

A registered public accounting firm and its associated persons shall comply with all applicable auditing and related professional practice standards.

[Effective pursuant to SEC Release No. 34-48730;
File No. PCAOB-2003-05; October 31, 2003]

Rule 3101. Certain Terms Used in Auditing and Related Professional Practice Standards.

- (a) The Board's auditing and related professional practice standards use certain terms set forth in this rule to describe the degree of responsibility that the standards impose on auditors.

(1) **Unconditional Responsibility:** The words "must," "shall," and "is required" indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. Failure to discharge an unconditional responsibility is a violation of the relevant standard and Rule 3100.

(2) **Presumptively Mandatory Responsibility:** The word "should" indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the Board's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard. Failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.

Note: In the rare circumstances in which the auditor believes the objectives of the standard can be met by alternative means, the auditor, as part of documenting the planning and performance of the work, must document the information that demonstrates that the objectives were achieved.

(3) **Responsibility To Consider:** The words "may," "might," "could," and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on

the exercise of professional judgment in the circumstances consistent with the objectives of the standard.

Note: If a Board standard provides that the auditor "should consider" an action or procedure, consideration of the action or procedure is presumptively mandatory, while the action or procedure is not.

- (b) The terminology in paragraph (a) of this rule applies to the responsibilities imposed by the auditing and related professional practice standards, including the interim standards adopted in Rules 3200T, 3300T, 3400T, 3500T, and 3600T.
- (c) The documentation requirement in paragraph (a)(2) is effective for audits of financial statements or other engagements with respect to fiscal years ending on or after November 15, 2004.

[Effective pursuant to SEC Release No. 34-50331;
File No. PCAOB-2004-06, September 8, 2004]

Rule 3200T. Interim Auditing Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002)), to the extent not superseded or amended by the Board.

Note: Under Section 102(a) of the Act, public accounting firms are not required to be registered with the Board until 180 days after the date of the determination of the Commission under section 101(d) that the Board has the capacity to carry out the requirements of Title I of the Act (the "mandatory registration date"). The Board intends that, during the period preceding the mandatory registration date, the Interim Auditing Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624;
File No. PCAOB-2003-11; April 28, 2004
and SEC Release Nos 33-8233 & 3447746; April 25, 2003]

Rule 3300T. Interim Attestation Standards.

In connection with an engagement (i) described in the AICPA's Auditing Standards Board's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01 (AICPA 2002)) and (ii) related to the preparation or issuance of audit reports for issuers, a registered public accounting firm, and its associated persons, shall comply with the AICPA Auditing Standards Board's Statements on Standards for Attestation Engagements, and related interpretations and Statements of Position, as in existence on April 16, 2003, to the extent not superseded or amended by the Board.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Attestation Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11; April 28, 2004 and SEC Release Nos 33-8233 & 3447746; April 25, 2003]

Rule 3400T. Interim Quality Control Standards.

A registered public accounting firm, and its associated persons, shall comply with quality control standards, as described in—

- (a) the AICPA's Auditing Standards Board's Statements on Quality Control Standards, as in existence on April 16, 2003 (AICPA Professional Standards, QC §§ 20–40 (AICPA 2002)), to the extent not superseded or amended by the Board; and
- (b) the AICPA SEC Practice Section's Requirements of Membership (d), (f)(first sentence), (l), (m), (n)(1) and (o), as in existence on April 16, 2003 (AICPA SEC Practice Section Manual § 1000.08(d), (f), (j), (m), (n)(1) and (o)), to the extent not superseded or amended by the Board.

Note: The second sentence of requirement (f) of the AICPA SEC Practice Section's Requirements of Membership provided for the AICPA's peer review committee to "authorize alternative procedures" when the requirement for a concurring review could not be met because of the size of the firm. This provision is not adopted as part of the Board's Interim Quality Control Standards. After the effective date of the Interim Quality Control Standards, requests for authorization of alternative procedures to a concurring review may, however, be directed to the Board.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Quality Control Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11; April 28, 2004 and SEC Release Nos 33-8233 & 3447746; April 25, 2003]

Part 5—Ethics

Rule 3500T. Interim Ethics Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with ethics standards, as described in the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002)), to the extent not superseded or amended by the Board.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Ethics Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11;

April 28, 2004 and SEC Release Nos 33-8233 & 3447746;

April 25, 2003]

Rule 3501. Definitions of Terms Employed in Section 3, Part 5 of the Rules.

When used in Section 3, Part 5 of the Rules, unless the context otherwise requires:

(a)(i) Affiliate of the Accounting Firm.

The term "affiliate of the accounting firm" (or "affiliate of the registered public accounting firm" or "affiliate of the firm") includes the accounting firm's parents; subsidiaries; pension, retirement, investment or similar plans; and any associated entities of the firm, as that term is used in Rule 2-01 of the Commission's Regulation SX, 17 C.F.R. § 210.2-01(f)(2).

(a)(ii) Affiliate of the Audit Client.

The term "affiliate of the audit client" means—

- (1) An entity that has control over the audit client, or over which the audit client has control, or which is under common control with the audit client, including the audit client's parents and subsidiaries;
- (2) An entity over which the audit client has significant influence, unless the entity is not material to the audit client;
- (3) An entity that has significant influence over the audit client, unless the audit client is not material to the entity; and
- (4) Each entity in the investment company complex when the audit client is an entity that is part of an investment company complex.

(a)(iii) Audit and Professional Engagement Period.

The term "audit and professional engagement period" includes both—

- (1) The period covered by any financial statements being audited or reviewed (the "audit period"); and

- (2) The period of the engagement to audit or review the audit client's financial statements or to prepare a report filed with the Commission (the "professional engagement period")—
 - (A) The professional engagement period begins when the registered public accounting firm either signs an initial engagement letter (or other agreement to review or audit a client's financial statements) or begins audit, review, or attest procedures, whichever is earlier; and
 - (B) The professional engagement period ends when the audit client or the registered public accounting firm notifies the Commission that the client is no longer that firm's audit client.
- (3) For audits of the financial statements of foreign private issuers, the "audit and professional engagement period" does not include periods ended prior to the first day of the last fiscal year before the foreign private issuer first filed, or was required to file, a registration statement or report with the Commission, provided there has been full compliance with home country independence standards in all prior periods covered by any registration statement or report filed with the Commission.

(a)(iv) Audit Client.

The term "audit client" means the entity whose financial statements or other information is being audited, reviewed, or attested and any affiliates of the audit client.

(c)(i) Confidential Transaction.

The term "confidential transaction" means—

- (1) In general. A confidential transaction is a transaction that is offered to a taxpayer under conditions of confidentiality and for which the taxpayer has paid an advisor a fee.
- (2) Conditions of confidentiality. A transaction is considered to be offered to a taxpayer under conditions of confidentiality if the advisor who is paid the fee places a limitation on disclosure by the taxpayer of the tax treatment or tax structure of the transaction and the limitation on disclosure protects the confidentiality of that advisor's tax strategies. A transaction is treated as confidential even if the conditions of confidentiality are not legally binding on the taxpayer. A claim that a transaction is proprietary or exclusive is not treated as a limitation on disclosure if the advisor confirms to the taxpayer that there is no limitation on disclosure of the tax treatment or tax structure of the transaction.
- (3) Determination of fee. For purposes of this definition, a fee includes all fees for a tax strategy or for services for advice (whether or not tax advice) or for the implementation of a transaction. These fees include consideration in whatever form paid, whether in cash or in kind, for services to analyze the transaction (whether or not related to the tax consequences of the transaction), for services to implement the transaction, for services to document the transaction,

and for services to prepare tax returns to the extent that the fees exceed the fees customary for return preparation. For purposes of this definition, a taxpayer also is treated as paying fees to an advisor if the taxpayer knows or should know that the amount it pays will be paid indirectly to the advisor, such as through a referral fee or fee-sharing arrangement. A fee does not include amounts paid to a person, including an advisor, in that person's capacity as a party to the transaction. For example, a fee does not include reasonable charges for the use of capital or the sale or use of property.

- (4) Related parties. For purposes of this definition, persons who bear a relationship to each other as described in section 267(b) or 707(b) of the Internal Revenue Code will be treated as the same person.

(c)(ii) Contingent Fee.

The term "contingent fee" means—

- (1) Except as stated in paragraph (2) below, any fee established for the sale of a product or the performance of any service pursuant to an arrangement in which no fee will be charged unless a specified finding or result is attained, or in which the amount of the fee is otherwise dependent upon the finding or result of such product or service.
- (2) Solely for the purposes of this definition, a fee is not a "contingent fee" if the amount is fixed by courts or other public authorities and not dependent on a finding or result.

(f)(i) Financial Reporting Oversight Role.

The term "financial reporting oversight role" means a role in which a person is in a position to or does exercise influence over the contents of the financial statements or anyone who prepares them, such as when the person is a member of the board of directors or similar management or governing body, chief executive officer, president, chief financial officer, chief operating officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, or any equivalent position.

(i)(i) Immediate Family Member.

The term "immediate family member" means a person's spouse, spousal equivalent, and dependents.

(i)(ii) Investment Company Complex.

- (1) The term "investment company complex" includes—
 - (i) An investment company and its investment adviser or sponsor;
 - (ii) Any entity controlled by or controlling an investment adviser or sponsor in paragraph (i) of this definition, or any entity under common control with an investment adviser or sponsor in paragraph (i) of this definition if the entity—
 - (A) Is an investment adviser or sponsor; or
 - (B) Is engaged in the business of providing administrative, custodian, underwriting, or transfer agent services to any investment company, investment adviser, or sponsor; and

- (iii) Any investment company or entity that would be an investment company but for the exclusions provided by section 3(c) of the Investment Company Act of 1940 (15 U.S.C. § 80a-3(c)) that has an investment adviser or sponsor included in this definition by either paragraph (i) or (ii) of this definition.
- (2) An investment adviser, for purposes of this definition, does not include a sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser.
- (3) A sponsor, for purposes of this definition, is an entity that establishes a unit investment trust.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006]

Rule 3502. Responsibility Not to Knowingly or Recklessly Contribute to Violations.

A person associated with a registered public accounting firm shall not take or omit to take an action knowing, or recklessly not knowing, that the act or omission would directly and substantially contribute to a violation by that registered public accounting firm of the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006;

As amended, effective April 29, 2006, by PCAOB Release No. 2005-020.]

Subpart 1 — Independence

Rule 3520. Auditor Independence.

A registered public accounting firm and its associated persons must be independent of the firm's audit client throughout the audit and professional engagement period.

Note 1: Under Rule 3520, a registered public accounting firm or associated person's independence obligation with respect to an audit client that is an issuer encompasses not only an obligation to satisfy the independence criteria set out in the rules and standards of the PCAOB, but also an obligation to satisfy all other independence criteria applicable to the engagement, including the independence criteria set out in the rules and regulations of the Commission under the federal securities laws.

Note 2: Rule 3520 applies only to those associated persons of a registered public accounting firm required to be independent of the firm's audit client by standards, rules or regulations of the Commission or other applicable independence criteria.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006]

Rule 3521. Contingent Fees.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006]

Rule 3522. Tax Transactions.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any non-audit service to the audit client related to marketing, planning, or opining in favor of the tax treatment of, a transaction—

- (a) **Confidential Transactions**—that is a confidential transaction; or
- (b) **Aggressive Tax Position Transactions**—that was initially recommended, directly or indirectly, by the registered public accounting firm and a significant purpose of which is tax avoidance, unless the proposed tax treatment is at least more likely than not to be allowable under applicable tax laws.

Note 1: With respect to transactions subject to the United States tax laws, paragraph (b) of this rule includes, but is not limited to, any transaction that is a listed transaction within the meaning of 26 C.F.R. § 1.6011(b)(2).

Note 2: A registered public accounting firm indirectly recommends a transaction when an affiliate of the firm or another tax advisor, with which the firm has a formal agreement or other arrangement related to the promotion of such transactions, recommends engaging in the transaction.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006;

As amended, effective April 29, 2006, by PCAOB Release No. 2005-020.]

Rule 3523. Tax Services for Persons in Financial Reporting Oversight Roles.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the professional engagement period provides any tax service to a person in a financial reporting oversight role at the audit client, or an immediate family member of such person, unless—

- (a) the person is in a financial reporting oversight role at the audit client only because he or she serves as a member of the board of directors or similar management or governing body of the audit client;
- (b) the person is in a financial reporting oversight role at the audit client only because of the person's relationship to an affiliate of the entity being audited—

- (1) whose financial statements are not material to the consolidated financial statements of the entity being audited; or
 - (2) whose financial statements are audited by an auditor other than the firm or an associated person of the firm; or
- (c) the person was not in a financial reporting oversight role at the audit client before a hiring, promotion, or other change in employment event and the tax services are—
- (1) provided pursuant to an engagement in process before the hiring, promotion, or other change in employment event; and
 - (2) completed on or before 180 days after the hiring or promotion event.

Note: In an engagement for an audit client whose financial statements for the first time will be required to be audited pursuant to the standards of the PCAOB, the provision of tax services to a person covered by Rule 3523 before the earlier of the date that the firm: (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB, or (2) began procedures to do so, does not impair a registered public accounting firm's independence under Rule 3523.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006]

Rule 3524. Audit Committee Pre-approval of Certain Tax Services.

In connection with seeking audit committee pre-approval to perform for an audit client any permissible tax service, a registered public accounting firm shall—

- (a) describe, in writing, to the audit committee of the issuer—
 - (1) the scope of the service, the fee structure for the engagement, and any side letter or other amendment to the engagement letter, or any other agreement (whether oral, written, or otherwise) between the firm and the audit client, relating to the service; and
 - (2) any compensation arrangement or other agreement, such as a referral agreement, a referral fee or fee-sharing arrangement, between the registered public accounting firm (or an affiliate of the firm) and any person (other than the audit client) with respect to the promoting, marketing, or recommending of a transaction covered by the service;
- (b) discuss with the audit committee of the issuer the potential effects of the services on the independence of the firm; and
- (c) document the substance of its discussion with the audit committee of the issuer.

[Effective pursuant to SEC Release No. 34-53677;
File No. PCAOB-2006-01; April 19, 2006]

Rule 3525. Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting

In connection with seeking audit committee pre-approval to perform for an audit client any permissible non-audit service related to internal control over financial reporting, a registered public accounting firm shall—

- (a) describe, in writing, to the audit committee of the issuer the scope of the service;
- (b) discuss with the audit committee of the issuer the potential effects of the service on the independence of the firm; and

Note: Independence requirements provide that an auditor is not independent of his or her audit client if the auditor is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the auditor is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement. Several principles guide the application of this general standard, including whether the auditor assumes a management role or audits his or her own work. Therefore, an auditor would not be independent if, for example, management had delegated its responsibility for internal control over financial reporting to the auditor or if the auditor had designed or implemented the audit client's internal control over financial reporting.

- (c) document the substance of its discussion with the audit committee of the issuer.

[Effective pursuant to SEC Release No. 34-56152; File No. PCAOB-2007-02; July 27, 2007]

Rule 3526. Communication With Audit Committees Concerning Independence

A registered public accounting firm must—

- (a) prior to accepting an initial engagement pursuant to the standards of the PCAOB—
 - (1) describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence;
 - (2) discuss with the audit committee of the issuer the potential effects of the relationships described in subsection (a)(1) on the independence of the registered public accounting firm, should it be appointed the issuer's auditor; and
 - (3) document the substance of its discussion with the audit committee of the issuer.
- (b) at least annually with respect to each of its issuer audit clients—
 - (1) describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the audit client or

persons in financial reporting oversight roles at the audit client that, as of the date of the communication, may reasonably be thought to bear on independence;

- (2) discuss with the audit committee of the issuer the potential effects of the relationships described in subsection (b)(1) on the independence of the registered public accounting firm;
- (3) affirm to the audit committee of the issuer, in writing, that, as of the date of the communication, the registered public accounting firm is independent in compliance with Rule 3520; and
- (4) document the substance of its discussion with the audit committee of the issuer.

Rule 3600T. Interim Independence Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with independence standards—

- (a) as described in the AICPA's Code of Professional Conduct Rule 101, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 101 and 191 (AICPA 2002)), to the extent not superseded or amended by the Board; and
- (b) Standards Nos. 1, 2, and 3, and Interpretations 99-1, 00-1, and 00-2, of the Independence Standards Board, to the extent not superseded or amended by the Board.

Note: The Board's Interim Independence Standards do not supercede the Commission's auditor independence rules. See Rule 2-01 of Reg. S-X, 17 C.F.R. 240.2-01. Therefore, to the extent that a provision of the Commission's rule is more restrictive—or less restrictive—than the Board's Interim Independence Standards, a registered public accounting firm must comply with the more restrictive rule.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Independence Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[Effective pursuant to SEC Release No. 34-49624; File No. PCAOB-2003-11; April 28, 2004 and SEC Release Nos 33-8233 & 3447746; April 25, 2003]

Part 7—Establishment of Professional Standards

Rule 3700. Advisory Groups.

(a) Formation.

To assist it in carrying out its responsibility to establish auditing and related professional practice standards, the Board will convene one or more advisory groups, in accordance with Section 103(a)(4) of the Act.

(b) Composition.

Advisory groups, in combination or as sub-groups designated by the Board within one advisory group, will contain individuals with expertise in one or more of the following areas—

- (1) accounting;
- (2) auditing;
- (3) corporate finance;
- (4) corporate governance;
- (5) investing in public companies; and
- (6) other areas that the Board deems to be relevant to one or more auditing or related professional practice standards

(c) Selection of Members of Advisory Groups.

Members of advisory groups will be selected by the Board, in its sole discretion, based upon nominations, including self-nominations, received from any person or organization.

Note: The Board will announce, from time to time, periods during which it will receive nominations to an advisory group. During those periods, nominations may be submitted by any person or organization, including, but not limited to, any investor, any accounting firm, any issuer, and any institution of higher learning.

(d) Personal Membership.

Membership in an advisory group will be personal to the individuals selected to serve on the advisory group. A member's functions and responsibilities, including attendance at meetings, may not be delegated to others.

(e) Ethical Duties of Advisory Group Members.

Members of an advisory group shall comply with EC3, EC8(a), EC9, and, with respect to any private publication or public statement about the Board or any advisory group or any of the activities of the Board or any advisory group, EC10 of the Board's Ethics Code.

(f) Ad Hoc Task Forces.

The Board may, in its discretion, establish ad hoc task forces. The membership of such task forces may include, but is not limited to, advisory group members. To the extent not otherwise required, members of ad hoc task forces shall comply with paragraph (e) of this Rule.

Select PCAOB Releases

Introduction

The Sarbanes-Oxley Act (act) authorizes the Public Company Accounting Oversight Board (PCAOB) to establish auditing and related attestation, quality control, ethics, and independence standards to be used by registered public accounting firms in the preparation and issuance of audit reports for entities subject to the act or the rules of the Securities and Exchange Commission (SEC). Accordingly, public accounting firms registered with the PCAOB are required to adhere to all PCAOB standards in the audits of issuers, as defined by the act, and other entities when prescribed by the rules of the SEC.

PCAOB Release No. 2003-006

Establishment of Interim Professional Auditing Standards

PCAOB Release No. 2003-006

April 18, 2003

Summary:

The Public Company Accounting Oversight Board ("Board" or "PCAOB") has established interim standards of auditing, attestation, quality control, ethics, and independence ("Interim Professional Auditing Standards"). Section 103(a) of the Sarbanes-Oxley Act of 2002 ("Act") provides that the Board shall, by rule, establish auditing and related attestation, quality control, and ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports. Section 103(b) authorizes the Board to adopt rules relating to auditor independence. The Board's Interim Professional Auditing Standards were promulgated by various other bodies and pre-date the determination of the Securities and Exchange Commission ("Commission"), under Section 101(d), that the Board is capable of carrying out its responsibilities under the Act. Unlike other Rules of the Board, under Section 103(a)(3)(B) of the Act, the Board's Interim Professional Auditing Standards "shall be separately approved by the Commission at the time of the determination, without regard to the procedures required by Section 107" of the Act regarding rulemaking.

This release describes the standards that the Board has adopted as Interim Professional Auditing Standards on an initial, transitional basis in order to assure continuity and certainty in the standards that govern audits of public companies. They will remain in effect while the Board conducts a review of standards applicable to registered public accounting firms, as discussed in PCAOB Release No. 2003-005. Based on this review, the Board may modify, repeal, replace or adopt permanently the Interim Professional Auditing Standards, or any part thereof, by rulemaking according to the Board's procedures for the establishment of professional auditing standards and subject to Commission approval.

Board Contacts:

Gordon Seymour, Acting General Counsel (202/207-9034; seymourg@pcaobus.org), or Samantha Ross, Special Counsel to the Acting Chairman (202/207-9093; ross@pcaobus.org).

* * * * *

The Board has adopted Interim Professional Auditing Standards to govern the conduct of audits of public companies (i.e., "issuers" as defined in the Act). The Act provides that "[p]re-existing standards of designated professional groups of accountants may be adopted during the Board's transitional period,"¹ i.e., before the Commission's determination, under Section 101(d), that the Board is "organized and has the capacity to carry out the requirements of Title I" of the Act. Specifically, Section 103(a)(3)(B) and 103(a)(3)(A)(i) of the Act provide for the Board to adopt, as initial or transitional standards, "any portion of

¹ See S. Rep. No. 107-205, at 8 (2002).

any statement of auditing standards or other professional standards" that satisfy the requirements of Section 103(a)(1) of the Act. These interim standards are to be "separately approved by the Commission at the time of the determination, without regard to the procedures required by Section 107" of the Act regarding rulemaking, which will govern the Board's permanent standards.²

Despite the need to adopt these existing standards on an initial, transitional basis in order to assure continuity and certainty in the standards that govern audits of public companies, the Board has not determined whether it would be appropriate to include any of the Interim Professional Auditing Standards as permanent Board standards. In order to make that determination, the Board will establish a schedule and procedure for the review of all Interim Professional Auditing Standards.³ The objective of that review will be to determine, on a standard-by-standard basis, whether the Interim Professional Auditing Standards should become permanent standards of the Board, should be repealed, or should be modified. As the review of each interim standard is completed, the Board will adopt that standard as a permanent Professional Auditing Standard, with or without modifications, will repeal the standard, or will take any other appropriate action regarding the standard.

The Interim Professional Auditing Standards consist of five rules (Rules 3200T, 3300T, 3400T, 3500T, and 3600T). Appendices 1 and 2 to this release contain, respectively, the text of these rules and a section-by-section analysis of the rules. Section A of this release provides an overview of the Interim Professional Auditing Standards and of the Board's reasons for adopting these standards. Section B of this release describes the effective date of the Interim Professional Auditing Standards and the procedure for Commission approval of these standards..., other than as provided in section 103(a)(3)(B) with respect to initial or transitional standards."

A. Overview of the Interim Professional Auditing Standards

1. Interim Auditing Standards

Auditors of public companies that issue securities are required to provide audit reports that "state whether the audit was made in accordance with generally accepted auditing standards" ("GAAS").⁴ The Commission's Division of Corporation Finance will not accept an audit report on the financial statements of an issuer unless the report states that the audit to which it relates was conducted in accordance with GAAS in the United States.⁵

Before the enactment of the Act, U.S. GAAS were established by the American Institute of Certified Public Accountants ("AICPA"). General standards on auditing, as well as standards relating to audit field work and audit reports, were approved and adopted by the membership of the AICPA, and amended

² Section 103(a)(3)(B) of the Act. Section 107(b)(2) of the Act provides that "[n]o rule of the Board shall become effective without prior approval of the Commission.

³ See PCAOB Release No. 2003-005 (April 18, 2003).

⁴ See Regulation S-X, § 2-02, 17 C.F.R. § 210.2-02.

⁵ "All financial statements filed with the SEC are required to be audited in accordance with US GAAS, with an explicit statement of that fact in the auditor's report." See Division of Corporation Finance Current Accounting and Disclosure Issues (August 31, 2001), <http://www.sec.gov/divisions/corpfin/acctdisc.htm>.

by the AICPA's Auditing Standards Board ("ASB"). In addition, the ASB has developed and issued 101 Statements of Auditing Standards ("SAS") through a process that has included deliberations in public meetings, public exposure of draft statements, and adoption of statements approved by the ASB.⁶ GAAS also require an auditor to "be aware of and consider" certain AICPA interpretive publications, such as auditing Interpretations of the SASs, auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position.⁷

Subject to the Commission's oversight authority, the Act gives the Board the exclusive, statutory power to establish and amend Professional Auditing Standards to be used by registered public accounting firms in the preparation and issuance of audit reports.⁸ The Board's Professional Auditing Standards supercede standards established by professional organizations, with respect to the preparation or issuance of audit reports on the financial statements of issuers. In Release No. 2003-005, the Board announced its intention to establish Professional Auditing Standards through an open process in which the accounting profession, the preparers of financial statements, the investor community, and others will have the opportunity to participate. The Board also announced in that release a plan to review existing GAAS and, when appropriate, change or establish new GAAS.

In order to assure continuity and certainty in the standards that govern audits of public companies during the Board's review, the Board has determined that GAAS proposed and promulgated by the AICPA and the ASB, as they existed on April 16, 2003, should be adopted as Interim Auditing Standards, pursuant to Section 103(a)(3)(B). Accordingly, the Board has adopted Rule 3200T to require that registered public accounting firms comply with its Interim Auditing Standards in the performance of audits, or interim reviews,⁹ of the financial statements of issuers. The Board intends that these GAAS continue to have the same authority they have currently unless and until the Board supercedes them.

2. Interim Attestation Standards

Section 103(a)(1) authorizes the Board to establish "auditing and related attestation standards."¹⁰ Consistent with the Interim Auditing Standards, the

⁶ See SAS No. 95, *Codification of Statements on Auditing Standards* ("Codification"), AU § 150.03 (AICPA 2002).

⁷ In addition, SAS No. 95 also refers to other auditing publications, such as articles in the *Journal of Accountancy* and other professional journals, including publications by state CPA societies, textbooks, and guidebooks, that have contributed to the development of GAAS. Before applying the guidance in an "other auditing publication," an auditor "should be satisfied that, in his or her judgment, it is both relevant to the circumstances of the audit and appropriate." SAS No. 95, *Codification* at AU § 150.08.

⁸ Section 3(c)(2) of the Act provides that "[n]othing in this Act or the rules of the Board shall be construed to impair or limit . . . the authority of the Commission to set standards for accounting or auditing practices or auditor independence, derived from other provisions of the securities laws or the rules or regulations thereunder, for purposes of the preparation and issuance of any audit report, or otherwise under applicable law."

⁹ Interim reviews of financial information are integrally related to audits. See generally SAS No. 100. For example, SAS No. 100 makes clear that the general standards on auditing discussed in SAS No. 95 "are applicable to a review of interim financial information." See id. at ¶ 1; see also id. at ¶¶ 12-13 (requiring new auditor conducting initial review of interim financial information to perform procedures, including making inquiries and reviewing the work papers of predecessor auditor and obtaining knowledge of entity's internal controls).

¹⁰ Section 2(a)(10) of the Act also defines Professional Standards to include "standards for attestation engagements . . . that the Board or the Commission determines . . . relate to the preparation or issuance of audit reports for issuers."

Board's Rule 3300T designates the Statements on Standards for Attestation Engagements ("SSAE") and related Interpretations and Statements of Position adopted by the ASB, as they existed on April 16, 2003, as the Board's Interim Attestation Standards. Accordingly, registered public accounting firms must comply with those SSAEs that are related to the preparation or issuance of an audit report on the financial statements of an issuer.¹¹

3. Interim Quality Control Standards

Section 103(a)(1) authorizes the Board to establish quality control standards for registered public accounting firms. Until enactment of the Act, the ASB's Statements on Quality Control Standards ("SQCS") were the primary source of such standards.¹² In addition, public accounting firms that are members of the AICPA's SEC Practice Section have committed to satisfying a number of other quality control-related requirements. Consistent with the Interim Auditing Standards and the Interim Attestation Standards, the Board's Rule 3400T designates the Statements on Quality Control Standards adopted by the ASB, as they existed on April 16, 2003, as the Board's Interim Quality Control Standards.

Rule 3400T also designates certain AICPA SEC Practice Section membership requirements as additional Interim Quality Control Standards.¹³ It should be noted that the Board is not adopting as interim standards the entirety of the AICPA SEC Practice Section's membership requirements.¹⁴ Further, because the Board intends the Interim Quality Control Standards to preserve existing standards as they apply currently, consistent with Section 103(a)(3) of the Act, those Interim Quality Control Standards adapted from the AICPA SEC Practice Section requirements apply only to those firms that are members of the AICPA SEC Practice Section.¹⁵ The requirements incorporated in Rule 3400T, which are described in more detail in Appendix 2, related to the following matters—

- Continuing professional education of audit firm personnel;
- Concurring partner review of the audit report and the financial statements of Commission registrants;¹⁶

¹¹ Rule 3300T.

¹² See SAS 25, Codification at AU § 161 (requiring accounting firms to have quality controls for their audit practices). The ASB's standards define quality control as "a process to provide the firm with reasonable assurance that its personnel comply with applicable professional standards and the firm's standards of quality." See System of Quality Control for a CPA Firm's Accounting and Auditing Practice, AICPA Professional Standards ("Professional Standards"), QC § 20.03 (AICPA 2002). The ASB's standards further set forth five broad elements of appropriate quality control in a public accounting firm, which relate to maintaining independence, integrity, and objectivity; managing personnel; establishing guidelines for accepting and continuing clients; performing engagements; and monitoring the existing quality control policies and procedures. Professional Standards at QC § 20.07.

¹³ AICPA SEC Practice Section Reference Manual, § 1000.08(d), (f), (l), (m), (n)(1) and (o).

¹⁴ For example, the Board is not adopting those SECPS membership requirements that require each member of the firm to be a member of the AICPA or that require member firms to submit to peer reviews, to report information to the SECPS or to the AICPA's quality control inquiry committee, or to pay dues to the SECPS. See AICPA SEC Practice Section Reference Manual, § 1000.08(a), (c), (g), (j), (k) and (p). Nor is the Board adopting those SECPS membership requirements that have been superceded by statute or by Commission or Board rule.

¹⁵ In the future the Board may, by rulemaking and pursuant to its standards-setting procedures, extend the AICPA SEC Practice Section requirements to other registered public accounting firms.

¹⁶ SECPS membership requirement (f) sets forth the Practice Section's concurring review requirements, which the Board has adopted as part of its Interim Quality Control Standards. See AICPA SEC Practice Section Reference Manual, § 1000.08(f). Requirement (f) also permitted the AICPA "peer review committee [to] authorize alternative procedures where this requirement cannot be met because

(continued)

- Communication by written statement to all professional personnel of firm policies and procedures on the recommendation and approval of accounting principles, present and potential client relationships, and the types of services provided;
- Notification of the Commission of resignations and dismissals from audit engagements for Commission registrants;
- Audit firm obligations with respect to the policies and procedures of correspondent firms and of other members of international firms or international associations of firms; and
- Policies and procedures to comply with applicable independence requirements.

4. Interim Ethics Standards

Section 103(a)(1) authorizes the Board to establish ethics standards.¹⁷ The Board's Rule 3500T designates the provisions of the AICPA's Code of Professional Conduct on integrity and objectivity, as Interim Ethics Standards.¹⁸ Accordingly, registered public accounting firms must comply with the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence as of the date of this release.¹⁹ Consistent with the other interim standards adopted by the Board, these ethical standards continue to have the same authority they have currently unless and until the Board supersedes them.

5. Interim Independence Standards

Section 103(b) of the Act authorizes the Board to "establish such rules as may be necessary or appropriate in the public interest or for the protection of investors, to implement, or as authorized under, title II of this Act."²⁰ The Board has adopted Interim Independence Standards, based on the provisions of the AICPA's Code of Professional Conduct regarding independence and existing standards and interpretations of the Independence Standards Board. Rule 3600T requires registered public accounting firms to comply with these independence standards in connection with the audit of any Commission registrant.

On January 28, 2003, the Commission adopted final rules to strengthen requirements regarding auditor independence and enhance disclosure regarding fees paid to auditors and otherwise to strengthen the Commission's existing

(footnote continued)

of the size of the member firm." The Board has not adopted this part—the second sentence—of SECPS membership requirement (f). Under Section 103(a)(3)(A)(i), the Board "may adopt as its rules . . . any portion of any statement of auditing standards or other professional standards that the Board determines" satisfy the Act's requirements. The Board does, however, intend to permit requests for similar relief to be sought from the Board.

¹⁷ Section 2(a)(10)(B) of the Act also defines Professional Standards to include "ethical and competency standards . . . that the Board or the Commission determines . . . relate to the preparation or issuance of audit reports for issuers."

¹⁸ Professional Standards at ET §§ 102 and 191.

¹⁹ Rule 3500T.

²⁰ Title II of the Act addresses auditor independence. In addition, Section 2(a)(10) of the Act defines "Professional Standards" to include "independence standards (including rules implementing title II) that the Board or the Commission determines . . . relate to the preparation or issuance of audit reports for issuers."

auditor independence rules.²¹ These rules were designed to implement provisions of the Act. All registered public accounting firms are required to comply with Commission rules, and the Board's Interim Independence Standards do not supplant the Commission's independence rules. To the extent that the Commission's rules are more restrictive—or less restrictive—than the Board's Interim Independence Standards, registered public accounting firms must comply with the more restrictive requirements. The note to Rule 3600T clarifies this point.

B. Effective Date for the Interim Professional Auditing Standards and Procedure for Commission Approval

Under Section 103(a)(3)(B) of the Act, the Board's Interim Professional Auditing Standards "shall be separately approved by the Commission at the time of [the] determination" of the Commission under Section 101(d) of the Act that the Board has the capacity to carry out the requirements of Title I of the Act. This determination is expected to be made no later than April 26, 2003.²² The Interim Professional Auditing Standards shall be effective as of the date of the Commission's approval of them, which, accordingly, is expected to be no later than April 26, 2003.

* * * * *

On the 16th day of April, in the year 2003, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ISSUED BY THE BOARD.

APPENDICES:

1. Rules Relating to Interim Professional Auditing Standards
2. Section-by-Section Analysis of Rules Relating to Interim Professional Auditing Standards

²¹ See SEC, Strengthening the Commission's Requirements Regarding Auditor Independence, Securities Act Release No. 33-8183, 68 Fed. Reg. 6,006 (Jan. 28, 2003), as amended by Securities Act Release No. 33-8183A, 68 Fed. Reg. 15,354 (March 26, 2003).

²² Section 101(d) of the Act requires the Board to take such actions as are necessary or appropriate to enable the Commission to make this determination no later than 270 days after the enactment of the Act, i.e., no later than April 26, 2003.

Appendix 1

Rules Relating to Interim Professional Auditing Standards

RULES OF THE BOARD

SECTION 7. PROFESSIONAL STANDARDS

RULE 3200T. Interim Auditing Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002)).

Note: Under Section 102(a) of the Act, public accounting firms are not required to be registered with the Board until 180 days after the date of the determination of the Commission under section 101(d) that the Board has the capacity to carry out the requirements of Title I of the Act (the "mandatory registration date"). The Board intends that, during the period preceding the mandatory registration date, the Interim Auditing Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3200T. See Release No. 2003-026 for language of the amendment.]

RULE 3300T. Interim Attestation Standards.

In connection with an engagement (i) described in the AICPA's Auditing Standards Board's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01 (AICPA 2002)) and (ii) related to the preparation or issuance of audit reports for issuers, a registered public accounting firm, and its associated persons, shall comply with the AICPA Auditing Standards Board's Statements on Standards for Attestation Engagements, and related interpretations and Statements of Position, as in existence on April 16, 2003.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Attestation Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3300T. See Release No. 2003-026 for language of the amendment.]

RULE 3400T. Interim Quality Control Standards.

A registered public accounting firm, and its associated persons, shall comply with quality control standards, as described in—

- (a) the AICPA's Auditing Standards Board's Statements on Quality Control Standards, as in existence on April 16, 2003 (AICPA Professional Standards, QC §§ 20–40 (AICPA 2002)); and
- (b) the AICPA SEC Practice Section's Requirements of Membership (d), (f)(first sentence), (l), (m), (n)(1) and (o), as in existence on April 16, 2003 (AICPA SEC Practice Section Manual – 1000.08(d), (f), (j), (m), (n)(1) and (o)).

Note: The second sentence of requirement (f) of the AICPA SEC Practice Section's Requirements of Membership provided for the AICPA's peer review committee to "authorize alternative procedures" when the requirement for a concurring review could not be met because of the size of the firm. This provision is not adopted as part of the Board's Interim Quality Control Standards. After the effective date of the Interim Quality Control Standards, requests for authorization of alternative procedures to a concurring review may, however, be directed to the Board.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Quality Control Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3400T. See Release No. 2003-026 for language of the amendment.]

RULE 3500T. Interim Ethics Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with ethics standards, as described in the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002)).

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Ethics Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3500T. See Release No. 2003-026 for language of the amendment.]

RULE 3600T. Interim Independence Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with independence standards—

- (1) as described in the AICPA's Code of Professional Conduct Rule 101, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 101 and 191 (AICPA 2002)); and
- (2) Standards Nos. 1, 2, and 3, and Interpretations 99-1, 00-1, and 00-2, of the Independence Standards Board.

Note: The Board's Interim Independence Standards do not supercede the Commission's auditor independence rules. See Rule 2-01 of Reg. S-X, 17 C.F.R. 240.2-01. Therefore, to the extent that a provision of the Commission's rule is more restrictive—or less restrictive—than the Board's Interim Independence Standards, a registered public accounting firm must comply with the more restrictive rule.

Note: The Board intends that, during the period preceding the mandatory registration date, the Interim Independence Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

[PCAOB Release No. 2003-026, *Technical Amendments to Interim Standards Rules*, amends Rule 3600T. See Release No. 2003-026 for language of the amendment.]

Appendix 2

Section-by-Section Analysis of Rules Relating to Interim Professional Auditing Standards

The rules relating to interim professional auditing standards consist of PCAOB Rules 3200T, 3300T, 3400T, 3500T and 3600T. Each of the rules is discussed below.

Rule 3200T—Interim Auditing Standards

Rule 3200T provides that, in connection with the preparation or issuance of any audit report on the financial statements of an issuer, a registered public accounting firm shall comply with generally accepted auditing standards as described in the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's ("ASB") Statement on Auditing Standards ("SAS") No. 95, as in existence on April 16, 2003. SAS No. 95 describes the relative authority of various sources of generally accepted auditing standards. Specifically, SAS No. 95 describes the ten general, field work and reporting standards approved by the membership of the AICPA, and amended by the ASB, and the Statements on Auditing Standards approved by the ASB, as standards with which an auditor is required to comply.¹ As of April 16, 2003, 101 SASs had been issued by the ASB.

Statement of Auditing Standards No. 95 also provides that an "auditor should be aware of and consider" certain interpretive publications, such as the ASB's Interpretations of the SASs, auditing guidance included in AICPA Audit and Accounting Guides, and AICPA auditing Statements of Position. While these interpretive publications have not been accorded the same authority as the ten GAAS or the SASs, SAS No. 95 requires that, if an auditor does not comply with the guidance in these publications, "the auditor should be prepared to explain how he or she complied with the SAS provisions addressed by such auditing guidance." Finally, SAS No. 95 also recognizes that other auditing publications "may help the auditor understand and apply the SASs." The Board's Rule 3200T provisionally adopts this framework.

As the Note to Rule 3200T clarifies, under Section 102(a) of the Act, public accounting firms that want to continue to audit issuers are not required to be registered with the Board until 180 days after the date of the determination of the Commission under section 101(d) that the Board has the capacity to carry out the requirements of Title I of the Act (the "mandatory registration date"). The Board intends that, during the period preceding the mandatory registration date, the Interim Auditing Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

Rule 3300T—Interim Attestation Standards

Rule 3300T governs the conduct of engagements that (i) are described in the ASB's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01), and (ii) relate

¹ SAS No. 95, Codification of Statements on Auditing Standards, AU §§ 150.02-150.03. Statement of Auditing Standards No. 95 also provides that "[t]he auditor should be prepared to justify departures from the SASs."

to the preparation or issuance of audit reports for issuers. Registered public accounting firms involved in such engagements are required to comply with the ASB's Statements on Standards for Attestation Engagements, and related interpretations and AICPA Statements of Position, as in existence on April 16, 2003.

As the Note to Rule 3300T clarifies, the Board intends that, during the period preceding the mandatory registration date, the Interim Attestation Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

Rule 3400T—Interim Quality Control Standards

Rule 3400T sets forth minimum quality control standards with which registered public accounting firms must comply, in order to ensure that registered public accounting firms, and their personnel, comply with applicable accounting and auditing (and other professional) standards. Through Rule 3400T, the Board has provisionally designated the Statements on Quality Control Standards proposed and issued by the ASB and certain AICPA SEC Practice Section ("SECPS") membership requirements, as they existed, and as they applied to SEC Practice Section members, on April 16, 2003, as the Board's Interim Quality Control Standards. Because the Board intends the Interim Quality Control Standards to preserve existing standards as they applied on April 16, consistent with Section 103(a)(3) of the Act, those Interim Quality Control Standards adapted from the AICPA SEC Practice Section requirements apply only to those firms that are members of the AICPA SEC Practice Section.²

The ASB's Statements on Quality Control Standards are published in the AICPA's Professional Standards, at QC Sections 20–40. The provisions of the AICPA's SECPS membership requirements that have been incorporated into the Board's Interim Quality Control Standards are Membership Requirements (d), (f) (first sentence), (l), (m), (n)(1) and (o), and referenced appendices, which are published in the AICPA's SEC Practice Section Reference Manual §1000.08. The SECPS membership requirements that are incorporated into the Board's Interim Quality Control Standards provide as follows:

- Requirement (d) requires registered public accounting firms to "ensure that all professionals in the firm residing in the United States, including CPAs and non-CPAs, participate in at least 20 hours of qualifying continuing professional education (CPE) every year and at least 120 hours every three years. . . . [P]rofessionals who devote at least 25% of their time to performing audit, review or other attest engagements (excluding compilations), or who have the partner/manager-level responsibility for the overall supervision or review of any such engagements, must obtain at least 40% (eight hours in any one year and 48 hours every three years) of their required CPE in subjects relating to accounting and auditing."
- Requirement (f) requires registered public accounting firms to "establish policies and procedures that meet the requirements set forth in the SECPS Reference Manual, for a concurring review of the audit

² In the future the Board may, by rulemaking and pursuant to its standards-setting procedures, extend the AICPA SEC Practice Section requirements to other registered public accounting firms.

report and the financial statements by a partner other than the audit partner-in-charge of an SEC engagement before issuance of an audit report on the financial statements of an SEC engagement and before the re-issuance of such an audit report where the performance of subsequent events procedures is required by professional standards." After the effective date of the Interim Quality Control Standards, requests for authorization of alternative procedures to a concurring review may be sought from the Board. Any such request should be directed to the attention of the Director of Registration and Inspection, 1666 K Street, N.W., Washington, D.C. 20006-2803.

- Requirement (l) requires registered public accounting firms to "communicate through a written statement to all professional firm personnel the broad principles that influence the firm's quality control and operating policies and procedures on, as a minimum, matters related to the recommendation and approval of accounting principles, present and potential client relationships, and the types of services provided, and inform professional firm personnel periodically that compliance with those principles is mandatory."
- Requirement (m) requires a registered public accounting firm that has been the auditor of an SEC registrant and has resigned, declined to stand for reelection, or been dismissed, to report the fact that the "relationship has ceased directly in writing to the former SEC client, with a simultaneous copy to the Office of the Chief Accountant of the Securities and Exchange Commission" by the end of the fifth business day following the firm's determination that the relationship has ended, irrespective of whether or not the SEC registrant has reported the change in a timely-filed Form 8-K.
- Requirement (n)(1) requires registered public accounting firms that are "members of, correspondents with, or similarly associated with international firms or international associations of firms," to "seek adoption of policies and procedures by the international organization or individual foreign associated firms that are consistent with the objectives set forth in Appendix K, SECPS § 1000.45."
- Requirement (o) requires registered public accounting firms to ensure that they have "policies and procedures in place to comply" with applicable independence requirements. This requirement further specifically requires firms to establish independence policies covering relationships between the firm, its benefit plans, and its professionals, and restricted entities.

As the Note to Rule 3400T clarifies, the Board intends that, during the period preceding the mandatory registration date, the Interim Quality Control Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

Rule 3500T—Interim Ethics Standards

Rule 3500T sets forth ethics standards for registered public accounting firms and their personnel. Through Rule 3500T, the Board has provisionally designated Rule 101 of the AICPA's Code of Professional Conduct, and interpretations and rulings thereunder, as they existed on April 16, 2003, as the Board's

Interim Ethics Standards. Rule 101, and the AICPA's interpretations and rulings thereunder, are published in AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002).

As the Note to Rule 3500T clarifies, the Board intends that, during the period preceding the mandatory registration date, the Interim Ethics Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

Rule 3600T—Interim Independence Standards

Rule 3600T sets forth independence standards for registered public accounting firms and their personnel. Through Rule 3600T, the Board has provisionally designated Rule 101 of the AICPA's Code of Professional Conduct, and interpretations and rulings thereunder, as they existed on April 16, 2003, and Standards Nos. 1, 2 and 3, and interpretations 99-1, 00-1, and 00-2 of the Independence Standards Board ("ISB"), as the Board's Interim Independence Standards. Rule 101, and the AICPA's interpretations and rulings thereunder, are published in the AICPA's Professional Standards, at ET Sections 102 and 191. The ISB Standards and interpretations, which are made effective by the SEC's Policy Statement on the Establishment and Improvement of Standards Related to Auditor Independence (FR No. 50A, July 17, 2001), are currently available at www.cpaindependence.org.

The Board's Interim Independence Standards shall not be interpreted to supercede the Commission's independence requirements. Therefore, to the extent that a provision of the Commission's rule or policy is more restrictive—or less restrictive—than the Board's Interim Independence Standards, a registered public accounting firm shall comply with the more restrictive requirement.

As the Note to Rule 3600T clarifies, the Board intends that, during the period preceding the mandatory registration date, the Interim Independence Standards apply to public accounting firms that would be required to be registered after the mandatory registration date and to associated persons of those firms, as if those firms were registered public accounting firms.

PCAOB Release No. 2003-009***Compliance With Auditing and Related Professional Practice Standards—Advisory Groups***

PCAOB Release No. 2003–009
June 30, 2003

PCAOB Rulemaking
Docket Matter No. 004

Summary:

After public comment, the Public Company Accounting Oversight Board ("Board" or "PCAOB") has adopted a Rule relating to compliance with the Board's auditing and related professional practice standards and a Rule relating to the formation of advisory groups. Specifically, the Board has adopted Rule 3100, and a related definition that would appear in Rule 1001, and Rule 3700. Rule 3100 generally requires all registered public accounting firms to adhere to the Board's auditing and related professional practice standards in connection with the preparation or issuance of any audit report for an issuer (as defined in the Sarbanes-Oxley Act of 2002 (the "Act")) and in their auditing and related attestation practices. Rule 3700 governs the formation, composition and role of one or more advisory groups to assist the Board in formulating new auditing and related professional practice standards for registered public accounting firms. The Board will submit these Rules to the Securities and Exchange Commission ("Commission" or "SEC") for its approval pursuant to Section 107 of the Act. These Rules will not take effect unless approved by the Commission pursuant to Section 107 of the Act. This Release also provides additional guidance regarding the number, size and composition of advisory groups and addresses certain qualifications that the Board may consider in selecting advisory group members and the terms and conditions of membership. Further, it provides guidance about the advisory group meetings, agendas, role of members and procedures that the Board believes is important to the functioning of advisory groups.

Public Comment:

The Board released for public comment proposed Rules on the establishment of auditing and other professional standards on April 18, 2003. The Board received 22 letters of comment.

Board Contacts:

Gordon Seymour, Acting General Counsel (202/207-9034; seymourg@pcaobus.org), Thomas Ray, Deputy Chief Auditor (202/207-9112; rayt@pcaobus.org), or Mary M. Sjoquist, Special Counsel to Board Member Gradison (202/207-9084; sjoquistm@pcaobus.org).

* * * * *

Section 103(a)(1) of the Act directs the Board to establish auditing and related attestation standards, quality control standards, and ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports, as required by the Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors. Similarly, Section 103(b) authorizes the Board to establish such rules as may be necessary or appropriate to implement the auditor independence requirements in, or as authorized under, Title II of the Act. While Section 103(a)(4) directs the Board to convene such expert advisory groups as may be appropriate to aid in standards-setting, it nevertheless affords the Board considerable discretion in determining the procedures by which it will develop and adopt auditing and related professional practice standards.¹

This Release announces the adoption of Rule 3100 (and a related definition) and Rule 3700. Rule 3100 requires all registered public accounting firms to adhere to the Board's auditing (and related attestation), quality control, and ethics standards, and its independence standards. Rule 3700 addresses the formation, composition, and other basic matters concerning advisory groups, which may be convened to aid in the Board's standards-setting process. In addition, as set forth in more detail below, the Board has determined to convene, at this time, one standing advisory group (the "SAG") to assist it in performing its standards-setting responsibilities.

Section A of this Release discusses the adoption of Rule 3100. Section B discusses the adoption of Rule 3700, and the establishment of the SAG and ad hoc task forces. The text of Rule 3100 (and a related definition) and Rule 3700 and a detailed discussion of the Rules are provided in Appendices 1 and 2 hereto, respectively.

The Board has reviewed all of the public comments received on the Rules as proposed in Release No. 2003-005. In response to these comments, Rule 3100 (and a related definition) and Rule 3700, as finalized, both clarify and modify certain aspects of the proposed Rules. Most importantly, the revisions to the original proposal are as follows—

- Instead of using the term Professional Auditing Standards as originally proposed, the defined term in Rule 1001 has been changed to Auditing and Related Professional Practice Standards;
- Rule 3700(c), Selection of Members of Advisory Groups, has been revised to clarify that the Board will accept nominations to the SAG, including self-nominations, from any person or organization rather than including a nonexclusive list of specific groups; and
- Rule 3700(e), Ethical Duties of Advisory Group Members, has been revised to make EC10 of the Board's Ethics Code applicable to members of the SAG with respect to any private publication or public statement about the Board or any advisory group or any of the activities of the Board or any advisory group.²

¹ The auditing and related attestation standards, quality control standards, and ethics standards over which the Board has authority under Section 103(a) of the Act, and the independence rules the Board is authorized to adopt under Section 103(b), are collectively referred to in this Release as "auditing and related professional practice standards." This term is defined in Rule 1001(a)(viii). The Board's proposed Rules and Release used the term "professional auditing standards." As discussed in more detail in Appendix 2 to this Release, because a number of commenters found this term confusing, the Board has decided to use the term "auditing and related professional practice standards" (hereinafter, "Standards").

² See PCAOB Release No. 2003-008 (June 30, 2003) which includes the entire text of the Board's Ethics Code.

A more detailed analysis of the Board's response to the comments on the proposed Rules is included in Appendix 2. The Board's Rules will be submitted to the Commission for approval. Pursuant to Section 107 of the Act, Board Rules do not take effect unless approved by the Commission.

A. Compliance With the Board's Auditing and Related Professional Standards

Section 103(a) of the Act directs the Board, by rule, to establish auditing and related attestation standards, quality control standards, and ethics standards "to be used by registered public accounting firms in the preparation and issuance of audit reports, as required by [the] Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors." Section 103(b) of the Act also directs the Board to establish independence standards to implement, or as authorized under, Title II of the Act.³

As a corollary to the Board's exclusive, statutory authority to establish and amend Standards, all public accounting firms that are registered with the Board must comply with the Board's Standards. While this requirement is implicit in the Act, the Board has codified the obligation of registered firms to comply with the Board's Standards in Rule 3100. Any registered public accounting firm or person associated with such a firm that fails to adhere to applicable Board Standards may be the subject of a Board disciplinary proceeding in accordance with Section 105 of the Act.⁴ In general, the Board's Standards will apply to registered public accounting firms and their associated persons in connection with their audits of (and related attestations concerning) the financial statements of issuers, as defined in Section 2(a)(7) of the Act, and those firms' auditing and related attestation practices. A number of commenters suggested that this Rule was either beyond the Board's authority or would create the impression that it applied to areas outside the Board's authority. To address these concerns, commenters suggested adding language about the scope of the Board's authority to Rule 3100. After considering these comments, the Board has decided to adopt the Rule as proposed.

The Board recognizes its responsibility to oversee the audits of issuers, as that term is defined in the Act, and does not intend to suggest that registered public accounting firms and their associated persons must comply with the Board's Standards in auditing non-issuers. Rule 3100, however, requires registered public accounting firms and their associated persons to comply with all *applicable* Standards. Accordingly, if the Board's Standards do not apply to an

³ See also Report of the Committee on Banking, Housing, and Urban Affairs, U.S. Senate, on S. 2673, S. Rep. No. 107-205 (July 26, 2002) ("The Committee has concluded that the Board's plenary authority in this area is essential for the Board's effective operation, a position taken during the hearings by a number of witnesses..."). Board Rules adopting or modifying auditing and related professional practice standards require approval by the Commission. In addition, the Board recognizes that the Commission may also establish professional standards applicable to accountants that practice before it and audit reports filed with it and that the Commission has the authority to institute proceedings to amend the Board's Rules, including those that establish auditing and related professional practice standards. See Sections 2(a)(10), 3(c)(2), and 107(b)(5) of the Act.

⁴ In addition, the Act provides that any violation of the Board's Rules is to be treated for all purposes in the same manner as a violation of the Securities Exchange Act of 1934, 15 U.S.C. 78a et seq., or the rules and regulations issued thereunder, and any person violating the Board's Rules "shall be subject to the same penalties, and to the same extent, as for a violation of [the Exchange] Act or such rules or regulations." Section 3(b)(1) of the Act.

engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.

Authorities other than the Board may nevertheless require that accounting firms or individual auditors comply with the Board's Standards in the conduct of audits of (or attestations concerning) the financial statements of non-issuers.⁵ In that event, those authorities may enforce the Board's Standards pursuant to their own processes.

B. Establishment of Advisory Groups and Ad Hoc Task Forces

While the Board will, by rule, establish Standards, it recognizes that the development of such Standards should be an open, public process in which investors, the accounting profession, the preparers of financial statements, and others will have the opportunity to participate. To this end, as discussed in PCAOB Release No. 2003-005 (April 18, 2003), the Board intends to provide for a public comment process on proposed standards.⁶ The Board's staff will, of course, be actively involved in the standards-setting process, but the Board also encourages proposals and recommendations on its standards-setting agenda and standards development projects from the public. Moreover, in order to obtain the advice of a broad range of experts, the Board has determined to form an advisory group, the SAG, which may be divided into sub-groups by the Board if the need for specialized advice arises. Finally, the Board may also establish one or more ad hoc task forces to assist the staff with the drafting of technical language, among other things.

1. Authority

Section 103(a)(4) of the Act provides that the Board shall "convene, or authorize its staff to convene, such expert advisory groups as may be appropriate... to make recommendations concerning the content (including proposed drafts) of auditing, quality control, ethics, independence, or other standards required to be established under this section." The Board has decided initially that it is likely to exercise this authority by convening the SAG to participate in the standards-setting process. Rule 3700 addresses the formation, composition, and other basic matters concerning advisory groups, including the SAG.

2. Role, Size and Composition

The role of the SAG will be to assist the Board in *reviewing* existing Standards, in *evaluating* proposed Standards recommended by Board staff, Board-formed technical task forces or others and *recommending* to the Board new or amended Standards. The role of the SAG will not ordinarily include technical drafting (which will be performed by the Board's staff, with the assistance of ad hoc task forces, when necessary). Instead, the Board will look to the SAG to

⁵ Cf. Section 209 of the Act (stating that "[i]n supervising nonregistered public accounting firms and their associated persons, appropriate State regulatory authorities should make an independent determination of the proper standards applicable...").

⁶ In response to PCAOB Release No. 2003-005, the Board received several comments relating to the process by which the Board will establish standards. While this release is intended to address only the adoption of Rules 3100 and 3700, the Board will nevertheless take these comments into consideration in its standards-setting work.

provide advice and insight as to the need to formulate new Standards or change existing Standards and opinions on the impact of proposed new or changed Standards.

The Board contemplates that the SAG initially will have approximately 25 members. As noted above, the Board may, based on the circumstances of particular projects, prior to or after the formation of the SAG, form ad hoc task forces of specially qualified persons selected by the Board to assist it with specific projects. Members of any appointed ad hoc task force may or may not be members of the SAG.

The SAG will be composed of individuals with a variety of backgrounds, including practicing auditors, preparers of financial statements, investors (both individual and institutional), and others.⁷ In order to achieve this diversity, the Board expects that no one field of expertise will predominate among the SAG membership. Although SAG members may be employed or otherwise affiliated with particular organizations, the Board expects SAG members to serve in their individual capacities and not to serve as representatives of particular interests, groups or employers.

3. Nominations of SAG Members

In determining appointments to the SAG, the Board intends to solicit nominations, including self-nominations. Interested parties will have 45 days from the date of the Board's Notice ("Notice") to the public to submit nominations on a form which will be provided in the Notice. Interested parties who have submitted nominations prior to the publication of the Notice, will be sent nomination forms for completion at the time of publication of the Notice.

4. Qualifications

In evaluating nominations for the SAG, the Board will seek individuals with an interest in the quality of the audits of public companies. The Board may also consider certain factors in determining SAG appointments including but not limited to the following—

- a. SAG members will be individuals of integrity, with an understanding of the responsibilities for and the nature of financial disclosure required under the securities laws and the obligations of accountants with respect to the preparation of and issuance of audit reports with respect to such disclosures; and
- b. SAG members will have a working knowledge of one or more of the following subjects and a general understanding of the remaining subjects—
 - generally accepted auditing standards (as developed by previous auditing standards setting bodies and adopted by the Board as Standards and, in the future, as set from time to time by the Board);
 - generally accepted accounting principles;
 - the creation, audit or analysis of public financial statements;

⁷ The Board also anticipates appointing individuals from academia and state accounting regulators, among others, to the SAG.

- public company corporate governance; and
- other fields that the Board deems to be relevant.

5. Term

Unless the appointment is revoked for cause, as determined by the Board, or unless the SAG member voluntarily resigns from the SAG, membership on the SAG will be for a term of two years; provided, however, that approximately 50 percent of the initial members will be appointed for a three-year term to assure continuity. Members will not be limited in the number of terms that they may serve.

6. Conditions of Membership

Rule 3700(d) specifically states that members of the SAG will serve in their individual capacities and therefore may not delegate their duties, including attendance at meetings, as SAG members. In addition, each appointee to the SAG shall agree in writing to the following "conditions of membership" in order to avoid potential conflicts of interest and to assure that the Board's standards-setting agenda is met—

- to serve on a voluntary basis without compensation from the Board;⁸
- to seek constructive resolutions to issues raised by the Board for the SAG;
- to act in the public interest in his or her individual capacity and not as a representative of any constituency;
- to attend at least 75 percent of all SAG meetings;⁹
- to agree to spend, at an expected minimum, between 50 and 100 hours per year on SAG matters or such reasonably greater amount of time as may be necessary to achieve the goals of the SAG and the Board;¹⁰
- to refrain from using his or her position on the SAG to influence Board members or Board staff on matters directly affecting that SAG member or his or her employer, business partners or clients;¹¹
- to recuse himself or herself, or otherwise withdraw from, consideration of any matter before the SAG or the Board directly affecting such SAG member, his or her employer, business partners or clients. If recusal or withdrawal is not practical in either such

⁸ SAG members shall be entitled to reimbursement for documented reasonable travel expenses relating to participation in official SAG meetings or other SAG activities.

⁹ Attendance may be in person or by telephone or teleconference. SAG members who fail to participate in the minimum number of meetings shall be subject to removal by the Board unless excused from attendance by the Chair of the SAG for good reason.

¹⁰ During the first year of the SAG, members may expect to spend more than the minimum number of hours on SAG matters.

¹¹ SAG members are not precluded from appearing or practicing before the Board regarding matters generally affecting all issuers or registered public accounting firms, including, indirectly, the member, his or her employer, business partners or clients. Accordingly, a SAG member who is employed by a registered public accounting firm would be permitted to be involved in preparing a comment on a Board rule proposal that generally affects all issuers or registered public accounting firms.

member's or the Board's opinion, such SAG member shall resign from the SAG;¹²

- h.* to be bound by EC3, EC8(a), EC9, and, with respect to any private publication or public statement regarding the Board or the SAG or any of the activities of the Board or the SAG, EC10 of the Board's Ethics code;¹³
- i.* to annually certify his or her continuing compliance with "the conditions of membership;" and
- j.* to agree to any such other provisions that the Board may deem necessary to avoid even the appearance of a conflict of interest.

7. Meetings and Board Relations

The Board has determined that the first Chair of the SAG will be the Board's Chief Auditor and Director of Professional Standards who will be a non-voting member of the SAG. The Board will approve the agenda for all annual, semi-annual or quarterly SAG meetings as set forth below. Agenda items may also be added where the Board determines that the assistance of the SAG is required in response to emerging issues or problems. The Chair will be responsible for preparing the meeting agenda, organizing and overseeing meetings, conference calls and related activities, acting as the general liaison to the Board and finalizing all submissions to the Board based on the SAG recommendations.

The SAG will hold an annual meeting to discuss the agenda presented to the SAG on the annual standards-setting process and related matters. The SAG will also hold a semi-annual meeting. Both the annual and the semi-annual meetings will be open to the public. Meetings of the SAG may also be held, at the direction of the Board or the Chair, during the intervening quarters. In addition, at the direction of the Chair, monthly meetings of the SAG may be held, by video or teleconference, for the Board's staff to report on new issues raised by the Board for the SAG's consideration and to discuss the status of pending issues. Final decisions on recommendations to the Board and related activities will be conducted at the annual, semi-annual, or other open meeting of the SAG.¹⁴ The meetings held in the quarters between the annual and semi-annual meeting, if any, and the monthly meetings will not generally be open to the public.

If so directed by the Chair of the SAG, the SAG may convene hearings, roundtable discussions or other fact-finding activities designed to assist the SAG in the development of recommendations on new or amended Standards or other recommendations to the Board.

¹² Matters generally affecting issuers or registered public accounting firms, even though affecting the SAG member, his or her employer, business partners or clients, shall not require the member to recuse or withdraw him or herself from consideration of the matter or to resign from SAG. The Board expects that most standards-setting projects will affect issuers (or categories of issuers) and registered public accounting firms and their associated persons in a generally similar manner; however, if a standard would have a unique or disproportionate effect on a particular issuer or firm, a SAG member employed by that issuer or firm would be required under Rule 3700 to recuse himself or herself.

¹³ In PCAOB Release No. 2003-008 (June 30, 2003), the Board clarified that for purposes of applying EC8(a) to SAG members, the SAG members shall not be considered to lack independence or objectivity with regard to SAG matters merely because they (or their employer, business partners or clients) are subject to the direct or indirect oversight of the Board.

¹⁴ The Board expects the SAG to make decisions in an efficient and speedy manner. To this end, the SAG need not defer decisions on recommendations for the annual or semi-annual open meetings. Rather, at the direction of the Chair, the SAG may make decisions on recommendations at any meeting, so long as it is open to the public in some manner, including, at the direction of the Chair, telephonically.

Decisions on whether a recommendation should be made to the Board will be by a majority of the SAG members present in person or by video or teleconference. Recommendations from the SAG will be presented to the Board at an open meeting of the Board. Such recommendations will be provided in writing, including dissenting opinions, if any, by SAG members. The Board retains the exclusive authority to adopt, modify, or reject any SAG recommendation, in its sole discretion, in order to protect investors by improving the fairness and reliability of corporate disclosures as set forth in the Act.

* * * * *

On the 30th day of June, in the year 2003, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

/s/ J. Gordon Seymour

J. Gordon Seymour

Acting Secretary

June 30, 2003

APPENDICES—

1. Rules Relating to Auditing and Related Professional Practice Standards and Advisory Groups
2. Section-by-Section Analysis of Rules Relating to Auditing and Related Professional Practice Standards and Advisory Groups

Appendix 1

Rules Relating to Auditing and Related Professional Practice Standards and Advisory Groups

RULES OF THE BOARD

SECTION 1. GENERAL PROVISIONS

Rule 1001. Definitions of Terms Employed in Rules.

When used in the Rules, unless the context otherwise requires:

(a)(viii) Auditing and Related Professional Practice Standards.

The term "auditing and related professional practice standards" means the auditing standards, related attestation standards, quality control standards, ethical standards, and independence standards (including any rules implementing Title II of the Act), and any other professional standards, that are established or adopted by the Board under Section 103 of the Act.

SECTION 7. PROFESSIONAL STANDARDS

Part 1—General Requirements

Rule 3100. Compliance With Auditing and Related Professional Practice Standards.

A registered public accounting firm and its associated persons shall comply with all applicable auditing and related professional practice standards.

Part 7—Establishment of Professional Standards

Rule 3700. Advisory Groups.

a. Formation.

To assist it in carrying out its responsibility to establish auditing and related professional practice standards, the Board will convene one or more advisory groups, in accordance with Section 103(a)(4) of the Act.

b. Composition.

Advisory groups, in combination or as sub-groups designated by the Board within one advisory group, will contain individuals with expertise in one or more of the following areas—

1. accounting;
2. auditing;
3. corporate finance;
4. corporate governance;

5. investing in public companies; and
6. other areas that the Board deems to be relevant to one or more auditing or related professional practice standards.

c. Selection of Members of Advisory Groups.

Members of advisory groups will be selected by the Board, in its sole discretion, based upon nominations, including self-nominations, received from any person or organization.

Note: The Board will announce, from time to time, periods during which it will receive nominations to an advisory group. During those periods, nominations may be submitted by any person or organization, including, but not limited to, any investor, any accounting firm, any issuer, and any institution of higher learning.

d. Personal Membership.

Membership in an advisory group will be personal to the individuals selected to serve on the advisory group. A member's functions and responsibilities, including attendance at meetings, may not be delegated to others.

e. Ethical Duties of Advisory Group Members.

Members of an advisory group shall comply with EC3, EC8(a), EC9, and, with respect to any private publication or public statement about the Board or any advisory group or any of the activities of the Board or any advisory group, EC10 of the Board's Ethics Code.

f. Ad Hoc Task Forces.

The Board may, in its discretion, establish ad hoc task forces. The membership of such task forces may include, but is not limited to, advisory group members. To the extent not otherwise required, members of ad hoc task forces shall comply with paragraph (e) of this Rule.

Appendix 2

Section-by-Section Analysis of Rules Relating to Auditing and Related Professional Practice Standards and Advisory Groups

Rules Relating to Auditing and Related Professional Practice Standards

The Rules relating to auditing and related professional practice standards consist of Rule 3100, plus a new definition that appears in Rule 1001. Each of the Rules, and the new definition, is discussed below.

Rule 1001—Definitions of Terms Employed in Rules.

Rule 1001 contains definitions of terms used in the Board's Rules.

Auditing and related professional practice standards

Rule 1001(a)(viii) defines "auditing and related professional practice standards" as the auditing standards, related attestation standards, quality control standards, ethical standards, and independence standards (including any rules implementing Title II of the Act), and any other professional standards, that are established or adopted by the Board under Section 103 of the Act.

The Board had proposed to use "professional auditing standards" as the term defined in this provision. Several commenters expressed concern that characterizing attestation, quality control, ethical, and independence standards as "professional auditing standards" would confuse people as to the defined term's meaning. To address these concerns, the Board has chosen to use the term "auditing and related professional practice standards" as the defined term for the standards established or adopted by the Board under Section 103 of the Act. The Board has used the longer term "auditing and related professional practice standards," rather than the shorter "professional standards," because the term "professional standards" is defined otherwise in Section 2(a)(10) of the Act. The term "auditing and related professional practice standards" is similar to that portion of the definition of the term "professional standards" that appears in Section 2(a)(10)(B) of the Act. (Hereinafter in this Section-by-Section Analysis, auditing and related professional practice standards shall be referred to as "Standards.")

In addition, the Board's proposed definition was based on a portion of the definition of "professional standards" in Section 2(a)(10)(B) of the Act. For purposes of clarity, the Board has modified this definition slightly to track more closely the description of the standards the Board will set in Section 103(a)(1) of the Act. The definition still includes any other type of standard provided for in the definition of "professional standards" in Section 2(a)(10)(B) of the Act that the Board establishes or adopts under Section 103 of the Act. Accordingly, the definition, as revised, covers the same scope of standards as the Board's proposed rule.

**Rule 3100—Auditing and Related Professional Practice Standards
Applicable to Registered Public Accounting Firms.**

Rule 3100 provides that a registered public accounting firm and its associated persons must comply with all applicable Standards.¹ This Rule is intended to codify the obligation of registered public accounting firms and their associated persons to comply with applicable Standards and to ensure that the Board's Standards are enforceable.

A number of commenters suggested that this Rule was either beyond the Board's authority or would create the impression that the Rule applied to areas outside the Board's authority. To address these concerns, commenters suggested adding language about the scope of the Board's authority to Rule 3100. After considering these comments, the Board has decided to adopt the Rule as proposed.

The Board recognizes its responsibility to oversee the audits of issuers, as that term is defined in the Act, and does not intend to suggest that registered public accounting firms and their associated persons must comply with the Board's Standards in auditing non-issuers. Rule 3100, however, requires registered public accounting firms and their associated persons to comply with all *applicable* Standards. Accordingly, if the Board's Standards do not apply to an engagement or other activity of the firm, Rule 3100, by its own terms, does not apply to that engagement or activity.²

Finally, one commenter suggested that Rule 3100 also require registered public accounting firms and their associated person to be duly licensed, registered or permitted or otherwise to hold valid practice privileges and be in good standing under the laws of each applicable state. Registration with the Board does not supersede state registration or licensing requirements and the Board expects registered public accounting firms and their associated persons to comply with state and other applicable legal requirements. Rule 3100, however, is merely intended to codify the obligation of registered public accounting firms and their associated persons to comply with Board Standards and to ensure that the Board's Standards are enforceable. Accordingly, the Board has decided not to amend the Rule as proposed to reflect this suggestion.

¹ The Board's proposed rule included a note to clarify that proposed Rule 3100 was intended to apply to those public accounting firms that will be required to register with the Board immediately after the applicable date in order to continue to participate in the audits of issuers after such date. For U.S. public accounting firms the applicable date is October 22, 2003. Because of the approaching registration deadline, and because the Board's Interim Auditing Standards, as approved by the SEC, currently require these public accounting firms to comply with them, the Board has deleted the note as unnecessary.

² For example, the Board's Interim Auditing Standards provide that, "[i]n connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002))." See Rule 3200T. The term "audit report" is defined in the Act and the Board's Rules to mean the audit of an issuer. See Rule 1001(a)(vi), adopted by the Board in PCAOB Release. No. 2003-007. Moreover, the Board notes that it would not be a correct description of its authority to say, as one commenter suggested Rule 3100 provide, that "A registered public accounting firm and its associated persons shall comply with all applicable professional auditing standards in *performing an audit of an issuer*." Particularly with respect to the quality control standards the Board is authorized to establish, the Board may adopt standards that, while related to registered public accounting firms' audit practices, must be complied with other than in the course of performing an audit. Cf. Section 103(a)(2)(B) of the Act (requiring the Board to include, among the "quality control standards that it adopts with respect to the issuance of audit reports, requirements... relating to...hiring, professional development, and advancement of personnel").

Rules Relating to Advisory Groups

Rule 3700—Advisory Groups.

Rule 3700 addresses certain basic matters concerning the formation and use of advisory groups in the Board's standards-setting process.³ The Rule provides that the Board will convene one or more advisory groups, as contemplated in Section 103(a)(4) of the Act. Any advisory group will consist of individuals with expertise in certain, specified areas relevant to the Board's standards-setting responsibilities. Members of an advisory group will be selected by the Board. In addition, the Rule provides for the Board to establish ad hoc task forces.⁴ While such task forces may include advisory group members, a task force may consist totally or partially of non-advisory group members who are persons with specialized experience in the standard-setting project under study. To the extent persons who serve on such task forces are not advisory group members or professional staff of the Board, they must comply with the ethics provisions applicable to advisory group members under Rule 3700(e).

The Rule further provides that membership on an advisory group will be personal to the individuals selected and that the functions of an advisory group member, including attendance at meetings, may not be delegated to others. This provision is based on a comparable provision in the Financial Accounting Standards Board's Rules governing the members of the Financial Accounting Standards Advisory Council.

Finally, Rule 3700 provides that members of a Board advisory group must comply with certain provisions in the Board's Ethics Code. Specifically, the Rule makes advisory group members subject to EC3, EC8(a) and EC9, and, to the extent applicable, EC10. These provisions of the Board's Ethics Code address, respectively, general ethical principles applicable to service for the Board, disqualification in the case of conflicts of interest, the non-disclosure of non-public information, and speaking for the Board when not authorized to do so by the Board.⁵

Commenters suggested that it might be appropriate to establish more than one advisory group since expertise is likely to be required in more than one specialized area. The Board is aware that it may need advice in one or more specialized areas. However, the Board has determined to form only one standing advisory group (the "SAG"). This group, however, may, at the Board's direction, form specialized subgroups as needed. In addition, the Board may form ad hoc task forces to work with Board staff in formulating Standards in specialized areas which may then, in the Board's discretion, be added to the SAG's agenda for discussion at SAG meetings.

In addition, Commenters recommended adding other specific groups from which nominations could be received to the groups identified in Rule 3700(c) as proposed. After careful consideration of these comments, the Board has determined that Rule 3700(c) should reflect the Board's intention to accept nominations from all sources. Accordingly, Rule 3700(c) has been revised to state that the Board will accept nominations from any person or organization,

³ The Rule does not address the use of an advisory group for matters other than standards-setting.

⁴ Such task forces may be formed without regard to the procedures for the formation, composition, and selection of advisory group members under Rule 3700(a)–(c).

⁵ See PCAOB Release No. 2003-008 (June 30, 2003) for the text of the Ethics Code adopted by the Board.

including self-nominations. A note to this part of Rule 3700 provides that the Board will announce, from time to time, periods during which it will receive nominations for an advisory group.

With respect to qualifications of the advisory group members, one commenter suggested that all members have qualifications similar to those "requirements set forth for audit committee members in recently issued stock exchange and SEC" rules or proposed rules. The New York Stock Exchange ("NYSE") proposed listing requirements require that all members of audit committees of listed companies be financially literate. In addition, at least one member of the audit committee must meet the definition of an "audit committee financial expert."⁶ The NASDAQ Stock Market ("NASDAQ") proposed rules regarding qualifications for service on audit committees require that all audit committee members must be able to read and understand financial statements including a company's balance sheet, income statement, and cash flow statement and that the audit committee have at least one member who meets the definition of an "audit committee financial expert."⁷ After considering this comment, the Board has decided to adopt the Rule as proposed by the Board. While Rule 3700 does not specifically state the qualifications each member must have, the Rule does set forth the types of expertise that the Board will look for in advisory group members. In addition, as noted in Section C.4. of this Release, the Board may also consider certain specific qualifications in selecting nominees to the SAG. The Board believes that it will likely select members who, at a minimum, would meet the general qualifications set forth for "all" audit committee members in the proposed Rules of the NYSE and NASDAQ while providing the Board with the flexibility to select members from a broad spectrum of backgrounds to assist it in meeting the requirements of the Act. SAG members will be selected based upon qualifications which will be elicited from them on a nomination form and through the evaluative process.

Furthermore, commenters suggested that the composition of the SAG be flexible because the Board may find that it is unable to attract a sufficient number of qualified members from fields such as finance and investment. In response to this concern, it should be noted that, the Board expects that the SAG will be broadly representative and that no one field of expertise will predominate among the SAG membership. Other concerns regarding composition related to assuring that the SAG have a sufficient number of members with technical expertise including requiring a majority of members to be practicing auditors. Although the Board certainly intends that the SAG have practicing auditors among its members, the Board believes that it is important that the SAG be able to provide advice in a broad range of areas, including technical auditing expertise, and that technical expertise in particular areas may be obtained by forming ad hoc task forces, as needed and as appropriate for particular standards-setting projects. Other commenters recommended that—

- a. the four largest auditing firms be represented on the SAG;
- b. non-U.S. auditors be represented;
- c. the number of members associated with a single firm, company or association be limited;
- d. membership be dispersed among those affiliated with firms, companies and associations of various sizes;

⁶ See SEC Release No. 34-47672; File No. SR-NYSE-2002-33 (April 11, 2003).

⁷ See SEC Release No. 34-47516; File No. SR-NASD-2002-141 (March 17, 2003).

- e. there be a balance between financial information suppliers (representatives of public companies and auditors) and financial information users (equity and debt investors).

As noted above, the Board recognizes the need to have diversity on the SAG and in selecting members will keep diversity in mind while assuring that no one expertise will predominate among the SAG membership.

With respect to the actual functions of the SAG, one commenter, suggested that the SAG be involved in all standards-setting proposals while another commenter recommended that the actual drafting of the Standards fall within the SAG's authority. In order to maintain flexibility in the rulemaking process, the Board has determined not to revise the proposed Rule to reflect these comments. Although the SAG is likely to be involved in the Board's standards-setting process as discussed in the Release, the Board does not intend to make SAG involvement mandatory to every standards-setting project. In addition, the actual drafting of the Standards is likely to be done by the Board's staff assisted by ad hoc task forces where necessary.

Another comment related to recommending that the SAG work toward "harmonizing" international standards. Neither Rule 3100 nor 3700 is intended to address substantive standards-setting issues. Rather the Board intends to address such issues, including cooperation with standards-setters in other jurisdictions, in the future.

Commenters also made recommendations regarding SAG procedural matters. These commenters suggested that the Board address—

- a. the process for making recommendations on Standards for consideration by the Board;
- b. whether or not SAG meetings would be open to the public;
- c. the format and the frequency of the meetings;
- d. the process by which the Board will set the SAG's agenda;
- e. the appointment of a Chair for the SAG;
- f. whether the Board will provide all resources for drafting, editing, monitoring comments and publishing new and amended Standards;
- g. the term of appointment to the SAG; and
- h. an avenue for minority viewpoints to be expressed in any report or recommendation to the Board.

With the exception of the comment on resources for drafting and publishing new Standards, the Board has addressed all of these comments in Section B.7. of the Release. In summary, the SAG will hold an annual meeting and a semi-annual meeting. Additional meetings may be held in the intervening quarters. Monthly telephonic meetings are also expected to be held at the discretion of the Chair. The annual and semi-annual meetings, and any meeting at which the SAG makes a final decision on a recommendation to the Board, will be open to the public. Agenda items for the SAG will be driven in part by the schedule to be set by the Board for the review of the Interim Auditing Standards. Other agenda items will be added by the Board where the Board determines that a response to emerging issues or problems connected with audits needs to be addressed. The Board has determined that the first Chair of the SAG will be the Board's Chief Auditor and Director of Professional Standards. All SAG members will be appointed for two-year terms except that approximately one-half of the appointees initially appointed to the SAG will be appointed for a three-year term to assure continuity. There will be no limits on the terms that a member of the SAG may serve. The Board anticipates that drafting, editing, monitoring

comments and publishing, will be conducted by the Board and its staff. To the extent that the SAG is specifically authorized by the Board to undertake any of these functions and the expenses have been preapproved by the Board or a staff member delegated by the Board, the Board will cover the SAG's costs.

In response to the issue of whether the SAG's meetings will be open to the public and in order to assure that the public is informed of the SAG's operations, the Board has determined that the annual and semi-annual meetings of the SAG will be open. In addition, decisions on making recommendations to the Board will only be made at an open meeting of the SAG. All recommendations to the Board by the SAG will be presented to the Board in open public meetings of the Board and such presentations will include the presentation of minority views of the SAG members. Finally, it should be noted that Board standards-setting proposals will be subject to the public comment process before being adopted by the Board.

With respect to Rule 3700(e) relating to the ethical duties of the SAG members, one commenter recommended that the SAG members be subject to Section EC14, the certification requirements, of the Ethics Code. In response to this comment, the Board has added to its "conditions of membership" described in Section C of the Release, a requirement that members of the SAG shall annually certify their continuing compliance with the "conditions of membership." A second commenter recommended that both Rule 3700(e) and EC8(a) of the Ethics Code be clarified to confirm that being a practicing auditor does not, in and of itself, constitute a financial interest requiring recusal. Section EC8(a) of the Ethics Code has been revised to add an explanatory note that clarifies this issue.⁸ A third commenter recommended that members of the SAG be prohibited from "unauthorized" speaking for the Board. In response to this comment, the Board has revised Rule 3700(e) to make EC10 of the Board's Ethics Code applicable to any private publication or public statement by an advisory group member with regard to the Board or the advisory group or any of the activities of the Board or the advisory group. Finally, a fourth commenter recommended that a member of the SAG be permitted to share SAG material with support personnel within the member's home organization who are assigned to assist the member in his or her duties. The Board has not added a provision to address this concern. The Board believes that SAG members will normally be able to perform their responsibilities without needing access to non-public Board information. To the extent that it may be appropriate, from time to time, to permit non-public standards-setting information to be shared with individuals outside the SAG, including to permit SAG members to consult technical experts who are not employees or staff of the Board, the Board may require that such individuals agree to the confidentiality provisions under Section EC9 of the Ethics Code.

⁸ See PCAOB Release No. 2003-008 (June 30, 2003).

PCAOB Release No. 2003-025

Auditing Standard No. 1, References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board

PCAOB Release No. 2003-025

December 17, 2003

PCAOB Rulemaking

Docket Matter No. 010

Approved by the Securities and Exchange Commission on May 14, 2004, and is effective for audit reports issued or reissued on or after May 24, 2004.

Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") has adopted Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*. This standard requires registered public accounting firms to include in their reports on engagements performed pursuant to the Board's auditing and related professional practice standards, including audits and reviews of financial statements, a reference to the standards of the Public Company Accounting Oversight Board (United States). The Board will submit this standard to the Securities and Exchange Commission ("Commission" or "SEC") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

Board Contacts

* * * * *

Section 103 of the Act authorizes the PCAOB to establish auditing and related professional practice standards to be used by registered public accounting firms in connection with the preparation and issuance of audit reports as required by the Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors. Consistent with Section 103 of the Act, PCAOB Rule 3100, *Compliance With Auditing and Related Professional Practice Standards*, requires auditors to comply with all applicable auditing and related professional practice standards established by the PCAOB.

Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board* directs auditors¹ to state that

¹ Reference in the Board's standards to an "auditor" means a registered public accounting firm, or an associated person of such a firm, as defined in the Act and the Board's rules, unless specifically stated otherwise. Nothing in the Board's rules would preclude an accounting firm from conducting an audit of a company that is not an issuer in accordance with the Board's standards and so stating in its audit report. This is true regardless of whether or not the accounting firm performing the audit is registered with the Board.

the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)" whenever the auditor has performed the engagement in accordance with the Board's standards.

Section A of this release describes Auditing Standard No. 1. Section B of this release discusses and addresses the comments received on the Board's proposed auditing standard, which the Board released for public comment. The text of Auditing Standard No. 1 is attached to this release as Appendix 1.

A. Description of Auditing Standard No. 1

At the time of this release, the Board's auditing and related professional practice standards consist of the standards described in Rules 3200T through 3600T, which the Board has adopted, on an initial, transitional basis, as interim standards. The standards (with which PCAOB Rule 3100 requires registered public accounting firms, and persons associated with such firms, to comply) include these interim standards and any permanent standards that the Board adopts.

Each of the standards described in Rules 3200T through 3600T was originally adopted by the American Institute of Certified Public Accountants ("AICPA"), a committee thereof, including the Auditing Standards Board ("ASB"), or the Independence Standards Board. Thus the Board's rule on interim auditing standards, Rule 3200T, incorporates "generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, in existence on April 16, 2003" (the "interim standards").² These auditing standards were adopted, and from time to time amended, by the ASB, until the Board incorporated them into the Board's interim standards. The interim standards require auditors to include in their reports a reference to the standards that were followed in performing the engagement. These references include "generally accepted auditing standards," "U.S. generally accepted auditing standards," "auditing standards generally accepted in the United States of America," and "standards established by the AICPA."

PCAOB Auditing Standard No. 1 supersedes these references by requiring that auditors' reports on the financial statements of issuers that are issued or reissued, after Auditing Standard No. 1 becomes effective, include a statement that the engagement was conducted in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."³ This auditing standard is effective for auditors' reports issued or reissued on or after the 10th day following approval of this auditing standard by the Commission. An appendix⁴ to this standard provides illustrative reports on an audit of financial statements and a review⁵ of interim financial information of a public company.

Once Auditing Standard No. 1 becomes effective, it will require auditors to state that the engagement was performed in accordance with "the standards of

² The Board's rules on interim standards were adopted by the Board on April 16, 2003, and approved by the Commission on April 25, 2003. See SEC Rel. No. 33-8222 (April 25, 2003).

³ See Auditing Standard No. 1 ¶ 3.

⁴ Appendices to the Board's standards are an integral part of the standard and carry the same authoritative weight as the body of the standard.

⁵ Reviews of the interim financial information are integrally related to audits of financial statements. See generally Statement on Auditing Standards No. 100, *Interim Financial Information* ("SAS No. 100"). For example, SAS No. 100 makes clear that the general standards on auditing discussed in SAS No. 95 "are applicable to a review of interim financial information."

the Public Company Accounting Oversight Board (United States)," irrespective of whether the engagement was conducted before or after Auditing Standard No. 1 becomes effective. Accordingly, auditors who reissue reports that were originally issued before the date that Auditing Standard No. 1 becomes effective, or who issue reports that include comparative financial information that was the subject of an audit or review report that was issued before that date, must nevertheless state that the audit or review was performed in accordance with "the standards of the Public Company Accounting Oversight Board (United States)," if those reports are reissued after Auditing Standard No. 1 becomes effective. The Board believes that a uniform reference to the standards of the PCAOB—even with respect to audits and reviews completed before the PCAOB adopted its interim standards—is appropriate because the interim standards that the Board adopted are the "generally accepted auditing standards" with which auditors were required to comply before the PCAOB adopted its interim standards.

Referring to PCAOB standards in connection with a period that preceded the date of the PCAOB's own adoption of those standards may seem somewhat counterintuitive. The requirement is intended, however, to reflect the fact that the standards in place before the PCAOB adopted its interim standards, without change, became the PCAOB's standards. Indeed, the Board considered whether to require auditors to refer to "generally accepted auditing standards" when reissuing reports that were originally issued before Auditing Standard No. 1 becomes effective, and to refer to "standards of the PCAOB" with respect to reports issued on or after Auditing Standard No. 1 becomes effective.

The Board believes, however, that it is appropriate to describe the "generally accepted auditing standards" that the Board adopted as "standards of the PCAOB." This terminology will reflect the fact that the standards that auditors were required to use before April 25, 2003—i.e., generally accepted auditing standards as they existed on April 16, 2003—became the applicable standards on April 25 and continue to apply to audits of public companies, as the Board amends them. Auditing standards have continuously been amended over time, and auditors have consistently been required to state whether their audits complied with the then-prevailing standards. The substance of the applicable standards for audits and reviews of public company financial statements did not change on April 25, 2003. Rather, April 25, 2003, is significant only because the PCAOB gained authority over such standards on that date. The Board believes it would be inappropriate to create an impression in auditors' reports that engagements performed before Auditing Standard No. 1 becomes effective, or even before April 25, were performed in accordance with a wholly different body of standards, rather than the same body of standards at different points in its evolution.

The Board expects to amend its standards from time to time, just as the ASB amended generally accepted auditing standards from time to time. The Board believes that using a consistent description of standards prevailing at the time an audit or review report is issued—and holding auditors to compliance with those then-prevailing standards—better contributes to the creation of informative audit reports.

Upon adoption of this auditing standard, all references in the interim standards to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, and standards established by the AICPA, mean the corresponding standards of the Public Company Accounting Oversight Board. The Act and the Board's rules already require the auditor to comply with the Board's

standards. The purpose of this standard is to conform the references in the interim standards to the standards that the Act and Rule 3100 require auditors to use in connection with preparing and issuing audit and related reports on the financial statements of issuers.

Under the Act, Auditing Standard No. 1 will not be effective unless it is approved by the SEC. By its terms, Auditing Standard No. 1 will be effective for auditors' reports issued or reissued on or after the 10th day following SEC approval of this standard. Until the effective date of this standard, the reporting requirements as described in the AICPA's Codification of Statements on Auditing Standards, are still in effect as interim standards.

B. Public Comment Process and Board Responses

The Board released a proposed auditing standard, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*, for public comment, on November 12, 2003. The Board received eight written comment letters.⁶ In response to these comments, the Board's final rules both clarify and modify certain aspects of the proposal, as explained below.

1. Transitional Issues

The Board received several comments related to transitional issues, including, how the proposed standard would affect—

- reissuance of a report originally issued before the proposed standard became effective;
- issuance of a report on comparative financial statements when the audits of the financial statements for periods presented for comparative purposes were conducted before the proposed standard became effective and/or before the Board adopted its interim standards; and
- issuance of a dual-dated report that include dates that straddle the effective date of this standard.

In the proposed standard, the Board had recommended the standard be effective for auditors' reports dated on or after the later of January 1, 2004 or the 10th day after SEC approval of the standard as adopted by the Board. In evaluating the comments with regard to transition, the Board decided to modify the effective date of this standard. Rather than linking the effective date of this standard to the date of the report, this auditing standard will be effective for reports issued or reissued on or after the 10th day following SEC approval of this auditing standard. After this standard becomes effective, any auditor's report issued or reissued with respect to the financial statements of a public company must state that the engagement was performed in accordance with "the standards of the Public Company Accounting Oversight Board (United States)."

One commenter also expressed concern that the proposed standard's requirement that a report state that an audit performed prior to the PCAOB's adoption of interim standards was performed in accordance with PCAOB standards would, in essence, require the auditor to re-audit the prior period's financial statements in order to bring that audit or review into conformity with current PCAOB standards. The Board does not intend to require auditors to bring

⁶ The comment letters are available on the Board's Web site—www.pcaobus.org—and will be attached to the Board's Form 19b-4, to be filed with the Commission.

audits that were performed in accordance with then-prevailing standards into conformity with later-prevailing standards in order to reissue a previously-issued report. When the Board adopted as interim standards the generally accepted auditing standards established by the ASB, the Board also adopted the effective dates of those standards. Therefore, reference in auditors' reports to the standards of the PCAOB with respect to financial statements audited or reviewed prior to the effective date of Auditing Standard No. 1 is equivalent to the previously-required reference to generally accepted auditing standards. The reference relates to those standards that were in effect when the audit or review was completed and should not be interpreted to imply a representation that the audit or review complied with standards that became effective after the audit or review was completed. Thus, once Auditing Standard No. 1 becomes effective, a reference to generally accepted auditing standards in reports issued in connection with financial statements of public companies is no longer appropriate or necessary.

2. Applicable Standards of the PCAOB

Several commenters recommended that the Board only require auditors' reports to refer to the *auditing* standards of the PCAOB for audits of financial statements and not to the standards of the PCAOB generally. The Board intends for report references to "the standards of the Public Company Accounting Oversight Board (United States)" to mean those auditing and related professional practice standards that are applicable to the particular engagement. For example, if an issuer does not use any outside service organization that would affect its internal control over financial reporting, then the interim auditing standard on service organizations—described in the Codification of Statements on Auditing Standards at AU § 324 (*Service Organizations*), would not be applicable. On the other hand, the Board's independence standards apply to registered public accounting firms, and associated persons thereof, in connection with the preparation and issuance of audit reports for issuers.

As another example, quality control standards generally apply to a firm's system of quality control over its accounting and auditing practice and not to individual audit engagements. Thus, a breakdown in the system of quality control does not necessarily mean that a particular audit was not conducted in accordance with the standards of the PCAOB. However, such a breakdown might result in a deficient audit if it caused or contributed to an audit deficiency. The determination as to whether a particular auditing or related professional practice standard is applicable in the context of a particular audit is dependent on the nature of the standard in question and on the nature of the engagement at issue.

Thus a reference to "auditing standards" of the PCAOB would be too narrow and preclusive to other standards applicable to the audit. The Board believes that reference to "the standards of the Public Company Accounting Oversight Board (United States)" is a more descriptive reference to the standards applied in the audit.

3. Reference to GAAS

The Board received a number of comments recommending that auditors' reports, with respect to financial statement audits, describe PCAOB standards as generally accepted auditing standards. The notion of general acceptance developed at a time when auditing and accounting standards were not established with the force of law by governmental or other authoritative bodies, but

rather were established by consensus among the members of the accounting profession.

As far as auditing and related professional practice standards are concerned, the Board gained authority to establish such standards by the enactment of the Act. Professional consensus is no longer sufficient to establish auditing standards, and therefore the Board believes that it is no longer appropriate to refer to the standards with which an auditor of the financial statements of a public company must comply as "generally accepted." While those standards may be generally accepted in a variety of contexts, what gives them the force of law in the context of public company audits is adoption by the PCAOB and approval by the SEC.

Therefore, for purposes of any engagement performed in accordance with the applicable auditing and related professional practice standards of the PCAOB, references in the interim standards to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, and standards established by the AICPA, mean the standards of the PCAOB.

4. References to Country of Origin and Issuing Office

The Board also received comments recommending that the Board continue to require auditors to state in their reports that the standards according to which they performed their engagements were those standards applicable in the United States. Adopting this recommendation will make it easier for readers of audit reports that are used in cross-border offerings and listings of securities to quickly identify the jurisdiction in which the standards were promulgated. As such, the Board has required in Auditing Standard No. 1 that auditors' reports describe the PCAOB's standards as "the standards of the Public Company Accounting Oversight Board (United States)."

Another commenter recommended that auditors identify in their reports the city and state (or country) of the registered firms issuing the reports. The SEC's rules require disclosure in the auditor's report of the city and state of the accounting firm's office issuing the report.⁷ The Board also concurs with this recommendation and, accordingly, has modified the auditing standard and the illustrative reports in the appendix to Auditing Standard No. 1.

5. Other Auditors

The Board was asked to clarify the applicability of this standard, and the Board's standards generally, to circumstances where more than one auditing firm contributes to an audit of a consolidated entity. For example, a firm other than the firm engaged to report on the company's consolidated financial statements may be hired to audit the financial statements of a subsidiary company. In such circumstances, the auditor that conducts the majority of the audit is referred to as the principal auditor and the auditor of the subsidiary company is referred to as the other auditor.⁸ Depending on the significance of the portion of the financial statements audited by the other auditor, the principal auditor may divide responsibility with the other auditor by making reference to the audit of the other auditor in his or her report, or the principal auditor may take responsibility for the work of the other auditor by not making any reference to the other auditor.

⁷ 17 C.F.R. § 210.2-02 (2003).

⁸ See Codification of Auditing Standards, AU § 543 (AICPA 2002).

In either event, the entire audit must be performed in accordance with the Board's standards. Section 103 of the Act, and the Board's Rule 3100, require registered public accounting firms, and associated persons thereof, to comply with all applicable auditing and related professional practice standards in connection with the preparation and issuance of audit reports on the financial statements of issuers. Whether the other auditor is a registered public accounting firm or an associated person of a registered public accounting firm, the other auditor must comply with the standards of the PCAOB.

6. Applicability to Non-U.S. Firms Not Yet Registered With the Board

Another commenter asked the Board to clarify whether non-U.S. public accounting firms—who are not required to register with the PCAOB until 2004—will be permitted, until registered with the PCAOB, to continue to reference "auditing standards generally accepted in the United States of America" when reporting on an issuer's financial statements. Like the Board's interim standards, with which a public accounting firm is required to comply even before the firm's mandatory registration date, during the period preceding the mandatory registration date, standards of the PCAOB apply to firms engaged in work that requires their registration. Therefore, non-U.S. public accounting firms that have not yet registered, that engage in work that would require them to be registered as of the mandatory registration date, are nevertheless required to reference "the standards of the Public Company Accounting Oversight Board (United States)."

7. Application of Auditing Standard No. 1 to Audit Reports in Connection With Initial Public Offerings

Another commenter recommended that the Board expand the proposed standard to specifically address the various scenarios that auditors will encounter with respect to reporting in conjunction with initial public offerings. The SEC's Rule 3-01 of Regulation S-X requires that, like other SEC filings that must comply with Regulation S-X, a registration statement filed in connection with an initial public offering must include or otherwise incorporate "for the registrant and its subsidiaries consolidated, audited balance sheets as of the end of each of the two most recent fiscal years."⁹ In addition, Rule 3-02 of Regulation S-X requires that there "be filed, for the registrant and its subsidiaries consolidated and for its predecessors, audited statements of income and cash flows for each of the three fiscal years preceding the date of the most recent audited balance sheet."¹⁰ The Board understands these provisions to mean that an issuer desiring to register a transaction involving the sale of securities must include balance sheets for the two years preceding the transaction, and income statements and statements of cash flows for the three years preceding the transaction, each audited in accordance with standards as required by the securities laws.

In Section 103 of the Act, Congress has provided the Board authority to establish auditing and related professional practice standards "to be used by registered public accounting firms in the preparation and issuance of audit reports." In addition, the PCAOB has adopted, and the SEC has approved, PCAOB Rule 3100, which requires registered public accounting firms to comply

⁹ 17 C.F.R. § 210.3-01 (2003).

¹⁰ 17 C.F.R. § 210.3-02 (2003).

with all applicable auditing and related professional practice standards of the PCAOB in connection with the preparation and issuance of audit reports on the financial statements of issuers. Accordingly, audit reports on the financial statements of issuers must now comply with—and under Auditing Standard No. 1 auditors must state that they performed the audit in accordance with—the standards of the PCAOB. So long as audits that were performed prior to April 25, 2003, were performed in accordance with then-prevailing generally accepted auditing standards as required by Rule 2-02 of Regulation S-X, an auditor need not reaudit any financial statements that relate to periods preceding April 25, 2003. Further, as discussed above, because the Board adopted the "generally accepted auditing standards" in effect as of April 16, 2003, the Board believes it is appropriate to require auditors who issue or reissue reports on periods prior to the date Auditing Standard No. 1 becomes effective to state that their audits were performed in accordance with PCAOB standards, so long as they were performed in accordance with the "generally accepted auditing standards" prevailing at the time the audits were performed.

APPENDIX:

References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board

Appendix

References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board

1. The Sarbanes-Oxley Act of 2002 authorized the Public Company Accounting Oversight Board ("PCAOB") to establish auditing and related professional practice standards to be used by registered public accounting firms. PCAOB Rule 3100, *Compliance With Auditing and Related Professional Practice Standards*, requires the auditor to comply with all applicable auditing and related professional practice standards of the PCAOB.

2. The Board has adopted as interim standards, on an initial, transitional basis, the generally accepted auditing standards, described in the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's Statement on Auditing Standards No. 95, *Generally Accepted Auditing Standards*, in existence on April 16, 2003.¹

3. Accordingly, in connection with any engagement performed in accordance with the auditing and related professional practice standards of the PCAOB, whenever the auditor is required by the interim standards to make reference in a report to generally accepted auditing standards, U.S. generally accepted auditing standards, auditing standards generally accepted in the United States of America, or standards established by the AICPA, the auditor must instead refer to "the standards of the Public Company Accounting Oversight Board (United States)." An auditor must also include the city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued.

4. This auditing standard is effective for auditors' reports issued or reissued on or after the 10th day following approval of this auditing standard by the Securities and Exchange Commission.

5. Audit reports issued prior to the effective date of this standard were required to state that the audits that supported those reports were performed in accordance with generally accepted auditing standards. The PCAOB adopted those generally accepted auditing standards, including their respective effective dates, as they existed on April 16, 2003, as interim standards. Therefore, reference to "the standards of the Public Company Accounting Oversight Board (United States)" with respect to audits of financial statements performed prior to the effective date of this standard is equivalent to the previously-required reference to generally accepted auditing standards. Accordingly, upon adoption of this standard, a reference to generally accepted auditing standards in auditors' reports is no longer appropriate or necessary.

Note: The term "auditor" in this standard is intended to include both registered public accounting firms and associated persons thereof.

¹ The Board's rules on interim standards were adopted by the Board on April 16, 2003, and approved by the Commission on April 25, 2003. See SEC Rel. No. 33-8222 (April 25, 2003).

Appendix—Illustrative Reports

1. The following is an illustrative report on an audit of financial statements:

Report of Independent Registered Public Accounting Firm

We have audited the accompanying balance sheets of X Company as of December 31, 20X3 and 20X2, and the related statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X3. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of [at] December 31, 20X3 and 20X2, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 20X3, in conformity with U.S. generally accepted accounting principles.

[Date]

2. The following is an illustrative report on a review of interim financial information:

Report of Independent Registered Public Accounting Firm

We have reviewed the accompanying [*describe the interim financial information or statements reviewed*] of X Company as of September 30, 20X3 and 20X2, and for the three-month and nine-month periods then ended. This (these) interim financial information (statements) is (are) the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying interim financial (statements) for it (them) to be in conformity with U.S. generally accepted accounting principles.

PCAOB Release No. 2003-026

Technical Amendments to Interim Standards Rules

PCAOB Release No. 2003-026
December 17, 2003
PCAOB Rulemaking
Docket Matter No. 011

Summary:

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") has adopted certain technical amendments to its rules to reflect that the Board will be superseding, or effectively amending, the existing professional standards referred to in the Board's interim standards rules as the Board continues to set auditing and related professional practice standards.

The Board will submit these amendments to the Securities and Exchange Commission ("Commission") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). The Board's amendments will not take effect unless approved by the Commission.

Board Contacts

Thomas Ray, Deputy Chief Auditor (202/207-9112; rayt@pcaobus.org), Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org).

* * *

A. Amendments to the Board's Rules Relating to Interim Standards

On April 16, 2003, the Board adopted on an initial, transitional basis five temporary rules that refer to existing professional standards of auditing, attestation, quality control, ethics, and independence.¹ The amendments approved by the Board reflect that, when the Board adopts a new auditing and related professional practice standard that addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standards will be superseded or effectively amended. Accordingly, the Board has approved to add the phrase "to the extent not superseded or amended by the Board" to each of the interim standards rules (PCAOB Rules 3200T, 3300T, 3400T, 3500T, and 3600T). In addition, the Board is making technical amendments to Rule 3600T, revising the numbering of the paragraphs from "(1)" and "(2)" to "(a)" and "(b)". The text of these amendments is presented in the Appendix.

¹ These rules were adopted by the Board on April 16, 2003, and approved by the Securities and Exchange Commission on April 25, 2003. See SEC Rel. No. 33- 8222 (April 25, 2003).

B. Public Comment Process and Board Responses

The Board proposed technical amendments to its interim standards rules and released them for public comment, on November 12, 2003. The Board received six written comment letters.² Most of the commenters explicitly indicated support for the technical amendments to the interim standards rules, and none indicated opposition to the technical amendments. In addition, many commenters requested that the Board identify how proposed, as well as final, standards affect the existing interim standards. While it may not always be practicable to identify exactly which portions of existing standards have been superseded or amended by new Board standards, the Board recognizes the need to provide auditors with as much guidance and clarity as possible. As future standards are adopted or amended, the Board intends to identify, to the greatest extent possible, those interim standards that are amended or superseded by standards issued by the Board.

Amendments to the Board's—

- Rule 3200T, Interim Auditing Standards
- Rule 3300T, Interim Attestation Standards
- Rule 3400T, Interim Quality Control Standards
- Rule 3500T, Interim Ethics Standards
- Rule 3600T, Interim Independence Standards

² The comment letters are available on the Board's Web site—www.pcaobus.org—and will be attached to the Board's Form 19b-4, to be filed with the Commission.

Appendix

Amendments to Rules Relating to Interim Professional Auditing Standards

The Board has amended Section 3 of its rules by inserting the phrase "to the extent not superseded or amended by the Board" in Rules 3200T, 3300T, 3400T, 3500T, and 3600T, and by revising the numbering of the paragraphs in Rule 3600T from "(1)" and "(2)" to "(a)" and "(b)". The relevant portions of the Rules, as amended, are set out below. Language added by these amendments is shown in bold italics. Deleted paragraph numbers are struck through. Other text in Section 3, including notes to the Rules, remains unchanged and is indicated below by " * * * ".

RULES OF THE BOARD

* * *

SECTION 3. PROFESSIONAL STANDARDS

Part 1 — General Requirements

* * *

Rule 3200T. Interim Auditing Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with generally accepted auditing standards, as described in the AICPA Auditing Standards Board's Statement of Auditing Standards No. 95, as in existence on April 16, 2003 (Codification of Statements on Auditing Standards, AU § 150 (AICPA 2002)), *to the extent not superseded or amended by the Board.*

* * *

Rule 3300T. Interim Attestation Standards.

In connection with an engagement (i) described in the AICPA's Auditing Standards Board's Statement on Standards for Attestation Engagements No. 10 (Codification of Statements on Auditing Standards, AT § 101.01 (AICPA 2002)) and (ii) related to the preparation or issuance of audit reports for issuers, a registered public accounting firm, and its associated persons, shall comply with the AICPA Auditing Standards Board's Statements on Standards for Attestation Engagements, and related interpretations and Statements of Position, as in existence on April 16, 2003, *to the extent not superseded or amended by the Board.*

* * *

Rule 3400T. Interim Quality Control Standards.

A registered public accounting firm, and its associated persons, shall comply with quality control standards, as described in—

- (a) the AICPA's Auditing Standards Board's Statements on Quality Control Standards, as in existence on April 16, 2003 (AICPA Professional Standards, QC §§ 20–40 (AICPA 2002)), **to the extent not superseded or amended by the Board**; and
- (b) the AICPA SEC Practice Section's Requirements of Membership (d), (f)(first sentence), (l), (m), (n)(1) and (o), as in existence on April 16, 2003 (AICPA SEC Practice Section Manual § 1000.08(d), (f), (j), (m), (n)(1) and (o)), **to the extent not superseded or amended by the Board**.

* * *

Rule 3500T. Interim Ethics Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with ethics standards, as described in the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 102 and 191 (AICPA 2002)), **to the extent not superseded or amended by the Board**.

* * *

Rule 3600T. Interim Independence Standards.

In connection with the preparation or issuance of any audit report, a registered public accounting firm, and its associated persons, shall comply with independence standards—

- (1a) as described in the AICPA's Code of Professional Conduct Rule 101, and interpretations and rulings thereunder, as in existence on April 16, 2003 (AICPA Professional Standards, ET §§ 101 and 191 (AICPA 2002)), **to the extent not superseded or amended by the Board**; and
- (2b) Standards Nos. 1, 2, and 3, and Interpretations 99-1, 00-1, and 00-2, of the Independence Standards Board **to the extent not superseded or amended by the Board**.

PCAOB Release No. 2004-006

Auditing Standard No. 3, Audit Documentation

PCAOB Release No. 2004-006
June 9, 2003

PCAOB Rulemaking
Docket Matter No. 012

Summary

After public comment, the Public Company Accounting Oversight Board (the "PCAOB" or "Board") has adopted Auditing Standard No. 3, *Audit Documentation*, and an amendment to AU sec. 543 of the Interim Auditing Standards. The Board will submit this standard and amendment to the Securities and Exchange Commission ("SEC" or "Commission") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

Board Contacts

Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org), and Greg Fletcher, Assistant Chief Auditor (202/207-2203; fletcher@pcaobus.org).

* * * * *

Section 103(a)(2)(A)(i) of the Act expressly directs the Board to establish auditing standards that require registered public accounting firms to prepare and maintain, for at least seven years, audit documentation "in sufficient detail to support the conclusions reached" in the auditor's report. Audit documentation is one of only a few topics that the Act expressly requires the Board to adopt standards. Accordingly, the Board made audit documentation a priority in its standards setting responsibilities.

The Board commenced a standards-development project on audit documentation by convening a public roundtable discussion on September 29, 2003, to discuss issues and hear views on audit documentation. Before that roundtable discussion, the Board prepared and released a briefing paper on audit documentation, which posed several questions to help identify the objectives—and the appropriate scope and form—of audit documentation.¹ In addition, the Board asked participants to address specific practice issues relating to, among other things, changes in audit documentation after an audit report has been released; the essential elements and the appropriate amount of detail of audit documentation; the effect on audit documentation of a principal auditor's decision to use the work of other auditors; and retention of audit documentation.

Taking into consideration comments from participants in this roundtable discussion, advice from the Board's staff, and other input, the Board determined

¹ See Briefing Paper for the Roundtable on Audit Documentation, dated September 10, 2003. The transcript of the September 29, 2003 roundtable discussion and copies of the briefing paper are available on the Board's Web site (www.pcaobus.org).

that the existing interim auditing standard on audit documentation was not sufficient in providing direction to ensure that auditors appropriately document both the work they perform and the conclusions they reach in connection with audits and other engagements. On November 21, 2003, the Board issued a proposed auditing standard entitled *Audit Documentation*, as well as a related amendment to an interim auditing standard (paragraph .12 of AU sec. 543, *Part of Audit Performed by Other Independent Auditors*).

The Board received 38 comment letters from a variety of interested parties, including auditors, regulators, professional associations, and government agencies. Those comments led to some changes in the requirements of the standard.

The Board's standard on audit documentation will be one of the fundamental building blocks on which both the integrity of audits and the Board's oversight will rest. The integrity of an audit depends, in large part, on the existence of a complete and understandable record of the work that the auditor performed, the evidence gathered, and the conclusions reached. Meaningful review by managers and partners, or by the Board in the context of its inspections, would be difficult, if not impossible, without adequate documentation. Clear and comprehensive audit documentation is essential for auditors to enhance the quality of the audit and for the Board to fulfill its mandate to inspect registered public accounting firms "to assess the degree of compliance" of those firms with applicable standards and laws.

Appendices 1 and 2 to this release contain, respectively, the text of Auditing Standard No. 3, *Audit Documentation*, and the amendment to AU sec. 543. Appendix A to Auditing Standard No. 3 includes the Board's analysis of the comments received and the Board's responses.

A. Introduction

Auditors document the evidence supporting the conclusions reached in their reports with a work product commonly referred to as *audit documentation* or *working papers*. Sufficient audit documentation is an integral part of a quality audit. That is, the auditor documents not only the nature, timing, and extent of the work performed, but also the professional judgments made by members of the engagement team and others.

In addition to providing the basis for the conclusions in the auditor's report, audit documentation facilitates the planning, performance, and supervision of the engagement and provides the basis for the review of the quality of the work by providing the reviewer with written documentation of the evidence supporting the auditor's significant conclusions.

First and foremost, the objectives of this audit documentation standard are to improve audit quality and to enhance public confidence in the quality of auditing and other engagements. Complete and thorough audit documentation improves the quality of the work performed in many ways. One important example is that quality audit documentation is a record of the actual work performed, which provides assurance that the auditor accomplished the planned objectives. Further, the need to document the procedures performed, the evidence obtained, and the conclusions reached demands a disciplined approach to planning and performing the engagement. Also, audit documentation facilitates the reviews performed by supervisors, managers, partners, and PCAOB inspectors.

Inadequate audit documentation diminishes audit quality on many levels. First, if audit documentation does not exist for a particular procedure or conclusion related to a significant matter, its absence casts doubt as to whether the necessary work was done. If the work was not documented, then it becomes difficult for members of the engagement team, and others, to know what was done, what conclusions were reached, and how those conclusions were reached.

The more significant differences between existing requirements under the interim auditing standards and this new standard on audit documentation, along with the related amendment, are described in the following sections.

B. Auditors Must Document Their Work

As previously mentioned, the principal objective of this standard is to improve the quality of audits and other engagements. In so doing, this standard affirmatively requires that auditors document procedures performed, evidence obtained, and conclusions reached. Likewise, a deficiency in documentation is a departure from the Board's standard. The Board emphasizes that, in the event of a deficiency in documentation, the auditor must be prepared to present persuasive other evidence that the procedures were performed, evidence was obtained, and appropriate conclusions were reached.

If it is questionable whether audit procedures were performed or evidence was obtained, the auditor must determine, and if so demonstrate, that the necessary procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. There may be circumstances (for example, a Board inspection) in which the auditor may be required to demonstrate with persuasive other evidence that the procedures were actually performed, the evidence was actually obtained, and appropriate conclusions were actually reached. In this and similar contexts, oral explanation alone does not constitute persuasive other evidence. However, oral evidence may be used to clarify other written evidence.

The failure to prepare adequate documentation is serious. The severity of that failure depends on the factors that determine the nature and extent of the documentation for a particular audit area or auditing procedure. For example, when the risk of material misstatement associated with an assertion is high, the failure to document the procedures, evidence, and conclusions related to that assertion is a very serious violation of PCAOB Standards. Failure to provide adequate documentation could limit an auditor's ability to demonstrate that the work was actually performed.

C. An Experienced Auditor Must Understand the Work

Audits and reviews of issuers' financial statements are now, under the Act, subject to review by PCAOB inspectors. Therefore, the Board determined that a documentation standard that enables a PCAOB inspector to understand the work that was performed is essential. Similar to the U.S. General Accounting Office's documentation standard for government and other audits conducted in accordance with generally accepted government auditing standards,² this standard requires audit documentation to contain sufficient information to enable an experienced auditor, having no previous connection with the engagement,

² U.S. General Accounting Office, *Government Auditing Standards*, "Field Work Standards for Financial Audits" (2003 Revision), paragraph 4.22.

to understand the work that was performed, the name of the person(s) who performed it, the date it was completed, and the conclusions reached.

This standard also defines an *experienced auditor* as one who has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

D. Two Significant Dates Defined in This Standard

To ensure quality and consistency in the preparation and retention of audit documentation, the standard defines two important dates: (1) the report release date and (2) the documentation completion date. The *report release date* is the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. After the report release date, auditors will have 45 days to assemble a complete and final set of audit documentation. The end of this 45-day period is the *documentation completion date*.

Prior to the report release date, the auditor must have—

- Completed all necessary auditing procedures, including clearing review notes and providing support for all final conclusions, and
- Obtained sufficient evidence to support the representations in the auditor's report.

If the auditor obtains and documents evidence after the report release date, the auditor should refer to the interim auditing standards, AU sec. 390, *Consideration of Omitted Procedures After the Report Date* and AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report* for related guidance. Auditors should not discard any previously existing documentation in connection with obtaining and documenting evidence after the report release date.

If procedures are performed subsequent to the report release date, auditors must identify and document any additions to audit documentation as a result of those procedures. This documentation must include the nature of the change, the date of the change, the name of the person who prepared the change, and the reason for the change. Furthermore, audit documentation must not be deleted or discarded after the documentation completion date.

E. Subsequent Changes to Audit Documentation

This standard requires that changes to audit documentation after the documentation completion date be documented without deleting or discarding the original documents. Such documentation must indicate the date the information was added, who added it, and the reason for adding it. The SEC has articulated its position on working papers, as well as the importance of documenting any subsequent changes to the working papers.

Working papers prepared or collected by auditors in the course of an audit provide the single most important support for their representation regarding compliance with generally accepted auditing standards. They serve as the repository for the competent evidential matter necessary to afford the auditors with a reasonable basis for opining on an issuer's financial position. Transactions or events occurring long after the balance sheet date often require reference to prior working papers, and such working papers may have significant usefulness in future audits. It is therefore imperative that auditors preserve their working papers in a complete and unaltered form.

Auditors should be encouraged to devise orderly procedures for the proper control over the contents of working papers. Moreover, the Commission recognizes that the necessity for evidential matter to be included in the auditor's working papers varies substantially depending on individual audits. When any alterations or additions are made to the working papers subsequent to the issuance of the auditor's report, however, such alterations or additions should themselves be properly documented and indicate the time and circumstances under which they are made.³

F. Documentation Deficiencies

Documentation added to the working papers well after completion of the audit or other engagement is likely to be of a lesser quality than that produced contemporaneously when the procedures were performed. It is very difficult to reconstruct and recall specific activities related to gathering audit evidence months, and perhaps years, after the work was actually performed. The turnover of both firm and company staff can cause difficulty in reconstructing conversations, meetings, data, or other evidence. Also, with the passage of time memories fade. "Research has shown that minutes, hours or days after an experience, memory preserves a relatively detailed record, allowing us to reproduce the past with reasonable if not perfect accuracy. But with the passing of time, the particulars fade and opportunities multiply for interference—generated by later, similar experiences—to blur our recollections."⁴

The Board believes that audit evidence should be documented at the time the procedures are performed and that oral explanation should not be the primary source of evidence. Furthermore, any oral explanation should not contradict the documented evidence, and appropriate consideration should be given to the credibility of the individual providing the oral explanation.

G. Multi-Location Audits

In this standard, the Board reminds auditors that the office of the accounting firm issuing the auditor's report is responsible for ensuring that all audit documentation sufficient to meet the requirements of this standard is prepared and retained. Audit documentation supporting the work performed by other auditors (including auditors associated with other offices of the firm, affiliated firms, or non-affiliated firms), must be retained by or be accessible to the office issuing the auditor's report. The Board believes this requirement will improve audit quality by enhancing the probability that *all* audit documentation will be prepared consistently with the same standards of audit quality.

In addition, the office issuing the auditor's report must obtain and review, prior to the report release date, certain documentation—outlined in this standard—related to the work performed by other auditors. Thus, the firm issuing an audit report on consolidated financial statements of a multinational company may not release that report without the specific documentation described in this standard.

³ In the Matter of S.D. Leidesdorf & Co., Kenneth Larsen, Joseph Grendi (*Accounting Series Release No. 209, February 1977*).

⁴ Dr. Daniel Schacter, "The Seven Sins of Memory: How the Mind Forgets and Remembers," *Psychology Today* (May 2001).

H. Part of Audit Performed by Others

In reporting on a company's consolidated financial statements, an auditor may use the work of other auditors who have audited one or more affiliates or divisions of the company. When more than one auditor is involved in an audit engagement, one of the firms typically serves as the principal auditor. The principal auditor then must decide whether to make reference in the auditor's report to the audit performed by the other auditor.

If the principal auditor decides to assume responsibility for the work of other auditors, then the principal auditor will not make reference to the work of other auditors in the audit report. However, if the principal auditor decides not to assume that responsibility, then the principal auditor should indicate clearly the division of responsibility between the principal auditor and other auditors in expressing an opinion on the consolidated financial statements. Existing guidance in AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, applies when using the work of other auditors. However, this existing guidance does not establish any specific documentation requirements.

In connection with PCAOB Auditing Standard No. 3, *Audit Documentation*, the Board adopted an amendment to paragraph .12 of AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, addressing appropriate audit documentation when a principal auditor decides not to make reference to the work of other auditors. In this amendment, the Board imposes the same unconditional responsibility on the principal auditor, as with multi-location audits, to obtain certain audit documentation from the other auditor prior to the report release date. In addition, the amendment provides that the principal auditor should consider performing one or more of the procedures described in the amendment, such as discussing the audit procedures and related results with the other auditors and reviewing the audit programs of the other auditors.

The Board believes this amendment will enable the principal auditor to gain considerably more assurance about the quality of the other auditor's work without creating an unreasonable burden.

I. Retention of Audit Documentation

This standard requires that an auditor retain audit documentation for seven years after the report release date, which is the minimum period permitted under Section 103(a) of the Act.

As previously discussed, auditors will have 45 days after the report release date to assemble the complete and final set of audit documentation. If an auditor's report is not issued on a completed engagement, as is common in a review of interim financial information of a public company, then the audit documentation is to be retained for seven years from the date that fieldwork was substantially completed.

J. Effective Date

On March 9, 2004, the Board issued PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*. Since documentation issues are prevalent in PCAOB Auditing Standard No. 2 and the key objective of this standard is to improve the quality of audits and other engagements, the Board determined that the implementation date of this standard should coincide with that of PCAOB Auditing Standard No. 2. Therefore, this standard will be effective for audits of financial statements with respect to fiscal years ending on or after

the later of November 15, 2004, or 30 days after the date of approval of this standard by the SEC.

The effective date for quarterly reviews and other engagements, conducted pursuant to the standards of the PCAOB, would occur beginning with the first quarter ending after the first financial statement audit covered by this standard.

* * * * *

On the 9th day of June, in the year 2004, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

/s/ J. Gordon Seymour

J. Gordon Seymour

Acting Secretary

June 9, 2004

APPENDICES—

1. Auditing Standard No. 3—*Audit Documentation*
2. Amendment to Interim Auditing Standards—*Part of Audit Performed by Other Independent Auditors*

Appendix 1

Auditing Standard No. 3, *Audit Documentation*

[Supersedes SAS No. 96, *Audit Documentation*]

Introduction

1. This standard establishes general requirements for documentation the auditor should prepare and retain in connection with engagements conducted pursuant to the standards of the Public Company Accounting Oversight Board ("PCAOB"). Such engagements include an audit of financial statements, an audit of internal control over financial reporting, and a review of interim financial information. This standard does not replace specific documentation requirements of other standards of the PCAOB.

Objectives of Audit Documentation

2. *Audit documentation* is the written record of the basis for the auditor's conclusions that provides the support for the auditor's representations, whether those representations are contained in the auditor's report or otherwise. Audit documentation also facilitates the planning, performance, and supervision of the engagement, and is the basis for the review of the quality of the work because it provides the reviewer with written documentation of the evidence supporting the auditor's significant conclusions. Among other things, audit documentation includes records of the planning and performance of the work, the procedures performed, evidence obtained, and conclusions reached by the auditor. Audit documentation also may be referred to as *work papers* or *working papers*.

Note: An auditor's representations to a company's board of directors or audit committee, stockholders, investors, or other interested parties are usually included in the auditor's report accompanying the financial statements of the company. The auditor also might make oral representations to the company or others, either on a voluntary basis or if necessary to comply with professional standards, including in connection with an engagement for which an auditor's report is not issued. For example, although an auditor might not issue a report in connection with an engagement to review interim financial information, he or she ordinarily would make oral representations about the results of the review.

3. Audit documentation is reviewed by members of the engagement team performing the work and might be reviewed by others. Reviewers might include, for example:

- a. Auditors who are new to an engagement and review the prior year's documentation to understand the work performed as an aid in planning and performing the current engagement.
- b. Supervisory personnel who review documentation prepared by assistants on the engagement.
- c. Engagement supervisors and engagement quality reviewers who review documentation to understand how the engagement team reached significant conclusions and whether there is adequate evidential support for those conclusions.
- d. A successor auditor who reviews a predecessor auditor's audit documentation.

- e. Internal and external inspection teams that review documentation to assess audit quality and compliance with auditing and related professional practice standards; applicable laws, rules, and regulations; and the auditor's own quality control policies.
- f. Others, including advisors engaged by the audit committee or representatives of a party to an acquisition.

Audit Documentation Requirement

4. The auditor must prepare audit documentation in connection with each engagement conducted pursuant to the standards of the PCAOB. Audit documentation should be prepared in sufficient detail to provide a clear understanding of its purpose, source, and the conclusions reached. Also, the documentation should be appropriately organized to provide a clear link to the significant findings or issues.¹ Examples of audit documentation include memoranda, confirmations, correspondence, schedules, audit programs, and letters of representation. Audit documentation may be in the form of paper, electronic files, or other media.

5. Because audit documentation is the written record that provides the support for the representations in the auditor's report, it should:

- a. Demonstrate that the engagement complied with the standards of the PCAOB,
- b. Support the basis for the auditor's conclusions concerning every relevant financial statement assertion, and
- c. Demonstrate that the underlying accounting records agreed or reconciled with the financial statements.

6. The auditor must document the procedures performed, evidence obtained, and conclusions reached with respect to relevant financial statement assertions.² Audit documentation must clearly demonstrate that the work was in fact performed. This documentation requirement applies to the work of all those who participate in the engagement as well as to the work of specialists the auditor uses as evidential matter in evaluating relevant financial statement assertions. Audit documentation must contain sufficient information to enable an experienced auditor, having no previous connection with the engagement:

- a. To understand the nature, timing, extent, and results of the procedures performed, evidence obtained, and conclusions reached, and
- b. To determine who performed the work and the date such work was completed as well as the person who reviewed the work and the date of such review.

Note: An *experienced auditor* has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

7. In determining the nature and extent of the documentation for a financial statement assertion, the auditor should consider the following factors:

- Nature of the auditing procedure;
- Risk of material misstatement associated with the assertion;

¹ See paragraph 12 of this standard for a description of significant findings or issues.

² *Relevant financial statement assertions* are described in paragraphs 68-70 of PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With An Audit of Financial Statements*.

- Extent of judgment required in performing the work and evaluating the results, for example, accounting estimates require greater judgment and commensurately more extensive documentation;
- Significance of the evidence obtained to the assertion being tested; and
- Responsibility to document a conclusion not readily determinable from the documentation of the procedures performed or evidence obtained.

Application of these factors determines whether the nature and extent of audit documentation is adequate.

8. In addition to the documentation necessary to support the auditor's final conclusions, audit documentation must include information the auditor has identified relating to significant findings or issues that is inconsistent with or contradicts the auditor's final conclusions. The relevant records to be retained include, but are not limited to, procedures performed in response to the information, and records documenting consultations on, or resolutions of, differences in professional judgment among members of the engagement team or between the engagement team and others consulted.

9. If, after the documentation completion date (defined in paragraph 15), the auditor becomes aware, as a result of a lack of documentation or otherwise, that audit procedures may not have been performed, evidence may not have been obtained, or appropriate conclusions may not have been reached, the auditor must determine, and if so demonstrate, that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. To accomplish this, the auditor must have persuasive other evidence. Oral explanation alone does not constitute persuasive other evidence, but it may be used to clarify other written evidence.

- If the auditor determines and demonstrates that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached, but that documentation thereof is not adequate, then the auditor should consider what additional documentation is needed. In preparing additional documentation, the auditor should refer to paragraph 16.
- If the auditor cannot determine or demonstrate that sufficient procedures were performed, sufficient evidence was obtained, or appropriate conclusions were reached, the auditor should comply with the provisions of AU sec. 390, *Consideration of Omitted Procedures After the Report Date*.

Documentation of Specific Matters

10. Documentation of auditing procedures that involve the inspection of documents or confirmation, including tests of details, tests of operating effectiveness of controls, and walkthroughs, should include identification of the items inspected. Documentation of auditing procedures related to the inspection of significant contracts or agreements should include abstracts or copies of the documents.

Note: The identification of the items inspected may be satisfied by indicating the source from which the items were selected and the specific selection criteria, for example:

- If an audit sample is selected from a population of documents, the documentation should include identifying characteristics (for example, the specific check numbers of the items included in the sample).

- If all items over a specific dollar amount are selected from a population of documents, the documentation need describe only the scope and the identification of the population (for example, all checks over \$10,000 from the October disbursements journal).
- If a systematic sample is selected from a population of documents, the documentation need only provide an identification of the source of the documents and an indication of the starting point and the sampling interval (for example, a systematic sample of sales invoices was selected from the sales journal for the period from October 1 to December 31, starting with invoice number 452 and selecting every 40th invoice).

11. Certain matters, such as auditor independence, staff training and proficiency and client acceptance and retention, may be documented in a central repository for the public accounting firm ("firm") or in the particular office participating in the engagement. If such matters are documented in a central repository, the audit documentation of the engagement should include a reference to the central repository. Documentation of matters specific to a particular engagement should be included in the audit documentation of the pertinent engagement.

12. The auditor must document significant findings or issues, actions taken to address them (including additional evidence obtained), and the basis for the conclusions reached in connection with each engagement. *Significant findings or issues* are substantive matters that are important to the procedures performed, evidence obtained, or conclusions reached, and include, but are not limited to, the following:

- a. Significant matters involving the selection, application, and consistency of accounting principles, including related disclosures. Significant matters include, but are not limited to, accounting for complex or unusual transactions, accounting estimates, and uncertainties as well as related management assumptions.
- b. Results of auditing procedures that indicate a need for significant modification of planned auditing procedures, the existence of material misstatements, omissions in the financial statements, the existence of significant deficiencies, or material weaknesses in internal control over financial reporting.
- c. Audit adjustments. For purposes of this standard, an *audit adjustment* is a correction of a misstatement of the financial statements that was or should have been proposed by the auditor, whether or not recorded by management, that could, either individually or when aggregated with other misstatements, have a material effect on the company's financial statements.
- d. Disagreements among members of the engagement team or with others consulted on the engagement about final conclusions reached on significant accounting or auditing matters.
- e. Circumstances that cause significant difficulty in applying auditing procedures.
- f. Significant changes in the assessed level of audit risk for particular audit areas and the auditor's response to those changes.
- g. Any matters that could result in modification of the auditor's report.

13. The auditor must identify all significant findings or issues in an *engagement completion document*. This document may include either all information

necessary to understand the significant findings, issues or cross-references, as appropriate, to other available supporting audit documentation. This document, along with any documents cross-referenced, should collectively be as specific as necessary in the circumstances for a reviewer to gain a thorough understanding of the significant findings or issues.

Note: The engagement completion document prepared in connection with the annual audit should include documentation of significant findings or issues identified during the review of interim financial information.

Retention of and Subsequent Changes to Audit Documentation

14. The auditor must retain audit documentation for seven years from the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements (*report release date*), unless a longer period of time is required by law. If a report is not issued in connection with an engagement, then the audit documentation must be retained for seven years from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the audit documentation must be retained for seven years from the date the engagement ceased.

15. Prior to the report release date, the auditor must have completed all necessary auditing procedures and obtained sufficient evidence to support the representations in the auditor's report. A complete and final set of audit documentation should be assembled for retention as of a date not more than 45 days after the report release date (*documentation completion date*). If a report is not issued in connection with an engagement, then the documentation completion date should not be more than 45 days from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the documentation completion date should not be more than 45 days from the date the engagement ceased.

16. Circumstances may require additions to audit documentation after the report release date. Audit documentation must not be deleted or discarded after the documentation completion date, however, information may be added. Any documentation added must indicate the date the information was added, the name of the person who prepared the additional documentation, and the reason for adding it.

17. Other standards require the auditor to perform procedures subsequent to the report release date in certain circumstances. For example, in accordance with AU sec. 711, *Filings Under Federal Securities Statutes*, auditors are required to perform certain procedures up to the effective date of a registration statement.³ The auditor must identify and document any additions to audit documentation as a result of these procedures consistent with the previous paragraph.

18. The office of the firm issuing the auditor's report is responsible for ensuring that all audit documentation sufficient to meet the requirements of paragraphs 4–13 of this Standard is prepared and retained. Audit documentation supporting the work performed by other auditors (including auditors associated with other offices of the firm, affiliated firms, or non-affiliated firms), must be retained by or be accessible to the office issuing the auditor's report.⁴

³ Section 11 of the Securities Act of 1933 makes specific mention of the auditor's responsibility as an expert when the auditor's report is included in a registration statement under the 1933 Act.

⁴ Section 106(b) of the Sarbanes-Oxley Act of 2002 imposes certain requirements concerning production of the work papers of a foreign public accounting firm on whose opinion or services the auditor relies. Compliance with this standard does not substitute for compliance with Section 106(b) or any other applicable law.

19. In addition, the office issuing the auditor's report must obtain, and review and retain, prior to the report release date, the following documentation related to the work performed by other auditors (including auditors associated with other offices of the firm, affiliated firms, or non-affiliated firms):

- a. An engagement completion document consistent with paragraphs 12 and 13.

Note: This engagement completion document should include all cross-referenced, supporting audit documentation.
- b. A list of significant fraud risk factors, the auditor's response, and the results of the auditor's related procedures.
- c. Sufficient information relating to any significant findings or issues that are inconsistent with or contradict the final conclusions, as described in paragraph 8.
- d. Any findings affecting the consolidating or combining of accounts in the consolidated financial statements.
- e. Sufficient information to enable the office issuing the auditor's report to agree or to reconcile the financial statement amounts audited by the other auditor to the information underlying the consolidated financial statements.
- f. A schedule of audit adjustments, including a description of the nature and cause of each misstatement.
- g. All significant deficiencies and material weaknesses in internal control over financial reporting, including a clear distinction between those two categories.
- h. Letters of representations from management.
- i. All matters to be communicated to the audit committee.

If the auditor decides to make reference in his or her report to the audit of the other auditor, however, the auditor issuing the report need not perform the procedures in this paragraph and, instead, should refer to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*.

20. The auditor also might be required to maintain documentation in addition to that required by this standard.⁵

Effective Date

21. This standard is effective for audits of financial statements, which may include an audit of internal control over financial reporting, with respect to fiscal years ending on or after November 15, 2004. For other engagements conducted pursuant to the standards of the PCAOB, including reviews of interim financial information, this standard takes effect beginning with the first quarter ending after the first financial statement audit covered by this standard.

APPENDIX A—

1. Background and Basis for Conclusions

⁵ For example, the SEC requires auditors to retain, in addition to documentation required by this standard, memoranda, correspondence, communications (for example, electronic mail), other documents, and records (in the form of paper, electronic, or other media) that are created, sent, or received in connection with an engagement conducted in accordance with auditing and related professional practice standards and that contain conclusions, opinions, analyses, or data related to the engagement. (*Retention of Audit and Review Records*, 17 CFR §210.2-06, effective for audits or reviews completed on or after October 31, 2003.)

Appendix A

Background and Basis for Conclusions

Introduction

A1. This appendix summarizes considerations that the Public Company Accounting Oversight Board ("PCAOB" or "Board") deemed significant in developing this standard. This Appendix includes reasons for accepting certain views and rejecting others.

A2. Section 103(a)(2)(A)(i) of the Sarbanes-Oxley Act of 2002 (the "Act") directs the Board to establish auditing standards that require registered public accounting firms to prepare and maintain, for at least seven years, audit documentation "in sufficient detail to support the conclusions reached" in the auditor's report. Accordingly, the Board has made audit documentation a priority.

Background

A3. Auditors support the conclusions in their reports with a work product called *audit documentation*, also referred to as *working papers* or *work papers*. Audit documentation supports the basis for the conclusions in the auditor's report. Audit documentation also facilitates the planning, performance, and supervision of the engagement and provides the basis for the review of the quality of the work by providing the reviewer with written documentation of the evidence supporting the auditor's significant conclusions. Examples of audit documentation include memoranda, confirmations, correspondence, schedules, audit programs, and letters of representation. Audit documentation may be in the form of paper, electronic files, or other media.

A4. The Board's standard on audit documentation is one of the fundamental building blocks on which both the integrity of audits and the Board's oversight will rest. The Board believes that the quality and integrity of an audit depends, in large part, on the existence of a complete and understandable record of the work the auditor performed, the conclusions the auditor reached, and the evidence the auditor obtained that supports those conclusions. Meaningful reviews, whether by the Board in the context of its inspections or through other reviews, such as internal quality control reviews, would be difficult or impossible without adequate documentation. Clear and comprehensive audit documentation is essential to enhance the quality of the audit and, at the same time, to allow the Board to fulfill its mandate to inspect registered public accounting firms to assess the degree of compliance of those firms with applicable standards and laws.

A5. The Board began a standards-development project on audit documentation by convening a public roundtable discussion on September 29, 2003, to discuss issues and hear views on the subject. Participants at the roundtable included representatives from public companies, public accounting firms, investor groups, and regulatory organizations.

A6. Prior to this roundtable discussion, the Board prepared and released a briefing paper on audit documentation that posed several questions to help identify the objectives—and the appropriate scope and form—of audit documentation. In addition, the Board asked participants to address specific issues in practice relating to, among other things, changes in audit documentation after release of the audit report, essential elements and the appropriate amount of detail of audit documentation, the effect on audit documentation of a principal auditor's

decision to use the work of other auditors, and retention of audit documentation. Based on comments made at the roundtable, advice from the Board's staff, and other input the Board received, the Board determined that the pre-existing standard on audit documentation, Statement on Auditing Standards ("SAS") No. 96, *Audit Documentation*, was insufficient for the Board to discharge appropriately its standard-setting obligations under Section 103(a) of the Act. In response, the Board developed and issued for comment, on November 17, 2003, a proposed auditing standard titled, *Audit Documentation*.

A7. The Board received 38 comment letters from a variety of interested parties, including auditors, regulators, professional associations, government agencies, and others. Those comments led to some changes in the requirements of the standard. Also, other changes made the requirements easier to understand. The following sections summarize significant views expressed in those comment letters and the Board's responses to those comments.

Objective of This Standard

A8. The objective of this standard is to improve audit quality and enhance public confidence in the quality of auditing. Good audit documentation improves the quality of the work performed in many ways, including, for example:

- Providing a record of actual work performed, which provides assurance that the auditor accomplishes the planned objectives.
- Facilitating the reviews performed by supervisors, managers, engagement partners, engagement quality reviewers,¹ and PCAOB inspectors.
- Improving effectiveness and efficiency by reducing time-consuming, and sometimes inaccurate, oral explanations of what was done (or not done).

A9. The documentation requirements in this standard should result in more effective and efficient oversight of registered public accounting firms and associated persons, thereby improving audit quality and enhancing investor confidence.

A10. Inadequate audit documentation diminishes audit quality on many levels. First, if audit documentation does not exist for a particular procedure or conclusion related to a significant matter, it casts doubt as to whether the necessary work was done. If the work was not documented, then it becomes difficult for the engagement team, and others, to know what was done, what conclusions were reached, and how those conclusions were reached. In addition, good audit documentation is very important in an environment in which engagement staff changes or rotates. Due to engagement staff turnover, knowledgeable staff on an engagement may not be available for the next engagement.

Audit Programs

A11. Several commenters suggested that audit documentation should include audit programs. Audit programs were specifically mentioned in SAS No. 96 as a form of audit documentation.

¹ The engagement quality reviewer is referred to as the concurring partner reviewer in the membership requirements of the AICPA SEC Practice Section. The Board adopted certain of these membership requirements as they existed on April 16, 2003. Some firms also may refer to this designated reviewer as the second partner reviewer.

A12. The Board accepted this recommendation, and paragraph 4 in the final Standard includes audit programs as an example of documentation. Audit programs may provide evidence of audit planning as well as limited evidence of the execution of audit procedures, but the Board believes that signed-off audit programs should generally not be used as the sole documentation that a procedure was performed, evidence was obtained, or a conclusion was reached. An audit program aids in the conduct and supervision of an engagement, but completed and initialed audit program steps should be supported with proper documentation in the working papers.

Reviewability Standard

A13. The proposed standard would have adapted a standard of reviewability from the U.S. General Accounting Office's ("GAO") documentation standard for government and other audits conducted in accordance with generally accepted government auditing standards ("GAGAS"). The GAO standard provides that "Audit documentation related to planning, conducting, and reporting on the audit should contain sufficient information to enable an experienced auditor who has had no previous connection with the audit to ascertain from the audit documentation the evidence that supports the auditors' significant judgments and conclusions."² This requirement has been important in the field of government auditing because government audits have long been reviewed by GAO auditors who, although experienced in auditing, do not participate in the actual audits. Moreover, the Panel on Audit Effectiveness recommended that sufficient, specific requirements for audit documentation be established to enable public accounting firms' internal inspection teams as well as others, including reviewers outside of the firms, to assess the quality of engagement performance.³ Audits and reviews of issuers' financial statements will now, under the Act, be subject to review by PCAOB inspectors. Therefore, a documentation standard that enables an inspector to understand the work that was performed in an audit or review is appropriate.

A14. Accordingly, the Board's proposed standard would have required that audit documentation contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the work that was performed, the name of the person(s) who performed it, the date it was completed, and the conclusions reached. This experienced auditor also should have been able to determine who reviewed the work and the date of such review.

A15. Some commenters suggested that the final standard more specifically describe the qualifications of an experienced auditor. These commenters took the position that only an engagement partner with significant years of experience would have the experience necessary to be able to understand all the work that was performed and the conclusions that were reached. One commenter suggested that an auditor who is reviewing audit documentation should have experience and knowledge consistent with the experience and knowledge that the auditor performing the audit would be required to possess, including knowledge of the current accounting, auditing, and financial reporting issues of the company's industry. Another said that the characteristics defining an experienced auditor should be consistent with those expected of the auditor with final responsibility for the engagement.

² U.S. General Accounting Office, *Government Auditing Standards*, "Field Work Standards for Financial Audits" (2003 Revision), paragraph 4.22.

³ Panel on Audit Effectiveness, *Report and Recommendations* (Stamford, Ct: Public Oversight Board, August 31, 2000).

A16. After considering these comments, the Board has provided additional specificity about the meaning of the term, *experienced auditor*. The standard now describes an experienced auditor as one who has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry.

A17. Some commenters also suggested that the standard, as proposed, did not allow for the use of professional judgment. These commenters pointed to the omission of a statement about professional judgment found in paragraph 4.23 of GAGAS that states, "The quantity, type, and content of audit documentation are a matter of the auditors' professional judgment." A nearly identical statement was found in the interim auditing standard, SAS No. 96, *Audit Documentation*.

A18. Auditors exercise professional judgment in nearly every aspect of planning, performing, and reporting on an audit. Auditors also exercise professional judgment in the documentation of an audit and other engagements. An objective of this standard is to ensure that auditors give proper consideration to the need to document procedures performed, evidence obtained, and conclusions reached in light of time and cost considerations in completing an engagement.

A19. Nothing in the standard precludes auditors from exercising their professional judgment. Moreover, because professional judgment might relate to any aspect of an audit, the Board does not believe that an explicit reference to professional judgment is necessary every time the use of professional judgment may be appropriate.

Audit Documentation Must Demonstrate That the Work Was Done

A20. A guiding principle of the proposed standard was that auditors must document procedures performed, evidence obtained, and conclusions reached. This principle is not new and was found in the interim standard, SAS No. 96, *Audit Documentation*, which this standard supersedes. Audit documentation also should demonstrate compliance with the standards of the PCAOB and include justification for any departures.

A21. The proposed standard would have adapted a provision in the California Business and Professions Code which provides that if documentation does not exist, then there is a rebuttable presumption that the work had not been done.

A22. The objections to this proposal fell into two general categories: the effect of the rebuttable presumption on legal proceedings and the perceived impracticality of documenting every conversation or conclusion that affected the engagement. Discussion of these issues follows.

Rebuttable Presumption

A23. Commenters expressed concern about the effects of the proposed language on regulatory or legal proceedings outside the context of the PCAOB's oversight. They argued that the rebuttable presumption might be understood to establish evidentiary rules for use in judicial and administrative proceedings in other jurisdictions.

A24. Some commenters also had concerns that oral explanation alone would not constitute persuasive other evidence that work was done, absent any documentation. Those commenters argued that not allowing oral explanations when there was no documentation would essentially make the presumption "irrebuttable." Moreover, those commenters argued that it was inappropriate for a professional standard to predetermine for a court the relative value of evidence.

A25. The Board believes that complete audit documentation is necessary for a quality audit or other engagement. The Board intends the standard to require

auditors to document procedures performed, evidence obtained, and conclusions reached to improve the quality of audits. The Board also intends that a deficiency in documentation is a departure from the Board's standards. Thus, although the Board removed the phrase *rebuttable presumption*, the Board continues to stress, in paragraph 9 of the Standard, that the auditor must have persuasive other evidence that the procedures were performed, evidence was obtained, and appropriate conclusions were reached with respect to relevant financial statement assertions.

A26. The term *should* (presumptively mandatory responsibility) was changed to *must* (unconditional responsibility) in paragraph 6 to establish a higher threshold for the auditor. Auditors have an unconditional requirement to document their work. Failure to discharge an unconditional responsibility is a violation of the standard and Rule 3100, which requires all registered public accounting firms to adhere to the Board's auditing and related professional practice standards in connection with an audit or review of an issuer's financial statements.

A27. The Board also added two new paragraphs to the final standard to explain the importance and associated responsibility of performing the work and adequately documenting all work that was performed. Paragraph 7 provides a list of factors the auditor should consider in determining the nature and extent of documentation. These factors should be considered by both the auditor in preparing the documentation and the reviewer in evaluating the documentation.

A28. In paragraph 9 of this Standard, if, after the documentation completion date, as a result of a lack of documentation or otherwise, it appears that audit procedures may not have been performed, evidence may not have been obtained, or appropriate conclusions may not have been reached, the auditor must determine, and if so demonstrate, that sufficient procedures were performed, sufficient evidence was obtained, and appropriate conclusions were reached with respect to the relevant financial statement assertions. In those circumstances, for example, during an inspection by the Board or during the firm's internal quality control review, the auditor is required to demonstrate with persuasive other evidence that the procedures were performed, the evidence was obtained, and appropriate conclusions were reached. In this and similar contexts, oral explanation alone does not constitute persuasive other evidence. However, oral evidence may be used to clarify other written evidence.

A29. In addition, more reliable, objective evidence may be required depending on the nature of the test and the objective the auditor is trying to achieve. For example, if there is a high risk of a material misstatement with respect to a particular assertion, then the auditor should obtain and document sufficient procedures for the auditor to conclude on the fairness of the assertion.

Impracticality

A30. Some commenters expressed concern that the proposed standard could be construed or interpreted to require the auditor to document every conversation held with company management or among the engagement team members. Some commenters also argued that they should not be required to document every conclusion, including preliminary conclusions that were part of a thought process that may have led them to a different conclusion, on the ground that this would result in needless and costly work performed by the auditor. Commenters also expressed concern that an unqualified requirement to document procedures performed, evidence obtained, and conclusions reached without allowing the use of auditor judgment would increase the volume of documentation but not the quality. They stated that it would be unnecessary, time-consuming,

and potentially counterproductive to require the auditor to make a written record of everything he or she did.

A31. The Board's standard distinguishes between (1) an audit procedure that must be documented and (2) a conversation with company management or among the members of the engagement team. Inquiries with management should be documented when an inquiry is important to a particular procedure. The inquiry could take place during planning, performance, or reporting. The auditor need not document each conversation that occurred.

A32. A final conclusion is an integral part of a working paper, unless the working paper is only for informational purposes, such as documentation of a discussion or a process. This standard does not require that the auditor document each interim conclusion reached in arriving at the risk assessments or final conclusions. Conclusions reached early on during an audit may be based on incomplete information or an incorrect understanding. Nevertheless, auditors should document a final conclusion for every audit procedure performed, if that conclusion is not readily apparent based on documented results of the procedures.

A33. The Board also believes the reference to *specialists* is an important element of paragraph 6. Specialists play a vital role in audit engagements. For example, appraisers, actuaries, and environmental consultants provide valuable data concerning asset values, calculation assumptions, and loss reserves. When using the work of a specialist, the auditor must ensure that the specialist's work, as it relates to the audit objectives, also is adequately documented. For example, if the auditor relies on the work of an appraiser in obtaining the fair value of commercial property available for sale, then the auditor must ensure the appraisal report is adequately documented. Moreover, the term *specialist* in this standard is intended to include any specialist the auditor relies on in conducting the work, including those employed or retained by the auditor or by the company.

Audit Adjustments

A34. Several commenters recommended that the definition of *audit adjustments* in this proposed standard should be consistent with the definition contained in AU sec. 380, *Communication With Audit Committees*.

A35. Although the Board recognizes potential benefits of having a uniform definition of the term *audit adjustments*, the Board does not believe that the definition in AU sec. 380 is appropriate for this documentation standard because that definition was intended for communication with audit committees. The Board believes that the definition should be broader so that the engagement partner, engagement quality reviewer, and others can be aware of all proposed corrections of misstatements, whether or not recorded by the entity, of which the auditor is aware, that were or should have been proposed based on the audit evidence.

A36. Adjustments that should have been proposed based on known audit evidence are material misstatements that the auditor identified but did not propose to management. Examples include situations in which (1) the auditor identifies a material error but does not propose an adjustment and (2) the auditor proposes an adjustment in the working papers, but fails to note the adjustment in the summary or schedule of proposed adjustments.

Information That Is Inconsistent With or Contradicts the Auditor's Final Conclusions

A37. Paragraph .25 of AU sec. 326, *Evidential Matter*, states: "In developing his or her opinion, the auditor should consider relevant evidential matter regardless of whether it appears to corroborate or to contradict the assertions in the financial statements." Thus, during the conduct of an audit, the auditor should consider all relevant evidential matter even though it might contradict or be inconsistent with other conclusions. Audit documentation must contain information or data relating to significant findings or issues that are inconsistent with the auditor's final conclusions on the relevant matter.

A38. Also, information that initially appears to be inconsistent or contradictory, but is found to be incorrect or based on incomplete information, need not be included in the final audit documentation, provided that the apparent inconsistencies or contradictions were satisfactorily resolved by obtaining complete and correct information. In addition, with respect to differences in professional judgment, auditors need not include in audit documentation preliminary views based on incomplete information or data.

Retention of Audit Documentation

A39. The proposed standard would have required an auditor to retain audit documentation for seven years after completion of the engagement, which is the minimum period permitted under Section 103(a)(2)(A)(i) of the Act. In addition, the proposed standard would have added a new requirement that the audit documentation must be assembled for retention within a reasonable period of time after the auditor's report is released. Such reasonable period of time should not exceed 45 days.

A40. In general, those commenting on this documentation retention requirement did not have concerns with the time period of 45 days to assemble the working papers. However, some commenters suggested the Board tie this 45-day requirement to the filing date of the company's financial statements with the SEC. One commenter recommended that the standard refer to the same trigger date for initiating both the time period during which the auditor should complete work paper assembly and the beginning of the seven-year retention period.

A41. For consistency and practical implications, the Board agreed that the standard should have the same date for the auditor to start assembling the audit documentation and initiating the seven-year retention period. The Board decided that the seven-year retention period begins on the *report release date*, which is defined as the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. In addition, auditors will have 45 days to assemble the complete and final set of audit documentation, beginning on the report release date. The Board believes that using the report release date is preferable to using the filing date of the company's financial statements, since the auditor has ultimate control over granting permission to use his or her report. If an auditor's report is not issued, then the audit documentation is to be retained for seven years from the date that fieldwork was substantially completed. If the auditor was unable to complete the engagement, then the seven-year period begins when the work on the engagement ceased.

Section 802 of Sarbanes-Oxley and the SEC's Implementing Rule

A42. Many commenters had concerns about the similarity in language between the proposed standard and the SEC final rule (issued in January 2003) on record retention, *Retention of Records Relevant to Audits and Reviews*.⁴ Some commenters recommended that the PCAOB undertake a project to identify and resolve all differences between the proposed standard and the SEC's final rule. These commenters also suggested that the Board include similar language from the SEC final rule, Rule 2-06 of Regulation S-X, which limits the requirement to retain some items.

Differences Between Section 802 and This Standard

A43. The objective of the Board's standard is different from the objective of the SEC's rule on record retention. The objective of the Board's standard is to require auditors to create certain documentation to enhance the quality of audit documentation, thereby improving the quality of audits and other related engagements. The records retention section of this standard, mandated by Section 103 of the Act, requires registered public accounting firms to "prepare and maintain for a period of not less than 7 years, *audit work papers, and other information related to any audit report*, in sufficient detail to support the conclusions reached in such report." (emphasis added)

A44. In contrast, the focus of the SEC rule is to require auditors to *retain* documents that the auditor does create, in order that those documents will be available in the event of a regulatory investigation or other proceeding. As stated in the release accompanying the SEC's final rule (SEC Release No. 33-8180):

Section 802 of the Sarbanes-Oxley Act is intended to address the destruction or fabrication of evidence and the preservation of "financial and audit records." We are directed under that section to promulgate rules related to the retention of records relevant to the audits and reviews of financial statements that companies file with the Commission.

A45. The SEC release further states, "New rule 2-06...addresses the retention of documents relevant to enforcement of the securities laws, Commission rules, and criminal laws."

A46. Despite their different objectives, the proposed standard and SEC Rule 2-06 use similar language in describing documentation generated during an audit or review. Paragraph 4 of the proposed Standard stated that, "Audit documentation ordinarily consists of *memoranda, correspondence, schedules, and other documents created or obtained in connection with the engagement* and may be in the form of paper, electronic files, or other media." Paragraph (a) of SEC Rule 2-06 describes "records relevant to the audit or review" that must be retained as, (1) "workpapers and other documents that form the basis of the audit or review and (2) *memoranda, correspondence, communications, other documents, and records (including electronic records), which: [a]re created, sent or received in connection with the audit or review and [c]ontain conclusions, opinions, analyses, or financial data related to the audit or review. ...*" (numbering and emphasis added).

A47. The SEC makes a distinction between the objectives of categories (1) and (2). Category (1) includes audit documentation. Documentation to be retained

⁴ SEC Regulation S-X, 17 C.F.R. § 210.2-06 (SEC Release No. 33-8180, January 2003). (The final rule was effective in March 2003.)

according to the Board's Standard clearly falls within category (1). Items in category (2) include "desk files" which are more than "what traditionally has been thought of as auditor's 'workpapers'." The SEC's rule requiring auditors to retain items in category (2) have the principal purpose of facilitating enforcement of securities laws, SEC rules, and criminal laws. This is not an objective of the Board's Standard. According to SEC Rule 2-06, items in category (2) are limited to those which: (a) are created, sent or received in connection with the audit or review, and (b) contain conclusions, opinions, analyses, or financial data related to the audit or review. The limitations, (a) and (b), do not apply to category (1).

A48. Paragraph 4 of the final Standard deletes the reference in the proposed standard to "other documents created or obtained in connection with the engagement." The Board decided to keep "correspondence" in the standard because correspondence can be valid audit evidence. Paragraph 20 of the Standard reminds the auditor that he or she may be required to maintain documentation in addition to that required by this Standard.

Significant Matters and Significant Findings or Issues

A49. Some commenters asked how the term *significant matters*, in Rule 2-06, relates to the term *significant findings or issues* in the Board's Standard. The SEC's release accompanying its final Rule 2-06 states that "...*significant matters* is intended to refer to the documentation of substantive matters that are important to the audit or review process or to the financial statements of the issuer..." This is very similar to the term *significant findings or issues* contained in paragraph 12 of the Board's Standard which requires auditors to document *significant findings or issues*, actions taken to address them (including additional evidence obtained), and the basis for the conclusions reached. Examples of *significant findings or issues* are provided in the Standard.

A50. Based on the explanation in the SEC's final rule and accompanying release, the Board believes that *significant matters* are included in the meaning of *significant findings or issues* in the Board's standard. The Board is of the view that *significant findings or issues* is more comprehensive and provides more clarity than *significant matters* and, therefore, has not changed the wording in the final Standard.

Changes to Audit Documentation

A51. The proposed standard would have required that any changes to the working papers after completion of the engagement be documented without deleting or discarding the original documents. Such documentation must indicate the date the information was added, by whom it was added, and the reason for adding it.

A52. One commenter recommended that the Board provide examples of auditing procedures that should be performed before the report release date and procedures that may be performed after the report release date. Some commenters also requested clarification about the treatment of changes to documentation that occurred after the completion of the engagement but before the report release date. Many commenters recommended that the Board more specifically describe post-issuance procedures. The Board generally agreed with these comments.

A53. The final Standard includes two important dates for the preparation of audit documentation: (1) the report release date and (2) the documentation completion date.

- Prior to the report release date, the auditor must have completed all necessary auditing procedures, including clearing review notes and

providing support for all final conclusions. In addition, the auditor must have obtained sufficient evidence to support the representations in the auditor's reports before the report release date.

- After the report release date and prior to the documentation completion date, the auditor has 45 calendar days in which to assemble the documentation.

A54. During the audit, audit documentation may be superseded for various reasons. Often, during the review process, reviewers annotate the documentation with clarifications, questions, and edits. The completion process often involves revising the documentation electronically and generating a new copy. The SEC's final rule on record retention, *Retention of Records Relevant to Audits and Reviews*,⁵ explains that the SEC rule does not require that the following documents generally need to be retained: superseded drafts of memoranda, financial statements or regulatory filings; notes on superseded drafts of memoranda, financial statements or regulatory filings that reflect incomplete or preliminary thinking; previous copies of workpapers that have been corrected for typographical errors or errors due to training of new employees; and duplicates of documents. This standard also does not require auditors to retain such documents as a general matter.

A55. Any documents, however, that reflect information that is either inconsistent with or contradictory to the conclusions contained in the final working papers may not be discarded. Any documents added must indicate the date they were added, the name of the person who prepared them, and the reason for adding them.

A56. If the auditor obtains and documents evidence after the report release date, the auditor should refer to the Interim Auditing Standards, AU sec. 390, *Consideration of Omitted Procedures After the Report Date* and AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*. Auditors should not discard any previously existing documentation in connection with obtaining and documenting evidence after the report release date.

A57. The auditor may perform certain procedures subsequent to the report release date. For example, pursuant to AU sec. 711, *Filings Under Federal Securities Statutes*, auditors are required to perform certain procedures up to the effective date of a registration statement. The auditor should identify and document any additions to audit documentation as a result of these procedures. No audit documentation should be discarded after the documentation completion date, even if it is superseded in connection with any procedures performed, including those performed pursuant to AU sec. 711.

A58. Additions to the working papers may take the form of memoranda that explain the work performed, evidence obtained, and conclusions reached. Documentation added to the working papers must indicate the date the information was added, the name of the person adding it, and the reason for adding it. All previous working papers must remain intact and not be discarded.

A59. Documentation added to the working papers well after completion of the audit or other engagement is likely to be of a lesser quality than that produced contemporaneously when the procedures were performed. It is very difficult to reconstruct activities months, and perhaps years, after the work was actually performed. The turnover of both firm and company staff can cause difficulty in reconstructing conversations, meetings, data, or other evidence. Also, with

⁵ See footnote 4.

the passage of time memories fade. Oral explanation can help confirm that procedures were performed during an audit, but oral explanation alone does not constitute persuasive other evidence. The primary source of evidence should be documented at the time the procedures are performed, and oral explanation should not be the primary source of evidence. Furthermore, any oral explanation should not contradict the documented evidence, and appropriate consideration should be given to the credibility of the individual providing the oral explanation.

Multi-Location Audits and Using the Work of Other Auditors

A60. The proposed Standard would have required the principal auditor to maintain specific audit documentation when he or she decided not to make reference to the work of another auditor.

A61. The Board also proposed an amendment to AU sec. 543 concurrently with the proposed audit documentation standard. The proposed amendment would have required the principal auditor to review the documentation of the other auditor to the same extent and in the same manner that the audit work of all those who participated in the engagement is reviewed.

A62. Commenters expressed concerns that these proposals could present conflicts with certain non-U.S. laws. Those commenters also expressed concern about the costs associated with the requirement for the other auditor to ship their audit documentation to the principal auditor. In addition, the commenters also objected to the requirement that principal auditors review the work of other auditors as if they were the principal auditor's staff.

Audit Documentation Must Be Accessible to the Office Issuing the Auditor's Report

A63. After considering these comments, the Board decided that it could achieve one of the objectives of the proposed standard (that is, to require that the issuing office have access to those working papers on which it placed reliance) without requiring that the working papers be shipped to the issuing office. Further, given the potential difficulties of shipping audit documentation from various non-U.S. locations, the Board decided to modify the proposed standard to require that audit documentation either be retained by or be accessible to the issuing office.

A64. In addition, instead of requiring that all of the working papers be shipped to the issuing office, the Board decided to require that the issuing office obtain, review, and retain certain summary documentation. Thus, the public accounting firm issuing an audit report on consolidated financial statements of a multinational company may not release that report without the documentation described in paragraph 19 of the Standard.

A65. The auditor must obtain and review and retain, prior to the report release date, documentation described in paragraph 19 of the Standard, in connection with work performed by other offices of the public accounting firm or other auditors, including affiliated or non-affiliated firms, that participated in the audit. For example, an auditor that uses the work of another of its offices or other affiliated or non-affiliated public accounting firms to audit a subsidiary that is material to a company's consolidated financial statements must obtain the documentation described in paragraph 19 of the Standard, prior to the report release date. On the other hand, an auditor that uses the work of another of its offices or other affiliated or non-affiliated firms, to perform selected procedures, such as observing the physical inventories of a company, may not be required to obtain the documentation specified in paragraph 19 of the Standard. However,

this does not reduce the need for the auditor to obtain equivalent documentation prepared by the other auditor when those instances described in paragraph 19 of the Standard are applicable.

Amendment to AU Sec. 543, Part of Audit Performed by Other Independent Auditors

A66. Some commenters also objected to the proposed requirement in the amendment to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, that the principal auditor review another auditor's audit documentation. They objected because they were of the opinion such a review would impose an unnecessary cost and burden given that the other auditor will have already reviewed the documentation in accordance with the standards established by the principal auditor. The commenters also indicated that any review by the principal auditor would add excessive time to the SEC reporting process, causing even more difficulties as the SEC Form 10-K reporting deadlines have become shorter recently and will continue to shorten next year.

A67. The Board accepted the recommendation to modify the proposed amendment to AU sec. 543, *Part of Audit Performed by Other Independent Auditors*. Thus, in the final amendment, the Board imposes the same unconditional responsibility on the principal auditor to obtain certain audit documentation from the other auditor prior to the report release date. The final amendment also provides that the principal auditor should consider performing one or more of the following procedures:

- Visit the other auditors and discuss the audit procedures followed and results thereof.
- Review the audit programs of the other auditors. In some cases, it may be appropriate to issue instructions to the other auditors as to the scope of the audit work.
- Review additional audit documentation of the other auditors relating to significant findings or issues in the engagement completion document.

Effective Date

A68. The Board proposed that the Standard and related amendment would be effective for engagements completed on or after June 15, 2004. Many commenters were concerned that the effective date was too early. They pointed out that some audits, already begun as of the proposed effective date, would be affected and that it could be difficult to retroactively apply the Standard. Some commenters also recommended delaying the effective date to give auditors adequate time to develop and implement processes and provide training with respect to several aspects of the Standard.

A69. After considering the comments, the Board has delayed the effective date. However, the Board also believes that a delay beyond 2004 is not in the public interest.

A70. The Board concluded that the implementation date of this Standard should coincide with that of PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, because of the documentation issues prevalent in PCAOB Auditing Standard No. 2. Therefore, the Board has decided that the standard will be effective for audits of financial statements with respect to fiscal years ending on or after November 15, 2004. The effective date for reviews of interim financial information and other engagements, conducted pursuant to the

Standards of the PCAOB, would occur beginning with the first quarter ending after the first financial statement audit covered by this Standard.

Reference to Audit Documentation As the Property of the Auditor

A71. Several commenters noted that SAS No. 96, *Audit Documentation*, the interim auditing standard on audit documentation, referred to audit documentation as the property of the auditor. This was not included in the proposed Standard because the Board did not believe ascribing property rights would have furthered this standard's purpose to enhance the quality of audit documentation.

Confidential Client Information

A72. SAS No. 96, *Audit Documentation*, also stated that, "the auditor has an ethical, and in some situations a legal, obligation to maintain the confidentiality of client information," and referenced Rule 301, *Confidential Client Information*, of the AICPA's Code of Professional Conduct. Again, the Board's proposed standard on audit documentation did not include this provision. In adopting certain interim Standards and Rules as of April 16, 2003, the Board did not adopt Rule 301 of the AICPA's Code of Professional Conduct. In this Standard on audit documentation, the Board seeks neither to establish confidentiality standards nor to modify or detract from any existing applicable confidentiality requirements.

Addendum

Additional Documentation Requirements of SEC Rule 2-06

This addendum is not a part of PCAOB Auditing Standard No. 3.

B1. Auditors should be aware of the additional record retention requirements in SEC Rule 2-06 of Regulation S-X ("Rule 2-06"). The Board is providing additional information below to remind auditors of the SEC requirements. This addendum is not an interpretation of Rule 2-06. Instead, this addendum provides excerpts from the SEC release accompanying the final rule which provides the SEC's interpretation of the rule's requirements, particularly paragraphs (a) and (c) of Rule 2-06.

B2. Paragraph (a) of Rule 2-06 requires that:

...the accountant shall retain...memoranda, correspondence, communications, other documents, and records (including electronic records) which:

- (1) Are created, sent or received in connection with the audit or review, and
- (2) Contain conclusions, opinions, analyses, or financial data related to the audit or review.

B3. Paragraph (c) of Rule 2-06 states:

Memoranda, correspondence, communications, other documents, and records (including electronic records) described in paragraph (a) of this section shall be retained whether they support the auditor's final conclusions regarding the audit or review, or contain information or data relating to a significant matter, that is inconsistent with the auditor's final conclusions regarding that matter or the audit or review. Significance of a matter shall be determined based on an objective analysis of the facts and circumstances. Such documents and records include, but are not limited to, those documenting a consultation on or resolution of differences in professional judgment.

Other Statements by the SEC

B4. In the excerpt below, from the SEC's release accompanying its final Rule 2-06, the SEC discusses documents that generally are not required to be retained under Rule 2-06.

In the Proposing Release, we stated that non-substantive materials that are not part of the workpapers, such as administrative records, and other documents that do not contain relevant financial data or the auditor's conclusions, opinions or analyses would not meet the second of the criteria in Rule 2-06(a) and would not have to be retained. Commentators questioned whether the following documents would be considered substantive and have to be retained:

- Superseded drafts of memoranda, financial statements or regulatory filings,
- Notes on superseded drafts of memoranda, financial statements or regulatory filings that reflect incomplete or preliminary thinking,
- Previous copies of workpapers that have been corrected for typographical errors or errors due to training of new employees,
- Duplicates of documents, or
- Voice-mail messages.

These records generally would not fall within the scope of new Rule 2-06 provided they do not contain information or data, relating to a significant matter that is inconsistent with the auditor's final conclusions, opinions or analyses on that matter or the audit or review. For example, Rule 2-06 would require the retention of an item in this list if that item documented a consultation or resolution of differences of professional judgment.

B5. The excerpt below, from the SEC's release accompanying its final Rule 2-06, provides further explanation about documents to be retained under Rule 2-06:

In consideration of the comments received, we have revised paragraph (c) of the rule. We have removed the phrase "cast doubt" to reduce the possibility that the rule mistakenly would be interpreted to reach typographical errors, trivial or "fleeting" matters, or errors due to "on-the-job" training. We continue to believe, however, that records that either support or contain significant information that is inconsistent with the auditor's final conclusions would be relevant to an investigation of possible violations of the securities laws, Commission rules, or criminal laws and should be retained. Paragraph (c), therefore, now provides that the materials described in paragraph (a) shall be retained whether they support the auditor's final conclusions or contain information or data, relating to a significant matter that is inconsistent with the final conclusions of the auditor on that matter or on the audit or review. Paragraph (c) also states that the documents and records to be retained include, but are not limited to, those documenting consultations on or resolutions of differences in professional judgment.

The reference in paragraph (c) to "significant" matters is intended to refer to the documentation of substantive matters that are important to the audit or review process or to the financial statements of the issuer or registered investment company. Rule 2-06(c) requires that the documentation of such matters, once prepared, must be retained even if it does not "support" the auditor's final conclusions, because it may be relevant to an investigation. Similarly, the retention of records regarding a consultation about, and resolution of, differences in professional judgment would be relevant to such an investigation and must be retained. We intend for Rule 2-06 to be incremental to, and not to supersede or otherwise affect, any other legal or procedural requirement related to the retention of records or potential evidence in a legal, administrative, disciplinary, or regulatory proceeding.

Finally, we recognize that audits and reviews of financial statements are interactive processes and views within an accounting firm on accounting, auditing or disclosure issues may evolve as new information or data comes to light during the audit or review. We do not view "differences in professional judgment" within subparagraph (c) to include such changes in preliminary views when those preliminary views are based on what is recognized to be incomplete information or data.

Appendix 2

Amendment to Interim Auditing Standards—Part of Audit Performed by Other Independent Auditors

AU sec. 543.12 is amended as follows:

When the principal auditor decides not to make reference to the audit of the other auditor, in addition to satisfying himself as to the matters described in AU sec. 543.10, the principal auditor must obtain, and review and retain, the following information from the other auditor:

- a. An engagement completion document consistent with paragraphs 12 and 13 of PCAOB Auditing Standard No. 3.

Note: This engagement completion document should include all cross-referenced, supporting audit documentation.

- b. A list of significant fraud risk factors, the auditor's response, and the results of the auditor's related procedures.
- c. Sufficient information relating to significant findings or issues that are inconsistent with or contradict the auditor's final conclusions, as described in paragraph 8 of PCAOB Auditing Standard No. 3.
- d. Any findings affecting the consolidating or combining of accounts in the consolidated financial statements.
- e. Sufficient information to enable the office issuing the auditor's report to agree or reconcile the financial statement amounts audited by the other firm to the information underlying the consolidated financial statements.
- f. A schedule of audit adjustments, including a description of the nature and cause of each misstatement.
- g. All significant deficiencies and material weaknesses in internal control over financial reporting, including a clear distinction between those two categories.
- h. Letters of representations from management.
- i. All matters to be communicated to the audit committee.

The principal auditor must obtain, and review and retain, such documents prior to the report release date.¹ In addition, the principal auditor should consider performing one or more of the following procedures:

- Visit the other auditor and discuss the audit procedures followed and results thereof.

¹ As it relates to the direction in paragraph .19 of AU sec. 324, for the auditor to "give consideration to the guidance in section 543.12," the auditor need not, in this circumstance, obtain the previously enumerated documents.

- Review the audit programs of the other auditor. In some cases, it may be appropriate to issue instructions to the other auditor as to the scope of the audit work.
 - Review additional audit documentation of the other auditor relating to significant findings or issues in the engagement completion document.
-

PCAOB Release No. 2004-007

Rule Regarding Certain Terms Used in Auditing and Related Professional Practice Standards

PCAOB Release No. 2004-007
June 9, 2004

PCAOB Rulemaking
Docket Matter No. 009

Summary:

After public comment, the Public Company Accounting Oversight Board (the "PCAOB" or "Board") has adopted Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards*. The Board will submit this rule to the Securities and Exchange Commission ("SEC" or "Commission") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This rule will not take effect unless approved by the Commission.

Board Contacts:

Greg Scates, Associate Chief Auditor (202/207-9114; scatesg@pcaobus.org), and Bella Rivshin, Assistant Chief Auditor (202/207-9180; rivshinb@pcaobus.org).

* * *

Section 103 of the Act directs the Board to establish auditing and related professional practice standards, including auditing, attestation, quality control, ethics, and independence standards, applicable to registered public accounting firms in the preparation and issuance of audit and other reports for public companies. To date, the Board has adopted rules that require registered public accounting firms and their associated persons to "comply with all applicable auditing and related professional practice standards," (Rule 3100) and designate as interim standards of the Board certain standards that existed as of April 16, 2003 (Rules 3200T—3600T).

On October 7, 2003, the Board proposed Rule 3101 to set forth the terminology the Board will use to describe the degree of responsibility that the auditing and related professional practice standards impose on registered auditors. As proposed, this terminology also would apply to the Board's interim standards. The Board believes that the use of clear, concise, consistent, and definitive imperatives will improve audit quality.

The Board received 12 comment letters from a variety of interested parties, including auditors, professional associations, and government agencies. In response to the comments received, several changes were made to the requirements of the rule, which are described in detail in Appendix 2.

Appendices 1 and 2 to this release contain, respectively, the text of Rule 3101, *Certain Terms Used in Auditing and Related Professional Practice Standards*, and the Section-by-Section Analysis.

A. Introduction

Until now, the accounting profession has not expressly defined imperatives used to describe different degrees of the auditor's responsibility when conducting engagements in accordance with professional standards. Because of its concerns regarding the clarity in and consistency of existing standards, the Public Oversight Board's Panel on Audit Effectiveness recommended that the various levels of imperatives in auditing standards be clarified.¹ The Board agrees that defining these levels of imperatives will assist auditors with their work and further enhance the quality of audits.

Rule 3101 defines terminology the Board will use to describe the degrees of responsibility that the standards impose on the auditors as follows—

1. Unconditional Responsibility. The words "must," "shall," and "is required" indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies.
2. Presumptively Mandatory Responsibility. The word "should" indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the Board's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard.
3. Responsibility To Consider. The words "may," "might," "could," and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on the exercise of professional judgment in the circumstances consistent with the objectives of the standard.

B. Applicability to Interim Standards

Although the auditing and related professional practice standards did not previously expressly define the degree of responsibility attached to these terms, the Board determined that the terminology defined in Rule 3101 is consistent with the existing interpretation of the interim standards. The Board believes that applying Rule 3101 to all auditing and related professional practice standards, including the interim standards, will create a common understanding among auditors of performance expectations when conducting engagements in accordance with the PCAOB Standards. Therefore, the Board concluded that it is appropriate to apply the definitions of these particular terms to the interim standards.

C. Documentation Requirement for Presumptively Mandatory Responsibility

The integrity of the audit depends, in large part, on the existence of a complete and understandable record of the work performed, the conclusions reached, and the evidence obtained to support those conclusions. Clear, complete, and comprehensive audit documentation enhances the quality of the audit. Audit documentation should demonstrate compliance with professional standards and provide an explanation to justify the reasons for any variations in procedures performed.

¹ Panel on Audit Effectiveness, *Report and Recommendations* §2.228 (August 31, 2000).

The PCAOB Standards require that the auditor document the procedures performed, evidence obtained, and conclusions reached during an engagement. To further enhance the quality of the audit, Rule 3101(a)(2) adds a specific documentation requirement to achieve complete and comprehensive audit documentation for situations in which the auditor does not perform a presumptively mandatory activity. In those instances, auditors must document the reasons they chose not to perform the presumptively mandatory activity and how the alternative procedure performed sufficiently achieved the objectives of the specific standard.

During an internal or external review of the engagement, other evidence, including oral explanation, may help substantiate the procedures performed by the auditor during the audit. However, because the auditor is required to document his or her work during the audit, oral explanation should be used only to clarify the documented work performed. Furthermore, the reviewer should give appropriate consideration to the credibility of the individual(s) providing the oral explanation, and the oral explanation should be consistent with the documented evidence.

D. Effective Date

Because of the specific documentation requirement in paragraph (a)(2) of this rule, the Board has determined that the implementation date for the documentation requirement contained in Rule 3101 should coincide with that of PCAOB Auditing Standard No. 3, *Audit Documentation*. Therefore, the documentation requirement for Rule 3101(a)(2) will be effective for audits of financial statements with respect to fiscal years ending on or after the later of November 15, 2004, or 30 days after the date of approval of this rule by the SEC. The remaining Rule 3101 provisions become effective immediately following approval by the SEC.

* * *

On the 9th day of June, in the year 2004, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

Rule 1001. Definitions of Terms Employed in Rules

(a)(xi) Auditor

The term "auditor" means both public accounting firms registered with the Public Company Accounting Oversight Board and associated persons thereof.

SECTION 3. PROFESSIONAL STANDARDS

Part 1—General Requirements

Rule 3101. Certain Terms Used in Auditing and Related Professional Practice Standards

- (a) The Board's auditing and related professional practice standards use certain terms set forth in this rule to describe the degree of responsibility that the standards impose on auditors.

(1) **Unconditional Responsibility:** The words "must," "shall," and "is required" indicate unconditional responsibilities. The auditor must fulfill responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. Failure to discharge an unconditional responsibility is a violation of the relevant standard and Rule 3100.

(2) **Presumptively Mandatory Responsibility:** The word "should" indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type specified in the Board's standards unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard. Failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.

Note: In the rare circumstances in which the auditor believes the objectives of the standard can be met by alternative means, the auditor, as part of documenting the planning and performance of the work, must document the information that demonstrates that the objectives were achieved.

(3) **Responsibility To Consider:** The words "may," "might," "could," and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on the exercise of professional judgment

in the circumstances consistent with the objectives of the standard.

Note: If a Board standard provides that the auditor "should consider" an action or procedure, consideration of the action or procedure is presumptively mandatory, while the action or procedure is not.

- (b) The terminology in paragraph (a) of this rule applies to the responsibilities imposed by the auditing and related professional practice standards, including the interim standards adopted in Rules 3200T, 3300T, 3400T, 3500T, and 3600T.
- (c) The documentation requirement in paragraph (a)(2) is effective for audits of financial statements or other engagements with respect to fiscal years ending on or after [insert date the later of November 15, 2004, or 30 days after approval of this rule by the Securities and Exchange Commission].

Appendix 2

Section-by-Section Analysis of Rule 3101

Rule 3101(a)

In drafting its standards, the Board intends to distinguish among three levels of auditor responsibility. Rule 3101(a) explains the terminology regarding imperatives used in the standards the Board establishes.

Rule 3101(a)(1) provides that the words "must," "shall," and "is required" in standards indicate unconditional responsibilities. The auditor must accomplish responsibilities of this type in all cases in which the circumstances exist to which the requirement applies. A failure to discharge an unconditional responsibility imposed under the Board's standards is a violation of the relevant standard and Rule 3100.

Rule 3101(a)(2) provides that the word "should" in standards indicates responsibilities that are presumptively mandatory. The auditor must comply with requirements of this type unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient to achieve the objectives of the standard. In the rare circumstances in which the auditor believes the objectives of the standard can be met by alternative means, the auditor, as part of documenting the planning and performance of the work, must document the information that demonstrates that the objectives were achieved. The Board has determined that a failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard.

Rule 3101(a)(3) provides that the words "may," "might," "could," and other terms and phrases describe actions and procedures that auditors have a responsibility to consider. Matters described in this fashion require the auditor's attention and understanding. How and whether the auditor implements these matters in the audit will depend on the exercise of professional judgment in the circumstances.

The Board added the following captions to Rule 3101(a): 3101(a)(1) Unconditional Responsibility, 3101(a)(2) Presumptively Mandatory Responsibility, and 3101(a)(3) Responsibility To Consider. Proposed Rule 3101(a) did not have a caption or designation for each category of terms. Rather, the proposed rule simply referenced the category of certain terms by using the standard format in PCAOB rulemaking. The Board added the captions in response to a commenter's recommendation that a caption be added to each category of certain terms for ease of reference and clarity.

One commenter recommended replacing the term "obligation" in Rule 3101 with a comparable term because the commenter believed that the term "obligation" in legal and governmental environments has a connotation that is inconsistent with the intent of Rule 3101 and may be misinterpreted by legal or governmental officials. After considering this comment, the Board replaced the term "obligation" with the synonym "responsibility" in Rule 3101.

Rule 3101(a)(2) defines a presumptively mandatory responsibility as a requirement that the auditor must comply with "unless the auditor demonstrates that alternative actions he or she followed in the circumstances were sufficient

to achieve the objectives of the standard." Furthermore, Rule 3101(a)(2) states that "failure to discharge a presumptively mandatory responsibility is a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the circumstances, compliance with the specified responsibility was not necessary to achieve the objectives of the standard."

The Board also added a note to Rule 3101(a)(2) to require auditors to document compliance with presumptively mandatory responsibilities by alternative means. The Board originally proposed that the auditor be required to "demonstrate by verifiable, objective, and documented evidence" that the alternative procedures he or she followed were sufficient in the specific circumstances. Commenters stated that they believed that the documentation requirement was important, both to promote discipline of thought and to provide a uniform basis for evaluating compliance with the standards. Several of these commenters went even further to recommend that the Board strengthen the documentation requirement by adding language such as "contemporaneous" and "memorialized at the time of the audit" to the rule.

Conversely, other commenters suggested that the documentation requirement was unduly onerous and placed too great a documentation burden on the auditors. The commenters argued that the documentation would be too voluminous and would add very little value to the audit. Some of these commenters further recommended that, in lieu of the proposed documentation requirement, the rule require that the auditor consider the significance of the particular audit area and document only the significant issues or findings. A commenter also recommended that other evidence, such as oral explanation, should be allowed as support for the reasons why the auditor chose not to perform a presumptively mandatory responsibility. Additionally, some commenters recommended that the documentation requirement should be addressed in the standard on audit documentation.

The integrity of the audit depends, in large part, on the existence of a complete and understandable record of the work performed, the conclusions reached, and the evidence obtained to support those conclusions. Clear, complete, and comprehensive audit documentation enhances the quality of the audit. Audit documentation should demonstrate compliance with professional standards and justify the reasons for any variations in procedures performed.

The PCAOB Standards require the auditor to document the procedures performed, evidence obtained, and conclusions reached during an engagement. To further enhance the quality of the audit, Rule 3101(a)(2) adds a specific documentation requirement to achieve complete and comprehensive audit documentation in engagement working papers for situations in which the auditor does not perform a presumptively mandatory responsibility. In those instances, it is essential that auditors document the reasons they chose not to perform the presumptively mandatory responsibility and how the alternative procedure they performed sufficiently achieved the objectives of the specific standard.

Because circumstances will be rare in which the auditor will perform an alternative procedure, the Board anticipates that the documentation requirement in the rule ought not to result in unduly onerous consequences or too voluminous documentation. Furthermore, since the auditor must already document the work performed as part of the audit, adding a concise explanation as to why the auditor chose to perform the alternative procedure should not increase the volume of documentation to an unreasonable level.

During an internal or external review of the engagement, other evidence, including oral explanation, may help substantiate the procedures performed by the auditor during the audit. However, because the auditor is required to document his or her work in the engagement working papers during the audit, oral explanation should be used only to clarify the documented work performed. The justification as to why the alternative procedure was performed rather than the presumptively mandatory responsibility must be documented in the working papers. Furthermore, the reviewer should give appropriate consideration to the credibility of the individual(s) providing the oral explanation, and the oral explanation should be consistent with the documented evidence in the engagement working papers.

Moreover, the Board concluded that applying the documentation requirement only to significant issues, findings, or procedures is impractical because it will not be efficient or effective to determine, each time, whether the level of significance of an audit area warranted the auditor to document the reasons for choosing to perform an alternative procedure instead of the presumptively mandatory procedure. The purpose of Rule 3101 is to bring uniformity to definitions and requirements that auditors have to follow. In addition, the Board determined that moving Rule 3101(a)(2)'s documentation requirement to the audit documentation standard would not be appropriate because of its specific subject matter.

Additionally, the Board has added a note, originally a footnote in the Board's proposing release accompanying its proposed rule, describing an auditor's responsibility in a "should consider" scenario to the text of Rule 3101(a)(3), Responsibility to Consider. Some commenters recommended that this footnote be added directly to the text of the rule because they saw it as an important clarification that was not included in the original proposed rule. A commenter further urged the Board to elaborate on its applicability and the documentation requirements for a "should consider" action.

Another commenter suggested that the "should consider" footnote be excluded from the rule because it implies that the action would require the auditor to document every instance of compliance with a "should consider" action. The commenter, instead, recommended that Rule 3101(a)(3) be revised to apply to all considerations regardless of how the obligation is expressed (for example, whether it is preceded by a "should," "may," "could," or "might").

Because the "should consider" terminology is widely used in the interim standards, the Board determined that it is important to state the Board's expectation for compliance and, therefore, agreed with commenters who recommended adding the "should consider" footnote to the text of Rule 3101(a)(3). Furthermore, the Board concluded that there is an important difference between a "should consider" and a "may consider" action or procedure. The difference is a direct correlation to the definitions of "should" and "may." The auditor has a greater responsibility in a "should consider" action because the auditor has a presumptively mandatory responsibility to consider the action or procedure versus just having a responsibility to consider the action. Therefore, Rule 3101(a)(3) was not revised to apply to all considerations regardless of how the obligation is expressed.

Additionally, the Board determined that the documentation requirement relating to a procedure that an auditor "should consider" is not the same as the documentation requirement for a presumptively mandatory responsibility because in a "should consider" situation, only the consideration of the action

is presumptively mandatory, while the action or procedure itself is not. In these situations, the auditor should use his or her professional judgment in determining how to document his or her consideration of the specific action or procedure.

Rule 3101(b)

Rule 3101(b) provides that the terminology in paragraph (a) of this rule applies to all the auditing and related professional practice standards, including the interim standards adopted in Rules 3200T, 3300T, 3400T, 3500T, and 3600T. Rule 3101(b) applies to conduct occurring after the effective date of the rule.

Therefore, Rule 3101(b) provides that the terminology in Rule 3101(a) is applicable to all existing auditing and related professional practice standards with which auditors must comply. The Board determined that a failure to comply with a presumptively mandatory responsibility in an interim standard will be treated as a violation of the relevant standard and Rule 3100 unless the auditor demonstrates that, in the specific circumstances, compliance was not necessary to achieve the objectives of the standard.

Some commenters on the proposed rule stated that the imperatives the Board identified are consistent with the way auditors currently interpret existing auditing and related professional practice standards, while other commenters recommended that Rule 3101(a) not apply to the interim standards on the grounds that the new definitions could create confusion or have unintended consequences. Because the accounting profession previously had not expressly defined these terms, commenters further recommended that the Board perform a comprehensive analysis of how and in what context the interim standards use the defined terms to determine whether current practice is consistent with the Rule 3101(a) definitions.

The Board concluded that the terminology defined in Rule 3101 is consistent with the existing interpretation regarding the application of the terminology in the interim standards. Rule 3101 creates a common understanding among the auditors as to what is expected of them when performing engagements in accordance with the PCAOB Standards and, therefore, Rule 3101 will apply to the interim standards.

Furthermore, a commenter recommended that the Board clarify the level of authority the appendices carry when accompanying the Board's Standards. Because the Board adopts the appendices to its permanent standards as rules, the appendices to the Board's permanent standards carry the same level of authority as the standards themselves. In addition, the appendices to the interim standards, which in certain circumstances carry a different level of authority, retain their original level of authority as adopted on April 16, 2003.

Rule 3101(c)

Rule 3101(c) establishes an effective date for the documentation requirement in paragraph (a)(2). The Board agreed with commenters who recommended establishing an effective date to provide a reasonable amount of time for auditors to implement procedures to properly comply with the new documentation requirement.

Rule 3101 does not apply retroactively. Therefore, conduct occurring before the rule is effective will be evaluated in light of the standards as they existed

at the time of the conduct. As noted above, however, the Board believes that, except for the documentation requirement in Rule 3101(a)(2), the definitions in Rule 3101 are consistent with the existing interpretation of these terms in the existing, interim standards. Therefore, as an interpretive matter, the Board expects that it will interpret these terms in the existing, interim standards in a manner consistent with their definitions in Rule 3101, in light of the facts and circumstances of each particular situation.

PCAOB Release No. 2005-014***Ethics and Independence Rule Concerning Independence, Tax Services, and Contingent Fees***

PCAOB Release No. 2005-014

July 26, 2005

PCAOB Rulemaking
Docket Matter No. 017**Approved by the Securities and Exchange Commission on April 19, 2006, with varying effective dates.**

The Securities and Exchange Commission has approved PCAOB ethics and independence rules concerning independence, tax services and contingent fees.

The rules introduce a foundation for the independence component of the Board's ethics rules by establishing a general obligation requiring a registered public accounting firm and its associated persons to be independent of the firm's audit clients throughout the audit and professional engagement period.

The rules identify circumstances in which the provision of tax services impairs an auditor's independence, including services related to marketing, planning, or opining in favor of the tax treatment of, among other things, transactions that are based on aggressive interpretations of applicable tax laws and regulations.

The rules also treat registered public accounting firms as not independent of their audit clients if they enter into contingent fee arrangements with those clients or if the firms provide tax services to certain members of management who serve in financial reporting oversight roles at an audit client or to immediate family members of such persons.

The rules further implement the Sarbanes-Oxley Act's requirement that auditors' non-audit services be pre-approved by the audit committee by strengthening the auditor's responsibilities in connection with seeking audit committee pre-approval of tax services. Specifically, the rules require a registered public accounting firm that seeks such pre-approval to describe proposed tax services engagements, in writing, for the audit committee; to discuss with the audit committee the potential effects of the services on the firm's independence; and to document the substance of that discussion.

Finally, an ethics rule also codifies the principle that persons associated with a registered public accounting firm (e.g., individual accountants) can be held responsible when certain of their actions contribute to a firm's violation of relevant laws, rules, or professional standards.

The effective dates for the rules follow:

Rule	Effective Date
3501—Definition of Terms	April 29, 2006
3502—Responsibility Not to Knowingly or Recklessly Contribute to Violations	April 29, 2006
3520—Auditor Independence	April 29, 2006
3521—Contingent Fees	Rule 3521 will not apply to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before June 18, 2006.
3522—Tax Transactions	Rule 3522 will not apply to tax services that were completed by a registered public accounting firm no later than June 18, 2006.
3523—Tax Services for Persons in Financial Reporting Oversight Roles	Rule 3523 will not apply to tax services being provided pursuant to an engagement in process on April 19, 2006, provided that such services are completed on or before October 31, 2006.
3524—Audit Committee Pre-approval of Certain Tax Services	Rule 3524 will not apply to any tax service pre-approved on an engagement-by-engagement basis before June 18, 2006. With respect to tax services provided to audit clients whose audit committees pre-approve tax services pursuant to policies and procedures, Rule 3524 will not apply to any such tax service that is begun by April 20, 2007.

Summary:

The Public Company Accounting Oversight Board ("PCAOB" or "Board") is adopting rules to promote the ethics and independence of registered public accounting firms that audit financial statements of U.S. public companies. The rules treat a registered firm as not independent of a public company audit client if the firm, or an affiliate of the firm, provided any service or product to an audit client for a contingent fee or a commission, or received from an audit client, directly or indirectly, a contingent fee or commission. The rules also treat such a firm as not independent if the firm, or an affiliate of the firm, provided assistance in planning, or provided tax advice on, certain types of potentially abusive tax transactions to an audit client or provided any tax services to certain persons employed by an audit client. Further, the rules require registered public accounting firms to provide certain information to audit committees in connection with seeking pre-approval to provide non-prohibited tax services.

In addition to these rules relating to tax services, the Board also is adopting a general rule requiring registered public accounting firms and their associated persons to be independent of their audit clients throughout the audit and professional engagement period. Finally, the Board is adopting a rule on the responsibility of persons associated with registered public accounting firms not to cause registered public accounting firms to violate the Sarbanes-Oxley Act of 2002 (the "Act"), the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Securities and Exchange Commission issued under the Act, and professional standards.

Public Comments:

The Board released for public comment proposed rules to promote the ethics and independence of registered public accounting firms on December 14, 2004. The Board received 805 letters of comment.

I. Final Rules on Auditors' Provision of Tax Services

On December 14, 2004, the Board proposed certain rules related to registered public accounting firms' provision of tax services to public company audit clients. The proposal was designed to address certain concerns related to auditor independence when auditors become involved in marketing or otherwise opining in favor of aggressive tax shelter schemes and in selling personal tax services to individuals who play a direct role in preparing the financial statements of public company audit clients. The proposal was also based on the Board's recognition of the fact that accounting firms have long offered basic tax compliance services that have not raised significant questions about those firms' ability also to serve as independent auditors. The Board received 805 comment letters from investors, auditors, issuers, and others, most of whom, in general, supported the proposed rules.¹

Neither the federal securities laws nor the SEC's rules prohibit auditors from providing tax services to their audit clients, so long as such services are pre-approved by a company's audit committee (and so long as those services do not fall into one of several enumerated categories of expressly prohibited services).² The SEC has recognized, however—most recently in connection with promulgating rules to implement the auditor independence provisions of Title II of the Act³—that while it did not consider conventional tax compliance and planning to be a threat to auditor independence, the marketing of novel, tax-driven financial products raises more challenging auditor independence issues.

¹ Seven hundred forty of these comment letters were from individual investors expressing strong support for the proposal.

² On February 5, 2003, the Securities and Exchange Commission ("SEC" or "Commission") adopted rules to implement Title II of the Sarbanes-Oxley Act of 2002 (the "Act"). These rules address key aspects of auditor independence with special emphasis on the provision of non-audit services. The rules expressly prohibit ten categories of non-audit services, as required by Section 201 of the Act. Strengthening the Commission's Requirements Regarding Auditor Independence, SEC Release No. 33-8183, § I.B.11 (Jan. 28, 2003), 17 C.F.R. Parts 210, 240, 249, and 274.

³ See *id.*

On this basis, the SEC has cautioned that an audit committee should "scrutinize carefully" the retention of the company's auditor in a transaction initially recommended by the auditor "the sole business purpose of which may be tax avoidance and the tax treatment of which may be not supported in the Internal Revenue Code and related regulations."⁴

In addition to requiring the SEC to establish rules implementing the Act's prohibition of certain non-audit services, the Act vested in the PCAOB the authority to establish standards relating to ethics and independence in public company auditing. Specifically, Section 103(a) of the Act directs the Board, by rule, to establish "ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports, as required by th[e] Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors." Moreover, Section 103(b) of the Act directs the Board to establish such rules on auditor independence "as may be necessary or appropriate in the public interest or for the protection of investors, to implement, or as authorized under, Title II of th[e] Act."⁵

As discussed more fully in the Board's proposing release, since the SEC issued its new rules, two types of tax services have raised serious concerns among investors, auditors, lawmakers, and others relating to the ethics and independence of accounting firms that provide both auditing and tax services—

1. the marketing to public company audit clients of questionable tax transactions used improperly to avoid paying taxes or to manipulate financial statements in order to make such statements appear more favorable to investors, and
2. the provision of tax services, including tax shelter products, to executives of public company audit clients who are involved in the financial reporting process at such companies.

Indeed, in an April 2005 report issued since the Board's proposal, the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs (the "Subcommittee") found that some of the nation's largest accounting firms had in the past sold generic tax products to multiple corporate and individual clients despite evidence that some of those products were potentially abusive or illegal.⁶ In addition, the Internal Revenue Service ("IRS") and the U.S. Department of Justice have brought a number of cases against

⁴ *Id.* Moreover, the SEC's release accompanying its rules referred to the recommendation of the Conference Board's Commission on Public Trust and Private Enterprise that, as a "best practice," auditors not provide advice on "novel and debatable" tax strategies and products. *Id.* §II.B.11 at note 112.

⁵ Pursuant to this authority, in April 2003, the Board adopted as its interim, transitional, independence standards (PCAOB Rule 3600T) the American Institute of Certified Public Accountants ("AICPA") *Code of Professional Conduct* Rule 101 and related interpretations and rulings thereof, as they existed on April 16, 2003. PCAOB Rule 3600T notes that the interim standards do not supersede the Commission's auditor independence rules and, to the extent that a provision of the Commission's rules is more restrictive (or less restrictive) than the interim standards, the auditor must comply with the more restrictive rules. The PCAOB also adopted Independence Standards Board ("ISB") Standard Nos. 1, 2, and 3 and Interpretations 99-1, 00-1, and 00-2 as additional interim independence standards.

⁶ See Permanent Subcommittee on Investigations of the Committee on Homeland Security and Governmental Affairs, *The Role of Professional Firms in the U.S. Tax Shelter Industry*, S. REP. NO. 109-54, at 6 (2005) (hereinafter "April 2005 Senate Report"). This report was based on a Subcommittee investigation that included hearings, in November 2003, in which the Subcommittee elicited testimony that described certain potentially abusive tax shelter products marketed through cold-call selling techniques by accounting firms and others. See also *U.S. Tax Shelter Industry: The Role of Accountants, Lawyers, and Financial Professionals: Hearings Before the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs*, 108th Cong. (2003) (hereinafter "U.S. Tax Shelter Hearings").

accounting firms in connection with those firms' marketing of tax shelter products and, specifically, those firms' alleged failures to register, or comply with list maintenance requirements relating to, their tax shelter products. Most recently, earlier this year, the IRS proposed a settlement initiative for executives and companies that participated in certain abusive tax avoidance transactions, at times with the assistance of the companies' auditors.⁷ At the time the initiative was announced, IRS Commissioner Mark W. Everson said that "[t]hese transactions raise[d] questions not only about compliance with the tax laws, but also, in some instances, about corporate governance and auditor independence."⁸ Specifically, the IRS concluded that "[r]eal or perceived conflicts of interest may exist where independent auditors certify to the public the accuracy and integrity of the company's financial statements and these auditors advise senior executives on their personal tax issues about abusive tax shelters they promoted, the same executives that oversee the relationship with the auditing firm."⁹

The Government Accountability Office ("GAO") also has noted concerns about auditors' involvement in marketing abusive tax shelters to public companies. The GAO recently reported that 61 Fortune 500 companies obtained tax shelter services from their external auditors during the period 1998 through 2003.¹⁰ The GAO also noted that the IRS considered some of these "transactions abusive, with tax benefits subject to disallowance under existing law, and other transactions possibly to have some traits of abuse."¹¹

While other organizations have focused on a variety of legal and ethical issues presented by the tax shelter business, the Board's proposal focused on whether tax services generally, or any class of tax services, impair an auditor's independent judgment, in fact or appearance, in its audit work. Thus, over several months, the Board considered a wide range of tax services, including routine tax return preparation and tax compliance; tax planning and advice relating to federal, state, local, and other tax laws; executive tax services; international assignment tax services; and tax shelter strategies and products. To assist the Board in its evaluation, the Board held a public roundtable discussion with individuals representing a variety of viewpoints, including investors, auditors, managers of public companies, governmental officials, and others.¹²

Based on this evaluation, the Board developed a set of proposed rules designed to establish a framework for addressing the concerns that have arisen in connection with auditors' provision of tax services to their public company audit

clients. Specifically, the proposed rules were designed, among other things, to prevent auditors from providing (1) certain aggressive tax shelter services to public company audit clients, (2) any other service to a public company audit client for a contingent fee, which is a fee arrangement often used in tax work, and (3) any tax service to certain persons who serve in financial reporting oversight roles at a public company audit client. The proposed rules also would implement the requirements of the Act and the SEC's independence rules when an auditor seeks audit committee pre-approval to provide tax services that are not prohibited by the Board's or the SEC's rules.

The Board also sought comment on whether additional types of tax services, such as tax compliance services, should be prohibited by a Board rule. After carefully considering the comments received on this issue, most of which supported the Board's preliminary determination to exclude certain kinds of tax services from the purview of its proposed rules, the Board has determined to adopt the rules, substantially as proposed, and not to restrict auditors' provision of other kinds of tax services. That is, auditors may continue to provide to their public company audit clients other kinds of tax services not expressly prohibited by the Board's rules, so long as such services are consistent with the Commission's independence requirements and so long as the auditor and audit committee have complied with the Act's and the Commission's requirements relating to audit committee pre-approval of such services.

There is some evidence that accounting firms already recognize the risks that involvement in clients' abusive tax shelters can pose, as well as the problems that can result from providing tax services to executives of audit clients. And, there is some evidence that such firms have made changes to their oversight of firm services in order to avoid such problems in the future. For example, in its April 2005 report, the Subcommittee found that, since the Subcommittee's investigation began, some of the largest firms had each committed to, among other things, "cultural, structural, and institutional changes to dismantle its tax shelter practice...."¹³ Moreover, some firms have announced significant internal reforms designed to restore confidence in the ethics and independence of their audit practices.

Against this backdrop, commenters generally supported the Board's proposal. In addition, the Subcommittee recommended in its April 2005 report that "the Public Company Accounting Oversight Board ... strengthen and finalize proposed rules restricting certain accounting firms from providing aggressive tax services to their audit clients, charging companies a contingent fee for providing tax services, and using aggressive marketing efforts"¹⁴ Also, the IRS noted its support for the Board's proposal in its response to the GAO's report on Tax Shelters.¹⁵

Accordingly, today the Board is adopting final rules based on its December 2004 proposal. These final rules reflect modifications of the proposal in certain respects, largely due to insights derived from the Board's consideration of the comments received. Part II of this release describes the final rules, as well as modifications from the proposed version of the rules.

¹⁴ April 2005 Senate Report, *supra* note 6, at 8.

¹⁵ See GAO Tax Report, *supra* note 10, at 21 (in the IRS's official response to the GAO's report, IRS Commissioner Everson noted that "We support the December 2004 actions of the PCAOB on this problem!").

II. Detailed Discussion of Rules and Consideration of Comments

The Board's final rules are intended to accomplish four objectives. First, the rules codify, in an ethics rule, the principle that persons associated with a registered public accounting firm should not cause the firm to violate relevant laws, rules, and standards. Second, the rules introduce a foundation for the independence component of the Board's ethics rules. That foundation includes a fundamental independence requirement and, as necessary and appropriate, additional rules addressing specific circumstances related to independence issues.

Third, the rules build on that foundation with provisions that identify certain impairments to an auditor's independence. Specifically, the rules treat a firm as not independent if it, or any of its affiliates, enters into a contingent fee arrangement relating to an audit client. Also, the rules treat a firm as not independent if it, or any of its affiliates, markets, plans, or opines in favor of certain types of aggressive tax transactions to or for public company audit clients. In addition, the rules treat a firm as not independent if it, or any of its affiliates, provides tax services to certain persons in a financial reporting oversight role at an audit client or to immediate family members of such persons.

Fourth, the rules require registered public accounting firms to provide audit committees certain information in connection with seeking pre-approval from such committees, as required by the Act and the SEC's independence rules, to perform nonprohibited tax services for the audit client. The rules would require a firm seeking preapproval to describe the terms of the tax services engagement to the audit committee and to engage in a substantive discussion with the audit committee about the potential effects of such services on the firm's independence.¹⁶

A. Responsibility Not to Cause Violations

Rule 3502, as proposed, provided that a person associated with a registered public accounting firm shall not cause that firm to violate the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards, due to an act or omission the person knew or should have known would contribute to such violation. The Board proposed the rule to codify the ethical obligation of associated persons of registered firms not to cause registered firms to commit such violations. Proposed Rule 3502 also made clear that an associated person's ethical obligation is not merely to refrain from knowingly causing a violation but also to act with sufficient care to avoid negligently causing a violation.

The Board received a number of comments on proposed Rule 3502. Several commenters supported the rule as proposed and noted that they saw the rule as essential to the Board's ability to carry out its disciplinary responsibilities under the Act. Other commenters, however, including the largest accounting firms and an accounting trade association, did not support the rule as proposed. In general, these commenters objected to the proposed rule's use of a negligence standard in light of the complex regulatory requirements with which auditors

¹⁶ The rules also include several definitions that are integral to the operation of the rules.

must comply. Some of these commenters also questioned the Board's authority to adopt the proposed rule, or at least the proposed rule with a negligence standard.

The Board has carefully considered these comments and determined to adopt Rule 3502, with some modifications. The Board continues to believe that it is authorized to adopt the rule. Section 103(a) of the Act directs the Board to, "by rule, establish . . . such ethics standards to be used by registered public accounting firms in the preparation and issuance of audit reports, as required by this Act or the rules of the Commission, or as may be necessary or appropriate in the public interest or for the protection of investors." The Board believes that the rule is an appropriate exercise of this authority to set ethical standards for accountants subject to the Board's jurisdiction.

Under the Act and Board rules, both registered firms and their associated persons must comply with PCAOB rules and standards, as well as related laws. When an associated person with such a responsibility causes the firm with which he or she is associated to violate such rules, standards or laws, this conduct operates to the detriment of the protection of investors and the public interest and may bear on the ethics of the responsible associated person. When such a person engages in this conduct with knowledge that, or in reckless disregard of whether, it would directly and substantially contribute to the firm's violation, the Board believes this conduct plainly reflects an ethical lapse by the responsible person and, therefore, is within the Board's authority—and indeed responsibility—to proscribe.

At least one commenter asserted that the proposed rule was not a proper exercise of the Board's ethics standards-setting authority because it reached a range of conduct, rather than delineating "particular impermissible conduct." The Board disagrees and believes the type of conduct addressed by the rule is plainly the type of conduct the Board's ethics rules can and should address. In fact, the accounting profession's existing ethical code at the time of enactment of the Act reaches any act that may "discredit[]" the profession—thereby reaching ranges of conduct, including violations of certain laws, rather than just specifying "particular impermissible conduct."¹⁷ When Congress vested the authority to set ethics standards in the Board, the Board believes it intended for this authority to be at least as broad as the scope of the existing ethics rules, at least as to matters within the Board's jurisdiction. This authority, in the Board's view, plainly includes the ability to require that persons subject to the Board's jurisdiction, as an ethical obligation, not cause a violation of relevant laws.

Commenters opposed to the proposed rule also sought to analogize the rule to a theory of liability that the Supreme Court rejected in *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.*¹⁸ In *Central Bank*, the Supreme Court held that there is no private right of action for aiding and abetting a violation of Section 10(b) of the Securities Exchange Act of 1934 ("Exchange Act"). That decision turned on the fact that the text of Section 10(b)

¹⁷ See *AICPA Code of Professional Conduct*, ET section ("sec.") 501, "Acts Discreditable" ("A member shall not commit an act discreditable to the profession."). Interpretations of this part of the ethical code provide that an accountant member will be considered to have committed a discreditable act if, among other things, he or she: "fails to comply with applicable federal, state or local [tax] laws or regulations," ET sec. 501.08, Interpretation 501-7; fails to follow applicable requirements of a governmental body, such as the SEC, in performing accounting services, ET sec. 501.06, Interpretation 501-5; or fails to follow government audit standards and rules in conducting a governmental audit, ET sec. 501.04, Interpretation 501-3.

¹⁸ 511 U.S. 164 (1994).

does not provide for aiding-and-abetting liability.¹⁹ The Board does not believe this decision affects the scope of the Board's explicit authority to set ethics standards under Section 103 of the Act.²⁰ Again, the Board notes that the profession's existing ethics code also reaches what can be characterized as "secondary" conduct contributing to a violation.²¹

The power to adopt Rule 3502 also is inherent in, and necessary to, the Board's authority to enforce PCAOB standards, rules, and related laws against both registered firms and their associated persons. Section 105 authorizes the Board to investigate and, when appropriate, discipline registered firms and their associated persons. Certain types of violations, by their nature, may give rise to direct liability only for a registered public accounting firm. Such firms, however, can only act through the natural persons that comprise them, many of whom are "associated persons" subject to the Board's ethics standards and disciplinary authority. When one or more of those associated persons has caused that firm to violate PCAOB standards, rules, or related laws with the requisite state of mind, it is appropriate, and consistent with the Board's duty to discipline registered firms and their associated persons under Section 101(c)(4) of the Act, that the Board be able to discipline the associated person for that misconduct.²²

After carefully considering the comments received, the Board has determined, however, to modify the scope of Rule 3502 to apply only when an associated person causes the registered firm's violation due to an act or omission the person "knew, or was reckless in not knowing, would directly and substantially contribute to such violation." This revised formulation reflects two changes to the rule as proposed.

First, the Board has determined to change the state-of-mind requirement in the rule. Specifically, Rule 3502, as adopted, will apply to "an act or omission the [associated] person knew, or was reckless in not knowing," would cause the violation. While the Board believes it has the authority to adopt a negligence standard,²³ the Board believes the revised standard strikes the right balance in

¹⁹ See *id.* at 190 ("Because the text of §10(b) does not prohibit aiding and abetting, we hold that a private plaintiff may not maintain an aiding and abetting suit under §10(b).").

²⁰ Rule 3502, of course, differs from an aiding-and-abetting cause of action in important respects. Among other things, the rule does not apply whenever an associated person causes another to violate relevant laws, rules and standards. Rather, Rule 3502 applies only when an associated person causes a violation by the registered firm with which the person is associated.

²¹ See *AICPA Code of Professional Conduct*, paragraph .02(2) of ET sec. 91, "Applicability" ("A member shall not knowingly permit a person, whom the member has the authority or capacity to control, to carry out on his or her behalf, either with or without compensation, acts which, if carried out by the member, would place the member in violation of the rules. Further, a member may be held responsible for the acts of all persons associated with him or her in the practice of public accounting whom the member has the authority or capacity to control."); see also ET sec. 102.02, Interpretation 102-1(c) (violation of ethics rules not just to sign, but to "permit[] or direct[] another to sign a document containing materially false and misleading information") (adopted as a Board interim ethics rule in Rule 3500T).

²² Some commenters suggested that the reference to "any act, or practice . . . in violation of this Act" in Section 105(c)(4)—the part of the Act authorizing the Board to impose certain sanctions—was inconsistent with the proposed rule. The Board notes, however, as it did in the proposing release, that Section 105(c)(5) expressly provides that the more severe of these sanctions may be imposed when intentional, knowing, or reckless conduct, or repeated instances of negligent conduct, "results in" violation of law, regulations, or professional standards.

²³ A number of commenters argued that Section 105(c) of the Act prevents the Board from imposing discipline based on a negligence standard. The Board's determination to change the rule's state-of-mind requirement to recklessness moots these comments. The Board notes, however, that Section 105(c)(5) identifies a range of sanctions that the Board may not impose in the absence of knowing conduct, reckless conduct, or repeated instances of negligent conduct. The Act does not similarly limit the Board's authority to impose certain other sanctions.

the context of this rule. The Board believes that the phrase "knew, or was reckless in not knowing" is a wellunderstood legal concept, and the Board intends for the phrase to be given its normal meaning.

Second, the Board has determined to modify the phrase used to describe the connection between the associated person's conduct and the violation. Specifically, Rule 3502, as adopted, provides that the associated person's act or omission must "directly and substantially contribute to [the firm's] violation." In particular, "substantially" in this context means that the associated person's conduct (i.e., an act or omission) contributed to the violation in a material or significant way. The term "substantially" also means, however, that the associated person's conduct does not need to have been the sole cause of the violation. "Directly" means that the associated person's conduct either essentially constitutes the violation—even though it is the firm and not the individual that actually commits the violation—or is a reasonably proximate facilitating event of, or a reasonably proximate stimulus for, the violation. "Directly and substantially" does not mean that the associated person's conduct must be the sole cause of the violation, nor that it must be the final step in a chain of actions leading to the violation. In addition, the term "directly" should not be misunderstood to excuse someone who knowingly or recklessly engages in conduct that substantially contributes to a violation, just because others also contributed to the violation, or because others could have stopped the violation and did not. At the same time, the term does not reach an associated person's conduct that, while contributing to the violation in some way, is remote from, or tangential to, the firm's violation.

A number of commenters expressed concern that adoption of a negligence standard would allow the Board, or the SEC, to proceed against associated persons who in good faith, albeit negligently, have caused a registered firm to violate applicable laws or standards. For example, commenters suggested that the proposed rule could be used against compliance personnel within a firm who inadvertently design a firm's compliance system in a flawed manner. Commenters also expressed concern that, because the SEC can enforce PCAOB rules under Section 3 of the Act, the Board's rule could have the practical effect of altering the state-of-mind requirement applicable in SEC enforcement proceedings against accountants.

It was not the Board's intention to establish a new standard for SEC enforcement of the securities laws and related applicable rules. The Board also recognizes that persons subject to its jurisdiction must comply with complex professional and regulatory requirements in performing their jobs. The Board does not seek to create through this rule a vehicle to pursue compliance personnel who act in an appropriate, reasonable manner that, in hindsight, turns out to have not been successful. Nor does the Board seek to reach those whose conduct, unbeknownst to them, remotely contributes to a firm's violation. At the same time, the Board continues to believe that it is necessary and appropriate for its ethics rules to apply when an associated person has engaged in an act or omission with knowledge that, or in reckless disregard of whether, it would directly and substantially contribute to a violation.²⁴

The Board also believes that, because the rule is essential to the functioning of the Board's independence rules, this rulemaking provides the appropriate forum to adopt the rule. For example, Rule 3521 provides, in part, that a registered firm is not independent of its audit client if the firm provides that audit

²⁴ While the Board's proposed rule tracked some of the language of Section 21C of the Securities Exchange Act of 1934 ("Exchange Act"), the rule, as adopted, differs significantly from, and should not be interpreted in pari material with, that statutory provision.

client with a service for a contingent fee. When an associated person causes, in a manner consistent with the discussion above, the registered firm to provide that service for a contingent fee, Rule 3502 would allow the Board to discipline the associated person for that conduct.²⁵

B. Ethics and Independence

The final rules also create a foundation for the independence requirements of the Board's ethics rules. The rules introduce a new "Independence" subpart in the ethics rules. That subpart begins with Rule 3520, which articulates the fundamental independence requirement. The final rules also include additional rules that describe independence impediments in the particular context of contingent fee arrangements and tax services.

1. The Fundamental Independence Requirement

Rule 3520 sets forth the fundamental ethical obligation of independence: a registered public accounting firm and its associated persons must be independent of the firm's audit client throughout the audit and professional engagement period. This requirement encompasses the independence requirements set out in PCAOB Rule 3600T and goes further, as a matter of the auditor's ethical obligation, to encompass any other independence requirement applicable to the audit in the particular circumstances. Accordingly, in the case of an audit client subject to the financial reporting requirements of the securities laws and the SEC's rules, the ethical obligation under Rule 3520 requires the firm and its associated persons to maintain independence consistent with the SEC's requirements.²⁶

By giving this scope to Rule 3520, the Board is not promulgating any new independence requirement. The Commission's independence requirements exist independently of Rule 3520 and are subject to change at the discretion of the Commission, without Rule 3520 purporting separately to lock in place any aspect of those requirements. Instead, Rule 3520 is based on the simple premise that ethical standards for auditors can and should encompass a duty by the auditor to maintain independence necessary to ensure compliance with independence requirements in the circumstances of the particular engagement.

A note to the rule emphasizes the scope of the obligation in the rule by pointing out that, even in circumstances to which the Commission's Rule 2-01 applies, a registered public accounting firm and its associated persons still may need to comply with other independence requirements, including those requirements separately established by the Board. Using this foundation, the Board may adopt additional rules in the "Independence" subpart of the ethics rules that effectively set out additional requirements. As described below, with the new rules adopted today, the Board's independence rules include contingent fee arrangements and tax services.

After carefully considering the comments on proposed Rule 3520, the Board has determined to adopt the rule, with only one change. Most commenters supported the scope and content of the proposed rule. A few commenters, however,

²⁵ Rule 3502, of course, is not the exclusive means for the Board to enforce applicable Board rules and standards against associated persons. Among other provisions, Rules 3100 and 3200T through 3600T directly require associated persons to comply with certain auditing and related professional practice standards. In addition, PCAOB standards generally contain directives to the "auditor." The term "auditor" is defined in PCAOB Rule 1001(a)(xii) to include both registered firms and their associated persons. Accordingly, an associated person of a registered firm that does not comply with such a directive may be charged with violations of such other standards, independent of any charges under Rule 3502.

²⁶ 17 C.F.R. § 210.2-01.

asked the Board to add text to the proposed rule to clarify or emphasize that the rule incorporates certain concepts in the existing independence requirements. While these comments are discussed in more detail below, the Board did not adopt these suggestions, as a general matter, because of the purpose of Rule 3520. Rule 3520 was simply intended to require, by Board rule, compliance with applicable independence requirements. The rule was not intended to, and does not, add to—or subtract from—these existing requirements. Nor is it intended to reflect the Board's conceptual approach to independence issues. Accordingly, while the Board does not necessarily disagree with the intent of the commenters who suggested adding text to the proposed rule, it does not believe it is necessary or appropriate to modify the rule to reflect their specific suggestions.

Three commenters suggested that Rule 3520 expressly require that auditors maintain independence from their audit client "both in fact and appearance." As proposed, the rule already requires auditors to maintain independence both in fact and appearance, because the SEC's independence rules—which are incorporated in Rule 3520, as discussed above—are "designed to ensure that auditors are qualified and independent of their audit clients both in fact and in appearance."²⁷ In addition, Statement on Auditing Standards ("SAS") No. 1, Codification of Auditing Standards and Procedures, adopted by the Board as an interim standard, requires that auditors "not only be independent in fact; [but also] avoid situations that may lead outsiders to doubt their independence."²⁸ Therefore, the Board does not believe it is necessary to include this additional language in Rule 3520 to preserve these existing principles.

Some commenters also recommended that Rule 3520 expressly include the SEC's four overarching independence principles that it will look to in determining whether a particular service or client relationship impairs the auditor's independence.²⁹ Other commenters asked the Board to explicitly note in the rule that certain tax services are consistent with the SEC's four principles. For the reasons described above, the Board has decided not to change the rule in response to either of these suggestions. The Board notes, however, that the SEC's independence rules already refer to the four principles, and these rules must be complied with under Rule 3520.

Two commenters suggested that Rule 3520 include the text of the American Institute of Certified Public Accountants' ("AICPA") Ethics Rule 102, which provides, in pertinent part, that members of the AICPA should avoid any subordination of their judgment.³⁰ Although the Board shares these commenters' view about the importance of this principle, the Board has already adopted Ethics Rule 102 as part of its interim ethics rule, Rule 3500T. Accordingly, this rule is already part of the Board's ethical standards and need not be separately repeated in Rule 3520 to be enforced by the Board.

Two firms suggested that Rule 3520, as proposed, might have the effect of precluding use of exceptions in the SEC's existing independence rules and

²⁷ 17 C.F.R. § 210.2-01, Preliminary Note 1; *accord United States v. Arthur Young & Co.*, 465 U.S. 805, 819 n.15 (1984).

²⁸ SAS No. 1, *Codification of Auditing Standards and Procedures*, paragraph .03 of AU sec. 220. The standard further states that "[p]ublic confidence would be impaired by evidence that independence was actually lacking, and it might also be impaired by the existence of circumstances which reasonable people might believe likely to influence independence." *Id.*

²⁹ See 17 C.F.R. §210.2-01, Preliminary Note 2. Specifically, under those principles, the SEC looks to whether a relationship or the provision of a service: (a) creates a mutual or conflicting interest between the accountant and the audit client; (b) places the accountant in the position of auditing his or her own work; (c) results in the accountant acting as management or an employee of the audit client; or (d) places the accountant in a position of being an advocate for the audit client.

³⁰ See *AICPA Code of Professional Conduct*, ET sec. 102, "Integrity and Objectivity".

asked the Board to avoid that result. Other than creating a requirement in a Board rule to comply with existing and applicable independence requirements, it does not add to, or detract from, the scope and substantive effect of these existing requirements in any respect.

The Board has, however, as suggested by a commenter, added "associated persons" to the rule. While the independence requirements added to the Board's rules through this rulemaking apply to the firm, other independence requirements covered by Rule 3520 are directed to individual accountants within auditing firms. Most notably, certain of the SEC's independence rules impose independence requirements directly on individual accountants.³¹ Accordingly, the Board believes it is appropriate for the rule to apply to associated persons, as well as registered firms themselves. At the same time, the Board has added a new note to the rule to make clear that the rule applies only to those associated persons of a registered public accounting firm that are required to be independent of the firm's audit client by standards, rules, or regulations of the Commission or other applicable independence criteria.³² Accordingly, the rule does not impose independence requirements on persons not already subject to them, and does not impose new independence requirements on any associated person. Rather, Rule 3520 only requires associated persons who are otherwise subject to independence requirements to comply, as an ethical obligation, with those requirements.

2. Contingent Fees

The Board also has determined to adopt Rule 3521 as proposed. There was widespread support among commenters for the Board's view, expressed in the proposal, that certain fee arrangements used for the provision of tax services create per se conflicts of interest that impair auditors' independence from their audit clients. As discussed more fully in the proposing release, when an accounting firm provides a service to an audit client for a contingent fee, the firm's economic interests become aligned with the interests of its audit client in a manner that is inconsistent with the firm's role as independent auditor. The Board's rule was adapted from the SEC's rule prohibiting contingent fee arrangements³³ and thus treats registered firms as not independent if they enter into contingent fee arrangements with audit clients.

Specifically, Rule 3521 provides that a registered public accounting firm is not independent of its audit client³⁴ if the firm, or any affiliate of the firm,³⁵ during the audit and professional engagement period,³⁶ provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission. The

³¹ See, e.g., Rule 2-01(c)(1), 17 C.F.R. §210.2-01(c)(1). See also PCAOB Rule 3600T.

³² Other applicable independence criteria include any rules of the PCAOB, other than Rule 3520, that contain independence requirements directly applicable to associated persons of the firm, such as Rule 3600T.

³³ See 17 C.F.R. §210.2-01(c)(5).

³⁴ Rule 3501(a)(iv) defines "audit client" as "the entity whose financial statements or other information is being audited, reviewed, or attested and any affiliates of the audit client."

³⁵ Rule 3501(a)(ii) defines "affiliate of the accounting firm" as "the accounting firm's parents; subsidiaries; pension, retirement, investment or similar plans; and any associated entities of the firm, as that term is used in Rule 2-01 of the Commission's Regulation S-X, 17 C.F.R. § 210.2-01(f)(2)."

³⁶ Rule 3501(a)(iii) adapts the definition of "audit and professional engagement period" from the definition of that term in the Rule 2-01 of the SEC's Regulation S-X, which includes both the period covered by the financial statements under audit or review and the period beginning when a registered public accounting firm signs an initial engagement letter (or when such a firm begins audit, review or attest procedures, whichever is earlier) and ends when the audit client notifies the SEC that the engagement has ceased. See 17 C.F.R. §210.2-01(f)(5).

Board's definition of a contingent fee is "any fee established for the sale of a product or the performance of any service pursuant to an arrangement in which no fee will be charged unless a specified finding or result is attained, or in which the amount of the fee is otherwise dependent upon the finding or result of such product or service."³⁷

Fees fixed by courts or other public authorities and not dependent on a finding or result are excluded from this definition to permit contingencies that do not pose a risk of establishing a mutual interest between the auditor and the audit client. In the proposing release, the Board cited, as an example of such a permissible fee, fees approved by a bankruptcy court, as required under U.S. federal bankruptcy law.³⁸ The Board also sought comment on whether there are courts or other public authorities that fix fees that are not dependent on a finding or result, other than bankruptcy courts, such that the term "courts or other public authorities" is necessary.

In response to this request, several commenters noted that they are not aware of any such authorities and encouraged the Board to eliminate the reference to "other public authorities" from the proposed rule. Other commenters suggested that the Board retain the phrase, even though they did not identify other contexts in which fees that are not contingent on a result of a "product or service" are nevertheless subject to approval by a court or other public authority.³⁹ After considering these comments, the Board has decided to retain the exception for fees that require approval of "courts or other public authorities." The Board envisions that there may be fee approval schemes outside the U.S. that are analogous to U.S. bankruptcy law.

Although Rule 3521 and the related definition of "contingent fee" are modeled on the SEC's independence rules, as discussed in the Board's proposing release, they differ from those rules in that the Board's rules do not include the SEC's exception for fees "in tax matters, if determined based on the results of judicial proceedings or the findings of governmental agencies."⁴⁰ As discussed in the Board's proposing release, this exception may have been misinterpreted in the past and is largely redundant of the exception for fees fixed by courts or other public authorities.⁴¹ For these reasons, proposed Rule 3521 would eliminate

³⁷ Rule 3501(c)(ii). As discussed in the Board's proposing release, the term "contingent fee" includes the aggregate amount of compensation for a service, including any payment, service, or promise of other value, taking into account any rights to reimbursements, refunds, or other repayments that could modify the amount received in a manner that makes it contingent on a finding or result.

³⁸ 11 U.S.C. § 328(a) (providing that, with a court's approval, a bankruptcy trustee may employ a professional person "on any reasonable terms and conditions of employment, including on a retainer, on a fixed or percentage fee basis, or on a contingent fee basis").

³⁹ One commenter suggested that arbitration panels should be captured in the final rule as an example of "courts or other public authorities" that may approve auditor fees. The Board is not aware, and the commenter did not appear to suggest, that any arbitration panels currently have authority, by contract or law, to approve the payment of fees to accountants. Therefore, the Board has not expanded the exception to include fees fixed by arbitration panels. Nevertheless, if an arbitration panel were by contract given the authority to approve accountants' fees, such fees would be permissible under the Board's rule so long as the determination of the fee was not contingent on the result of a product or service.

⁴⁰ 17 C.F.R. § 210.2-01(f)(10). By eliminating this exception from its rule, the Board expresses no view on any firm's compliance with Rule 2-01 of the Commission's Regulation S-X. See 17 C.F.R. §210.2-01(c)(5).

⁴¹ As the SEC Chief Accountant has stated, the SEC's "tax matters" exception only permits fee arrangements where the determination of the fee is "taken out of the hands of the accounting firm and its audit client . . . , with the result that the accounting firm and client are less likely to share a mutual financial interest in the outcome of the firm's advice or service." Letter from Donald T. Nicolaisen, Chief Accountant, U.S. Securities and Exchange Commission, to Bruce P. Webb, Professional Ethics Executive Committee Chair, American Institute of Certified Public Accountants (May 21, 2004), available at <http://www.sec.gov/info/accountants/staffletters/webb052104.htm> (hereinafter "Nicolaisen Letter").

this exception. The few commenters who addressed this issue agreed with the Board's reasoning and the elimination of this exception. Therefore, the Board's final rule does not include an exception for tax matters in which an auditor's fee agreement is based on the results of judicial proceedings or the findings of governmental agencies.

In addition, Rule 3521 treats a firm as not independent of an audit client if it receives a contingent fee or commission from that client "directly or indirectly." The rule's use of the term "indirectly" is meant to prevent arrangements for a fee from any person that is contingent on a finding or result attained by the audit client. The Board's determination to include such fees within the prohibition is based on the principle that, regardless of who pays the contingent fee, such a contingency gives an auditor a stake in the audit client attaining the finding or result. Accordingly, under Rule 3521, it does not matter who pays the contingent fee, if it is contingent on a finding or result attained by the audit client or otherwise related to the firm's services for the audit client. That is, while use of an intermediary to disguise an audit client's agreement to a contingent fee is certainly prohibited, the rule is not limited to circumstances in which a contingent fee may be traced (e.g., through an intermediary) to an agreement or payment by an audit client.

Comparable to the SEC's independence rules, proposed Rule 3521 treats contingent fee arrangements between a registered firm's affiliates and the registered firm's audit clients as relevant to the firm's independence.⁴² The inclusion of such affiliates within the scope of those persons whose activities may impair the independence of a firm from an audit client is intended to prevent frustration of the rule's purpose through the use of firm subsidiaries and other affiliates.⁴³ The rule is not intended to, and does not, impose any requirements on affiliates of firms *per se*. Nonetheless, the conduct of an affiliate of the firm can cause the registered firm not to be independent in the situations specified in the rules.

Finally, one accounting firm commented that Rule 3521 should prohibit value-added fees because such fees could be used in lieu of contingent fees to achieve a similar effect as contingent fees. Fees that function as contingent fee arrangements are already prohibited under the SEC's rule against contingent

⁴² The rule does so by providing that the firm is not independent if it "or any affiliate of the firm . . . provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission." The scope of the rule is intended to be the same as the scope of the Commission's rule, which defines the terms "accountant" and "accounting firm" to include such affiliates. Because registration with the Board is the basis for the Board's authority over an accountant, the rules would treat those persons that are related to a registered public accounting firm and satisfy the Commission's definition of "accounting firm," but are not registered firms themselves, as "affiliates of the accounting firm." Thus, Rule 3501(a)(i) would adapt the Commission's definition of the term "accounting firm" to define the term "affiliate of the accounting firm" as "the accounting firm's parents, subsidiaries, pension, retirement, investment or similar plans, and any associated entities of the firm, as that term is used in Rule 2-01 of the Commission's Regulation S-X, 17 C.F.R. § 210.2-01(f)(2)."

⁴³ See, e.g., *In re PricewaterhouseCoopers LLP, & PricewaterhouseCoopers Securities LLC*, Exchange Act Release No. 46,216 (July 17, 2002), available at <http://www.sec.gov/litigation/admin/34-46216.htm> (finding an auditing firm and an affiliate under the control of the firm in violation of Commission requirements because the affiliate performed investment banking services for the firm's audit clients for contingent fees); *In KPMG, LLP v. Securities & Exch. Comm'n*, 289 F.3d 109 (D.C. Cir. 2002), the D.C. Circuit Court declined to find KPMG in violation of the AICPA's rule against contingent fees, where KPMG only indirectly received a contingent royalty from an audit client, through an associated entity of the firm. The Board's rules should be understood, however, to treat such an arrangement as an impairment of a registered firm's independence.

fees,⁴⁴ and thus under the Board's final rule as well, whether such fees are labeled contingent fees, value-added fees, or otherwise. The SEC has indicated that it will closely monitor the use of value-added fees "to determine whether a fee labeled a "value added" fee is in fact a contingent fee, such as where there are side letters or other evidence that ties the fee to the success of the services rendered,"⁴⁵ and the Board intends to do so as well before, if necessary, considering additional rulemaking.

3. Aggressive Tax Positions

Rule 3522 is intended to describe a class of tax-motivated transactions that present an unacceptable risk of impairing an auditor's independence if the auditor markets, plans, or opines in favor of, such a transaction. As discussed in the Board's proposing release, such conduct has seriously damaged investors' confidence in the judgment, objectivity, and ethics of firms that engage in such transactions. Further, aggressive tax positions carry a high risk that taxing authorities will not allow the position taken by the auditor and the audit client. As the SEC Chief Accountant noted in the context of contingent fees, "the fact that a government agency might challenge the amount of the client's tax savings . . . heightens . . . the mutuality of interest between the firm and client."⁴⁶

As proposed, Rule 3522 treated a firm as not independent of its audit client if the firm, or an affiliate of the firm, provided services related to planning, or opining on the tax consequences of a transaction that is a listed or confidential transaction under U.S. Department of Treasury ("Treasury") regulations or that promoted an interpretation of applicable tax laws for which there is inadequate support. In order to describe such transactions in a manner that is clear and consistent with existing constructs for analyzing tax-oriented transactions, the rule is adapted from certain Treasury regulations and from the SEC's release accompanying its 2003 independence rules.

Commenters generally supported the notion that auditors should not provide tax services involving aggressive tax positions to their audit clients. They also supported the scope of Rule 3522, which as proposed covered listed transactions, confidential transactions, and other aggressive transactions. A number of commenters made suggestions to make the rule text clearer, however, and after considering such comments the Board has modified the rule in several respects.

First, several commenters suggested that the rule should make clear that it does not prohibit auditors from advising audit clients *not* to engage in an aggressive transaction. Rule 3522 was not intended to prevent such advice, so in response to these comments the Board has modified the rule to make clear the prohibition on opining on aggressive transactions is limited to "opining *in favor of* the tax treatment of" such transactions (emphasis added). Thus, auditors are permitted to advise *against* an audit client's execution of an aggressive

⁴⁴ See Revision of the Commission's Auditor Independence Requirements, SEC Release No. 33-7919, §IV.D.5 (Nov. 21, 2000), 17 C.F.R. Parts 210, 240. Indeed, the SEC staff has cautioned audit committees against approving—

any agreement—from a direct contract provision to "a wink and a nod"—that provides for the possible additional payment of a "value added" fee based on the results of an accounting firm's performance of a tax or other service [that] would be viewed as impairing the firm's independence. In addition, an audit committee should consider carefully the impact on an accounting firm's independence of the possibility of even a completely voluntary payment of a "value added" fee by an audit client to the firm.

Nicolaisen Letter, *supra* note 41.

⁴⁵ See Revision of the Commission's Auditor Independence Requirements, SEC Release No. 33-7919, §IV.D.5 (Nov. 21, 2000), 17 C.F.R. 210, 240.

⁴⁶ Nicolaisen Letter, *supra* 41.

tax transaction.⁴⁷ However, Rule 3522 prohibits an opinion that a transaction does not satisfy the more-likely-than-not standard but does satisfy a lower standard of confidence. Similarly, the rule prohibits advice that an audit client will "probably" lose an argument in favor of a tax treatment, because such advice can imply up to a 49-percent chance of success.

In addition, as recommended by one commenter, given recent concerns about accounting firms establishing marketing centers to sell tax shelter products, the Board has added the term "marketing" to the list of activities that compromise an auditor's independence. That is, under Rule 3522, as adopted, an auditor may not market an aggressive tax transaction to an audit client, in addition to being prohibited from "planning, or opining in favor of the tax treatment of," such a transaction.

Finally, proposed Rule 3522(a)'s prohibition on auditors' involvement in listed transactions has been moved to become a part of the prohibition on involvement in aggressive tax position transactions, in light of the overlap of the two provisions and also in light of questions regarding whether the prohibition on listed transactions could apply in the context of a non-U.S. tax regime. Accordingly, Rule 3522 now provides for two categories of prohibitions related to aggressive tax transactions, whereas, as proposed, it had provided for three such categories. These two categories, as well as modifications of their proposed versions, are discussed below.

a. Aggressive Tax Position Transactions⁴⁸

Rule 3522(b) would treat a registered firm as not independent if the firm, or an affiliate of the firm, provided an audit client any service related to marketing, planning, or opining in favor of the tax treatment of, a transaction that satisfies three criteria—

- the transaction was initially recommended, directly or indirectly, by the firm;
- a significant purpose of the transaction is tax avoidance; and
- the proposed tax treatment of the transaction is not at least more likely than not to be allowed under applicable tax laws.

Rule 3522(b) is adapted from the SEC's guidance to audit committees in its release accompanying its 2003 independence rules, which cautioned that audit committees should "scrutinize carefully" the retention of the auditor "in a transaction initially recommended by the accountant, the sole business purpose of which may be tax avoidance and the tax treatment of which may be not supported in the Internal Revenue Code and related regulations."⁴⁹ The rule builds on this guidance from the perspective of the auditor, by providing that a

⁴⁷ In addition, a number of commenters asked for clarification of the scope of Rule 3522's prohibition against "opining" on an aggressive transaction. The Board does not intend the rule to encompass the auditor's opinion on the fairness of financial statements that reflect the accounting for a transaction that an audit client has executed. Rather, Rule 3522 is intended to prevent auditors from facilitating clients' execution of aggressive transactions by, among other things, providing auditors' written tax opinions that protect the audit client from the assertion of penalties by tax authorities or courts.

⁴⁸ As proposed, this provision was entitled "aggressive tax positions." One commenter questioned whether this title was intended to expand the scope of this provision beyond transactions. In addition, the commenter noted that the term "transaction" was consistent with Treasury regulations. In response to this comment, the Board has re-titled this provision to be "aggressive tax position transactions."

⁴⁹ Strengthening the Commission's Requirements Regarding Auditor Independence, *supra* note 2, at §II.B.11 (Jan. 28, 2003).

registered firm is not independent of its audit client if the firm, or an affiliate of the firm, participates in such a transaction.

The first prong of the rule's test looks for transactions that the auditing firm—directly or indirectly, e.g., through an affiliate, through or with another tax advisor with which the firm has an arrangement, or otherwise—initially recommended to the audit client. In this manner, the rule excludes from its scope those transactions that the audit client itself, or a party other than a tax advisor with which the firm has an arrangement⁵⁰ (e.g., an acquiring corporation), initiated. The term "initially recommended" is intended to be a test based on fact. Thus, the prong would be satisfied, notwithstanding a representation from the audit client that the audit client initiated the development of the transaction,⁵¹ if the auditor had knowledge that the auditor, its affiliate, or another tax advisor with which the firm has an arrangement, initially recommended it. As proposed, the rule would have looked for transactions that were "initially recommended by the registered public accounting firm or another tax advisor." Some commenters expressed concern that an auditor might not be in a position to know whether another tax advisor with no relationship to the auditor had recommended a transaction. In response to these comments, the Board has modified the first prong of Rule 3522(b) to make clear that auditors are only responsible for ascertaining whether the firm, one of its affiliates, or another tax advisor with which the firm has a formal agreement or other arrangement related to the promotion of such a transaction, initially recommended the transaction.⁵²

The second and third prongs of Rule 3522(b) incorporate concepts that have existing meaning and relevance to tax advisors. The second prong of the test set forth in Rule 3522(b) uses the phrase "significant purpose of which is tax avoidance," adapted from the Internal Revenue Code.⁵³ The term "tax avoidance" should be understood to include acceleration of deductions into earlier taxable years and deferral of income to later taxable years. A few commenters noted that the test whether a significant purpose of a transaction is tax avoidance appears to be a low threshold that could encompass any plan to reduce taxes, and some of those commenters suggested that the Board raise that threshold. The Board intends for the threshold to be low, however, and therefore has not used terms that might seem to establish a higher threshold, such as requiring an evaluation of whether the "sole purpose" of a transaction is tax avoidance.

In addition, the rule uses the term "more likely than not to be allowable under applicable tax laws," which is the standard certain taxpayers must meet, under Treasury regulations, to avoid penalties for substantial understatement

⁵⁰ The term "tax advisor" is not intended to denote a group with a certain license or professional status, but rather to cover any person, other than the client, that recommends a tax transaction to the client.

⁵¹ Two commenters indicated that, as they interpreted the term "transaction," an auditor's tax services in connection with, for example, a merger transaction that was initiated by the client or another company, would not come within the ambit of Rule 3522(b), because the auditor would not have recommended the merger transaction itself. This is not a fair interpretation of the rule and indeed would thwart its purpose.

⁵² See Rule 3522(b), Note 2. The term "formal agreement or other arrangement" in Note 2 relates only to relationships a registered firm may have with a tax advisor that is not already an affiliate of the firm.

⁵³ The Internal Revenue Code treats transactions with respect to which a "significant purpose . . . is the avoidance or evasion of Federal income tax" as tax shelters, for purposes of determining whether an adequate disclosure defense is available for the substantial understatement penalty. See 26 U.S.C. §6662(d)(2)(C) (amended by the Jobs Act; see also 26 U.S.C. §6662A(b)(2)(B) (imposing 20-percent penalty on understatements of tax in connection with "any reportable transaction (other than a listed transaction) if a significant purpose of such transaction is the avoidance or evasion of Federal income tax").

of income tax in connection with a tax shelter.⁵⁴ This test is based, in part, on the Board's observation of some firms' policies that rely on the "more likely than not" standard to approve the firm's involvement in providing tax services relating to a transaction initiated by the firm. The rule also uses this standard because a tax treatment that is not "more likely than not" to be allowed poses a significantly higher risk of being challenged by taxing authorities, such that a mutuality of interest between the auditor and the audit client could arise.⁵⁵ Moreover, the rule uses this standard, as opposed to a higher standard, in recognition of the fact that tax laws may often be complex and subject to differing good faith interpretations.⁵⁶

In order to satisfy Rule 3522(b)'s "more likely than not" standard, a registered public accounting firm must establish, based on an analysis of the pertinent facts and authorities, that there is a greater than 50-percent likelihood that the tax treatment of the transaction would, if challenged, be upheld.⁵⁷ To satisfy this test, an auditor's analysis must be objectively reasonable and well-founded at the time the analysis is conducted. The Board would not, however, treat an auditor as not independent if the law changed after the service was provided or if the tax treatment simply turned out to be not allowed, despite the auditor's reasonable judgment before the ultimate resolution of a tax claim or other dispute.

Rule 3522(b) does not require a registered public accounting firm to obtain a third-party opinion that a tax treatment is "more likely than not" to be allowed under applicable tax laws. On the contrary, while a firm may decide for its own reasons to obtain a third-party opinion, such an opinion would not relieve the firm of its obligation to form its own judgment on the likelihood of a proposed tax treatment to be allowed.⁵⁸

Finally, although the SEC's release accompanying its 2003 independence rules cautioned audit committees to scrutinize situations in which a proposed

⁵⁴ See 26 C.F.R. § 1.6664-4(f).

⁵⁵ Some commenters noted that, while the term "more likely than not" is wellunderstood in the context of evaluating U.S. tax advice, it has not been used in non-U.S. contexts. One of these commenters also noted that this standard may be hard to judge in jurisdictions in which the rule of law does not always prevail. After considering these comments, the Board has determined to maintain the "more likely than not standard," because it is an objective standard that may be applied in contexts outside the U.S. even where it has not applied to-date. Further, the Board notes that foreign private issuers ordinarily file U.S. tax returns and therefore are already expected to comply—and be familiar with—U.S. tax laws and regulations.

⁵⁶ A few commenters recommended that the Board use a standard higher than "more likely than not," on the ground that there is some evidence that some accounting firms that used the "more likely than not" standard in the past have not adhered to it. While the Board is concerned about the record on this issue, the Board has determined not to use a higher standard at this time. The Board intends to monitor compliance with the rule through its inspections of registered public accounting firms and will consider revising the rule in the future, if that monitoring or other evidence reveals that the rule is not achieving its intended purpose.

⁵⁷ Cf. 26 C.F.R. § 1.6664-4(f)(2)(i)(B)(1) (incorporating by reference methodology set forth in 26 C.F.R. § 1.6662-4(d)(3)(ii) for analysis of whether a tax treatment has "substantial authority" or, in the case of tax shelters, is "more likely than not" the proper treatment, for purposes of determining whether a penalty may be due on a substantial understatement of income tax).

⁵⁸ Treasury regulations permit corporations to avoid penalties for substantial understatement of income taxes in connection with tax shelters if they "reasonably rel[y] in good faith on the opinion of a professional tax advisor, if the opinion is based on the tax advisor's analysis of the pertinent facts and authorities . . . and unambiguously states that the tax advisor concludes that there is a greater than 50-percent likelihood that the tax treatment of the item will be upheld if challenged by the Internal Revenue Service." 26 C.F.R. § 1.6664-4(f)(2)(i)(B)(2). Rule 3522(b) would not permit registered public accounting firms, who themselves serve as tax advisors, to rely on other tax advisors to satisfy the rule's standard because registered firms that provide tax services are themselves in a position to perform such an analysis.

tax treatment might not be supported "in the Internal Revenue Code and related regulations," the proposed rule would use the term "applicable tax laws" in recognition of the variety of tax laws and regulations, including federal, state, local, foreign, and other tax laws, that may be the subject of tax services. For this reason, and in response to questions from several commenters, the Board also incorporated its proposed prohibition on auditors providing tax services in connection with transactions that are listed by the IRS into Rule 3522(b). That is, IRS listing is one example of aggressive tax transactions covered by the rule.

Accordingly, the prohibition on advising in favor of listed transactions, which was proposed as Rule 3522(a), has been moved to a note to what is now Rule 3522(b). Specifically, Note 1 to Rule 3522(b) treats a registered public accounting firm as not independent of its audit client if the firm, or any affiliate of the firm, provided services related to marketing, planning, or opining in favor of the tax treatment of, a listed transaction. Under Treasury regulations, a listed transaction is "a transaction that is the same as or substantially similar to one of the types of transactions that the IRS has determined to be a tax avoidance transaction and identified by notice, regulation, or other form of published guidance as a listed transaction."⁵⁹ The IRS uses its listing process to identify and publish a list of transactions that tax promoters and advisors have developed and sold to clients but that, in the IRS's view, do not comply with applicable laws. Thus, the Treasury's regulation on "listed transactions" identifies a class of transactions that, in the Board's view, carries an unacceptable risk of disallowance, which in turn create an unacceptable risk of establishing a mutuality of interest between the auditor and the audit client if the auditor participated in marketing, planning, or opining in favor of the tax treatment of a transaction that impairs independence. By referring to this class of transactions, Note 1 to Rule 3522(b) incorporates an existing framework that auditors who serve as tax advisors already follow in their tax practices and that is highly likely to remain current since the Treasury and the IRS regularly update guidance related to listed transactions.⁶⁰

As discussed above, the Board's proposed prohibition on auditor involvement in transactions that are "listed" by the IRS has been moved to a note to Rule 3522(b). By definition, a listed transaction is not "more likely than not to be allowable under applicable tax laws" at the time the auditor advises on it. Because the risk of IRS or other scrutiny of listed transactions, including transactions that are substantially similar to listed transactions,⁶¹ is high, tax advisors and taxpayers tend not to enter into such transactions once they are listed. In light of this fact, when it proposed this rule, the Board sought comment on whether the rule should treat an auditor as not independent if a transaction planned or opined on by the auditor subsequently became listed. In general, commenters recommended against adopting a *per se* rule that subsequent listing of such a

⁵⁹ See, e.g., 26 C.F.R. §1.6011-4(b)(2).

⁶⁰ The IRS updates the list of listed transactions by issuing a listing notice, both adding to and removing transactions from the list of listed transactions. See, e.g., IRS Notice No. 2004-67, 2004-41 I.R.B. 600. Some commenters questioned whether the Board should effectively incorporate the IRS's changes to its list into the Board's rule on aggressive transactions. This is, indeed, the Board's intention. To freeze the IRS's list as of the date of the Board's final rule, or to establish a system of reviewing the IRS's list as it is updated, might permit auditors to provide tax services in favor of listed transactions notwithstanding that the IRS had identified those transactions as potentially abusive. Such a system would thwart the underlying intent of the Board's rule.

⁶¹ By its terms, the Treasury regulation requiring reporting of listed transactions makes clear that the definition of "listed transaction" includes transactions that have been listed by the IRS as well as transactions that are "substantially similar" to such transactions. By expressly referring to the Treasury's regulation on listed transactions, the Board intends Rule 3522(b) to encompass such substantially similar transactions that are included in the Treasury's regulation.

transaction impaired an auditor's independence with respect to either the period in which the transaction was executed or in subsequent periods. The Board agrees that such a *per se* rule would not be appropriate, but as discussed below, firms should nevertheless be cautious in participating in transactions that they believe could become listed.

Even if a firm were independent at the time a transaction was executed, because it reasonably and correctly concluded the transaction was not the same as, or substantially similar to, a listed transaction, once a transaction is actually listed (or a substantially similar transaction becomes listed), a firm that has participated in the transaction may find its independence impaired due to the mutuality of interest caused by the listing. That is, depending on the circumstances, a firm's independence may become impaired in some cases after a transaction planned or opined on by the firm becomes listed. In such cases, the auditor should carefully consider the potential impairment of its independence with the audit committee of its audit client.⁶² For example, once a transaction is listed, either the audit client or the firm, or both, may be required to defend the tax treatment of the transaction and, in some cases, pay penalties. In addition, the firm may face liability to the audit client related to the firm's tax advice. The auditor's judgment regarding appropriate financial reporting and disclosure concerning a transaction that becomes listed could become biased by the auditor's vested interests in defending its tax advice.

Some auditors commented that they would prefer a bright-line rule providing that, so long as a transaction recommended by the firm was not listed at the time it was executed, subsequent listing cannot impair an auditor's independence later in time, when the auditor is called on to defend its earlier tax advice. Such a bright-line rule, however, would do little to address circumstances in which, because of IRS scrutiny after execution of the transaction, the auditor's interest in the client's successful defense of the transaction becomes heightened to the point where the auditor can no longer be impartial about the financial statement presentation of the transaction. That said, as some commenters noted, existing independence requirements address these kinds of circumstances, and thus the Board has determined not to expand Rule 3522(b) either to retroactively deem an auditor not independent upon subsequent listing of a transaction or to deem an auditor not independent *per se* in the period in which such a transaction becomes listed. b.

b. Confidential Transactions

The Treasury has identified transactions with tax-advisor imposed conditions of confidentiality as potentially abusive. By regulation, the Treasury requires taxpayers to disclose to the IRS transactions in which a tax advisor "places a limitation on disclosure by the taxpayer of the tax treatment or tax structure of the transaction and the limitation on disclosure protects the confidentiality of that advisor's tax strategies."⁶³ Tax-advisor imposed confidentiality may also be indicative of a tax product that a tax advisor intends to market to multiple customers, thus necessitating commitments by customers to treat the tax treatment or structure of the advisor's product as confidential.

As discussed in the proposing release, the Board is concerned that marketing, planning, or opining in favor of tax products that require confidentiality in

⁶² According to ISB Standard No. 1, which is incorporated in the Board's Rule 3600T interim independence standards, at least annually, an auditor must "disclose to the audit committee of the company (or the board of directors if there is no audit committee), in writing, all relationships between the auditor and its related entities and the company and its related entities that in the auditor's professional judgment may reasonably be thought to bear on independence."

⁶³ 26 C.F.R. § 1.6011-4(b)(3)(ii).

order that they may be offered to multiple clients contributes to the erosion of public confidence in the ethics and integrity of such firms. A reasonable investor easily could infer that the auditor has a vested interest in advocating to the IRS the tax treatment it promoted, or helped to promote, to multiple clients and perpetuating that treatment in the audit client's financial statements. Based on these concerns, Rule 3522(a) treats a registered public accounting firm as not independent of its audit client if the firm, or an affiliate of the firm, provided services related to marketing, planning, or opining in favor of the tax treatment of a transaction for an audit client under terms that satisfy the definition of "confidential transaction," as defined by Rule 3501(c)(i), which is adapted from the Treasury's regulation requiring tax advisors to report confidential transactions.⁶⁴

It should be noted that, Rule 3501(c)(i) defines confidential transactions in terms of confidentiality restrictions imposed by tax advisors generally, not specifically auditors. Therefore, whereas under Rule 3522(b) a transaction that is initially recommended by a tax advisor other than the auditor or an affiliate of the auditor unless the tax advisor has an arrangement with the auditor does not fall within the first prong of the rule, Rule 3522(a) prohibits an auditor from marketing, planning, or opining in favor of a confidential transaction whether the applicable terms of confidentiality are imposed by the auditor or by another tax advisor, acting independently of the auditor.

Commenters generally supported the Board's proposed prohibition on confidential transactions. Although some commenters expressed the view that tax advisors might impose conditions of confidentiality for reasons other than the ability to market the proposed transaction to multiple clients, other commenters agreed that auditors should not become involved in transactions subject to tax-advisor imposed confidentiality restrictions. One accounting firm commenter also noted that, even if a transaction were not potentially abusive, the fact that there is a disclosure limitation is likely to create a negative impression concerning the objectivity of the auditor.

In addition, a few commenters suggested that the rule be limited to circumstances in which terms of confidentiality are imposed with respect to the U.S. tax treatment of a transaction. After carefully considering these comments, the Board has determined not to modify the scope of the rule. Tax-advisor imposed conditions of confidentiality facilitate aggressive selling of novel tax ideas that pose too great a risk of impairing the objectivity of auditors who market, plan, or

⁶⁴ 26 C.F.R. § 1.6011-4(b)(3) (2005). The proposed version of this rule incorporated the Treasury's definition of the term "confidential transaction" by reference. A number of commenters noted generally that incorporation of this Treasury regulation by reference could lead to unintended changes to the Board's rules if the Treasury amends those regulations (or the IRS amends its list of listed transactions). As discussed above, the Board intends for its prohibition on auditors' involvement as tax advisors in audit clients' execution of listed transactions to be kept current by changes to the IRS's list. Upon further consideration, unlike the Board's prohibition on listed transactions, the Board has determined that it may not be appropriate for any changes the Treasury may make to its definition of "confidential transaction" to automatically be reflected in the Board's prohibition on auditors' involvement in such a transaction. The definition of "confidential transaction" in Rule 3501(c)(i) is intended to be the same as the current Treasury regulation, except for the minimum fee requirement. The proposed version of the rule did not incorporate the Treasury's minimum fee exception to its regulation on confidential transactions. That is, Treasury Regulation 1.6011-4(b)(3)(i) provides that "a confidential transaction is a transaction that is offered to a taxpayer under conditions of confidentiality and for which the taxpayer has paid an advisor a minimum fee." 26 C.F.R. § 1.6011-4(b)(3) (2005). Under the regulation, the "minimum fee" is \$250,000 for corporate taxpayers (and partnerships and trusts in which all of the owners or beneficiaries are corporations) and \$50,000 for all other transactions. *Id.* 26 C.F.R. § 1.6011-4(b)(3)(iii). Although some commenters suggested that the Board should adopt the minimum fee exception, the Board understands the IRS disclosure rules to serve a different purpose than Rule 3522(a). Accordingly, the Board has not adopted a minimum fee exception in its final rule either.

opine in favor of them. Further, the rule continues to permit audit clients themselves to impose conditions of confidentiality in connection with transactions on which auditors may provide tax advice, and this fact appears to adequately serve audit clients' needs to maintain appropriate confidentiality. Finally, there does not appear to be a reasoned basis to limit the prohibition on confidential transactions to proposed tax treatments under U.S. tax laws.

4. Tax Services for Persons in Financial Reporting Oversight Roles

Rule 3523 provides that a registered public accounting firm is not independent of an audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any tax service to a member of management in a financial reporting oversight role at the audit client.⁶⁵ As discussed in the Board's proposing release, this rule addresses concerns that performing tax services for certain individuals involved in the financial reporting processes of an audit client creates an appearance of a mutual interest between the auditor and those individuals.

The Board received varied comments on Rule 3523. Some commenters, including groups representing investors and issuers, as well as several large accounting firms, supported the proposed rule on the ground that it is necessary to preserve the objectivity, and the appearance of objectivity, of auditors. Other commenters, however, including a number of smaller accounting firms, accounting associations, and a few issuers, claimed that the rule is not necessary, that these services have long been provided, and that auditors should be allowed to provide senior financial management of issuers with the same types of tax services the auditor may provide the issuer. After carefully considering these comments, the Board has determined to adopt the rule, with a few modifications. The Board continues to believe that the provision of tax services by the auditor to the senior management responsible for the audit client's financial reporting creates an unacceptable appearance of the auditor and such senior management having a mutual interest.

The Board also received a number of comments on specific aspects of the proposed rule. For example, some commenters expressed confusion as to whether Rule 3523 is intended to apply to directors, in part because the definition of "financial reporting oversight role" includes directors. In response to these comments, the Board has modified the rule to exclude directors more explicitly. Thus, the rule no longer uses the term "officer"—which is how the proposed rule narrowed the scope to exclude directors—and instead includes an explicit exception for any person who serves in a financial reporting oversight role "only because he or she serves as a member of the board of directors or similar management or governing body of the audit client."⁶⁶

The Board also included a second exception in Rule 3523(b) in response to comments regarding whether the rule should apply to persons who serve in a financial reporting oversight role at an affiliate of an issuer. After considering

⁶⁵ The rule's use of the term "financial reporting oversight role" is based on the Commission's definition of "financial reporting oversight role," which includes any person who has direct responsibility for oversight over those who prepare the issuer's financial statements and related information (for example, management's discussion and analysis) that are included in filings with the Commission. See *Strengthening the Commission's Requirements Regarding Auditor Independence*, *supra* note 2, at §II.A. The Commission uses the term "financial reporting oversight role" to describe those positions that are covered by the Act's "cooling off" period, during which a public company would not be independent from its audit firm if a member of the engagement team for the audit of that company assumed such a position. See Sarbanes-Oxley Act of 2002, §206, 17 C.F.R. §210.2-01(f)(3)(ii). The term "financial reporting oversight role" as defined in Rule 3501(f)(i) mirrors verbatim the SEC's definition of the same term in Rule 2-01 of Regulation S-X, 17 C.F.R. §210.2-01(f)(3)(ii).

⁶⁶ Rule 3523(a).

these comments, the Board has determined not to restrict auditors' provision of tax services to employees in a financial reporting oversight role at an affiliate of an audit client, so long as the financial statements of the affiliate are not material to the financial statements of the audit client or are audited by an auditor other than the firm or an associated person of the firm. This exception is intended to exclude executives of affiliates that do not contribute to the consolidated financial statements of the audit client. The Board does not believe that auditors' relationships with executives of immaterial affiliates, or affiliates whose financial statements are audited by an auditor other than the firm or an associated person of the firm, pose as great a risk to auditors' impartiality regarding an audit clients' consolidated financial statements as do auditors' provision of tax services to executives involved in the consolidated financial reporting of the client.

The first part of this exception, Rule 3523(b)(i), excludes persons in a financial reporting oversight role at immaterial affiliates of the entity being audited. This exception would encompass, among others, executives of most affiliates within the same investment company complex as the audited entity and executives of up-stream affiliates of the audited entity. The second part of this exception, Rule 3523(b)(ii), excludes executives in financial reporting oversight roles of a subsidiary of an audit client that is not audited by the firm or any firm that is an associated person of the firm, as defined by PCAOB Rule 1001. On the other hand, executives in financial reporting oversight roles at a material subsidiary whose financial statements are audited by a firm that is an associated person of the registered firm would be subject to Rule 3523. For purposes of Rule 3523(b)(ii), the term "audited" should be understood to include audit procedures that contribute to the firm's preparation or issuance of an audit report on an audit client's consolidated financial statements, whether or not such procedures result in an audit opinion on the affiliate's financial statements.

Some commenters also expressed concern that the rule could impose an undue hardship on persons who become subject to the rule because they are hired or promoted into a financial reporting oversight role at an audit client. To address that concern, the Board determined to create a time-limited exception to the rule to cover such situations. Specifically, the Board has determined to add a new exception to the rule that applies to a person who was not in a financial reporting oversight role at the audit client before a hiring, promotion, or other change in employment event, when the tax services are both: (1) provided pursuant to an engagement that was in process before the hiring, promotion, or other change in employment event; and (2) completed on or before 180 days after the hiring or promotion event.⁶⁷ The Board will treat engagements as "in process" if an engagement letter has been executed and substantive work on the engagement has commenced; the Board will not treat engagements as "in process" during negotiations on the scope and fee for a service.

Some commenters also suggested that, as proposed, Rule 3523 could invite persons subject to the rule to evade the rule by using the auditor's tax services through an immediate family member or through an entity controlled by the person. In response to this comment, the Board has added to the scope of the rule immediate family members of persons who are covered by the rule.⁶⁸

⁶⁷ Rule 3523(c).

⁶⁸ The Board also has added a definition of "immediate family member," adapted from the SEC's definition in its independence rules. Compare Rule 3501(i)(i) with 17 C.F.R. §210.2-01(f)(13). The Board has not included entities controlled by persons in financial reporting oversight roles, such as trusts and investment partnerships. The Board notes, however, that an auditor who provides services to an entity controlled by a person in a financial reporting oversight role of an audit client should consider whether, under ISB Standard No. 1, it is necessary to notify the client's audit committee of such services.

In addition, some commenters suggested that the rule be expanded to cover all non-audit services, such as services involving investment, personal financial planning, and executive compensation, on the ground that any such services provided to those in a financial reporting oversight role create a perception of a mutuality of interest between auditors and those members of management who receive such services.⁶⁹ Other commenters suggested that the rule be expanded to include persons who do not play a financial reporting oversight role but nevertheless play a key role in operations, such as vice presidents of sales.⁷⁰ Other commenters recommended the rule cover audit committee members. Still other commenters, however, disagreed with these commenters and noted that applying the rule to audit committee members might serve as a practical disincentive to audit committee service.

The Board has determined not to expand the final rule to include all non-audit services, directors or persons outside the definition of "financial reporting oversight role." To date, the concerns that have arisen in this area have related to auditors' provision of tax services to executives of public companies. Accordingly, the Board believes it is appropriate, at this time, to limit the rule to address this problem. The Board intends to monitor implementation of the rule, however. In addition, to the extent that issuers pay for non-audit services provided to any individuals, audit committees can and should be scrutinizing the potential effects on the auditor's independence due to such services. Further, as discussed in the proposing release, although accounting firms are not now required to seek pre-approval for executive tax services paid directly by the employee, auditors should consider under Independence Standards Board ("ISB") Standard No. 1 whether it is necessary to notify the audit committee of these services⁷¹ or whether it is otherwise advisable to inform audit committees of such services.⁷² In this regard, while the Board is reluctant to establish a *per se* prohibition on auditors' provision of tax services to directors of their audit clients, the Board notes that firms can – and some have – adopted procedures

⁶⁹ Some commenters asked for clarification of whether persons in a financial reporting oversight role could seek the assistance of the registered public accounting firm that prepared the original tax return to assist them in responding to an IRS or other governmental agency examination regarding that specific tax return after Rule 3523 becomes effective. If a registered firm prepared such a tax return before the rule's effective date, the rule does not operate to prohibit that person from answering questions and providing assistance when that tax return is under examination by a taxing authority after the rule's effective date. Such assistance, of course, must be otherwise consistent with Board and SEC auditor independence rules, including the requirement the auditor not become an advocate for its audit client.

⁷⁰ A few commenters suggested that the Board use the list of officers in section 16 of the Exchange Act, rather than relying on the defined term "financial reporting oversight role." The "financial reporting oversight role" term, however, includes those individuals at an audit client that, because of their oversight of the company's financial reporting process, raise special concerns when they have certain relationships with the auditor. For this reason, the Board continues to believe this is the appropriate group to include in this rule.

⁷¹ See ISB Standard No. 1; see also Memorandum from Scott A. Taub, Deputy Chief Accountant, Office of the Chief Accountant, U.S. Securities and Exchange Commission to William H. Donaldson, Chairman, Securities and Exchange Commission at 5 (June 24, 2003) (attached to letter from Chairman William H. Donaldson, U.S. Securities and Exchange Commission, to Five Consumer Groups) (July 11, 2003), available at <http://www.sec.gov/info/accountants/staffletters/taub071103.pdf> (hereinafter "Taub Memo").

⁷² For example, the SEC staff has recommended that audit committees scrutinize audit firms' provision of these services—

The provision of tax services to the executives of an audit client is not expressly addressed in the Act or in the Commission's rules. Nonetheless, an audit committee should review the provision of those services to assure that reasonable investors would conclude that the auditor, when providing such services, is capable of exercising objective and impartial judgment on all issues within the audit engagement.

Taub Memo, *supra* note 71, at 5.

to notify the audit committee of such services so it may evaluate the potential effect of such services on the auditor's independence.⁷³

C. The Auditor's Responsibilities in Connection With Audit Committee Preapproval of Tax Services

Under Section 10A(h) of the Exchange Act, as amended by Section 202 of the Sarbanes-Oxley Act, all non-audit services that the auditor proposes to perform for an issuer client "shall be pre-approved by the audit committee of the issuer." The SEC's 2003 independence rules implemented the Act's pre-approval requirement by adopting a provision on audit committee administration of the engagement.⁷⁴ Rule 3524 implements the Act's pre-approval requirement further by strengthening the auditor's responsibilities in seeking audit committee pre-approval of tax services. Specifically, Rule 3524 requires a registered public accounting firm that seeks pre-approval of an issuer audit client's audit committee⁷⁵ to perform tax services that are not otherwise prohibited by the Act or the rules of the SEC or the Board to—

- Describe, in writing, to the audit committee the nature and scope of the proposed tax service;
- Discuss with the audit committee the potential effects on the firm's independence that could be caused by the firm's performance of the proposed tax service; and
- Document the firm's discussion with the audit committee.

These requirements are intended to buttress the pre-approval processes established by the Act and the Commission's rules. Whether an audit committee preapproves a non-audit service on an *ad hoc* basis or on the basis of policies and procedures, the Commission staff has stated that "detailed backup documentation that spells out the terms of each non-audit service to be provided by the auditor" should be provided to the audit committee.⁷⁶ Indeed, the SEC staff has indicated "[s]uch documentation should be so detailed that there should never be any doubt as to whether any particular service was brought to the

⁷³ See, e.g., Remarks of Scott Bayless, Deloitte & Touche LLP, *Auditor Independence Roundtable on Tax Services* (July 14, 2004) at 152 (indicating that even when "the company does not pay for those services . . . there is a notification procedure to ensure that the audit committee has the ability to take control of that relationship if they so desire").

⁷⁴ See 17 C.F.R. §210.2-01(c)(7).

⁷⁵ Proposed Rule 3524 used the term "audit committee of the audit client," which some commenters interpreted to mean that the rule would require auditors to make the required communications in connection with proposed tax services for affiliates of an audit client that are not consolidated as subsidiaries with the audit client for financial statement purposes. One commenter noted that the Commission's Rule 2-01(c)(7) requires only that "[b]efore the accountant is engaged by the issuer or its subsidiaries, or the registered investment company or its subsidiaries, to render audit or non-audit services, the engagement [be] approved by the issuer's or registered investment company's audit committee." By using the phrase "in connection with seeking audit committee pre-approval," the Board intends Rule 3524 to apply only when the SEC's Rule 2-01(c)(7) requires such approval. Accordingly, the rule does not require registered firms to make the specified communications or to seek audit committee pre-approval in any situations in which audit committee pre-approval is not already required by the SEC's rules. Nor should the rule be understood to require preapproval by any committee other than the committee required to provide pre-approval by the SEC's rules. To clarify this issue, the Board has also modified Rule 3524 to more clearly track the language of section 10A(h) of the Exchange Act and the SEC's Rule 2-01(c)(7).

⁷⁶ Taub Memo, *supra* note 71, at 3; see also SEC Office of the Chief Accountant: Application of Commission's Rules on Auditor Independence Frequently Asked Questions, Audit Committee Pre-approval, Question 5, (issued August 13, 2003), available at <http://www.sec.gov/info/accountants/ocafaquaidind121304.htm> (hereinafter "FAQs").

audit committee's attention and was considered and pre-approved by that committee."⁷⁷

Rule 3524 implements the Act's pre-approval requirement further by requiring that registered firms provide the audit committee of an issuer audit client a description of proposed tax services engagements that includes descriptions of the scope of any tax service under review and the fee structure for the engagement.⁷⁸ Some commenters suggested significant changes to the scope of the proposed rule. One group of commenters recommended that the rule be broadened to apply to all non-audit services, rather than only tax services. Other commenters expressed concern that the rule appeared to impose restrictions on audit committee pre-approval in excess of the SEC's requirements and, for that reason, recommended that the Board narrow or eliminate the rule. The Board has determined not to change the scope of the rule in response to these comments. While auditors and audit committees may find the procedures in Rule 3524 to be useful for purposes of considering non-audit services generally, the Board adopts these rules only after having engaged in a substantial effort to obtain facts and views of interested persons on appropriate procedures for considering proposed tax services. Before considering broadening the rule, the Board would seek additional information, based, among other things, on experience with this rule, inspections of registered firms, and additional public input. On the other hand, notwithstanding the concerns of some commenters that Rule 3524 requires more than the parallel SEC rule, the Board has determined not to narrow or eliminate the rule. The Board continues to believe that the rule is an appropriate complement to the SEC's preapproval rule. Rule 3524 supports the procedure under the SEC rule, by requiring the auditor—who is in the best position to describe a proposed engagement—to gather the information required to be presented to the audit committee by the SEC rule. Indeed, it is the SEC rule and staff interpretations of what information audit committees need that have informed the Board's development of the rule.

The Board has made certain modifications to the proposed rule, however. As proposed, the rule would have required auditors to provide audit committees copies of all engagement letters for proposed tax services. While some commenters supported this proposal as a way to ensure that audit committees received adequate information on which to base their judgments, other commenters expressed concern that the rule could result in audit committees being provided voluminous stacks of engagement letters—some in foreign languages—that would obscure rather than elucidate the nature of the tax services proposed. On the basis of this information, and because the underlying purpose of the proposed requirement was to establish a manageable collection of information on which audit committees could make their determinations to pre-approve tax services, the Board has determined to eliminate the proposed rule's requirement to supply the audit committee a copy of each tax service engagement letter. Instead, the rule requires auditors to describe for audit committees, in writing, the scope of the proposed service, the proposed fee structure

⁷⁷ Taub Memo, *supra* note 71, at 3; *see also* FAQs, *supra* note 76, Audit Committee Pre-approval, Question 5 (issued August 13, 2003). The SEC staff FAQ answer states that "[p]re-approval policies must be designed to ensure that the audit committee knows precisely what services it is being asked to pre-approve so that it can make a well-reasoned assessment of the impact of the service on the auditor's independence. For example, if the audit committee is presented with a schedule or cover sheet describing services to be pre-approved, that schedule or cover sheet must be accompanied by detailed back-up documentation regarding the specific services to be provided".

⁷⁸ *See* Rule 3524(a)(1). Audit committees may ask auditors for other materials not identified in the rule, to assist them in their determinations whether to preapprove proposed tax services. Rule 3524 should not be understood to limit the information or materials that an audit committee may request, or that a registered firm may decide to provide, in connection with the pre-approval of tax services.

for the service, and the potential effect of the service on the auditor's independence. The Board believes requiring such a description of a proposed service better meets the Board's goal to improve the quality of information auditors provide audit committees about proposed tax services.

The rule also requires the auditor to describe for the audit committee any amendment to the engagement letter or any other agreement relating to the service (whether oral, written, or otherwise) between the firm and the audit client.⁷⁹ While the Board does not expect or encourage auditors to enter into side agreements relating to tax services, the Board understands that, in the past, some accounting firms have entered into such agreements.⁸⁰ To the extent firms do so, they must disclose those agreements to the audit committee.

In addition, to the extent that a firm receives fees or other consideration from a third party in connection with promoting, marketing, or recommending a tax transaction, Rule 3524 requires the firm to disclose those fees or other consideration to the audit committee. Specifically, Rule 3524(a)(2) requires that the firm disclose to the audit committee "any compensation arrangement or other agreement, such as a referral agreement, a referral fee or fee-sharing arrangement, between the registered public accounting firm (or an affiliate of the firm) and any person (other than the audit client) with respect to the promoting, marketing or recommending of a transaction covered by the service." This provision is adapted from the IRS's rules of practice, which require tax advisors to disclose such arrangements to taxpayer clients.⁸¹

Rule 3524(b) also requires registered public accounting firms to discuss with audit committees of their issuer audit clients the potential effects of any proposed tax services on the firm's independence. Even if a non-audit service does not per se impair an auditor's independence, the Commission's independence rules nevertheless deem an auditor not to be independent if—

the accountant is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the accountant is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement.⁸²

Rule 3524(b) is intended to provide audit committees a robust foundation of information upon which to determine whether to pre-approve proposed tax services. Some commenters have asked for guidance as to the scope of the discussions intended by the rule. The Board intends that the scope of such discussions remain flexible, to address the matters that are pertinent in the judgment of the audit committee, as informed by Commission requirements. While the Act's legislative history makes clear that the Act "does not require the audit

⁷⁹ *Id.* One commenter expressed concern that Rule 3524(a)'s requirement to describe an "other agreement" could be understood to require the auditor to submit to the audit committee documentation concerning "essentially every communication with the audit client." The Board believes this comment is misplaced. Rule 3524 does not require that the auditor describe all communications with the audit client, but rather all agreements with the audit client that relate to the proposed service.

⁸⁰ *See, e.g., In re PricewaterhouseCoopers LLP, & PricewaterhouseCoopers Securities LLC, supra note 43* ("through side letters or oral understandings, the parties created contingent fee arrangements"). In addition, some commenters have expressed concern that Rule 3524 requires disclosure to the audit committee of fee arrangements that are prohibited by Rule 3521 (or by professional association membership requirements, such as certain referral agreements and fees). Those commenters have asked the Board to clarify that Rule 3524 does not operate to permit such fee structures that are otherwise prohibited by the Board's rules or to endorse fee structures that are prohibited or discouraged by professional ethics rules. It is the case that Rule 3524 does not permit or otherwise endorse such fees.

⁸¹ *See* 31 C.F.R. §10.35(e)(1) (2005), available at <http://www.irs.gov/pub/irspdf/pcir230.pdf>.

⁸² 17 C.F.R. § 210.2-01(b).

committee to make a particular finding in order to pre-approve an activity,"⁸³ the Commission's staff expects a robust review of proposed non-audit services—

The audit committee must take its role seriously and perform diligent analyses and reviews that allow the committee to conclude that reasonable investors would view the auditor as capable of exercising objective and impartial judgment on all matters brought to the auditor's attention.⁸⁴

To be clear, the rule does not prescribe any test for audit committees or require audit committees to make legal assessments as to whether proposed services are prohibited or permissible. Nor is the rule intended to limit an audit committee's discretion to establish its own more stringent pre-approval procedures. Rather, the rule directs registered firms to present detailed information and analysis to audit committees for audit committees' consideration, in their own judgment, of the best interests of the issuer and its shareholders.

In addition, through the discussion required by Rule 3524(b), the Board expects registered firms to convey to the audit committee information sufficient to distinguish between tax services that could have a detrimental effect on the firm's independence and those that would be unlikely to have a detrimental effect. Some commenters expressed concern that an example of such a distinction that the Board provided in the proposing release could be understood to suggest that audit committees should not permit an auditor to provide any tax services unless the company had an internal tax department and/or a tax director who could make sound management decision in the best interest of the company. The Board did not intend to suggest that particular functional departments or managers must exist at a company before its auditor may provide it tax services. Rather, the inquiry the auditor should engage in when proposing to provide tax services to an audit client is whether, in the particular case, the company has the capacity to make its own decisions regarding the proposed tax matter, such that the auditor would not be in the position of performing management functions or making management decisions for the company.⁸⁵ The resolution of this inquiry will vary depending on the nature of the tax matter at issue and the sophistication of the company, among other things.

Rule 3524, both as proposed and as adopted, is intentionally silent as to when a registered public accounting firm should provide the required information about a proposed tax service to an audit committee. This is because, under the SEC's 2003 independence rules, audit committees themselves may have policies that establish a procedure and schedule for audit committee review of non-audit services, including tax services.⁸⁶ Some commenters expressed concern that the rule might favor one approval method (*ad hoc*) over another (approval pursuant to policies and procedures). This is not the case. Similar to the SEC's 2003 independence rules, Rule 3524 does not dictate, or even express a preference as to, whether the documentation and discussions required under Rule 3524 should take place pursuant to an audit committee's policies and procedures on pre-approval or on an *ad hoc* basis. Many issuers have adopted policies that provide for pre-approval in annual audit committee meetings. The

⁸⁴ Taub Memo, *supra* note 71, at 7-8; *see also* FAQs, *supra* note 76, Audit Committee Pre-approval, Question 5 (issued August 13, 2003).

⁸⁵ *See* PCAOB Rule 3600T (adopting AICPA Code of Professional Conduct, paragraph .05 of ET sec. 101, "Independence", Interpretation No. 101-3, "Performance of Other Services," as of April 16, 2003) ("care should be taken not to perform management functions or make management decisions for attest clients the responsibility for which remains with the client's board of directors and management.") (Interpretation No. 101-3 was later amended by the AICPA in December 2003).

⁸⁶ 17 C.F.R. § 210.2-01(c)(7)(i)(B).

Board understands that such an annual planning process can include as robust a presentation to the audit committee as a case-by-case pre-approval process, and Rule 3524 is designed to be flexible enough to accommodate either system and to encourage auditors and audit committees to develop systems tailored to the needs and attributes of the issuer.

The timing and method by which auditors describe for, and discuss with, audit committees proposed tax services will necessarily vary depending on different audit committees procedures. For those audit committees that hold an annual meeting to consider proposed non-audit services for the upcoming year, often by reviewing a proposed annual budget for non-audit services, it would be appropriate for auditors to provide their disclosures pursuant to Rule 3524(a), and hold their discussions pursuant to Rule 3524(b), about proposed tax services that are known at the time of the meeting in connection with or at that meeting. In addition, some audit committees' policies delegate authority to pre-approve non-audit services to one committee member and require reporting of any services approved by delegated authority at the next scheduled audit committee meeting, on a quarterly basis, or otherwise, in order for the audit committee to review an updated forecast or other summary of non-audit services. In such cases, it would be appropriate for auditors to provide the member holding delegated authority to approve a tax service a description of the service that complies with Rule 3524(a). Also, although the auditor may discuss the service with the member holding delegated authority when the member is considering the service, in order to comply with Rule 3524(b), the auditor ought to discuss the service with the audit committee as a whole when the audit committee considers the updated forecast or other summary.

Finally, Rule 3524(c) requires a registered public accounting firm to document the substance of its discussion with the audit committee under subparagraph (b). The few commenters who addressed this provision supported it.⁸⁷

III. Effective and Transition Dates

The Board intends that the rules become effective at varying times.

In light of pre-existing legal and regulatory requirements, Rules 3502 and 3520 do not, in any practical sense, create new criteria for appropriate conduct. Accordingly, no transition period is called for, and therefore the Board intends that Rules 3502 and 3520, as well as the definitions in Rule 3501, become effective 10 days after the date that the SEC approves the rules.

Rule 3521 is based on the SEC's existing contingent fee rule, although it differs from that rule in certain respects. Accordingly, the Board will not apply Rule 3521 to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before the later of December 31, 2005, or 10 days after the date that the SEC approves the rules. Of course, as noted above, the Commission's Rule 2-01 on auditor independence treats an auditor as not independent if it enters into a contingent fee arrangement with an audit client today.⁸⁸

Rules 3522, 3523, and 3524 establish new criteria for appropriate conduct by registered public accounting firms and their associated persons. The Board believes it is appropriate to allow a reasonable period of time for such firms to

⁸⁷ One commenting auditor suggested that the Board consider requiring specific forms or occasions for auditor documentation of audit committee discussion. After considering this suggestion, the Board has determined that such forms or required timing of discussions could unnecessarily limit the scope of the discussions that, in the judgment of the auditor and audit committee, are appropriate.

⁸⁸ 17 C.F.R. § 210.2-01(c)(5).

prepare internal policies and procedures, and train their employees to ensure compliance with these new requirements. In addition, the Board understands that engagements covered by these rules may be in progress and that firms will need to terminate or complete these engagements in a professional manner. Accordingly, the Board believes it is appropriate to allow transition periods for these rules.

The Board understands that Rule 3523 will, in practical effect, lead to some registered firms terminating recurring engagements to provide tax services and may require certain members of public companies' senior management to find other tax preparers. Accordingly, the Board has determined that it will not apply Rule 3523 to tax services being provided pursuant to an engagement in process at the time the SEC approves the rules, provided that such services are completed on or before the later of June 30, 2006 or 10 days after the date that the SEC approves the rules. As discussed above, the Board will treat engagements as "in process" if an engagement letter has been executed and work of substance has commenced; the Board will not treat engagements as "in process" during negotiations on the scope and fee for a service.

Although the Board does not expect them to require the same transition as Rule 3523, Rules 3522 and 3524 also impose new legal requirements. Accordingly, the Board has determined that it will not apply Rule 3522 to tax services that were completed by a registered public accounting firm no later than the later of December 31, 2005, or 10 days after the date that the SEC approves the rules. Rule 3524 will not apply to any tax service pre-approved before the later of December 31, 2005, or 10 days after the date that the SEC approves the rules, or, in the case of an issuer that pre-approves non-audit services by policies and procedures, the rule will not apply to any tax service provided by March 31, 2006.

On the 26th day of July, in the year 2005, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

/s/

J. Gordon Seymour
Acting Secretary

Appendix

Rules

SECTION 3: PROFESSIONAL STANDARDS

Part 5—Ethics

Rule 3501. Definitions of Terms Employed in Section 3, Part 5 of the Rules.

When used in Section 3, Part 5 of the Rules, unless the context otherwise requires:

(a)(i) Affiliate of the Accounting Firm

The term "affiliate of the accounting firm" (or "affiliate of the registered public accounting firm" or "affiliate of the firm") includes the accounting firm's parents; subsidiaries; pension, retirement, investment or similar plans; and any associated entities of the firm, as that term is used in Rule 2-01 of the Commission's Regulation SX, 17 C.F.R. § 210.2-01(f)(2).

(a)(ii) Affiliate of the Audit Client

The term "affiliate of the audit client" means—

- (1) An entity that has control over the audit client, or over which the audit client has control, or which is under common control with the audit client, including the audit client's parents and subsidiaries;
- (2) An entity over which the audit client has significant influence, unless the entity is not material to the audit client;
- (3) An entity that has significant influence over the audit client, unless the audit client is not material to the entity; and
- (4) Each entity in the investment company complex when the audit client is an entity that is part of an investment company complex.

(a)(iii) Audit and Professional Engagement Period

The term "audit and professional engagement period" includes both—

- (1) The period covered by any financial statements being audited or reviewed (the "audit period"); and
- (2) The period of the engagement to audit or review the audit client's financial statements or to prepare a report filed with the Commission (the "professional engagement period")—
 - (A) The professional engagement period begins when the registered public accounting firm either signs an initial engagement letter (or other agreement to review or audit a client's financial statements) or begins audit, review, or attest procedures, whichever is earlier; and
 - (B) The professional engagement period ends when the audit client or the registered public accounting firm notifies the Commission that the client is no longer that firm's audit client.
- (3) For audits of the financial statements of foreign private issuers, the "audit and professional engagement period" does not include

periods ended prior to the first day of the last fiscal year before the foreign private issuer first filed, or was required to file, a registration statement or report with the Commission, provided there has been full compliance with home country independence standards in all prior periods covered by any registration statement or report filed with the Commission.

(a)(iv) Audit Client

The term "audit client" means the entity whose financial statements or other information is being audited, reviewed, or attested and any affiliates of the audit client.

(c)(i) Contingent Fee

The term "contingent fee" means—

- (1) Except as stated in paragraph (2) below, any fee established for the sale of a product or the performance of any service pursuant to an arrangement in which no fee will be charged unless a specified finding or result is attained, or in which the amount of the fee is otherwise dependent upon the finding or result of such product or service.
- (2) Solely for the purposes of this definition, a fee is not a "contingent fee" if the amount is fixed by courts or other public authorities and not dependent on a finding or result.

(f)(i) Financial Reporting Oversight Role

The term "financial reporting oversight role" means a role in which a person is in a position to or does exercise influence over the contents of the financial statements or anyone who prepares them, such as when the person is a member of the board of directors or similar management or governing body, chief executive officer, president, chief financial officer, chief operating officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, or any equivalent position.

(i)(i) Investment Company Complex

- (1) The term "investment company complex" includes—
 - (i) An investment company and its investment adviser or sponsor;
 - (ii) Any entity controlled by or controlling an investment adviser or sponsor in paragraph (i) of this definition, or any entity under common control with an investment adviser or sponsor in paragraph (i) of this definition if the entity—
 - (A) Is an investment adviser or sponsor; or
 - (B) Is engaged in the business of providing administrative, custodian, underwriting, or transfer agent services to any investment company, investment adviser, or sponsor; and
 - (iii) Any investment company or entity that would be an investment company but for the exclusions provided by section 3(c) of the Investment Company Act of 1940 (15 U.S.C. § 80a-3(c)) that has an investment adviser or sponsor included in this definition by either paragraph (i) or (ii) of this definition.

- (2) An investment adviser, for purposes of this definition, does not include a sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser.
- (3) A sponsor, for purposes of this definition, is an entity that establishes a unit investment trust.

Rule 3502. Responsibility Not to Cause Violations.

A person associated with a registered public accounting firm shall not cause that registered public accounting firm to violate the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards, due to an act or omission the person knew or should have known would contribute to such violation.

Subpart 1 – Independence

Rule 3520. Auditor Independence.

A registered public accounting firm must be independent of its audit client throughout the audit and professional engagement period.

Note: Under Rule 3520, a registered public accounting firm's independence obligation with respect to an audit client that is an issuer encompasses not only an obligation to satisfy the independence criteria set out in the rules and standards of the PCAOB, but also an obligation to satisfy all other independence criteria applicable to the engagement, including the independence criteria set out in the rules and regulations of the Commission under the federal securities laws.

Rule 3521. Contingent Fees.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any service or product to the audit client for a contingent fee or a commission, or receives from the audit client, directly or indirectly, a contingent fee or commission.

Rule 3522. Tax Transactions.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any non-audit service to the audit client related to planning, or opining on the tax treatment of, a transaction—

- (a) **Listed Transactions**—that is a listed transaction within the meaning of 26 C.F.R. §6011.1-4(b)(2);
- (b) **Confidential Transactions**—that is a confidential transaction within the meaning of 26 C.F.R. §6011.1-4(b)(3), or that would be a confidential transaction within the meaning of 26 C.F.R. §6011.1-4(b)(3) if the fee for the transaction were equal to or more than the minimum fee described in 26 C.F.R. §6011.1-4(b)(3); or

- (c) **Aggressive Tax Positions**—that was initially recommended by the registered public accounting firm or another tax advisor and a significant purpose of which is tax avoidance, unless the proposed tax treatment is at least more likely than not to be allowable under applicable tax laws.

Rule 3523. Tax Services for Senior Officers of Audit Client.

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the audit and professional engagement period, provides any tax service to an officer in a financial reporting oversight role at the audit client.

Rule 3524. Audit Committee Pre-approval of Certain Tax Services.

In connection with seeking audit committee pre-approval to perform for an audit client any permissible tax service, a registered public accounting firm shall—

- (a) provide to the audit committee of the audit client—
 - (i) the engagement letter relating to the service, which shall include descriptions of the scope of the service and the fee structure, any amendment to the engagement letter, or any other agreement (whether oral, written, or otherwise) between the firm and the audit client, relating to the service; and
 - (ii) any compensation arrangement or other agreement, such as a referral agreement, a referral fee or fee-sharing arrangement, between the registered public accounting firm (or an affiliate of the firm) and any person (other than the audit client) with respect to the promoting, marketing, or recommending of a transaction covered by the service;
 - (b) discuss with the audit committee the potential effects of the services on the independence of the firm; and
 - (c) document the substance of its discussion with the audit committee.
-

PCAOB Release No. 2005-015

Auditing Standard No. 4, Reporting on Whether a Previously Reported Material Weakness Continues to Exist

PCAOB Release No. 2005-015
July 26, 2005

PCAOB Rulemaking
Docket Matter No. 018

Approved by the Securities and Exchange Commission on February 6, 2006, and is effective as of February 6, 2006.

Summary:

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") has adopted Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*. The Board will submit this standard to the Securities and Exchange Commission ("Commission" or "SEC") for approval pursuant to Section 107 of the Sarbanes-Oxley Act of 2002 (the "Act"). This standard will not take effect unless approved by the Commission.

Board Contacts:

Laura Phillips, Associate Chief Auditor (202/207-9111; phillipsl@pcaobus.org),
Sharon Virag, Assistant Chief Auditor (202/207-9164; virags@pcaobus.org)

* * *

I. Background

Congress enacted Section 404 of the Sarbanes-Oxley Act of 2002 (the "Act") to provide investors with increased transparency about public companies' internal control over financial reporting. Since then, approximately 12.7 percent of public companies that are accelerated filers¹ have reported that their internal control over financial reporting is not effective because one or more material weaknesses in internal control over financial reporting existed as of the company's fiscal year-end². When a company reports a material weakness, investors may be left uncertain about the reliability of the company's financial reporting. They may also want information about the company's plans for remediating the material weakness and its timeframe for doing so, and to be notified when the material weakness has been eliminated. Thus, a disclosure that internal

¹ An "accelerated filer," as defined in Rule 12b-2 under the Securities Exchange Act of 1934, 17 C.F.R. § 240.12b-2, is generally a U.S. company that, among other things, has equity market capitalization over \$75 million and has filed at least one annual report with the Commission.

² See Paul J. Martinek, *Adjustments, Restatements Are Predictors Of Weaknesses*, Compliance Week (June 14, 2005).

control over financial reporting is not effective is often only the beginning of a company's communications with investors concerning the material weakness (or weaknesses) that caused the problem.³

Both companies and report users have recognized the importance of a mechanism for companies to effectively communicate with the markets when a previously reported material weakness in internal control over financial reporting no longer exists.⁴ In many cases, companies will find the mechanisms for company disclosures already provided by the federal securities laws sufficient. For example, a public company is required to disclose quarterly any changes in internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.⁵ Investors will, therefore, learn of material improvements, such as the correction of a material weakness, on at least a quarterly basis through these required disclosures.⁶ Under the Board's Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Connection with an Audit of Financial Statements*, the company's auditor is responsible for evaluating these quarterly disclosures.⁷ Finally, investors will also learn about the status of previously reported material weaknesses (as well as internal control over financial reporting overall), accompanied by auditor assurance, when the company files its next annual report. Investors and issuers, however, have called for the ability to obtain auditor assurance as of an interim date that a previously reported material weakness no longer exists. At the November 18, 2004, SAG Meeting, several members of the group with experience as investors and issuers encouraged the Board to develop a standard that would describe this type of engagement for the auditor. In particular, several issuer members of the SAG emphasized that companies that have reported a material weakness will want to have options available to assure the markets that the material weakness has been remediated.⁸

II. Public Comment on the Board's Proposal

On March 31, 2005, the Board issued for public comment a proposed auditing standard titled "Reporting on the Elimination of a Material Weakness." In response, the Board received 30 comment letters from a variety of interested parties, including auditors, investors, issuers, and others. The comment

³ Some companies with material weaknesses have already begun this process by including detailed descriptions of their remediation plans in their annual filings or by providing additional disclosures in subsequent filings on the steps they are continuing to take to remediate the weaknesses. See June 2005 Internal Control Report: All About Remediation, Compliance Week (July 6, 2005).

⁴ The Board's Standing Advisory Group ("SAG") discussed possible auditor involvement with the elimination of a material weakness at its November 18, 2004 public meeting ("SAG Meeting"). An archived webcast of the SAG Meeting and a related briefing paper on this topic, "Reporting on the Correction of a Material Weakness," are available on the PCAOB's Web site at www.pcaobus.org.

⁵ See Item 308(c) of Regulation S-K, 17 C.F.R. §229.308(c).

⁶ Of course, through this same mechanism, investors also could learn if internal control over financial reporting deteriorates materially during the year.

⁷ See Paragraphs 202–206 of Auditing Standard No. 2, as well as PCAOB Staff Question and Answer No. 55 regarding the extent of these responsibilities. The Staff Questions and Answers are available on the Board's Web site under Standards at www.pcaobus.org.

⁸ See Nick S. Cyprus, Vice President, Controller and Chief Accounting Officer, The Interpublic Group of Companies, Remarks at SAG Meeting (Nov. 18, 2004) ("I guarantee there will be demand [for such a standard]"); Sam Cotterell, Vice President and Controller, Boise Cascade LLC, Remarks at SAG Meeting (Nov. 18, 2004) ("if I have a material weakness disclosed, I want a mechanism to let the market know that that has been fixed. I want to do that as quickly as possible.").

letters included detailed discussion of a wide range of topics. Many commenters expressed strong support for the standard.⁹

Other comments included:

- suggestions regarding the wording of the auditor's opinion and the title of the proposed standard;
- discussion of several technical issues, such as the standard's focus on control objectives, consideration of materiality, and the potential need for the auditor to perform substantive procedures;
- suggestions regarding the auditor's responsibility when new material weaknesses are identified during this engagement, and when all previously reported material weaknesses are not being reported upon by the auditor;
- concerns that, although an engagement under the standard would be completely voluntary, it could become compulsory, as a practical matter, if investors begin to insist on auditor attestation in all cases in which a material weakness is identified;
- a suggestion that the conforming amendment be modified to allow auditors to use AT 101 strictly for a company's internal use.

The Board carefully considered all of the comment letters that it received. A detailed analysis of comments and the Board's responses are contained in the Background and Basis for Conclusions, in Appendix B of the standard.

III. Summary of Changes to the Proposed Standard

The Board adopted Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*, after making several changes to the proposed standard in response to comments. The more significant changes include—

- revising the form of the auditor's opinion to clarify that the purpose of the engagement is to determine whether the material weakness "exists" or "no longer exists" and making related changes to the title of the standard;
- conforming text in the conditions for engagement performance to the text of a parallel provision in PCAOB Auditing Standard No. 2, due to the close relationship between the two standards. Specifically, the Board clarified that under Auditing Standard No. 4, management's evidence includes documentation;
- adding guidance on the subjects of materiality, control objectives and substantive procedures;
- adding a responsibility for the auditor to inform the audit committee if the auditor identifies a new material weakness during an engagement performed under this standard;

⁹ See Letter from Laurie Fiori Hacking, Executive Director, Ohio Public Employees Retirement System, to J. Gordon Seymour, Acting Secretary, PCAOB (Apr. 15, 2005) ("The elimination of a material weakness, accompanied by an independent auditor's interim report attesting to management's assessment of its internal controls, will increase investor confidence in the reliability of a company's financial statements."); Letter from Gregory J. Jonas, Managing Director, Moody's Investors Service, to Office of the Secretary, PCAOB (May 5, 2005) ("the proposed standard strikes a useful balance by giving companies the option to provide users with information they value and with the assurance they find useful while not requiring a complete re-assessment").

- modifying the required elements of the auditor's report to clarify that a continuing auditor previously obtained an understanding of internal control over financial reporting and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the specified material weakness;
- including additional illustrative auditor's reports; and
- modifying the conforming amendment to the Board's interim attestation standards to allow auditors to continue to use AT 101 for engagements to report on whether a material weakness continues to exist if such a report is intended strictly for a company's internal use.

These changes have been reflected in the adopted standard, and are discussed further in the Background and Basis for Conclusions, included in Appendix B of the standard.

IV. Overview of the Engagement

This standard establishes a stand-alone engagement that is entirely voluntary, performed only at the company's request. This type of reporting is not required by the Act or the standards or rules of the PCAOB, and should not be viewed as compulsory. The Board anticipates that in deciding whether to engage their auditors to report on whether a particular material weakness continues to exist, companies will weigh the costs and benefits and do so only when it is cost-effective. Based on the investor and issuer comments at the SAG Meeting, the Board believes that, in some situations, companies will find that auditor assurance that a material weakness no longer exists leads to a higher level of investor confidence in a company's financial reporting, and that the costs of the engagement are therefore worth incurring. If a company believes, however, that these benefits would be outweighed in a particular case by the costs of obtaining them, the company may (and presumably would) determine not to engage its auditor to perform this work.

Although the Board designed this standard to be a cost-effective means of providing investors assurance that a material weakness no longer exists, the Board expects that this engagement will be best suited and most cost-effective for reporting on material weaknesses that are discrete problems with a limited effect on the company's internal control over financial reporting. Reporting on material weaknesses that have a pervasive effect on the company's internal control over financial reporting could require such a broad and extensive base of work that the Board anticipates that a company in this situation would choose to wait for the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 2 to obtain auditor assurance that a pervasive material weakness no longer exists.

The objective of an auditor's engagement under this standard is to express an opinion on whether a previously reported material weakness continues to exist. The standard, therefore, draws from many concepts applicable to the auditor's report on the effectiveness of internal control over financial reporting, as described in Auditing Standard No. 2, although in a more narrowly focused and limited manner. For this reason, most of the requirements in the standard will be familiar to auditors. In designing this standard, the Board provided flexibility wherever possible, to allow auditors to conduct the engagement in a manner suited to the material weakness in internal control over financial reporting at issue.

Similar to any other attestation service, an auditor's report under this standard is based on an evaluation of management's assertion that the material weakness no longer exists. This standard establishes several conditions that must be met for the auditor to perform this engagement. These conditions were patterned after management's responsibilities under the SEC's rules implementing Section 404 of the Act¹⁰ and the corresponding conditions in Auditing Standard No. 2.¹¹ These conditions include management accepting responsibility for internal control over financial reporting, evaluating the effectiveness of the specified controls that address the material weakness, asserting that the specified controls are effective in addressing the material weakness, and supporting its assertion with sufficient evidence, including documentation.

The auditor's assurance resulting from this engagement is that the previously reported material weakness, in the auditor's opinion, no longer exists as of a specified date. Although the auditor's evaluation of the design and operating effectiveness of the identified controls generally follows the requirements of PCAOB Auditing Standard No. 2, this engagement is designed to be significantly narrower in scope because the auditor's testing is limited to the controls specifically identified by management as addressing the material weakness. Both management and the auditor use the company's stated control objective as the target for determining whether the specified controls sufficiently address the material weakness. (See Section VI for further discussion of the determination that a material weakness no longer exists.)

V. Auditor's Report

To communicate clearly the narrow focus of this engagement, the standard requires the auditor's report to describe the material weakness, identify all of the specified controls that management asserts address the material weakness, and identify the stated control objective achieved by these controls. The report also is required to include language to emphasize to readers that the auditor has not performed procedures sufficient to reach conclusions about the effectiveness of any other controls or provided an opinion regarding the effectiveness of internal control over financial reporting overall.¹² Report users should thus understand the limited scope of the auditor's opinion.

To render an opinion that a material weakness no longer exists, the auditor must have obtained evidence about the design and operation of the relevant controls, determined that the material weakness no longer exists, and determined that no scope limitations were placed on the auditor's work. Because of the narrow focus of this engagement, qualified opinions are not permitted. Limitations on the scope of the auditor's work preclude the auditor from rendering an opinion. The auditor's opinion as to whether a previously reported material weakness continues to exist may be expressed as "the material weakness exists" or "the material weakness no longer exists." Accordingly, the standard does not distinguish between an unqualified opinion and an adverse opinion but simply refers to the auditor's opinion.

¹⁰ See Item 308(a) of Regulation S-K, 17 C.F.R. §229.308(a).

¹¹ See Paragraph 20 of Auditing Standard No. 2.

¹² The SAG Meeting included a discussion about the importance of such a report clearly communicating to report users the scope of the engagement. Several SAG members emphasized the potential for report users to believe, mistakenly, that the auditor, as a result of this limited engagement, had rendered a current opinion regarding the effectiveness of internal control over financial reporting overall. Comments received on the proposed standard generally expressed overall support for the clarity of the proposed auditor's report in this regard.

Unlike an auditor's report on internal control over financial reporting, in which the assessment is required to be as of the date of the annual financial statements, an auditor's report on whether a material weakness continues to exist may be as of any date set by management. The "as of" date of management's assertion represents the day the company believes the material weakness no longer exists and that the company has adequately assessed the effectiveness of the specified controls that address the material weakness. In the event that the auditor begins testing and concludes that additional remediation is required to address the material weakness, the company has the opportunity to re-address its remediation efforts, reset the assertion date, and ask the auditor again to opine on whether the material weakness continues to exist.

If the auditor determines that a material weakness continues to exist and does not issue a report, the standard requires the auditor to communicate to the company's audit committee, in writing, his or her conclusion that the material weakness continues to exist. Similarly, the auditor also has a responsibility to communicate to the audit committee, in writing, any new material weaknesses that the auditor identifies during this engagement that the auditor has not already communicated in writing to the audit committee. The standard also addresses the circumstance in which the auditor reports on fewer than all of the previously reported material weaknesses. In this circumstance, the standard requires the auditor to include language in his or her report stating that his or her previously issued report on management's annual assessment of the company's internal control over financial reporting identified additional material weaknesses, that the auditor is not reporting on those other material weaknesses, and that the auditor, accordingly, is expressing no opinion on whether those material weaknesses exist after the company's year-end.¹³

VI. Determining That a Material Weakness No Longer Exists

The standard requires the auditor to obtain evidence sufficient to determine whether the design and operation of the controls identified by management achieve the *stated control objectives* and that the material weakness no longer exists. A control objective for internal control over financial reporting generally relates to a relevant financial statement assertion, such as whether certain recorded transactions are genuine, and provides a basis for evaluating the effect of a company's controls on that assertion.¹⁴ A stated control objective in the context of this engagement is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing. For this reason, management and the auditor must be satisfied that, if the stated control objective were achieved, the material weakness would no longer exist.

¹³ Several investors, among others, suggested that, in the circumstance in which additional material weaknesses were previously reported but are not the subject of the auditor's report on whether a material weakness continues to exist, the auditor's report should draw attention to these other material weaknesses. In response to these comments, the standard states that when referring to his or her previously issued report, the auditor is required either to attach that report to his or her report on whether the material weakness continues to exist or to include information about where the previously issued report can be publicly obtained.

¹⁴ See Paragraphs 68 through 70 of Auditing Standard No. 2 for additional information on relevant assertions.

When a material weakness has a pervasive effect on the company's internal control over financial reporting, identifying the control objectives that are not being met may be difficult because of the large number of control objectives affected. A material weakness related to an ineffective control environment is an example of this situation. If management and the auditor have difficulty in identifying *all* of the stated control objectives affected by a material weakness, the material weakness is probably not suitable for this type of narrow, interim reporting and should be tested, instead, during the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 2.

VII. Using the Work of Others

Auditing Standard No. 4 applies the same framework for using the work of others as the one described in Auditing Standard No. 2. Similar to Auditing Standard No. 2, the standard permits the auditor to use the work of others to alter the nature, timing, and extent of the auditor's performance of work related to this engagement. This framework requires the auditor to obtain the principal evidence supporting his or her opinion and to evaluate the nature of the controls being tested, together with the competence and objectivity of the persons performing the work.

Under both Auditing Standard No. 2 and this standard, the framework measures principal evidence in relation to the overall assurance provided by the auditor. Under Auditing Standard No. 2, the principal evidence supporting the auditor's opinion should be evaluated in relation to the auditor's opinion on internal control over financial reporting overall. Under this standard, the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion needs to be applied at the control objective level. It should be noted, however, that this does not require the auditor to obtain the principal evidence that each control specifically identified in management's assertion as related to the identified control objectives is effective.

There may be some circumstances in which the scope of the audit procedures to be performed in this type of engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. The flexibility that the framework otherwise provides, however, is meant to encourage auditors to evaluate whether opportunities exist to use the work of others in this context.

VIII. Effective Date of the Standard

The standard will be effective as of the date of SEC approval.

* * *

On the 26th day of July, in the year 2005, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

APPENDICES—

- 1— Auditing Standard No. 4—*Reporting on Whether a Previously Reported Material Weakness Continues to Exist*
- 2— Conforming Amendment to PCAOB Auditing and Related Professional Practice Standards Resulting from the Adoption of Auditing Standard No. 4—*Reporting on Whether a Previously Reported Material Weakness Continues to Exist*

Appendix 1

Auditing Standard No. 4, Reporting on Whether a Previously Reported Material Weakness Continues to Exist

Applicability of Standard

1. This standard establishes requirements and provides direction that apply when an auditor is engaged to report on whether a previously reported material weakness in internal control over financial reporting (hereinafter referred to as a material weakness) continues to exist as of a date specified by management.

Note 1: In this context, *previously reported material weakness* means a material weakness that was described previously in an auditor's report issued pursuant to Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements*.

Note 2: The date specified by management as the date that the previously reported material weakness no longer exists must be a date after the date of management's most recent annual assessment.

2. An auditor may conduct an engagement to report on whether a previously reported material weakness continues to exist if (1) the auditor has audited the company's financial statements and internal control over financial reporting in accordance with Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements*, as of the date of the company's most recent annual assessment of internal control over financial reporting, or (2) the auditor has been engaged to perform an audit of the financial statements and internal control over financial reporting in accordance with Auditing Standard No. 2 in the current year and has a sufficient basis for performing this engagement. (See paragraph 26 of this standard for additional requirements that apply specifically to a successor auditor's application of this standard.)

Note: References in this standard to the company's most recent annual assessment of internal control over financial reporting apply to the company's most recent assessment of internal control over financial reporting overall, either as of the company's year-end or as of a more recent interim date, as audited by the auditor in accordance with Auditing Standard No. 2.

3. The auditor may report on more than one previously reported material weakness as part of a single engagement.

4. The engagement described by this standard is voluntary. The standards of the PCAOB do not require an auditor to undertake an engagement to report on whether a previously reported material weakness continues to exist. The auditor may audit the company's internal control over financial reporting in accordance with Auditing Standard No. 2 without ever performing an engagement in accordance with this standard.

Auditor's Objective in an Engagement to Report on Whether a Previously Reported Material Weakness Continues to Exist

5. The auditor's objective in an engagement to report on whether a previously reported material weakness continues to exist is to obtain reasonable

assurance about whether the previously reported material weakness exists as of a date specified by management and to express an opinion thereon. The auditor's opinion relates to the existence of a specifically identified material weakness as of a specified date and does not relate to the effectiveness of the company's internal control over financial reporting overall.

6. To obtain reasonable assurance, the auditor should obtain and evaluate evidence about whether specified controls were designed and operated effectively as of the date specified by management and whether those controls satisfy the company's stated control objective.

Note: Obtaining and evaluating evidence about whether the specified controls are designed effectively without also obtaining evidence about whether those controls operated effectively would not result in the auditor obtaining reasonable assurance for the purpose of expressing an opinion on whether a material weakness continues to exist.

Conditions for Engagement Performance

7. The auditor may report on whether a previously reported material weakness continues to exist at a company only if all of the following conditions are met:

- a. Management accepts responsibility for the effectiveness of internal control over financial reporting;
- b. Management evaluates the effectiveness of the specific control(s) that it believes addresses the material weakness using the same control criteria that management used for its most recent annual assessment of internal control over financial reporting and management's stated control objective(s);
- c. Management asserts that the specific control(s) identified is effective in achieving the stated control objective;
- d. Management supports its assertion with sufficient evidence, including documentation; and
- e. Management presents a written report that will accompany the auditor's report that contains all the elements described in paragraph 48 of this standard.

8. If all the conditions in paragraph 7 of this standard are not met, the auditor is not permitted to complete the engagement to report on whether a previously reported material weakness continues to exist.

Framework and Definitions for Evaluation

9. The terms *internal control over financial reporting*, *control deficiency*, *significant deficiency*, and *material weakness* have the same meanings as the definitions of those terms in paragraphs 7 through 10, respectively, of Auditing Standard No. 2.

10. Paragraph 13 of Auditing Standard No. 2 states that management is required to base its annual assessment of the effectiveness of the company's internal control over financial reporting on a suitable, recognized control framework (also known as *control criteria*) and describes the characteristics that make a framework suitable for this purpose. For purposes of an engagement to report on whether a previously reported material weakness continues to exist, both management and the auditor must use both (1) the same control criteria used for the company's most recent annual assessment of internal control over

financial reporting, and (2) the company's stated control objective(s) to evaluate whether a material weakness continues to exist.

Note: The performance and reporting requirements in Auditing Standard No. 2 and in this standard are based on the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission's publication, *Internal Control—Integrated Framework*. Known as the COSO report, it provides a suitable and available framework for purposes of management's annual assessment of internal control over financial reporting. (More information about the COSO framework is included in paragraphs 14 and 15 of Auditing Standard No. 2, the COSO report, and AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*.)

11. A *control objective* provides a specific target against which to evaluate the effectiveness of controls. A control objective for internal control over financial reporting generally relates to a relevant financial statement assertion and states a criterion for evaluating whether the company's control procedures in a specific area provide reasonable assurance that a misstatement to or omission in that relevant assertion is prevented or detected by controls on a timely basis.¹

12. Management establishes control objectives that are tailored to the individual company. The process of tailoring control objectives to the individual company allows the control criteria used for management's annual assessment to be applied to the facts and circumstances in a reasonable and appropriate manner. Although control objectives are used most frequently to evaluate the effectiveness of control activities, the other components of internal control over financial reporting (i.e., control environment, risk assessment, information and communication, and monitoring) also can be expressed in terms of control objectives.

13. In an audit of internal control over financial reporting, the auditor is required to identify the company's control objectives in each area and to identify the controls that satisfy each control objective to evaluate whether the company's internal control over financial reporting is designed effectively.²

14. Table 1 includes examples of control objectives and their related assertions:

Table 1
Examples of Control Objectives and Related Assertions

Control Objectives	Assertions
Recorded sales of product X initiated on the company's Web site are real	Existence or occurrence
Product X warranty losses that are probable and can be reasonably estimated are recorded as of the company's quarterly financial statement period-ends	Completeness

¹ See paragraphs 68 to 70 of Auditing Standard No. 2 for additional information on relevant assertions.

² See paragraph 88 of Auditing Standard No. 2

Control Objectives	Assertions
Interest rate swaps are recorded at fair value	Valuation or allocation
The company has legal title to recorded product X inventory in the company's Dallas, TX warehouse	Rights and obligations
Pending litigation that is reasonably possible to result in a material loss is disclosed in the quarterly and annual financial statements	Presentation and disclosure

15. If a material weakness has previously been reported, a necessary control objective (or objectives) has not been achieved.

16. A *stated control objective* in the context of an engagement to report on whether a material weakness continues to exist is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing.

17. Because the stated control objective, for purposes of this engagement, provides management and the auditor with a specific target against which to evaluate whether the material weakness continues to exist, management and the auditor must be satisfied that, if the stated control objective were achieved, the material weakness would no longer exist.

Note: When a material weakness has a pervasive effect on the company's internal control over financial reporting, identifying the related control objectives that are not being achieved may be difficult because of the large number of control objectives affected. A material weakness related to an ineffective control environment would be an example of this circumstance. If management and the auditor have difficulty identifying *all* of the stated control objectives affected by a material weakness, the material weakness probably is not suitable for this engagement and should be addressed, instead, through the auditor's annual audit of internal control over financial reporting conducted under Auditing Standard No. 2.

Performing an Engagement to Report on Whether a Previously Reported Material Weakness Continues to Exist

18. In an engagement to report on whether a previously reported material weakness continues to exist, the auditor must obtain sufficient competent evidence about the design and operating effectiveness of specified controls that provide reasonable assurance that the company's stated control objective is achieved in the context of the control criteria (e.g., COSO).

Note 1: An individual material weakness may be associated with a single stated control objective or with more than one stated control objective, depending on the nature of the material weakness and the manner in which the company tailors its stated control objectives to its business.

Note 2: Depending on the nature of the company's business, its organization, its internal control over financial reporting, and the specific material weakness that is the subject of this engagement, the auditor may determine that he or she is not able to obtain a sufficient basis for reporting on whether a previously reported material weakness continues to exist without performing a complete audit of internal control over financial reporting in accordance with Auditing Standard No. 2.

Applying the Standards of the PCAOB

19. The auditor must adhere to the standards of the PCAOB in performing an engagement to report on whether a previously reported material weakness continues to exist. Adherence to the standards involves:

- a. Planning the engagement,
- b. Obtaining an understanding of internal control over financial reporting,
- c. Testing and evaluating whether a material weakness continues to exist, including using the work of others, and
- d. Forming an opinion on whether a previously reported material weakness continues to exist.

20. Even though some requirements of this standard are set forth in a manner that suggests a sequential process, auditing whether a previously reported material weakness continues to exist involves a process of gathering, updating, and analyzing information. Accordingly, the auditor may perform some of the procedures and evaluations described in this section of the standard concurrently.

21. The engagement to report on whether a previously reported material weakness continues to exist must be performed by a person or persons having adequate technical training and proficiency as an auditor. In all matters related to the assignment, an independence in mental attitude must be maintained. Due professional care must be exercised in the performance of the engagement and the preparation of the report. Paragraphs 30 through 36 of Auditing Standard No. 2 describe the application of these standards in the context of an internal control-related service.

22. This standard establishes the fieldwork and reporting standards applicable to an engagement to report on whether a previously reported material weakness continues to exist.

23. The concept of materiality, as discussed in paragraphs 22 and 23 of Auditing Standard No. 2, underlies the application of the general and fieldwork standards in an engagement to report on whether a previously reported material weakness continues to exist. Therefore, the auditor uses materiality at the financial-statement level, rather than at the individual account-balance level, in evaluating whether a material weakness exists. The auditor should assess materiality as of the date that management asserts that the previously reported material weakness no longer exists.

Planning the Engagement

24. The auditor should properly plan the engagement to report on whether a previously reported material weakness continues to exist and should properly supervise any assistants. When planning the engagement, the auditor should evaluate how the matters described in paragraph 39 of Auditing Standard No. 2 will affect the auditor's procedures.

Obtaining an Understanding of Internal Control over Financial Reporting

25. To perform this engagement, the auditor must have a sufficient knowledge of the company and its internal control over financial reporting. An auditor who has audited the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the date of the company's most recent annual assessment of internal control over financial reporting would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform this engagement.

Note: The second sentence of the paragraph above contemplates that the auditor's previous engagement under Auditing Standard No. 2 resulted in rendering an opinion. If an auditor previously engaged to perform an audit of internal control over financial reporting in accordance with Auditing Standard No. 2 has not yet rendered an opinion on the effectiveness of the company's internal control over financial reporting as of the company's most recent year-end or more recently, then that auditor should follow the requirements for a successor auditor in paragraphs 26a-b and 27. Additionally, if an auditor has previously performed an audit of internal control over financial reporting at the company and is now a successor auditor (because another auditor has subsequently performed an audit of internal control over financial reporting at the company in intervening years), the auditor should follow the requirements in paragraphs 26 and 27 for a successor auditor.

26. When a successor auditor³ performs an engagement to report on whether a previously reported material weakness continues to exist and he or she has not yet completed an audit of internal control over financial reporting at the company, he or she must perform procedures to obtain sufficient knowledge of the company's business and its internal control over financial reporting to achieve the objective of the engagement, as described in paragraph 5 of this standard. A successor auditor who has not yet completed an audit of internal control over financial reporting at the company must perform the following procedures as part of obtaining sufficient knowledge of the company's business and its internal control over financial reporting:

- a. Comply with paragraphs 47 through 51 of Auditing Standard No. 2 regarding obtaining an understanding of internal control over financial reporting. The extent of understanding of internal control over financial reporting needed to satisfy these requirements in the context of an engagement to report on whether a previously reported material weakness continues to exist depends on the nature of the material weakness on which the auditor is reporting. The more pervasive the effects of the material weakness, the more extensive the understanding of internal control over financial reporting should be under these requirements. For example, if the material weakness affects company-level controls, a more extensive understanding of internal control over financial reporting will be necessary than if the effects of the material weakness are isolated at the transaction level.
- b. Perform a walkthrough as described in paragraphs 79 through 82 of Auditing Standard No. 2 for all major classes of transactions that are directly affected by controls specifically identified by management as addressing the material weakness.

Note: Some controls have only an indirect effect on a major class of transactions, such as certain controls in the control environment or risk assessment components of internal control over financial reporting. The auditor need not perform a walkthrough of major classes of transactions that are affected only indirectly by the controls specifically identified by management as addressing the material weakness.

- c. In addition to the communication requirements described in AU sec. 315, *Communications Between Predecessor and Successor Auditors*, the successor auditor should make specific inquiries of the

³ The term *successor auditor* has the same meaning as the definition of that term in paragraph .02 of AU sec. 315, *Communications Between Predecessor and Successor Auditors*.

predecessor auditor. These inquiries should address the basis for the predecessor auditor's determination that a material weakness existed in the company's internal control over financial reporting and the predecessor auditor's awareness of any information bearing on the company's ability to successfully address that material weakness.

27. A successor auditor may determine that he or she needs to perform procedures in addition to those specified in paragraph 26 of this standard to obtain a sufficient knowledge of the company's business and its internal control over financial reporting. Depending on the nature of the company's business, its organization, its internal control over financial reporting, and the specific material weakness that is the subject of this engagement, a successor auditor may determine that he or she is not able to obtain a sufficient basis for reporting on whether a previously reported material weakness continues to exist without performing a complete audit of internal control over financial reporting in accordance with Auditing Standard No. 2.

Testing and Evaluating Whether a Material Weakness Continues to Exist

28. The auditor must obtain an understanding of and evaluate management's evidence supporting its assertion that the specified controls related to the material weakness are designed and operated effectively, that these controls achieve the company's stated control objective(s) consistent with the control criteria, and that the identified material weakness no longer exists. If the auditor determines that management has not supported its assertion with sufficient evidence, the auditor cannot complete the engagement to report on whether a previously reported material weakness continues to exist, because one of the conditions for engagement completion described in paragraph 7 of this standard would not be met.

Note: Paragraphs 40 through 46 of Auditing Standard No. 2 apply to the auditor's evaluation of management's annual assessment of internal control over financial reporting and management's related documentation. The auditor may apply the relevant concepts described in that section to the evaluation of management's evidence supporting management's assertion that a previously reported material weakness no longer exists.

29. As a part of evaluating management's evidence supporting its assertion, the auditor should determine whether management has selected an appropriate date for its assertion. In making this determination, the auditor should take into consideration the following:

- a. Management's assertion that a previously reported material weakness no longer exists may be made as of any specified date that permits management to obtain sufficient evidence supporting its assertion.

Note: The auditor also should determine whether the specified date of management's assertion permits the auditor to obtain sufficient evidence supporting his or her opinion.

- b. Depending on the nature of the material weakness, the stated control objective, and the specified controls, the specified date of management's assertion may need to be after the completion of one or more period-end financial reporting processes.
- c. Controls that operate daily and on a continuous, or nearly continuous, basis generally permit the auditor to obtain sufficient

evidence as to their operating effectiveness as of almost any date management might choose to specify in its report.

- d. Controls that operate over the company's period-end financial reporting process typically can be tested only in connection with a period-end.

30. The auditor should obtain evidence about the effectiveness of all controls specifically identified in management's assertion. The nature, timing, and extent of the testing that enables the auditor to obtain sufficient evidence supporting his or her opinion on whether a previously reported material weakness continues to exist will depend on both the nature of the controls specifically identified by management as meeting the company's stated control objectives and the date of management's assertion.

31. All controls that are necessary to achieve the stated control objective(s) should, therefore, be specifically identified and evaluated. The specified controls will necessarily include controls that have been modified or newly implemented and also may include existing controls that previously were deemed effective during management's most recent annual assessment of internal control over financial reporting. As part of testing and evaluating the design effectiveness of the specified controls, the auditor should determine whether the specified controls would meet the stated control objective(s) if they operated as designed. In making this evaluation, the auditor should apply paragraphs 88 through 91 of Auditing Standard No. 2.

32. Consistent with the direction in paragraph 92 of Auditing Standard No. 2, the auditor should evaluate the operating effectiveness of a specified control by determining whether the specified control operated as designed and whether the person performing the control possesses the necessary authority and qualifications to perform the control effectively. In determining the nature, timing, and extent of tests of controls, the auditor should apply paragraphs 93 through 102 and 105 through 107 of Auditing Standard No. 2.

33. The auditor should apply paragraph 98 of Auditing Standard No. 2 regarding an adequate period of time to determine the operating effectiveness of a control in the context of an engagement to report on whether a previously reported material weakness continues to exist. Paragraph 98 of Auditing Standard No. 2 states (in part):

The auditor must perform tests of controls over a period of time that is adequate to determine whether, as of the date specified in management's report, the controls necessary for achieving the objectives of the control criteria are operating effectively. The period of time over which the auditor performs tests of controls varies with the nature of the controls being tested and with the frequency with which specific controls operate and specific policies are applied.

For example, a transaction-based daily reconciliation generally would permit the auditor to obtain sufficient evidence as to its operating effectiveness in a shorter period of time than a pervasive, company-level control, such as any of those described in paragraphs 52 and 53 of Auditing Standard No. 2. Additionally, the auditor typically will be able to obtain sufficient evidence as to the operating effectiveness of controls over the company's period-end financial reporting process only by testing those controls in connection with a period-end.

34. The auditor should determine whether, based on the nature of the material weakness, performing substantive procedures to support recorded financial statement amounts or disclosures affected by the specifically identified controls is necessary to obtain sufficient evidence regarding the operating effectiveness of those controls. For example, a material weakness in the company's controls over the calculation of its bad debt reserve ordinarily would require

that the auditor also perform substantive procedures to obtain sufficient evidence supporting an opinion about whether the material weakness continues to exist as of a specified date. In this circumstance, in addition to testing the design and operating effectiveness of the controls specifically identified as achieving the company's stated control objective that its bad debt reserve is reasonably estimated and recorded, the auditor ordinarily would need to perform substantive procedures to determine that, as of that same specified date, the company's bad debt reserve was fairly stated in relation to the company's financial statements taken as a whole.

35. When the specified controls, stated control objectives, and material weakness affect multiple locations or business units of the company, the auditor may apply the relevant concepts in paragraphs B1 through B13 of Appendix B of Auditing Standard No. 2 to determine the locations or business units at which to perform procedures.

Using the Work of Others

36. The auditor should evaluate whether to use the work performed by others in an engagement to report on whether a previously reported material weakness continues to exist. To determine the extent to which the auditor may use the work of others to alter the nature, timing, or extent of the work the auditor otherwise would have performed, the auditor should apply paragraphs 109 through 115 and 117 through 125 of Auditing Standard No. 2.

37. The auditor's opinion relates to whether a material weakness no longer exists at the company because the stated control objective(s) is met. Therefore, if the auditor has been engaged to report on more than one material weakness or on more than one stated control objective, the auditor must evaluate whether he or she has obtained the principal evidence that the control objectives related to each of the material weaknesses identified in management's assertion are achieved. The auditor may, however, use the work of others to alter the nature, timing, or extent of the work he or she otherwise would have performed. For these purposes, the work of others includes relevant work performed by internal auditors, company personnel (in addition to internal auditors), and third parties working under the direction of management or the audit committee that provide information about the effectiveness of internal control over financial reporting.

38. Paragraph 122 of Auditing Standard No. 2 should be applied in the context of the engagement to report on whether a previously reported material weakness continues to exist. Paragraph 122 states, in part, "As the significance of the factors listed in paragraph 112 increases, the ability of the auditor to use the work of others decreases at the same time that the necessary level of competence and objectivity of those who perform the work increases." There may, therefore, be some circumstances in which the scope of the audit procedures to be performed in this engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. Additionally, the auditor should perform any walkthroughs himself or herself because of the degree of judgment required in performing this work.

Note: The requirement described in paragraph 26b of this standard for the auditor to perform a walkthrough applies only to an auditor who did not complete an audit of internal control over financial reporting as of the company's most recent annual assessment. An auditor who has rendered an opinion on the effectiveness of the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the company's most recent annual assessment is not required to perform a walkthrough as part of this engagement.

39. The following example illustrates how to apply this section on using the work of others to this engagement.

In this example, the company's previously reported material weakness relates to the company's failure to perform bank reconciliations at its 50 subsidiaries. The specified controls identified by the company are the timely preparation of complete and accurate reconciliations between the company's recorded cash balances and the company's cash balances as reported by its financial institution.

Although certain controls over bank reconciliations are centralized, the performance of the bank reconciliations themselves is not centralized because they occur at each individual operating unit. Further, each operating unit has, on average, three separate cash accounts. The cash accounts affected are not material individually but are material in the aggregate. Most of the controls over the preparation of bank reconciliations involve a low degree of judgment in evaluating their operating effectiveness, can be subjected to objective testing, and have a low potential for management override.

If these conditions describe the specified controls over the preparation of bank reconciliations, the auditor could determine that, based on the nature of the controls as described above, he or she could use the work of others to a moderate extent, provided that the degree of competence and objectivity of the individuals performing the tests is high. The auditor might perform tests of controls that are centralized at the holding company level himself or herself; perform testing at a limited number of locations himself or herself; test the work of others performed at a limited number of other locations; review the results of the work of others at all other locations tested; and determine that, qualitatively and quantitatively, principal evidence had been obtained.

On the other hand, if the company's previously reported material weakness related to the company's failure to perform a reconciliation of its only cash account, few controls and few operations of those controls would underlie management's assertion that the material weakness no longer exists. In this circumstance, it is unlikely that the auditor would be able to use a significant amount of the work of others because of the limited scope of the total amount of work needed to test management's assertion and due to the requirement that the auditor obtain the principal evidence himself or herself.

Note: The examples provided in paragraph 126 of Auditing Standard No. 2 illustrate how to apply the requirements in Auditing Standard No. 2 regarding using the work of others in an audit of internal control over financial reporting. Because of the differences between the auditor obtaining the principal evidence supporting an opinion on the effectiveness of internal control over financial reporting overall and supporting an opinion on the much narrower subject of whether a specified material weakness in internal control over financial reporting continues to exist, the examples in Auditing Standard No. 2 may not illustrate the appropriate application of using the work of others in this narrower engagement. For instance, the examples in paragraph 126 of Auditing Standard No. 2 suggest that, for certain controls, the auditor could potentially use the work of others in its entirety. However, in most cases, the auditor could not solely use the work of others for a control specified in management's assertion regarding a material weakness no longer existing and, at the same time, obtain the principal evidence supporting his or her opinion. As another example, Auditing Standard No. 2 describes an example of appropriately alternating tests of controls. Alternating tests of controls is applicable only in the context of a recurring engagement, which is not the context for the auditor's reporting on whether a previously reported material weakness continues to exist.

Opinions Based, in Part, on the Work of Another Auditor

40. The auditor may apply the relevant concepts in AU sec. 543, *Part of Audit Performed by Other Independent Auditors*, in an engagement to report on whether a previously reported material weakness continues to exist, with the following exception. If the auditor decides to serve as the principal auditor and to use the work and reports of another auditor as a basis, in part, for his or her opinion, the principal auditor must not divide responsibility for the engagement with the other auditor. Therefore, the principal auditor must not make reference to the other auditor in his or her report.

Forming an Opinion on Whether a Previously Reported Material Weakness Continues to Exist

41. When forming an opinion on whether a previously reported material weakness continues to exist, the auditor should evaluate all evidence obtained from all sources. This process should include an evaluation of the sufficiency of the evidence obtained by management and the results of the auditor's evaluation of the design and operating effectiveness of the specified controls.

42. Management may conclude that a previously reported material weakness no longer exists because it has been reduced to a significant deficiency. If management does not plan to correct the significant deficiency within a reasonable period of time, the auditor should evaluate whether the remaining significant deficiency could be indicative of a material weakness in internal control over financial reporting. Under paragraph 140 of Auditing Standard No. 2, a significant deficiency not corrected after some reasonable period of time is a strong indicator of a material weakness. Because the auditor is not required to provide an opinion under this voluntary engagement, the auditor could reasonably decline to provide an opinion under such circumstances.

43. The auditor may issue an opinion on whether a previously reported material weakness continues to exist only when there have been no restrictions on the scope of the auditor's work. Because of the scope of an engagement to report on whether a previously reported material weakness continues to exist, any limitations on the scope of the auditor's work require the auditor either to disclaim an opinion or to withdraw from the engagement. A qualified opinion is not permitted.

Note: As described in paragraph 51 of this standard, the auditor's opinion on whether a previously reported material weakness continues to exist may be expressed as "the material weakness exists" or "the material weakness no longer exists." Therefore, the provisions of this standard do not distinguish between an unqualified opinion and an adverse opinion and, instead, refer simply to "an opinion" or "the auditor's opinion."

Requirement for Written Representations

44. In an engagement to report on whether a previously reported material weakness continues to exist, the auditor should obtain written representations from management:

- a. Acknowledging management's responsibility for establishing and maintaining effective internal control over financial reporting;
- b. Stating that management has evaluated the effectiveness of the specified controls using the specified control criteria and management's stated control objective(s);

- c. Stating management's assertion that the specified controls are effective in achieving the stated control objective(s) as of a specified date;
- d. Stating management's assertion that the identified material weakness no longer exists as of the same specified date;
- e. Stating that management believes that its assertions are supported by sufficient evidence;
- f. Describing any material fraud and any other fraud that, although not material, involves senior management or management or other employees who have a significant role in the company's internal control over financial reporting and that has occurred or come to management's attention since the date of management's most recent annual assessment of internal control over financial reporting; and
- g. Stating whether there were, subsequent to the date being reported on, any changes in internal control over financial reporting or other factors that might significantly affect the stated control objective(s) or indicate that the identified controls were not operating effectively as of, or subsequent to, the date specified in management's assertion.

45. The written representations should be signed by those members of management with overall responsibility for the company's internal control over financial reporting whom the auditor believes are responsible for and knowledgeable about, directly or through others in the organization, the matters covered by the representations. Such members of management ordinarily include the chief executive officer and chief financial officer or others with equivalent positions in the company.

46. The failure to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the engagement. As discussed further in paragraph 43 of this standard, if there is a limitation on the scope of an engagement to report on whether a previously reported material weakness continues to exist, the auditor must either disclaim an opinion or withdraw from the engagement. Further, the auditor should evaluate the effects of management's refusal on his or her ability to rely on other representations of management, including, if applicable, representations obtained in an audit of the company's financial statements.

Documentation Requirements

47. The documentation requirements in Auditing Standard No. 3, *Audit Documentation*, are modified in the following respect as they apply to this engagement. Paragraph 14 of Auditing Standard No. 3 defines the *report release date* as the date the auditor grants permission to use the auditor's report in connection with the issuance of the company's financial statements. As described in paragraph 29 of this standard, management's assertion that a material weakness no longer exists may be made as of a date other than a period-end financial reporting date. Therefore, the auditor's release of a report on whether a previously reported material weakness continues to exist may not necessarily be associated with the issuance of financial statements of the company. Accordingly, in an engagement to report on whether a previously reported material weakness continues to exist, the report release date for purposes of applying Auditing Standard No. 3 is the date the auditor grants permission to use the auditor's report on whether a previously reported material weakness continues to exist.

Reporting on Whether a Previously Reported Material Weakness Continues to Exist

Management's Report

48. As a condition for the auditor's performance of this voluntary engagement, management is required to present a written report that will accompany the auditor's report, as described in paragraph 7e of this standard. To satisfy this condition for the auditor's performance of this engagement, management's report should include:

- a. A statement of management's responsibility for establishing and maintaining effective internal control over financial reporting for the company;
- b. A statement identifying the control criteria used by management to conduct the required annual assessment of the effectiveness of the company's internal control over financial reporting;
- c. An identification of the material weakness that was identified as part of management's annual assessment;

Note: This report element should be modified in the case in which management's annual assessment did not identify the material weakness, but, rather, only the auditor's report on management's annual assessment identified the material weakness.

- d. An identification of the control objective(s) addressed by the specified controls and a statement that the specified controls achieve the stated control objective(s) as of a specified date; and
- e. A statement that the identified material weakness no longer exists as of the same specified date because the specified controls address the material weakness.

Auditor's Evaluation of Management's Report

49. With respect to management's report, the auditor should evaluate the following matters:

- a. Whether management has properly stated its responsibility for establishing and maintaining effective internal control over financial reporting;
- b. Whether the control criteria used by management to conduct the evaluation is suitable;
- c. Whether the material weakness, stated control objectives, and specified controls have been properly described; and
- d. Whether management's assertions, as of the date specified in management's report, are free of material misstatement.

50. If, based on the results of this evaluation, the auditor determines that management's report does not include the elements described in paragraph 48 of this standard, the conditions for engagement performance have not been met.

Auditor's Report

51. The auditor's report on whether a previously reported material weakness continues to exist must include the following elements:

- a. A title that includes the word *independent*;
- b. A statement that the auditor has previously audited and reported on management's annual assessment of internal control over financial reporting as of a specified date based on the control criteria, as well as a statement that the auditor's report identified a material weakness;

Note: This report element should be modified in cases in which a successor auditor's performance of this engagement is occurring before he or she has opined on the effectiveness of internal control over financial reporting overall in accordance with Auditing Standard No. 2. In this circumstance, the auditor's report should refer to the predecessor auditor's report on management's annual assessment and the predecessor auditor's identification of the material weakness.

- c. A description of the material weakness;
- d. An identification of management's assertion that the identified material weakness in internal control over financial reporting no longer exists;
- e. An identification of the management report that includes management's assertion, such as identifying the title of the report (if the report is titled);
- f. A statement that management is responsible for its assertion;
- g. An identification of the specific controls that management asserts address the material weakness;

Note: As discussed further in paragraph 31, all controls that are necessary to achieve the stated control objective should be identified.

- h. An identification of the company's stated control objective that is achieved by these controls;
- i. A statement that the auditor's responsibility is to express an opinion on whether the material weakness continues to exist as of the date of management's assertion based on his or her auditing procedures;
- j. A statement that the engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States);
- k. A statement that the standards of the Public Company Accounting Oversight Board require that the auditor plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company;
- l. A statement that the engagement includes examining evidence supporting management's assertion and performing such other procedures the auditor considered necessary in the circumstances and that the auditor obtained an understanding of internal control over financial reporting as part of his or her previous audit of management's annual assessment of internal control over financial reporting and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness;

Note: This report element should be modified in cases in which a successor auditor's performance of this engagement is occurring before he or she has opined on the effectiveness of internal control

over financial reporting overall in accordance with Auditing Standard No. 2. In this circumstance, the auditor's report should include a statement that the engagement includes obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as the auditor considered necessary in the circumstances.

- m. A statement that the auditor believes the auditing procedures provide a reasonable basis for his or her opinion;
- n. The auditor's opinion on whether the identified material weakness exists (or no longer exists) as of the date of management's assertion;
- o. A paragraph that includes the following statements:
 - That the auditor was not engaged to and did not conduct an audit of internal control over financial reporting as of the date of management's assertion, the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting, and that the auditor does not express such an opinion, and
 - That the auditor has not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date after the date of management's annual assessment of the company's internal control over financial reporting, other than the controls specifically identified in the auditor's report, and that the auditor does not express an opinion that any other controls operated effectively after the date of management's annual assessment of the company's internal control over financial reporting.

Note: This report element statement should be modified in the case in which a successor auditor's performance of this engagement is occurring before he or she has opined on the effectiveness of internal control over financial reporting overall in accordance with Auditing Standard No. 2 to read as follows: That the auditor has not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company other than the controls specifically identified in the auditor's report and that the auditor does not express an opinion that any other controls operated effectively.

- p. A paragraph stating that, because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate;
- q. The manual or printed signature of the auditor's firm;
- r. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued; and
- s. The date of the auditor's report.

52. Example A-1 in Appendix A is an illustrative auditor's report for an opinion that a material weakness no longer exists, expressed by an auditor who has previously reported on the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the company's most recent year-end (herein after referred to as a continuing auditor). Example A-2 in Appendix A is an illustrative auditor's report for an opinion that a material weakness no longer exists expressed by a successor auditor.

53. As stated in paragraph 3 of this standard, the auditor may report on more than one previously reported material weakness as part of the same engagement. In this circumstance, the auditor should modify the report elements described in paragraph 51 of this standard accordingly.

54. Report modifications. The auditor should modify the standard report if any of the following conditions exist.

- a. Other material weaknesses that were reported previously by the company as part of the company's annual assessment of internal control are not addressed by the auditor's opinion. (See paragraph 56 of this standard.)
- b. A significant subsequent event has occurred since the date being reported on. (See paragraphs 57 and 58 of this standard.)
- c. Management's report on whether a material weakness continues to exist includes additional information. (See paragraphs 59 through 60 of this standard.)

55. As described further in paragraph 43 of this standard, the form of the auditor's report resulting from an engagement to report on whether a previously reported material weakness continues to exist may be an opinion on whether a material weakness continues to exist, or it may be in the form of a disclaimer of opinion. A qualified opinion is not permitted. Any limitations on the scope of the auditor's work preclude the expression of an opinion. In addition to these reporting alternatives, an auditor may elect not to report on whether a material weakness continues to exist and, instead, withdraw from the engagement.

56. Other material weaknesses reported previously by the company as part of the company's annual assessment of internal control are not addressed by the auditor's opinion. In the circumstance in which the company previously has reported more than one material weakness, the auditor may be engaged to report on whether any or all of the material weaknesses continue to exist. If the auditor reports on fewer than all of the previously reported material weaknesses, the auditor should include the following or similar language in the paragraph that states that the auditor was not engaged to perform an audit of internal control over financial reporting. When referring to his or her previously issued report on management's annual assessment, the auditor should either attach that report or include information about where it can be publicly obtained.

Our report on management's annual assessment of XYZ Company's internal control over financial reporting, dated [date of report], [attached or identify location of where the report is publicly available] identified additional material weaknesses other than the one identified in this report. We are not reporting on those other material weaknesses and, accordingly, express no opinion regarding whether those material weaknesses continue to exist after [date of management's annual assessment, e.g., December 31, 200X]. [Revise this wording

and references or attachments appropriately for use in a successor auditor's report.]

Example A-3 in Appendix A is an illustrative report issued by a continuing auditor reporting on only one material weakness when additional material weaknesses previously were reported.

57. Subsequent events. A change in internal control over financial reporting or other factors that might significantly affect the effectiveness of the identified controls or the achievement of the company's stated control objective might occur subsequent to the date of management's assertion but before the date of the auditor's report. Therefore, the auditor should inquire of management whether there was any such change or factors. As described in paragraph 44 of this standard, the auditor should obtain written representations from management regarding such matters. Additionally, to obtain information about whether such a change has occurred that might affect the effectiveness of the identified controls or the achievement of the company's stated control objective and, therefore, the auditor's report, the auditor should inquire about and examine, for this subsequent period, the following:

- Internal audit reports (or similar functions, such as loan review in a financial institution) relevant to the stated control objective or identified controls issued during the subsequent period;
- Independent auditor reports (if other than the auditor's) of significant deficiencies or material weaknesses relevant to the stated control objective or identified controls;
- Regulatory agency reports on the company's internal control over financial reporting relevant to the stated control objective or identified controls; and
- Information about the effectiveness of the company's internal control over financial reporting relevant to the stated control objective or identified controls obtained as a result of other engagements.

58. If the auditor obtains knowledge about subsequent events that he or she believes adversely affect the effectiveness of the identified controls or the achievement of the stated control objective as of the date specified in management's assertion, the auditor should follow the requirements in paragraph 61 regarding special considerations when a material weakness continues to exist. If the auditor is unable to determine the effect of the subsequent event on the effectiveness of the identified controls or the achievement of the stated control objective, the auditor should disclaim an opinion.

59. Management's report includes additional information. If management's report includes information in addition to the matters described in paragraph 48 of this standard, the auditor should disclaim an opinion on the additional information. For example, the auditor should use the following or similar language as the last paragraph of the report to disclaim an opinion on management's plans to implement new controls:

We do not express an opinion or any other form of assurance on management's statement referring to its plans to implement new controls by the end of the year.

60. If the auditor believes that management's additional information contains a material misstatement of fact, he or she should discuss the matter with management. If, after discussing the matter with management, the auditor

concludes that a material misstatement of fact remains, the auditor should notify management and the audit committee, in writing, of the auditor's views concerning the information.

Note: If management makes the types of disclosures described in paragraph 59 outside its report on whether a previously reported material weakness continues to exist and includes them elsewhere within a document that contains management's and the auditor's reports on whether a previously reported material weakness continues to exist, the auditor would not need to disclaim an opinion, as described in paragraph 59. However, in that situation, the auditor's responsibilities are the same as those described in this paragraph if the auditor believes that the additional information contains a material misstatement of fact.

Special Considerations When a Previously Reported Material Weakness Continues to Exist

61. If the auditor determines that the previously reported material weakness continues to exist and the auditor reports on the results of the engagement, he or she must express an opinion that the material weakness exists as of the date specified by management.

62. As described in paragraph 55, the auditor is not required to issue a report as a result of this engagement. If the auditor does not issue a report in this circumstance, he or she must communicate, in writing, his or her conclusion that the material weakness continues to exist to the audit committee. Similarly, if the auditor identifies a material weakness during this engagement that has not been previously communicated to the audit committee in writing, the auditor must communicate that material weakness, in writing, to the audit committee.

63. Additionally, whenever the auditor concludes that a previously reported material weakness continues to exist, the auditor must consider that conclusion as part of his or her evaluation of management's quarterly disclosures about internal control over financial reporting, as required by paragraphs 202 through 206 of Auditing Standard No. 2.

64. For example, if the auditor were engaged to report on whether two separate material weaknesses continue to exist and concluded that one no longer exists and one continues to exist, the auditor's report could comprise either of the following: (1) a report that contained two opinions, one on the material weakness that the auditor concluded no longer exists and one opinion on the material weakness that the auditor concluded continues to exist, or (2) a report that contained only a single opinion on the material weakness that the auditor concluded no longer exists if the company modifies its assertion to address only the material weakness that the auditor concluded no longer exists. In the second circumstance, the auditor must communicate, in writing, his or her conclusion that a material weakness continues to exist to the audit committee and also should apply paragraph 56 of this standard regarding other material weaknesses reported previously that are not addressed by the auditor's opinion. Additionally, the auditor must consider that conclusion as part of his or her evaluation of management's quarterly disclosures about internal control over financial reporting, as required by paragraphs 202 through 206 of Auditing Standard No. 2.

Effective Date

65. This standard is effective February 6, 2006.

Appendix A

Illustrative Reports on Whether a Previously Reported Material Weakness Continues to Exist

Paragraphs 51 through 60 of this standard provide direction on the auditor's report on whether a previously reported material weakness continues to exist. The following examples illustrate the application of those paragraphs.

Example A-1—*Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists*

Example A-2—*Illustrative Auditor's Report for a Successor Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists*

Example A-3—*Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion on Only One Previously Reported Material Weakness When Additional Material Weaknesses Previously Were Reported*

Example A-1***Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists***Report of Independent Registered Public Accounting Firm

We have previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*]. Our report, dated [*date of report*], identified the following material weakness in the Company's internal control over financial reporting:

[*Describe material weakness*]

We have audited management's assertion, included in the accompanying [title of management's report], that the material weakness in internal control over financial reporting identified above no longer exists as of [*date of management's assertion*] because the following control(s) addresses the material weakness:

[*Describe control(s)*]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in [*identify control criteria used for management's annual assessment of internal control over financial reporting*]: [*state control objective addressed*]. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of [*date of management's assertion*]. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of [*date of management's assertion*] based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included examining evidence supporting management's assertion and performing such other procedures as we considered necessary in the circumstances. We obtained an understanding of the company's internal control over financial reporting as part of our previous audit of management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness described above. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of [*date of management's assertion*].

We were not engaged to and did not conduct an audit of internal control over financial reporting as of [*date of management's assertion*], the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date after

December 31, 200X, other than the control(s) specifically identified in this report. Accordingly, we do not express an opinion that any other controls operated effectively after December 31, 200X.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

[Date]

Example A-2***Illustrative Auditor's Report for a Successor Auditor Expressing an Opinion That a Previously Reported Material Weakness No Longer Exists***Report of Independent Registered Public Accounting Firm

We were engaged to report on whether a previously reported material weakness continues to exist at XYZ Company as of *[date of management's assertion]* and to audit management's next annual assessment of XYZ Company's internal control over financial reporting. Another auditor previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on *[Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."]*. The other auditor's report, dated *[date of report]*, identified the following material weakness in the Company's internal control over financial reporting:

[Describe material weakness]

We have audited management's assertion, included in the accompanying *[title of management's report]*, that the material weakness in internal control over financial reporting identified above no longer exists as of *[date of management's assertion]* because the following control(s) addresses the material weakness:

[Describe control(s)]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in *[identify control criteria used for management's annual assessment of internal control over financial reporting]*: *[state control objective addressed]*. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of *[date of management's assertion]*. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of *[date of management's assertion]* based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as we considered necessary in the circumstances. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of *[date of management's assertion]*.

We were not engaged to and did not conduct an audit of internal control over financial reporting as of *[date of management's assertion]*, the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company other than the control(s) specifically identified in this report. Accordingly, we do not express an opinion that any other controls operated effectively.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

[*Date*]

Example A-3***Illustrative Auditor's Report for a Continuing Auditor Expressing an Opinion on Only One Previously Reported Material Weakness When Additional Material Weaknesses Previously Were Reported***Report of Independent Registered Public Accounting Firm

We have previously audited and reported on management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (CO SO)."*]. Our report, dated [*date of report*], identified the following material weakness in the Company's internal control over financial reporting:

[*Describe material weakness*]

We have audited management's assertion, included in the accompanying [title of management's report], that the material weakness in internal control over financial reporting identified above no longer exists as of [*date of management's assertion*] because the following control(s) addresses the material weakness:

[*Describe control(s)*]

Management has asserted that the control(s) identified above achieves the following stated control objective, which is consistent with the criteria established in [*identify control criteria used for management's annual assessment of internal control over financial reporting*]: [*state control objective addressed*]. Management also has asserted that it has tested the control(s) identified above and concluded that the control(s) was designed and operated effectively as of [*date of management's assertion*]. XYZ Company's management is responsible for its assertion. Our responsibility is to express an opinion on whether the identified material weakness continues to exist as of [*date of management's assertion*] based on our auditing procedures.

Our engagement was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist at the company. Our engagement included examining evidence supporting management's assertion and performing such other procedures as we considered necessary in the circumstances. We obtained an understanding of the company's internal control over financial reporting as part of our previous audit of management's annual assessment of XYZ Company's internal control over financial reporting as of December 31, 200X and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the material weakness described above. We believe that our auditing procedures provide a reasonable basis for our opinion.

In our opinion, the material weakness described above no longer exists as of [*date of management's assertion*].

We were not engaged to and did not conduct an audit of internal control over financial reporting as of [*date of management's assertion*], the objective of which would be the expression of an opinion on the effectiveness of internal control over financial reporting. Accordingly, we do not express such an opinion. This means that we have not applied auditing procedures sufficient to reach conclusions about the effectiveness of any controls of the company as of any date after December 31, 200X, other than the control(s) specifically identified in this

report. Accordingly, we do not express an opinion that any other controls operated effectively after December 31, 200X. Our report on management's annual assessment of XYZ Company's internal control over financial reporting, dated [date of report], [attached or identify location of where the report is publicly available] identified additional material weaknesses other than the one identified in this report. We are not reporting on those other material weaknesses and, accordingly, express no opinion regarding whether those material weaknesses continue to exist after [date of management's annual assessment, e.g., December 31, 200X].

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of the effectiveness of specific controls or internal control over financial reporting overall to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Appendix B

Background and Basis for Conclusions

Introduction

B1. This appendix summarizes factors that the Public Company Accounting Oversight Board (the "Board") deemed significant in reaching the conclusions in the standard. This appendix includes reasons for accepting certain views and not accepting others.

Background

B2. Section 404 of the Sarbanes-Oxley Act of 2002 (the "Act") requires the management of public companies each year to file an assessment of the effectiveness of their companies' internal control over financial reporting. The company's independent auditor must attest to, and report on, management's assessment. Under the Securities and Exchange Commission's (the "SEC" or "Commission") implementing rules, company management may not conclude that internal control over financial reporting is effective if one or more material weaknesses exists.

B3. When a company reports a material weakness, investors may be left uncertain about the reliability of the company's financial reporting. Both companies and report users have recognized the importance of a mechanism for alerting investors that a previously disclosed material weakness no longer exists.¹ The federal securities laws provide part of that mechanism. Those laws require the company to disclose to investors any changes in internal control over financial reporting that occurred during the company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.² Therefore, investors will learn of material improvements, such as the remediation of a material weakness, on a timely basis through quarterly disclosures.³

B4. When a company determines that a material weakness has been remediated, it may determine that disclosure is sufficient. Some investors and companies, however, have called for the ability to bolster confidence in management's assertions about those internal control improvements with the added assurance of the company's independent auditor.⁴

B5. The Board reviewed its existing auditing and attestation standards to determine whether adequate standards governing such an engagement already existed. The Board's interim attestation standards provide requirements for general attest engagements; however, the Board determined that these standards lack sufficient specificity for this purpose.⁵ The Board, therefore, proposed

¹ The Board's Standing Advisory Group ("SAG") discussed possible auditor involvement with the elimination of a material weakness at its November 18, 2004, public meeting. The webcast of the November 18, 2004 SAG discussion and the related briefing paper on this topic, "Reporting on the Correction of a Material Weakness," are available on the Board's Web site at www.pcaobus.org.

² See Item 308(c) of Regulation S-K, 17 C.F.R. §229.308(c).

³ In addition, even if internal control over financial reporting is effective as of the end of a company's fiscal year, investors also could potentially learn if it deteriorates materially during the year through these quarterly disclosures.

⁴ The Standing Advisory Group's November 18, 2004 discussion included this type of encouragement.

⁵ See AT sec. 101, "Attest Engagement" of the Board's interim standards. Effective April 16, 2003, the PCAOB adopted, on an initial, transitional basis, five temporary interim standards rules (PCAOB

an auditing standard that would be tailored narrowly to an engagement to report on whether a previously reported material weakness continues to exist.

B6. The Board received 30 comment letters on its proposal, primarily from auditor and investor groups as well as from two issuers. Those comments led to changes in the standard, intended to make the requirements of the standard clearer and more operational. This appendix summarizes significant views expressed in those comment letters and the Board's responses.

Voluntary Nature of Engagement

B7. The proposed standard explicitly stated that the engagement described by this standard is voluntary and that the standards of the PCAOB did not require an auditor to undertake this engagement when a material weakness was previously reported. In addition, the Board stressed the voluntary nature of this engagement at the public meeting proposing this standard.

B8. The value and importance of the Board's standards providing the option of this type of auditor reporting on a material weakness was confirmed unanimously in the comment letters from investors and investor-related parties. Auditors were also supportive of the standard overall and its voluntary nature. Both of the issuers who commented indicated that they would be concerned if issuers become compelled to obtain such opinions. One of these commenters stressed that the disclosure requirements of management, coupled with enhanced criminal penalties, should provide investors with information regarding the continued existence or correction of a material weakness.

B9. The Board continues to believe that providing for this type of auditor reporting in its standards will serve the public interest. At the same time, the Board reaffirms that reporting on whether a material weakness continues to exist is a voluntary engagement and is not required by the standards of the PCAOB.

Form of the Auditor's Opinion

B10. The proposed standard called for the auditor to express a single opinion directly on the subject matter (*i.e.*, the material weakness itself), rather than on management's assertion, as follows:

In our opinion, XYZ Company has eliminated the material weakness described above as of [*date of management's assertion*] because the stated control objective is met as of [*date of management's assertion*].

B11. Primarily auditors commented on the form of the opinion in the proposed standard and their comments reflected a wide spectrum of ideas. Some commenters expressed support for the auditor's report, including the form of the opinion as proposed. Other comments included a suggestion for two opinions, consistent with Auditing Standard No. 2—one on the subject matter (the elimination of the material weakness) and one on management's assertion. Other

(footnote continued)

Rules 3200T, 3300T, 3400T, 3500T, and 3600T) that refer to pre-existing professional standards of auditing, attestation, quality control, ethics, and independence (the "interim standards"). These rules were approved by the SEC on April 25, 2003. See SEC Release No. 33-8222. On December 17, 2003, the Board approved technical amendments to the interim standards rules indicating that, "when the Board adopts a new auditing and related professional practice standard that addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standards will be superseded or effectively amended. Accordingly, the Board approved adding the phrase 'to the extent not superseded or amended by the Board' to each of the interim standards rules." *Technical Amendments to Interim Standards Rules*, PCAOB Release No. 2003-026 (Dec. 17, 2003); Exchange Act Release No. 49624 (Apr. 28, 2004) (SEC Approval). The interim standards are available on the Board's Web site at www.pcaobus.org.

commenters suggested that just one opinion was sufficient, though these commenters were split regarding whether the one opinion should be on management's assertion or on the subject matter. Other commenters suggested that an opinion stating that the material weakness had been eliminated, without the phrase "because the stated control objective is met" would be a better alternative, while others asked the Board to consider an opinion stating that the identified controls were effective because the stated control objective was met, without stating that the material weakness had been eliminated.

B12. A number of commenters expressed concern with the phrasing "the material weakness has been eliminated," including the use of that phrase in the auditor's opinion and in the title of the proposed standard. These commenters believed that terminology such as "elimination" or "eliminated" might be too definite a term that might mislead report users into believing that there were no remaining deficiencies in the internal control over financial reporting in the area related to the specified material weakness, even though control deficiencies of a lesser severity than a material weakness might persist.

B13. After considering these suggestions, the Board decided to retain a single opinion on the subject matter and to revise the opinion wording. The Board continues to believe that a single opinion expressed directly on the subject matter is the simplest and clearest form of communication related to this engagement. Further, the Board believes that an auditor's opinion directly on the subject matter (*i.e.*, the material weakness itself) will best achieve the overarching objective of this engagement—to clearly communicate as of an interim date auditor assurance about whether a previously reported material weakness continues to exist.

B14. The Board agreed with commenters that use of the term "elimination" might increase the risk that a report user would misunderstand the assurance provided by an auditor's opinion on a previously reported material weakness. As a result, the Board changed the form of the opinion to "In our opinion, the material weakness described above no longer exists as of [date of management's assertion]" and the title of the standard to "Reporting on Whether a Previously Reported Material Weakness Continues to Exist." The text of the standard was modified throughout to delete references to "eliminated" or "elimination" and to reflect wording consistent with the revised opinion and title.

As-of Date of Report

B15. The proposed standard provided for significant flexibility by allowing the engagement to be undertaken at any time during the year, limited only by implications associated with the nature of the material weakness. In other words, the proposed standard did not require the engagement to be performed in conjunction with an audit or review of financial statements. Instead, the proposed standard required the auditor to determine whether management had selected an appropriate date for its assertion and specified several matters for the auditor to consider in making this determination.

B16. A number of auditors suggested that the engagement described by the proposed standard should be performed only as of quarterly financial reporting dates instead of as of any date during the year. These commenters believed that such a requirement would allow the auditor to integrate this work with the auditor's interim review procedures under AU sec. 722, *Interim Financial Information*, and provide a link between the auditor's report on the material weakness and management's quarterly disclosures of material changes in internal control. Commenters noted that many of the material weaknesses that have been disclosed to date are related to the period-end financial reporting process and that the auditor would therefore need to test controls in connection

with a period-end to determine whether the material weakness continues to exist. Several commenters linked their suggestion that this engagement be performed only as of a quarterly financial reporting date to the view that the standard's direction on performing substantive procedures as part of this engagement should be bolstered (see separate discussion on performance of substantive procedures beginning at paragraph B51). One commenter pointed out, however, that if this engagement could be conducted only in connection with a quarterly financial reporting date, special guidance for applying the standard to foreign filers would be necessary because foreign filers are not required to report quarterly in the same manner as domestic filers.

B17. The Board believes that the flexibility provided in the proposed standard regarding the timing of the engagement is an important and appropriate feature of the standard. Although the Board agrees with commenters' observations that many of the material weaknesses disclosed during the past year were related to the period-end financial reporting process, the Board determined that the existing provisions of the proposed standard address this circumstance. In determining whether management has selected an appropriate date for its assessment, the standard requires the auditor to consider that controls that operate over the company's period-end financial reporting process typically can be tested only in connection with a period-end.

B18. Moreover, some material weaknesses—such as those that involve transaction-based controls that operate daily—are well suited for a management assertion and an auditor opinion that the material weakness no longer exists as of almost any date. Restricting an auditor's reporting on whether a material weakness continues to exist to only quarterly financial reporting dates could impose unnecessary delay on a company seeking auditor assurance that this type of material weakness no longer exists. For example, assume that a calendar year-end company had previously disclosed a material weakness that was the type that would lend itself well to reporting that it no longer existed as of any date. Further, management could not yet assert that the material weakness no longer existed as of March 31, but believed that it could make the assertion as of a date in April. If the standard restricted auditor reporting to a quarterly financial reporting date, the auditor would have to wait until June 30 to be able to attest to whether the material weakness continued to exist (and, presumably, would not be able to issue his or her report until July, at the earliest). While management could, in this example, provide timely disclosure to investors that the material weakness no longer existed, the Board concluded that structuring the provisions of the standard to potentially result in this kind of delay in auditor assurance would not serve the public interest.

B19. In light of these considerations, the Board decided to retain the provisions of the proposed standard that would permit the auditor to report on whether a previously reported material weakness continues to exist as of any date.

B20. At least one auditor asked for clarification about whether a report issued pursuant to Auditing Standard No. 2 that identified a material weakness could be issued at the same time as a report pursuant to this standard indicating that the material weakness no longer exists as of a later date. The degree of flexibility regarding the timing of this engagement would permit the company (depending on the company's ability to assert that a material weakness no longer exists and the auditor's ability to timely audit that assertion) to simultaneously distribute its annual reports and the management assertion and auditor report described in this standard. Consistent with this flexible approach, nothing in this standard or Auditing Standard No. 2 would preclude the auditor from issuing a single, combined report on the results of an audit of internal control

over financial reporting pursuant to Auditing Standard No. 2 and the results of an engagement performed pursuant to this standard.

Applicability of the Standard to Material Weaknesses Not Previously Reported

B21. The proposed standard was structured to allow an auditor to report only on a previously reported material weakness. The proposed standard defined a previously reported material weakness as a material weakness that was previously described by an auditor's report issued pursuant to Auditing Standard No. 2. A material weakness initially identified *after* the company's annual assessment date could not, therefore, be the subject of an auditor's report under the proposed standard.

B22. Virtually all of the investors who submitted comment letters suggested that the standard should allow for auditor reporting on material weaknesses identified subsequent to the company's most recent annual assessment of internal control over financial reporting. Although some of these commenters expressed concern about the level of work that might be required of the auditor to thoroughly understand a material weakness not previously reported upon by an auditor, they did not believe that the standard should prohibit such reporting. One commenter stated that if a successor auditor could gain an understanding of a company's internal control sufficient to report on a material weakness that was identified and reported on by a predecessor auditor, an auditor should be able to gain the understanding necessary to report on a material weakness identified by management as of an interim date.

B23. The majority of the auditors who commented indicated strong opposition to allowing auditors to report in this engagement on material weaknesses not previously reported. These commenters suggested that the initial identification of a material weakness requires a level of understanding of the company's controls and the specific facts and circumstances surrounding the material weakness that can result only from a complete evaluation of the effectiveness of internal control over financial reporting. Additionally, at least one commenter expressed concern that the identification of a material weakness subsequent to the annual assessment is a strong indicator of a material change within the company's internal control over financial reporting. This commenter believed that in such a circumstance the auditor would not have sufficient knowledge of the current state of internal control over financial reporting to be able to consider the interaction and potential implications of the change on other controls. This commenter also believed that this situation would prevent the auditor, in most cases, from being able to determine whether the newly identified material weakness no longer exists.

B24. The Board decided to retain the approach described by the proposed standard. The Board believes that the issue of a newly identified material weakness being an indicator of a material change within a company's internal control over financial reporting is a valid concern. Although the change in internal control over financial reporting giving rise to any new material weakness may be confined specifically to the area in which the material weakness originally was identified, the change also could be more far-reaching. In such circumstances, the auditor may not be able to determine the effect of the change without performing a full audit of internal control over financial reporting.

B25. The Board also notes that there is an important distinction between material weaknesses previously identified in an auditor's report issued pursuant to Auditing Standard No. 2 and other newly identified material weaknesses. The primary purpose of the narrow engagement described by this standard is to establish a timely and reasonable mechanism that a company can use to remove

any perceived "stain" upon its financial reporting due to an outstanding adverse audit opinion on internal control over financial reporting that identified a material weakness. In the case of a new material weakness that is identified and addressed by management as of an interim date, an adverse auditor opinion previously attesting to the material weakness would not exist and, therefore, the new material weakness would not be the subject of the same type of market focus.

B26. There is also a fundamental difference between the auditor reporting on a material weakness not previously reported and a successor auditor reporting on a material weakness that *was* reported in a predecessor auditor's opinion on internal control over financial reporting. The fundamental difference is the concept of material change described above. The successor auditor must obtain a sufficient understanding of the company's internal control over financial reporting to report on the existence of a material weakness that was previously reported. This successor auditor, however, has the benefit of knowing that the material weakness was identified in the context of an audit of the internal control over financial reporting as a whole and that the predecessor auditor should have adequately described the nature of the material weakness (particularly its pervasiveness and the extent of its effect on the company's financial reporting). In contrast, in situations in which a material change has taken place and a new material weakness has arisen after the previous annual assessment of internal control over financial reporting, neither the predecessor nor the successor auditor has obtained this level of understanding as it relates to the newly identified material weakness.

B27. These considerations, taken together, resulted in the Board's decision to retain the provisions of the proposed standard that limit this engagement only to material weaknesses that have been previously described in an auditor's report issued pursuant to Auditing Standard No. 2. The Board also made changes to the standard, as suggested by one commenter, to make these provisions clearer. These changes included changing the title of the standard to "Reporting on Whether a Previously Reported Material Weakness Continues to Exist" as well as conforming changes to the text of the standard to refer explicitly to a *previously reported* material weakness as the subject matter of this engagement.

Focus on Control Objectives

B28. The proposed standard focused on stated control objectives to determine whether a material weakness continues to exist and posited that if a material weakness has been disclosed previously, a necessary control objective at the company has not been achieved. Because the term "stated control objective" was not precisely defined elsewhere in the Board's auditing standards, the proposed standard provided a definition as well as examples of stated control objectives.

B29. A *stated control objective* in the context of this engagement is the specific control objective identified by management that, if achieved, would result in the material weakness no longer existing. The stated control objective would provide management and the auditor with a specific target against which to evaluate whether the material weakness continues to exist. For this reason, the proposed standard required that management and the auditor be satisfied that if the stated control objective were achieved the material weakness would no longer exist.

B30. Comments on the proposed standard's focus on control objectives came primarily from auditors. Many auditors, either explicitly or implicitly, supported the focus on control objectives. One auditor suggested that, given the importance of control objectives, the proposed standard should explicitly state that documentation of control objectives is required.

B31 Several auditors, however, expressed concerns about the proposed standard's focus on control objectives. A couple of these commenters suggested that the proposed standard's emphasis on control objectives might inappropriately establish a framework for evaluating the effectiveness of internal control over financial reporting that differs from, or otherwise adversely affects the proper application of, the Committee of Sponsoring Organizations of the Treadway Commission's publication *Internal Control—Integrated Framework* ("COSO").

B32. Most concerned commenters expressed apprehension that report users might be misled by an auditor's opinion that a material weakness had been eliminated because the control objectives had been met. They believed that this type of opinion might lead report users to mistakenly believe that if the control objectives were met, there were no remaining deficiencies in the internal control over financial reporting in the area related to the material weakness—when, in fact, a significant deficiency or deficiency could continue to exist.

B33. Another commenter noted that the examples in the proposed standard illustrated only control objectives for the control activities component of internal control over financial reporting—not for the other components (control environment, risk assessment, monitoring, information and communication). This commenter suggested that examples of control objectives in the other components would be helpful. Another commenter suggested that, given the importance of the control objective concept, if the Board's standards were to specifically address the concept, such a definition and discussion should reside in Auditing Standard No. 2. One concerned auditor concluded that, given the importance of control objectives, more guidance was needed, including clarification that if more than one control is necessary to achieve a stated control objective, all such controls must be identified and tested as part of this engagement.

B34. In response to comments, the Board decided to retain the definition of, and focus on, control objectives and provide additional guidance. The Board views the auditor's use of the concept of control objectives as analogous to the use of the concept of relevant assertions. The concept of relevant assertions was already familiar to experienced auditors and was specifically defined for the first time in Auditing Standard No. 2 because of that standard's focus on testing controls over all relevant assertions related to all significant accounts. Similarly, the concept of control objectives is familiar to most experienced auditors and is already used to describe the auditor's responsibilities under Auditing Standard No. 2).⁶ A definition of control objectives (and stated control objectives) is provided in this standard because of the standard's focus on control objectives as a specific measure for determining whether a material weakness continues to exist. This is consistent with the Board's objective for its standards to be clear as well as the focus on control objectives in the engagement described by this standard.

B35. The Board believes that the standard's focus on control objectives is sound and helpful and is an appropriate complement to the control criteria, such as

⁶ For example, paragraph 12 of Auditing Standard No. 2 states, "Therefore, effective internal control over financial reporting often includes a combination of preventive and detective controls to achieve a specific control objective." Paragraph 85 of Auditing Standard No. 2 elaborates on this idea, including the example that, when performing tests of preventive and detective controls, the auditor might conclude that a deficient preventive control could be compensated for by an effective detective control and, therefore, not result in a significant deficiency or material weakness. That paragraph concludes with the statement, "When determining whether the detective control is effective, the auditor should evaluate whether the detective control is sufficient to achieve the control objective to which the [deficient] preventive control relates." Perhaps most notably, paragraph 88 of Auditing Standard No. 2 requires the auditor to identify the company's control objectives in each area and identify the controls that satisfy each control objective to evaluate whether the company's internal control over financial reporting is designed effectively.

COSO, for the purposes of this engagement. The process of tailoring control objectives to the individual company allows the control criteria (i.e., the evaluation framework) used for management's annual assessment to be applied to the facts and circumstances in a reasonable and appropriate manner. Accordingly, the emphasis in this standard on control objectives is consistent with, and supports a correct application of, COSO.

B36. The focus on whether the stated control objectives have been met as the target for determining whether a material weakness continues to exist does accommodate the circumstance in which a deficiency or significant deficiency continues to exist in that area of the company's internal control over financial reporting. Although several commenters linked this result with the focus on control objectives, this potential result would exist in any case within the overall construct of this standard, completely apart from the focus on control objectives. The potential for less severe deficiencies to persist in an area in which a previously reported material weakness no longer exists parallels the reporting results of an engagement performed under Auditing Standard No. 2. According to that standard, only material weaknesses (not less severe weaknesses) are disclosed in an auditor's report and only the existence of a material weakness and not less severe weaknesses affects the auditor's opinion on the effectiveness of the company's internal control over financial reporting. As an illustration, assume that a company that had previously reported a material weakness in internal control over financial reporting elected to wait until the auditor's next annual report issued pursuant to Auditing Standard No. 2 to obtain auditor assurance related to the existence of the material weakness. If the control weakness that had previously risen to the level of material weakness were reduced to a significant deficiency or deficiency as of the company's next year-end, the auditor's next report issued under Auditing Standard No. 2 would present an unqualified opinion indicating that the company's internal control over financial reporting was effective. The Board concluded that the users of an auditor's report on whether a previously reported material weakness continues to exist need only receive auditor assurance that the material weakness no longer exists and not more detailed information about whether less severe control deficiencies continue to persist.

B37. The Board notes, however, that paragraph 140 of Auditing Standard No. 2 states (in part) that strong indicators of a material weakness include circumstances in which significant deficiencies that have been communicated to management and the audit committee remain uncorrected after some reasonable period of time. If management does not plan to correct the significant deficiency within a reasonable period of time, the auditor should evaluate whether the remaining significant deficiency could be indicative of a material weakness in internal control over financial reporting. An auditor is not required to provide an opinion under this voluntary engagement, and could reasonably decline to provide an opinion under such circumstances.

B38. In response to comments that report users will mistakenly believe that an auditor's report issued pursuant to the standard's provisions is communicating auditor assurance that no control deficiencies exist in the area related to the former material weakness, the Board decided that the change in the title of the standard and the form of the auditor's opinion (discussed further in paragraph B14), coupled with this discussion, would sufficiently mitigate any potential for report users to misunderstand the assurance being provided by an engagement conducted under the this standard. Removing the concept of control objectives from the standard would not address the potential for misunderstanding because this potential exists independently of the focus on control objectives.

B39. With regard to the recommendation that the standard provide additional examples of stated control objectives, including stated control objectives related to components of internal control over financial reporting other than control activities, the Board determined that the provisions of the standard should remain largely at the conceptual level and state that the other components of internal control over financial reporting can be expressed in terms of control objectives. The Board also determined to emphasize, in the note to paragraph 17 of the standard, that when a material weakness has a pervasive effect on the company's internal control over financial reporting, it may be difficult to identify all of the relevant control objectives and the material weakness probably is not suitable for this type of narrow, interim reporting.

B40. For the purposes of this engagement, a stated control objective need not be more precise than to describe an objective that relates to whether there is a more than remote risk that the company's financial statements are materially misstated in a given area. For instance, paragraph 14 of the standard includes the example control objective, "The company has legal title to recorded product X inventory in the company's Dallas, TX warehouse." This example assumes that the product X inventory account related to the company's Dallas, TX warehouse represents a more than remote risk of material misstatement to the company's financial statements taken as a whole and has been identified as a separate significant account. This example does not suggest that a company should establish separate control objectives for all of its various types of inventory, by inventory location, regardless of materiality.

B41. Although the Board believes that the proposed standard made clear that in performing this engagement, the auditor should identify and test all controls necessary to achieve the stated control objective, based on the importance of this concept and in response to commenters, the Board concluded that an explicit clarification should be added. Not only must newly implemented or modified controls be identified and tested in this engagement, but *all* controls necessary to achieve the stated control objective must be identified and tested. For example, in a circumstance in which four controls must operate effectively for a given control objective to be achieved, the failure of one of those controls could result in a material weakness. In the context of this engagement, all four controls necessary to achieve the stated control objective would need to be specifically identified and tested. This must be the case because of the inherent limitations in internal control over financial reporting. If three of the four controls were found to be effective as of year-end, they cannot be assumed to be effective as of a later date. To render an opinion as of a current date about whether the material weakness exists, the auditor must have current evidence about whether all controls (in this example, all four controls) necessary to achieve the control objective are designed and operating effectively.

B42. Regarding the suggestion to include a requirement that control objectives be documented, the Board notes that neither COSO nor Auditing Standard No. 2 currently contain such a requirement. As with many aspects of assessing the effectiveness of internal control over financial reporting, the better the documentation, the easier and more efficient the evaluation, especially from the auditor's perspective. In the context of this engagement, by virtue of creating a stated control objective, the company and the auditor would document the stated control objective, even if that documentation appeared only in their respective reports. Therefore, documentation is effectively required for the stated control objectives encompassed by an engagement conducted under this standard. The Board does not believe, however, that establishing a broad requirement for documenting *all* control objectives related to a company's internal control over financial reporting is needed at this time or would be appropriately placed within this standard.

Concept of Materiality

B43. To provide direction on the concept of materiality, the proposed standard largely referred to Auditing Standard No. 2. The proposed standard stated that the concept of materiality, as discussed in paragraphs 22 and 23 of Auditing Standard No. 2, underlies the application of the general and fieldwork standards in an engagement to report on whether a previously reported material weakness continues to exist. Therefore, the auditor uses materiality at the financial-statement level, rather than at the individual account-balance level, in evaluating whether a material weakness exists.

B44. Several auditors commented that the proposed standard should provide additional direction on how the auditor considers materiality in performing this engagement. Commenters believed that clarification was necessary regarding the appropriate time context for management's and the auditor's materiality judgments. These commenters asked whether materiality should be assessed as of the date management asserts to be the date at which the material weakness no longer exists, or as of the end of the prior year when the material weakness was originally reported.

B45. Most commenters on this issue suggested that the date for assessing materiality should be the date management asserts to be the date at which the material weakness no longer exists. Commenters noted, however, that this position would allow a material weakness to no longer exist merely as a result of a business acquisition or disposition, for example, because either of those actions would change materiality as of that point in time (and, in the case of a disposition, send the material weakness along with the disposed business).

B46. Several auditors suggested that the auditor's opinion should explicitly recognize the concept of materiality. Commenters suggested the following as alternatives that would recognize materiality: "Management's assertion that XYZ Company has eliminated the material weakness described above as of [*date of management's assertion*] is fairly stated, in all material respects . . ." and "XYZ Company has eliminated the material weakness with respect to the Company's internal control over financial reporting as described above as of [*date specified in management's assertion*], in all material respects." These commenters were concerned that the opinion described by the proposed standard misrepresented the precision of the auditor's assessment and neglected the notion of reasonable assurance.

B47. The Board decided that the provisions in the standard regarding materiality should be clarified to specify that materiality should be assessed as of the date management asserts that the material weakness no longer exists. The as-of date of management's assertion and the auditor's opinion is fundamental to the auditor's decisions about whether he or she has obtained sufficient evidence to support an opinion and to the auditor's evaluation of that evidence to form an opinion on whether the material weakness exists as of that point in time. The Board believes that the logical and internally consistent position regarding the time context for assessing materiality is to assess materiality as of the date that management asserts the material weakness no longer exists. The Board also believes that materiality can be assessed as of a date other than a financial reporting period-end. This is consistent with the Board's decision, discussed further beginning at paragraph B15, that the standard permit the auditor to report on whether a previously reported material weakness continues to exist as of any date.

B48. The Board also believes that auditors should exercise caution in circumstances in which the only aspect of a previously reported material weakness that has changed is materiality (in other words, the size of the financial statement

accounts has changed due to an acquisition or other activity rather than any changes in the design or operation of controls). In many such cases, the company will have undergone significant changes, with an associated change in internal control over financial reporting overall. In this circumstance, the auditor would need to perform procedures beyond the scope of work ordinarily contemplated under this standard to have a sufficient basis for his or her new assessment of materiality and an adequate understanding of the company's internal control over financial reporting overall. The Board believes that, in many cases in which the company has undergone a change of this magnitude, the auditor would need to perform a full audit of internal control over financial reporting in accordance with Auditing Standard No. 2 to have a sufficient basis for assessing materiality, understanding the company's internal control over financial reporting overall, and rendering an opinion about whether a material weakness continues to exist. Also, as discussed in paragraph B37, a previously reported material weakness may no longer exist because it has been reduced to a significant deficiency. In this circumstance, if management does not plan to correct the significant deficiency within a reasonable period of time, the auditor should evaluate whether the remaining significant deficiency could be indicative of a material weakness.

B49. Regarding the form of the auditor's opinion and concerns that the opinion suggested by the proposed standard implied an inappropriate degree of precision and neglected the concept of reasonable assurance, the Board concluded that the provisions of the proposed standard were sufficiently clear that the auditor's objective in this engagement was to plan and perform the engagement to obtain reasonable assurance about whether a previously reported material weakness continues to exist as of the date specified by management. Furthermore, the auditor's report described by the proposed standard included disclosure of this objective. The Board does not, therefore, believe that report users would mistakenly believe that the auditor's opinion, as proposed, would convey absolute assurance.

B50. In addition, the Board believes that including another reference to materiality in the auditor's opinion would not add anything of substance to the auditor's conclusion and could instead impair its readability. The determination of whether a material weakness exists is inherently linked to materiality. Stating that the material weakness no longer exists in all material respects would be redundant—the equivalent of saying that the financial statements are not materially misstated in all material respects. Accordingly, the Board has not added another reference to materiality in the auditor's opinion.

Performance of Substantive Procedures

B51. The proposed standard, consistent with its reliance on the existing provisions of Auditing Standard No. 2, focused largely on the tests of controls that the auditor must perform to obtain reasonable assurance that a material weakness no longer exists. The proposed standard additionally recognized that, in some cases, the auditor also would need to perform substantive procedures on account balances to obtain sufficient evidence as to whether a material weakness no longer exists.

B52. Several auditors believed that the proposed standard was too mild in its wording that the auditor "may determine" that performing substantive procedures was necessary. Those commenters believed that, to be consistent with the integrated audit concept of Auditing Standard No. 2 and to reflect the fact that identification of many material weaknesses during the past year occurred during the performance of substantive audit procedures, such wording did not adequately convey the importance of performing substantive procedures in an

engagement to report on whether a previously reported material weakness continues to exist. Some commenters recommended that the standard set forth a presumptively mandatory requirement for the auditor to perform substantive audit procedures in all cases, while others suggested that strengthening the language or providing additional guidance about when substantive procedures are necessary would be sufficient.

B53. The Board continues to believe that in some circumstances, substantive procedures will not be necessary for the auditor to obtain sufficient evidence about whether a material weakness continues to exist. Like many aspects of this standard, the auditor's judgment in this area will depend on the nature of the material weakness. An auditor can obtain sufficient evidence to support an opinion on whether some material weaknesses continue to exist without the need for substantive procedures. Other material weaknesses necessitate substantive procedures for the auditor to obtain sufficient evidence. Therefore, the Board determined that it would be inappropriate to establish a presumptively mandatory requirement that substantive procedures be performed in all cases.

B54. The Board agreed, however, that the proposed standard did not sufficiently stress the potential importance of performing substantive procedures, depending on the nature of the material weakness. Paragraph 34 of the standard has, therefore, been modified in a manner that the Board believes better articulates the potential need to perform substantive procedures. An example also has been added to this paragraph of the standard to illustrate a circumstance in which substantive procedures ordinarily would need to be performed.

Using the Work of Others

B55. Similar to PCAOB Auditing Standard No. 2, the proposed standard permitted the auditor to use the work of others to alter the nature, timing, and extent of the auditor's performance of this work. Specifically, the proposed standard applied the framework for using the work of others described in PCAOB Auditing Standard No. 2. That framework requires the auditor to obtain the principal evidence supporting his or her opinion and to evaluate the nature of the controls being tested, together with the competence and objectivity of the persons performing the work.

B56. Under both PCAOB Auditing Standard No. 2 and the proposed standard, the framework measures principal evidence in relation to the overall assurance provided by the auditor. In PCAOB Auditing Standard No. 2, the principal evidence supporting the auditor's opinion should be evaluated in relation to the auditor's opinion on internal control over financial reporting overall. In contrast, the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion as to whether a material weakness no longer exists would need to be applied at the control objective level.

B57. There were few comments on the provisions for using the work of others in this proposed standard. Most commenters who commented on these provisions expressed confusion about a passage in the example of proposed paragraph 36, which stated that "the auditor *might* perform a walkthrough of the reconciliation process himself or herself [emphasis added]." Commenters believed that walkthroughs were required in the proposed standard in all cases and that walkthroughs must be conducted by the auditor himself or herself.

B58. One auditor suggested clarifying within the proposed standard that the auditor will be able to use the work of others only in limited circumstances. This same commenter also believed that the bank reconciliation example presented in the proposed standard to illustrate how the auditor could use the work of others in this type of engagement was too simplistic and requested additional, more realistic examples.

B59. The Board continues to believe that the framework for using the work of others that was established in Auditing Standard No. 2 is appropriate for use in this context and, therefore, the provisions for using the work of others in the standard have been retained as proposed. At the same time, the Board determined that it would be helpful to clarify, through the following discussion, that the evaluation of whether the auditor has obtained the principal evidence supporting his or her opinion on whether a material weakness continues to exist would need to be applied at the control objective level. A complete understanding of this feature of the standard is important because this provision allows for additional flexibility in the auditor's work.

B60. The auditor's opinion in this engagement is expressed only on whether the material weakness continues to exist—not on whether the individually identified controls are effective. As a result, the evaluation as to whether the auditor has obtained the principal evidence supporting his or her opinion should be made at the control objective level—not at the lower level of the controls individually identified in management's assertion and the auditor's report.

B61. If, for example, management's and the auditor's reports identify three separate previously reported material weaknesses that no longer exist, the auditor would, in effect, be rendering three separate opinions. Those opinions would indicate that each of the three individual material weaknesses continues to exist or no longer exists as of the date of management's assertion. The standard, therefore, would require the auditor to obtain the principal evidence that the *control objectives* related to each of the three identified material weaknesses were now achieved. However, the standard would not require that the auditor obtain the principal evidence that each *control specifically identified* in management's assertion as achieving the control objectives is effective.

B62. Auditing Standard No. 4 follows the same framework for using the work of others as Auditing Standard No. 2. There may, however, be some circumstances in which the scope of the audit procedures to be performed in this engagement will be so limited that using the work of others will not provide any tangible benefit to the company or its auditor. The Board believes that no additional specific restriction on the use of the work of others is appropriate or necessary in the context of this engagement. Such a restriction would diminish the flexibility that the framework otherwise provides and perhaps inhibit the auditor's exercise of the judgment necessary to implement the framework appropriately. Furthermore, the Board does not believe that auditors need such direction within the standard to make appropriate decisions about using the work of others in this context.

B63. Similarly, the Board determined that no further examples of using the work of others were needed. The Board believes that additional examples demonstrating the application of the provisions in the standard for using the work of others to reflect more realistic (*i.e.*, complex, fact-driven) situations is better handled outside of the standard itself and by auditors—in their audit methodology, training courses, and other venues.

B64. In response to confusion about the requirement for walkthroughs, the Board clarified the standard by adding a note to paragraph 38 and deleted the reference to a walkthrough from the example on using the work of others. Walkthroughs are required only of a successor auditor when the successor auditor performs this engagement before performing an audit of internal control over financial reporting in accordance with Auditing Standard No. 2. A continuing auditor that has opined already on the company's internal control over financial reporting in accordance with Auditing Standard No. 2 as of the company's most recent annual assessment and is engaged to conduct this narrow engagement is not required to perform any walkthroughs as part of this engagement.

Dividing Responsibility

B65. Due to the narrow scope of an engagement to report on whether a material weakness continues to exist, the provisions of the proposed standard allowed the principal auditor to use the work and reports of another auditor as a basis, in part, for his or her opinion. The proposed standard also prohibited the principal auditor from dividing responsibility for the engagement with another auditor.

B66. Very few comments were received on this provision of the proposed standard. One auditor suggested that, although dividing responsibility may not be appropriate in certain circumstances, the standard should not prohibit it. Another auditor expressed confusion about whether the principal auditor could refer to the report of the other auditor but not divide responsibility with the other auditor.

B67. The Board continues to believe that, based on the nature of the engagement described by the standard, the principal auditor should be prohibited from dividing responsibility for the engagement with another auditor. The Board's consideration of the nature of this engagement included recognition of the narrow scope of the work (*i.e.*, whether a previously reported material weakness continues to exist), that the engagement would be voluntary, and that the assignment would be non-recurring (unlike the recurring nature of the audit of the financial statements or the audit of internal control over financial reporting). The Board notes that three appropriate alternatives exist in the circumstance in which another auditor is involved and the company wants to obtain auditor assurance that a previously reported material weakness no longer exists:

- The principal auditor could report on whether a previously reported material weakness continues to exist according to this standard by performing all of the testing required for this engagement himself or herself.
- The principal auditor could report on whether a previously reported material weakness continues to exist according to this standard by using the work and reports of another auditor as a basis, in part, for his or her opinion, and by taking responsibility for the work performed by the other auditor. In this case, the auditor may not make reference to the other auditor in his or her report on whether a previously reported material weakness continues to exist.
- The company could wait until year-end when the principal auditor would report on the effectiveness of internal control over financial reporting overall under the provisions of Auditing Standard No. 2.

B68. The Board concluded that the standard was sufficiently clear that the principal auditor could not divide responsibility with another auditor and, therefore, that the auditor also could not refer to the other auditor in his or her report. Accordingly, no change has been made to the standard in this regard.

New Material Weaknesses Identified

B69. The proposed standard was silent regarding the auditor's responsibilities if, during the performance of this engagement, he or she became aware of a new material weakness not previously reported on by an auditor.

B70. Several commenters requested that the standard address the auditor's responsibilities for new material weaknesses identified during this engagement and suggested what these responsibilities should be. One investor suggested that the standard should require the auditor to include disclosure of any new material weaknesses of which the auditor was aware in his or her report. This

commenter stated that, otherwise, the auditor's report would become a way of telling investors the good news while concealing the bad news. Another commenter suggested that management should be required to include the new material weakness in management's assertion that would accompany the auditor's report and the auditor should then disclaim an opinion on the new material weakness.

B71. Both the identification of material weaknesses and the remediation of such weaknesses will be captured by management's voluntary and required reporting under the SEC's rules. Accordingly, the provisions of this standard do not facilitate management's ability to conceal from investors the emergence of a new material weakness at the company. Nevertheless, the Board agreed that when an auditor identifies a new material weakness during the performance of this engagement, the auditor should not simply remain silent. Accordingly, the Board modified the standard to require the auditor to communicate, in writing, to the audit committee any material weaknesses identified during this engagement that the auditor had not previously communicated, in writing, to the audit committee.

B72. The existing provisions of Auditing Standard No. 2 contain responsibilities for the auditor if (1) information comes to the auditor's attention during this engagement that leads him or her to believe, while performing quarterly procedures required by Auditing Standard No. 2, that management's quarterly disclosures are materially misleading, or (2) the auditor becomes aware of conditions that existed at the date of his or her last report issued under Auditing Standard No. 2.

B73. Paragraphs 202-206 of Auditing Standard No. 2 establish certain requirements for the auditor related to management's quarterly and annual certifications with respect to the company's internal control over financial reporting. If matters come to the auditor's attention during this engagement that lead him or her to believe, while fulfilling these quarterly requirements, that modification to the disclosures about changes in internal control over financial reporting is necessary for the certifications to be accurate and to comply with the requirements of Section 302 of the Act and the SEC's rules, these provisions of Auditing Standard No. 2 require the auditor to take action. Such actions escalate from auditor communications with management and then to the audit committee, culminating in the auditor considering his or her additional responsibilities under AU sec. 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.

B74. In addition, a continuing or predecessor auditor would have responsibilities under paragraph 197 of Auditing Standard No. 2 if the existence of a new material weakness came to the auditor's attention. This paragraph effectively extends the responsibilities in AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, to reports on the effectiveness of internal control over financial reporting issued pursuant to Auditing Standard No. 2. The identification of a new material weakness in the current year would cause the auditor, in fulfilling these responsibilities, to determine whether the facts relating to the material weakness existed at the date of the auditor's report pursuant to Auditing Standard No. 2 and, if so, (1) whether those facts would have changed the auditor's report issued under Auditing Standard No. 2 if he or she had been aware of them and (2) whether there are persons currently relying on or likely to rely on the auditor's report. If the auditor determined that the new material weakness identified in the current year actually existed as of the date of his or her previous report under Auditing Standard No. 2 and that it was not adequately identified and disclosed in that report, the auditor would need

to take steps such as recalling and reissuing the previous report to ensure that investors did not continue to rely on the previously issued (erroneous) report.

B75. Including newly identified material weaknesses in the auditor's report could potentially mislead investors into believing that the assurance provided by this type of engagement is broader than it actually is. If report users were provided with disclosure (covered by the auditor's opinion) of new material weaknesses of which the auditor was aware, report users might incorrectly believe that the auditor's report captured *all* new material weaknesses that had arisen at the company. Similarly, a requirement for the auditor to disclose any new material weaknesses could lead report users to conclude, incorrectly, that no such disclosure means that there is current auditor assurance over the whole of internal control over financial reporting at the company. The objective of this engagement is to provide auditor assurance about whether a previously reported material weakness continues to exist—nothing broader. The only way for investors to obtain a more complete report from the auditor would be for the auditor to audit internal control over financial reporting in accordance with Auditing Standard No. 2.

Specific Identification of All Previously Reported Material Weaknesses

B76. The proposed standard required the auditor to modify his or her report if the auditor provides assurance on less than all of the material weaknesses previously reported. The proposed standard did not, however, require the auditor to specifically identify all of the previously reported material weaknesses not covered.

B77. All investors who commented on this issue suggested that all material weaknesses previously reported either should be referred to or specifically included in the auditor's report. They indicated that failure to identify the additional material weaknesses might lead some users to erroneously conclude that they no longer exist. Auditors, on the other hand, agreed that complete specific identification of the previously reported material weaknesses not covered by the auditor's opinion should not be included, primarily because they believe that it may increase the risk of confusion about the scope of the engagement and what is being covered in the auditor's opinion. Several commenters who agreed that specific identification was not necessary suggested that in addition to the report modification included in the proposed standard, the auditor's report on this engagement should specifically direct the reader to the previous auditor's report (issued under Auditing Standard No. 2), by either attaching a copy of the audit report or by providing direction as to where the report could be obtained.

B78. The Board believes that including a complete specific identification of the previously reported material weaknesses not covered by this engagement would prove problematic. As noted by many commenters, it is possible that including this detail would confuse report readers regarding the scope of this narrow engagement and could simply that, unless told otherwise, a report user should assume that those other material weaknesses *do* continue to exist. In some of the material weakness descriptions included in management's and the auditor's reports on the effectiveness of the company's internal control over financial reporting as of year-end, the description of multiple material weaknesses covered several pages. That level of detail in an auditor's report specifically targeted at whether just one material weakness continues to exist could easily overwhelm the rest of the audit report, making the report prone to various kinds of misinterpretations.

B79. The Board concluded that report readers would be better served by requiring the auditor to provide information regarding where to obtain the previously

issued audit report—either by attaching it or referring to where it could be publicly obtained.

Other Reporting Matters

B80. *No Requirement to Issue a Report.* The proposed standard required that the auditor, if he or she concluded that the material weakness continues to exist, communicate that conclusion in writing to the audit committee. The proposed standard, however, did not require the issuance of a report. Rather, the proposed standard recognized that the auditor must consider this knowledge in connection with the auditor's responsibilities under Auditing Standard No. 2 to determine whether management's quarterly disclosures about internal control over financial reporting are not materially misleading.

B81. Several auditors who commented recommended that the proposed standard should require the auditor to issue an adverse report in the event that the auditor concludes that the material weakness continues to exist. One suggested that issuance of an adverse report would be necessary only if the auditor believed that the company had previously publicly disclosed that the material weakness had been addressed.

B82. The Board continues to believe that requiring the issuance of an adverse report to the company would serve no useful purpose in this circumstance because the company might not make such a report public. The Board believes, therefore, that requiring the auditor to communicate, in writing, with the audit committee his or her conclusion that a material weakness that was the subject of this engagement continues to exist would serve the same purpose as requiring the issuance of an adverse report. At the same time, such a requirement would provide the auditor with additional flexibility as to the form of communication that would be most meaningful to the audit committee. Regarding the potential for management to lead investors to incorrectly believe that the material weakness no longer exists in its public disclosures, the Board believes that the federal securities laws, as well as auditor's existing responsibilities related to management's quarterly disclosures, are adequate safeguards to protect investors from misleading information.

B83. *No Distinction in Standard Between Unqualified and Adverse Opinion.* As discussed in the note to paragraph 43 of the standard, the standard no longer distinguishes between an unqualified and an adverse opinion. The auditor's opinion was revised to state that the material weakness exists or no longer exists. This revision is discussed further in the section "Form of Auditor's Opinion" and is now referred to in the standard as the auditor's opinion.

B84. *Inherent Limitations.* The inherent limitations paragraph of the auditor's report provided in the proposed standard discussed the inherent limitations of internal control over financial reporting overall, rather than the inherent limitations of the controls related to the material weakness being reported on.

B85. One commenter suggested that the inherent limitations paragraph was too broad for this engagement and needed to be modified to more accurately reflect the narrow focus of this type of engagement.

B86. The Board agreed that the inherent limitations paragraph, in this context, should be targeted to the specific controls identified in this auditor report. In addition, the Board continues to believe that the broader concept of inherent limitations in internal control over financial reporting overall is equally applicable. The inherent limitations paragraph in the auditor's report has been modified to reflect both of these conclusions.

B87. *Obtaining an Understanding of Internal Control Over Financial Reporting.* The proposed standard included a required report element stating that

"the engagement includes obtaining an understanding of internal control over financial reporting, examining evidence supporting management's assertion, and performing such other procedures as the auditor considered necessary in the circumstances." This language also was included in the example report included in the proposed standard.

B88. Several auditors expressed concern that the phrase, "the engagement includes obtaining an understanding of internal control over financial reporting," implies that, as a part of the current engagement, the auditor spent a significant amount of time understanding internal control over financial reporting overall rather than carrying forward his or her understanding from the prior annual audit. These commenters believed this implication conflicted with the direction in the body of the proposed standard that an auditor who has audited the company's internal control over financial reporting within the past year in accordance with Auditing Standard No. 2 would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform this engagement. One commenter acknowledged that the proposed wording may be appropriate in cases in which a successor auditor is performing this engagement without previously gaining that understanding.

B89. The Board continues to believe that an auditor who has audited the company's internal control over financial reporting as of the company's most recent annual assessment in accordance with Auditing Standard No. 2 would be expected to have obtained a sufficient knowledge of the company and its internal control over financial reporting to perform an engagement to report on whether a previously reported material weakness continues to exist. To require a continuing auditor to update and document his or her understanding of internal control over financial reporting overall (to the full measure required by Auditing Standard No. 2) would be unnecessarily burdensome and costly. The Board modified the report element for a continuing auditor to clarify that the auditor previously obtained an understanding of internal control over financial reporting overall at the company and updated that understanding as it specifically relates to changes in internal control over financial reporting associated with the specified material weakness.

B90. The Board continues to believe, however, that a successor auditor that has not yet audited the company's internal control over financial reporting in accordance with Auditing Standard No. 2 would need to obtain a current understanding of internal control over financial reporting in connection with this engagement. Therefore, the report element described in the proposed standard is appropriate and has been retained for a successor auditor's reporting.

B91. *Example Reports.* The proposed standard included only one example report, which illustrated reporting on one material weakness by a continuing auditor when no additional material weaknesses were reported previously. Several commenters requested modification of the standard to address circumstances that the Board believed were already addressed by the proposed standard but were not illustrated in the single example report. Some commenters also made specific requests for additional example reports.

B92. The Board determined, after considering the nature of the comments, that additional example reports, while not covering all possible situations, would provide additional clarity to the various reporting situations. The Board selected three reports to illustrate most facets of the reporting provisions of the standard. Appendix A includes those reports.

Conforming Amendments to AT sec. 101

B93. The proposed standard contained a proposed conforming amendment to AT sec. 101, *Attest Engagements*. The proposed conforming amendment would

have required the proposed standard to be used, rather than AT sec. 101, for any engagements in which the subject matter is whether a material weakness continues to exist. This conforming amendment would have precluded the auditor from performing an agreed-upon procedures or review engagement (using AT sec. 101) when the subject matter of the engagement was whether a material weakness continues to exist.

B94. The Board received few comments related to the proposed conforming amendment. One auditor agreed that a conforming amendment to preclude a review-level attestation was appropriate when the subject matter was whether a material weakness continues to exist. This commenter went on to suggest, however, that there could be appropriate uses for an agreed-upon procedures engagement and that the Board should not preclude agreed-upon procedures from being performed under the Board's standards. Such reports, the commenter noted, would be restricted to the use of the specified parties who take responsibility for the sufficiency of the agreed-upon procedures for their purposes and, therefore, these reports would not generally be available to investors. Thus, these reports would not be a substitute for the engagements addressed in the proposed standard. Another commenter separately suggested broadly retaining the ability for the auditor to perform a review engagement when the subject matter is a previously reported material weakness.

B95. The Board continues to believe that investors and other report users in the public domain will be best served by the Board's standards permitting only positive assurance (i.e., an examination-level attestation) from the auditor when the subject matter is whether a material weakness continues to exist. The Board agrees, however, that private parties (such as audit committees) who wish to engage the auditor to perform specified procedures when the subject matter is whether a material weakness continues to exist should be allowed to negotiate such a private arrangement, as long as the results are not intended for public use. The Board, therefore, decided to modify the conforming amendment to AT sec. 101 of the Board's interim standards. As adopted, an auditor may not use AT 101 to report on whether a material weakness in internal control over financial reporting continues to exist for any purpose other than the company's internal use.

Appendix 2

Conforming Amendment to PCAOB Auditing and Related Professional Practice Standards Resulting From the Adoption of the Auditing Standard No. 4—*Reporting on Whether a Previously Reported Material Weakness Continues to Exist*

Attestation Standards

The Board's interim attestation standards include the Statements on Standards for Attestation Engagements promulgated by the ASB, as in existence on April 16, 2003. The conforming amendment to the Board's interim attestation standards is as follows:

- *AT sec. 101, Attest Engagements*

AT sec. 101 is amended by adding as letter f. to paragraph .04, the following:

Engagements in which the practitioner is engaged to report on whether a material weakness in internal control over financial reporting continues to exist for any purpose other than the company's internal use. Such engagements must be conducted pursuant to PCAOB Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*.

PCAOB Release No. 2005-020***Ethics and Independence Rule Concerning Independence, Tax Services, and Contingent Fees***

PCAOB Release No. 2005-020
November 22, 2005

PCAOB Rulemaking
Docket Matter No. 017

Approved by the Securities and Exchange Commission on April 19, 2006, with varying effective dates.

The Securities and Exchange Commission has approved PCAOB ethics and independence rules concerning independence, tax services and contingent fees.

The rules introduce a foundation for the independence component of the Board's ethics rules by establishing a general obligation requiring a registered public accounting firm and its associated persons to be independent of the firm's audit clients throughout the audit and professional engagement period.

The rules identify circumstances in which the provision of tax services impairs an auditor's independence, including services related to marketing, planning, or opining in favor of the tax treatment of, among other things, transactions that are based on aggressive interpretations of applicable tax laws and regulations.

The rules also treat registered public accounting firms as not independent of their audit clients if they enter into contingent fee arrangements with those clients or if the firms provide tax services to certain members of management who serve in financial reporting oversight roles at an audit client or to immediate family members of such persons.

The rules further implement the Sarbanes-Oxley Act's requirement that auditors' non-audit services be pre-approved by the audit committee by strengthening the auditor's responsibilities in connection with seeking audit committee pre-approval of tax services. Specifically, the rules require a registered public accounting firm that seeks such pre-approval to describe proposed tax services engagements, in writing, for the audit committee; to discuss with the audit committee the potential effects of the services on the firm's independence; and to document the substance of that discussion.

Finally, an ethics rule also codifies the principle that persons associated with a registered public accounting firm (e.g., individual accountants) can be held responsible when certain of their actions contribute to a firm's violation of relevant laws, rules, or professional standards.

The effective dates for the rules follow:

Rule	Effective Date
3501—Definition of Terms	April 29, 2006
3502—Responsibility Not to Knowingly or Recklessly Contribute to Violations	April 29, 2006
3520—Auditor Independence	April 29, 2006
3521—Contingent Fees	Rule 3521 will not apply to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before June 18, 2006.
3522—Tax Transactions	Rule 3522 will not apply to tax services that were completed by a registered public accounting firm no later than June 18, 2006.
3523—Tax Services for Persons in Financial Reporting Oversight Roles	Rule 3523 will not apply to tax services being provided pursuant to an engagement in process on April 19, 2006, provided that such services are completed on or before October 31, 2006.
3524—Audit Committee Pre-approval of Certain Tax Services	Rule 3524 will not apply to any tax service pre-approved on an engagement-by-engagement basis before June 18, 2006. With respect to tax services provided to audit clients whose audit committees pre-approve tax services pursuant to policies and procedures, Rule 3524 will not apply to any such tax service that is begun by April 20, 2007.

Summary:

The Public Company Accounting Oversight Board ("PCAOB" or "Board") is adopting technical amendments to certain rules it adopted in July 2005 to promote the ethics and independence of registered public accounting firms that audit financial statements of U.S. public companies.

Public Comments:

The Board, on December 14, 2004, released for public comment proposed rules to promote the ethics and independence of registered public accounting firms. The Board received 807 letters of comment. After considering these comments, the Board adopted final rules on July 26, 2005. Because the amendments being adopted today do not change the substance of these rules, the Board is not seeking additional comment. The rules adopted on July 26, 2005, as amended by this release, remain subject to the Securities and Exchange Commission ("SEC") approval process, which includes a period for public comment.

Board Contacts:

Bella Rivshin, Assistant Chief Auditor (202/207 -9180; rivshinb@pcaobus.org), or Greg Scates, Associate Chief Auditor (202/207 -9114; scatesg@pcaobus.org).

* * *

On July 26, 2005, the Board adopted certain rules related to registered public accounting firms' provision of tax services to public company audit clients. The rules were designed to address certain concerns related to auditor independence when auditors become involved in marketing or otherwise opining in favor of aggressive tax shelter schemes or in selling personal tax services to individuals who play a direct role in preparing the financial statements of public company audit clients. As part of this rulemaking, the Board adopted an ethics rule, Rule 3502, to codify the principle that persons associated with a registered public accounting firm should not cause the firm to violate relevant laws, rules, and standards. The rules were submitted to the SEC on August 2, 2005, for its approval, pursuant to Section 107 of the Sarbanes-Oxley Act of 2002.

After discussions with the SEC, the Board has decided to remove the word "cause" from the title and text of Rule 3502. This amendment is intended to avoid any misperception that the rule affects the interpretation of any provision of the federal securities laws. The rule, as amended, should be interpreted and understood to be the same as the rule adopted by the Board in July, however.¹ In particular, under the amended rule, the person's conduct must have the same relation to the violation and the person must act with the same mental state as under the rule the Board adopted in July.

The Board is also amending Note 1 to Rule 3522(b) to correct a typographical error in the citation of the provision of the Internal Revenue Code cited in that note.

In light of the time that has elapsed since their adoption, the Board has also decided to revise the effective dates for certain of the rules. Three of those rules—Rules 3521, 3522 and 3524—had effective dates of the later of December 31, 2005 or 10 days after the date the SEC approves the rules.² The Board has decided to revise the effective dates of those three rules to 60 days after the date the SEC approves the rules.³

Specifically, the Board will not apply Rule 3521 to contingent fee arrangements that were paid in their entirety, converted to fixed fee arrangements, or otherwise unwound before 60 days after the date that the SEC approves the rules.⁴ The Board will not apply Rule 3522 to tax services that were completed by a registered public accounting firm no later than 60 days after the date that the SEC approves the rules. Rule 3524 will not apply to any tax service pre-approved before 60 days after the date that the SEC approves the rules, or, in the case of an issuer that pre-approves non-audit services by policies and procedures, the rule will not apply to any tax service provided by March 31, 2006. Combined with the time period since the rules' adoption, the extension of the effective dates for these rules should allow reasonable time for affected firms to

¹ See PCAOB Release No. 2005-014 (July 26, 2005), at 9–14 (discussing Rule 3502).

² See *id.*, at 47–48.

³ The effective dates of Rules 3501, 3502, 3520 and 3523 are not changed by this release and remain as set forth in the Board's adopting release. *Id.*

⁴ Of course, the Commission's Rule 2-01 on auditor independence treats an auditor as not independent if it enters into a contingent fee arrangement with an audit client today. 17 C.F.R. § 210.2-01 (c)(5).

prepare internal policies and procedures, train their employees to ensure compliance with the new requirements, and, if necessary, terminate or complete any ongoing engagements covered by the rules in a professional manner.

* * *

On the 22nd day of November, in the year 2005, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

J. Gordon Seymour Acting Secretary
November 22, 2005

APPENDIX—

Technical Amendments to Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees

Appendix

Amendments to Rules

[Underlining indicates an addition; strikethrough indicates a deletion.]

Rule 3502. Responsibility Not to ~~Cause~~ Knowingly or Recklessly Contribute to Violations

A person associated with a registered public accounting firm shall not take or omit to take an action knowing, or recklessly not knowing, that the act or omission would directly and substantially contribute to a violation by that registered public accounting firm of ~~cause that registered public accounting firm to violate~~ the Act, the Rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto, including the rules of the Commission issued under the Act, or professional standards; ~~due to an act or omission the person knew, or was reckless in not knowing, would directly and substantially contribute to such violation.~~

Rule 3522. Tax Transactions.

* * *

- (b) **Aggressive Tax Position Transactions**—that was initially recommended, directly or indirectly, by the registered public accounting firm and a significant purpose of which is tax avoidance, unless the proposed tax treatment is at least more likely than not to be allowable under applicable tax laws.

Note 1: With respect to transactions subject to the United States tax laws, paragraph (b) of this rule includes, but is not limited to, any transaction that is a listed transaction within the meaning of 26 C.F.R. §1.6011-1-4(b)(2).

PCAOB Release No. 2007-001***Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud***

PCAOB Release No. 2007-001
January 22, 2007

This report focuses on aspects of the Board's interim auditing standards that address the auditor's responsibility with respect to fraud, principally AU § 316, *Consideration of Fraud in a Financial Statement Audit*.¹ The Board is not, in this report, changing or proposing to change any existing standard, nor is the report meant to provide a new interpretation of any aspect of existing standards. The Board has, however, identified certain observations, made in the course of Board inspections, that are sufficiently important or arise with sufficient frequency to warrant discussion in a public report, both for the purpose of generally focusing auditors on being diligent about these matters and for the purpose of providing information that audit committees may find useful in working with auditors.²

The auditor's responsibility with respect to the detection of a material misstatement caused by fraud is an important focus of the Board. The Board's standards state that the auditor has a responsibility to plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, including misstatements caused by fraud.³ Although any financial statement audit entails some risk that the auditor will not detect a material misstatement even when the audit has been conducted in accordance with the standards of the PCAOB,⁴ the risk of nondetection is likely to be higher for misstatements caused by fraud than for misstatements caused by error, since fraud usually involves deliberate concealment and may involve collusion with third parties. The auditor should, therefore, assess risks and apply procedures directed specifically to the detection of a material, fraudulent misstatement of the financial statements.

¹ On April 16, 2003, the Board adopted certain pre-existing auditing standards as its interim auditing standards to be used on an initial, transitional basis. PCAOB Rule 3200T describes the auditing standards that the Board adopted and requires registered public accounting firms and their associated persons to comply with these auditing standards to the extent not superseded or amended by the Board. See www.pcaobus.org/standards.

² The inspection observations described in this report reflect information reported to the Board by its inspection staff and do not reflect or constitute any determinations by the Board as to whether any firms or persons have engaged in any conduct for which the Board could sanction them through the Board's disciplinary process.

³ See paragraph .01 of AU §316, *Consideration of Fraud in a Financial Statement Audit*.

⁴ See AU § 316.12.

Using observations from certain Board inspections as a focal point, this report discusses aspects of procedures relevant to an auditor's consideration of fraud.⁵ The discussion is organized around the following topics:⁶

- Auditor's Overall Approach to the Detection of Financial Fraud
- Brainstorming Sessions and Fraud-Related Inquiries
- Auditor's Response to Fraud Risk Factors
- Financial Statement Misstatements
- Risk of Management Override of Controls
- Other Areas to Improve Fraud Detection

Auditor's Overall Approach to the Detection of Financial Fraud

The auditor is to make various judgments about the nature, timing, and extent of tests to perform to address specifically identified risks of material misstatement due to fraud.⁷

PCAOB inspection teams have observed, however, that auditors often document their consideration of fraud merely by checking off items on standard audit programs and checklists. PCAOB standards require additional documentation evidencing the actual performance of certain of the procedures outlined in those programs and checklists.⁸

In addition, in audits performed by multi-person audit engagement teams, the lack of such additional documentation makes it difficult for senior members of the audit team to supervise engagement team members properly and to review the procedures performed with respect to the consideration of fraud. In certain instances involving such engagement teams, PCAOB inspection teams have observed that engagement teams' documentation did not contain any such additional evidence of the actual performance of the procedures, suggesting that there may not be sufficient involvement of senior members in supervising and reviewing the engagement team's application of the provisions of AU § 316.

In addition, PCAOB inspection teams have, in some cases, observed that auditors failed to expand audit procedures when addressing identified fraud risk factors. In those cases, it appeared that auditors might be performing the procedures required in AU § 316 mechanically, without using those procedures to develop insights on the risk of fraud or with a view toward identifying ways to modify the audit plan in order to address the risk. If used properly, firm programs and checklists can be useful tools for achieving the objectives of AU § 316. Mechanical implementation of the standard is unlikely to be very effective in detecting fraud.

⁵ Information received or prepared by the Board in connection with any inspection of a registered public accounting firm is subject to certain confidentiality restrictions set out in Sections 104(g)(2) and 105(b)(5) of the Act. Under the Board's Rule 4010, the Board may publish summaries, compilations, or general reports concerning the results of its various inspections, provided that no such published report may identify the firm or firms to which any quality control criticisms in the report relate.

⁶ This report's focus on certain topics should not be understood to suggest any relatively lesser degree of importance of topics that are not addressed. Topics are included in this report because of the nature and frequency of deficiencies that Board inspectors have observed concerning these points in certain of their inspections.

⁷ See AU § 316.52.

⁸ See AU § 316.83 and paragraph 6 of PCAOB Auditing Standard No. 3, *Audit Documentation*.

Brainstorming Sessions and Fraud-Related Inquiries

The auditor's planning should include consideration of how the issuer's financial statements might be susceptible to material misstatement due to fraud, how management could perpetrate and conceal fraudulent financial reporting, and how the issuer's assets could be misappropriated.⁹ In audits involving multi-person audit teams, the audit team should hold what the standard refers to as a "brainstorming session" to discuss those issues. This discussion allows the audit team to be alerted to how fraud might be perpetrated and concealed based on the general and client-specific knowledge of key members of the audit team and the expertise of the more experienced members of the team. This brainstorming session also reinforces the concept that the detection of a material misstatement in the financial statements caused by fraud is an essential element of an audit.

During this stage of planning the audit, AU § 316.15 states the auditor should set "aside any prior beliefs the audit team members may have that management is honest and has integrity." The emphasis at this stage is on the issuer's vulnerability to fraud, if management and employees were inclined to perpetrate it,¹⁰ and not solely on the likelihood that fraud has occurred. To be most effective, this stage of planning the audit, including an audit team's brainstorming discussion, should occur during the early stages of audit planning so that auditors can consider the issuer's vulnerability to fraud when developing an overall strategy for the expected scope and conduct of the audit. To most effectively identify fraud risk factors, an audit team's brainstorming session should involve key members of the audit team, including, for example, information technology ("IT"), tax, and other specialists, when they are key members of the audit engagement team.¹¹

Despite the importance of this planning stage to an effective audit, PCAOB inspection teams have noted instances of failures to comply with this aspect of the standard. In particular, PCAOB inspectors have (1) identified audits in which the audit team was unable to demonstrate that brainstorming sessions were held; (2) identified audits in which the audit teams' brainstorming sessions occurred after planning and after substantive fieldwork had begun; and (3) identified audits in which key members of the audit team did not attend the brainstorming sessions.

To appropriately discharge the auditor's responsibility with respect to the detection of a material misstatement caused by fraud, the auditor should make inquiries of the audit committee, management, and others about their knowledge of alleged or suspected fraud and fraud risks within the organization.¹² In some engagements, however, inspection teams have found no evidence in the audit documentation that the auditor made required inquiries of the audit committee, management, or others about their knowledge of fraud and fraud risks.

Auditor's Response to Fraud Risk Factors

Auditors respond to the assessment of the risks of material misstatement due to fraud by using a combination of overall and specific responses.¹³ The auditor

⁹ See AU § 316.14.

¹⁰ See AU § 316.15.

¹¹ See AU § 316.17.

¹² See AU § 316.20–27.

¹³ See AU § 316.48.

should evaluate whether the fraud risk assessment can be linked to individual accounts or classes of transactions and related assertions.¹⁴ Linking in this manner assists the auditor in designing the appropriate audit procedures.¹⁵ An overall response involves a general consideration of how the audit is to be conducted and involves procedures such as modifying the assignment of personnel and the extent of supervision and incorporating an element of unpredictability into the selection of auditing procedures to be performed.¹⁶ For specifically identified risks of material misstatement due to fraud, such as significant related-party transactions not in the ordinary course of business, the auditor generally responds by changing the nature, timing, and/or extent of auditing procedures.¹⁷

PCAOB inspection teams have observed instances of auditors failing to respond appropriately to identified fraud risk factors. Inspection teams also observed instances in which auditors examined transactions warranting further fraud risk consideration, but for which there was no evidence that the auditors had considered any associated fraud risk factors.

Financial Statement Misstatements

When the auditor's procedures identify misstatements in the financial statements, the auditor should document the nature and effect of the misstatements¹⁸ and consider whether the misstatements might be indicative of fraud.¹⁹ The auditor's evaluation of misstatements may influence the auditor's conclusion about the materiality of those misstatements.²⁰ Qualitative considerations related to indications of fraud may mean that misstatements of relatively small amounts are material.²¹ Although intent might be difficult to ascertain, that difficulty does not relieve the auditor of the responsibility to consider whether misstatements might be indicative of fraud.²² In addition, the auditor's ongoing assessment of the risk of material misstatement due to fraud should take into account, among other things, any last-minute adjustments significantly affecting financial results.²³

PCAOB inspectors noted instances in which auditors failed to properly calculate planning materiality and/or the threshold for posting proposed audit adjustments to a summary schedule. As a result, certain uncorrected misstatements were not evaluated, or were not evaluated appropriately, both individually and in the aggregate, with other misstatements because the summary schedule was incomplete. The inspection teams also observed that some auditors did not fulfill their responsibility to investigate identified departures from generally accepted accounting principles to determine whether such departures were indicative of fraud.

In addition, PCAOB inspectors noted instances in which auditors did not post all proposed audit adjustments in excess of the posting threshold to the summary

¹⁴ See AU § 316.38.

¹⁵ Ibid.

¹⁶ See AU § 316.50.

¹⁷ See AU § 316.52.

¹⁸ See paragraph .40 of AU §312, *Audit Risk and Materiality in Conducting an Audit*.

¹⁹ See AU § 316.75.

²⁰ Ibid.

²¹ See AU § 316.74–.75.

²² See AU § 316.05–.12.

²³ See AU § 316.68.

schedule, thus rendering the summary incomplete. Inspectors also noted instances in which auditors had netted the effects of known misstatements that individually met the posting threshold. The net effect of those particular misstatements was lower than the posting threshold for the summary of unadjusted differences. As a result, those misstatements were improperly excluded from the evaluation of potential misstatements. Furthermore, inspection teams observed that some auditors did not adequately scrutinize late adjustments, significantly affecting financial results, that were proposed by management and that partially or completely offset adjustments previously proposed by the auditors.

Risk of Management Override of Controls

AU § 316.08 recognizes that "[m]anagement has a unique ability to perpetrate fraud because it frequently is in a position to directly or indirectly manipulate accounting records and to present fraudulent financial information. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively." To address the risk of management override of controls, AU § 316 requires an auditor to perform certain procedures, such as the examination of journal entries and other adjustments for evidence of possible material misstatements due to fraud²⁴ and the review of accounting estimates for biases that similarly could result in material misstatements due to fraud.²⁵

PCAOB inspection teams noted instances in which it did not appear that the auditor had performed adequate procedures with respect to evaluating the risk of management override of controls. More specifically, in some instances it did not appear that the auditor had appropriately addressed the risk of management override of controls with respect to journal entries and accounting estimates.

Journal Entries

Management has often used journal entries to perpetrate or conceal fraudulent financial reporting by recording inappropriate or unauthorized amounts in the accounting records, including computer records, or by making adjustments directly to draft financial statements in post-closing or consolidating entries. Accordingly, auditors should understand the company's financial reporting process and the controls over journal entries and evaluate these areas.²⁶

To identify, select, and test specific entries and other adjustments and to determine the appropriate method of examining the underlying support for these entries, auditors should consider several important issues, for example:

- Fraud risk factors that might help identify specific classes of journal entries for testing, such as entries made by unauthorized personnel or personnel who do not ordinarily enter journal entries, or entries that lack detailed explanations or other supporting documentation,
- The characteristics of fraudulent entries, including entries made at unusual times, such as nights, weekends, or holidays, and entries made to intercompany or suspense accounts, and

²⁴ See AU § 316.58.

²⁵ See AU § 316.63.

²⁶ See AU § 316.58a.

- Nonstandard journal entries that might not be subjected to the same level of internal control as recurring journal entries, for instance, entries at the close of quarterly and annual reporting periods and those that are part of the post-closing process.²⁷

PCAOB inspection teams identified certain audit engagements in which auditors performed tests of journal entries, but failed to demonstrate that they had appropriately assessed the completeness and integrity of the population of journal entries obtained from the issuer. The inspection teams also noted instances in which there was no evidence in the audit documentation, and no persuasive other evidence, that an appropriate examination and evaluation of journal entries was performed. In addition, inspection teams noted the exclusion of journal entries with lower dollar amounts from the examination. Setting the scope in such a manner fails to appropriately address the risk of fraud occurring as a result of the frequent use of low-dollar entries.

In reviewing journal entries, auditors should obtain an understanding of the financial reporting process related to the initiation, recording, and processing of journal entries;²⁸ the procedures used to record recurring and nonrecurring adjustments; and the controls over journal entries and similar adjustments. Auditors might need to use IT specialists and computer-assisted audit techniques to assist them in this process to ensure the integrity and completeness of the population of journal entries and to assist in the selection of journal entries for testing.²⁹

Accounting Estimates

Fraudulent financial reporting often is accomplished through intentional misstatement of accounting estimates.³⁰ Financial frauds have been committed by management intentionally biasing assumptions and judgments used to estimate account balances. In certain cases, management also has used significant or unusual accounting estimates to intentionally distort results of operations by, for example, failing to recognize losses due to the impairment of assets or intentionally overstating estimates in one period so that the estimates can be reversed in future periods to manage earnings in those periods. Such accounting estimates include allowances for bad debts, accruals for merger-related expenses in connection with business combinations, and so-called restructuring reserves.

Auditors, in complying with AU § 316, should consider the possibility of management bias in developing estimates by considering whether the differences between the estimates best supported by the audit evidence and the estimates included in the financial statements indicate a possible management bias.³¹ For example, if each individual accounting estimate included in the financial statements was reasonable and, at the same time, the effect of the difference between each management estimate and the estimate best supported by the audit evidence was to increase income, the auditor should reconsider the estimates taken as a whole.³² Moreover, auditors should perform a retrospective

²⁷ See AU § 316.61.

²⁸ See AU § 316.58–.59 and .61.

²⁹ See AU § 316.61.

³⁰ See AU § 316.63.

³¹ *Ibid.*

³² See AU § 312.36.

review of significant accounting estimates reflected in the prior year's financial statements to determine whether management's judgments and assumptions relating to estimates indicate a possible bias on the part of management.³³ If the auditor identifies a possible bias, he or she should evaluate whether the circumstances producing such a bias represent a risk of material misstatement due to fraud.³⁴

PCAOB inspection teams observed that some auditors have failed to test, or failed to document their testing of, management's assumptions and other aspects of issuers' accounting estimates. The inspection teams also noted that some auditors failed to assess, or failed to include in their audit documentation evidence that they had assessed, whether the overstatement or understatement of accounting estimates indicated a bias in management's estimates that could result in material misstatements due to fraud.

Other Areas to Improve Fraud Detection

Improvement in auditors' performance in the areas described below also may better position auditors to detect possible misstatements due to fraud.³⁵

Analytical Procedures

Although analytical procedures alone are not well-suited for detecting fraud,³⁶ they can be an effective diagnostic tool, depending on the reliability of the data used to develop the expected results. For example, auditors can use analytical procedures on information that management is less able or less likely to manipulate, such as operating statistics maintained by operating personnel or audited information.

PCAOB inspection teams have noted numerous deficiencies in auditors' performance of analytical procedures that were intended to be substantive analytical procedures. These deficiencies include the failure to test the underlying data used in the analytical procedures as well as the failure to disaggregate the data in order to improve the precision of the analytical procedures when such disaggregation was appropriate. In addition, inspection teams noted that, when the analytical procedures were intended to be substantive tests, some auditors failed to establish expectations, establish thresholds for identifying significant differences, or investigate differences from the expectations that were greater than the established thresholds. Moreover, some auditors failed to obtain corroboration of management's explanations for differences in excess of the established thresholds.

³³ See AU § 316.64.

³⁴ See AU § 316.65.

³⁵ Each of the areas described in this section has significant relevance to aspects of an audit other than an auditor's responsibilities with respect to fraud. The discussion of any inspection observations in this section should not be understood to mean that any observed deficiencies in these areas have been addressed with the particular firm specifically in relation to detection of fraud. These matters are included in this report because appropriate attention to these areas may play a role in helping the auditor detect material misstatements caused by fraud.

³⁶ See paragraph .09 of AU §329, *Analytical Procedures*, as amended by the *Conforming Amendments to PCAOB Interim Standards Resulting From the Adoption of PCAOB Auditing Standard No. 2, "An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements."*

Confirmation Process

AU § 316.41 states that auditors ordinarily should presume that revenue recognition is a fraud risk, thus requiring the auditor to respond with appropriate audit procedures. Numerous financial frauds have been perpetrated by management through premature or fictitious revenue recognition schemes.

The recognition of fictitious revenue often results in complementary false and uncollectible receivables. Historically, one of the most widely used substantive tests for determining the existence of receivables and similar assets and, perhaps, for detecting revenue-related fraud as a result, has been direct communication by the auditor with the issuer's customers and others. That audit procedure is based on the premise that audit evidence obtained from third parties will provide the auditor with higher quality audit evidence than is typically available from within the entity.³⁷

PCAOB auditing standards permit the use of either positive or negative confirmation requests.³⁸ With positive confirmation requests, audit evidence is obtained when the auditor receives completed confirmations from the issuer's customers or other intended recipients³⁹ or, in the absence of such responses, when the auditor performs alternative procedures, such as the examination of shipping documents and cash receipts.⁴⁰ (Recipients of negative confirmations are requested to respond only if they disagree with the stated information.) The interim auditing standards caution auditors to use negative confirmations only when certain conditions are present, one of which is that the combined assessed level of inherent and control risk is low.⁴¹ When auditors do not request confirmation of accounts receivable or do not receive responses to positive confirmation requests, they should apply alternative procedures to obtain the evidence necessary to reduce audit risk to an acceptably low level.

PCAOB inspection teams have identified instances in which auditors who had not requested confirmations of account balances or had not received responses to positive confirmation requests either failed to obtain, or failed to include evidence in their audit documentation that they had obtained, sufficient other evidence regarding the existence of accounts receivable balances.

Roll-Forward of Interim Substantive Testing

Auditors usually perform some of their audit work as of an interim date. Interim audit procedures may include confirmation of accounts receivable and observation of physical inventories. PCAOB auditing standards allow auditors to apply substantive tests to the details of asset or liability accounts as of an interim date if additional substantive tests can be designed to cover the remaining period to provide a reasonable basis for extending the audit conclusions at the interim date to the balance sheet date.⁴²

³⁷ See paragraph .34 of AU §330, *The Confirmation Process*.

³⁸ See AU § 330.17.

³⁹ See AU § 330.18.

⁴⁰ See AU § 330.31–.32.

⁴¹ See AU § 330.20.

⁴² See paragraph .03 of AU §313, *Substantive Tests Prior to the Balance Sheet Date*.

Interim audit work creates a somewhat higher risk that the auditor will not detect fraud because management may record fraudulent transactions in this roll-forward period, believing that the auditors will be less likely to detect them. The auditing standards caution auditors that such interim audit procedures potentially increase the risk that misstatements that exist at the balance sheet date will not be detected by the auditor. Furthermore, audit risk tends to increase as the period from the interim date to the balance-sheet date is lengthened.⁴³

Therefore, in determining audit procedures to be performed from the interim date to the balance-sheet date, auditors should consider the following factors: the length of the period between the interim and balance-sheet dates; any changes in controls; the nature and volume of transactions during this period; the comparability of the items comprising the account balance at the interim and balance-sheet dates; and any misstatements detected as a result of the interim procedures.⁴⁴

PCAOB inspection teams have observed that some auditors failed to perform, or failed to include evidence in their audit documentation that they had performed, adequate substantive roll-forward procedures to cover the activity from the interim date to the balance sheet date.

Review of Interim Financial Information

Financial frauds, including revenue and expense recognition schemes, often originate with the manipulation of quarterly earnings. The SEC requires the auditor to review the issuer's interim financial information before the company files its quarterly report on Form 10-Q or Form 10-QSB with the SEC for each of the first three quarters of the company's fiscal year. In addition, certain issuers, pursuant to item 302(a) of Regulation S-K, are required to include selected quarterly financial data in their annual (and certain other) filings with the SEC. Thus, a review of a company's interim financial information is required for the fourth quarter for those issuers, even though the company does not file a report on Form 10-Q or Form 10-QSB for that quarter. PCAOB inspection teams observed, in some instances, that auditors had failed to perform, or failed to include evidence in their audit documentation that they had performed, sufficient procedures with respect to the review of fourth-quarter financial information for those issuers that were required to disclose selected quarterly financial data.

* * *

The particular inspection observations described in this report gave rise to quality control concerns that were communicated to the firms at which the deficiencies were identified. By law, those quality control criticisms are not made public with respect to any particular firm if the firm addresses the criticism to the Board's satisfaction within 12 months after the issuance of the inspection report on the firm.⁴⁵ No later than the conclusion of this 12-month period, a firm that seeks to keep such criticisms nonpublic must provide the Board with explanation and evidence, which the Board evaluates, concerning how the firm

⁴³ Ibid.

⁴⁴ See AU § 313.04–.07.

⁴⁵ See Section 104(g)(2) of the Sarbanes-Oxley Act of 2002.

has addressed the criticisms.⁴⁶ To date, the Board's initial experience with the remediation process has been very positive;⁴⁷ the Board will continue to monitor the firms' progress in this important area.

⁴⁶ See generally, PCAOB Release 104-2006-077 (March 21, 2006), *The Process for Board Determinations Regarding Firms' Efforts to Address Quality Control Criticisms In Inspection Reports*.

PCAOB Release No. 2007-005A

Auditing Standard No. 5, An Audit of Internal Control Over Financial Reporting That Is Integrated With An Audit of Financial Statements, and Related Independence Rule and Conforming Amendments

PCAOB Release No. 2007-005A
June 12, 2007

PCAOB Rulemaking
Docket Matter No. 021

Summary

After public comment, the Public Company Accounting Oversight Board is adopting Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, as well as an independence rule and conforming amendments to the Board's auditing standards.

Board Contact

Sharon Virag, Associate Chief Auditor (202/207-9164)

* * * * *

1. Introduction

In 2002, Congress passed the Sarbanes-Oxley Act (the "Act"), which, among other things, established new provisions related to internal control over financial reporting. Section 404 of the Act requires company management to assess and report on the effectiveness of the company's internal control. It also requires a company's independent auditor, registered with the Public Company Accounting Oversight Board ("PCAOB" or "Board"), to attest to management's disclosures regarding the effectiveness of its internal control. As directed by Sections 103 and 404 of the Act, the Board established a standard to govern the newly required audit by adopting Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements* ("Auditing Standard No. 2").¹ The Securities and Exchange Commission ("Commission" or "SEC") approved Auditing Standard No. 2 on June 17, 2004.²

¹ See PCAOB Release No. 2004-001 (March 9, 2004).

² See Securities Exchange Act Release No. 49884 (June 17, 2004).

Since Auditing Standard No. 2 became effective, the Board has closely monitored the progress registered firms have made in implementing its requirements. The PCAOB's monitoring has included gathering information during inspections of registered public accounting firms; participating, along with the SEC, in two roundtable discussions with representatives of issuers, auditors, investor groups, and others; meeting with its Standing Advisory Group; receiving feedback from participants in the Board's Forums on Auditing in the Small Business Environment; and reviewing academic, government, and other reports and studies.

As a result of this monitoring, two basic propositions emerged.³ First, the audit of internal control over financial reporting has produced significant benefits, including an enhanced focus on corporate governance and controls and higher quality financial reporting. Second, these benefits have come at a significant cost. Costs have been greater than expected and, at times, the related effort has appeared greater than necessary to conduct an effective audit of internal control over financial reporting.

As part of a four-point plan to improve implementation of the internal control requirements, the Board determined to amend Auditing Standard No. 2.⁴ On December 19, 2006, the Board proposed for comment a new standard on auditing internal control, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, that would replace Auditing Standard No. 2. The Board also proposed a related auditing standard, *Considering and Using the Work of Others in an Audit*, an independence rule relating to the auditor's provision of internal control-related non-audit services, and conforming amendments to its auditing standards.⁵

The Board issued these proposals with the primary objectives of focusing auditors on the most important matters in the audit of internal control over financial reporting and eliminating procedures that the Board believes are unnecessary to an effective audit of internal control. The proposals were designed to both increase the likelihood that material weaknesses in companies' internal control will be found before they cause material misstatement of the financial statements and steer the auditor away from procedures that are not necessary to achieve the intended benefits. The Board also sought to make the internal control audit more clearly scalable for smaller and less complex public companies and to make the text of the standard easier to understand. In formulating these proposals, the Board re-evaluated every significant aspect of Auditing Standard No. 2.

The Board received 175 comment letters on its proposals. The Board also discussed the proposals with its Standing Advisory Group on February 22, 2007.⁶ A large majority of commenters were generally supportive of the Board's proposals, particularly the top-down, risk-based approach and focus on the most

³ See Proposed Auditing Standard: *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements and Related Other Proposals*, PCAOB Release No. 2006-007 (Dec. 19, 2006).

⁴ See PCAOB Press Release, "Board Announces Four-Point Plan to Improve Implementation of Internal Control Reporting Requirements" (May 17, 2006). The other aspects of the plan are: (1) reinforcing auditor efficiency through PCAOB inspections; (2) developing or facilitating development of implementation guidance for auditors of smaller public companies; and (3) continuing PCAOB Forums on Auditing in the Small Business Environment.

⁵ Proposed Auditing Standard: *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements and Related Other Proposals*, PCAOB Release No. 2006-007 (Dec. 19, 2006).

⁶ A transcript of the portion of the meeting that related to the proposals and an archived web cast of the entire meeting are available on the Board's Web site at http://www.pcaobus.org/Standards/Standing_Advisory_Group/Meetings/2007/0222/SAG_Transcript.pdf.

important matters. Based on the comments received, the Board believes that the proposal achieves, in large part, the objectives the Board set out when deciding to amend Auditing Standard No. 2. Many commenters also offered suggestions to improve the final standard, which the Board has carefully analyzed.

In considering the comments received and formulating a final standard, the Board closely coordinated its work with the SEC, which proposed guidance for management on evaluating internal control at the same time that the Board issued its proposals.⁷ In addition to its role in implementing Section 404(a) of the Act, the SEC must approve new PCAOB auditing standards before they can become effective.⁸ On April 4, 2007, the Commission held a public meeting to discuss the Board's proposals and the coordination of those proposals with the Commission's proposed management guidance. At the meeting, the SEC staff provided the Commission its analysis of the public comments on the PCAOB's proposal and the proposed management guidance. The Commission endorsed the recommendations of its staff and directed its staff to focus its remaining work in four areas:

- "Aligning the PCAOB's new auditing standard ... with the SEC's proposed new management guidance under Section 404, particularly with regard to prescriptive requirements, definitions, and terms";
- "Scaling the 404 audit to account for the particular facts and circumstances of companies, particularly smaller companies";
- "Encouraging auditors to use professional judgment in the 404 process, particularly in using risk-assessment"; and
- "Following a principles-based approach to determining when and to what extent the auditor can use the work of others."⁹

After careful consideration of the comments it received and the input from the SEC, the Board has refined its proposals to provide additional clarity and further help auditors to focus on the most important matters. The Board has decided to adopt the revised standard on auditing internal control as Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* ("Auditing Standard No. 5"), to supersede Auditing Standard No. 2. The Board has also decided to adopt the independence rule and conforming amendments to the auditing standards.¹⁰

2. Notable Areas of Change in the Final Standard

As stated above, the Board believes that the changes made to the proposal reflect refinements, rather than significant shifts in approach. This section describes the areas of change to the proposals that are most notable. Appendix 4 contains additional discussion of comments received on the proposals and the Board's response.

⁷ See Securities Exchange Act Release No. 54976 (Dec. 20, 2006).

⁸ See Section 107 of the Act.

⁹ See SEC Press Release, "SEC Commissioners Endorse Improved Sarbanes-Oxley Implementation To Ease Smaller Company Burdens, Focusing Effort On 'What Truly Matters'" (Apr. 4, 2007).

¹⁰ As discussed below, the Board has determined not to adopt the proposed auditing standard on considering and using the work of others.

A. Alignment with management guidance

On December 20, 2006, the SEC issued proposed guidance to help management evaluate internal control for purposes of its annual assessment. In formulating a new standard on auditing internal control, the Board sought to describe an audit process that would be coordinated with management's evaluation process. Many commenters suggested, however, that the SEC's management guidance and the Board's standard should be more closely aligned.

After considering the comments in this area, the Board has decided to make changes that will improve the coordination between the SEC's management guidance and the Board's standard. In doing so, the Board has been mindful of the inherent differences in the roles of management and the auditor. Management's daily involvement with its internal control system provides it with knowledge and information that may influence its judgments about how best to evaluate internal control and the sufficiency of the evidence it needs for its annual assessment. Management also should be able to rely on self-assessment and, more generally, the monitoring component of internal control, provided the monitoring component is properly designed and operates effectively.

The auditor is required to provide an independent opinion on the effectiveness of the company's internal control over financial reporting. The auditor does not have the familiarity with the company's controls that management has and does not interact with or observe these controls with the same frequency as management. Therefore, the auditor cannot obtain sufficient evidence to support an opinion on the effectiveness of internal control based solely on observation of or interaction with the company's controls. Rather, the auditor needs to perform procedures such as inquiry, observation, and inspection of documents, or walk-throughs, which consist of a combination of those procedures, in order to fully understand and identify the likely sources of potential misstatements, while management might be aware of those risk areas on an on-going basis.

The Board believes, however, that the general concepts necessary to an understanding of internal control should be described in the same way in the Board's standard and in the SEC's guidance. Accordingly, the Board has decided to use the same definition of material weakness in its standard that the SEC uses in its final management guidance and related rules. In addition, the Board is adopting the definition of significant deficiencies that the SEC has proposed. The final standard and final management guidance also describe the same indicators of a material weakness. In addition, as described more fully below, the final standard on auditing internal control uses the term "entity-level controls" instead of "company-level controls," which was used in the proposed standard, in order to use the same term as the SEC uses in its final management guidance.¹¹ Auditing Standard No. 5's discussion of the effect of these controls is also consistent with the discussion of the same topic in the SEC's final guidance.

B. The top-down approach

The proposed standard on auditing internal control was structured around the top-down approach to identifying the most important controls to test. This approach follows the same principles that apply to the financial statement audit—the auditor determines the areas of focus through the identification of significant accounts and disclosures and relevant assertions. Under the proposed

¹¹ These terms were used interchangeably in the proposed standard and SEC's proposed management guidance and, for these purposes, they mean the same thing. See Securities Exchange Act Release No. 54976 (Dec. 20, 2006), at 12 fn. 29.

standard, the auditor would specifically identify major classes of transactions and significant processes before identifying the controls to test.

In response to comments about the level of detail in the requirements of the proposed standard, the Board has reconsidered whether the final standard should include the identification of major classes of transactions and significant processes as a specifically required step in the top-down approach. As a practical matter, the auditor will generally need to understand the company's processes to appropriately identify the correct controls to test. The Board believes, however, that specific requirements directing the auditor how to obtain that understanding are unnecessary and could contribute to a "checklist approach" to compliance, particularly for auditors who have a long-standing familiarity with the company. Accordingly, the Board has removed the requirements to identify major classes of transactions and significant processes from the final standard. While this should allow auditors to apply more professional judgment as they work through the top-down approach, the end point is the same as in the proposed standard—the requirement to test those controls that address the assessed risk of misstatement to each relevant assertion.¹²

C. Emphasis on fraud controls

The proposed standard on auditing internal control discussed fraud controls and the auditor's procedures related to these controls among the testing concepts included near the end of the standard. Commenters suggested that the placement of the discussion, or the lack of specificity regarding the controls that should be deemed fraud controls, failed to properly emphasize these controls or provide auditors with sufficient direction on how to test fraud controls. In response, the Board has made several changes in the final standard.

First, the discussion of fraud risk and anti-fraud controls has been moved closer to the beginning of the standard to emphasize to auditors the relative importance of these matters in assessing risk throughout the top-down approach.¹³ Incorporating the auditor's fraud risk assessment—required in the financial statement audit—into the auditor's planning process for the audit of internal control should promote audit quality as well as better integration. While internal control cannot provide absolute assurance that fraud will be prevented or detected, these controls should help to reduce instances of fraud, and, therefore, a concerted focus on fraud controls in the internal control audit should enhance investor protection. Second, management fraud has also been identified in the final standard as an area of higher risk; accordingly, the auditor should focus more of his or her attention on this area.¹⁴ Finally, the standard, as adopted, provides additional guidance on the types of controls that might address fraud risk.¹⁵

D. Entity-level controls

The proposed standard on auditing internal control emphasized entity-level controls because of their importance both to the auditor's ability to appropriately tailor the audit through a top-down approach—specifically by identifying and testing the most important controls—and to effective internal control.

¹² See paragraph 21.

¹³ See paragraphs 14 and 15.

¹⁴ See paragraph 11.

¹⁵ See paragraph 14.

Additionally, the proposed standard emphasized that these controls might, depending on the circumstances, allow the auditor to reduce the testing of controls at the process level. Commenters suggested that the proposed standard did not provide enough direction on how entity-level controls can significantly reduce testing, and some suggested that controls that operate at the level of precision necessary to do so are uncommon. Many commenters suggested incorporating in the final standard the discussion of direct versus indirect entity-level controls that was included in the SEC's proposed management guidance.

The Board continues to believe that entity-level controls, depending on how they are designed and operate, can reduce the testing of other controls related to a relevant assertion. This is either because the entity-level control sufficiently addresses the risk related to the relevant assertion, or because the entity-level controls provide some assurance so that the testing of other controls related to that assertion can be reduced. In response to comments and in order to clarify these concepts, the Board included in the final standard a discussion of three broad categories of entity-level controls, which vary in nature and precision, along with an explanation of how each category might have a different effect on the performance of tests of other controls.¹⁶

The final standard explains that some controls, such as certain control environment controls, have an important, but indirect effect, on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.

The final standard explains that other entity-level controls may not operate at the level of precision necessary to eliminate the need for testing of other controls, but can reduce the required level of testing of other controls, sometimes substantially. This is because the auditor obtains some of the supporting evidence related to a control from an entity-level control and the remaining necessary evidence from the testing of the control at the process level. Controls that monitor the operation of other controls are the best example of these types of controls. These monitoring controls help provide assurance that the controls that address a particular risk are effective and, therefore, they can provide some evidence about the effectiveness of those lower-level controls, reducing the testing of those controls that otherwise would be necessary.

Lastly, the final standard explains that some entity-level controls might operate at a level of precision that, without the need for other controls, sufficiently addresses the risk of misstatement to a relevant assertion. If a control sufficiently addresses the risk in this manner, the auditor does not need to test other controls related to that risk.

E. Walkthroughs

The proposed standard on auditing internal control would have required auditors to perform a walkthrough of each significant process each year. This proposed requirement represented a change from Auditing Standard No. 2, which required a walkthrough of each major class of transactions within a significant process. Commenters were split on the question of whether the re-calibration from major class of transactions to significant process in the proposed standard would result in a reduction of effort. Some issuers and auditors suggested that

¹⁶ See paragraph 23. The Board believes that expertise of auditors and companies in the area of entity-level controls will continue to evolve. For example, the Committee of Sponsoring Organizations of the Treadway Commission has begun a project on the monitoring component of internal control that may provide some guidance in this area.

walkthroughs are already being performed on significant processes, while other issuers and auditors commented that this proposed requirement would make a difference. A few commenters suggested that a walkthrough of each significant process was insufficient and would negatively affect audit quality, but many others stated that walkthroughs should not be required at all.

In evaluating these comments, the Board focused principally on the objectives it believes are achieved through a properly performed walkthrough. The Board firmly believes that those objectives should be met for the auditor to verify that he or she has a sufficient understanding of the points within the processes where misstatements could occur and to properly identify the controls to test.¹⁷ Procedures that fulfill those objectives also play an important role in the evaluation of the effectiveness of the design of the controls. The Board believes that, in some instances, the requirement to perform a walkthrough may have overshadowed the objectives it was meant to achieve. This may have resulted in some walkthroughs being performed to meet the requirement but failing to achieve the intended purpose. The final standard, therefore, focuses specifically on achieving certain important objectives, and the performance requirement is based on fulfilling those objectives as they relate to the understanding of likely sources of misstatement and the selection of controls to test.¹⁸ While a walkthrough will frequently be the best way of attaining these goals, the auditor's focus should be on the objectives, not on the mechanics of the walkthrough. In some cases, other procedures may be equally or more effective means of achieving them.

F. Evaluation and communication of deficiencies

The proposed standard on auditing internal control required the auditor to evaluate the severity of identified control deficiencies to determine whether they are significant deficiencies or material weaknesses. It then required the auditor to communicate, in writing, to management and the audit committee all significant deficiencies and material weaknesses identified during the audit. The proposed standard defined "significant deficiency" as "a control deficiency, or combination of control deficiencies, such that there is a reasonable possibility that a significant misstatement of the company's annual or interim financial statements will not be prevented or detected." The term "significant misstatement" was defined, in turn, to mean "a misstatement that is less than material yet important enough to merit attention by those responsible for oversight of the company's financial reporting."

Commenters generally supported the proposed definition of the term "significant misstatement," though some were concerned that it was too subjective. Other commenters questioned whether the standard should include a definition of significant deficiency and a requirement to communicate significant deficiencies to the audit committee. At least one commenter suggested that the term be removed from the standard.

After considering these comments, the Board has determined to make changes to the definition of significant deficiency and related requirements.¹⁹ The Board

¹⁷ See paragraph 34, which describes these objectives.

¹⁸ See paragraph 34.

¹⁹ The Board also made minor changes to the definition of material weakness in order to use the same definition in the SEC's management guidance and related rule. In the final standard, material weakness is defined as "a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis."

continues to believe that the standard should require auditors to provide relevant information about important control deficiencies—even those less severe than a material weakness—to management and to the audit committee. The final standard, therefore, requires the auditor to consider and communicate any identified significant deficiencies to the audit committee. In order to emphasize that the auditor need not scope the audit to identify all significant deficiencies, however, the Board placed these provisions in the section of the final standard that describes communications requirements.²⁰

The relatively minor changes that the Board made to the definition of significant deficiency are also intended to focus the auditor on the communication requirement and away from scoping issues. The final definition is based on the proposed definition of "significant misstatement," which commenters generally supported, and is aligned with the SEC's proposed definition of the same term. Under the final standard, a significant deficiency is "a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness yet important enough to merit attention by those responsible for oversight of the company's financial reporting."

G. Scaling the audit

The proposed standard on auditing internal control indicated that a company's size and complexity are important considerations and that the procedures an auditor should perform depend upon where along the size and complexity continuum a company falls. The proposed standard included a section on scaling the audit for smaller, less complex companies and would have required auditors to evaluate and document the effect of the company's size and complexity on the audit. This documentation requirement applied to audits of companies of all sizes. The proposed standard also included a list of the attributes of smaller, less complex companies and a description of how the auditor might tailor his or her procedures when these attributes are present. In general, commenters were supportive of the proposed standard's general approach to scalability, but had several recommendations for change.

Some commenters suggested that scalability should not be covered as a stand-alone discussion applicable only to smaller companies and that other companies, regardless of size, might have areas that are less complex. The Board agrees that the direction on scaling will be most effective if it is a natural extension of the risk-based approach and applicable to all companies. Consequently, the Board shortened the separate section on "scaling the audit," and incorporated a discussion of scaling concepts, similar to what was proposed, throughout the final standard. Specifically, notes to relevant paragraphs describe how to tailor the audit to the particular circumstances of a smaller, less complex company or unit. The Board also retained the list of attributes of smaller, less complex companies and acknowledged that, even within larger companies, some business units or processes may be less complex than others. Discussion of these attributes has been incorporated in the section on the auditor's planning procedures in the final standard.²¹ As described in the proposing release, the

²⁰ See paragraph 80. The final standard also includes the proposed requirement for the auditor to communicate, in writing, to management, all deficiencies in internal control identified during the audit and inform the audit committee when such a communication has been made, and the proposed requirement to inform, when applicable, the board of directors of the auditor's conclusion that the audit committee's oversight is ineffective. See paragraphs 79 and 81. Some commenters believed that the requirement to communicate all identified deficiencies to management would result in an unnecessary administrative exercise. The Board continues to believe, however, that auditors should provide information about identified control deficiencies to management.

²¹ See paragraph 9.

provisions on scalability in the final standard will form the basis for guidance on auditing internal control in smaller companies to be issued this year.

Several commenters, mostly auditors, suggested that the performance requirements that applied to all companies, including large, complex companies, would lead to unnecessary and costly documentation requirements. These commenters were particularly concerned about the requirement to document the effects of size and complexity on all aspects of the audit, even if a particular engagement could not be tailored as a result of these factors. After considering these comments, the Board agreed that this documentation requirement is not necessary to promote audit quality and, therefore, has not included it in the final standard.

H. Use of the work of others in an integrated audit

At the time the Board proposed Auditing Standard No. 5 for public comment, the Board also proposed an auditing standard entitled *Considering and Using the Work of Others in an Audit* that would have superseded the Board's interim standard AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements* ("AU sec. 322"), and replaced the direction on using the work of others in an audit of internal control in Auditing Standard No. 2. As discussed in the proposing release, the Board had several objectives in proposing this standard. The first was to better integrate the financial statement audit and the audit of internal control by having only one framework for using the work of others in both audits. Additionally, the Board wanted to encourage auditors to use the work of others to a greater extent when the work is performed by sufficiently competent and objective persons. Among other things, under the proposed standard, auditors would have been able to use the work of sufficiently competent and objective company personnel—not just internal auditors—and third parties working under the direction of management or the audit committee for purposes of the financial statement audit as well as the audit of internal control.

The Board received numerous comments on the proposed standard on using the work of others. Commenters generally indicated support for a single framework regarding the auditor's use of the work of others in an integrated audit. Some, however, suggested retaining existing AU sec. 322 as the basis for that single framework. They expressed the view that the objective of removing barriers to integration and using the work of others to the fullest extent appropriate could be achieved by retaining AU sec. 322 and going forward with the proposed removal of the "principal evidence" provision. At the same time, some other commenters suggested that the proposed standard did not go far enough in encouraging auditors to use the work of others.

After considering these comments, the Board continues to believe that a single framework for the auditor's use of the work of others is preferable to separate frameworks for the audit of internal control and the audit of financial statements. The factors used to determine whether and to what extent it is appropriate to use the work of others should be the same for both audits. At the same time, the Board agreed with those commenters who suggested that better integration of the audits could be achieved without replacing the existing auditing standard. The Board therefore has decided to retain AU sec. 322 for both audits and incorporate language into Auditing Standard No. 5 that establishes these integration concepts rather than adopt the proposed standard on considering and using the work of others.

Consistent with the proposal, however, Auditing Standard No. 5 allows the auditor to use the work of others to obtain evidence about the design and operating effectiveness of controls and eliminates the principal evidence provision. Recognizing that issuers might employ personnel other than internal auditors to perform activities relevant to management's assessment of internal control over financial reporting, the final standard allows the auditor to use the work of company personnel other than internal auditors, as well as third parties working under the direction of management or the audit committee.²²

In line with the overall risk-based approach to the audit of internal control over financial reporting, the extent to which the auditor may use the work of others depends, in part, on the risk associated with the control being tested. As the risk decreases, so does the need for the auditor to perform the work him or herself. The impact of the work of others on the auditor's work also depends on the relationship between the risk and the competence and objectivity of those who performed the work. As the risk decreases, the necessary level of competence and objectivity decreases as well.²³ Likewise, in higher risk areas (for example, controls that address specific fraud risks), use of the work of others would be limited, if it could be used at all.

Finally, the Board understands that some of the work performed by others for the purposes of management's assessment of internal controls can be relevant to the audit of financial statements. Therefore, in an integrated audit, the final standard allows the auditor to use the work of these sufficiently competent and objective others—not just internal auditors—to obtain evidence supporting the auditor's assessment of control risk for purposes of the audit of financial statements.²⁴ The Board believes that this provision will promote better integration of the audit of internal control with the audit of financial statements.

3. Rule 3525—Audit Committee Pre-Approval of Non-Audit Services Related to Internal Control Over Financial Reporting

The Board also proposed a new rule related to the auditor's responsibilities when seeking audit committee pre-approval of internal control related non-audit services. As proposed, the rule required a registered public accounting firm that seeks pre-approval of an issuer audit client's audit committee to perform internal control-related non-audit services that are not otherwise prohibited by the Act or the rules of the SEC or the Board to: describe, in writing, to the audit committee the scope of the proposed service; discuss with the audit committee the potential effects of the proposed service on the firm's independence; and document the substance of the firm's discussion with the audit committee. These requirements parallel the auditor's responsibility in seeking audit committee pre-approval to perform tax services for an audit client under PCAOB Rule 3524. Most commenters were supportive of the rule as proposed, though some offered suggestions about what should be included in the required communication. After considering the comments on the proposed rule, the Board has adopted it without change.

²² See paragraph 17.

²³ See paragraph 18.

²⁴ See paragraph 17.

4. Conforming Amendments

As part of the proposal issued for public comment, the Board proposed amendments to certain of the Board's other auditing standards. Only one comment letter specifically addressed the proposed amendments. That letter expressed support for the amendments and suggested a few additional amendments that might be necessary. The Board has considered this comment and added these additional amendments, as well as others, as necessary based on the final standard.

5. Effective Date

The proposing release solicited commenters' feedback on how the Board could structure the effective date of the final requirements so as to best minimize disruption to ongoing audits, but make greater flexibility available to auditors as early as possible. Most commenters on this topic suggested making the final standard on auditing internal control effective as soon as possible in order to be available for 2007 audits.

The Board agrees that the improvements in Auditing Standard No. 5 should be available as soon as possible. Accordingly, the Board has determined that Auditing Standard No. 5, Rule 3525, and the conforming amendments will be effective, subject to approval by the SEC, for audits of fiscal years ending on or after November 15, 2007. Earlier adoption is permitted, however, at any point after SEC approval. Auditors who elect to comply with Auditing Standard No. 5 after SEC approval but before its effective date must also comply, at the same time, with Rule 3525 and other PCAOB standards as amended by this release.

Auditing Standard No. 2 will be superseded when Auditing Standard No. 5 becomes effective. Auditors who do not elect to comply with Auditing Standard No. 5 before that date (but after SEC approval) must continue to comply with Auditing Standard No. 2 until it is superseded. Such auditors should, however, apply the definition of "material weakness" contained in Auditing Standard No. 5, rather than the one contained in Auditing Standard No. 2. The SEC has adopted a rule to define the term "material weakness," and the definition in Auditing Standard No. 5 parallels the new SEC definition.

APPENDIX 1: Auditing Standard No. 5—An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements

APPENDIX 2: Rule 3525—Audit Committee Pre-approval of Non-audit Services Related to Internal Control Over Financial Reporting

APPENDIX 3: Conforming Amendments to PCAOB Auditing Standards

APPENDIX 4: Additional Discussion of Comments and the Board's Response

Appendix 1

Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated With An Audit of Financial Statements*

Introduction

1. This standard establishes requirements and provides direction that applies when an auditor is engaged to perform an audit of **management's assessment**¹ of the effectiveness of **internal control over financial reporting** ("the audit of internal control over financial reporting") that is integrated with an audit of the financial statements.²

2. Effective internal control over financial reporting provides reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes.³ If one or more **material weaknesses** exist, the company's internal control over financial reporting cannot be considered effective.⁴

3. The auditor's objective in an audit of internal control over financial reporting is to express an opinion on the effectiveness of the company's internal control over financial reporting. Because a company's internal control cannot be considered effective if one or more material weaknesses exist, to form a basis for expressing an opinion, the auditor must plan and perform the audit to obtain competent evidence that is sufficient to obtain reasonable assurance⁵ about whether material weaknesses exist as of the date specified in management's assessment. A material weakness in internal control over financial reporting may exist even when financial statements are not materially misstated.

4. The general standards⁶ are applicable to an audit of internal control over financial reporting. Those standards require technical training and proficiency as an auditor, independence, and the exercise of due professional care, including professional skepticism. This standard establishes the fieldwork and reporting standards applicable to an audit of internal control over financial reporting.

5. The auditor should use the same suitable, recognized control framework to perform his or her audit of internal control over financial reporting as management uses for its annual evaluation of the effectiveness of the company's internal control over financial reporting.⁷

¹ Terms defined in Appendix A, *Definitions*, are set in **boldface type** the first time they appear.

² This auditing standard supersedes Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with An Audit of Financial Statements*, and is the standard on attestation engagements referred to in Section 404(b) of the Act. It also is the standard referred to in Section 103(a)(2)(A)(iii) of the Act.

³ See Securities Exchange Act Rules 13a-15(f) and 15d-15(f), 17 C.F.R. §§ 240.13a-15(f) and 240.15d-15(f); Paragraph A5.

⁴ See Item 308 of Regulation S-K, 17 C.F.R. § 229.308.

⁵ See AU section 230, *Due Professional Care in the Performance of Work*, for further discussion of the concept of reasonable assurance in an audit.

⁶ See AU section 150, *Generally Accepted Auditing Standards*.

⁷ See Securities Exchange Act Rules 13a-15(c) and 15d-15(c), 17 C.F.R. §§ 240.13a-15(c) and 240.15d-15(c). SEC rules require management to base its evaluation of the effectiveness of the

(continued)

Integrating the Audits

6. The audit of internal control over financial reporting should be integrated with the audit of the financial statements. The objectives of the audits are not identical, however, and the auditor must plan and perform the work to achieve the objectives of both audits.

7. In an integrated audit of internal control over financial reporting and the financial statements, the auditor should design his or her testing of controls to accomplish the objectives of both audits simultaneously—

- To obtain sufficient evidence to support the auditor's opinion on internal control over financial reporting as of year-end, and
- To obtain sufficient evidence to support the auditor's control risk assessments for purposes of the audit of financial statements.

8. Obtaining sufficient evidence to support control risk assessments of low for purposes of the financial statement audit ordinarily allows the auditor to reduce the amount of audit work that otherwise would have been necessary to opine on the financial statements. (See Appendix B for additional direction on integration.)

Note: In some circumstances, particularly in some audits of smaller and less complex companies, the auditor might choose not to assess control risk as low for purposes of the audit of the financial statements. In such circumstances, the auditor's tests of the operating effectiveness of controls would be performed principally for the purpose of supporting his or her opinion on whether the company's internal control over financial reporting is effective as of year-end. The results of the auditor's financial statement auditing procedures also should inform his or her risk assessments in determining the testing necessary to conclude on the effectiveness of a control.

Planning the Audit

9. The auditor should properly plan the audit of internal control over financial reporting and properly supervise any assistants. When planning an integrated audit, the auditor should evaluate whether the following matters are important to the company's financial statements and internal control over financial reporting and, if so, how they will affect the auditor's procedures—

- Knowledge of the company's internal control over financial reporting obtained during other engagements performed by the auditor;
- Matters affecting the industry in which the company operates, such as financial reporting practices, economic conditions, laws and regulations, and technological changes;
- Matters relating to the company's business, including its organization, operating characteristics, and capital structure;

(footnote continued)

company's internal control over financial reporting on a suitable, recognized control framework (also known as control criteria) established by a body or group that followed due-process procedures, including the broad distribution of the framework for public comment. For example, the report of the Committee of Sponsoring Organizations of the Treadway Commission (known as the COSO report) provides such a framework, as does the report published by the Financial Reporting Council, Internal Control Revised Guidance for Directors on the Combined Code, October 2005 (known as the Turnbull Report).

- The extent of recent changes, if any, in the company, its operations, or its internal control over financial reporting;
- The auditor's preliminary judgments about materiality, risk, and other factors relating to the determination of material weaknesses;
- Control deficiencies previously communicated to the audit committee⁸ or management;
- Legal or regulatory matters of which the company is aware;
- The type and extent of available evidence related to the effectiveness of the company's internal control over financial reporting;
- Preliminary judgments about the effectiveness of internal control over financial reporting;
- Public information about the company relevant to the evaluation of the likelihood of material financial statement misstatements and the effectiveness of the company's internal control over financial reporting;
- Knowledge about risks related to the company evaluated as part of the auditor's client acceptance and retention evaluation; and
- The relative complexity of the company's operations.

Note: Many smaller companies have less complex operations. Additionally, some larger, complex companies may have less complex units or processes. Factors that might indicate less complex operations include: fewer business lines; less complex business processes and financial reporting systems; more centralized accounting functions; extensive involvement by senior management in the day-to-day activities of the business; and fewer levels of management, each with a wide span of control.

Role of Risk Assessment

10. Risk assessment underlies the entire audit process described by this standard, including the determination of **significant accounts and disclosures** and **relevant assertions**, the selection of controls to test, and the determination of the evidence necessary for a given control.

11. A direct relationship exists between the degree of risk that a material weakness could exist in a particular area of the company's internal control over financial reporting and the amount of audit attention that should be devoted to that area. In addition, the risk that a company's internal control over financial reporting will fail to prevent or detect misstatement caused by fraud usually is higher than the risk of failure to prevent or detect error. The auditor should focus more of his or her attention on the areas of highest risk. On the other hand, it is not necessary to test controls that, even if deficient, would not present a reasonable possibility of material misstatement to the financial statements.

12. The complexity of the organization, business unit, or process, will play an important role in the auditor's risk assessment and the determination of the necessary procedures.

⁸ If no audit committee exists, all references to the audit committee in this standard apply to the entire board of directors of the company. See 15 U.S.C. §§ 78c(a)58 and 7201(a)(3).

Scaling the Audit

13. The size and complexity of the company, its business processes, and business units, may affect the way in which the company achieves many of its **control objectives**. The size and complexity of the company also might affect the risks of misstatement and the controls necessary to address those risks. Scaling is most effective as a natural extension of the risk-based approach and applicable to the audits of all companies. Accordingly, a smaller, less complex company, or even a larger, less complex company might achieve its control objectives differently than a more complex company.⁹

Addressing the Risk of Fraud

14. When planning and performing the audit of internal control over financial reporting, the auditor should take into account the results of his or her fraud risk assessment.¹⁰ As part of identifying and testing entity-level controls, as discussed beginning at paragraph 22, and selecting other controls to test, as discussed beginning at paragraph 39, the auditor should evaluate whether the company's controls sufficiently address identified risks of material misstatement due to fraud and controls intended to address the risk of management override of other controls. Controls that might address these risks include—

- Controls over significant, unusual transactions, particularly those that result in late or unusual journal entries;
- Controls over journal entries and adjustments made in the period-end financial reporting process;
- Controls over related party transactions;
- Controls related to significant management estimates; and
- Controls that mitigate incentives for, and pressures on, management to falsify or inappropriately manage financial results.

15. If the auditor identifies deficiencies in controls designed to prevent or detect fraud during the audit of internal control over financial reporting, the auditor should take into account those deficiencies when developing his or her response to risks of material misstatement during the financial statement audit, as provided in AU section 316.44 and .45.

Using the Work of Others

16. The auditor should evaluate the extent to which he or she will use the work of others to reduce the work the auditor might otherwise perform himself or herself. AU section 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, applies in an integrated audit of the financial statements and internal control over financial reporting.

17. For purposes of the audit of internal control, however, the auditor may use the work performed by, or receive direct assistance from, internal auditors, company personnel (in addition to internal auditors), and third parties working

⁹ The SEC Advisory Committee on Smaller Public Companies considered a company's size with respect to compliance with the internal control reporting provisions of the Act. See Advisory Committee on Smaller Public Companies to the United States Securities and Exchange Commission, Final Report, at p. 5 (April 23, 2006).

¹⁰ See paragraphs .19–.42 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, regarding identifying risks that may result in material misstatement due to fraud.

under the direction of management or the audit committee that provides evidence about the effectiveness of internal control over financial reporting. In an integrated audit of internal control over financial reporting and the financial statements, the auditor also may use this work to obtain evidence supporting the auditor's assessment of control risk for purposes of the audit of the financial statements.

18. The auditor should assess the competence and objectivity of the persons whose work the auditor plans to use to determine the extent to which the auditor may use their work. The higher the degree of competence and objectivity, the greater use the auditor may make of the work. The auditor should apply paragraphs .09 – .11 of AU section 322 to assess the competence and objectivity of internal auditors. The auditor should apply the principles underlying those paragraphs to assess the competence and objectivity of persons other than internal auditors whose work the auditor plans to use.

Note: For purposes of using the work of others, competence means the attainment and maintenance of a level of understanding and knowledge that enables that person to perform ably the tasks assigned to them, and objectivity means the ability to perform those tasks impartially and with intellectual honesty. To assess competence, the auditor should evaluate factors about the person's qualifications and ability to perform the work the auditor plans to use. To assess objectivity, the auditor should evaluate whether factors are present that either inhibit or promote a person's ability to perform with the necessary degree of objectivity the work the auditor plans to use.

Note: The auditor should not use the work of persons who have a low degree of objectivity, regardless of their level of competence. Likewise, the auditor should not use the work of persons who have a low level of competence regardless of their degree of objectivity. Personnel whose core function is to serve as a testing or compliance authority at the company, such as internal auditors, normally are expected to have greater competence and objectivity in performing the type of work that will be useful to the auditor.

19. The extent to which the auditor may use the work of others in an audit of internal control also depends on the risk associated with the control being tested. As the risk associated with a control increases, the need for the auditor to perform his or her own work on the control increases.

Materiality

20. In planning the audit of internal control over financial reporting, the auditor should use the same materiality considerations he or she would use in planning the audit of the company's annual financial statements.¹¹

Using a Top-Down Approach

21. The auditor should use a top-down approach to the audit of internal control over financial reporting to select the controls to test. A top-down approach begins at the financial statement level and with the auditor's understanding of the overall risks to internal control over financial reporting. The auditor then focuses on entity-level controls and works down to significant accounts and disclosures and their relevant assertions. This approach directs the

¹¹ See AU section 312, *Audit Risk and Materiality in Conducting an Audit*, which provides additional explanation of materiality.

auditor's attention to accounts, disclosures, and assertions that present a reasonable possibility of material misstatement to the **financial statements and related disclosures**. The auditor then verifies his or her understanding of the risks in the company's processes and selects for testing those controls that sufficiently address the assessed risk of misstatement to each relevant assertion.

Note: The top-down approach describes the auditor's sequential thought process in identifying risks and the controls to test, not necessarily the order in which the auditor will perform the auditing procedures.

Identifying Entity-Level Controls

22. The auditor must test those entity-level controls that are important to the auditor's conclusion about whether the company has effective internal control over financial reporting. The auditor's evaluation of entity-level controls can result in increasing or decreasing the testing that the auditor otherwise would have performed on other controls.

23. Entity-level controls vary in nature and precision—

- Some entity-level controls, such as certain control environment controls, have an important, but indirect, effect on the likelihood that a misstatement will be detected or prevented on a timely basis. These controls might affect the other controls the auditor selects for testing and the nature, timing, and extent of procedures the auditor performs on other controls.
- Some entity-level controls monitor the effectiveness of other controls. Such controls might be designed to identify possible breakdowns in lower-level controls, but not at a level of precision that would, by themselves, sufficiently address the assessed risk that misstatements to a relevant assertion will be prevented or detected on a timely basis. These controls, when operating effectively, might allow the auditor to reduce the testing of other controls.
- Some entity-level controls might be designed to operate at a level of precision that would adequately prevent or detect on a timely basis misstatements to one or more relevant assertions. If an entity-level control sufficiently addresses the assessed risk of misstatement, the auditor need not test additional controls relating to that risk.

24. Entity-level controls include—

- Controls related to the control environment;
- Controls over management override;

Note: Controls over management override are important to effective internal control over financial reporting for all companies, and may be particularly important at smaller companies because of the increased involvement of senior management in performing controls and in the period-end financial reporting process. For smaller companies, the controls that address the risk of management override might be different from those at a larger company. For example, a smaller company might rely on more detailed oversight by the audit committee that focuses on the risk of management override.

- The company's risk assessment process;
- Centralized processing and controls, including shared service environments;

- Controls to monitor results of operations;
- Controls to monitor other controls, including activities of the internal audit function, the audit committee, and self-assessment programs;
- Controls over the period-end financial reporting process; and
- Policies that address significant business control and risk management practices.

25. *Control Environment.* Because of its importance to effective internal control over financial reporting, the auditor must evaluate the control environment at the company. As part of evaluating the control environment, the auditor should assess—

- Whether management's philosophy and operating style promote effective internal control over financial reporting;
- Whether sound integrity and ethical values, particularly of top management, are developed and understood; and
- Whether the Board or audit committee understands and exercises oversight responsibility over financial reporting and internal control.

26. *Period-end Financial Reporting Process.* Because of its importance to financial reporting and to the auditor's opinions on internal control over financial reporting and the financial statements, the auditor must evaluate the period-end financial reporting process. The period-end financial reporting process includes the following—

- Procedures used to enter transaction totals into the general ledger;
- Procedures related to the selection and application of accounting policies;
- Procedures used to initiate, authorize, record, and process journal entries in the general ledger;
- Procedures used to record recurring and nonrecurring adjustments to the annual and quarterly financial statements; and
- Procedures for preparing annual and quarterly financial statements and related disclosures.

Note: Because the annual period-end financial reporting process normally occurs after the "as-of" date of management's assessment, those controls usually cannot be tested until after the as-of date.

27. As part of evaluating the period-end financial reporting process, the auditor should assess—

- Inputs, procedures performed, and outputs of the processes the company uses to produce its annual and quarterly financial statements;
- The extent of information technology ("IT") involvement in the period-end financial reporting process;
- Who participates from management;
- The locations involved in the period-end financial reporting process;

- The types of adjusting and consolidating entries; and
- The nature and extent of the oversight of the process by management, the board of directors, and the audit committee.

Note: The auditor should obtain sufficient evidence of the effectiveness of those quarterly controls that are important to determining whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion as of the date of management's assessment. However, the auditor is not required to obtain sufficient evidence for each quarter individually.

Identifying Significant Accounts and Disclosures and Their Relevant Assertions

28. The auditor should identify significant accounts and disclosures and their relevant assertions. Relevant assertions are those financial statement assertions that have a reasonable possibility of containing a misstatement that would cause the financial statements to be materially misstated. The financial statement assertions include¹²—

- Existence or occurrence
- Completeness
- Valuation or allocation
- Rights and obligations
- Presentation and disclosure

Note: The auditor may base his or her work on assertions that differ from those in this standard if the auditor has selected and tested controls over the pertinent risks in each significant account and disclosure that have a reasonable possibility of containing misstatements that would cause the financial statements to be materially misstated.

29. To identify significant accounts and disclosures and their relevant assertions, the auditor should evaluate the qualitative and quantitative risk factors related to the financial statement line items and disclosures. Risk factors relevant to the identification of significant accounts and disclosures and their relevant assertions include—

- Size and composition of the account;
- Susceptibility to misstatement due to errors or fraud;
- Volume of activity, complexity, and homogeneity of the individual transactions processed through the account or reflected in the disclosure;
- Nature of the account or disclosure;
- Accounting and reporting complexities associated with the account or disclosure;
- Exposure to losses in the account;
- Possibility of significant contingent liabilities arising from the activities reflected in the account or disclosure;

¹² See AU section 326, *Evidential Matter*, which provides additional information on financial statement assertions.

- Existence of related party transactions in the account; and
- Changes from the prior period in account or disclosure characteristics.

30. As part of identifying significant accounts and disclosures and their relevant assertions, the auditor also should determine the likely sources of potential misstatements that would cause the financial statements to be materially misstated. The auditor might determine the likely sources of potential misstatements by asking himself or herself "what could go wrong?" within a given significant account or disclosure.

31. The risk factors that the auditor should evaluate in the identification of significant accounts and disclosures and their relevant assertions are the same in the audit of internal control over financial reporting as in the audit of the financial statements; accordingly, significant accounts and disclosures and their relevant assertions are the same for both audits.

Note: In the financial statement audit, the auditor might perform substantive auditing procedures on financial statement accounts, disclosures and assertions that are not determined to be significant accounts and disclosures and relevant assertions.¹³

32. The components of a potential significant account or disclosure might be subject to significantly differing risks. If so, different controls might be necessary to adequately address those risks.

33. When a company has multiple locations or business units, the auditor should identify significant accounts and disclosures and their relevant assertions based on the consolidated financial statements. Having made those determinations, the auditor should then apply the direction in Appendix B for multiple locations scoping decisions.

Understanding Likely Sources of Misstatement

34. To further understand the likely sources of potential misstatements, and as a part of selecting the controls to test, the auditor should achieve the following objectives—

- Understand the flow of transactions related to the relevant assertions, including how these transactions are initiated, authorized, processed, and recorded;
- Verify that the auditor has identified the points within the company's processes at which a misstatement—including a misstatement due to fraud—could arise that, individually or in combination with other misstatements, would be material;
- Identify the controls that management has implemented to address these potential misstatements; and
- Identify the controls that management has implemented over the prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could result in a material misstatement of the financial statements.

¹³ This is because his or her assessment of the risk that undetected misstatement would cause the financial statements to be materially misstated is unacceptably high (see AU sec. 312.39 for further discussion about undetected misstatement) or as a means of introducing unpredictability in the procedures performed (see paragraph 61 and AU sec. 316.50 for further discussion about predictability of auditing procedures).

35. Because of the degree of judgment required, the auditor should either perform the procedures that achieve the objectives in paragraph 34 himself or herself or supervise the work of others who provide direct assistance to the auditor, as described in AU section 322.

36. The auditor also should understand how IT affects the company's flow of transactions. The auditor should apply paragraphs .16 – .20, .30 – .32, and .77 – .79, of AU section 319, *Consideration of Internal Control in a Financial Statement Audit*, which discuss the effect of information technology on internal control over financial reporting and the risks to assess.

Note: The identification of risks and controls within IT is not a separate evaluation. Instead, it is an integral part of the top-down approach used to identify significant accounts and disclosures and their relevant assertions, and the controls to test, as well as to assess risk and allocate audit effort as described by this standard.

37. *Performing Walkthroughs.* Performing walkthroughs will frequently be the most effective way of achieving the objectives in paragraph 34. In performing a walkthrough, the auditor follows a transaction from origination through the company's processes, including information systems, until it is reflected in the company's financial records, using the same documents and information technology that company personnel use. Walkthrough procedures usually include a combination of inquiry, observation, inspection of relevant documentation, and re-performance of controls.

38. In performing a walkthrough, at the points at which important processing procedures occur, the auditor questions the company's personnel about their understanding of what is required by the company's prescribed procedures and controls. These probing questions, combined with the other walkthrough procedures, allow the auditor to gain a sufficient understanding of the process and to be able to identify important points at which a necessary control is missing or not designed effectively. Additionally, probing questions that go beyond a narrow focus on the single transaction used as the basis for the walkthrough allow the auditor to gain an understanding of the different types of significant transactions handled by the process.

Selecting Controls to Test

39. The auditor should test those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion.

40. There might be more than one control that addresses the assessed risk of misstatement to a particular relevant assertion; conversely, one control might address the assessed risk of misstatement to more than one relevant assertion. It is neither necessary to test all controls related to a relevant assertion nor necessary to test redundant controls, unless redundancy is itself a control objective.

41. The decision as to whether a control should be selected for testing depends on which controls, individually or in combination, sufficiently address the assessed risk of misstatement to a given relevant assertion rather than on how the control is labeled (e.g., entity-level control, transaction-level control, control activity, monitoring control, **preventive control**, **detective control**).

Testing Controls

Testing Design Effectiveness

42. The auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatements in the financial statements.

Note: A smaller, less complex company might achieve its control objectives in a different manner from a larger, more complex organization. For example, a smaller, less complex company might have fewer employees in the accounting function, limiting opportunities to segregate duties and leading the company to implement alternative controls to achieve its control objectives. In such circumstances, the auditor should evaluate whether those alternative controls are effective.

43. Procedures the auditor performs to test design effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant documentation. Walkthroughs that include these procedures ordinarily are sufficient to evaluate design effectiveness.

Testing Operating Effectiveness

44. The auditor should test the operating effectiveness of a control by determining whether the control is operating as designed and whether the person performing the control possesses the necessary authority and competence to perform the control effectively.

Note: In some situations, particularly in smaller companies, a company might use a third party to provide assistance with certain financial reporting functions. When assessing the competence of personnel responsible for a company's financial reporting and associated controls, the auditor may take into account the combined competence of company personnel and other parties that assist with functions related to financial reporting.

45. Procedures the auditor performs to test operating effectiveness include a mix of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control.

Relationship of Risk to the Evidence to be Obtained

46. For each control selected for testing, the evidence necessary to persuade the auditor that the control is effective depends upon the risk associated with the control. The risk associated with a control consists of the risk that the control might not be effective and, if not effective, the risk that a material weakness would result. As the risk associated with the control being tested increases, the evidence that the auditor should obtain also increases.

Note: Although the auditor must obtain evidence about the effectiveness of controls for each relevant assertion, the auditor is not responsible for obtaining sufficient evidence to support an opinion about the effectiveness of each individual control. Rather, the auditor's objective is to express an opinion on the company's internal control over financial reporting overall. This allows the auditor to vary the evidence obtained regarding the effectiveness of individual

controls selected for testing based on the risk associated with the individual control.

47. Factors that affect the risk associated with a control include—

- The nature and materiality of misstatements that the control is intended to prevent or detect;
- The inherent risk associated with the related account(s) and assertion(s);
- Whether there have been changes in the volume or nature of transactions that might adversely affect control design or operating effectiveness;
- Whether the account has a history of errors;
- The effectiveness of entity-level controls, especially controls that monitor other controls;
- The nature of the control and the frequency with which it operates;
- The degree to which the control relies on the effectiveness of other controls (e.g., the control environment or information technology general controls);
- The competence of the personnel who perform the control or monitor its performance and whether there have been changes in key personnel who perform the control or monitor its performance;
- Whether the control relies on performance by an individual or is automated (i.e., an automated control would generally be expected to be lower risk if relevant information technology general controls are effective); and

Note: A less complex company or business unit with simple business processes and centralized accounting operations might have relatively simple information systems that make greater use of off-the-shelf packaged software without modification. In the areas in which off-the-shelf software is used, the auditor's testing of information technology controls might focus on the application controls built into the pre-packaged software that management relies on to achieve its control objectives and the IT general controls that are important to the effective operation of those application controls.

- The complexity of the control and the significance of the judgments that must be made in connection with its operation.

Note: Generally, a conclusion that a control is not operating effectively can be supported by less evidence than is necessary to support a conclusion that a control is operating effectively.

48. When the auditor identifies deviations from the company's controls, he or she should determine the effect of the deviations on his or her assessment of the risk associated with the control being tested and the evidence to be obtained, as well as on the operating effectiveness of the control.

Note: Because effective internal control over financial reporting cannot, and does not, provide absolute assurance of achieving the company's control objectives, an individual control does not necessarily have to operate without any deviation to be considered effective.

49. The evidence provided by the auditor's tests of the effectiveness of controls depends upon the mix of the nature, timing, and extent of the auditor's

procedures. Further, for an individual control, different combinations of the nature, timing, and extent of testing may provide sufficient evidence in relation to the risk associated with the control.

Note: Walkthroughs usually consist of a combination of inquiry of appropriate personnel, observation of the company's operations, inspection of relevant documentation, and re-performance of the control and might provide sufficient evidence of operating effectiveness, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthrough and the results of those procedures.

50. *Nature of Tests of Controls.* Some types of tests, by their nature, produce greater evidence of the effectiveness of controls than other tests. The following tests that the auditor might perform are presented in order of the evidence that they ordinarily would produce, from least to most: inquiry, observation, inspection of relevant documentation, and re-performance of a control.

Note: Inquiry alone does not provide sufficient evidence to support a conclusion about the effectiveness of a control.

51. The nature of the tests of effectiveness that will provide competent evidence depends, to a large degree, on the nature of the control to be tested, including whether the operation of the control results in documentary evidence of its operation. Documentary evidence of the operation of some controls, such as management's philosophy and operating style, might not exist.

Note: A smaller, less complex company or unit might have less formal documentation regarding the operation of its controls. In those situations, testing controls through inquiry combined with other procedures, such as observation of activities, inspection of less formal documentation, or re-performance of certain controls, might provide sufficient evidence about whether the control is effective.

52. *Timing of Tests of Controls.* Testing controls over a greater period of time provides more evidence of the effectiveness of controls than testing over a shorter period of time. Further, testing performed closer to the date of management's assessment provides more evidence than testing performed earlier in the year. The auditor should balance performing the tests of controls closer to the as-of date with the need to test controls over a sufficient period of time to obtain sufficient evidence of operating effectiveness.

53. Prior to the date specified in management's assessment, management might implement changes to the company's controls to make them more effective or efficient or to address control deficiencies. If the auditor determines that the new controls achieve the related objectives of the control criteria and have been in effect for a sufficient period to permit the auditor to assess their design and operating effectiveness by performing tests of controls, he or she will not need to test the design and operating effectiveness of the superseded controls for purposes of expressing an opinion on internal control over financial reporting. If the operating effectiveness of the superseded controls is important to the auditor's control risk assessment, the auditor should test the design and operating effectiveness of those superseded controls, as appropriate. (See additional direction on integration beginning at paragraph B1.)

54. *Extent of Tests of Controls.* The more extensively a control is tested, the greater the evidence obtained from that test.

55. *Roll-Forward Procedures.* When the auditor reports on the effectiveness of controls as of a specific date and obtains evidence about the operating effectiveness of controls at an interim date, he or she should determine what

additional evidence concerning the operation of the controls for the remaining period is necessary.

56. The additional evidence that is necessary to update the results of testing from an interim date to the company's year-end depends on the following factors—

- The specific control tested prior to the as-of date, including the risks associated with the control and the nature of the control, and the results of those tests;
- The sufficiency of the evidence of effectiveness obtained at an interim date;
- The length of the remaining period; and
- The possibility that there have been any significant changes in internal control over financial reporting subsequent to the interim date.

Note: In some circumstances, such as when evaluation of the foregoing factors indicates a low risk that the controls are no longer effective during the roll-forward period, inquiry alone might be sufficient as a roll-forward procedure.

Special Considerations for Subsequent Years' Audits

57. In subsequent years' audits, the auditor should incorporate knowledge obtained during past audits he or she performed of the company's internal control over financial reporting into the decision-making process for determining the nature, timing, and extent of testing necessary. This decision-making process is described in paragraphs 46–56.

58. Factors that affect the risk associated with a control in subsequent years' audits include those in paragraph 47 and the following—

- The nature, timing, and extent of procedures performed in previous audits,
- The results of the previous years' testing of the control, and
- Whether there have been changes in the control or the process in which it operates since the previous audit.

59. After taking into account the risk factors identified in paragraphs 47 and 58, the additional information available in subsequent years' audits might permit the auditor to assess the risk as lower than in the initial year. This, in turn, might permit the auditor to reduce testing in subsequent years.

60. The auditor may also use a benchmarking strategy for automated application controls in subsequent years' audits. Benchmarking is described further beginning at paragraph B28.

61. In addition, the auditor should vary the nature, timing, and extent of testing of controls from year to year to introduce unpredictability into the testing and respond to changes in circumstances. For this reason, each year the auditor might test controls at a different interim period, increase or reduce the number and types of tests performed, or change the combination of procedures used.

Evaluating Identified Deficiencies

62. The auditor must evaluate the severity of each control **deficiency** that comes to his or her attention to determine whether the deficiencies, individually or in combination, are material weaknesses as of the date of management's assessment. In planning and performing the audit, however, the auditor is not required to search for deficiencies that, individually or in combination, are less severe than a material weakness.

63. The severity of a deficiency depends on—

- Whether there is a reasonable possibility that the company's controls will fail to prevent or detect a misstatement of an account balance or disclosure; and
- The magnitude of the potential misstatement resulting from the deficiency or deficiencies.

64. The severity of a deficiency does not depend on whether a misstatement actually has occurred but rather on whether there is a reasonable possibility that the company's controls will fail to prevent or detect a misstatement.

65. Risk factors affect whether there is a reasonable possibility that a deficiency, or a combination of deficiencies, will result in a misstatement of an account balance or disclosure. The factors include, but are not limited to, the following—

- The nature of the financial statement accounts, disclosures, and assertions involved;
- The susceptibility of the related asset or liability to loss or fraud;
- The subjectivity, complexity, or extent of judgment required to determine the amount involved;
- The interaction or relationship of the control with other controls, including whether they are interdependent or redundant;
- The interaction of the deficiencies; and
- The possible future consequences of the deficiency.

Note: The evaluation of whether a control deficiency presents a reasonable possibility of misstatement can be made without quantifying the probability of occurrence as a specific percentage or range.

Note: Multiple control deficiencies that affect the same financial statement account balance or disclosure increase the likelihood of misstatement and may, in combination, constitute a material weakness, even though such deficiencies may individually be less severe. Therefore, the auditor should determine whether individual control deficiencies that affect the same significant account or disclosure, relevant assertion, or component of internal control collectively result in a material weakness.

66. Factors that affect the magnitude of the misstatement that might result from a deficiency or deficiencies in controls include, but are not limited to, the following—

- The financial statement amounts or total of transactions exposed to the deficiency; and

- The volume of activity in the account balance or class of transactions exposed to the deficiency that has occurred in the current period or that is expected in future periods.

67. In evaluating the magnitude of the potential misstatement, the maximum amount that an account balance or total of transactions can be overstated is generally the recorded amount, while understatements could be larger. Also, in many cases, the probability of a small misstatement will be greater than the probability of a large misstatement.

68. The auditor should evaluate the effect of compensating controls when determining whether a control deficiency or combination of deficiencies is a material weakness. To have a mitigating effect, the compensating control should operate at a level of precision that would prevent or detect a misstatement that could be material.

Indicators of Material Weaknesses

69. Indicators of material weaknesses in internal control over financial reporting include—

- Identification of fraud, whether or not material, on the part of senior management;¹⁴
- Restatement of previously issued financial statements to reflect the correction of a material misstatement;¹⁵
- Identification by the auditor of a material misstatement of financial statements in the current period in circumstances that indicate that the misstatement would not have been detected by the company's internal control over financial reporting; and
- Ineffective oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee.

70. When evaluating the severity of a deficiency, or combination of deficiencies, the auditor also should determine the level of detail and degree of assurance that would satisfy prudent officials in the conduct of their own affairs that they have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles. If the auditor determines that a deficiency, or combination of deficiencies, might prevent prudent officials in the conduct of their own affairs from concluding that they have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles, then the auditor should treat the deficiency, or combination of deficiencies, as an indicator of a material weakness.

¹⁴ For the purpose of this indicator, the term "senior management" includes the principal executive and financial officers signing the company's certifications as required under Section 302 of the Act as well as any other members of senior management who play a significant role in the company's financial reporting process.

¹⁵ See Financial Accounting Standards Board Statement No. 154, *Accounting Changes and Error Corrections*, regarding the correction of a misstatement.

Wrapping-Up

Forming an Opinion

71. The auditor should form an opinion on the effectiveness of internal control over financial reporting by evaluating evidence obtained from all sources, including the auditor's testing of controls, misstatements detected during the financial statement audit, and any identified control deficiencies.

Note: As part of this evaluation, the auditor should review reports issued during the year by internal audit (or similar functions) that address controls related to internal control over financial reporting and evaluate control deficiencies identified in those reports.

72. After forming an opinion on the effectiveness of the company's internal control over financial reporting, the auditor should evaluate the presentation of the elements that management is required, under the SEC's rules, to present in its annual report on internal control over financial reporting.¹⁶

73. If the auditor determines that any required elements of management's annual report on internal control over financial reporting are incomplete or improperly presented, the auditor should follow the direction in paragraph C2.

74. The auditor may form an opinion on the effectiveness of internal control over financial reporting only when there have been no restrictions on the scope of the auditor's work. A scope limitation requires the auditor to disclaim an opinion or withdraw from the engagement (see paragraphs C3–C7).

Obtaining Written Representations

75. In an audit of internal control over financial reporting, the auditor should obtain written representations from management—

- a.* Acknowledging management's responsibility for establishing and maintaining effective internal control over financial reporting;
- b.* Stating that management has performed an evaluation and made an assessment of the effectiveness of the company's internal control over financial reporting and specifying the control criteria;
- c.* Stating that management did not use the auditor's procedures performed during the audits of internal control over financial reporting or the financial statements as part of the basis for management's assessment of the effectiveness of internal control over financial reporting;
- d.* Stating management's conclusion, as set forth in its assessment, about the effectiveness of the company's internal control over financial reporting based on the control criteria as of a specified date;
- e.* Stating that management has disclosed to the auditor all deficiencies in the design or operation of internal control over financial reporting identified as part of management's evaluation, including separately disclosing to the auditor all such deficiencies that it believes to be significant deficiencies or material weaknesses in internal control over financial reporting;

¹⁶ See Item 308(a) of Regulations S-B and S-K, 17 C.F.R. §§ 228.308(a) and 229.308(a).

- f. Describing any fraud resulting in a material misstatement to the company's financial statements and any other fraud that does not result in a material misstatement to the company's financial statements but involves senior management or management or other employees who have a significant role in the company's internal control over financial reporting;
- g. Stating whether control deficiencies identified and communicated to the audit committee during previous engagements pursuant to paragraphs 78 and 80 have been resolved, and specifically identifying any that have not; and
- h. Stating whether there were, subsequent to the date being reported on, any changes in internal control over financial reporting or other factors that might significantly affect internal control over financial reporting, including any corrective actions taken by management with regard to significant deficiencies and material weaknesses.

76. The failure to obtain written representations from management, including management's refusal to furnish them, constitutes a limitation on the scope of the audit. As discussed further in paragraph C3, when the scope of the audit is limited, the auditor should either withdraw from the engagement or disclaim an opinion. Further, the auditor should evaluate the effects of management's refusal on his or her ability to rely on other representations, including those obtained in the audit of the company's financial statements.

77. AU section 333, *Management Representations*, explains matters such as who should sign the letter, the period to be covered by the letter, and when to obtain an updated letter.

Communicating Certain Matters

78. The auditor must communicate, in writing, to management and the audit committee all material weaknesses identified during the audit. The written communication should be made prior to the issuance of the auditor's report on internal control over financial reporting.

79. If the auditor concludes that the oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, the auditor must communicate that conclusion in writing to the board of directors.

80. The auditor also should consider whether there are any deficiencies, or combinations of deficiencies, that have been identified during the audit that are **significant deficiencies** and must communicate such deficiencies, in writing, to the audit committee.

81. The auditor also should communicate to management, in writing, all deficiencies in internal control over financial reporting (i.e., those deficiencies in internal control over financial reporting that are of a lesser magnitude than material weaknesses) identified during the audit and inform the audit committee when such a communication has been made. When making this communication, it is not necessary for the auditor to repeat information about such deficiencies that has been included in previously issued written communications, whether those communications were made by the auditor, internal auditors, or others within the organization.

82. The auditor is not required to perform procedures that are sufficient to identify all control deficiencies; rather, the auditor communicates deficiencies in internal control over financial reporting of which he or she is aware.

83. Because the audit of internal control over financial reporting does not provide the auditor with assurance that he or she has identified all deficiencies less severe than a material weakness, the auditor should not issue a report stating that no such deficiencies were noted during the audit.

84. When auditing internal control over financial reporting, the auditor may become aware of fraud or possible illegal acts. In such circumstances, the auditor must determine his or her responsibilities under AU section 316, *Consideration of Fraud in a Financial Statement Audit*, AU section 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.¹⁷

Reporting on Internal Control

85. The auditor's report on the audit of internal control over financial reporting must include the following elements¹⁸—

- a. A title that includes the word *independent*;
- b. A statement that management is responsible for maintaining effective internal control over financial reporting and for assessing the effectiveness of internal control over financial reporting;
- c. An identification of management's report on internal control;
- d. A statement that the auditor's responsibility is to express an opinion on the company's internal control over financial reporting based on his or her audit;
- e. A definition of internal control over financial reporting as stated in paragraph A5;
- f. A statement that the audit was conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States);
- g. A statement that the standards of the Public Company Accounting Oversight Board require that the auditor plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects;
- h. A statement that an audit includes obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as the auditor considered necessary in the circumstances;
- i. A statement that the auditor believes the audit provides a reasonable basis for his or her opinion;
- j. A paragraph stating that, because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become

¹⁷ See 15 U.S.C. § 78j-1.

¹⁸ See Appendix C, which provides direction on modifications to the auditor's report that are required in certain circumstances.

- inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate;
- k. The auditor's opinion on whether the company maintained, in all material respects, effective internal control over financial reporting as of the specified date, based on the control criteria;
 - l. The manual or printed signature of the auditor's firm;
 - m. The city and state (or city and country, in the case of non-U.S. auditors) from which the auditor's report has been issued; and
 - n. The date of the audit report.

Separate or Combined Reports

86. The auditor may choose to issue a combined report (i.e., one report containing both an opinion on the financial statements and an opinion on internal control over financial reporting) or separate reports on the company's financial statements and on internal control over financial reporting.

87. The following example combined report expressing an unqualified opinion on financial statements and an unqualified opinion on internal control over financial reporting illustrates the report elements described in this section.

Report of Independent Registered Public Accounting Firm

[Introductory paragraph]

We have audited the accompanying balance sheets of W Company as of December 31, 20X8 and 20X7, and the related statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 20X8. We also have audited W Company's internal control over financial reporting as of December 31, 20X8, based on [*Identify control criteria, for example, "criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."*]. W Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying [*title of management's report*]. Our responsibility is to express an opinion on these financial statements and an opinion on the company's internal control over financial reporting based on our audits.

[Scope paragraph]

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

[Definition paragraph]

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

[Inherent limitations paragraph]

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

[Opinion paragraph]

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of W Company as of December 31, 20X8 and 20X7, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 20X8 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, W Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20X8, based on *[Identify control criteria, for example, "criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)."]*.

[Signature]

[City and State or Country]

[Date]

88. If the auditor chooses to issue a separate report on internal control over financial reporting, he or she should add the following paragraph to the auditor's report on the financial statements—

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), W Company's internal control over financial reporting as of December 31, 20X8, based on *[identify control criteria]* and our report dated *[date of report, which should be the same as the date of the report on the financial statements]* expressed *[include nature of opinion]*.

The auditor also should add the following paragraph to the report on internal control over financial reporting—

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the *[identify financial statements]* of W Company and our report dated *[date of report, which should be the same*

as the date of the report on the effectiveness of internal control over financial reporting] expressed [include nature of opinion].

Report Date

89. The auditor should date the audit report no earlier than the date on which the auditor has obtained sufficient competent evidence to support the auditor's opinion. Because the auditor cannot audit internal control over financial reporting without also auditing the financial statements, the reports should be dated the same.

Material Weaknesses

90. Paragraphs 62–70 describe the evaluation of deficiencies. If there are deficiencies that, individually or in combination, result in one or more material weaknesses, the auditor must express an adverse opinion on the company's internal control over financial reporting, unless there is a restriction on the scope of the engagement.¹⁹

91. When expressing an adverse opinion on internal control over financial reporting because of a material weakness, the auditor's report must include—

- The definition of a material weakness, as provided in paragraph A7.
- A statement that a material weakness has been identified and an identification of the material weakness described in management's assessment.

Note: If the material weakness has not been included in management's assessment, the report should be modified to state that a material weakness has been identified but not included in management's assessment. Additionally, the auditor's report should include a description of the material weakness, which should provide the users of the audit report with specific information about the nature of the material weakness and its actual and potential effect on the presentation of the company's financial statements issued during the existence of the weakness. In this case, the auditor also should communicate in writing to the audit committee that the material weakness was not disclosed or identified as a material weakness in management's assessment. If the material weakness has been included in management's assessment but the auditor concludes that the disclosure of the material weakness is not fairly presented in all material respects, the auditor's report should describe this conclusion as well as the information necessary to fairly describe the material weakness.

92. The auditor should determine the effect his or her adverse opinion on internal control has on his or her opinion on the financial statements. Additionally, the auditor should disclose whether his or her opinion on the financial statements was affected by the adverse opinion on internal control over financial reporting.

Note: If the auditor issues a separate report on internal control over financial reporting in this circumstance, the disclosure required by this paragraph may be combined with the report language described in paragraphs 88 and 91. The

¹⁹ See paragraph C3 for direction when the scope of the engagement has been limited.

auditor may present the combined language either as a separate paragraph or as part of the paragraph that identifies the material weakness.

Subsequent Events

93. Changes in internal control over financial reporting or other factors that might significantly affect internal control over financial reporting might occur subsequent to the date as of which internal control over financial reporting is being audited but before the date of the auditor's report. The auditor should inquire of management whether there were any such changes or factors and obtain written representations from management relating to such matters, as described in paragraph 75*h*.

94. To obtain additional information about whether changes have occurred that might affect the effectiveness of the company's internal control over financial reporting and, therefore, the auditor's report, the auditor should inquire about and examine, for this subsequent period, the following—

- Relevant internal audit (or similar functions, such as loan review in a financial institution) reports issued during the subsequent period,
- Independent auditor reports (if other than the auditor's) of deficiencies in internal control,
- Regulatory agency reports on the company's internal control over financial reporting, and
- Information about the effectiveness of the company's internal control over financial reporting obtained through other engagements.

95. The auditor might inquire about and examine other documents for the subsequent period. Paragraphs .01–.09 of AU section 560, *Subsequent Events*, provide direction on subsequent events for a financial statement audit that also may be helpful to the auditor performing an audit of internal control over financial reporting.

96. If the auditor obtains knowledge about subsequent events that materially and adversely affect the effectiveness of the company's internal control over financial reporting as of the date specified in the assessment, the auditor should issue an adverse opinion on internal control over financial reporting (and follow the direction in paragraph C2 if management's assessment states that internal control over financial reporting is effective). If the auditor is unable to determine the effect of the subsequent event on the effectiveness of the company's internal control over financial reporting, the auditor should disclaim an opinion. As described in paragraph C13, the auditor should disclaim an opinion on management's disclosures about corrective actions taken by the company after the date of management's assessment, if any.

97. The auditor may obtain knowledge about subsequent events with respect to conditions that did not exist at the date specified in the assessment but arose subsequent to that date and before issuance of the auditor's report. If a subsequent event of this type has a material effect on the company's internal control over financial reporting, the auditor should include in his or her report an explanatory paragraph describing the event and its effects or directing the reader's attention to the event and its effects as disclosed in management's report.

98. After the issuance of the report on internal control over financial reporting, the auditor may become aware of conditions that existed at the report

date that might have affected the auditor's opinion had he or she been aware of them. The auditor's evaluation of such subsequent information is similar to the auditor's evaluation of information discovered subsequent to the date of the report on an audit of financial statements, as described in AU section 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*.

Appendix A

Definitions

A1. For purposes of this standard, the terms listed below are defined as follows—

A2. A **control objective** provides a specific target against which to evaluate the effectiveness of controls. A control objective for internal control over financial reporting generally relates to a relevant assertion and states a criterion for evaluating whether the company's control procedures in a specific area provide reasonable assurance that a misstatement or omission in that relevant assertion is prevented or detected by controls on a timely basis.

A3. A **deficiency** in internal control over financial reporting exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.

- A deficiency in *design* exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met.
- A deficiency in *operation* exists when a properly designed control does not operate as designed, or when the person performing the control does not possess the necessary authority or competence to perform the control effectively.

A4. **Financial statements and related disclosures** refers to a company's financial statements and notes to the financial statements as presented in accordance with generally accepted accounting principles ("GAAP"). References to financial statements and related disclosures do not extend to the preparation of management's discussion and analysis or other similar financial information presented outside a company's GAAP-basis financial statements and notes.

A5. **Internal control over financial reporting** is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP and includes those policies and procedures that—

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.¹

¹ See Securities Exchange Act Rules 13a-15(f) and 15d-15(f), 17 C.F.R. §§ 240.13a-15(f) and 240.15d-15(f).

Note: The auditor's procedures as part of either the audit of internal control over financial reporting or the audit of the financial statements are not part of a company's internal control over financial reporting.

Note: Internal control over financial reporting has inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements will not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

A6. **Management's assessment** is the assessment described in Item 308(a)(3) of Regulations S-B and S-K that is included in management's annual report on internal control over financial reporting.²

A7. A **material weakness** is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a **reasonable possibility** that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

Note: There is a **reasonable possibility** of an event, as used in this standard, when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in Financial Accounting Standards Board Statement No. 5, Accounting for Contingencies ("FAS 5").³

A8. Controls over financial reporting may be **preventive controls** or **detective controls**. Effective internal control over financial reporting often includes a combination of preventive and detective controls.

- Preventive controls have the objective of preventing errors or fraud that could result in a misstatement of the financial statements from occurring.
- Detective controls have the objective of detecting errors or fraud that has already occurred that could result in a misstatement of the financial statements.

A9. A **relevant assertion** is a financial statement assertion that has a reasonable possibility of containing a misstatement or misstatements that would cause the financial statements to be materially misstated. The determination of whether an assertion is a relevant assertion is based on inherent risk, without regard to the effect of controls.

A10. An account or disclosure is a **significant account or disclosure** if there is a reasonable possibility that the account or disclosure could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements, considering the risks of both overstatement and understatement. The determination of whether an account or disclosure is significant is based on inherent risk, without regard to the effect of controls.

² See 17 C.F.R. §§ 228.308(a)(3) and 229.308(a)(3).

³ See FAS 5, paragraph 3.

A11. A **significant deficiency** is a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

Appendix B

Special Topics

Integration of Audits

B1. *Tests of Controls in an Audit of Internal Control.* The objective of the tests of controls in an audit of internal control over financial reporting is to obtain evidence about the effectiveness of controls to support the auditor's opinion on the company's internal control over financial reporting. The auditor's opinion relates to the effectiveness of the company's internal control over financial reporting as of a *point in time* and *taken as a whole*.

B2. To express an opinion on internal control over financial reporting as of a point in time, the auditor should obtain evidence that internal control over financial reporting has operated effectively for a sufficient period of time, which may be less than the entire period (ordinarily one year) covered by the company's financial statements. To express an opinion on internal control over financial reporting taken as a whole, the auditor must obtain evidence about the effectiveness of selected controls over all relevant assertions. This requires that the auditor test the design and operating effectiveness of controls he or she ordinarily would not test if expressing an opinion only on the financial statements.

B3. When concluding on the effectiveness of internal control over financial reporting for purposes of expressing an opinion on internal control over financial reporting, the auditor should incorporate the results of any additional tests of controls performed to achieve the objective related to expressing an opinion on the financial statements, as discussed in the following section.

B4. *Tests of Controls in an Audit of Financial Statements.* To express an opinion on the financial statements, the auditor ordinarily performs tests of controls and substantive procedures. The objective of the tests of controls the auditor performs for this purpose is to assess control risk. To assess control risk for specific financial statement assertions at less than the maximum, the auditor is required to obtain evidence that the relevant controls operated effectively during the *entire period* upon which the auditor plans to place reliance on those controls. However, the auditor is not required to assess control risk at less than the maximum for *all* relevant assertions and, for a variety of reasons, the auditor may choose not to do so.

B5. When concluding on the effectiveness of controls for the purpose of assessing control risk, the auditor also should evaluate the results of any additional tests of controls performed to achieve the objective related to expressing an opinion on the company's internal control over financial reporting, as discussed in paragraph B2. Consideration of these results may require the auditor to alter the nature, timing, and extent of substantive procedures and to plan and perform further tests of controls, particularly in response to identified control deficiencies.

B6. *Effect of Tests of Controls on Substantive Procedures.* If, during the audit of internal control over financial reporting, the auditor identifies a deficiency, he or she should determine the effect of the deficiency, if any, on the nature, timing, and extent of substantive procedures to be performed to reduce audit risk in the audit of the financial statements to an appropriately low level.

B7. Regardless of the assessed level of control risk or the assessed risk of material misstatement in connection with the audit of the financial statements,

the auditor should perform substantive procedures for all relevant assertions. Performing procedures to express an opinion on internal control over financial reporting does not diminish this requirement.

B8. Effect of Substantive Procedures on the Auditor's Conclusions About the Operating Effectiveness of Controls. In an audit of internal control over financial reporting, the auditor should evaluate the effect of the findings of the substantive auditing procedures performed in the audit of financial statements on the effectiveness of internal control over financial reporting. This evaluation should include, at a minimum—

- The auditor's risk assessments in connection with the selection and application of substantive procedures, especially those related to fraud.
- Findings with respect to illegal acts and related party transactions.
- Indications of management bias in making accounting estimates and in selecting accounting principles.
- Misstatements detected by substantive procedures. The extent of such misstatements might alter the auditor's judgment about the effectiveness of controls.

B9. To obtain evidence about whether a selected control is effective, the control must be tested directly; the effectiveness of a control cannot be inferred from the absence of misstatements detected by substantive procedures. The absence of misstatements detected by substantive procedures, however, should inform the auditor's risk assessments in determining the testing necessary to conclude on the effectiveness of a control.

Multiple Locations Scoping Decisions

B10. In determining the locations or business units at which to perform tests of controls, the auditor should assess the risk of material misstatement to the financial statements associated with the location or business unit and correlate the amount of audit attention devoted to the location or business unit with the degree of risk.

Note: The auditor may eliminate from further consideration locations or business units that, individually or when aggregated with others, do not present a reasonable possibility of material misstatement to the company's consolidated financial statements.

B11. In assessing and responding to risk, the auditor should test controls over specific risks that present a reasonable possibility of material misstatement to the company's consolidated financial statements. In lower-risk locations or business units, the auditor first might evaluate whether testing entity-level controls, including controls in place to provide assurance that appropriate controls exist throughout the organization, provides the auditor with sufficient evidence.

B12. In determining the locations or business units at which to perform tests of controls, the auditor may take into account work performed by others on behalf of management. For example, if the internal auditors' planned procedures include relevant audit work at various locations, the auditor may coordinate work with the internal auditors and reduce the number of locations or business units at which the auditor would otherwise need to perform auditing procedures.

B13. The direction in paragraph 61 regarding special considerations for subsequent years' audits means that the auditor should vary the nature, timing, and extent of testing of controls at locations or business units from year to year.

B14. *Special Situations.* The scope of the audit should include entities that are acquired on or before the date of management's assessment and operations that are accounted for as discontinued operations on the date of management's assessment. The direction in this multiple-locations discussion describes how to determine whether it is necessary to test controls at these entities or operations.

B15. For equity method investments, the scope of the audit should include controls over the reporting in accordance with generally accepted accounting principles, in the company's financial statements, of the company's portion of the investees' income or loss, the investment balance, adjustments to the income or loss and investment balance, and related disclosures. The audit ordinarily would not extend to controls at the equity method investee.

B16. In situations in which the SEC allows management to limit its assessment of internal control over financial reporting by excluding certain entities, the auditor may limit the audit in the same manner. In these situations, the auditor's opinion would not be affected by a scope limitation. However, the auditor should include, either in an additional explanatory paragraph or as part of the scope paragraph in his or her report, a disclosure similar to management's regarding the exclusion of an entity from the scope of both management's assessment and the auditor's audit of internal control over financial reporting. Additionally, the auditor should evaluate the reasonableness of management's conclusion that the situation meets the criteria of the SEC's allowed exclusion and the appropriateness of any required disclosure related to such a limitation. If the auditor believes that management's disclosure about the limitation requires modification, the auditor should follow the same communication responsibilities that are described in paragraphs .29–.32 of AU section 722, *Interim Financial Information*. If management and the audit committee do not respond appropriately, in addition to fulfilling those responsibilities, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons why the auditor believes management's disclosure requires modification.

Use of Service Organizations

B17. AU section 324, *Service Organizations*, applies to the audit of financial statements of a company that obtains services from another organization that are part of the company's information system. The auditor may apply the relevant concepts described in AU section 324 to the audit of internal control over financial reporting.

B18. AU section 324.03 describes the situation in which a service organization's services are part of a company's information system. If the service organization's services are part of a company's information system, as described therein, then they are part of the information and communication component of the company's internal control over financial reporting. When the service organization's services are part of the company's internal control over financial reporting, the auditor should include the activities of the service organization when determining the evidence required to support his or her opinion.

B19. AU section 324.07–.16 describe the procedures that the auditor should perform with respect to the activities performed by the service organization. The procedures include—

- a. Obtaining an understanding of the controls at the service organization that are relevant to the entity's internal control and the controls at the user organization over the activities of the service organization, and
- b. Obtaining evidence that the controls that are relevant to the auditor's opinion are operating effectively.

B20. Evidence that the controls that are relevant to the auditor's opinion are operating effectively may be obtained by following the procedures described in AU section 324.12. These procedures include—

- a. Obtaining a service auditor's report on controls placed in operation and tests of operating effectiveness, or a report on the application of agreed-upon procedures that describes relevant tests of controls.

Note: The service auditor's report referred to above means a report with the service auditor's opinion on the service organization's description of the design of its controls, the tests of controls, and results of those tests performed by the service auditor, and the service auditor's opinion on whether the controls tested were operating effectively during the specified period (in other words, "reports on controls placed in operation and tests of operating effectiveness" described in AU section 324.24b). A service auditor's report that does not include tests of controls, results of the tests, and the service auditor's opinion on operating effectiveness (in other words, "reports on controls placed in operation" described in AU section 324.24a) does not provide evidence of operating effectiveness. Furthermore, if the evidence regarding operating effectiveness of controls comes from an agreed-upon procedures report rather than a service auditor's report issued pursuant to AU section 324, the auditor should evaluate whether the agreed-upon procedures report provides sufficient evidence in the same manner described in the following paragraph.

- b. Performing tests of the user organization's controls over the activities of the service organization (e.g., testing the user organization's independent re-performance of selected items processed by the service organization or testing the user organization's reconciliation of output reports with source documents).
- c. Performing tests of controls at the service organization.

B21. If a service auditor's report on controls placed in operation and tests of operating effectiveness is available, the auditor may evaluate whether this report provides sufficient evidence to support his or her opinion. In evaluating whether such a service auditor's report provides sufficient evidence, the auditor should assess the following factors—

- The time period covered by the tests of controls and its relation to the as-of date of management's assessment,
- The scope of the examination and applications covered, the controls tested, and the way in which tested controls relate to the company's controls, and
- The results of those tests of controls and the service auditor's opinion on the operating effectiveness of the controls.

Note: These factors are similar to factors the auditor would consider in determining whether the report provides sufficient evidence to support the auditor's assessed level of control risk in an audit of the financial statements, as described in AU section 324.16.

B22. If the service auditor's report on controls placed in operation and tests of operating effectiveness contains a qualification that the stated control objectives might be achieved only if the company applies controls contemplated in the design of the system by the service organization, the auditor should evaluate whether the company is applying the necessary procedures.

B23. In determining whether the service auditor's report provides sufficient evidence to support the auditor's opinion, the auditor should make inquiries concerning the service auditor's reputation, competence, and independence. Appropriate sources of information concerning the professional reputation of the service auditor are discussed in paragraph .10a of AU section 543, *Part of Audit Performed by Other Independent Auditors*.

B24. When a significant period of time has elapsed between the time period covered by the tests of controls in the service auditor's report and the date specified in management's assessment, additional procedures should be performed. The auditor should inquire of management to determine whether management has identified any changes in the service organization's controls subsequent to the period covered by the service auditor's report (such as changes communicated to management from the service organization, changes in personnel at the service organization with whom management interacts, changes in reports or other data received from the service organization, changes in contracts or service level agreements with the service organization, or errors identified in the service organization's processing). If management has identified such changes, the auditor should evaluate the effect of such changes on the effectiveness of the company's internal control over financial reporting. The auditor also should evaluate whether the results of other procedures he or she performed indicate that there have been changes in the controls at the service organization.

B25. The auditor should determine whether to obtain additional evidence about the operating effectiveness of controls at the service organization based on the procedures performed by management or the auditor and the results of those procedures and on an evaluation of the following risk factors. As risk increases, the need for the auditor to obtain additional evidence increases.

- The elapsed time between the time period covered by the tests of controls in the service auditor's report and the date specified in management's assessment,
- The significance of the activities of the service organization,
- Whether there are errors that have been identified in the service organization's processing, and
- The nature and significance of any changes in the service organization's controls identified by management or the auditor.

B26. If the auditor concludes that additional evidence about the operating effectiveness of controls at the service organization is required, the auditor's additional procedures might include—

- Evaluating procedures performed by management and the results of those procedures.
- Contacting the service organization, through the user organization, to obtain specific information.
- Requesting that a service auditor be engaged to perform procedures that will supply the necessary information.
- Visiting the service organization and performing such procedures.

B27. The auditor should not refer to the service auditor's report when expressing an opinion on internal control over financial reporting.

Benchmarking of Automated Controls

B28. Entirely automated application controls are generally not subject to breakdowns due to human failure. This feature allows the auditor to use a "benchmarking" strategy.

B29. If general controls over program changes, access to programs, and computer operations are effective and continue to be tested, and if the auditor verifies that the automated application control has not changed since the auditor established a baseline (i.e., last tested the application control), the auditor may conclude that the automated application control continues to be effective without repeating the prior year's specific tests of the operation of the automated application control. The nature and extent of the evidence that the auditor should obtain to verify that the control has not changed may vary depending on the circumstances, including depending on the strength of the company's program change controls.

B30. The consistent and effective functioning of the automated application controls may be dependent upon the related files, tables, data, and parameters. For example, an automated application for calculating interest income might be dependent on the continued integrity of a rate table used by the automated calculation.

B31. To determine whether to use a benchmarking strategy, the auditor should assess the following risk factors. As these factors indicate lower risk, the control being evaluated might be well-suited for benchmarking. As these factors indicate increased risk, the control being evaluated is less suited for benchmarking. These factors are—

- The extent to which the application control can be matched to a defined program within an application.
- The extent to which the application is stable (i.e., there are few changes from period to period).
- The availability and reliability of a report of the compilation dates of the programs placed in production. (This information may be used as evidence that controls within the program have not changed.)

B32. Benchmarking automated application controls can be especially effective for companies using purchased software when the possibility of program changes is remote—e.g., when the vendor does not allow access or modification to the source code.

B33. After a period of time, the length of which depends upon the circumstances, the baseline of the operation of an automated application control should be reestablished. To determine when to reestablish a baseline, the auditor should evaluate the following factors—

- The effectiveness of the IT control environment, including controls over application and system software acquisition and maintenance, access controls and computer operations.
- The auditor's understanding of the nature of changes, if any, on the specific programs that contain the controls.
- The nature and timing of other related tests.
- The consequences of errors associated with the application control that was benchmarked.

- Whether the control is sensitive to other business factors that may have changed. For example, an automated control may have been designed with the assumption that only positive amounts will exist in a file. Such a control would no longer be effective if negative amounts (credits) begin to be posted to the account.

Appendix C

Special Reporting Situations

Report Modifications

C1. The auditor should modify his or her report if any of the following conditions exist.

- a. Elements of management's annual report on internal control are incomplete or improperly presented,
- b. There is a restriction on the scope of the engagement,
- c. The auditor decides to refer to the report of other auditors as the basis, in part, for the auditor's own report,
- d. There is other information contained in management's annual report on internal control over financial reporting, or
- e. Management's annual certification pursuant to Section 302 of the Sarbanes-Oxley Act is misstated.

C2. *Elements of Management's Annual Report on Internal Control Over Financial Reporting Are Incomplete or Improperly Presented.* If the auditor determines that elements of management's annual report on internal control over financial reporting are incomplete or improperly presented, the auditor should modify his or her report to include an explanatory paragraph describing the reasons for this determination. If the auditor determines that the required disclosure about a material weakness is not fairly presented in all material respects, the auditor should follow the direction in paragraph 91.

C3. *Scope Limitations.* The auditor can express an opinion on the company's internal control over financial reporting only if the auditor has been able to apply the procedures necessary in the circumstances. If there are restrictions on the scope of the engagement, the auditor should withdraw from the engagement or disclaim an opinion. A disclaimer of opinion states that the auditor does not express an opinion on the effectiveness of internal control over financial reporting.

C4. When disclaiming an opinion because of a scope limitation, the auditor should state that the scope of the audit was not sufficient to warrant the expression of an opinion and, in a separate paragraph or paragraphs, the substantive reasons for the disclaimer. The auditor should not identify the procedures that were performed nor include the statements describing the characteristics of an audit of internal control over financial reporting (paragraph 85 *g*, *h*, and *i*); to do so might overshadow the disclaimer.

C5. When the auditor plans to disclaim an opinion and the limited procedures performed by the auditor caused the auditor to conclude that a material weakness exists, the auditor's report also should include—

- The definition of a material weakness, as provided in paragraph A7.
- A description of any material weaknesses identified in the company's internal control over financial reporting. This description should provide the users of the audit report with specific information about the nature of any material weakness and its actual and potential effect on the presentation of the company's financial statements issued during the existence of the weakness. This description also should address the requirements in paragraph 91.

C6. The auditor may issue a report disclaiming an opinion on internal control over financial reporting as soon as the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion. The auditor is not required to perform any additional work prior to issuing a disclaimer when the auditor concludes that he or she will not be able to obtain sufficient evidence to express an opinion.

Note: In this case, in following the direction in paragraph 89 regarding dating the auditor's report, the report date is the date that the auditor has obtained sufficient competent evidence to support the representations in the auditor's report.

C7. If the auditor concludes that he or she cannot express an opinion because there has been a limitation on the scope of the audit, the auditor should communicate, in writing, to management and the audit committee that the audit of internal control over financial reporting cannot be satisfactorily completed.

C8. *Opinions Based, in Part, on the Report of Another Auditor.* When another auditor has audited the financial statements and internal control over financial reporting of one or more subsidiaries, divisions, branches, or components of the company, the auditor should determine whether he or she may serve as the principal auditor and use the work and reports of another auditor as a basis, in part, for his or her opinion. AU section 543, *Part of Audit Performed by Other Independent Auditors*, provides direction on the auditor's decision of whether to serve as the principal auditor of the financial statements. If the auditor decides it is appropriate to serve as the principal auditor of the financial statements, then that auditor also should be the principal auditor of the company's internal control over financial reporting. This relationship results from the requirement that an audit of the financial statements must be performed to audit internal control over financial reporting; only the principal auditor of the financial statements can be the principal auditor of internal control over financial reporting. In this circumstance, the principal auditor of the financial statements must participate sufficiently in the audit of internal control over financial reporting to provide a basis for serving as the principal auditor of internal control over financial reporting.

C9. When serving as the principal auditor of internal control over financial reporting, the auditor should decide whether to make reference in the report on internal control over financial reporting to the audit of internal control over financial reporting performed by the other auditor. In these circumstances, the auditor's decision is based on factors analogous to those of the auditor who uses the work and reports of other independent auditors when reporting on a company's financial statements as described in AU section 543.

C10. The decision about whether to make reference to another auditor in the report on the audit of internal control over financial reporting might differ from the corresponding decision as it relates to the audit of the financial statements. For example, the audit report on the financial statements may make reference to the audit of a significant equity investment performed by another independent auditor, but the report on internal control over financial reporting might not make a similar reference because management's assessment of internal control over financial reporting ordinarily would not extend to controls at the equity method investee.¹

C11. When the auditor decides to make reference to the report of the other auditor as a basis, in part, for his or her opinion on the company's internal

¹ See paragraph B15, for further discussion of the evaluation of the controls over financial reporting for an equity method investment.

control over financial reporting, the auditor should refer to the report of the other auditor when describing the scope of the audit and when expressing the opinion.

C12. *Management's Annual Report on Internal Control Over Financial Reporting Containing Additional Information.* Management's annual report on internal control over financial reporting may contain information in addition to the elements described in paragraph 72 that are subject to the auditor's evaluation.

C13. If management's annual report on internal control over financial reporting could reasonably be viewed by users of the report as including such additional information, the auditor should disclaim an opinion on the information.

C14. If the auditor believes that management's additional information contains a material misstatement of fact, he or she should discuss the matter with management. If, after discussing the matter with management, the auditor concludes that a material misstatement of fact remains, the auditor should notify management and the audit committee, in writing, of the auditor's views concerning the information. AU section 317, *Illegal Acts by Clients* and Section 10A of the Securities Exchange Act of 1934 may also require the auditor to take additional action.²

Note: If management makes the types of disclosures described in paragraph C12 outside its annual report on internal control over financial reporting and includes them elsewhere within its annual report on the company's financial statements, the auditor would not need to disclaim an opinion. However, in that situation, the auditor's responsibilities are the same as those described in this paragraph if the auditor believes that the additional information contains a material misstatement of fact.

C15. *Management's Annual Certification Pursuant to Section 302 of the Sarbanes-Oxley Act is Misstated.* If matters come to the auditor's attention as a result of the audit of internal control over financial reporting that lead him or her to believe that modifications to the disclosures about changes in internal control over financial reporting (addressing changes in internal control over financial reporting occurring during the fourth quarter) are necessary for the annual certifications to be accurate and to comply with the requirements of Section 302 of the Act and Securities Exchange Act Rule 13a-14(a) or 15d-14(a), whichever applies,³ the auditor should follow the communication responsibilities as described in AU section 722, *Interim Financial Information*, for any interim period. However, if management and the audit committee do not respond appropriately, in addition to the responsibilities described in AU section 722, the auditor should modify his or her report on the audit of internal control over financial reporting to include an explanatory paragraph describing the reasons the auditor believes management's disclosures should be modified.

Filings Under Federal Securities Statutes

C16. AU section 711, *Filings Under Federal Securities Statutes*, describes the auditor's responsibilities when an auditor's report is included in registration statements, proxy statements, or periodic reports filed under the federal securities statutes. The auditor should apply AU section 711 with respect to the auditor's report on internal control over financial reporting included in such filings. In addition, the auditor should extend the direction in AU section 711.10

² See 15 U.S.C. § 78j-1.

³ See 17 C.F.R. §§ 240.13a-14(a) and 240.15d-14(a).

to inquire of and obtain written representations from officers and other executives responsible for financial and accounting matters about whether any events have occurred that have a material effect on the audited financial statements to matters that could have a material effect on internal control over financial reporting.

C17. When the auditor has fulfilled these responsibilities and intends to consent to the inclusion of his or her report on internal control over financial reporting in the securities filing, the auditor's consent should clearly indicate that both the audit report on financial statements and the audit report on internal control over financial reporting (or both opinions if a combined report is issued) are included in his or her consent.

Appendix 2

Rule 3525. Audit Committee Pre-Approval of Non-Audit Services Related to Internal Control Over Financial Reporting

In connection with seeking audit committee pre-approval to perform for an audit client any permissible non-audit service related to internal control over financial reporting, a registered public accounting firm shall—

- (a) describe, in writing, to the audit committee of the issuer the scope of the service;
- (b) discuss with the audit committee of the issuer the potential effects of the service on the independence of the firm; and

Note: Independence requirements provide that an auditor is not independent of his or her audit client if the auditor is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the auditor is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement. Several principles guide the application of this general standard, including whether the auditor assumes a management role or audits his or her own work. Therefore, an auditor would not be independent if, for example, management had delegated its responsibility for internal control over financial reporting to the auditor or if the auditor had designed or implemented the audit client's internal control over financial reporting.

- (c) document the substance of its discussion with the audit committee of the issuer.

[Effective pursuant to SEC Release No. 34-56152; File No. PCAOB-2007-02; July 27, 2007]

Appendix 3

Conforming Amendments to PCAOB Auditing Standards

[Effective pursuant to SEC Release No. 34-56152; File No. PCAOB-2007-02; July 27, 2007]

AU sec. 230, "Due Professional Care in the Performance of Work"

Statement on Auditing Standards ("SAS") No. 1, "Codification of Auditing Standards and Procedures," section 230, "Due Professional Care in the Performance of Work" (AU sec. 230, "Due Professional Care in the Performance of Work"), as amended, is amended as follows—

- a. Paragraph .10 is replaced with—

The exercise of due professional care allows the auditor to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether caused by error or fraud, or whether any material weaknesses exist as of the date of management's assessment. Absolute assurance is not attainable because of the nature of audit evidence and the characteristics of fraud. Although not absolute assurance, reasonable assurance is a high level of assurance. Therefore, an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States) may not detect a material weakness in internal control over financial reporting or a material misstatement to the financial statements.
- b. The term "financial statements" within the first sentence of paragraph .13 is replaced with the term "financial statements or internal control over financial reporting."
- c. The second sentence of paragraph .13 is replaced with—

Therefore, the subsequent discovery that either a material misstatement, whether from error or fraud, exists in the financial statements or a material weakness in internal control over financial reporting exists does not, in and of itself, evidence (a) failure to obtain reasonable assurance, (b) inadequate planning, performance, or judgment, (c) the absence of due professional care, or (d) a failure to comply with the standards of the Public Company Accounting Oversight Board (United States).

AU sec. 310, "Appointment of the Independent Auditor"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 310, "Appointment of the Independent Auditor" (AU sec. 310, "Appointment of the Independent Auditor"), as amended, is amended as follows—

- a. The third bullet point of paragraph .06 is replaced with—

Management is responsible for establishing and maintaining effective internal control over financial reporting. If, in an integrated audit of financial statements and

internal control over financial reporting, the auditor concludes that he or she cannot express an opinion on internal control over financial reporting because there has been a limitation on the scope of the audit, he or she should communicate, in writing, to management and the audit committee that the audit of internal control over financial reporting cannot be satisfactorily completed.

- b. The eighth bullet point of paragraph .06 is amended as follows—

Under Integrated audit of financial statements and internal control over financial reporting, the last sub-bullet point is replaced with the following—

To the board of directors—any conclusion that the audit committee's oversight of the company's external financial reporting and internal control over financial reporting is ineffective.

Under Audit of financial statements, the last sub-bullet is replaced with the following—

To the board of directors—if the auditor becomes aware that the oversight of the company's external financial reporting and internal control over financial reporting by the audit committee is ineffective, that conclusion.

AU sec. 311, "Planning and Supervision"

SAS No. 22, "Planning and Supervision" (AU sec. 311, "Planning and Supervision"), as amended, is amended as follows—

Within the note to paragraph 1, the reference to paragraph 39 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraph 9 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 312, "Audit Risk and Materiality in Conducting an Audit"

SAS No. 47, "Audit Risk and Materiality in Conducting an Audit" (AU sec. 312, "Audit Risk and Materiality in Conducting an Audit"), as amended, is amended as follows—

- a. Within the note to paragraph 3, the reference to paragraphs 22–23 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraph 20 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- b. Within the note to paragraph 7, the reference to paragraphs 24–26 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 14–15 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- c. The note to paragraph 12 is replaced with—

Note: When performing an integrated audit of financial statements and internal control over financial reporting,

refer to paragraphs 9 and 20 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, regarding planning considerations and materiality, respectively.

- d. Within the note to paragraph 18, the reference to Appendix B, *Additional Performance Requirements and Directions; Extent-of-Testing Examples* of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs B10–B16 of Appendix B, *Special Topics*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- e. Within the note to paragraph 30, the reference to paragraphs 147–149 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 6–8 and paragraphs B1–B5 of Appendix B, *Special Topics*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 313, "Substantive Tests Prior to the Balance-Sheet Date"

SAS No. 45, "Omnibus Statement on Auditing Standards—1983" (AU sec. 313, "Substantive Tests Prior to the Balance-Sheet Date"), is amended as follows—

Within the note to paragraph 1, the reference to paragraphs 98–103 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 52–53 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 315, "Communications Between Predecessor and Successor Auditors"

SAS No. 84, "Communications Between Predecessor and Successor Auditors" (AU sec. 315, "Communications Between Predecessor and Successor Auditors"), as amended, is amended as follows—

The last sentence of paragraph 16 is replaced with—

Furthermore, the predecessor auditor is not a specialist as defined in AU sec. 336, *Using the Work of a Specialist*, nor does the predecessor auditor's work constitute the work of others as described in AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*, or paragraphs 16–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 316, "Consideration of Fraud in a Financial Statement Audit"

SAS No. 99, "Consideration of Fraud in a Financial Statement Audit" (AU sec. 316, "Consideration of Fraud in a Financial Statement Audit"), is amended as follows—

Within the note to paragraph 1, the reference to paragraphs 24–26 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 14–15 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 319, "Consideration of Internal Control in a Financial Statement Audit"

SAS No. 55, "Consideration of Internal Control in a Financial Statement Audit" (AU sec. 319, "Consideration of Internal Control in a Financial Statement Audit"), as amended, is amended as follows—

- a. The note to paragraph 2 is replaced with—

Note: Refer to paragraph A9 of Appendix A, *Definitions*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* for the definition of a relevant assertion and paragraphs 28–33 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, for discussion of identifying relevant assertions.
- b. Within the note to paragraph 9, the reference to Appendix B, *Additional Performance Requirements and Directions; Extent of Testing Examples*, of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs B10–B16 of Appendix B, *Special Topics*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- c. The last sentence of paragraph 33 is deleted.
- d. The note to paragraph 65 is deleted.
- e. The note to paragraph 83 is deleted.
- f. Within the note to paragraph 97, the reference to paragraphs 104–105 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraph 54 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- g. The appendix at paragraph 110 is deleted.

AU sec. 322, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements"

SAS No. 65, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements" (AU sec. 322, "The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements"), is amended as follows—

- a. Within the note to paragraph 1, the reference to paragraphs 108–126 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 16–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- b. The note to paragraph 20 is deleted.

- c. Within the note to paragraph 22, the reference to paragraph 122 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 18–19 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 324, "Service Organizations"

SAS No. 70, "Service Organizations" (AU sec. 324, "Service Organizations"), as amended, is amended as follows—

Within the note to paragraph 1, the reference to Appendix B, *Additional Performance Requirements and Directions; Extent-of-Testing Examples*, of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs B17–B27 of Appendix B, *Special Topics*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 325, "Communications About Control Deficiencies in an Audit of Financial Statements" ¹

AU sec. 325, "Communications About Control Deficiencies in an Audit of Financial Statements" is amended as follows—

- a. The first bullet point before paragraph 1 is amended as follows—

The reference to paragraphs 207–214 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 78–84 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- b. The first bullet point in paragraph 1 is replaced with—

A deficiency in design exists when (a) a control necessary to meet the control objective is missing or (b) an existing control is not properly designed so that, even if the control operates as designed, the control objective would not be met.
- c. Paragraph 2 is replaced with—

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting, that is less severe than a material weakness yet important enough to merit attention by those responsible for oversight of the company's financial reporting.
- d. The notes to paragraph 2 are deleted.

¹ When the Board adopted Auditing Standard No. 2, it superseded SAS No. 60 in the context of an integrated audit of financial statements and internal control over financial reporting by paragraphs 207–214 of Auditing Standard No. 2. See PCAOB Release No. 2004-008, *Conforming Amendments to PCAOB Interim Standards Resulting From the Adoption of PCAOB Auditing Standard No. 2*, "An Audit of Internal Control Over Financial Reporting Performed in Conjunction with An Audit of Financial Statements" (Sept. 15, 2004). As a result of superseding Auditing Standard No. 2, paragraphs 78–84 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, now supersede SAS No. 60 in the context of an integrated audit.

- e. Paragraph 3 is replaced with—

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

Note: There is a reasonable possibility of an event when the likelihood of the event is either "reasonably possible" or "probable," as those terms are used in paragraph 3 of Financial Accounting Standards Board Statement No. 5, *Accounting for Contingencies*.

Note: In evaluating whether a deficiency exists and whether deficiencies, either individually or in combination with other deficiencies, are material weaknesses, the auditor should follow the direction in paragraphs 62–70 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

- f. Paragraph 5 is replaced with—

If oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, that circumstance should be regarded as an indicator that a material weakness in internal control over financial reporting exists. Although there is not an explicit requirement to evaluate the effectiveness of the audit committee's oversight in an audit of only the financial statements, if the auditor becomes aware that the oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, the auditor must communicate that information in writing to the board of directors.

- g. The last sentence of paragraph 9 is replaced with—

In an audit of financial statements only, auditing interpretation 1 to AU sec. 325, "Reporting on the Existence of Material Weaknesses," continues to apply except that the term "reportable condition" means "significant deficiency" as defined in paragraph 2 of this standard.

AU sec. 9325, "Communication of Internal Control Related Matters Noted in an Audit: Auditing Interpretations of Section 325"

AU sec. 9325, "Communication of Internal Control Related Matters Noted in an Audit: Auditing Interpretations of Section 325" is amended as follows—

- The note prior to paragraph 1 is replaced with—

Note: In an audit of financial statements only, auditing interpretation 1 to AU sec. 325, "Reporting on the Existence of Material Weaknesses," continues to apply except that the term "reportable condition" means "significant deficiency" as defined in paragraph 2 of this standard. Within

the example report within paragraph 4 of the interpretation, the third sentence is replaced with the definition of a material weakness in paragraph A7 of Appendix A, *Definitions*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 328, "Auditing Fair Value Measurements and Disclosures"

SAS No. 101, "Auditing Fair Value Measurements and Disclosures" (AU sec. 328, "Auditing Fair Value Measurements and Disclosures"), is amended as follows—

The first sentence of paragraph 41 is replaced with—

Events and transactions that occur after the balance-sheet date but before the date of the auditor's report (for example, a sale of an investment shortly after the balance-sheet date), may provide audit evidence regarding management's fair value measurements as of the balance-sheet date⁷

⁷ The auditor's consideration of a subsequent event or transaction, as contemplated in this paragraph, is a substantive test and thus differs from the review of subsequent events performed pursuant to section 560, *Subsequent Events*.

AU sec. 332, "Auditing Derivative Instruments, Hedging Activities, and Investments in Securities"

SAS No. 92, "Auditing Derivative Instruments, Hedging Activities, and Investments in Securities" (AU sec. 332, "Auditing Derivative Instruments, Hedging Activities, and Investments in Securities"), is amended as follows—

The note to paragraph 11 is replaced with—

Note: When performing an integrated audit of financial statements and internal control over financial reporting, paragraph 39 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, states "[t]he auditor should test those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to each relevant assertion." Therefore, in an integrated audit of financial statements and internal control over financial reporting, if there are relevant assertions related to the company's investment in derivatives and securities, the auditor's understanding of controls should include controls over derivatives and securities transactions from their initiation to their inclusion in the financial statements and should encompass controls placed in operation by the entity and service organizations whose services are part of the entity's information system.

AU sec. 333, "Management Representations"

SAS No. 85, "Management Representations" (AU sec. 333, "Management Representations"), as amended, is amended as follows—

- a. Within the note to paragraph 5, the reference to paragraphs 142–144 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 75–77 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- b. The second sentence of paragraph 9 is replaced with—

Because the auditor is concerned with events occurring through the date of his or her report that may require adjustment to or disclosure in the financial statements, the representations should be made as of the date of the auditor's report.

AU sec. 9337, "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of Section 337"

AU sec. 9337, "Inquiry of a Client's Lawyer Concerning Litigation, Claims, and Assessments: Auditing Interpretations of Section 337" is amended as follows—

- a. The last sentence of paragraph 4 is replaced with—

What is the relationship between the effective date of the lawyer's response and the date of the auditor's report?
- b. Paragraph 5 is replaced with—

Interpretation—Section 560.10 through .12 indicates that the auditor is concerned with events, which may require adjustment to, or disclosure in, the financial statements, occurring through the date of his or her report. Therefore, the latest date of the period covered by the lawyer's response (the "effective date") should be as close to the date of the auditor's report as is practicable in the circumstances. Consequently, specifying the effective date of the lawyer's response to reasonably approximate the expected date of the auditor's report will in most instances obviate the need for an updated response from the lawyer.

AU sec. 341, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern"

SAS No. 59, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern" (AU sec. 341, "The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern"), as amended, is amended as follows—

The second sentence of paragraph 2 is replaced with—

The auditor's evaluation is based on his or her knowledge of relevant conditions and events that exist at or have occurred prior to the date of the auditor's report.

AU sec. 342, "Auditing Accounting Estimates"

SAS No. 57, "Auditing Accounting Estimates" (AU sec. 342, "Auditing Accounting Estimates"), is amended as follows—

- a. Subparagraph *c.* of paragraph 10 is replaced with—
 - c. Review subsequent events or transactions occurring prior to the date of the auditor's report.
- b. Paragraph 13 is replaced with—

Review subsequent events or transactions. Events or transactions sometimes occur subsequent to the date of the balance sheet, but prior to the date of the auditor's report, that are important in identifying and evaluating the reasonableness of accounting estimates or key factors or assumptions used in the preparation of the estimate. In such circumstances, an evaluation of the estimate or of a key factor or assumption may be minimized or unnecessary as the event or transaction can be used by the auditor in evaluating their reasonableness.

AU sec. 380, "Communication With Audit Committees"

SAS No. 61, "Communication With Audit Committees" (AU sec. 380, "Communication With Audit Committees"), as amended, is amended as follows—

Within footnote 1 to paragraph 1, the reference to PCAOB Auditing Standard No. 2 is replaced with a reference to PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 508, "Reports on Audited Financial Statements"

SAS No. 58, "Reports on Audited Financial Statements" (AU sec. 508, "Reports on Audited Financial Statements"), as amended, is amended as follows—

Within the note to paragraph 1, the reference to paragraphs 162–199 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 85–98 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and Appendix C, *Special Reporting Situations*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. The sentence that reads "In addition, see Appendix A, *Illustrative Reports on Internal Control Over Financial Reporting*, of PCAOB Auditing Standard No. 2, which includes an illustrative combined audit report and examples of separate reports," is replaced with, "In addition, see paragraphs 86–88 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, which includes an illustrative combined audit report."

AU sec. 530, "Dating of the Independent Auditor's Report"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 530, "Dating of the Independent Auditor's Report" (AU sec. 530, "Dating of the Independent Auditor's Report"), as amended, is amended as follows—

- a. Paragraph .01 is replaced with—

The auditor should date the audit report no earlier than the date on which the auditor has obtained sufficient competent evidence to support the auditor's opinion. Paragraph .05 describes the procedure to be followed when a subsequent event occurring after the report date is disclosed in the financial statements.

Note: When performing an integrated audit of financial statements and internal control over financial reporting, the auditor's reports on the company's financial statements and on internal control over financial reporting should be dated the same date.

Note: If the auditor concludes that a scope limitation will prevent the auditor from obtaining the reasonable assurance necessary to express an opinion on the financial statements, then the auditor's report date is the date that the auditor has obtained sufficient competent evidence to support the representations in the auditor's report.

- b. Paragraph .05 is replaced with—

The independent auditor has two methods for dating the report when a subsequent event disclosed in the financial statements occurs after the auditor has obtained sufficient competent evidence on which to base his or her opinion, but before the issuance of the related financial statements. The auditor may use "dual dating," for example, "February 16, 20__," except for Note __, as to which the date is "March 1, 20__," or may date the report as of the later date. In the former instance, the responsibility for events occurring subsequent to the original report date is limited to the specific event referred to in the note (or otherwise disclosed). In the latter instance, the independent auditor's responsibility for subsequent events extends to the later report date and, accordingly, the procedures outlined in section 560.12 generally should be extended to that date.

- c. Within the heading before paragraph .03, the reference to "completion of field work" is replaced with "the date of the independent auditor's report."

AU sec. 543, "Part of Audit Performed by Other Independent Auditors"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 543, "Part of Audit Performed by Other Independent Auditors" (AU sec. 543, "Part of Audit Performed by Other Independent Auditors"), as amended, is amended as follows—

Within the note to paragraph .01, the reference to paragraphs 182–185 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs C8–C11 of Appendix C, *Special Reporting Situations*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 560, "Subsequent Events"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 560, "Subsequent Events" (AU sec. 560, "Subsequent Events"), as amended, is amended as follows—

- a. Within the note to paragraph .01, the reference to paragraphs 186–189 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs 93–97 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- b. The second sentence of paragraph .12 is replaced with—

These procedures should be performed at or near the date of the auditor's report.

AU sec. 561, "Subsequent Discovery of Facts Existing at the Date of the Auditor's Report"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 561, "Subsequent Discovery of Facts Existing at the Date of the Auditor's Report" (AU sec. 561, "Subsequent Discovery of Facts Existing at the Date of the Auditor's Report"), as amended, is amended as follows—

Within the note to paragraph .01, the reference to paragraph 197 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraph 98 of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

AU sec. 711, "Filings Under Federal Securities Statutes"

SAS No. 37, "Filings Under Federal Securities Statutes" (AU sec. 711, "Filings Under Federal Securities Statutes"), is amended as follows—

- a. Within the note to paragraph 2, the reference to paragraphs 198–199 of PCAOB Auditing Standard No. 2 is replaced with a reference to paragraphs C16–C17 of Appendix C, *Special Reporting Situations*, of PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- b. The third sentence of paragraph 10 is replaced with—

The likelihood that the auditor will discover subsequent events necessarily decreases following the date of the auditor's report, and, as a practical matter, after that time the independent auditor may rely, for the most part, on inquiries of responsible officials and employees.

AU sec. 722, "Interim Financial Information"

SAS No. 100, "Interim Financial Information" (AU sec. 722, "Interim Financial Information"), is amended as follows—

- a. The following is inserted after the first sentence of paragraph 3—

The SEC also requires management, with the participation of the principal executive and financial officers (the certifying officers) to make certain quarterly and annual

certifications with respect to the company's internal control over financial reporting.²

² See Section 302 of the Sarbanes-Oxley Act of 2002, and Securities Exchange Act Rule 13a-14(a) or 15d-14(a), (17 C.F.R. §240.13a-14a or 17 C.F.R. §240.15d-14a), whichever applies.

b. The note to paragraph 3 is deleted.

c. The following is added to the end of paragraph 7—

Likewise, the auditor's responsibility as it relates to management's quarterly certifications on internal control over financial reporting is different from the auditor's responsibility as it relates to management's annual assessment of internal control over financial reporting. The auditor should perform limited procedures quarterly to provide a basis for determining whether he or she has become aware of any material modifications that, in the auditor's judgment, should be made to the disclosures about changes in internal control over financial reporting in order for the certifications to be accurate and to comply with the requirements of Section 302 of the Act.

Note: The auditor's responsibilities for evaluating management's certification disclosures about internal control over financial reporting take effect beginning with the first quarter after the company's first annual assessment of internal control over financial reporting as described in Item 308(a)(3) of Regulations S-B and S-K.

d. The following lettered section is added to the end of paragraph 18—

g. Evaluating management's quarterly certifications about internal control over financial reporting by performing the following procedures—

- Inquiring of management about significant changes in the design or operation of internal control over financial reporting as it relates to the preparation of annual as well as interim financial information that could have occurred subsequent to the preceding annual audit or prior review of interim financial information;
- Evaluating the implications of misstatements identified by the auditor as part of the auditor's other interim review procedures as they relate to effective internal control over financial reporting; and
- Determining, through a combination of observation and inquiry, whether any change in internal control over financial reporting has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

e. Paragraph 29 is replaced with—

As a result of conducting a review of interim financial information, the accountant may become aware of matters that cause him or her to believe that—

- a. Material modification should be made to the interim financial information for it to conform with generally accepted accounting principles;
- b. Modification to the disclosures about changes in internal control over financial reporting is necessary for the certifications to be accurate and to comply with the requirements of Section 302 of the Act and Securities Exchange Act Rule 13a-14(a) or 15d-14(a), whichever applies; and
- c. The entity filed the Form 10-Q or Form 10-QSB before the completion of the review.

In such circumstances, the accountant should communicate the matter(s) to the appropriate level of management as soon as practicable.

- f. Paragraph 32 is replaced with—

If the auditor becomes aware of information indicating that fraud or an illegal act has or may have occurred, the auditor must also determine his or her responsibilities under AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, AU sec. 317, *Illegal Acts by Clients*, and Section 10A of the Securities Exchange Act of 1934.¹

¹ See 15 U.S.C. §78j-1

- g. Within paragraph 33, the third sentence is replaced with—

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control over financial reporting, that is less severe than a material weakness yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

Auditing Standard No. 3, Audit Documentation

Auditing Standard No. 3, *Audit Documentation* is amended as follows—

Within footnote 2 to paragraph 6, the reference to paragraphs 68–70 of Auditing Standard No. 2 is replaced with a reference to paragraphs 28–33 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

Auditing Standard No. 4, Reporting on Whether a Previously Reported Material Weakness Continues to Exist

Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist* is amended as follows—

- a. Within note 1 to paragraph 1, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

- b. Within paragraph 2, the two references to Auditing Standard No. 2 are replaced with references to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- c. Within the note to paragraph 2, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- d. Within paragraph 4, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- e. Paragraph 9 is replaced with—

The terms *internal control over financial reporting*, *deficiency*, *significant deficiency*, and *material weakness* have the same meanings as the definitions of those terms in Appendix A, *Definitions*, of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- f. The first sentence of paragraph 10 is replaced with—

Paragraph 5 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, states "[t]he auditor should use the same suitable, recognized control framework to perform his or her audit of internal control over financial reporting as management uses for its annual evaluation of the effectiveness of the company's internal control over financial reporting."
- g. Within the note to paragraph 10, the reference to Auditing Standard No. 2 in the first sentence is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, and the last sentence is amended as follows—

More information about the COSO framework is included within the COSO report.
- h. Paragraph 11 is replaced with—

The terms relevant assertion and control objective have the same meaning as the definitions of those terms in Appendix A, *Definitions*, of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- i. Paragraph 13 is replaced with—

In an audit of internal control over financial reporting, the auditor should test the design effectiveness of controls by determining whether the company's controls, if they are operated as prescribed by persons possessing the necessary authority and competence to perform the control effectively, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that

could result in material misstatements in the financial statements.²

² See paragraph 42 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.

- j. Within the note to paragraph 17, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- k. Within note 2 to paragraph 18, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- l. Within paragraph 21, the last sentence is deleted.
- m. Within paragraph 23, the reference to paragraphs 22 and 23 of Auditing Standard No. 2 is replaced with a reference to paragraph 20 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. Additionally, the second sentence is deleted.
- n. Within paragraph 24, the reference to paragraph 39 of Auditing Standard No. 2 is replaced with a reference to paragraph 9 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- o. Within paragraph 25, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- p. Within the note to paragraph 25, the two references to Auditing Standard No. 2 are replaced with references to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- q. Within subparagraph a. of paragraph 26, the reference to paragraphs 47 through 51 of Auditing Standard No. 2 is replaced with a reference to paragraphs 22–27 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- r. Subparagraph b. of paragraph 26 is replaced with—

Perform the procedures described in paragraphs 34–38 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, for those transactions that are directly affected by controls specifically identified by management as addressing the material weakness.
- s. The note to subparagraph b. of paragraph 26 is deleted.
- t. Within paragraph 27, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- u. The note to paragraph 28 is deleted.

- v. Within paragraph 31, the reference to paragraphs 88 through 91 of Auditing Standard No. 2 is replaced with a reference to paragraphs 42–43 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- w. Paragraph 32 is replaced with—

Consistent with the direction in paragraphs 44–45 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, the auditor should test the operating effectiveness of a specified control by determining whether the specified control operated as designed and whether the person performing the control possesses the necessary authority and qualifications to perform the control effectively. In determining the nature, timing, and extent of tests of controls, the auditor should apply paragraphs 50–54 of Auditing Standard No. 5.
- x. Paragraph 33 is replaced with—

The auditor should perform tests of the specified controls over a period of time that is adequate to determine whether, as of the date specified in management's assertion, the controls necessary for achieving the stated control objective are operating effectively. The timing of the auditor's tests should vary with the risk associated with the control being tested. For example, a transaction-based, daily reconciliation generally would permit the auditor to obtain sufficient evidence as to its operating effectiveness in a shorter period of time than a pervasive, entity-level control, such as any of those described in paragraphs 22–24 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*. Additionally, the auditor typically will be able to obtain sufficient evidence as to the operating effectiveness of controls over the company's period-end financial reporting process only by testing those controls in connection with a period-end.
- y. Within paragraph 35, the reference to paragraphs B1 through B13 of Appendix B of Auditing Standard No. 2 is replaced with a reference to paragraphs B10–B16 of Appendix B, Special Topics, of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- z. Within paragraph 36, the reference to paragraphs 109 through 115 and 117 through 125 of Auditing Standard No. 2 is replaced with a reference to paragraphs 16–19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- aa. The second sentence of paragraph 37 is replaced with—

Therefore, if the auditor has been engaged to report on more than one material weakness or on more than one stated control objective, the auditor must evaluate whether he or she has obtained sufficient evidence that the control objectives related to each of the material weaknesses identified in management's assertion are achieved.

- bb. The first two sentences of paragraph 38 are replaced with—
Paragraphs 18–19 of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, should be applied in the context of the engagement to report on whether a previously reported material weakness continues to exist.
- cc. The note to paragraph 38 is deleted.
- dd. The note to paragraph 39 is deleted.
- ee. Paragraph 42 is replaced with—
Management may conclude that a previously reported material weakness no longer exists because its severity has been sufficiently reduced such that it is no longer a material weakness.
- ff. Subparagraph f. of paragraph 44 is replaced with—
Describing any fraud resulting in a material misstatement to the company's financial statements and any other fraud that does not result in a misstatement in the company's financial statements but involves senior management or management or other employees who have a significant role in the company's internal control over financial reporting and that has occurred or come to management's attention since the date of management's most recent annual assessment of internal control over financial reporting.
- gg. Within the note to subparagraph b. of paragraph 51, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- hh. Within the note to subparagraph l. of paragraph 51, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- ii. Within the note to the second bullet point of subparagraph o. of paragraph 51, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- jj. Within paragraph 52, the reference to Auditing Standard No. 2 is replaced with a reference to Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*.
- kk. Within paragraph 63, the reference to paragraphs 202 through 206 of Auditing Standard No. 2 is replaced with a reference to paragraphs 7 and 29–32 of AU sec. 722, *Interim Financial Information*.
- ll. Within paragraph 64, the reference to paragraphs 202 through 206 of Auditing Standard No. 2 is replaced with a reference to paragraphs 7 and 29–32 of AU sec. 722, *Interim Financial Information*.

Appendix 4

Additional Discussion of Comments and the Board's Response

As discussed in the first part of the Board's release, on December 19, 2006, the Board proposed for comment a new standard on auditing internal control, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*, that would replace Auditing Standard No. 2, a related auditing standard, *Considering and Using the Work of Others in an Audit*, an independence rule relating to the auditor's provision of internal control-related non-audit services, and certain amendments to its auditing standards. The Board received 175 comment letters on its proposals and feedback from the Board's Standing Advisory Group.

Notable changes that the Board made in finalizing its proposals in response to comments are described in the first part of the Board's release. This appendix contains a further discussion of comments received on the proposals and the Board's response.

1. Alignment of Board's Internal Control Auditing Standard and the SEC's Guidance to Management

Many commenters suggested that the SEC's guidance to management and the Board's auditing standard should be more closely aligned. The commenters appeared to hold different opinions, however, about what alignment should mean in this context. Some commenters suggested that the most important issue was the need to use the same definitions of important terms in both documents. Some focused on perceived differences in scope, testing, and documentation requirements, while others suggested that the tone of the two documents was different and that the Board's proposals were more prescriptive. A few commenters suggested that the standard on auditing internal control should merely refer to the SEC management guidance without providing additional direction to the auditor.

As discussed more fully in the first part of this release, in formulating a new standard on auditing internal control, the Board intended to describe an audit process that would be coordinated with management's evaluation process. After considering the comments in this area, the Board made several changes, described in the first part of this release, that improve coordination while recognizing the inherent differences in the roles of management and the independent auditor under Section 404. The Board also adopted, as proposed, the final standard without a requirement for the auditor to perform an evaluation of management's assessment process. Commenters generally supported this aspect of the proposal, which was intended to respond to concerns that the requirements of Auditing Standard No. 2 had become de facto guidance for management's process. The absence of this requirement in the final standard should also allow for improved coordination between management and the auditor.

2. Level of Prescriptive Detail

Some commenters suggested that there remained too many instances of the use of the terms "should" and "must" in the proposed standard and that

this might drive excessive documentation and possibly unnecessary work. The Board's Rule 3101 describes the level of responsibility that these imperatives impose on auditors when used in PCAOB standards, and the Board uses these terms in its standards to clearly convey its expectations. In response to these comments, the Board analyzed each requirement in the proposed standard to determine whether more reliance could be placed on general principles rather than detailed requirements. Where appropriate, the Board made modifications to make the final standard more principles-based. As discussed more fully in the first part of this release, areas in which changes were made include the focus on fulfilling the objectives of a walkthrough and in the description of the top-down approach. Some of these changes also contributed to better coordination with the SEC's guidance for management.

In addition, several commenters expressed concern over the creation of presumptively mandatory responsibilities related to efficiency concepts. The example cited most often was the note to paragraph 3 of the proposed standard on auditing internal control, which stated—

Note: The auditor should select for testing only those controls that are important to the auditor's conclusion about whether the company's controls sufficiently address the assessed risk of misstatement to a given relevant assertion that could result in a material misstatement to the company's financial statements.

Commenters suggested that because of this requirement for the auditor to select "only those controls that are important" for testing, an auditor would have violated the Board's standards if he or she tested even one control that was later shown to be not important. Commenters believed that this would undermine audit effectiveness and recommended removal of such statements.

One of the objectives of the revised standard is to encourage auditors to focus on those areas that present the greatest risk of allowing a material misstatement in the financial statements. However, the Board agrees that its standards should not define a ceiling or maximum amount of work which the auditor may not exceed. While this statement (and others like it) in the proposed standard was not intended to imply that the Board would, with hindsight, suggest that an auditor violated the standard through testing of a control that was later determined to be not important to the audit, the Board has removed the note to paragraph 3 in response to these comments. Similar statements throughout the standard have also either been removed or modified.

3. Walkthroughs

The proposed standard required that the auditor perform a walkthrough of each significant process each year and allowed the auditor to use others, such as management personnel and internal auditors, to directly assist the auditor in this work. The proposed standard also indicated that the walkthrough provides audit evidence but did not prescribe further requirements regarding the circumstances in which a walkthrough might provide the auditor with sufficient evidence of operating effectiveness for a particular control. The proposing release, however, noted that a walkthrough could be sufficient for some low-risk controls in subsequent years.

As discussed in the first part of this release, the Board received a significant number of comments on this topic. While several commenters expressed support for the importance of the walkthrough to audit quality, many commenters suggested that the proposed provisions in this area were more prescriptive than necessary, and suggested risk concepts as a way to add flexibility. While these

commenters acknowledged the value of a walkthrough and its importance to the evaluation of design effectiveness, many stated that the requirement to perform a walkthrough in an area that is either low-risk, not complex, or unchanged appears inconsistent with the other areas in the proposed standard that rely upon auditor judgment to a much greater extent.

Use of others in achieving the objectives of a walkthrough

Commenters supported allowing the auditor to use others to provide the auditor with direct assistance, particularly in low-risk areas, with only a few commenters believing that this change could jeopardize the quality of the audit. In addition, many commenters believed that the standard should allow full use of the work of others in performing walkthroughs, although some commenters strongly disagreed with this point.

As discussed in the first part of this release, the final standard focuses the auditor on achieving four objectives related to the identification of where within the company's processes misstatements could arise, rather than specifically on performing walkthroughs. Due to the importance of achieving these objectives to the auditor's conclusion about internal control, the Board believes that allowing the use of the work of others to a greater extent than what was proposed would not provide the auditor with an adequate understanding of the relevant risks and the related controls. Therefore, similar to the proposed standard, Auditing Standard No. 5 allows the auditor to use the work of others in achieving the objectives of a walkthrough, but only as direct assistance. That is, the auditor will be required to supervise, review, evaluate, and test the work performed by others.¹

Using walkthroughs to test operating effectiveness

On the subject of using walkthroughs to test operating effectiveness, commenters suggested that walkthroughs can provide sufficient evidence of operating effectiveness, but held different views about situations in which this would be the case. Some commenters supported the use of walkthroughs in low-risk areas, while others focused on whether the control itself should be low-risk. Several commenters suggested that a walkthrough could provide sufficient evidence of operating effectiveness for lower-risk controls but only when entity-level controls are strong. Almost all commenters agreed that the proposed standard focused on the appropriate conditions for using such an approach—specifically, when risk is low, when past audits indicate effective design and operation of the control, and when no changes have been made to the control or process in which the control resides.

After considering these comments, the Board has decided that the risk-based approach that is described in the final standard is the appropriate framework for determining the evidence necessary to support the auditor's opinion. Therefore, Auditing Standard No. 5 articulates the principle that performance of a walkthrough might provide sufficient evidence of operating effectiveness, depending on the risk associated with the control being tested, the specific procedures performed as part of the walkthroughs and the results of the procedures performed.² The Board believes that establishing more detailed requirements in this area is not necessary, because application of the general principle in the standard will depend on the particular facts and circumstances presented.

¹ See paragraph 27 of AU sec. 322, *The Auditor's Consideration of the Internal Audit Function in an Audit of Financial Statements*.

² See paragraph 49.

4. Assessing Risk

The Board's May 16, 2005 guidance emphasized the importance of risk assessment in the audit of internal control, and that element of the guidance was incorporated and enhanced in the proposed standard. The proposed standard required risk assessment at each of the decision points in a top-down approach, including the auditor's identification of significant accounts and disclosures and their relevant assertions. The proposed standard also required an assessment of risk at the individual control level, and required that the auditor determine the evidence necessary for a given control based on this risk assessment.

The Board received many comments on the risk assessment provisions in the proposed standard. Comments on the proposed risk assessment approach were generally supportive, with some commenters suggesting ways for improving the risk assessment emphasis in the standard. Many commenters discussed the requirement in the proposed standard for the auditor to assess the risk that the control might not be effective and, if not effective, the risk that a material weakness would result for each control the auditor selected for testing. Commenters suggested that this requirement conflicted with both current practice and the requirements within the interim standards for the financial statement audit, which involve risk assessment at the financial statement assertion level. These commenters believed that this requirement would result in risk assessments at both the assertion level and the individual control level and suggested that assessing (and documenting) risk at the relevant assertion level is sufficiently precise to drive appropriate audits. Furthermore, they believed that a specific requirement to assess risk at the individual control level and its associated documentation requirement would be unnecessary.

After considering these comments, the Board continues to believe that the auditor may vary the nature, timing, and extent of testing based on the assessed risk related to a control. Making this assessment a presumptively mandatory requirement, as it was in the proposed standard, however, does not appear necessary to achieve the intended benefits of varied testing based on the risk associated with a control. Auditing Standard No. 5, therefore, requires the auditor to assess the risk related to the relevant assertion, but not the risk at the individual control level. The standard permits the auditor to consider the risk at the control level, however, and alter the nature, timing, and extent of testing accordingly.

Several commenters expressed concern about the advisability of taking a risk-based approach and the adequacy of the Board's interim standards regarding risk assessment. These commenters suggested that auditors have frequently been unsuccessful at applying a risk-based approach to the financial statement audit in the past.

The Board has found the arguments for a more principles-based approach to internal control auditing convincing, and the principle that the auditor should vary the testing to respond to the risk is one of the most important in the standard. Early implementation of Auditing Standard No. 2 demonstrated that, when internal control is audited without adequate consideration of risk, the areas that pose the greatest danger of material misstatement may be obscured or lost. The emphasis on risk, therefore, drives an audit that is more effective and focused. While the Board believes that auditors can appropriately assess risk based on the interim auditing standards, it has committed to examining the existing standards in this area to see where improvements can be made. This is currently one of the Board's standard setting priorities.

5. Evaluation of Deficiencies

The Board received a substantial number of comments on the topic of evaluating deficiencies, including comments on the proposed definitions of material weakness and significant deficiency, the "strong indicators" of a material weakness, and the requirement to evaluate all identified deficiencies. While a number of commenters stated that auditors do identify material weaknesses in the absence of an actual material misstatement, some noted that, in many cases, material weaknesses are identified only when material misstatements are discovered. Several commenters suggested that the proposed standard, with its focus on using a top-down approach and scoping to identify material weaknesses, would allow auditors to do a more thorough review of the most important controls with less effort expended on reviewing lower risk controls. These commenters often stated that this approach should increase the likelihood of the auditor detecting material weaknesses before a material misstatement occurs.

Definition of a material weakness

The proposed standard retained the basic framework in Auditing Standard No. 2 that described material weaknesses by reference to the likelihood and magnitude of a potential misstatement. While the Board believed that framework to be sound, it made an effort to clarify the definition in the proposed standard by replacing the reference to "more than remote likelihood" with "reasonable possibility." Financial Accounting Standards Board ("FASB") Statement No. 5 describes the likelihood of a future event occurring as "probable," "reasonably possible," or "remote." The definition in Auditing Standard No. 2 referred to a "more than remote" likelihood of a misstatement occurring. In accordance with FASB Statement No. 5, the likelihood of an event is "more than remote" when it is either "reasonably possible" or "probable."

As the Board noted in the proposing release, however, some auditors and issuers have misunderstood the term "more than remote" to mean something significantly less likely than a reasonable possibility. This, in turn, could have caused these issuers and auditors to evaluate the likelihood of a misstatement at a much lower threshold than the Board intended. Because the term "more than remote" could have resulted in auditors and issuers evaluating likelihood at a more stringent level than originally intended, the Board proposed changing the definition to refer to a "reasonable possibility."

Commenters on this change were split between those that felt the change would reduce unnecessary effort spent on identifying and analyzing deficiencies, and those who believed it would not. Several commenters noted that the replacement of the term "more than remote likelihood" with the term "reasonable possibility" does not raise the auditor's threshold for classifying deficiencies. According to those commenters, the change simply attempts to align the description of the threshold for identifying deficiencies with previous guidance issued by the PCAOB. The Board continues to believe that the proposed definition—as well as Auditing Standard No. 2—established an appropriate threshold for the likelihood part of the definition of material weakness. While the Board agrees that, as a definitional matter, "reasonable possibility" and "more than remote" describe the same threshold, it believes that "reasonable possibility" describes that threshold more appropriately and clearly, and will therefore avoid the misunderstanding of the threshold created by the way it was described in Auditing Standard No. 2. As a result, it retained that term in the final definition in the standard.

In addition, some commenters noted that the definitions of material weakness and significant deficiency in the proposed standard, like the definitions in

Auditing Standard No. 2, referred to the likelihood of a material misstatement in both the interim and annual financial statements. Most of these commenters suggested that the Board remove the term "interim" from the definitions of material weakness and significant deficiency because, according to the commenters, it causes confusion when scoping the audit of internal control and unnecessarily complicates the evaluation of deficiencies, particularly in the absence of guidance from the SEC and FASB regarding interim materiality. Some commenters, however, said that the Board should not remove the term "interim" from the definitions because the evaluation of deficiencies should be performed to consider the effectiveness of internal control for both the interim and annual financial statements. After carefully considering these comments, and in order to use the same definition that the SEC uses in its guidance to management, the Board determined to retain the reference to interim financial statements in the final definition of material weakness.³

Indicators of a material weakness

The proposed standard described circumstances that should be regarded as strong indicators of a material weakness in internal control. The proposing release noted that the identification of one of these strong indicators should bias the auditor toward a conclusion that a material weakness exists but does not require the auditor to reach that conclusion. Under the proposal, the auditor could determine that these circumstances do not rise to the level of a material weakness, and in some cases, are not deficiencies at all.

Many commenters supported the proposed changes from Auditing Standard No. 2 relating to strong indicators, agreeing that, by allowing greater use of professional judgment in this area, practice will improve. A few commenters stated that these changes may lead to some inconsistency in practice, but consistent with other commenters, they still supported the use of greater professional judgment in the evaluation of deficiencies. At least one commenter suggested that several of the strong indicators were not indicators of a material weakness but should be, under all circumstances, a material weakness. A few commenters also suggested that the list of strong indicators in Auditing Standard No. 2 actually stifles the auditor's judgment to the point that auditors fail to identify material weaknesses that exist because the deficiency is not on the list of strong indicators. These commenters suggested that removing the list of strong indicators entirely would be best.

The Board believes that auditor judgment is imperative in determining whether a deficiency is a material weakness and that the standard should encourage auditors to use that judgment. At the same time, the Board continues to believe that highlighting certain circumstances that are indicative of a material weakness provides practical information about the application of the standard. As a result, the Board has included this information in the final standard but has taken a more principles-based approach. Additionally, the Board has coordinated with the SEC so that the indicators in the auditing standard parallel those in the SEC's management guidance.

Rather than referring to "strong indicators," the final standard refers simply to "indicators" of material weakness.⁴ The standard also makes clear that

³ The provisions in the final standard relating to significant deficiencies are discussed in the first part of this release. As discussed in the first part of this release, the Board also made minor wording changes to the definition of material weakness in order to use the same definition as the SEC in its guidance to management and related rules.

⁴ The Board included as an indicator the proposed standard's requirement to determine the level of assurance that would satisfy prudent officials in the conduct of their own affairs that they

the list of indicators is not exhaustive and should not be used as a checklist. Specifically, under the final standard, the presence of one of the indicators does not mandate a conclusion that a material weakness exists. At the same time, a deficiency that is not a listed indicator may be a material weakness.

The Board did not adopt as indicators in the final standard certain proposed strong indicators. The Board believes, as at least one commenter suggested, that some of these proposed strong indicators are better characterized as material weaknesses rather than as indicators of a material weakness.⁵ Including them in the list of indicators, as adopted, would therefore be inconsistent with the degree of judgment required to evaluate whether an indicator of a material weakness is, under particular facts and circumstances, a material weakness.

Requirement to evaluate all identified deficiencies

The proposed standard required the auditor to evaluate the severity of each control deficiency that comes to his or her attention. The same provision in the proposed standard made clear, however, that the auditor need not scope the audit to find control deficiencies that are less severe than material weaknesses. A few commenters believed that this requirement is not necessary and suggested that an acceptable alternative would be for the auditor to verify that management has evaluated all deficiencies.

The Board continues to believe that the auditor needs to evaluate all deficiencies that come to his or her attention. Without such an evaluation, there would not be a sufficient basis for the auditor's opinion.

6. Additional Scoping and Materiality Issues

The proposed standard clarified that the auditor should plan and perform the audit of internal control using the same materiality measures used to plan and perform the audit of the annual financial statements. This direction was intended to address concerns that auditors have interpreted Auditing Standard No. 2 as directing them to search for potential defects in internal control at a lower materiality level than that used in the audit of the annual financial statements.

The Board received many comments on materiality and scoping, and a large portion of the commenters expressed support for the proposed standard's approach. Some commenters, however, recommended providing clear quantitative guidelines for calculating materiality. Other commenters expressed concern about such an approach, fearing that material areas would be inappropriately excluded from the audit scope. Finally, some commenters suggested that the

(footnote continued)

have reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in conformity with generally accepted accounting principles. In the proposal, if the auditor determined that a deficiency would prevent prudent officials from concluding that they have such reasonable assurance, the auditor was required to deem the deficiency to be at least a significant deficiency. Under the final standard, if the auditor determines that a deficiency might prevent prudent officials from concluding that they have such reasonable assurance, this circumstance is an indicator of material weakness.

⁵ One such proposed strong indicator was an ineffective control environment. Under the proposal, indicators of an ineffective control environment included identification of fraud on the part of senior management and significant deficiencies that have been communicated to management and the audit committee and remain uncorrected after some reasonable period of time. The final standard includes the identification of fraud on the part of senior management as an indicator of a material weakness. In order to simplify the list and make it more principles-based, as well as to align it with the SEC management guidance, however, the Board did not include significant deficiencies that remain uncorrected as an indicator in the final standard.

Board should provide additional guidance on scoping and extent of control testing decisions, such as guidance on sample sizes related to testing of high-risk controls versus low-risk controls or more specific guidance on the scope of the internal control audit for entities with multiple locations.⁶

After considering these comments, the Board has determined to adopt its discussion of materiality in the internal control audit as proposed. The Board believes that the auditing standard on internal control is an inappropriate place to redefine or refine the meaning of materiality, which is a long-established concept in the federal securities laws. With respect to requests for more specific guidance on scoping or extent of testing issues, the Board has, as discussed in the first part of this release, endeavored to adopt a standard that relies more on general principles than detailed requirements. Accordingly, the Board believes that auditors should make specific determinations of how to comply with the general scoping and testing requirements in the standard using professional judgment in the particular circumstances presented.

7. Scaling the Audit for Smaller Companies

As discussed in the first part of this release, the Board received many comments on the proposed section on scaling the audit from commenters with a variety of perspectives. The comments covered a wide range of issues. In addition to the matters discussed in the first part of this release, commenters suggested:

- That the proposed section on scalability should be focused more closely on how complexity relates to a risk-based audit;
- That the proposed standard did not provide sufficient flexibility for smaller companies and that the standard should provide for more "credit" for control testing based on work done as part of the financial statement audit;
- That the resulting costs of these proposed changes would need to be studied for several years to determine if they are appropriate;
- That the attributes of smaller, less complex companies that were included in the proposed standard were appropriate and that the tailoring directions for auditors were adequate;
- That some of the attributes of smaller, less complex companies that might allow the auditor to tailor the audit might be, instead, risk factors that require more testing;
- That the emphasis on entity-level controls might not be appropriate; and
- That the Board's project to develop guidance on auditing internal control in smaller public companies is necessary.

As discussed in the first part of this release, the Board made several changes in response to comments in the final standard. The new standard provides direction on how to tailor internal control audits to fit the size and complexity of the company being audited. It does so by including notes throughout the standard on how to apply the principles in the standard to smaller, less complex companies, and by including a discussion of the relevant attributes of smaller, less

⁶ The proposed standard focused on the auditor's assessment of risk of material misstatement and how the auditor could carry that assessment process into the scoping of a multi-location audit. Commenters were very supportive of the Board's approach in this area and, consequently, the Board has determined to adopt these provisions as proposed.

complex companies as well as less complex units of larger companies. The Board believes that the final standard appropriately considers the circumstances of smaller and less complex public companies (and other companies with less complex business units) while requiring a high-quality audit regardless of company size or complexity. The planned guidance on this topic will provide additional practical information for auditors of smaller companies.

8. Information Technology Principles

In gaining an understanding of the effect of information technology ("IT") on internal control over financial reporting and the risks the auditor should assess, the proposed standard directed the auditor to apply guidance in AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*. Additionally, the proposed standard included a discussion of IT operations at smaller and less complex companies. A number of commenters discussed the importance of IT risks to determining the scope of the audit and recommended that the final standard include additional guidance on how the risk assessment related to IT is incorporated in the audit of internal control.

In response to these comments, the Board included in Auditing Standard No. 5 a note to paragraph 36 that clarifies that the identification of risks and controls within IT should not be a separate evaluation but, rather, an integral part of the auditor's top-down risk assessment, including identification of significant accounts and disclosures and their relevant assertions, as well as the controls to test.

9. Roll-forward Procedures

The proposed standard discussed the procedures the auditor should perform to obtain additional evidence concerning the operation of the control when the auditor reports on the effectiveness of the control "as of" a specific date, but has tested the effectiveness of the control at an interim date. The Board received a few comments on this topic, mainly from auditors. The comments were consistent in their view that the proposed standard improperly implies, by using the expression "if any" in relation to additional evidence the auditor is required to obtain, that the auditor may not need to do any roll-forward work. Commenters suggested that such an approach would be inconsistent with paragraph .99 of AU sec. 319 and suggested that the words "if any" be removed from the final standard. The Board believes that its standard should be consistent with AU sec. 319.99 in that the auditor should perform some level of roll-forward procedures. Consequently, the Board removed the words "if any" from the relevant paragraphs of Auditing Standard No. 5 to correct the inconsistency. The Board also noted that, in some circumstances, inquiry alone might be a sufficient roll-forward procedure.

10. Cumulative Knowledge and Rotation

The proposed standard on auditing internal control allowed the auditor to incorporate knowledge from previous years' audits into his or her decision making process for determining the nature, timing, and extent of testing necessary. The section in the proposed standard on special considerations for subsequent years' audits built upon the risk-based framework in the proposed standard for determining the nature, timing and extent of testing by describing certain additional factors for the auditor to evaluate in subsequent years. These factors included the results of prior years' testing and any change that may have taken

place in the controls or the business since that testing was performed. This section retained the requirement in Auditing Standard No. 2 that each control deemed important to the auditor's conclusion be tested every year, but allowed for a reduction in testing when the additional risk factors indicated that the risk was lower than in the past.

Many commenters strongly supported these provisions as proposed. Many investors, in particular, stated that while they supported the proposed approach, they would not be supportive of rotation of control testing over a multiple-year period. These commenters were generally concerned that rotation of control testing would negatively affect audit quality. Among supporters of the approach in the proposed standard, several requested further clarification in the standard or additional guidance on how this approach should affect the level of testing.

Many issuers suggested that the standard should allow for full rotation—which exempts some important controls from testing each year—of at least controls in low-risk areas. Other commenters recommended that all controls should be tested on a multiyear rotating basis. These comments often focused on the fact that while the proposed standard required the auditor to evaluate whether there had been any relevant changes since the control was tested, it still required testing at some level even when there had been no change. These commenters considered this requirement to be unnecessary.

The Board shares the concern that multi-year rotation of control testing would not provide sufficient evidence for the auditor's opinion on internal control effectiveness, which is required by the Act to be issued each year. In the financial statement audit, control testing plays a supporting role—to the extent that controls have been tested and are effective, the auditor can reduce the level of (but not eliminate) the necessary substantive testing. In contrast, in the internal control audit, control testing does not play a supporting role but is the sole basis for the auditor's opinion. Additionally, even if the design of the control and its related process does not change from the prior year, it is not possible to assess the control's operating effectiveness without performing some level of testing. For these reasons, rotation is not a viable option in the audit of internal control.

Instead, the approach described in the proposed standard has been clarified in the final standard and continues to focus the auditor on relevant changes since a particular control was last tested, as many commenters suggested. Under this approach, the auditor would consider, in addition to the risk factors described in the standard that are always relevant to determining the nature, timing, and extent of testing, whether there has been a change in the controls or in the business that might necessitate a change in controls; the nature, timing, and extent of procedures performed in previous audits; and the results of the previous years' testing of the control.⁷ After taking into account these additional factors, the additional information in subsequent years' audits might permit the auditor to assess risk as lower than in the initial year and, thus, might permit the auditor to reduce testing.

This treatment of cumulative knowledge is analogous to the roll-forward provisions in the final standard. In the case of subsequent years, the auditor, in essence, rolls forward the prior years' testing when the control was found to be effective in the past and no change has occurred (or would have been expected to occur due to changes in the environment or process that contains the control). Because the auditor might be able to assess the risk lower in the subsequent

⁷ See paragraph 55.

years, a walkthrough, or equivalent procedures, might be sufficient for low-risk controls. This approach appropriately factors in the effect of cumulative knowledge, while maintaining audit quality and providing a sufficient basis for the auditor's opinion.

11. Reporting the Results of the Audit

In the proposed standard, the Board attempted to address concerns that the separate opinion on management's assessment required by Auditing Standard No. 2 contributed to the complexity of the standard and caused confusion regarding the scope of the auditor's work.⁸ Accordingly, to emphasize the proper scope of the audit and to simplify the reporting, the proposed standard required that the auditor express only one opinion on internal control—a statement of the auditor's opinion on the effectiveness of the company's internal control over financial reporting. The proposal eliminated the separate opinion on management's assessment because it was redundant of the opinion on internal control itself and because the opinion on the effectiveness of controls more clearly conveys the same information—specifically, whether the company's internal control is effective.

Many commenters agreed with the Board that eliminating the separate opinion on management's assessment would reduce confusion and clarify the reporting. Some commenters, however, suggested that the Board should instead require only an opinion on management's assessment. These commenters expressed their belief that the Act requires only that the auditor review management's assessment process and not the company's internal control. Additionally, a few commenters expressed confusion about why the proposed standard continued to reference an audit of management's assessment in paragraph 1 of the proposed standard and the auditor's report.

The Board has determined, after considering these comments, to adopt the provision requiring only an opinion on internal control.⁹ The Board continues to believe that the overall scope of the audit that was described by Auditing Standard No. 2 and the proposed standard is correct; that is, to attest to and report on management's assessment, as required by Section 404(b) of the Act, the auditor must test controls directly to determine whether they are effective.¹⁰ Accordingly, paragraphs 1 and 2 of the proposed standard provided that the auditor audits management's assessment—the statement in management's annual report about whether internal control is effective—by auditing whether that statement is correct—that is, whether internal control is, in fact, effective. The final standard similarly makes this clear. In response to commenters, however, the Board has clarified the auditor's report so that it will consistently refer to the required audit as the audit of internal control.

⁸ Although Auditing Standard No. 2 requires the auditor to evaluate management's process, the auditor's opinion on management's assessment is not an opinion on management's internal control evaluation process. Rather, it is the auditor's opinion on whether management's statements about the effectiveness of the company's internal controls are fairly stated.

⁹ The SEC has adopted changes to its rules that require the auditor to express an opinion directly on internal control.

¹⁰ In addition, Section 103 of the Act requires the Board's standard on auditing internal control to include "testing of the internal control structure and procedures of the issuer" Under Section 103, the Board's standard also must require the auditor to present in the audit report, among other things, "an evaluation of whether such internal control structure and procedures ... provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles"

12. Implementation

Some commenters urged the Board to focus on implementation issues after it adopts a final standard, and noted that effective implementation by the Board is crucial to the internal control reporting process. Some of these commenters focused on the inspections process, which they suggested is key to promoting audit efficiency. Some stated that auditors would be unlikely to change their audit approach until they are confident that the inspections will be similarly focused. The Board is committed to effective monitoring of firms' compliance with the new standard and will continue to promote proper implementation through other means, including the Board's Forums on Auditing in the Small Business Environment and guidance for auditors of smaller companies.

PCAOB Release No. 2008-001

Auditing Standard No. 6, Evaluating Consistency of Financial Statements, and Conforming Amendments

PCAOB Release No. 2008-001

January 29, 2008

PCAOB Rulemaking
Docket Matter No. 023

Summary

After public comment, the Public Company Accounting Oversight Board is adopting Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*, and amendments to the Board's interim auditing standards.

Board Contacts

Greg Fletcher, Associate Chief Auditor (202/207-9203, fletcherg@pcaobus.org),
Keith Wilson, Associate Chief Auditor (202/207-9134; wilsonk@pcaobus.org)

A. Introduction

The Board proposed certain changes to its auditing standards in response to two actions of the Financial Accounting Standards Board ("FASB"). In May 2005, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 154, *Accounting Changes and Error Corrections*,¹ which superseded Accounting Principles Board ("APB") Opinion No. 20, *Accounting Changes*.² The FASB has also issued an exposure draft of a proposed Statement of Financial Accounting Standards, *The Hierarchy of Generally Accepted Accounting Principles*.³

SFAS No. 154 establishes, unless impracticable, retrospective application as the required method for reporting a change in accounting principle in the absence of explicit transition requirements specific to a newly adopted accounting principle.⁴ SFAS No. 154 also redefines the term "restatement" to refer only to "the process of revising previously issued financial statements to reflect the

¹ Financial Accounting Standards Board ("FASB"), Statement of Financial Accounting Standards ("SFAS") No. 154, *Accounting Changes and Error Corrections* (2005) ("SFAS No. 154").

² Accounting Principles Board ("APB") Opinion No. 20, *Accounting Changes* (1971). SFAS No. 154 also superseded SFAS No. 3, *Reporting Accounting Changes in Interim Financial Statements*.

³ FASB, Proposed Statement of Financial Accounting Standards, *The Hierarchy of Generally Accepted Accounting Principles*, Exposure Draft (April 2005).

⁴ Among other reasons for undertaking this project, the FASB intended to eliminate differences between APB Opinion No. 20 and the International Accounting Standards Board standard, IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*. See introduction to SFAS No. 154.

correction of an error in those financial statements."⁵ Under SFAS No. 154, therefore, the term "restatement" does not refer to changes made to previously issued financial statements to reflect a change in accounting principle.

AU sec. 420, *Consistency of Application of Generally Accepted Accounting Principles*, the Board's interim standard on the auditor's responsibilities for evaluating the consistency of the application of generally accepted accounting principles ("GAAP"), generally reflected the provisions of APB Opinion No. 20, which was superseded by SFAS No. 154. To better align the Board's standards with the new accounting standard, on April 3, 2007, the Board proposed a new auditing standard on evaluating consistency, which would supersede AU sec. 420, and conforming amendments to AU sec. 508, *Reports on Audited Financial Statements*, of its interim auditing standards.

The FASB's proposed standard on the GAAP hierarchy would incorporate the hierarchy found in the auditing standards into the accounting standards. Historically, a description of the GAAP hierarchy has resided only in the auditing standards.⁶

Because the GAAP hierarchy identifies the sources of accounting principles and the framework for selecting principles to be used in preparing financial statements, the Board believed that these requirements are more appropriately located in the accounting standards. Accordingly, also on April 3, 2007, the Board proposed to remove the GAAP hierarchy from the auditing standards.⁷

The proposed standard provided direction for the auditor's evaluation of the consistency of financial statements. It directed the auditor to recognize a change in accounting principle or an adjustment to correct a misstatement⁸ in previously issued financial statements in the auditor's report if it had a material effect on the financial statements. The conforming amendments to AU sec. 508, *Reports on Audited Financial Statements*, provide language for the explanatory paragraph. The proposed standard also directed the auditor to review a material change in financial statement classification and the related disclosure to determine whether the change also is a change in accounting principle or a correction of a material misstatement.

The proposed standard and amendments were intended to update and clarify the auditing standards in light of SFAS No. 154 and the FASB's proposal on the GAAP hierarchy. In particular, these updates and clarifications should enhance the clarity of auditor reporting on accounting changes and corrections of misstatements by distinguishing between these events.

The Board received 11 comment letters. In general, the commenters were supportive of the proposed standard and amendments. They generally stated that the proposed auditing standard appropriately described how the auditor should evaluate the consistency of financial statements and reflected the changes to accounting requirements under SFAS No. 154. Several commenters suggested

⁵ See SFAS No. 154, paragraph 2j.

⁶ See AU sec. 411, *The Meaning of "Present Fairly in Conformity with Generally Accepted Accounting Principles."* Although the Board is removing the GAAP hierarchy from this standard, the standard remains in existence, as amended.

⁷ If the amendments are approved by the SEC, the effective date for the removal of the GAAP hierarchy from the auditing standards will be 60 days after the standard and amendments are approved by the SEC. The Board has coordinated with the FASB and understands that the FASB intends to coincide the effective date of its standard on the GAAP hierarchy with that of the PCAOB.

⁸ SFAS No. 154 uses the term "error" instead of "misstatement." This release, including the final standard and amendments, uses "misstatement," the prevailing term used in PCAOB auditing standards. The term "error," as used in SFAS No. 154, is equivalent to "misstatement," as used in the auditing standards.

clarifications in various parts of the standard. As described in the following sections, the Board has considered the comments and made changes to the final standard and amendments.

The Board is adopting the proposed standard as Auditing Standard No. 6, as well as the amendments to the interim standards. This release describes key aspects and elements of the new standard and amendments, comments received, and changes incorporated in the final standard.

B. Evaluating Consistency

Under Auditing Standard No. 6, auditors are required to evaluate the consistency of a company's financial statements and report on inconsistencies. The new standard updates these requirements and aligns them more closely with SFAS No. 154⁹ by requiring the auditor's report to recognize a company's correction of a material misstatement, regardless of whether it involves the application of an accounting principle. Based on a discussion at an October 2005 meeting of the Board's Standing Advisory Group, the Board understands that this requirement is consistent with current practice. The new standard focuses on the auditor's responsibilities regarding events that warrant recognition in the auditor's report on the financial statements—changes in accounting principles and corrections of misstatements in previously issued financial statements.¹⁰ This standard also clarifies that the auditor's report should indicate whether an adjustment to prior-period financial statements results from a change in accounting principle or the correction of a misstatement.

1. Materiality

There were several comments on materiality. Some commenters suggested that the standard should specifically state that the auditor need not recognize the correction of a misstatement that is immaterial to the previously issued financial statements. Another suggested that the standard should remind the auditor that professional judgment is required to evaluate consistency. Another commenter said that additional guidance on materiality as applied to individual matters in the financial statements would be helpful in applying the standard. Others suggested that clarity would be improved by inserting the word "material" in several places.

In general, the Board's view is that the purpose of the standard is to provide direction on evaluating consistency; for example, the accounting periods the auditor should evaluate, the recognition in the auditor's report of consistency matters prescribed by the accounting standards, and the related audit reporting requirements. Because an audit is predicated on the use of reasoned judgment and the consideration of materiality in planning, performing, and reporting on the audit, the Board does not believe it is necessary for this standard to specifically direct the auditor to exercise judgment and apply materiality. Further, materiality is a concept that is defined under the federal securities laws, and it is not the objective of this standard to alter or interpret that concept.

⁹ Because SFAS No. 154 provides comprehensive, authoritative accounting guidance on changes in accounting principle and corrections of errors, Auditing Standard No. 6 omits the accounting guidance that was included in AU sec. 420.

¹⁰ AU sec. 420 also required recognition of those events. However, it only required recognition in the auditor's report of the correction of a misstatement involving an accounting principle. In addition, unlike AU sec. 420, the new standard does not describe the accounting changes that do not require recognition in the auditor's report.

The Board did agree that clarity could be improved in some areas by inserting the word "material" to modify the word "misstatement." The Board added "material" to AU secs. 508.18A and B to be consistent with paragraph 4 of Auditing Standard No. 6. However, AU sec. 508.18C does not include "material" because that sentence summarizes the SFAS No. 154 requirement for correcting a misstatement, which does not directly mention materiality.

2. Periods Covered by the Evaluation of Consistency

The new standard describes the scope of the required evaluation of consistency in terms that are similar to the description in AU sec. 420. Under the new standard, when the auditor reports only on the current period, the auditor should evaluate whether the financial statements of the current period are consistent with those of the preceding period. When the auditor reports on two or more years, the auditor should evaluate whether the financial statements reported on are consistent with each other and with the prior year's financial statements, if presented. For example, assume that a company presents comparative financial statements covering three years and has a change in auditors. In the first year in which the successor auditor reports, the successor auditor evaluates consistency between the year on which he or she reports and the immediately preceding year. In the second year in which the successor auditor reports, the successor auditor would evaluate consistency between the two years on which he or she reports and between those years and the earliest year presented. In response to comments, the Board added this example to the final standard.

When a company uses retrospective application, as defined in SFAS No. 154, to account for a change in accounting principle, the financial statements presented generally will be consistent. However, the previous years' financial statements presented with the current year's financial statements will reflect the change in accounting principle and, therefore, will appear different from those previous years' financial statements on which the auditor previously reported. For example, consider a company that adopts a new accounting standard in 2007 that requires retrospective application to 2006 and 2005. The financial statements for 2006 and 2005 will be consistent, as presented with 2007. However, the financial statements for the years 2006 and 2005 that were issued a year earlier will not reflect the retrospective application and hence will not be consistent with 2007 and will be different from the 2006 and 2005 financial statements that are presented with 2007. The new standard clarifies that the auditor's evaluation of consistency should encompass previously issued financial statements for the relevant periods.

Paragraph 3 of the proposed standard described the financial statement periods covered by the evaluation of consistency. The third sentence of that paragraph was intended to be a clarification of the requirement in AU sec. 420.22 regarding the evaluation of two or more years. However, some commenters found the third sentence of paragraph 3 to be confusing and recommended retaining the language in AU sec. 420.22, unless the Board had intended to change the auditor's responsibilities for evaluating the consistency of GAAP. Because the Board wanted to be clear that the auditor's responsibilities had not changed, the Board decided to retain the original sentence from AU sec. 420.22, with some changes, instead of the proposed third sentence of paragraph 3. The inserted sentence, adapted from AU sec. 420.22, reads as follows (additions underlined and deletions struck through):

When the ~~independent~~ auditor reports on two or more ~~periods~~years, he or she should ~~evaluate~~address the consistency of the ~~application of accounting principles~~ between such ~~periods~~years and the consistency of such ~~periods~~years

with the period/year prior thereto if such prior period/year is presented with the financial statements being reported upon.

The Board did not include the reference to "the application of accounting principles" because paragraph 3 also relates to the auditor's evaluation of a company's correction of a material misstatement, regardless of whether it involves the application of an accounting principle. The Board also used the word "evaluate" because it describes the auditor's responsibilities consistently with the rest of the paragraph.

Two commenters suggested that the last sentence of proposed paragraph 3, which described the auditor's responsibility to evaluate whether the financial statements are consistent with previously issued financial statements for the same period, was confusing and unnecessary. These commenters suggested deleting the last sentence of paragraph 3. In addition, one commenter suggested that paragraph 3 of the proposed standard could be clarified by including the explanatory language from the proposing release regarding retrospective application under SFAS No. 154. As discussed above, the new standard is intended to clarify that the auditor's evaluation of consistency should include an evaluation of previously issued financial statements for the relevant periods. Accordingly, the Board believed that the final sentence of paragraph 3 is necessary. However, the Board agreed that including the suggested explanatory language from the proposing release regarding retrospective application would clarify the paragraph and has added that language as a footnote to paragraph 3.

3. Reference to Application of Accounting Principles

Consistent with the discussion above related to paragraph 3 of the proposed standard, the Board also removed the reference to "application of accounting principles" from the first paragraph of Auditing Standard No. 6. Because the auditor's evaluation of consistency under this standard includes errors not involving an accounting principle, the consistency evaluation is broader than that described under the second standard of reporting. Accordingly, the Board also removed the reference to the second standard of reporting from paragraph 2 of Auditing Standard No. 6.

4. Change in Accounting Principle

The new standard requires the auditor to evaluate a change in accounting principle¹¹ that has a material effect on the financial statements to determine whether: (1) the newly adopted accounting principle is a generally accepted accounting principle, (2) the method of accounting for the effect of the change is in conformity with GAAP, (3) the disclosures related to the accounting change are adequate, and (4) the company justifies that the alternative accounting principle is preferable,¹² as required by SFAS No. 154.¹³ Under the amendments

¹¹ The proposed and final standards use the definition of a change in accounting principle found in SFAS No. 154, paragraph 2c.

¹² In certain circumstances, Securities and Exchange Commission ("SEC") rules require issuers to file a letter from the auditor indicating whether or not a change is to an alternative accounting principle that is preferable. See Rule 10-01(b)(6) of Regulation S-X, 17 C.F.R. § 210.10-01(b)(6).

¹³ Under SFAS No. 154, the issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle as long as the change in accounting principle is made in accordance with the GAAP hierarchy. See SFAS No. 154, paragraph 14.

to AU sec. 508, if the four criteria are met,¹⁴ the auditor would recognize the change in accounting principle in the auditor's report through the addition of an explanatory paragraph consisting of an identification of the nature of the change and a reference to the issuer's note disclosure describing the change. If those criteria are not met, the auditor would issue a qualified or adverse opinion.¹⁵

Some commenters recommended that the Board reconsider whether it was necessary for the auditor to recognize in the audit report changes that result when a company is required to adopt a newly issued accounting standard. They indicated that the significance of a company's discretionary change in accounting principle may be diluted if the auditor recognizes both discretionary changes and those changes in accounting principles required by a newly-issued standard in the report. Another commenter suggested that the auditor should not be required to include an explanatory paragraph in the audit report when changes in accounting principle have been applied retrospectively because, in such cases, the financial statements included in the filing will appear consistent. As noted above, the Board believes that it is important for investors to be informed when the prior year financial statements presented with the current year are different from previously issued financial statements. In addition, the Board believes that the different language in the auditor's report for discretionary changes and those required by a newly-issued standard provides sufficient notification to investors of the general nature of the change. Therefore, the Board adopted the requirement as proposed.¹⁶

One commenter suggested that the proposed standard deleted useful information about a change in accounting principle that also involves a change in an estimate. The proposed standard did not carry forward the requirement of AU sec. 420.13 that the auditor should recognize in his or her report a change in accounting principle that is inseparable from a change in estimate. After considering this comment, the Board concluded that the requirement in AU sec. 420.13 does result in useful information being included in the auditor's report. Accordingly, the Board updated the language in AU sec. 420 to reflect the term used in SFAS 154, and included the requirement in Auditing Standard No. 6.¹⁷

Some commenters asked the Board to clarify the reporting requirement related to a change in reporting entity. According to AU sec. 420.08, a change in reporting entity resulting from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit, does not require that the auditor include an explanatory paragraph in the auditor's report. Under the proposed standard, the auditor may have been required to report on, for example, the disposition of a subsidiary or business unit because SFAS No. 154 (and its predecessor, APB Opinion No. 20) did not specifically exempt such a transaction from the definition of a change in

¹⁴ The auditor has substantially the same responsibility for evaluating a change in accounting principle as under AU sec. 431, *Adequacy of Disclosure in Financial Statements*, and paragraph .50 of AU sec. 508, *Reports on Audited Financial Statements*. The language in Auditing Standard No. 6 has, however, been updated to be consistent with SFAS No. 154.

¹⁵ This responsibility is substantially unchanged from AU sec. 508.51.

¹⁶ In addition, one commenter suggested that the standard include an example of a change in the method of applying an accounting principle. The final standard, like the proposed standard, notes that under SFAS No. 154 a change in the method of applying an accounting principle is also a change in accounting principle. While the Board believes that it is helpful for the standard to reference the accounting requirement, it also believes that it is not appropriate for the auditing standard to provide accounting guidance.

¹⁷ The new standard uses the term "change in accounting estimate effected by a change in accounting principle," which is defined in SFAS No. 154 as "a change in accounting estimate that is inseparable from the effect of a related change in accounting principle."

reporting entity. Generally, dispositions or spin-offs have specific disclosure requirements in the accounting standards and the Board did not intend to change practice and require the auditor to report on these events through an explanatory paragraph. Accordingly, the Board carried forward the requirement from AU sec. 420.08 regarding a transaction or event. In addition, the Board also added a reference to paragraph 2f in SFAS No. 154, which describes a change in reporting entity, as suggested by some commenters.

In response to comments, the Board also modified paragraph 8 of the proposed standard, which provided direction for reporting a change in accounting principle. Some commenters noted that the proposed conforming amendments to AU sec. 508.17 had a more clearly stated version of the number of years that the auditor is required to include an explanatory paragraph related to a change in principle than did footnote 5 to paragraph 8. After considering the commenters' recommendation that the language in the footnote be changed, the Board decided that the footnote was not necessary because paragraph 8 referred the auditor directly to the reporting requirements in AU sec. 508. The Board therefore removed footnote 5 from the final standard.

5. Correction of a Material Misstatement in Previously Issued Financial Statements

Under Auditing Standard No. 6, the correction of a material misstatement in previously issued financial statements (i.e., a "restatement") is recognized in the auditor's report through the addition of an explanatory paragraph. Under the conforming amendments to AU sec. 508, the explanatory paragraph in the auditor's report regarding a restatement should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the company's disclosure of the correction of the misstatement. The first statement in the explanatory paragraph distinguishes restatements from adjustments to prior-period financial statements resulting from changes in accounting principle. Previously, the auditor's responsibilities for reporting on most restatements were the same as for reporting on changes in accounting principle.

One commenter suggested that the proposed standard did not clearly explain whether corrections of an error not involving a principle would require recognition in the auditor's report. Unlike the previous requirement, the proposed standard did not distinguish between the "correction of an error in principle" and an "error correction not involving a principle."¹⁸ Rather, the proposed standard required recognition in the auditor's report of any correction of a material misstatement, whether or not the error involved a principle. The Board reconsidered the language and concluded that the requirement as proposed was sufficiently clear. The new standard aligns the auditor's reporting responsibilities with the accounting standards, which require disclosure of all restatements, by requiring an explanatory paragraph when the company has restated the financial statements.

Some commenters suggested that it would not improve clarity to have the auditor's report include a statement that the financial statements were restated "to correct a material misstatement." They noted that SFAS No. 154 already defines a restatement as the revision of previously issued financial statements to reflect the correction of an error. The Board decided to retain the reporting

¹⁸ This distinction previously was in paragraphs .12 and .16 of AU sec. 420, *Consistency of Application of Generally Accepted Accounting Principles*.

requirement as proposed because it clearly distinguishes corrections of misstatements from changes in accounting principle. Also, the required reporting language regarding restatements is more informative because it does not rely entirely on the user's knowledge of the definition of "restatement" in the accounting standard.¹⁹

One commenter also recommended that the auditor's explanatory paragraph about the correction of a misstatement should contain additional information. The commenter recommended that the explanatory paragraph include a statement that (1) the previously issued auditor's report should not be relied on because the previously issued financial statements were materially misstated, and (2) the previously issued report is replaced by the auditor's report on the restated financial statements.

The Board believes that the recommended additional language is not necessary because existing PCAOB standards and rules of the Securities and Exchange Commission ("SEC") are sufficient to inform users about misstatements in previously issued financial statements. Specifically, AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, requires the auditor to take specific action when he or she concludes that information discovered after the financial statements have been issued would have affected his or her report if the company had not reflected the information in the financial statements and people are currently relying or are likely to rely on the financial statements and auditor's report. According to AU sec. 561.06, the auditor should advise the company to make appropriate disclosure of the newly discovered facts and their impact on the financial statements to persons who are known to be currently relying or who are likely to rely on the financial statements and the related auditor's report.²⁰

A U.S. public company that is not a foreign private issuer under SEC rules also is required to file a Form 8-K current report, if it concludes that any previously issued financial statements should no longer be relied upon because of an error in such financial statements.²¹ If the auditor has notified the issuer that action should be taken to prevent future reliance on a previously issued audit report, the company also must disclose that information in the Form 8-K.

6. Changes in Classification

Auditing Standard No. 6 does not require the auditor's report to recognize a change in classification²² in previously issued financial statements, except for a reclassification that is also a change in accounting principle or correction of a material misstatement.²³ Accordingly, the new standard clarifies that the

¹⁹ Two commenters suggested that the standard include the explanation from the release that the term "error," as used in SFAS No. 154, is equivalent to "misstatement," as used in the auditing standards. The Board agreed and has included that explanation in the final standard.

²⁰ AU sec. 561.06 also requires that if the effect on the financial statements or auditor's report can promptly be determined, disclosure should consist of issuing, as soon as practicable, revised financial statements and auditor's report. If issuance of the financial statements with an auditor's report for a later period is imminent, a company is permitted to disclose the revision to the financial statements instead of reissuing earlier statements. When the effect on the financial statements cannot be determined without a prolonged investigation, appropriate disclosure would consist of notification that the financial statements and auditor's report should not be relied on and that revised financial statements and auditor's report will be issued upon completion of an investigation.

²¹ See Securities Exchange Act Rule 13a-11, 17 C.F.R. § 240.13a-11.

²² AU sec. 420.17 also did not require recognition of a change in financial statement classification in the auditor's report.

²³ SFAS No. 154 uses the term "presentation" in its definition of an error in previously issued financial statements. The directions in paragraph 11 of the new standard address the auditor's

auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change is also a change in accounting principle or a correction of a material misstatement. For example, in some circumstances, a change in financial statement classification also may be the correction of a misstatement. A restatement to correct the misclassification of an account as short- or long-term or misclassification of cash flows would be both a restatement and reclassification. Therefore, the auditor should evaluate these matters as part of the evaluation of corrections of misstatements. Under Auditing Standard No. 6, a classification change that is also a change in accounting principle should be reported on as a change in accounting principle, and a classification change that is also a correction of a material misstatement should be reported on by the auditor as a restatement.

Some commenters recommended slight revisions to the first sentence of paragraph 11 to clarify the auditor's responsibilities. The first sentence stated that changes in classification in previously issued financial statements do not require recognition in the auditor's report. This seemed to conflict with the second sentence which required the auditor to review a material change in classification and related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. The Board agreed with the comments and modified the first sentence to state that a change in classification does not require audit report recognition unless the change represents the correction of a material misstatement or a change in accounting principle. Additionally, in the proposed standard, the Board used the word "review" to describe the auditor's responsibility when there has been a material change in financial statement classification. The Board concluded that the word "evaluate" better describes the auditor's responsibilities in this area and is more consistent with the other requirements in Auditing Standard No. 6. Accordingly, the Board replaced "review" with "evaluate."

C. Description of GAAP and Removal of the GAAP Hierarchy From the Auditing Standards

As discussed previously, the FASB has proposed to incorporate the GAAP hierarchy into its own standards. The Board believes that it is appropriate to locate the GAAP hierarchy in the accounting standards rather than in the auditing standards. Thus, the Board amended its interim standards to remove the GAAP hierarchy from the auditing standards. These amendments do not change the principles in AU sec. 411 for evaluating fair presentation of the financial statements in conformity with GAAP.

Commenters strongly supported removing the GAAP hierarchy from the auditing standards and stated that it was appropriate for the GAAP hierarchy to be contained in the accounting standards. However, one commenter observed that the proposed amendments contain significant differences from the American Institute of Certified Public Accountants' ("AICPA") Auditing Standards Board's ("ASB") proposed amendment to AU sec. 411 of the ASB's standards.²⁴

(footnote continued)

responsibilities for changes in classification, which is an element of the presentation and disclosure financial statement assertion under the auditing standards. See, e.g., paragraph .08 of AU sec. 326, *Evidential Matter*.

²⁴ In addition, this commenter suggested that U.S. auditing standard-setters should work together to achieve consistency on core auditing standards that are used by almost all auditors of U.S. entities. This commenter also suggested that if the Board continues issuing its own standards for audits

(continued)

The Board believes that the amendments to AU sec. 411 are consistent with the Board's objective of removing the GAAP hierarchy from the auditing standards, and retaining, or providing, direction necessary for audits of public companies. The significant differences between the ASB's amendments to its AU sec. 411 and the Board's amendments primarily are related to sources of GAAP for governmental entities and direction on the application of accounting principles, which the Board did not believe was appropriate for inclusion in the proposed amendments. In addition, the Board deleted references to Rule 203 of the AICPA's *Code of Professional Conduct*. Rule 203 prohibits auditors from expressing an opinion on financial statements that do not conform to GAAP unless the auditor can demonstrate that due to unusual circumstances the financial statements would have been misleading without departing from GAAP. In 2003, when the Board adopted certain AICPA rules and ASB standards as interim Board standards, the Board did not adopt Rule 203. Consistent with that action, the proposed amendments did not include a reference to Rule 203.

D. Section-by-Section Description of Amendments to the Interim Auditing Standards

In addition to proposing an auditing standard on evaluating consistency of financial statements, the Board also proposed amendments to other interim auditing standards and related interpretations. The following sections describe key aspects and elements of the amendments to the standards and interpretations, comments received, and changes incorporated in the final amendments.

AU sec. 410, Adherence to Generally Accepted Accounting Principles

The Board proposed to delete AU sec. 410.02 which discussed the meaning of "generally accepted accounting principles" and included other matters that are addressed elsewhere in the standards. However, some commenters suggested that, to improve clarity, AU sec. 410 should retain the sentence in existing AU sec. 410.02 which states that the "first standard is construed not to require a statement of fact by the auditor but an opinion."

The Board agreed that, when viewed alone, the first standard of reporting, contained in AU sec. 410.01, does not provide a complete description of the auditor's responsibilities related to fair presentation in conformity with GAAP. However, the first standard of reporting combined with the fourth standard clearly indicates that the auditor is providing a statement of an opinion and not a statement of fact. The fourth standard of reporting provides that the auditor's report shall contain either an expression of opinion regarding the financial statements taken as a whole, or an assertion to the effect that an opinion cannot be expressed. To emphasize that the first and fourth reporting standards must be read together, the Board is including the fourth standard of reporting in the final amendment to AU sec. 410. However, as proposed, the prior statement on the meaning of "generally accepted accounting principles" has been deleted from AU sec. 410.02.

(footnote continued)

of public companies, it should adopt alternative numbering/referencing schemes in order to reduce confusion between its interim standards and the AICPA standards. The Board is considering these comments as it seeks to make continuous improvements to its standard-setting and other programs.

AU sec. 411, The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles

The Board proposed to delete AU sec. 411.02, which was a detailed description of GAAP, and AU secs. 411.05, .07 and .09-.15, which described the application of the GAAP hierarchy. The Board proposed to replace the description of GAAP in AU 411.02, with a statement that GAAP refers "to the accounting principles recognized in the standards of the Financial Accounting Standards Board or in the standards of any other standard-setting body recognized by the U.S. Securities and Exchange Commission."

However, commenters had concerns about the proposal. One commenter noted that the SEC might allow companies to file financial statement prepared in conformity with international financial reporting standards ("IFRS") but not recognize the International Accounting Standards Board, which issues IFRS, as a standard-setting body. Another commenter suggested that to avoid potential confusion by users, the Board should acknowledge that there are other sources of GAAP for entities other than public companies.

In response to these comments, the Board decided to modify its proposed amendment of AU 411. It deleted AU sec. 411.02, which described GAAP, and revised AU sec. 411.01 to indicate that the auditor should look to the requirements of the SEC for the company under audit to identify the accounting principles that are applicable to that company. This change should also clarify that the standard is focused only on the accounting principles that may be used for purposes of the federal securities laws. Other accounting principles may apply to financial statements prepared for other purposes or by entities that are not issuers. The Board also modified AU 411.01 to better emphasize that standard's focus on the meaning of the phrase "present fairly."

Finally, as proposed, the Board eliminated AU secs. 411.16 and .17 which set an effective date and transition requirements that are no longer applicable.

AU sec. 420, Consistency of Application of Generally Accepted Accounting Principles

AU sec. 420 has been superseded by Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*. However, some commenters suggested that parts of AU sec. 420 should have been incorporated into Auditing Standard No. 6. Commenters suggested that guidance on the objective of the consistency standard and the relationship of consistency and comparability, matters that may not affect consistency, and changes expected to have a material future effect provided useful direction.

The Board believes that it is unnecessary to include the preceding direction. The proposed standard clarified that the auditor's report should recognize only those matters that require recognition under the existing auditing standards—i.e., a change in accounting principle or the correction of a material misstatement. The Board does not believe it is necessary to list in a standard those matters that do not require recognition in the auditor's report. Also, the Board believes that paragraph 1 clearly describes the objective of the standard. Paragraph 2 makes it clear that the standard considers comparability to be between periods for the company under audit.

AU sec. 431, Adequacy of Disclosure in Financial Statements

AU sec. 431 describes the auditor's responsibilities for evaluating the adequacy of disclosures in the financial statements. The amendments address two technical matters relating to that section.

Footnote 1 to AU sec. 431.03 is not consistent with the SEC's independence rules regarding non-audit services and therefore has been eliminated.

AU sec. 431.04 is an application of the AICPA's *Code of Professional Conduct* regarding the disclosure of confidential client information. In 2003, when the Board adopted certain AICPA rules and ASB standards as interim Board standards, the Board did not adopt Rule 301. Consistent with that action, the proposed amendments would eliminate AU sec. 431.04.

Some commenters expressed concerns that the proposed elimination of AU sec. 431.04 would change the auditor's obligations, or reflected Board policy, regarding the use of confidential client information in connection with evaluating the adequacy of financial statement disclosures. Those commenters generally recognized the limited nature of AU sec. 431.04 and acknowledged that, since in 2003 the Board did not adopt Rule 301, removing a portion of the interim standards based on that rule was a conforming amendment. However, they were concerned that the Board's action might be construed as minimizing the auditor's responsibilities for maintaining the confidentiality of client information.

The Board is aware that many auditors have legal or professional obligations to maintain the confidentiality of client information. These requirements arise from the rules of state licensing authorities,²⁵ the rules of professional organizations such as the AICPA and the International Federation of Accountants, and the laws of some foreign jurisdictions. The Board's decision to omit Rule 301 from its interim standards was based on a determination that incorporation of that rule was not necessary to fulfill the Board's mandate under Section 103(a)(1) and (3) of the Sarbanes-Oxley Act. It did not reflect a decision that auditor confidentiality requirements imposed by other authorities were inappropriate. Similarly, in amending AU sec. 431, the Board seeks neither to modify nor to detract from existing confidentiality requirements.

Interpretations of the Auditing Standards in AU 400 Sections

The auditing interpretation in AU sec. 9420.52-.54 has been incorporated into Auditing Standard No. 6 and therefore has been eliminated, as proposed. The auditing interpretations in AU sec. 9411 and the remaining auditing interpretations in AU sec. 9420 are addressed by the accounting standards and therefore also have been eliminated as proposed.²⁶

AU sec. 508, Reports on Audited Financial Statements

In general, the Board has adopted the amendments as proposed. The amendments have conformed this interim auditing standard to Auditing Standard No. 6 on evaluating consistency and the amendments to AU secs. 410 and 411, described above. For example, AU sec. 508.16 now specifically identifies the matters related to consistency of the company's financial statements that should be recognized in the auditor's report. Similarly, AU sec. 508.17A provides the requirements for evaluating consistency, that also is in paragraph 7 of Auditing Standard No. 6. AU secs. 508.17B and C, and AU sec. 508.18A provide separate requirements for reporting on changes in accounting principles and restatements, as discussed previously.

²⁵ For example, confidentiality requirements are included in the provisions of the Uniform Accountancy Act, which has been enacted in some form by many states.

²⁶ One commenter suggested that some of the auditing interpretations should be retained because the guidance is still relevant. The Board considered the view of this commenter but decided to eliminate the interpretations because other auditing standards provided the necessary direction regarding the matter addressed in the interpretation, the interpretation dealt with items not requiring recognition in the auditor's report, or the interpretation was related to an accounting consideration of the company.

In addition, the amendments eliminate AU sec. 508.14-.15. Those paragraphs were an application of AICPA Ethics Rule 203, which, as previously noted, was not adopted as an interim standard by the Board.²⁷

Finally, in light of the definitions in SFAS No. 154, the amendments change references to "restatements" to the more general term "adjustments" to refer broadly to changes to previously issued financial statements that may result from either a correction of a misstatement or a change in accounting principle.²⁸

References to APB Opinion No. 20

In addition, the Board has adopted other amendments to update references to APB Opinion No. 20, which was superseded by SFAS No. 154. Accordingly the Board amended AU sec. 561, *Subsequent Discovery of Facts Existing at the Date of the Auditor's Report*, footnote 3 to paragraph .06, to reference paragraphs 25 and 26 of SFAS No. 154. For AU sec. 328, *Auditing Fair Value Measurements and Disclosures*, footnote 4 to paragraph .19, the Board referenced paragraph 20 of SFAS No. 157, *Fair Value Measurements*, which states that a change in valuation technique or its application is appropriate if the change results in a measurement that is equally or more representative of fair value in the circumstances. This replaces a reference to the preferability requirement in SFAS No. 157 because that requirement does not apply to a change in a company's method for determining fair value. Paragraph 20 is the accounting guidance applicable to a company's change in method for determining fair value.

E. Effective Date

This standard and amendments will be effective 60 days after approval by the SEC.

* * *

On the 29th day of January, in the year 2008, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

/s/ J. Gordon Seymour
J. Gordon Seymour
Secretary

January 29, 2008

²⁷ One commenter expressed concern about deleting these paragraphs and suggested that, if the Board's intent was to delete all reference to the AICPA Code of Professional Conduct from the Board's interim standards, the Board should indicate the professional ethics that auditors should follow when conducting audits according to PCAOB standards. The Board's Rules 3500T and 3600T describe the Board's interim ethics and independence standards, respectively. These standards include certain provisions from the AICPA's Code of Professional Conduct. In addition, the Board has adopted ethics and independence rules concerning independence, tax services, and contingent fees. See PCAOB Release No. 2005-014 (July 26, 2005). State law and membership organizations may impose additional requirements.

²⁸ Some commenters suggested that certain other changes were needed to AU sec. 508 or that certain amendments were not necessary. For example, some commenters suggested eliminating AU sec. 508.57 and retaining the original terminology in AU secs. 508.73-.74. The Board decided that some of the suggested changes would change existing practice, such as the elimination of AU sec. 508.57, and were outside the scope of this project. For the others, the Board concluded that the amendments were consistent with the direction in Auditing Standard No. 6. In addition, one commenter believed that there were inconsistencies between the proposed amendments to AU sec. 508 and Staff Questions and Answers, *Adjustments to Prior-Period Financial Statements Audited By a Predecessor Auditor*. However, the Board reviewed the Staff Questions and Answers and did not agree that there were inconsistencies with the proposed amendments to AU sec. 508.

APPENDICES—

1. Auditing Standard No. 6—*Evaluating Consistency of Financial Statements*
2. Amendments to Interim Auditing Standards

Appendix 1

Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*

[Supersedes AU secs. 420 and 9420]

Consistency and the Auditor's Report on Financial Statements

1. This standard establishes requirements and provides direction for the auditor's evaluation of the consistency of the financial statements, including changes to previously issued financial statements, and the effect of that evaluation on the auditor's report on the financial statements.

2. To identify consistency matters that might affect the report, the auditor should evaluate whether the comparability of the financial statements between periods has been materially affected by changes in accounting principles or by material adjustments to previously issued financial statements for the relevant periods.

3. The periods covered in the auditor's evaluation of consistency depend on the periods covered by the auditor's report on the financial statements. When the auditor reports only on the current period, he or she should evaluate whether the current-period financial statements are consistent with those of the preceding period. When the auditor reports on two or more periods, he or she should evaluate consistency between such periods and the consistency of such periods with the period prior thereto if such prior period is presented with the financial statements being reported upon.¹ The auditor also should evaluate whether the financial statements for periods described in this paragraph are consistent with previously issued financial statements for the respective periods.²

Note: The term "current period" means the most recent year, or period of less than one year, upon which the auditor is reporting.

4. The auditor should recognize the following matters relating to the consistency of the company's financial statements in the auditor's report if those matters have a material effect on the financial statements:

¹ For example, assume that a company presents comparative financial statements covering three years and has a change in auditors. In the first year in which the successor auditor reports, the successor auditor evaluates consistency between the year on which he or she reports and the immediately preceding year. In the second year in which the successor auditor reports, the successor auditor would evaluate consistency between the two years on which he or she reports and between those years and the earliest year presented.

² When a company uses retrospective application, as defined in Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections* ("SFAS No. 154"), to account for a change in accounting principle, the financial statements presented generally will be consistent. However, the previous years' financial statements presented with the current year's financial statements will reflect the change in accounting principle and, therefore, will appear different from those previous years' financial statements on which the auditor previously reported. This standard clarifies that the auditor's evaluation of consistency should encompass previously issued financial statements for the relevant periods.

- a. A change in accounting principle
- b. An adjustment to correct a misstatement in previously issued financial statements.³

Change in Accounting Principle

5. A change in accounting principle is a change from one generally accepted accounting principle to another generally accepted accounting principle when (1) there are two or more generally accepted accounting principles that apply, or when (2) the accounting principle formerly used is no longer generally accepted. A change in the method of applying an accounting principle also is considered a change in accounting principle.⁴

Note: A change from an accounting principle that is not generally accepted to one that is generally accepted is a correction of a misstatement.

6. The auditor should evaluate and report on a change in accounting estimate effected by a change in accounting principle like other changes in accounting principle.⁵ In addition, the auditor should recognize a change in the reporting entity⁶ by including an explanatory paragraph in the auditor's report, unless the change in reporting entity results from a transaction or event. A change in reporting entity that results from a transaction or event, such as the creation, cessation, or complete or partial purchase or disposition of a subsidiary or other business unit does not require recognition in the auditor's report.

7. The auditor should evaluate a change in accounting principle to determine whether –

- a. The newly adopted accounting principle is a generally accepted accounting principle,
- b. The method of accounting for the effect of the change is in conformity with generally accepted accounting principles,
- c. The disclosures related to the accounting change are adequate,⁷ and
- d. The company has justified that the alternative accounting principle is preferable.⁸

8. A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements. If the auditor concludes that the criteria in paragraph 7

³ The term "error," as used in SFAS No. 154, is equivalent to "misstatement," as used in the auditing standards.

⁴ See SFAS No. 154, paragraph 2c.

⁵ SFAS No. 154, paragraph 2e, defines a "change in accounting estimate effected by a change in accounting principle" as "a change in accounting estimate that is inseparable from the effect of a related change in accounting principle."

⁶ "Change in reporting entity" is a change that results in financial statements that, in effect, are those of a different reporting entity. See SFAS No. 154, paragraph 2f.

⁷ Newly issued accounting pronouncements usually set forth the method of accounting for the effects of a change in accounting principle and the related disclosures. SFAS No. 154 sets forth the method of accounting for the change and the related disclosures when there are no specific requirements in the new accounting pronouncement.

⁸ The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the hierarchy of generally accepted accounting principles. See SFAS No. 154, paragraph 14.

have been met, the auditor should add an explanatory paragraph to the auditor's report, as described in AU sec. 508, *Reports on Audited Financial Statements*. If those criteria are not met, the auditor should treat this accounting change as a departure from generally accepted accounting principles and address the matter as described in AU sec. 508.

Note: If a company's financial statements contain an investment accounted for by the equity method, the auditor's evaluation of consistency should include consideration of the investee. If the investee makes a change in accounting principle that is material to the investing company's financial statements, the auditor should add an explanatory paragraph (following the opinion paragraph) to the auditor's report, as described in AU sec. 508.

Correction of a Material Misstatement in Previously Issued Financial Statements

9. The correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph, as described in AU sec. 508.

10. The accounting pronouncements generally require certain disclosures relating to restatements to correct misstatements in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the inadequacy of disclosure as described in AU sec. 431, *Adequacy of Disclosure in Financial Statements*, and AU sec. 508.

Change in Classification

11. Changes in classification in previously issued financial statements do not require recognition in the auditor's report, unless the change represents the correction of a material misstatement or a change in accounting principle. Accordingly, the auditor should evaluate a material change in financial statement classification and the related disclosure to determine whether such a change also is a change in accounting principle or a correction of a material misstatement. For example, certain reclassifications in previously issued financial statements, such as reclassifications of debt from long-term to short-term or reclassifications of cash flows from the operating activities category to the financing activities category, might occur because those items were incorrectly classified in the previously issued financial statements. In such situations, the reclassification also is the correction of a misstatement. If the auditor determines that the reclassification is a change in accounting principle, he or she should address the matter as described in paragraphs 7 and 8 and AU sec. 508. If the auditor determines that the reclassification is a correction of a material misstatement in previously issued financial statements, he or she should address the matter as described in paragraphs 9 and 10 and AU sec. 508.

Appendix 2

Amendments to Interim Auditing Standards

The following amendments relate to the standards and auditing interpretations in AU sec. 328, the AU 400s sections, AU sec. 508, and AU sec. 561 of the Board's auditing standards.

Auditing Standards

AU sec. 328, "Auditing Fair Value Measurements and Disclosures"

Statement on Auditing Standards ("SAS") No. 101, "Auditing Fair Value Measurements and Disclosures," (AU sec. 328, "Auditing Fair Value Measurements and Disclosures"), as amended, is amended as follows:

- a. The text of footnote 4 to paragraph .19 is replaced with the following:

Statement of Financial Accounting Standard No. 157, *Fair Value Measurements*, states that a change in valuation technique or its application is appropriate if the change results in a measurement that is equally or more representative of fair value in the circumstances.

AU sec. 410, "Adherence to Generally Accepted Accounting Principles"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 410 (AU sec. 410, "Adherence to Generally Accepted Accounting Principles"), as amended, is amended as follows:

- a. Paragraph .02 is replaced with following paragraph, and the reference to footnote 1 is moved to the end of the new paragraph .02.

The fourth standard of reporting is:

The report shall either contain an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's work, if any, and the degree of responsibility the auditor is taking.

AU sec. 411, "The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles"

SAS No. 69, "The Meaning of *Present Fairly in Conformity With Generally Accepted Accounting Principles*" (AU sec. 411, "The Meaning of *Present Fairly in*

Conformity With Generally Accepted Accounting Principles"), as amended, is amended as follows:

- a. The third sentence of paragraph .01 is replaced with the following:
The purpose of this section is to explain the meaning of "present fairly" as used in the phrase "present fairly . . . in conformity with generally accepted accounting principles." In applying this section, the auditor should look to the requirements of the Securities and Exchange Commission for the company under audit with respect to the accounting principles applicable to that company.
- b. Paragraphs .02, .05, .07, and .09–.18 are deleted.

AU sec. 9411, "The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles, Auditing Interpretations of Section 411"

Auditing Interpretation No. 3, "The Auditor's Consideration of Management's Adoption of Accounting Principles for New Transactions or Events" of the auditing interpretations of AU sec. 411 (AU sec. 9411.11–.15) is deleted.

AU sec. 420, "Consistency of Application of Generally Accepted Accounting Principles," and AU sec. 9420, "Consistency of Application of Generally Accepted Accounting Principles, Auditing Interpretations of Section 420"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 420 (AU sec. 420, "Consistency of Application of Generally Accepted Accounting Principles"), as amended, and the related auditing interpretations (AU sec. 9420) are superseded by PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*.

AU sec. 431, "Adequacy of Disclosure in Financial Statements"

SAS No. 32, "Adequacy of Disclosure in Financial Statements" (AU sec. 431, "Adequacy of Disclosure in Financial Statements") is amended as follows:

- a. Footnote 1 is deleted.
- b. Paragraph .04 is deleted.

AU sec. 508, "Reports on Audited Financial Statements"

SAS No. 58, "Reports on Audited Financial Statements" (AU sec. 508, "Reports on Audited Financial Statements"), as amended, is amended as follows:

- a. In Paragraph .03, footnote 2 is deleted.
- b. In Paragraph .11, item .11b is deleted; item .11c is reordered as .11b; .11d is reordered as .11c; the paragraph references in .11c (formerly .11d) to paragraphs .16 through .18 are replaced with paragraph references .17A through .17E; and a new item .11d is added as follows:
"A material misstatement in previously issued financial statements has been corrected (paragraphs .18A through .18C)."

- c. Paragraphs .14–.15 are deleted, along with the preceding heading "Departure From a Promulgated Accounting Principle," and the note following the paragraph.
- d. The text of paragraph .16 is replaced with the following:
 - The auditor should recognize the following matters relating to the consistency of the company's financial statements in the auditor's report if those matters have a material effect on the financial statements:
 - a. A change in accounting principle
 - b. An adjustment to correct a misstatement in previously issued financial statements
- e. Paragraphs .17–.18 and related footnotes 12 and 13 are replaced with the following:

Change in Accounting Principle

.17A As discussed in PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*, the auditor should evaluate a change in accounting principle to determine whether (1) the newly adopted accounting principle is a generally accepted accounting principle, (2) the method of accounting for the effect of the change is in conformity with generally accepted accounting principles, (3) the disclosures related to the accounting change are adequate, and (4) the company has justified that the alternative accounting principle is preferable.¹² A change in accounting principle that has a material effect on the financial statements should be recognized in the auditor's report on the audited financial statements through the addition of an explanatory paragraph following the opinion paragraph. If the auditor concludes that the criteria in this paragraph have been met, the explanatory paragraph in the auditor's report should include identification of the nature of the change and a reference to the note disclosure describing the change.

¹² The issuance of an accounting pronouncement that requires use of a new accounting principle, interprets an existing principle, expresses a preference for an accounting principle, or rejects a specific principle is sufficient justification for a change in accounting principle, as long as the change in accounting principle is made in accordance with the hierarchy of generally accepted accounting principles. See FASB Statement 154, paragraph 14.

.17B Following is an example of an explanatory paragraph for a change in accounting principle resulting from the adoption of a new accounting pronouncement:

As discussed in Note X to the financial statements, the company has changed its method of accounting for [*describe accounting method change*] in [*year(s) of financial statements that reflect the accounting method change*] due to the adoption of [*name of accounting pronouncement*].

.17C Following is an example of an explanatory paragraph when the company has made a change in accounting principle other than a change due to the adoption of a new accounting pronouncement.

As discussed in Note X to the financial statements, the company has elected to change its method of accounting for [*describe accounting method change*] in [*year(s) of financial statements that reflect the accounting method change*].

.17D The explanatory paragraph relating to a change in accounting principle should be included in reports on financial statements in the year of the change and in subsequent years until the new accounting principle is applied in all periods presented. If the accounting change is accounted for by retrospective application to the financial statements of all prior periods presented, the additional paragraph is needed only in the year of the change.

.17E If the auditor concludes that the criteria in paragraph .17A for a change in accounting principle are not met, the auditor should consider the matter to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, issue a qualified or adverse opinion.

Correction of a Material Misstatement in Previously Issued Financial Statements

.18A Correction of a material misstatement in previously issued financial statements should be recognized in the auditor's report through the addition of an explanatory paragraph following the opinion paragraph.¹³ The explanatory paragraph should include (1) a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period and (2) a reference to the company's disclosure of the correction of the misstatement. Following is an example of an appropriate explanatory paragraph when there has been a correction of a material misstatement in previously issued financial statements.

As discussed in Note X to the financial statements, the 20X2 financial statements have been restated to correct a misstatement.

¹³ The directions in paragraphs .68-.69 apply when comparative financial statements are presented and the opinion on the prior-period financial statements differs from the opinion previously expressed.

.18B This type of explanatory paragraph in the auditor's report should be included in reports on financial statements when the related financial statements are restated to correct the prior material misstatement. The paragraph need not be repeated in subsequent years.

.18C The accounting pronouncements generally require certain disclosures relating to restatements to correct a misstatement in previously issued financial statements. If the financial statement disclosures are not adequate, the auditor should address the lack of disclosure as discussed beginning at paragraph .41 and in AU sec. 431.

- f. Paragraph .50 is deleted.
- g. The text of paragraph .51 is replaced with the following:

Departures from generally accepted accounting principles related to changes in accounting principle.

Paragraph .17A states the criteria for evaluating a change in accounting principle. If the auditor concludes that the criteria have not been met, he or she should consider that circumstance to be a departure from generally accepted accounting principles and, if the effect of the accounting change is material, should issue a qualified or adverse opinion.

- h. In paragraph .52:
 - The first three sentences of the paragraph are replaced with the following:

The accounting standards indicate that a company may make a change in accounting principle only if it justifies that the allowable alternative accounting principle is preferable. If the company does not provide reasonable justification that the alternative accounting principle is preferable, the auditor should consider the accounting change to be a departure from generally accepted accounting principles and, if the effect of the change in accounting principle is material, should issue a qualified or adverse opinion. The following is an example of a report qualified because a company did not provide reasonable justification that an alternative accounting principle is preferable:

- In the second sentence of the first paragraph of the example report, the phrase "for making this change" is replaced with the phrase "that this accounting principle is preferable."

In the text of footnote 17, the first two sentences are deleted; the word, "However" is deleted at the beginning of the third sentence; the word "because" at the beginning of the third sentence is capitalized; the phrase "the middle paragraph" is replaced with "this paragraph;" and the references to paragraphs ".16 through .18" are replaced with references to paragraphs "17A through 17E."

- i. The text of paragraph .57 is replaced with the following:

If the auditor issues a qualified or adverse opinion because the company has not justified that an allowable accounting principle adopted in an accounting change is preferable, as described in paragraph .52, the auditor should continue to express that opinion on the financial statements for the year of change as long as those financial statements are presented and reported on. However, the auditor's qualified or adverse opinion relates only to the accounting change and does not affect the status of a newly adopted principle as a generally accepted accounting principle. Accordingly, while expressing a qualified or adverse opinion for the year of change, the independent auditor's opinion regarding the subsequent years' statements need not express a qualified or adverse opinion on the use of the newly adopted principle in subsequent periods.
- j. In the text of footnote 19 to paragraph .59, "(b)" is added to the beginning of the list of subsections.
- k. The first sentence of footnote 20 to paragraph .62 is deleted.
- l. In the second sentence of footnote 25 to paragraph .67, replace the phrase "section 420, *Consistency of Application of Generally Accepted Accounting Principles*," with the phrase "PCAOB Auditing Standard No. 6, *Evaluating Consistency of Financial Statements*"
- m. In the second sentence of paragraph .69:
 - Item (c) is inserted as follows:

(c) if applicable, a statement that the previously issued financial statements have been restated for the correction of a misstatement in the respective period,

- Item (c) is changed to (d)
 - Item (e) is inserted as follows:
(e) if applicable, a reference to the company's disclosure of the correction of the misstatement,
 - Item (d) is changed to (f) and the words "the fact" are inserted at the beginning of the item
- n. In the third sentence of paragraph .73, the word "restated" is replaced with the word "adjusted."
- q. In paragraph .74:
- In the first sentence of the third text paragraph, the word "restated" is replaced with the word "adjusted," and the word "restatement" is replaced with the words "the adjustments."
 - In the second sentence of the third text paragraph, the word "restatement" is deleted, and the word "his" is replaced with the words "the auditor's."

AU sec. 561, "Subsequent Discovery of Facts Existing at the Date of the Auditor's Report"

SAS No. 1, "Codification of Auditing Standards and Procedures," section 561, "Subsequent Discovery of Facts Existing at the Date of Report," as amended, is amended as follows:

- a. The text of footnote 3 to paragraph .06 is replaced with the following:
- See paragraphs 26 and 27 of Accounting Principles Board Opinion No. 9 and paragraphs 25 and 26 of FASB Statement No. 154, regarding disclosure of adjustments applicable to prior periods.
-

PCAOB Release No. 2008-003***Ethics and Independence Rule 3526,
Communication With Audit Committees
Concerning Independence, Amendment to
Interim Independence Standards, Amendment
to Rule 3523, Tax Services for Persons in
Financial Reporting Oversight Roles,
Implementation Schedule for Rule 3523***

PCAOB Release No. 2008-003
April 22, 2008
PCAOB Rulemaking
Docket Matter No. 017

Summary: The Public Company Accounting Oversight Board ("PCAOB" or "Board") is adopting an ethics and independence rule, Rule 3526, *Communication with Audit Committees Concerning Independence*, that will supersede the Board's interim independence requirement, *Independence Standards Board Standard No. 1, Independence Discussions with Audit Committees* ("ISB No. 1"), and two related interpretations. The Board is also adopting an amendment to Rule 3523, *Tax Services for Persons in Financial Reporting Oversight Roles*, and further adjusting the implementation schedule for Rule 3523 as it applies to tax services provided during the audit period. Specifically, amended Rule 3523 will not prohibit tax services provided during the portion of the audit period that precedes the beginning of the professional engagement period. In order to maintain the status quo while the SEC considers this amendment, the Board has further delayed the implementation of the prohibition against pre-engagement period tax services to persons in financial reporting oversight roles in existing Rule 3523 until December 31, 2008. The amendment to Rule 3523 will become effective immediately upon approval by the SEC, and Rule 3526 will become effective on the later of September 30, 2008, or 30 days after the date the SEC approves the rule.

Board Contacts: Bella Rivshin, Associate Chief Auditor (202/207-9180; rivsh-inb@pcaobus.org), or Greg Scates, Deputy Chief Auditor (202/207-9114; scatesg@pcaobus.org).

I. Introduction

On July 26, 2005, the Public Company Accounting Oversight Board ("PCAOB" or "Board") adopted certain rules related to registered public accounting firms' provision of tax services to public company audit clients. As part of this rule-making, the Board adopted Rule 3523, which provides that a registered firm, subject to certain exceptions, is not independent of an audit client if the firm, or an affiliate of the firm, provides tax services during the audit and professional engagement period to a person in, or an immediate family member of a

person in, a financial reporting oversight role ("FROR") at an audit client. Rule 3523 was intended to address concerns related to auditor independence when auditors provide personal tax services to individuals who play a direct role in preparing the financial statements of public company audit clients. Rule 3523 was approved by the Securities and Exchange Commission ("SEC" or "Commission") on April 19, 2006.

On April 3, 2007, the Board issued a concept release to solicit comment about the possible effects on a registered firm's independence of providing tax services to a person covered by Rule 3523 during the portion of the audit period that precedes the beginning of the professional engagement period and other practical consequences of applying the restrictions imposed by Rule 3523 to that portion of the audit period.¹ With a few exceptions, commenters on that release recommended that the Board amend Rule 3523 to exclude that portion of the audit period.

After considering the comments received, on July 24, 2007, the Board proposed to amend Rule 3523 as described in the concept release.² At the same time, the Board also proposed Rule 3526, *Communication with Audit Committees Concerning Independence*, a new ethics and independence rule that would supersede *Independence Standards Board Standard No. 1, Independence Discussions with Audit Committees* ("ISB No. 1"), and two related interpretations, and require a registered public accounting firm to communicate certain information related to the firm's independence to the issuer's audit committee.

The Board received 16 comment letters on the proposed rules. Overall, the commenters were supportive of proposed Rule 3526 and the proposed amendment to Rule 3523. Commenters generally agreed that proposed Rule 3526 would enhance communication between the auditor and the audit committee and recommended that the Board adopt the rule. Commenters also reiterated that they believed that an auditor's independence would not be impaired by the provision of tax services to a person in a FROR during the portion of the audit period that precedes the beginning of the professional engagement period, and that the Board should adopt the proposed amendment to Rule 3523. Commenters also suggested certain modifications to the proposed rules.

The Board is adopting proposed Rule 3526 and the proposed amendment to Rule 3523 with some modifications in response to comments. This release describes key aspects of the amendment and new rule, comments received, and changes incorporated in the final rules. Additionally, as described below, the Board is further adjusting the implementation schedule for Rule 3523, as it applies to tax services provided to persons in FRORs during the period subject to audit but before the professional engagement period begins, to allow sufficient time for the SEC to consider whether to approve the amendment to the rule.

II. Rule 3526. Communication With Audit Committees Concerning Independence

Under Section 301 of the Sarbanes-Oxley Act of 2002 ("the Act"), "[t]he audit committee of each issuer, in its capacity as a committee of the board of directors, shall be directly responsible for the appointment, compensation, and oversight

¹ See PCAOB Release No. 2007-002 (April 3, 2007). Because the Board has adjusted the implementation schedule for Rule 3523, the rule has not prohibited the provision of tax services to persons in FRORs during the portion of the audit period that precedes the beginning of the professional engagement period.

² See PCAOB Release No. 2007-008 (July 24, 2007).

of the work of any registered public accounting firm employed by that issuer...for the purpose of preparing or issuing an audit report or related work...."³ PCAOB interim independence standards require the auditor to provide certain information to the audit committee about independence that could assist the audit committee in fulfilling these oversight responsibilities. Specifically, ISB No. 1 requires, among other things, firms to disclose at least annually to the audit committee all relationships between the auditor and its related entities and the company and its related entities that, in the auditor's professional judgment, may reasonably be thought to bear on the auditor's independence. ISB No. 1 does not, however, require the firm to provide information to the audit committee about the firm's independence in connection with *becoming* the issuer's auditor (i.e., *before* the person or firm becomes the issuer's auditor).

As discussed in the proposing release, the Board proposed Rule 3526 because it believed that the accounting firm should discuss with the audit committee before accepting an initial engagement pursuant to the standards of the PCAOB any relationships the accounting firm has with the issuer that may reasonably be thought to bear on its independence. The proposed rule was intended to build on the communication requirements in ISB No. 1 and provide the audit committee with information—including information about the firm's relationships with persons in FRORs at the company—that may be important to its determination about whether to hire the firm as the company's auditor. The Board also proposed to include in the rule a new requirement for the firm to document the substance of its discussion with the audit committee.

All commenters were generally in favor of the Board adopting the proposed rule, and, as discussed more fully below, some recommended modifications. Commenters stated that Rule 3526 would assist audit committees in fulfilling their responsibilities and would aid them in their decision making process. After carefully considering the comments, the Board is adopting Rule 3526 with one modification, as described below. If approved by the SEC, Rule 3526 will supersede ISB No. 1 and two related interpretations.⁴

A. Scope of the Required Communication

The Board proposed in Rule 3526(a) to require the registered firm, prior to accepting an initial engagement pursuant to the standards of the PCAOB, to

³ The SEC has implemented this provision by adopting rules directing the national securities exchanges and national securities associations to prohibit the listing of any security of an issuer that is not in compliance with the audit committee requirements mandated by the Act.

⁴ ISB Interpretation 00-1, *The Applicability of ISB Standard No. 1 When "Secondary Auditors" Are Involved in the Audit of a Registrant*, and ISB Interpretation 00-2, *The Applicability of ISB Standard No. 1 When "Secondary Auditors" Are Involved in the Audit of a Registrant, An Amendment of Interpretation 00-1*. The interpretations state that the responsibility to comply with ISB No. 1 rests solely with the primary auditor, but that the primary auditor should include in its report to the audit committee all of its relationships and those of its domestic and foreign associated firms that could reasonably bear on the independence of the primary auditor. Under these interpretations, if the primary auditor is relying on the work of secondary auditors not associated with the primary auditor's firm, the report of the primary auditor should either describe any such secondary auditors' relationships, or it should state that it does not do so. The treatment of secondary auditors under Rule 3526 will be similar to the treatment of secondary auditors under ISB No. 1 and the two interpretations. Secondary auditors will not need to comply with Rule 3526, but the primary auditor will need to disclose to the audit committee any relationships of the firm's affiliates that could reasonably be thought to bear on the independence of the primary auditor. As under ISB No. 1 and the related interpretations, the scope of any communications about secondary auditors under Rule 3526 should be clear to the audit committee. Accordingly, the Board expects the primary auditor's report to either include any covered relationships of any secondary auditors not affiliated with the firm or state that it does not do so. One commenter recommended that the Board consider providing an exemption for secondary auditors. Because the rule does not require communications by secondary auditors, an exemption is not necessary.

describe in writing to the audit committee⁵ all relationships between the accounting firm or any affiliates of the firm⁶ and the potential audit client or persons in FRORs at the potential audit client that may reasonably be thought to bear on independence. The Board also proposed to require the firm to discuss with the audit committee the potential effects of those relationships on the firm's independence. In Rule 3526(b), the Board proposed to require a registered firm on at least an annual basis after becoming the issuer's auditor to provide the same information described above and also affirm to the audit committee of the issuer, in writing, that the firm is independent in compliance with Rule 3520, *Auditor Independence*.⁷ As described in the proposing release, the Board intended for these communications to provide the audit committee with sufficient information to understand how a particular relationship might affect independence and to foster a robust discussion between the firm and the audit committee.

Commenters generally believed that the scope of the required communications was appropriate. Several commenters noted that, to a large extent, firms are already making the kinds of communications that would be required by proposed Rule 3526. One commenter acknowledged, however, that existing communications between the firm and a potential new audit client do not include the disclosure of tax services to a person in a FROR or his or her immediate family member. Additionally, some registered firms noted that communications regarding the auditor's independence currently vary in content and timing and may, in some instances, occur only orally.

Most commenters did not believe that it was necessary for the Board to expand the scope of the required communication to include any additional matters. One commenter, however, recommended requiring the firm to confirm its independence in writing to the audit committee prior to accepting an initial engagement. Another commenter recommended revising Rule 3526(a) to require the firm to make the communications in its initial proposal to the company's audit committee. As discussed above, the Board proposed to require firms to affirm their independence annually but did not propose a similar requirement that would apply before the firm is initially engaged as the company's auditor. Rule 3526(a) requires registered firms to make certain communications about relationships that may reasonably be thought to bear on independence before accepting an initial engagement pursuant to the standards of the PCAOB. Rather than prescribing a particular time before that point when the communications must occur, however, the rule allows registered firms and audit committees the flexibility to make that determination. The Board understands that, in some cases, firms need time before a new engagement begins to resolve any matters

⁵ One commenter recommended the Board provide guidance in situations in which an issuer does not have an audit committee. Under Section 2(a)(3) of the Act, "[t]he term 'audit committee' means – (A) a committee (or equivalent body) established by and amongst the board of directors of an issuer for the purpose of overseeing the accounting and financial reporting processes of the issuer and audits of the financial statements of the issuer; and (B) if no such committee exists with respect to an issuer, the entire board of directors of the issuer." Accordingly, under Rule 3526, if an audit client does not have an audit committee, the auditor would be required to make the communications to the entire board of directors. Additionally, one commenter recommended that audit committees provide better disclosure, through the proxy, when approving non-audit services performed by the auditor. The commenter stated that providing this type of transparency will permit investors a greater ability to evaluate audit committee's fiduciary performance of shareholders. The Board does not have statutory authority to require disclosure by audit committees.

⁶ One commenter recommended that the Board adopt a definition of affiliate of the firm. This term is already defined in Rule 3501.

⁷ Rule 3520 states that a registered public accounting firm and its associated persons must be independent of the firm's audit client throughout the audit and professional engagement period.

that could impair their independence. If a firm were required to affirm its independence prior to accepting a new engagement, it would need to wait until it has resolved any independence issues to make the required communications. These communications are intended to assist the audit committee in fulfilling its responsibility to hire the auditor—their usefulness for that purpose may diminish if they are left until immediately before the engagement begins. Accordingly, the Board does not believe a requirement for auditors to affirm that they are independent before accepting a new engagement is appropriate.

Other commenters recommended certain exclusions from the scope of the required communications. For example, one commenter asserted that the auditor cannot be expected to know about all relationships that may reasonably be thought to bear on its independence, and recommended that the written communication to the audit committee state that the auditor's assessment is based on information provided to the auditor by the issuer. The Board does not believe that allowing auditors to include such a limitation in the communication would be appropriate. Complying with the Board's independence requirements is the responsibility of the auditor.⁸ To fulfill this responsibility, as well as their related responsibility under the SEC's independence rules, auditors need to ascertain what relationships with the issuer and persons in FRORs at the issuer may reasonably be thought to bear on their independence. Moreover, some of the information the auditor must assess in order to assure its independence and that may need to be communicated under Rule 3526—such as the firm's or its associated persons' financial interests in the audit client—can be more readily obtained by the auditor than its audit client.

Another commenter recommended that the Board exclude tax services to a person in a FROR from the required communications because the commenter believed that compliance with Rule 3523, as amended, should adequately address any independence concerns regarding such services. As discussed in the proposing release, Rule 3526 is intended to require disclosure of not only whether the firm provided any specifically prohibited services or maintained any specifically prohibited relationships, but also whether any of the firm's relationships or services may reasonably be thought to bear on independence under the SEC's general standard of auditor independence⁹ and AU sec. 220, *Independence*.¹⁰ Because auditors will need to consider the relevant facts and circumstances

⁸ Another commenter suggested that the audit committee should be able to rely on the firm to determine and resolve any independence issues, and that a requirement for the auditor to discuss these matters with the audit committee would increase the responsibilities of the audit committee with respect to independence. This commenter recommended that the Board not adopt these requirements. As discussed above, the rule is intended to provide audit committees with information to assist them in carrying out their responsibilities to oversee the audit engagement, but auditors remain responsible for complying with the independence requirements. Nothing in the rule adds to, or otherwise modifies, the responsibilities of the audit committee.

⁹ 17 C.F.R. § 210.2-01(b). Under that standard, an accountant is not independent if "the accountant is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the accountant is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement." In considering this general standard, the SEC "looks in the first instance to whether a relationship or the provision of service: creates a mutual or conflicting interest between the accountant and the audit client; places the accountant in the position of auditing his or her own work; results in the accountant acting as management or an employee of the audit client; or places the accountant in a position of being an advocate for the audit client." 17 C.F.R. § 210.2-01, preliminary note.

¹⁰ AU sec. 220, *Independence*, requires that "[i]n all matters relating to the assignment, an independence in mental attitude is to be maintained by the auditor..." AU sec. 220 notes that "[i]t is of utmost importance to the profession that the general public maintain confidence in the independence of independent auditors" and that public confidence in the auditor's independence "would be impaired by evidence that independence was actually lacking, and it might also be impaired by the existence of circumstances which reasonable people might believe likely to influence independence."

in order to make such a determination, the Board does not believe that *per se* exemptions are appropriate.

Some commenters suggested that, in certain circumstances, firms would be restricted in the information they could provide to the audit committee about relationships with persons in FRORs due to legal limitations imposed by confidentiality and privacy laws. Specifically, one commenter was concerned that the auditor would not be able to disclose to the audit committee information about tax services rendered to a person in a FROR prior to obtaining a consent from that person. Another commenter recommended that the Board address the need for obtaining such a consent in its final release, while another recommended that the Board provide an exemption in circumstances where applicable legal restrictions impede an auditor's ability to comply fully with the disclosure requirement.

Under ISB No. 1, auditors have been required to disclose to the audit committee relationships with the company and its related entities and to discuss the auditor's independence with the audit committee. Accordingly, the required communications could include discussion of tax or other services provided to an entity or person other than the company itself. The Board understands that firms are subject to certain confidentiality requirements in the tax context¹¹ and that other restrictions could arise outside of that context, depending on the facts and circumstances that a particular relationship presents. The Board is not, however, aware that firms have encountered difficulty in communicating with audit committees, as required by ISB No. 1 or any other professional practice standard, as a result of such privacy requirements.

As described above, Rule 3526 is a general requirement that, like ISB No. 1, requires disclosure of certain relationships that may be relevant to the audit committee's oversight of the engagement. It does not set forth a list of relationships that must always be disclosed or mandate specific information that must be communicated when disclosure is required. Rather, Rule 3526 allows firms significant flexibility to determine how to comply with the requirements to describe a covered relationship and discuss the potential effects of that relationship on the firm's independence. Accordingly, while the Board will monitor the application of the rule in this regard, it does not believe that the recommended exception is necessary or appropriate at this time.

The Board also received several comments on its proposal not to include the words "in the auditor's professional judgment" in the rule's description of the scope of the required communications. ISB No. 1 requires disclosure of certain relationships that "in the auditor's professional judgment may reasonably be thought to bear on independence." In the proposing release, the Board explained that it believed that omitting the reference to the auditor's professional judgment would clarify the requirement by reminding auditors of the need to focus on the perceptions of reasonable third parties when making independence determinations. Some commenters supported the proposed exclusion of the words "in the auditor's professional judgment" from Rule 3526. Other commenters, however, believed that the absence of the reference to judgment could confuse, rather than clarify, the requirement and noted that it is reasonable and appropriate for audit committees to rely on the accounting firm's judgment as to what matters should be disclosed. One of these commenters contended that this aspect of the Board's proposal is inconsistent with the Board's recent

¹¹ See 26 U.S.C. § 7216; 26 C.F.R. § 301.7216-3 (prohibiting disclosure or use of tax return information without written consent of taxpayer that meets specified requirements); 26 C.F.R. § 301.7216-1 (defining "tax return information" to mean "any information, including, but not limited to a taxpayer's name, address, or identifying number, which is furnished in any form or manner for, or in connection with, the preparation of a tax return of the taxpayer").

focus on the importance of the use of auditor judgment. Conversely, one commenter did not object to the absence of a reference to judgment, provided that the adopting release contain an acknowledgement that the auditor must apply judgment in determining which matters are required to be communicated to the audit committee.¹²

As the Board explained in the proposing release, auditors will need to apply judgment to determine whether a relationship may reasonably be thought to bear on independence. After considering commenters' views, the Board continues to believe that adding specific reference to the auditor's professional judgment is unnecessary and inappropriate in this instance. While the Board agrees that auditors must exercise sound judgment in carrying out their responsibilities, it does not believe that specific reference to judgment in this rule is necessary to encourage auditors to do so. Judgment is called for in applying any reasonableness standard to particular facts and circumstances, and Rule 3526 is no different. Determining what relationships may reasonably be thought to bear on independence requires consideration of how a third party—not the auditor—would view the relationship, which is consistent with the SEC's general standard of auditor independence and AU sec. 220. A reference to "in the auditor's professional judgment" could suggest otherwise, however, and therefore could discourage the necessary analysis. Accordingly, the Board has determined not to add the phrase to Rule 3526.

B. Time Period Covered by Rule 3526(a)

In the proposing release, the Board solicited comment on whether the initial communication in Rule 3526(a) should be limited to relationships that existed during a particular period, and, if so, how long that period should be. Commenters provided a wide variety of recommendations in this area. Some commenters stated that the initial communication should not be limited to relationships that existed during a particular period. Some of these commenters noted that establishing a specific period could result in arbitrary exclusion of certain relationships and recommended that the audit committee and auditor be responsible for determining the relevant time frame.

Other commenters recommended that the time period be limited to the audit and professional engagement period because, according to these commenters, the relevant relationships are those that exist currently or will continue to exist. One of these commenters stated that requiring communication of relationships that existed prior to this period would cause an unnecessary burden on the firm to identify and communicate these matters and on the audit committee to consider such information, because the firm was not subject to the auditor independence rules with respect to the audit client before the beginning of the audit and professional engagement period. One commenter recommended that the required time period should, at a minimum, be the audit period and that the rule should require auditors to consider communicating relationships that existed before that time. Finally, one commenter recommended that the time period should be no longer than two years prior to the commencement of the audit period, and two commenters recommended that the proposed rule should cover a time period of at least three years.

After considering these comments, the Board has determined that the initial communication required by Rule 3526(a) should not be limited to relationships

¹² Additionally, one commenter recommended including the reference to judgment and also referring to the SEC's general standard of auditor independence and the preliminary note to the SEC's independence rules in the proposed rule or the adopting release. Footnote 9 of this release refers to the general standard and the preliminary note.

that existed during a particular time period. While the Board agrees that a relationship that existed during the audit and professional engagement period may be more likely to bear on independence than a relationship that ended substantially before that time, it does not believe that the passage of time is the only factor relevant to a determination of whether a relationship may reasonably be thought to bear on independence. The nature of the relationship must also be considered. For example, if the firm customized and implemented the company's financial reporting system, that relationship, depending on the circumstances, might reasonably be thought to bear on independence even if the engagement to design the system was concluded before the beginning of the audit and professional engagement period. Determining whether a particular relationship is covered by Rule 3526(a) will, therefore, depend on the relevant facts and circumstances.

The Board is making one modification to the rule in response to a comment recommending that Rule 3526 make clear that the relationships required to be disclosed are those that may reasonably be thought to bear on independence as of the date of the communication. Because the relevant relationships are those that continue to bear on independence at the time of the communication, the Board has modified the rule by adding the words "as of the date of the communication" where appropriate. This clarification should help firms distinguish relationships that are covered by the rule from those that are not.

This modification should also clarify that, if a relationship may reasonably be thought to bear on independence as of the date of the communication, it must be disclosed regardless of whether it was disclosed in a prior year. Some commenters suggested that auditors should not be required to repeat a previously made disclosure. The Board believes that an earlier disclosure may reduce the amount of information that needs to be disclosed, but it does not obviate the need for disclosure altogether. If the nature of the relationship and the potential effects of the relationship on independence remain substantially unchanged, a reference to the earlier disclosure will generally be sufficient when disclosure is required. Moreover, as discussed above, after some amount of time, the length of which depends on the nature of the relationship, a relationship may no longer reasonably be thought to bear on independence and, therefore, would no longer need to be disclosed.

C. Timing of the Communications

As discussed above, the Board proposed Rule 3526(a) because it believed that auditors should communicate relevant information about independence before becoming the issuer's auditor. A few commenters expressed concern that the proposed rule could cause undue burden on private companies pursuing an initial public offering if the communication were required before the auditor accepts an engagement to assist an existing private company client in going public. According to commenters, a requirement to complete the independence assessment before the auditor could commence work related to the initial public offering might disadvantage the audit client by causing delay. One commenter stated that auditors generally begin work on the initial public offering based upon an initial review of relationships between the accounting firm and the company and complete their independence assessment before the company's registration statement is filed. This commenter suggested that the Board reconsider the required timing of the communications in the context of an initial public offering.

After considering these comments, the Board has determined that relieving a firm whose private company audit client is pursuing an initial public offering

from compliance with Rule 3526 is not necessary or appropriate. As discussed above, the rule is intended to provide audit committees with the information they need to effectively oversee the audit engagement. When a private company undertakes an initial public offering, it must, for the first time, have its financial statements audited by an auditor that is independent within the meaning of the rules of the SEC and PCAOB. Among other decisions an audit committee must make is whether to engage its existing auditor for the initial public offering or whether to retain a new auditor for that purpose. In this context, the Board believes that the communication about an existing auditor's independence—which is relevant to the existing auditor's ability to continue as the company's auditor through, and after, the initial public offering – should not be delayed until just before the registration statement is filed. Moreover, the Board believes that this evaluation will not cause an unnecessary burden because the private company is already a client of the accounting firm and therefore should already be aware of most of the relationships that would need to be communicated.

The Board also received comment on the timing of the annual communication requirement that the Board proposed in Rule 3526(b). Like ISB No. 1, proposed Rule 3526 did not specify when during the year the firm would be required to make the annual communication.¹³ One commenter recommended that the Board specify in Rule 3526(b) when the annual communication should take place to make sure that these critical discussions do not take place at the end of the audit engagement. The commenter recommended that the proposed rule be changed to state that firms should apply Rule 3526 as early in the audit process as practicable, preferably during the planning stage of the audit. One commenter recommended that the communication occur before substantial planning procedures commence, while another recommended that the annual communication should take place at the time the engagement letter is signed and then again near the end of the audit. Finally, one commenter recommended adding a section to Rule 3526 requiring an auditor to update the communications when he or she becomes aware of a covered, previously unknown or new relationship.

After considering these comments, the Board does not believe it is appropriate to mandate specifically when the Rule 3526(b) annual communication take place. In most cases, the communications will be more useful if they take place near the beginning of the audit process. However, by not prescribing the timing of the communication, Rule 3526(b) will allow the auditor and audit committee to determine the timing that is most appropriate in the circumstances of the particular engagement. Similarly, the Board does not believe that it is necessary for the rule to explicitly address how a firm should correct an incomplete communication.

III. Rule 3523. Tax Services for Persons in Financial Reporting Oversight Roles

A. Amendment to Rule 3523 to Exclude the Portion of the Audit Period That Precedes the Professional Engagement Period

Rule 3523, as adopted by the Board, prohibits a registered public accounting firm, or an affiliate of the firm, from providing tax services during the "audit

¹³ The Board understands that, under ISB No. 1, the communication typically occurs at the end of the audit when the financial statements are issued.

and professional engagement period" to a person in, or an immediate family member of a person in, a FROR at the audit client. Consistent with the SEC's independence rules,¹⁴ the phrase "audit and professional engagement period" is defined to include two discrete periods of time. The "audit period" is the period covered by any financial statements being audited or reviewed.¹⁵ The "professional engagement period" is the period beginning when the firm either signs the initial engagement letter or begins audit procedures, whichever is earlier, and ends when either the company or the firm notifies the SEC that the company is no longer that firm's audit client.¹⁶

In circumstances in which a registered firm has been the auditor for an audit client for more than a year, the "audit period" is a subset of the "professional engagement period." However, when a registered firm accepts a new audit client, the audit period may cover a period of time before the commencement of the professional engagement period. In such circumstances, Rule 3523, as adopted, provides that the firm is not independent of its audit client if the firm, or an affiliate of the firm, provided tax services to a person covered by Rule 3523 during the audit period but before the beginning of the professional engagement period. This aspect of the rule therefore effectively prevents a firm from accepting a new audit client if the firm, or an affiliate of the firm, provided tax services to such a person during the period covered by any financial statements to be audited or reviewed.

In preparing for implementation of the Board's tax services and independence rules, the Board decided to revisit the application of Rule 3523 to tax services provided during the audit period. As discussed above, on April 3, 2007, the Board issued a concept release to solicit comment about the possible effects on a firm's independence of providing tax services to a person covered by Rule 3523 during the portion of the audit period that precedes the beginning of the professional engagement period, and other practical consequences of applying the restrictions imposed by Rule 3523 to that portion of the audit period. After careful consideration of comments received in response to the concept release, the Board, on July 24, 2007, proposed to amend the rule to exclude the portion of the audit period that precedes the beginning of the professional engagement period.¹⁷

The Board received 13 comments on the proposed amendment to Rule 3523. Almost all of the commenters supported the Board's recommendation to amend Rule 3523.¹⁸ Many of these commenters reiterated their belief that the firm's independence would not be affected by the provision of tax services to a person in a FROR during the portion of the audit period that precedes the beginning of

¹⁴ 17 C.F.R. § 210.2-01(f)(5).

¹⁵ Rule 3501(a)(iii)(1).

¹⁶ Rule 3501(a)(iii)(2).

¹⁷ See PCAOB Release No. 2007-008, which includes a discussion of the comments the Board received on the concept release.

¹⁸ Only one commenter on the proposed rule objected to the amendment of Rule 3523. This commenter's objection stemmed from the contention that the terms "professional engagement period" and "a person in a financial reporting role" were not defined. Definitions for "professional engagement period" and "financial reporting oversight role" are provided under Rules 3501(a)(iii)(2) and 3501(f)(i), respectively. The same commenter, while not specifically addressing the proposed amendment, also expressed concern with Rule 3523(a), which provides an exception for tax services to a person who is in a FROR only because he or she serves as a member of the Board of Directors, and, referring to the responsibilities of directors, recommended deleting this section in its entirety. This commenter also recommended that the Board eliminate Rule 3523(b), which provides an exception, under certain circumstances, for tax services to a person who is in a FROR only because of the person's relationship to an affiliate of the entity being audited. The Board does not believe that eliminating these exceptions is warranted.

the professional engagement period. Commenters also reaffirmed their belief that, if Rule 3523 is not amended, it could adversely affect companies' ability to change auditors by limiting the companies' choice of auditors.

The Board has carefully considered these comments, as well as the comments on the concept release,¹⁹ and determined to adopt the amendment to Rule 3523. The Board continues to believe that it is not necessary for the rule to restrict the provision of tax services during the portion of the audit period that precedes the professional engagement period. Rule 3523 relates to services provided to individuals and not the audit client that issues the financial statements subject to audit. Additionally, registered firms would remain responsible for considering the relevant facts and circumstances of a specific tax engagement and determining whether their independence is impaired under the SEC's general standard of auditor independence.²⁰

One commenter objected to the discussion in the proposing release (and included here in the paragraph above) describing the firm's obligation to consider whether the firm's independence is impaired under the SEC's general standard of auditor independence. This commenter stated that the discussion sends a contradictory message by calling for firms to assess whether their independence is impaired despite the Board's conclusion that restrictions are unnecessary to preserve independence. The Board disagrees. As a result of the Board's amendment, firms will not be specifically prohibited by Rule 3523 from providing tax services to persons in a FROR during the portion of the audit period that precedes the professional engagement period. That does not mean, however, that such services are categorically permitted. Rather, as discussed in the proposing release, the amendment reflects the Board's belief that a more tailored approach, based on facts and circumstances and measured against the general standard of auditor independence, is preferable to a *per se* prohibition. Accordingly, as with any other service or relationship that is not specifically prohibited by the independence rules, firms must determine whether the service or relationship impairs independence under the SEC's general standard of auditor independence.

B. Application of Rule 3523 to New Issuers

The Board proposed adding a note to Rule 3523 concerning the application of Rule 3523 in the context of an initial public offering in light of comments received on the concept release. The proposed note stated that, in the context of an initial public offering, the provision of tax services to a person covered by Rule 3523 before the earlier of the date that a registered firm: (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB, or (2) began procedures to do so, does not impair a firm's independence under Rule 3523. Commenters generally recommended that the Board adopt the note and encouraged the Board to consider expanding it to include other corporate life events, noting that corporate life events other than an initial public offering may also result in the need for an audit client's

¹⁹ In response to the concept release, two commenters stated that Rule 3523 should not be amended to exclude the portion of the audit period that precedes the professional engagement period. These commenters believed that providing tax services to a person in a FROR during the audit period impairs independence, and suggested that audit firms may plan for a change of auditors sufficiently in advance to avoid or minimize any problems resulting from the application of the rule to the audit period.

²⁰ 17 C.F.R. § 210.2-01(b); see footnote 9.

financial statements to be audited pursuant to the standards of the PCAOB for the first time.²¹

In response to these comments, the Board determined to revise the note to Rule 3523 to describe events, other than just initial public offerings, pursuant to which a company's financial statements must be audited in accordance with the standards of the PCAOB for the first time. Specifically, the Board replaced the words "[i]n the context of an initial public offering" with "[i]n an engagement for an audit client whose financial statements for the first time will be required to be audited pursuant to the standards of the PCAOB." This situation may occur when a company decides to conduct an initial public offering of its securities,²² which would require the company to file, for the first time, a registration statement under the Securities Act of 1933. Additionally this situation may occur when a foreign private issuer decides to list its securities on a national securities exchange, which would require the company to register its securities, for the first time, under the Securities Exchange Act of 1934. In both cases, the company's audited financial statements would be required, for the first time, to be audited pursuant to the standards of the PCAOB.²³

The Board does not believe it is appropriate to list in the note the various corporate life events identified by commenters, such as mergers or acquisitions, reverse mergers or other similar transactions. The relevant factor is not the name given to a transaction or event but whether the transaction or event triggers the initial requirement for an audit pursuant to the standards of the PCAOB. For example, the surviving company in a merger or acquisition transaction may be an issuer that is already filing with the SEC financial statements required to be audited pursuant to the standards of the PCAOB. The Board did not intend the note to Rule 3523 to describe such a scenario.²⁴ By focusing on the need for a first-time audit pursuant to the standards of the PCAOB, the company and its auditors are better able to determine whether a proposed transaction or corporate life event is described by the note.

One commenter stated that, while it is easy to identify the date on which the initial engagement letter to perform an audit pursuant to the standards of the PCAOB is signed, it would be very difficult to apply the second prong of the note, which requires identification of the date that the auditor began procedures to perform an audit pursuant to the standards of the PCAOB, especially

²¹ Commenters suggested the following as examples of when an audit client's financial statements would, for the first time, need to be audited pursuant to the standards of the PCAOB—mergers, reverse mergers in which a privately-held entity merges with a public company and succeeds to the public company's reporting obligations under the Securities Exchange Act of 1934, issuance of publicly traded debt, issuance of partnership or other units, inclusion of a public company's securities in an employee benefit plan, decision by a foreign private issuer to list its securities in the United States, and companies that have greater than 500 U.S. shareholders and total assets exceeding \$10 million as of the latest fiscal year-end.

²² The company may offer equity securities, debt securities, limited partnership interests, trust interests, or another type of securities in the initial public offering.

²³ The Board intends the note to Rule 3523 to describe all circumstances in which a company that was not an "issuer," as defined by the Act, becomes an issuer as a result of a corporate life event or otherwise. These circumstances include those in which a private company that was once an issuer becomes an issuer again. As long as the company was not required to have its financial statements audited pursuant to the standards of the PCAOB, the company and its auditors are better able to determine whether a proposed transaction or corporate life event is described by the note.

²⁴ Another example is a private operating company becoming a reporting company through a reverse merger with a reporting shell company. In this scenario, even though the operating company assumes the reporting obligations of the former shell company, the surviving reporting company is the former shell company whose financial statements already were required to be audited pursuant to the standards of the PCAOB. Therefore, the note to Rule 3523 does not describe this situation.

if the registered firm audited the company's prior years' financial statements.²⁵ Another commenter similarly questioned whether this period begins when the auditor begins planning for the audit. The Board recognizes that, in certain circumstances, it may be difficult to identify when a continuing auditor began procedures pursuant to the standards of the PCAOB. An auditor begins procedures for purposes of Rule 3523 when he or she begins procedures, including required audit planning procedures, to update its earlier audits to conform them to the standards of the PCAOB or begins procedures on a new audit pursuant to those standards. This point in time will depend on the facts and circumstances of the particular engagement and corporate life event, rather than on any more specific triggering event that the Board could establish by rule.

C. Transition Periods

Rule 3523 prohibits the provision of tax services to covered persons once the professional engagement period begins. Some commenters on the concept release recommended that the Board amend Rule 3523 to allow a transition period after a company changes auditors so that the new auditor may complete any tax services in progress to any persons in FRORs affected by the issuer's change of auditors.²⁶ Other commenters stated that tax services to persons in FRORs should, as is currently required, cease before the professional engagement period begins. The Board decided to seek further feedback on this topic in the proposing release. Specifically, the Board asked commenters to specify why they believed any transition period was necessary and how long any such transition period should be.²⁷

The majority of commenters on this topic recommended that the Board provide for a 180-day transition period to allow an accounting firm to complete covered tax services once the professional engagement period begins. Most of these commenters stated that, since the Board has previously determined that a 180-day transition is appropriate when a person is hired or promoted into a FROR,²⁸ the Board should provide the same transition when an issuer changes its auditor. The commenters stated that, without a transition period, the person in a FROR could experience undue hardship because he or she may have to switch tax preparers in the middle of the personal tax services engagement. Additionally, some commenters stated that some accounting firms may not be able to terminate the in-process personal tax services engagements within a timeframe that would also allow them to submit their proposal for the new audit engagement. Conversely, some commenters stated that they believed that the Board should not provide a transition period and that it is appropriate for the firm to cease the personal tax services before the professional engagement

²⁵ The commenter noted that, when a company undertakes an initial public offering, it is required to include in the registration statement audited financial statements for its past three completed fiscal years. These financial statements may have previously been audited pursuant to generally accepted auditing standards ("GAAS"). The commenter was concerned that if the company does not retain a new auditor for its initial public offering, there may be a question as to whether the auditor should consider its audits of the prior years in assessing when it "began procedures" as provided under the note to Rule 3523. An auditor should not consider work already performed on previously completed GAAS audits for determining when the auditor "began procedures" because those audits were not performed pursuant to the standards of the PCAOB.

²⁶ Rule 3523(c) provides a time-limited transition period for an auditor to complete in-progress tax services to a person that becomes a FROR at the audit client through a hiring, promotion, or other change in employment event. That transition period is unaffected by this release.

²⁷ See PCAOB Release 2007-008 (July 24, 2007), at 12.

²⁸ See Rule 3523(c).

period begins or that a transition period should only be available on a case-by-case basis where cessation of services would cause significant hardship.²⁹

After considering these comments, the Board does not believe that a transition period is necessary when a company changes its auditor and has determined not to amend Rule 3523 to include one. The Board adopted Rule 3523 because the provision of tax services to a person in a FROR after the accounting firm is hired as the auditor creates an unacceptable appearance that the firm lacks independence. While the Board believed a time-limited exception was warranted to accommodate persons who, through a hiring or promotion event, abruptly become covered by the rule, it does not believe that such a transition period is similarly necessary after an auditor change. In the former situation, the firm already is the issuer's auditor and has no control over whether or when the person is promoted or otherwise moved into a FROR. In contrast, the firm controls whether and when it begins a new engagement. The Board therefore believes that the firm is able to conclude, or transition to another provider, any tax services to persons in FRORs at a new audit client before beginning the engagement.³⁰

Some commenters also encouraged the Board to consider providing a transition period for firms to complete tax services to persons who become covered by Rule 3523 as a result of a corporate life event, such as a merger, acquisition, or initial public offering. Commenters suggested that such corporate life events present conceptually similar transition issues to those related to the hiring or promotion of a person into a FROR and that Rule 3523(c) should therefore be expanded to accommodate them. Commenters also stated that the absence of transitional relief may cause unnecessary hardship for persons in FRORs whose tax return preparation work was well underway at the point of the initial public offering, merger, or acquisition.³¹

As discussed above, in the context of an initial public offering, the rule, as amended, makes clear that tax services provided to a person in a FROR do not impair independence as long as those tax services are concluded before the earlier of the date that the firm: (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB, or (2) began procedures to do so. Auditors should have sufficient time before that date to conclude any tax services to persons that would be covered by the rule. Accordingly, the Board does not believe that the recommended transition period is necessary in the context of an initial public offering.

The Board also considered whether a transition period is necessary to allow a firm to conclude tax services to persons who become covered by the rule after a merger or acquisition. As discussed above, Rule 3523(c) already provides a transition period for a firm to conclude tax services to a person who was not in a FROR before a hiring, promotion, or other change in employment event. If a

²⁹ Another commenter stated that Rule 3523 should be effective immediately for issuers with fiscal years ending on or after December 15, 2007, that all personal tax services in process should be allowed to continue until the filing of the applicable tax return, and that such services, along with the related fees, should be disclosed in the issuer's filings with the SEC and documented in the minutes of meetings of the audit committee.

³⁰ Nothing in Rule 3523 requires a firm to complete or terminate tax services to persons in FRORs at a potential audit client before submitting a proposal for a new audit engagement. Rather, the rule requires the accounting firm to complete or terminate those services by the beginning of the professional engagement period.

³¹ The commenters further stated that, because persons in FRORs may receive tax services from a number of accounting firms, the application of the rule to the audit period may unreasonably restrict a company's ability to either continue or change auditors after a corporate life event. As discussed above, the Board has amended the rule to exclude the portion of the audit period that precedes the professional engagement period.

business combination results in a change of employer for a person in a FROR—from, for example, the acquired company to the acquiring company—the existing transition period in Rule 3523 would apply.³² For example, if Company A acquires Company B, a person who was in a FROR at Company B would experience an "other change in employment event" if he or she became an employee of Company A in a FROR as a result of the acquisition. If such a person had been receiving tax services from Company A's registered public accounting firm pursuant to an engagement in process before the acquisition, the time-limited exception in Rule 3523(c) would apply.³³

In the example above, persons in FRORs at Company A would not experience a change in employment event because they were employed by Company A both before and after the acquisition, and Rule 3523(c) would, therefore, not apply. If Company B's auditor became Company A's auditor after the acquisition (replacing Company A's auditor), Company B's auditor would have to conclude any tax services to persons in FRORs (and their immediate family members) at Company A before the start of the professional engagement period. The Board believes this is appropriate because, as discussed above, the Board does not believe that a transition period is necessary to allow a newly engaged auditor to conclude in-progress tax services to persons in FRORs at the new audit client. Accordingly, the Board has determined not to expand the existing transition period in Rule 3523(c).

IV. Effective Date and Adjustment of Implementation Schedule

Rule 3526 establishes new requirements for registered public accounting firms. The Board believes it is appropriate to allow a reasonable period of time for such firms to prepare internal policies and procedures and train their employees to ensure compliance with these new requirements. Accordingly, Rule 3526 will become effective, and ISB No. 1 and the related interpretations superseded, on the later of September 30, 2008, or 30 days after the date that the SEC approves the rule.

The amendment to Rule 3523 would have the effect of making permanent the Board's delay in implementing the rule as it applies to tax services provided during the period subject to audit but before the professional engagement period. Accordingly, no transition period is necessary, and the amended rule will become effective immediately upon approval by the SEC. The Board has also determined to further adjust the implementation schedule for Rule 3523 to allow sufficient time for the SEC to consider whether to approve the amendment to Rule 3523.³⁴ Specifically, the Board will not apply Rule 3523 to tax services provided on or before December 31, 2008, when those services are provided during the audit period and are completed before the professional engagement period begins.³⁵ The Board has filed this adjustment to the implementation schedule with the SEC as an immediately effective proposed rule change. The

³² See also Staff Questions and Answers, *Ethics and Independence Rules Concerning Independence, Tax Services and Contingent Fees* (April 3, 2007), Question and Answer No. 6, at 4-5.

³³ *Id.*

³⁴ Under the adjustment to the implementation schedule for Rule 3523 that the Board made on July 24, 2007, the Board will not apply Rule 3523 to tax services provided on or before April 30, 2008, when those services are provided during the audit period and are completed before the professional engagement period begins.

³⁵ This will apply regardless of whether there is an engagement in process on April 30, 2008.

rule change became effective upon its filing with the SEC, thereby extending to December 31, 2008 the implementation date for this aspect of Rule 3523.

Rule 3523. Tax Services for Persons in Financial Reporting Oversight Roles

A registered public accounting firm is not independent of its audit client if the firm, or any affiliate of the firm, during the ~~audit and~~ professional engagement period provides any tax service to a person in a financial reporting oversight role at the audit client, or an immediate family member of such person, unless—

- a. the person is in a financial reporting oversight role at the audit client only because he or she serves as a member of the board of directors or similar management or governing body of the audit client;
- b. the person is in a financial reporting oversight role at the audit client only because of the person's relationship to an affiliate of the entity being audited—
 - (1) whose financial statements are not material to the consolidated financial statements of the entity being audited; or
 - (2) whose financial statements are audited by an auditor other than the firm or an associated person of the firm; or
- c. the person was not in a financial reporting oversight role at the audit client before a hiring, promotion, or other change in employment event and the tax services are—
 - (1) provided pursuant to an engagement in process before the hiring, promotion, or other change in employment event; and
 - (2) completed on or before 180 days after the hiring or promotion event.

Note: In an engagement for an audit client whose financial statements for the first time will be required to be audited pursuant to the standards of the PCAOB, the provision of tax services to a person covered by Rule 3523 before the earlier of the date that the firm: (1) signed an initial engagement letter or other agreement to perform an audit pursuant to the standards of the PCAOB, or (2) began procedures to do so, does not impair a registered public accounting firm's independence under Rule 3523.

Rule 3526. *Communication with Audit Committees Concerning Independence*

A registered public accounting firm must—

- a. prior to accepting an initial engagement pursuant to the standards of the PCAOB—
 - (1) describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the potential audit client or persons in financial reporting oversight roles at the potential audit client that, as of the date of the communication, may reasonably be thought to bear on independence;
 - (2) discuss with the audit committee of the issuer the potential effects of the relationships described in subsection (a)(1) on the independence of the registered public accounting firm, should it be appointed the issuer's auditor; and
 - (3) document the substance of its discussion with the audit committee of the issuer.
- b. at least annually with respect to each of its issuer audit clients—
 - (1) describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the audit client or persons in financial reporting oversight roles at the audit client that, as of the date of the communication, may reasonably be thought to bear on independence;
 - (2) discuss with the audit committee of the issuer the potential effects of the relationships described in subsection (b)(1) on the independence of the registered public accounting firm;
 - (3) affirm to the audit committee of the issuer, in writing, that, as of the date of the communication, the registered public

accounting firm is independent in compliance with Rule 3520; and

- (4) document the substance of its discussion with the audit committee of the issuer.

Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk and Conforming Amendments to PCAOB Standards

PCAOB Release No. 2008-006

October 21, 2008

PCAOB Rulemaking
Docket Matter No. 026

Summary

The Public Company Accounting Oversight Board (the "Board" or "PCAOB") is proposing changes to its auditing standards related to the auditor's assessment of and response to risk. Appendices 1–8 contain the text of the proposed auditing standards and proposed conforming amendments to PCAOB auditing standards.

Public Comment

Interested persons may submit written comments to the Board. Such comments should be sent to the Office of the Secretary, PCAOB, 1666 K Street, N.W., Washington, D.C. 20006-2803. Comments also may be submitted by e-mail to comments@pcaobus.org or through the Board's Web site at www.pcaobus.org. All comments should refer to PCAOB Rulemaking Docket Matter No. 026 in the subject or reference line and should be received by the Board no later than 5:00 p.m. EDT on February 18, 2009.

Diane Jules, Assistant Chief Auditor (202/207-9111, julesd@pcaobus.org).

A. Introduction

The Board is proposing seven auditing standards that would, collectively, update the requirements for assessing and responding to risk during an audit. The existing auditing standards regarding risk assessment were adopted, for the most part, during the 1980s. As described below, these proposals have been informed by a number of factors and developments since that time. These include improvements that many firms have made in their audit methodologies; recommendations to the profession on ways in which auditors could improve risk assessment; advice from the Board's Standing Advisory Group ("SAG"); the

adoption of Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements*; and observations from the Board's oversight activities. The proposals build upon and attempt to improve the framework established by the existing standards, rather than replacing that framework altogether. Accordingly, while the Board is proposing to supersede several of its interim standards, the concepts underpinning the proposed standards should be familiar to most auditors.

At the most basic level, the proposed standards are, like the existing standards, rooted in the concept of audit risk. Audit risk can be described as the risk that the auditor will express an inappropriate opinion when the financial statements are materially misstated. The objective of an audit of financial statements is to limit audit risk to low level, so that the auditor can opine with reasonable assurance that the financial statements present fairly, in all material respects, a company's financial position, results of operations, and cash flows in conformity with generally accepted accounting principles ("GAAP"). Prior to the 1980s, auditing standards said little about how to assess and manage the risks inherent in the audit process. For many years, risk assessment was largely confined to assessing the risks inherent in the accounts and performing a study and evaluation of internal control. Testing of financial statement accounts was often based primarily on the size and nature of the accounts. The formal assessment of risk occurred primarily when auditors applied audit sampling methods.

In the 1980s, generally accepted auditing standards began to apply audit risk concepts to the entire audit, not just to audit sampling.¹ The standards adopted during this period explain that audit risk consists of the risk that the financial statements are materially misstated due to fraud or error and the risk that the auditor would fail to detect that the financial statements are materially misstated. These standards, which the Board adopted as interim auditing standards in 2003, describe in general terms the auditor's responsibilities for assessing and responding to risk, and direct auditors to vary the amount of audit effort related to particular financial statement accounts based on the risks presented by them.² The standards also allowed the auditor more discretion to use testing of controls as a basis for reducing substantive testing.³ In general terms, these standards require the auditor to use judgment in assessing risks and then in deciding what procedures to perform to respond to those risks.⁴

In 1998, at the request of Securities and Exchange Commission ("SEC") Chairman Arthur Levitt, the Public Oversight Board ("POB") appointed the Panel on Audit Effectiveness ("PAE").⁵ Chaired by Shaun O'Malley, former Chair of Price Waterhouse LLP, the PAE was broadly charged with assessing whether public company audits were adequately serving and protecting the interests of investors.⁶ To do so, the panel "reviewed and evaluated the way that audits are performed," "assessed recent trends in audit practices to determine whether they are in the public interest," "studied the audit policies, methodologies and other forms of guidance used primarily by the large audit firms, certain

⁵ Letter from Shaun O'Malley, Chair, PAE, to POB and other interested parties (August 31, 2000), included in PAE Report. The POB was a private body that monitored the self-regulatory programs of the SEC Practice Section of the American Institute of Certified Public Accountants ("AICPA"). See also, PAE Report, p.vii. The POB disbanded in 2002.

⁶ PAE Report p.1.

aspects of auditor independence and the auditing profession's self-regulatory structure," and "focused on international developments affecting the auditing profession."⁷

In its 2000 report, the PAE noted, among many other things, that although auditors had been required to use the "audit risk model"⁸ since 1984, "anecdotal and other evidence indicates that many (but by no means all) audits continued to be performed using substantive testing approaches with little or no attention paid to the results of the risk assessments called for by the model."⁹ The PAE also noted, however, that over time, "[t]he sheer volume of transactions processed by client organizations, the fast pace of technological developments affecting client organizations and audit firms alike, and economic constraints on the ability of audit firms to recover rising costs" drove audit firms to evaluate audit effectiveness and efficiency, and to conclude that "many audits were being conducted without sufficient consideration being given to the risk assessment process."¹⁰ According to the PAE Report, some firms responded to those developments by making changes to their audit methodologies.¹¹ Under newer audit methodologies, auditors take a more comprehensive approach to risk assessment, looking at internal and external factors that affect risks to the financial statements, and they focus their audit procedures on areas with the greatest risks of misstatement.¹²

The PAE concluded in its report "that the audit risk model is appropriate, but needs enhancing and updating," and it made several recommendations for doing so.¹³ In general, the PAE recommended that auditing standards require auditors to have a far deeper understanding of the company's business processes, risks, and controls.¹⁴ More specifically, it recommended, among other things, that auditors be required "to make inherent risk assessments for significant account balances and classes of transactions by considering what could go wrong at the individual assertion level,"¹⁵ that the Auditing Standards Board of the AICPA ("ASB")¹⁶ provide more specific guidance on various aspects of assessing and responding to control risk,¹⁷ and that the ASB develop more guidance on "linking the nature, timing, and extent of substantive tests to risk assessments."¹⁸

¹⁸ Ibid, p. 37. In March 2006, the ASB issued a suite of eight risk assessment standards as part of a joint project with the International Audit and Assurance Standards Board ("IAASB") to update and

In a February 2005 meeting, the SAG also considered how the risk assessment process and the Board's related interim standards could be improved. SAG members underscored the importance of considering the risk of fraud during the risk assessment process and of appropriately responding to that risk during the audit. Some SAG members suggested certain procedures for auditors to perform as part of their risk assessment procedures, including reading analysts' reports and other published information about the company being audited, listening to quarterly earnings calls, understanding the compensation arrangements of senior management, and looking at unusual trading activity in the company's stock. In addition, some SAG members emphasized the need for auditors to take an integrated approach to assessing and responding to risk in the integrated audit of the financial statements and internal control over financial reporting, which, at that time, was performed pursuant to Auditing Standard No. 2.

Last year, after notice and comment, the Board replaced Auditing Standard No. 2 with Auditing Standard No. 5.¹⁹ Auditing Standard No. 5 describes a risk-based audit of internal control that should be fully integrated with the audit of financial statements. Some commenters on the Board's proposal for Auditing Standard No. 5 expressed concern about the advisability of taking a risk based approach and the adequacy of the Board's interim standards regarding risk assessment. These commenters suggested that auditors have frequently been unsuccessful at applying a risk-based approach to the financial statement audit in the past.²⁰

The Board considered these comments, but believed that emphasizing risk assessment in the standard would result in more effective and focused audits.²¹ Accordingly, risk assessment underlies the entire audit process for the audit of internal control over financial reporting under Auditing Standard No. 5.²² While the Board believed (and continues to believe) that auditors can appropriately assess risk under the interim auditing standards, it noted when it adopted Auditing Standard No. 5 that examining the existing standards to see where improvements can be made was one of the Board's highest standard-setting priorities.

The proposed standards are the result of that examination and reflect recommendations of the PAE and the SAG. The Board believes that the proposed standards, if adopted, would result in improvements to audits of issuers in several areas.

First, the proposed standards would update the existing requirements to take account of the improved risk-based audit methodologies currently in use by some auditors. While some firms are already applying many of the procedures described in the proposed standards, the Board believes that improvements in risk assessment methods should be reflected in all public company audits. This does not mean, however, that the Board is proposing a one-size-fits-all approach to risk assessment. The Board recognized in Auditing Standard No. 5 that "[t]he

(footnote continued)

align their risk assessment requirements. The Board's interim auditing standards consist of generally accepted auditing standards, as described in the ASB's Statement of Auditing Standards No. 95, as in existence on April 16, 2003, to the extent not superseded or amended by the Board. As a result, the ASB's 2006 risk assessment standards are not included in the Board's interim standards.

¹⁹ Auditing Standard No. 5 became effective for audits of internal control over financial reporting for fiscal years ending on or after November 15, 2007.

²⁰ PCAOB Release No. 2007-005, *An Audit of Internal Control Over Financial Reporting That is Integrated With an Audit of Financial Statements and Related Independence Rule and Conforming Amendments*, (May 24, 2007) p. A4-6.

²¹ *Ibid.*

²² Paragraph 10 of Auditing Standard No. 5.

size and complexity of the company...might affect the risks of misstatement and the controls necessary to address those risks."²³ Accordingly, the proposed standards describe a risk assessment process that should result in audit procedures tailored to the company's size and complexity.

The proposed standards also reflect the Board's recognition of the importance to the audit process of sound professional judgment. As under the PCAOB's existing auditing standards, auditors would have to exercise professional judgment to determine how best to fulfill the requirements of the proposed standards under particular circumstances. The Board seeks comment on how the proposed standards would change current practice, whether the proposed standards allow sufficient flexibility, and whether they are appropriately scalable.

Second, the proposed standards would serve as an improved foundation for future standard setting. The proposed standards set forth the auditor's responsibilities for certain fundamental aspects of the audit process, such as assessing risk and performing tests of controls and substantive procedures. Future auditing standards that address auditing procedures would build on the foundational principles in the proposed standards. The Board seeks comment on whether these fundamental principles are articulated appropriately in the proposed standards.

Third, improvements in the requirements related to risk assessment should enhance integration of the audit of the financial statements with the audit of internal control over financial reporting. Because the proposed standards describe the auditor's responsibilities for assessing risk, responding to risk, and evaluating audit results in the context of an integrated audit of financial statements and internal control over financial reporting, they include certain foundational risk assessment principles from Auditing Standard No. 5. This should help auditors better understand how certain procedures required by Auditing Standard No. 5 can be integrated with financial statement audit procedures. The Board seeks comment on whether these fundamental principles from Auditing Standard No. 5 have been incorporated appropriately in the proposed standards, whether the proposed standards are appropriately aligned with Auditing Standard No. 5, and, accordingly, whether the proposed standards would improve the effectiveness and efficiency of integrated audits.²⁴

Fourth, the proposed auditing standards are intended to emphasize the auditor's responsibilities for considering the risk of fraud during the audit. Inspections of registered firms have identified many deficiencies in auditors' compliance with AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*, including –

- a tendency to perform the procedures required in AU sec. 316 mechanically, without using the procedures to develop insights on fraud risk or modify the audit plan to address the risk; and
- a failure to respond appropriately to identified fraud risk factors.²⁵

These kinds of deficiencies suggest that some auditors may view the consideration of fraud as an isolated, mechanical process rather than an integral part of the audit.

²³ Paragraph 13 of Auditing Standard No. 5.

²⁴ The Board is not proposing changes to Auditing Standard No. 5, which was adopted last year after notice and comment and approved by the SEC. When considering provisions of the proposed standards that are based upon, or taken from, Auditing Standard No. 5, commenters should focus on whether those provisions are appropriately included in the risk assessment standards.

²⁵ PCAOB Release 2007-001, "Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities with Respect to Fraud" (January 22, 2007).

The proposed standards would integrate certain requirements regarding the auditor's consideration of fraud risk, as set forth in AU sec. 316, into the risk assessment standards. This integration would emphasize to auditors that assessing the risk of fraud is a central part of the audit process, rather than a separate consideration. It also should prompt auditors to make a more thoughtful and thorough assessment of the risks affecting the financial statements, including fraud risks, and develop appropriate audit responses. The Board seeks comment on whether the proposed standards focus appropriately on the risk of fraud.

Finally, the proposed standards reflect an effort to eliminate unnecessary differences between the Board's risk assessment standards and other risk assessment standards. The Board believes that such an effort is particularly appropriate in light of the foundational nature of these proposed standards. This effort is in keeping with the Board's strategic plan for 2008-2013, which states the Board's objective to "[p]articipate in the work of, and engage with, other auditing standards-setting bodies to benefit from, and as appropriate incorporate, new developments and techniques to promote high quality audits worldwide."²⁶

In recent years, the IAASB has updated its auditing standards regarding risk assessment.²⁷ The Board has taken into account the IAASB risk assessment standards in developing these proposals. Specifically, the Board began by considering whether the objectives and requirements of the IAASB's standards are appropriate for audits of issuers and consistent with the Board's statutory mandate "to oversee the audit of public companies that are subject to the securities laws...in order to protect the interests of investors and further the public interest in the preparation of informative, accurate, and independent audit reports."²⁸ While many of the procedures described in the IAASB standards appear to be generally suitable for audits of issuers, the Board believes that certain changes to those standards would be necessary for the Board to adopt them as standards of the PCAOB. Accordingly, there is a degree of commonality between the proposed standards and the IAASB's risk assessment standards, but they do not mirror them word-for-word.

Significant differences between the proposed standards and the IAASB's risk assessment standards are described in Appendix 10. As described more fully in that appendix, these differences generally reflect the need to adapt the IAASB standards for audits of issuers. For example, the Board made changes necessary to make the proposed standards consistent with relevant provisions of the federal securities laws. In addition, consistent with other PCAOB standards, the proposed standards do not include an "Application and Other Explanatory Material" section. That section, included in the IAASB's redrafted International Standards on Auditing ("ISAs"), "does not in itself impose a requirement," but "is relevant to the proper application of the requirements of an ISA."²⁹ Rather than including a significant amount of application material in the proposed standards, the Board reviewed the application and other material in the ISAs, adapted those provisions that the Board believed are necessary for audits of issuers, and included them in the proposed standards themselves. Like the rest of the provisions in the proposed standards, the provisions adapted from the ISAs' application material use the terms set forth in Rule 3101, *Certain Terms*

²⁶ PCAOB, Strategic Plan 17 (March 31, 2008), p.17.

²⁷ The IAASB issued its initial risk assessment standards in 2003 and has updated four of its standards related to risk assessment as part of its initiative to enhance the clarity of its standards. The Board understands that the ASB is in the process of a similar initiative.

²⁸ Section 101 of the Sarbanes-Oxley Act of 2002 (the "Act"), 15 U.S.C. § 7211.

²⁹ Paragraph A59 of ISA 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing*.

Used in Auditing and Related Professional Practice Standards, to describe the degree of responsibility imposed on the auditor. The Board also adapted other portions of the ISAs to conform the requirements to the provisions of Rule 3101. Finally, some differences reflect the Board's view that particular procedures described in the ISAs are not necessary for audits of issuers, or that additional procedures not described in the ISAs are necessary.

The Board seeks comment on whether the proposed standards appropriately consider the provisions of the ISAs and whether they reflect necessary differences from risk assessment standards applicable outside the United States.

B. Overview of the Proposed Standards

The proposed risk assessment standards included in this release are as follows:

- *Audit Risk in an Audit of Financial Statements.* This proposed standard describes the components of audit risk and the auditor's responsibilities for reducing audit risk to an appropriately low level in order to obtain reasonable assurance in an audit of financial statements.
- *Audit Planning and Supervision.* This proposed standard describes the auditor's responsibilities for planning the audit, including assessing matters that are important to the audit, and establishing an appropriate audit strategy and audit plan. The proposed standard also describes the responsibilities of the engagement partner and other engagement team members for supervising and reviewing the work of the engagement team.
- *Identifying and Assessing Risks of Material Misstatement.* This proposed standard describes the auditor's responsibilities for identifying and assessing risks of material misstatement. The risk assessment process discussed in the proposed standard includes information-gathering procedures to identify risks (e.g., obtaining an understanding of the company, its environment, and its internal control) and analysis of the identified risks.
- *The Auditor's Responses to the Risks of Material Misstatement.* This proposed standard sets forth the auditor's responsibilities for responding to the risks of material misstatement, including overall responses related to the general conduct of the audit and responses involving specific audit procedures.
- *Evaluating Audit Results.* This proposed standard describes the auditor's responsibilities regarding the process of evaluating the results of the audit in order to form the opinion(s) to be presented in the auditor's report. This process includes evaluating uncorrected misstatements and control deficiencies identified during the audit.
- *Consideration of Materiality in Planning and Performing an Audit.* This proposed standard sets forth the auditor's responsibilities for applying the concept of materiality, as described by the federal securities laws, in planning the audit and determining the scope of the audit procedures.
- *Audit Evidence.* This proposed standard sets forth the auditor's responsibilities regarding designing and applying audit procedures to obtain sufficient appropriate evidence to support the opinion(s)

in the auditor's report. In particular, it discusses the principles for determining the sufficiency and appropriateness of audit evidence.

The proposed standards will supersede five interim auditing standards: AU sec. 311, *Planning and Supervision*, AU sec. 312, *Audit Risk and Materiality in Conducting an Audit*, AU sec. 313, *Substantive Tests Prior to the Balance Sheet Date*, AU sec. 319, *Consideration of Internal Control in a Financial Statement Audit*, and AU sec. 326, *Evidential Matter*.

Appendix 9 of this release discusses each of the proposed standards, as well as the proposed conforming amendments to PCAOB standards, in more detail. Appendix 9 also includes specific questions about the standards for which the Board is requesting comment. The Board requests comment on all aspects of the proposed standards and the conforming amendments to PCAOB interim standards, including, in particular, responses to the questions in Appendix 9.

C. Opportunity for Public Comment

The Board will seek comment on the proposed standards and amendments for a 120-day period. Written comments should be sent to the Office of the Secretary, PCAOB, 1666 K Street, N.W., Washington, DC 20006-2803. Comments also may be submitted by e-mail to comments@pcaobus.org or through the Board's Web site at www.pcaobus.org. All comments should refer to PCAOB Rulemaking Docket Matter No. 026 on the subject or reference line and should be received by the Board no later than 5:00 PM (EDT) on February 18, 2009.

PCAOB Release No. 2009-004

Auditing Standard No. 7, Engagement Quality Review, and Conforming Amendment to the Boards Interim Quality Control Standards

PCAOB Release No. 2009-004
July 28, 2009

PCAOB Rulemaking
Docket Matter No. 025

Note: The following auditing standard has been adopted by the PCAOB. Although the PCOAB has adopted this standard, standards are not considered final until approved by the SEC. See the PCAOB Web site at www.pcaob.org for more information on the status of the SEC's approval of Auditing Standard No. 7.

Summary

After public comment, the Public Company Accounting Oversight Board (the "Board" or "PCAOB") is adopting an auditing standard, *Engagement Quality Review*, that will be applicable to all registered firms and will supersede the Board's interim concurring partner review requirement, and a conforming amendment to the Board's interim quality control standards.

Board Contacts

* * * * *

I. Introduction

Section 103 of the Sarbanes-Oxley Act (the "Act") directs the Board, among other things, to set standards for public company audits, including a requirement or each registered public accounting firm to "provide a concurring or second partner review and approval of [each] audit report (and other related information), and concurring approval in its issuance . . ." A well-performed engagement quality review ("EQR") can serve as an important safeguard against erroneous or insufficiently supported audit opinions and, accordingly, can contribute to audit quality. In February 2008, the Board proposed to replace its

interim requirement with a new EQR standard.¹ The Board's original proposal was developed in response, among other things, to feedback from some members of its Standing Advisory Group ("SAG") that the existing interim requirements² (the "existing requirements") do not provide for a sufficiently thorough review to give investors assurance on the quality of engagements. The proposal was intended to enhance the quality of the EQR by strengthening the existing requirements.

Commenters recommended significant modifications to the original proposal, and, in response, the Board made changes designed to better tailor the standard to its purposes.³ Because of the extent of those changes, the Board again sought public comment, this time on the standard as revised. The Board has considered those comments, as well as the input of the SAG, and the final standard ("AS No. 7" or the "EQR standard") has benefitted from the additional public input.⁴

The EQR standard the Board is adopting provides for a rigorous review that will serve as a meaningful check on the work performed by the engagement team. AS No. 7 should increase the likelihood that a registered public accounting firm will catch any significant engagement deficiencies before it issues its audit report. As a result, the Board recognizes that more work may be necessary under the EQR standard than was performed in some concurring reviews under the existing requirements.

At the same time, the Board has been sensitive to commenters' concerns and agrees that the EQR should not become, in effect, a second audit. Instead, the EQR should be—and, as described in AS No. 7, is—a review of work already performed by the engagement team. The EQR standard requires the engagement quality reviewer (or the "reviewer") to evaluate the significant judgments made and related conclusions reached by the engagement team in forming the overall conclusion on the engagement and in preparing the engagement report, and requires certain procedures designed to focus the reviewer on those judgments and conclusions.

The procedures required of the reviewer by AS No. 7 are different in nature from the procedures required of the engagement team. Unlike the engagement team, a reviewer does not perform substantive procedures or obtain sufficient evidence to support an opinion on the financial statements or internal control over financial reporting. If more audit work is necessary before the reviewer may provide concurring approval of issuance, the engagement team—not the reviewer—is responsible under PCAOB standards for performing the work. In contrast, the reviewer fulfills his or her responsibility to perform an effective review of the engagement under the EQR standard by holding discussions with the engagement team, reviewing documentation, and determining whether he or she can provide concurring approval of issuance.

² The Securities and Exchange Commission Practice Section ("SECPS") of the American Institute of Certified Public Accountants ("AICPA") Requirements of Membership Sections 1000.08(f); 1000.39, Appendix E.

³ Comments on the original proposal and the Board's responses are described in PCAOB Release No. 2009-001, Proposed Auditing Standard—*Engagement Quality Review* (March 4, 2009) (the "reproposing release").

⁴ The Board received 38 comments on the original proposal and 30 comments on the reproposal. The SAG discussed the repropounded standard on April 2, 2009. A transcript of that discussion is available on the Board's website at http://www.pcaobus.org/Rules/Docket_025/index.aspx. The SAG also discussed EQR on June 22, 2004 and October 5, 2005. Archived webcasts are available on the Board's website at http://www.pcaobus.org/News_and_Events/Webcasts.aspx.

II. Overview of Auditing Standard No. 7

Overall, commenters preferred the repropoed standard to the original proposal, though some continued to believe that certain provisions were unclear and suggested certain changes to the standard. After considering commenters' feedback, the Board has made several modifications to the EQR standard to provide additional clarity. This section describes the comments received, the Board's response, and changes made in AS No. 7.⁵

A. Applicability of the EQR Requirement

Paragraph 1 of the repropoed standard required an EQR for audit engagements and reviews of interim financial information ("interim reviews"), but not for other engagements performed according to the standards of the PCAOB. For the most part, commenters believed that this provision was appropriate.⁶ One commenter, however, suggested including the EQR requirements for interim reviews in AU section ("sec.") 722, *Interim Financial Information*, instead of including them as part of the EQR standard to "make it clear that the scope of the procedures performed remain under the umbrella of the objective of a review of interim financial information (which is much different than the scope and objective of an audit)." Because the requirements for the EQR of interim reviews in AS No. 7 are closely related to and described by reference to the requirements for the EQR of an audit, the Board believes it is more appropriate to locate both sets of requirements in the same standard. Accordingly, the Board is adopting the provisions regarding applicability of the EQR standard as repropoed.

B. Statement of Objective

The repropoed standard included a statement of objective intended to focus reviewers on the overall purpose of the standard as they carry out the more specific EQR requirements. As repropoed, the objective of the engagement quality reviewer was "to perform an evaluation of the significant judgments made by the engagement team and the conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued, in order to determine whether to provide concurring approval of issuance."

Most commenters agreed that the EQR standard should include a statement of objective. While some believed the objective was appropriate as repropoed, several suggested substituting the phrase "related conclusions reached" for "the conclusions reached" to indicate that the reviewer is required to evaluate conclusions relating to significant judgments, rather than all conclusions. In addition, some commenters suggested making the objective less vague, while others wanted the Board to broaden it or make it less procedural.

After considering these comments, the Board has, as suggested by commenters, revised the objective so that it refers to "significant judgments made by the en-

⁵ The Board received some comments related to its standard-setting process in general. The Board continuously endeavors to improve its processes, including its standard-setting process, and is considering these comments as it does so.

⁶ One commenter did not believe that an EQR should be required for interim reviews because of concerns about the scope of the EQR for interim reviews. The section entitled *Specifically Required Procedures in the EQR of an Interim Review* of this release discusses the EQR requirements for interim reviews.

agement team⁷ and the *related* conclusions reached" (emphasis added). This change should help reviewers maintain their focus on areas of the engagement that are most likely to contain a significant engagement deficiency. With this revision, the Board believes the statement of objective establishes, at the appropriate level of detail, a framework for the performance of the EQR that is consistent with the specific requirements in AS No. 7. Corresponding changes have been made in paragraphs 9 and 14, which describe the scope of the EQR for audits and interim reviews, respectively. The reviewer achieves his or her objective by complying with the specific requirements of the standard.

C. Qualifications of the Engagement Quality Reviewer

In order to provide for a high-quality EQR, the repropoed standard described the qualifications that any reviewer would be required to meet. These provisions were designed to provide assurance that the reviewer could effectively perform an EQR of the particular engagement under review. At the same time, the provisions recognized that smaller firms may have few partners—and, in the case of sole practitioners, no additional partners—available in-house to perform the EQR.

Accordingly, the repropoed standard required an engagement quality reviewer from within the firm issuing the engagement report to be a partner or another individual in an equivalent position, but also allowed a qualified individual from outside the firm to perform the EQR. In either event, the repropoed standard required the reviewer to be an associated person⁸ of a registered public accounting firm.⁹ The repropoed standard also included a general competence requirement and requirements related to the reviewer's independence, integrity, and objectivity.

In-House Reviewer: Partner or an Individual in an Equivalent Position

The requirement in the repropoed standard for a reviewer from within the firm to be a partner or an individual in an equivalent position was intended to address concerns expressed by some commenters on the original proposal about the authority of the engagement quality reviewer relative to that of the engagement partner. Because the EQR is intended to be an objective second look at work performed by the engagement team, the reviewer should be able to withstand pressure from the engagement partner or other firm personnel, such as members of the firm's national office. As described in the repropoing

⁷ Because the engagement partner has final responsibility for the engagement, he or she has final responsibility for the significant judgments made during the engagement, notwithstanding any involvement in or responsibility for those judgments by firm personnel outside of the engagement team, such as members of the firm's national office. Accordingly the "significant judgments made by the engagement team" include all of the significant judgments made during the engagement.

⁸ For clarity, in paragraph 3 of AS No. 7, the Board added a reference to Rule1001(p)(i), which defines the term "associated person of a registered public accounting firm." A person not already associated with a registered firm can enter into a relationship with the firm issuing the report such that the person would become associated with that firm by performing the review. Specifically, a person not already associated with a firm would become associated with the firm issuing the report if *he or she* (rather than, or in addition to, his or her firm or other employer): (1) receives compensation from the firm issuing the report for performing the review or (2) performs the review as agent for the firm issuing the report. For example, if the firm issuing the report contracts directly with an employee of an unregistered accounting firm to perform the engagement quality review, that person would become associated with the firm issuing the report by virtue of that independent contractor relationship.

⁹ A registered public accounting firm has an obligation to secure and enforce consents to cooperate with the Board from each associated person of the firm, see Section 102(b)(3) of the Act, including those who become associated with the firm by performing the review. The Board also may directly sanction any such person who fails to cooperate in an investigation or inspection. See Section 105(b)(3) of the Act and PCAOB Rules 5110 and 4006.

release, the Board believed that concerns about authority will most often arise when the reviewer and the engagement partner work at the same firm. The Board also believed that a standard based on perceptions of relative authority within a firm would not be sufficiently clear to be workable. Accordingly, the Board attempted to address these concerns with a requirement that an in-house reviewer—but not one from outside the firm—be a partner or person in an equivalent position.

While some commenters supported the repropoed requirement, others disagreed with it, generally because, in their view, being a partner or person in an equivalent position would not necessarily ensure that the reviewer possesses the qualities required to perform the EQR. These commenters noted that partners as well as non-partners may be subject to internal pressure within the firm to provide concurring approval of issuance. In addition, in one commenter's view, it would be burdensome for one-partner firms to hire an outside reviewer to comply with this requirement. Finally, some commenters also asked the Board to define the term "equivalent position."

While both partners and non-partners may experience pressure within the firm to provide concurring approval of issuance, the Board continues to believe that the repropoed requirement is the most appropriate way to address this issue. Partnership is not a perfect proxy for authority, but a partner is more likely to possess sufficient authority to conduct the EQR than a non-partner. The Board continues to believe that a requirement based on perceptions of authority would not be workable. Accordingly, the Board is adopting this requirement substantially as repropoed.¹⁰ At a firm that is not organized as a partnership, "an individual in an equivalent position" is someone with the degree of authority and responsibility of a partner in a firm that is organized as a partnership.

Qualified Reviewer from Outside the Firm

As noted above, the repropoed standard also allowed a qualified reviewer from outside the firm to conduct the review. In the repropoing release, the Board expressed the view that allowing a sufficiently qualified professor or other individual not employed by an accounting firm to perform the EQR should not negatively affect audit quality and may mitigate the compliance burden on sole practitioners and smaller firms. The Board sought comment on whether a qualified accountant who is not employed by an accounting firm should be allowed to conduct the EQR.¹¹

The majority of commenters on this topic did not oppose the repropoed provision. Some commenters, however, cautioned that reviewers from outside an accounting firm may not necessarily have the required technical expertise or recent audit experience. One commenter believed that allowing the use of such outside reviewers could "hamper the existing independence rules,"¹² increase costs, and limit the potential growth of partners.

After considering these comments, the Board continues to believe that the EQR standard can—and should—allow firms the proposed flexibility in choosing a

¹⁰ One commenter suggested that the phrasing of the repropoed standard did not establish a requirement for the in-house reviewer to be a partner because it stated that the reviewer "may be" a partner, a person in an equivalent position, or an individual outside the firm. While the use of "may" in that context imposed a requirement, to avoid any confusion on this point the Board has rephrased the requirement in paragraph 3 of AS No. 7 to use the word "must."

¹¹ As noted in the repropoing release, under the existing requirement a firm may seek a waiver to engage an outside experienced individual to perform the EQR. Because AS No. 7 allows a firm to use an outside reviewer, such a waiver is not necessary under AS No. 7.

¹² The comment did not explain how the independence rules would be hampered.

reviewer, provided that reviewer meets the competence and other qualification requirements. According to these requirements, as discussed below, any reviewer would have to have the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the person who has overall responsibility for the engagement under review. Accordingly, while some persons from outside a firm might not have the required qualifications, those who do can effectively perform the EQR.¹³

The Board also does not agree that allowing the use of a reviewer from outside the firm issuing the report would negatively affect the application or enforcement of the independence rules. As the Board noted in the reproposing release, it will continue to consider anyone who performs the EQR to be an "audit partner" and a member of the "audit engagement team" for purposes of independence requirements.¹⁴ In addition, because AS No. 7 would not require a firm to use an outside reviewer, allowing a firm to do so should not increase costs or limit the potential growth of partners. Any firm that is concerned that invoking the flexibility provided by the EQR standard would raise its costs or impede the development of its partners could, simply, decline to do so and use a reviewer from within the firm if one is available.

When considering an outside individual for the role of the engagement quality reviewer, the firm will likely need to make additional inquiries to obtain necessary information about the individual's qualifications. For example, while information about independence of the firm's partners is typically collected and evaluated as part of the periodic independence review, information about the independence of an outside reviewer will likely need to be requested and evaluated as part of the reviewer selection process. Firms also likely know more about the competence of their own partners than of an outside reviewer.

General Competence Requirement

As noted above, the reproposed standard, like the original proposal, included a requirement for the reviewer to "possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the person who has overall responsibility for the same type of engagement." This provision was intended to set a minimum requirement for those who would perform the EQR. In response to comments on the original proposal, the reproposing release explained that this provision, by its terms, did not require the engagement quality reviewer's knowledge and competence to match those of the engagement partner, or for the reviewer to be a "clone" of the engagement partner.¹⁵

Some commenters reiterated their concerns that the engagement quality reviewer's skills would be expected to match those of the engagement partner, and that such a requirement could cause resource constraints for smaller firms. Other commenters suggested modifying the general competence provision by stating that the reviewer's competence should be established based on the facts and circumstances of the engagement, or describing the required qualifications

¹³ Similarly, a reviewer does not meet all of the qualification requirements in AS No. 7 by virtue of his or her status as a partner or employee of an accounting firm.

¹⁴ See Rule 2-01(f) of Regulation S-X, 17 C.F.R. 210.2-01(f), for the definitions of "audit partner" and "audit engagement team."

¹⁵ Specifically, the reproposing release noted:

The general competence provision merely sets a minimum requirement for those who would perform the EQR, but it does not require the reviewer's competence to match that of the engagement partner. In many cases, both individuals' competence will exceed the minimum level prescribed, but there is no requirement that they do so in tandem, or even at all.

from the reviewer's perspective, rather than by comparing them to the qualifications of the engagement partner. Finally, some commenters suggested including in the EQR standard a statement that the reviewer may obtain the required level of knowledge and competence through utilizing assistants.

The Board continues to believe that if a minimum level of knowledge and competence in accounting, auditing, and financial reporting is required to conduct an audit, it is similarly necessary to effectively review that audit.¹⁶ The reviewer is not required to possess other competencies, e.g., those related to communication or management skills, that the engagement partner may have.

Accordingly, the Board is adopting the general competence provision substantially as proposed. The Board is, however, modifying the requirement to clarify further that the determination of what constitutes the appropriate level of knowledge and competence should be based on the circumstances of the engagement, including the size and complexity of the business under audit or under interim review.¹⁷ In AS No. 7, the Board replaced the phrase "the same type of engagement" with "the engagement." The new phrasing focuses the reviewer on the particular engagement under review, rather than that "type" of engagement.¹⁸ Firms that do not have partners that meet this general competence requirement available to perform the EQR may engage an outside reviewer to perform an EQR.

Independence, Integrity, and Objectivity

Like the original proposal, the repropoed standard required the reviewer to be independent of the company, perform the review with integrity, and maintain objectivity. Comments on the repropoal focused on two provisions regarding objectivity—the prohibition against the reviewer supervising the engagement team and the two-year "cooling-off" period before the engagement partner could perform the EQR.

Supervision of the Engagement Team

The repropoed standard provided that to maintain objectivity the engagement quality reviewer should not, among other things, "supervise the engagement team with respect to the engagement subject to the engagement quality review." The phrase "subject to the engagement quality review" was intended to clarify that partners with leadership responsibilities in a firm, region, service, or industry practice are not, solely because of those responsibilities, precluded from reviewing any engagement performed by their subordinates in the firm. Some commenters believed that the phrase "subject to the engagement quality review" was not sufficient to clarify this point.

After considering these comments, the Board has decided that the express prohibition against "supervis[ing] the engagement team with respect to the engagement subject to the engagement quality review" is not necessary to effectuate

¹⁶ While a reviewer may use assistants in performing the EQR, the reviewer's own skills should meet the requirements of AS No. 7.

¹⁷ Footnote 18 on page 9 of the original release stated, "The determination of what constitutes the appropriate level of knowledge and competence should be based on the circumstances of the engagement, including the size or complexity of the business."

¹⁸ In addition, to simplify the text of AS No. 7, the Board replaced the phrase "person with overall responsibility for the engagement" with the term "engagement partner." Footnote 3 of AS No. 7 explains that the term "engagement partner" has the same meaning as the phrases the "auditor with final responsibility for the audit," as described in AU sec. 311, *Planning and Supervision*, and the "practitioner-in-charge of an engagement," as described in PCAOB interim quality control standard QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control- Competencies Required by a Practitioner-in-Charge of an Attest Engagement*. Because all of these terms refer to the same person, this change does not alter the meaning of the EQR standard.

the Board's intent. The remaining two criteria for maintaining objectivity in paragraph 7 of AS No. 7—not making decisions on behalf of the engagement team and not assuming any responsibilities of the engagement team—are sufficient to preclude those involved in the engagement from serving as the engagement quality reviewer.¹⁹ For example, partners (including the engagement partner and other partners on larger engagements), managers, and others who supervise engagement personnel on the audit under review would not qualify under the remaining criteria because they have assumed responsibilities of the engagement team. At the same time, removing the phrase "supervise the engagement team" from AS No. 7 should further clarify that those in leadership positions in the firm who did not make decisions for or assume responsibilities of the engagement team may perform the EQR.

The Two-Year "Cooling-Off" Period

The reproposed standard included a provision prohibiting an engagement partner from serving as the engagement quality reviewer for at least two years following his or her last year as the engagement partner.²⁰ The Board included the "cooling-off" period because it believed that it would be harder for an engagement partner who has had overall responsibility for the audit for at least a year to perform the review with the necessary level of objectivity. While a number of commenters expressed general support for a two-year "cooling-off" period, some believed that it could impose an undue hardship on smaller firms, and suggested a shorter "cooling-off" period.

After considering these comments, the Board continues to believe that a "cooling-off" period will be beneficial to audit quality and that a two-year period appropriately safeguards objectivity without imposing unnecessary hardship on most firms. At the same time, the Board recognizes that compliance with this requirement could be difficult for smaller firms with fewer personnel. In its independence rules, the Securities and Exchange Commission ("SEC") exempted certain smaller firms from the audit partner rotation requirements. Specifically, Rule 2-01(c)(6)(ii) of Regulation S-X provides an exemption for firms with fewer than five issuer audit clients and fewer than ten partners, provided the Board "conducts a review at least once every three years of each of the audit client engagements that would result in a lack of auditor independence under" the SEC partner rotation requirements. The Board believes that this exemption—including the provision regarding Board inspections—also describes an appropriate exemption from the "cooling-off" requirement in the EQR standard. Accordingly, firms that qualify for the exemption from the SEC partner rotation requirements will also be exempt from the "cooling-off" period under AS No. 7.

¹⁹ AS No. 7 does not prohibit the engagement team from consulting with the reviewer, as long as the reviewer maintains his or her objectivity in accordance with paragraph 7. As noted in the reproposing release, such consultations may contribute to audit quality. In addition, one commenter asked the Board to clarify whether a reviewer may consult with the same personnel who previously consulted with the engagement team. The EQR standard does not prohibit the reviewer from holding discussions with such personnel. The reviewer may not, however, use personnel who previously consulted with the engagement team as assistants in performing the review unless they meet the objectivity and other qualification requirements of AS No. 7. To emphasize the requirement that assistants maintain objectivity, the Board added to paragraph 7 of AS No. 7 the phrase "and others who assist the reviewer."

²⁰ SEC independence rules allow engagement partners and concurring partners to serve for five consecutive years, after which they may not serve in either role for another period of five years. Within a five-year period, SEC independence rules do not impose a "cooling-off" period before the engagement partner can serve as the concurring partner. See Rule 2 - 01(c)(6)(i)(A) of Regulation S-X.

D. EQR Process

The Board's goal in proposing an EQR standard was to strengthen the existing requirements for concurring reviews in order to promote a more meaningful review of the work performed by the engagement team. Accordingly, the original proposal described certain procedures that the reviewer was required to perform that were more specific than those in the existing requirements. In response to comments received on the original proposal, the Board clarified some of the specifically required procedures and included, in a separate section in the repropoed standard, tailored requirements for an EQR of an interim review.

In general, commenters believed that the repropoed standard described the requirements of the EQR more clearly than the original proposal. However, a number of commenters suggested additional modifications that, in their view, would further clarify the Board's intent and ensure consistency of the requirements with the statement of objective. As described below, after considering these comments, the Board has modified certain of these requirements.

Terminology Used to Describe the Required Procedures

Several commenters noted that the specifically required procedures in paragraphs 9, 10, 14, and 15 of the repropoed standard were described using different, but in some cases similar, terms such as "determine," "evaluate," "identify," "read," and "review," which some commenters found confusing. In one commenter's view, the terms "determine," "identify," and "evaluate" may require the reviewer to perform procedures that are similar in scope to the procedures performed by the engagement partner. The commenters asked the Board to clarify the terminology in these sections of the EQR standard.

While the Board does not believe that this terminology required the reviewer to perform procedures that are appropriately performed by the engagement partner, it does agree that the terminology should not be confusing. Accordingly, the Board reduced the number of terms used in AS No. 7, so that the required procedures in paragraphs 9, 10, 14, and 15 are described using two terms, "evaluate" and "review"—with one exception. Because AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*, requires the auditor to *read* other information in documents containing the financial statements to be filed with the SEC, paragraphs 10.g and 15.e of AS No. 7, like in the original and repropoed standards, also require the reviewer to *read* such other information and evaluate whether the engagement team has taken appropriate action with respect to any material inconsistencies with the financial statements or interim financial information, respectively, or material misstatements of fact of which the engagement quality reviewer is aware.

Review of Documentation

A number of commenters viewed the statement in paragraphs 9 and 14 of the repropoed standard that "the reviewer should perform the procedures . . . by reviewing documentation" as too open-ended.²¹ Commenters were concerned that this provision could be interpreted to require the review of all of the engagement documentation.

The Board did not intend to require—and the repropoed provision did not require—the reviewer to review all of the engagement documentation. Nevertheless, to clarify this point, the Board has added the phrase "to the extent

²¹ That statement was intended, along with other changes in the repropoed standard, to clarify that the EQR is a review of the engagement team's work rather than a second audit. See page 17 of the repropoing release.

necessary to satisfy the requirements" of paragraphs 10 and 11, in an EQR of an audit, and 15 and 16, in an EQR of an interim review. As a practical matter, the reviewer cannot comply with the requirements of the EQR standard without holding discussions with the engagement partner and reviewing documentation. AS No. 7 requires the reviewer to hold sufficient discussions with the engagement partner and other members of the engagement team and review sufficient documentation to perform the required procedures with due professional care. What is sufficient will necessarily depend on the facts and circumstances of the particular engagement under review. Auditors often document their significant judgments and conclusions in various summary documents, which could serve as a starting point for the reviewer's evaluation of the engagement team's work.

Paragraph 11 of the repropoed standard required the reviewer, in an EQR of an audit, to evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 10 indicates that the engagement team responded appropriately to significant risks and supports the conclusions reached by the engagement team with respect to the matters reviewed. One commenter suggested adding a requirement to paragraph 11 to evaluate engagement documentation for compliance with the requirements of Auditing Standard No. 3, *Audit Documentation* ("AS No. 3"). The Board originally proposed such a requirement but, in response to comments, did not include it in the repropoed standard.²² The Board continues to believe that the documentation review requirements of paragraph 11 of the repropoed standard are appropriate and is adopting them as repropoed.

In an EQR of an interim review, paragraph 16 of the repropoed standard required the reviewer to evaluate whether the engagement documentation that he or she reviewed "[i]ndicates that the engagement team responded appropriately to significant risks," and "[s]upports the conclusions reached by the engagement team with respect to the matters reviewed." Some commenters noted that the auditor is not required to identify significant risks in a review of interim financial information and suggested not including a corresponding requirement in the EQR standard. The Board agrees and has not included this requirement in AS No. 7.

Specifically Required Procedures in the EQR of an Audit

Like the original proposal, the repropoed standard required certain procedures designed to give the reviewer the necessary information to evaluate the engagement team's significant judgments and conclusions. In response to comments on the original proposal, the Board made changes to these provisions in the repropoed standard that were intended to clarify that the reviewer performs the EQR by reviewing the engagement team's work, rather than by auditing the company himself or herself. Some commenters suggested that the specifically required procedures in the repropoed standard needed additional clarification.

In the view of several commenters, the repropoed standard did not clearly articulate the requirement for the reviewer to focus on the significant judgments made and the related conclusions reached by the engagement team. These commenters believed that the repropoed standard might be interpreted as requiring the review of all of the engagement team's judgments and conclusions. In response, AS No. 7 refers to "significant judgments" instead of "judgments" in describing certain of the required procedures.

²² Commenters suggested that such a requirement would duplicate the documentation review performed by the engagement partner.

The Board also clarified the wording of paragraph 10.b of the repropoed standard, which required the reviewer to "evaluate the risk assessments and audit responses" Some commenters expressed concern that this formulation required a review of audit responses for all areas of the audit. In response, AS No. 7 more specifically requires the reviewer to evaluate the engagement team's audit responses to significant risks identified by the engagement team and other significant risks identified by the engagement quality reviewer through performance of the procedures required by the EQR standard.²³ This change should help focus reviewers on areas of the audit that are more likely to contain a significant engagement deficiency.

Some commenters also expressed concern about the requirements in paragraphs 10.e and 10.f of the repropoed standard to determine whether appropriate matters have been communicated to the audit committee, management, and others; and to determine whether appropriate consultations have taken place on difficult or contentious matters. According to these commenters, a requirement to determine whether all of the communications or consultations have taken place rather than to evaluate the engagement team's communications and consultations was inconsistent with the objective of the EQR. In response, the Board replaced the phrase "determine if" with "based on the procedures required by this standard, evaluate whether." This change should tailor the specific requirements more closely to the overall objective. The Board also placed these paragraphs after the other required procedures in paragraph 10 to emphasize that the reviewer performs the evaluation required by these paragraphs based on the information obtained through the other procedures required by the EQR standard, and made a corresponding change in paragraph 15 for the EQR of an interim review.

Specifically Required Procedures in the EQR of an Interim Review

In response to comments on the original proposal, the Board included in the repropoed standard separate requirements for reviewing audits and interim reviews. The EQR requirements for interim reviews were based on the requirements for an EQR of an audit but were tailored to the different procedures performed in an interim review. A number of commenters were supportive of including separate requirements for the EQR of interim reviews in the repropoed standard. Some commenters, as discussed below, suggested modifications to those requirements.

Paragraph 15.a of the repropoed standard required the evaluation of engagement planning, including the consideration of the firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process; the company's business, recent significant activities, and related financial reporting issues and risks; and the nature of identified risks of material misstatement due to fraud. In one commenter's view, that paragraph might suggest that an interim review should include the same type of risk assessment as an audit. After considering this comment, the Board disagrees. Paragraph 15.a does not impose a requirement on the engagement team to identify risks as part of an interim review. Rather, it requires the

²³ The term "significant risk" is defined in the Board's recently proposed auditing standard on identifying and assessing risks of material misstatement to mean a "risk of material misstatement that is important enough to require special audit consideration." PCAOB Release No. 2008-006, *Proposed Auditing Standards Related to the Auditor's Assessment of and Response to Risk and Conforming Amendments to PCAOB Standards* (October 21, 2008). The Board intends that definition to apply to the EQR standard as well. The Board included this definition in a note to paragraph 10.b of AS No. 7. If, at the conclusion of the above mentioned rulemaking, the Board adopts a definition of significant risk that is different from that proposed, the Board will make a conforming change to the EQR standard.

reviewer to evaluate the engagement team's consideration of risks that have already been identified, e.g., during the preceding year's audit.

Additionally, three commenters recommended not requiring the EQR of an interim review to include an evaluation of judgments made about the severity and disposition of identified control deficiencies. In one commenter's view, such an evaluation would be inconsistent with the scope of an interim review. AU sec. 722.07, provides that the auditor:

should perform limited procedures quarterly to provide a basis for determining whether he or she has become aware of any material modifications that, in the auditor's judgment, should be made to the disclosures about changes in internal control over financial reporting in order for the certifications to be accurate and to comply with the requirements of Section 302 of the Act.

In response, the Board modified the requirement in paragraph 15.b in AS No. 7 to be more consistent with the requirements of AU sec. 722. Accordingly, AS No. 7 requires the reviewer, among other things, to evaluate significant judgments made about any material modifications that should be made to the disclosures about changes in internal control over financial reporting.

Paragraph 15.c of the reproposed standard required the reviewer, in the EQR of an interim review, to "[r]ead the interim financial information for all periods presented and for the immediately preceding interim period, management's disclosure for the period under review, if any, about changes in internal control over financial reporting, and the related engagement report, if a report is to be filed with the SEC." Some commenters suggested that the reviewer should be required to read the engagement report even when the issuer is not required to include the report in an SEC filing. The Board agrees and, accordingly, changed "to be filed with the SEC" to "to be issued."²⁴

E. Concurring Approval of Issuance

For an EQR of an audit, paragraph 12 of the reproposed standard provided that the reviewer "may provide concurring approval of issuance only if, after performing with due professional care the review required by this standard, he or she is not aware of a significant engagement deficiency." A note to the same paragraph describes a "significant engagement deficiency" as any of the four conditions described in the original proposal.²⁵ The reproposed requirements for providing concurring approval of issuance in an EQR of an interim review were the same, except that the first of these four conditions was modified in light of the differences between an interim review and an audit. Specifically, in an EQR of an interim review, the first condition was "the engagement team failed to perform interim review procedures necessary in the circumstances of the engagement" rather than "the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB."

²⁴ Additionally, one commenter recommended not requiring the reviewer to read interim financial information "for the immediately preceding interim period" because it was not clear, to this commenter, what one would review when performing the EQR for the first quarter. AU sec. 722.16 requires the accountant to apply analytical procedures to the interim financial information, which should include, among other things, comparing the quarterly interim financial information with comparable information for the immediately preceding interim period (i.e., the fourth quarter of the prior year, in a first quarter interim review). Because the Board believes the reproposed requirement is appropriately within the scope of an EQR for an interim review, it has retained it in AS No. 7.

²⁵ As included in the reproposed standard, these conditions were: (1) the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB; (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement; (3) the engagement report is not appropriate in the circumstances; or (4) the firm is not independent of its client.

Commenters generally believed that the concurring approval of issuance provision was appropriately described, though one recommended excluding the reference to "due professional care" from the EQR standard because AU sec. 230, *Due Professional Care in the Performance of Work*, already imposes an overall requirement on auditors to exercise due professional care. Many commenters, however, were critical of the reproposing release's description of the proposed requirement. A significant number of commenters objected to, or stated that they disagreed with, the statement in the reproposing release that the requirement to exercise due professional care imposes on the engagement quality reviewer essentially the same requirement as the "knows, or should know based on the requirements of this standard" formulation that was originally proposed. Some suggested that the Board is redefining the meaning of due professional care. One commenter stated that "[a] standard of 'knows, or should know' is akin to a strict liability requirement for engagement deficiencies," while another commenter suggested that the Board "clarify that in this context, 'due professional care' is not a negligence standard."

After considering the comments, the Board is adopting the concurring approval of issuance requirement as reproposed. While auditors are already required to exercise due professional care in discharging their responsibilities, comments, as noted above and in the reproposing release, have reflected some confusion about the applicable standard of care in an EQR. Accordingly, reference to due professional care in the requirement is appropriate.

The Board is not redefining due professional care in the context of the EQR standard. As the Board noted in the reproposing release, AU sec. 230 describes due professional care as "reasonable care and diligence" and makes clear that an auditor who acts negligently, i.e., without "reasonable care and diligence," breaches the duty to exercise due professional care.²⁶ Due professional care, as described in AU sec. 230, imposes neither a strict liability nor an actual knowledge standard. The Board intends the term to mean "reasonable care and diligence," as described in AU sec. 230.

The application of a negligence standard to the concurring approval of issuance provision means, as noted in the reproposing release, that "a reviewer cannot evade responsibility because, as a result of an inadequate review, he or she did not discover a problem that a reasonably careful and diligent review would have revealed."²⁷ For that reason, the provision requires the reviewer to perform the required review with due professional care as a prerequisite to providing concurring approval of issuance. A qualified reviewer who has done so will, necessarily, have discovered any significant engagement deficiencies that could reasonably have been discovered under the circumstances. Accordingly, under AS No. 7, such a reviewer may provide concurring approval of issuance if "he or she is not aware of a significant engagement deficiency." Because a reviewer who has not performed the required review with due professional care might not have discovered any significant engagement deficiencies that could reasonably have been discovered under the circumstance—*si.e.*, those the reviewer reasonably should know about—such a reviewer may not, consistent with the standard, provide concurring approval of issuance.

²⁶ See AU sec. 230.03.

²⁷ Of course, to impose the more severe sanctions authorized under the Act, such as a permanent bar or permanent revocation of registration, the Board must establish "(A) intentional or knowing conduct, including reckless conduct, that results in violation of the applicable statutory, regulatory, or professional standard; or (B) repeated instances of negligent conduct, each resulting in a violation of the applicable statutory, regulatory, or professional standard." Section 105(c)(5) of the Act; see also Rules on Investigations and Adjudications, PCAOB Release No. 2003-015, Appendix 2 at A2-76 (September 29, 2003) (discussing Section 105(c)(5)).

F. Documentation of the EQR

The repropose standard required the EQR documentation to contain sufficient information to identify: who performed the review, the documents reviewed, whether and when concurring approval of issuance was provided or the reasons for not providing the approval, and the significant discussions held, including the details of such discussions. These provisions were intended to respond to comments expressing concern that the originally proposed documentation requirements were overly detailed and would result in duplication of the engagement team's work. Some commenters reiterated their concerns that some of the repropose requirements were duplicative of requirements to document the engagement itself or overly burdensome.

The Board continues to believe that it is necessary to strengthen the documentation requirements in the interim standard to provide for an informative record of the work performed during the EQR. At the same time, the Board has reconsidered its approach to the documentation requirement in light of the comments received. As described below, the Board has added a general requirement that places the specific requirements in the context of the overall purpose of EQR documentation—to provide a record of how the reviewer carried out the review in accordance with the standard's requirements.

Specifically, paragraph 19 of AS No. 7 includes a requirement for the engagement documentation to contain sufficient information to enable an experienced auditor,²⁸ having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of the standard.²⁹ This provision is similar to the audit documentation requirement in paragraph 6 of AS No. 3, and should clarify how the more specific requirements are meant to apply in particular circumstances.

For example, if a reviewer identified a significant engagement deficiency to be addressed by the engagement team, the engagement team should document its response to the identified deficiency in accordance with AS No. 3. Because AS No. 7 does not require duplication of documentation prepared by the engagement team, the engagement quality reviewer does not have to separately document the engagement teams response. Rather, the EQR documentation should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand, e.g., the significant deficiency identified, how the reviewer communicated the deficiency to the engagement team, why such matter was important, and how the reviewer evaluated the engagement team's response. Similarly, if the reviewer participated in the discussion of the potential for material misstatement due to fraud,³⁰ and the engagement team documented the discussion in accordance with AS No. 3, AS No. 7 only requires the engagement quality reviewer or reviewer's assistants to prepare separate documentation if the documentation prepared by the engagement team does not contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of AS No. 7.

²⁸ As described in paragraph 6 of AS No. 3, "[a]n experienced auditor has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry."

²⁹ Additionally, for clarity of presentation, the Board moved the requirement to include documentation of an EQR in the engagement documentation from paragraph 19 to a new paragraph 20 in AS No. 7.

³⁰ See paragraph .14 of AU sec. 316, *Consideration of Fraud in a Financial Statement Audit*.

In response to comments, the Board also considered whether modifications were necessary to the specific requirements. First, the Board received several comments related to the provisions of repropoed paragraph 19.b, which required the EQR documentation to contain information sufficient to identify the documents reviewed. One commenter believed that a reviewer "may feel compelled to engage in an unnecessary review of additional documents in order to compile a more 'complete' list." Conversely, another commenter believed that the reviewer would be discouraged "to inspect one or more documents than he or she otherwise might or should, thus reducing the quality of the EQR." Some commenters suggested clarifying how the documents should be identified as "reviewed" (i.e., electronically or manually), or suggested limiting the scope of paragraph 19.b to "significant documents."

After considering these comments, the Board has decided to include this requirement in AS No. 7. Identifying a document as reviewed by the engagement quality reviewer should not be unduly burdensome, and will provide an informative record. Such a record could provide registered firms, and the Board, with better information about the EQR, which can be used to evaluate and improve the EQR process. The Board believes it is unnecessary to require in the standard a particular document identification method, such as electronic or manual signature. Rather, this should be determined by each firm individually.

Second, a number of commenters believed that the requirement in paragraph 19.c to document details of significant discussions held by the reviewer, and others who assisted the reviewer, would not improve audit quality and that it would be costly to implement. These commenters suggested that the reviewer might not be able to determine whether a discussion is significant at the time a discussion is held and therefore feel compelled to document every discussion. In order to make clear that documentation of every discussion is neither required nor a prudent use of resources, the Board has not included an explicit requirement to document discussions in AS No. 7. As explained above, however, if documentation of a particular discussion is necessary "to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed . . . to comply with the provisions of th[e] standard," such documentation is required under the general documentation requirement.

G. Effective Date

In repropoing the standard, the Board intended to make a final standard effective for EQRs of interim reviews for fiscal years beginning after December 15, 2009 and for EQRs of audits for fiscal years ending on or after December 15, 2009. Several commenters were concerned that the proposed effective date would not allow for sufficient time to train the auditing firm's personnel and implement the new EQR requirements. These commenters recommended that the effective date of the EQR standard be linked to the beginning of an audit period to provide adequate time for registered firms to prepare for adoption. The Board agrees with the concerns expressed by the commenters and has decided to make AS No. 7 effective, subject to SEC approval, for both the EQR of audits and the EQR of interim reviews for fiscal years beginning on or after December 15, 2009.

H. Comparison with other EQR Standards

Three commenters suggested that the Board provide a comparison between the EQR standard and standards of other standard-setters on this subject. One

commenter noted that because issuer clients often represent a minor part of a smaller firm's audit client base, the audit methodology of such a firm may be based on other standards as well as PCAOB standards. In response, the Board has described certain significant differences between the Board's EQR standard and the analogous standards of the International Auditing and Assurance Standards Board ("IAASB")³¹ and the Auditing Standards Board ("ASB") of the AICPA³² in Appendix 3. Each section of the appendix also includes references to the relevant paragraphs of AS No. 7.

Appendix 3 is provided for informational purposes only. It describes only certain provisions of AS No. 7, and is not a substitute for the EQR standard itself. The full text of AS No. 7 is included in Appendix 1 of this release. Compliance with AS No. 7 is required for registered public accounting firms. Compliance with the analogous ASB and IAASB standards is not sufficient to meet the requirements of AS No. 7.

* * *

On the 28th day of July, in the year 2009, the foregoing was, in accordance with the bylaws of the Public Company Accounting Oversight Board,

ADOPTED BY THE BOARD.

Secretary

July 28, 2009

APPENDIX 1—Auditing Standard No. 7—*Engagement Quality Review*

APPENDIX 2—Conforming Amendment to PCAOB Interim Quality Control Standards

APPENDIX 3—Analysis of Significant Differences between the Requirements of Auditing Standard No. 7, *Engagement Quality Review*, of the Public Company Accounting Oversight Board and the Analogous Standards of the International Auditing and Assurance Standards Board, and the Auditing Standards Board of the American Institute of Certified Public Accountants

³¹ International Standard on Quality Control 1, *Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements*, and International Standard on Auditing 220, *Quality Control for an Audit of Financial Statements*, issued in December 2008.

³² AICPA, Statement on Quality Control Standards No. 7, *A Firm's System of Quality Control* (October 2007).

Appendix 1—Auditing Standard No. 7

Engagement Quality Review

[Supersedes SECPS Requirements of Membership 1000.08(f).]

Applicability of Standard

1. An engagement quality review and concurring approval of issuance are required for each audit engagement and for each engagement to review interim financial information conducted pursuant to the standards of the Public Company Accounting Oversight Board ("PCAOB").

Objective

2. The objective of the engagement quality reviewer is to perform an evaluation of the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued, in order to determine whether to provide concurring approval of issuance.¹

Qualifications of an Engagement Quality Reviewer

3. The engagement quality reviewer must be an associated person of a registered public accounting firm. An engagement quality reviewer from the firm that issues the engagement report (or communicates an engagement conclusion, if no report is issued) must be a partner or another individual in an equivalent position. The engagement quality reviewer may also be an individual from outside the firm.²

4. As described below, an engagement quality reviewer must have competence, independence, integrity, and objectivity.

Note: The firm's quality control policies and procedures should include provisions to provide the firm with reasonable assurance that the engagement quality reviewer has sufficient competence, independence, integrity, and objectivity to perform the engagement quality review in accordance with the standards of the PCAOB.

¹ In the context of an audit, "engagement report" refers to the audit report (or reports if, in an integrated audit, the auditor issues separate reports on the financial statements and internal control over financial reporting). In the context of an engagement to review interim financial information, the term refers to the report on interim financial information. An engagement report might not be issued in connection with a review of interim financial information. See paragraph .03 of AU section ("sec.") 722, *Interim Financial Information*.

² An outside reviewer who is not already associated with a registered public accounting firm would become associated with the firm issuing the report if *he or she* (rather than, or in addition to, his or her firm or other employer): (1) receives compensation from the firm issuing the report for performing the review or (2) performs the review as agent for the firm issuing the report. See PCAOB Rule 1001(p)(i) for the definition of an associated person of a registered public accounting firm.

Competence

5. The engagement quality reviewer must possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the engagement partner on the engagement under review.³

Independence, Integrity, and Objectivity

6. The engagement quality reviewer must be independent of the company, perform the engagement quality review with integrity, and maintain objectivity in performing the review.

Note: The reviewer may use assistants in performing the engagement quality review. Personnel assisting the engagement quality reviewer also must be independent, perform the assigned procedures with integrity, and maintain objectivity in performing the review.

7. To maintain objectivity, the engagement quality reviewer and others who assist the reviewer should not make decisions on behalf of the engagement team or assume any of the responsibilities of the engagement team. The engagement partner remains responsible for the engagement and its performance, notwithstanding the involvement of the engagement quality reviewer and others who assist the reviewer.

8. The person who served as the engagement partner during either of the two audits preceding the audit subject to the engagement quality review may not be the engagement quality reviewer. Registered firms that qualify for the exemption under Rule 2-01(c)(6)(ii) of Regulation S-X, 17 C.F.R. 210.2-01(c)(6)(ii), are exempt from the requirement in this paragraph.

Engagement Quality Review for an Audit

Engagement Quality Review Process

9. In an audit engagement, the engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report. To evaluate such judgments and conclusions, the engagement quality reviewer should, to the extent necessary to satisfy the requirements of paragraphs 10 and 11: (1) hold discussions with the engagement partner and other members of the engagement team, and (2) review documentation.

10. In an audit, the engagement quality reviewer should:

- a. Evaluate the significant judgments that relate to engagement planning, including—
 - The consideration of the firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process,

³ The term "engagement partner" has the same meaning as the phrases "auditor with final responsibility for the audit" in AU sec. 311, *Planning and Supervision*, and "practitioner-in-charge of an engagement" in PCAOB interim quality control standard QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control-Competencies Required by a Practitioner-in-Charge of an Attest Engagement*. QC sec. 40 describes the competencies required of a practitioner-in-charge of an attest engagement.

- The consideration of the company's business, recent significant activities, and related financial reporting issues and risks, and
 - The judgments made about materiality and the effect of those judgments on the engagement strategy.
- b. Evaluate the engagement team's assessment of, and audit responses to—
- Significant risks identified by the engagement team, including fraud risks, and
 - Other significant risks identified by the engagement quality reviewer through performance of the procedures required by this standard.

Note: A *significant risk* is a risk of material misstatement that is important enough to require special audit consideration.

- c. Evaluate the significant judgments made about (1) the materiality and disposition of corrected and uncorrected identified misstatements and (2) the severity and disposition of identified control deficiencies.
- d. Review the engagement team's evaluation of the firm's independence in relation to the engagement.
- e. Review the engagement completion document⁴ and confirm with the engagement partner that there are no significant unresolved matters.
- f. Review the financial statements, management's report on internal control, and the related engagement report.
- g. Read other information in documents containing the financial statements to be filed with the Securities and Exchange Commission ("SEC")⁵ and evaluate whether the engagement team has taken appropriate action with respect to any material inconsistencies with the financial statements or material misstatements of fact of which the engagement quality reviewer is aware.
- h. Based on the procedures required by this standard, evaluate whether appropriate consultations have taken place on difficult or contentious matters. Review the documentation, including conclusions, of such consultations.
- i. Based on the procedures required by this standard, evaluate whether appropriate matters have been communicated, or identified for communication, to the audit committee, management, and other parties, such as regulatory bodies.

Evaluation of Engagement Documentation

11. In an audit, the engagement quality reviewer should evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 10—

⁴ Paragraph 13 of PCAOB Auditing Standard No. 3, *Audit Documentation*, requires the auditor to identify all significant findings or issues in an engagement completion document.

⁵ See paragraphs .04–.06 of AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*; AU sec. 711, *Filings Under Federal Securities Statutes*.

- a. Indicates that the engagement team responded appropriately to significant risks, and
- b. Supports the conclusions reached by the engagement team with respect to the matters reviewed.

Concurring Approval of Issuance

12. In an audit, the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care⁶ the review required by this standard, he or she is not aware of a significant engagement deficiency.

Note: A *significant engagement deficiency* in an audit exists when (1) the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client.

13. In an audit, the firm may grant permission to the client to use the engagement report only after the engagement quality reviewer provides concurring approval of issuance.⁷

Engagement Quality Review for a Review of Interim Financial Information

Engagement Quality Review Process

14. In an engagement to review interim financial information, the engagement quality reviewer should evaluate the significant judgments made by the engagement team and the related conclusions reached in forming the overall conclusion on the engagement and in preparing the engagement report, if a report is to be issued. To evaluate such judgments and conclusions, the engagement quality reviewer should, to the extent necessary to satisfy the requirements of paragraphs 15 and 16: (1) hold discussions with the engagement partner and other members of the engagement team, and (2) review documentation.

15. In a review of interim financial information, the engagement quality reviewer should:

- a. Evaluate the significant judgments that relate to engagement planning, including the consideration of—
 - The firm's recent engagement experience with the company and risks identified in connection with the firm's client acceptance and retention process,
 - The company's business, recent significant activities, and related financial reporting issues and risks, and

⁶ See AU sec. 230, *Due Professional Care in the Performance of Work*.

⁷ Concurring approval of issuance by the engagement quality reviewer also is required when reissuance of an engagement report requires the auditor to update his or her procedures for subsequent events. In that case, the engagement quality reviewer should update the engagement quality review by addressing those matters related to the subsequent events procedures.

- The nature of identified risks of material misstatement due to fraud.
- b. Evaluate the significant judgments made about (1) the materiality and disposition of corrected and uncorrected identified misstatements and (2) any material modifications that should be made to the disclosures about changes in internal control over financial reporting.
- c. Perform the procedures described in paragraphs 10.d and 10.e.
- d. Review the interim financial information for all periods presented and for the immediately preceding interim period, management's disclosure for the period under review, if any, about changes in internal control over financial reporting, and the related engagement report, if a report is to be issued.
- e. Read other information in documents containing interim financial information to be filed with the SEC⁸ and evaluate whether the engagement team has taken appropriate action with respect to material inconsistencies with the interim financial information or material misstatements of fact of which the engagement quality reviewer is aware.
- f. Perform the procedures in paragraphs 10.h and 10.i

Evaluation of Engagement Documentation

16. In a review of interim financial information, the engagement quality reviewer should evaluate whether the engagement documentation that he or she reviewed when performing the procedures required by paragraph 15 supports the conclusions reached by the engagement team with respect to the matters reviewed.

Concurring Approval of Issuance

17. In a review of interim financial information, the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care the review required by this standard, he or she is not aware of a significant engagement deficiency.

Note: A *significant engagement deficiency* in a review of interim financial information exists when (1) the engagement team failed to perform interim review procedures necessary in the circumstances of the engagement, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client.

18. In a review of interim financial information, the firm may grant permission to the client to use the engagement report (or communicate an engagement conclusion to its client, if no report is issued) only after the engagement quality reviewer provides concurring approval of issuance.

⁸ See AU sec. 722.18f; AU sec. 711.

Documentation of an Engagement Quality Review

19. Documentation of an engagement quality review should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of this standard, including information that identifies:

- a. The engagement quality reviewer, and others who assisted the reviewer,
- b. The documents reviewed by the engagement quality reviewer, and others who assisted the reviewer,
- c. The date the engagement quality reviewer provided concurring approval of issuance or, if no concurring approval of issuance was provided, the reasons for not providing the approval.

20. Documentation of an engagement quality review should be included in the engagement documentation.

21. The requirements related to retention of and subsequent changes to audit documentation in PCAOB Auditing Standard No. 3, *Audit Documentation*, apply with respect to the documentation of the engagement quality review.

Appendix 2—Conforming Amendment to PCAOB Interim Quality Control Standards

QC sec. 20, "System of Quality Control for a CPA Firm's Accounting and Auditing Practice"

QC section ("sec.") 20, "System of Quality Control for a CPA Firm's Accounting and Auditing Practice" of the Board's interim quality control standards is amended as follows—

The third sentence of paragraph .18 of QC sec. 20 is replaced with the following sentence:

These policies and procedures also should address engagement quality reviews pursuant to PCAOB Auditing Standard No. 7, *Engagement Quality Review*.

Appendix 3—Analysis of Significant Differences between the Requirements of Auditing Standard No. 7, *Engagement Quality Review*, of the Public Company Accounting Oversight Board and the Analogous Standards of the International Auditing and Assurance Standards Board, and the Auditing Standards Board of the American Institute of Certified Public Accountants

Introduction

This appendix includes an analysis of significant differences between Auditing Standard No. 7, *Engagement Quality Review* ("AS No. 7" or the "EQR standard") of the Public Company Accounting Oversight Board ("PCAOB"), and the analogous standards of the Auditing Standards Board ("ASB") of the American Institute of Certified Public Accountants ("AICPA"),¹ and the International Auditing and Assurance Standards Board ("IAASB").² This analysis may not represent the views of the ASB or IAASB regarding the interpretation of their standards.

Appendix 3 is provided for informational purposes only. It describes only certain provisions of AS No. 7, and is not a substitute for the standard itself. The full text of AS No. 7 is included in Appendix 1 of this release. Compliance with AS No. 7 is required for registered public accounting firms. Compliance with the analogous ASB and IAASB standards is not sufficient to meet the requirements of AS No. 7.

The Board has developed AS No. 7 to enhance the quality of the engagement quality review ("EQR") process by strengthening the provisions of the Board's interim standard.³ Recently, the ASB and IAASB also updated their standards related to the EQR, and the Board considered information in the standards of the ASB and IAASB when developing its new EQR standard. As described in this appendix, AS No. 7 includes provisions that are similar in terminology and substance to those in the ASB and IAASB standards, and other provisions added as necessary by the Board. For example, the Board included certain provisions in AS No. 7 that are not included in the standards of the ASB or IAASB to: comply with the requirements of the Sarbanes-Oxley Act ("the Act"); respond to the feedback received on the interim standard from the Board's Standing Advisory Group ("SAG") and information obtained through PCAOB oversight of registered firms; and to ensure consistency of the provisions of AS No. 7 with the provisions and terminology of other relevant standards of the PCAOB.

Some of the provisions of the IAASB standards described in this appendix are included in the "Application and Other Explanatory Material" section of these

¹ AICPA, Statement on Quality Control Standards No. 7 ("SQCS No. 7"), *A Firm's System of Quality Control* (October 2007).

² International Standard on Quality Control 1 ("ISQC 1"), *Quality Control for Firms that Perform Audits and Reviews of Financial Statements, and Other Assurance and Related Services Engagements*, and International Standard on Auditing 220 ("ISA 220"), *Quality Control for an Audit of Financial Statements*, issued in December 2008.

³ The Securities and Exchange Commission Practice Section ("SECPS") of the AICPA Requirements of Membership Sections 1000.08(f); 1000.39, Appendix E.

standards. That section "does not in itself impose a requirement," but "is relevant to the proper application of the requirements of an ISA."⁴ In contrast, the comparable provisions of AS No. 7 are included in the standard, and establish requirements.

Applicability

PCAOB

Section 103 of the Act requires the Board to adopt an EQR standard for audit engagements.⁵ Because of the importance of interim financial information to investors, the Board has decided to include a requirement to perform an EQR for reviews of interim financial information performed in accordance with AU section ("sec.") 722, *Interim Financial Information*, ("interim reviews") in the EQR standard. Accordingly, AS No. 7 requires an EQR and concurring approval of issuance for each audit engagement and for each interim review engagement conducted pursuant to the standards of the PCAOB.⁶

ASB

SQCS No. 7 does not require an EQR for any type of engagement. Accounting firms should determine whether an EQR is required for any engagement.⁷

IAASB

ISQC 1 requires an EQR only for audits of financial statements of listed entities. Accounting firms should determine whether an EQR is required for any other engagements.⁸

Qualifications of a Reviewer

PCAOB

Associated Person—In order to obtain cooperation with the Board of the individuals that perform an EQR,⁹ the Board included in AS No. 7 a requirement, according to which the engagement quality reviewer must be an associated person of a registered public accounting firm.¹⁰

A Reviewer from Outside the Firm—Similar to the standards of the ASB and IAASB, AS No. 7 allows a qualified individual from outside the firm to perform an EQR.¹¹

Partner or Person in an Equivalent Position—Because the EQR is intended to be an objective "second look" at work performed by the engagement team, the

⁴ See paragraph A59 of ISA 200, *Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing*.

⁵ See Section 103(a)(2)(A)(ii) of the Act.

⁶ See paragraph 1 of AS No. 7.

⁷ See paragraphs 80-81 and 83 of SQCS No. 7.

⁸ See paragraphs 35(a)-(b) of ISQC 1.

⁹ A registered public accounting firm has an obligation to secure and enforce consents to cooperate with the Board from each associated person of the firm, see Section 102(b)(3) of the Act, including those who become associated with the firm by performing the review. The Board also may directly sanction any such person who fails to cooperate in an investigation or inspection. See Section 105(b)(3) of the Act and PCAOB Rules 5110 and 4006.

¹⁰ See paragraph 3 of AS No. 7.

¹¹ See *id.*

reviewer should possess sufficient authority to be able to withstand pressure from the engagement partner or other firm personnel, such as members of the firm's national office. The Board believes that concerns about authority will most often arise when the reviewer and the engagement partner are from the same firm. Therefore, the Board included in AS No. 7 the requirement that an in-house reviewer—but not one from outside the firm—be a partner or another individual in an equivalent position.¹²

General Competence Requirement—The Board included in AS No. 7 a requirement for the reviewer to possess the level of knowledge and competence related to accounting, auditing, and financial reporting required to serve as the engagement partner on the engagement under review.¹³ Without such knowledge and competence, the reviewer would not be able to appropriately evaluate the significant judgments made and related conclusions reached by the engagement team in an audit or an interim review.

Independence, Integrity, and Objectivity—The reviewer must comply with all applicable independence requirements,¹⁴ and perform the review with integrity and objectivity.¹⁵ The engagement quality reviewer should be able to take a step back and conduct the review from the perspective of an outsider looking in.

Accordingly, AS No. 7 requires that the firm's quality control policies and procedures should include provisions to provide the firm with reasonable assurance that the engagement quality reviewer has sufficient competence, independence, integrity, and objectivity to perform the engagement quality review in accordance with the standards of the PCAOB.¹⁶ As described later, the ASB and IAASB contain similar provisions, except the standards of IAASB do not include the direction on independence for the reviewer.

While AS No. 7 does not contain the direction included in the standards of ASB and IAASB that the firm's policies and procedures should establish the degree to which a reviewer can be consulted on the engagement without compromising his or her objectivity,¹⁷ or provide for the replacement of the reviewer when the reviewer's ability to perform an objective review has been, or may be, impaired,¹⁸ such direction is implicit in the requirement of AS No. 7 that a reviewer must maintain objectivity in performing the EQR.¹⁹ Importantly, AS No. 7 provides direction on maintaining objectivity, according to which the engagement quality reviewer and others who assist the reviewer should not make decisions on behalf of the engagement team or assume any of the responsibilities of the engagement team.²⁰

"Cooling-off" period—An engagement quality reviewer is expected to take a fresh, objective look at the engagement. The Board believes that it would be harder for an engagement partner, who has had overall responsibility for the

¹² See *id.*.

¹³ See paragraph 5 of AS No. 7. PCAOB interim quality control standards describe the competencies required of a person who has the overall responsibility for an engagement (or any practitioner-in-charge of an attest engagement). See QC sec. 40, *The Personnel Management Element of a Firm's System of Quality Control- Competencies Required by a Practitioner-in-Charge of an Attest Engagement*.

¹⁴ See, e.g., Rule 2-01(c)(6) of Regulation S-X, 17 C.F.R. § 210.2-01(c)(6) (subjecting the engagement quality reviewer to the five-year partner rotation requirement).

¹⁵ See ET sec. 102, *Integrity and Objectivity*, and ET sec. 191, *Ethics Rulings on Independence, Integrity, and Objectivity*.

¹⁶ See paragraph 4 of AS No. 7.

¹⁷ See paragraph 96 of SQCS No. 7; paragraph 39(b) of ISQC 1.

¹⁸ See paragraph 97 of SQCS No. 7; paragraph 41 of ISQC 1.

¹⁹ See paragraph 6 of AS No. 7.

²⁰ See paragraph 7 of AS No. 7.

audit for a year or more, to perform the EQR with the necessary level of objectivity. Accordingly, AS No. 7 includes a requirement, according to which the reviewer may not be the person who served as the engagement partner during either of the two audits preceding the audit subject to the EQR. (Registered firms that qualify for the exemption under Rule 2-01(c)(6)(ii) of Regulation S-X, 17 C.F.R. §210.2-01(c)(6)(ii), are exempt from this requirement.)²¹

ASB

SQCS No. 7 requires an auditing firm to establish the engagement quality reviewer qualifications, including those related to experience, authority, and objectivity.²² SQCS No. 7 describes the engagement quality reviewer as a partner, other person in the firm, qualified external person, or a team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to perform the EQR.²³ According to SQCS No. 7, what constitutes sufficient and appropriate technical experience, and authority depends on the circumstances of the engagement.²⁴

SQCS No. 7 does not include a "cooling-off" period, or a requirement for the reviewer to be an associated person of a registered public accounting firm.

Similar to AS No. 7, SQCS No. 7 requires that the firm establish policies and procedures designed to maintain the objectivity of the reviewer, and that such policies and procedures provide that the reviewer should satisfy the independence requirements relating to the engagements reviewed.²⁵ Unlike AS No. 7, SQCS No. 7 does not provide a specific direction on maintaining objectivity. Instead, SQCS No. 7 provides examples of policies and procedures for maintaining the objectivity of the reviewer.²⁶

IAASB

ISQC 1 requires an auditing firm to establish the engagement quality reviewer qualification requirements, including those related to experience, authority, and objectivity.²⁷ The engagement quality reviewer is described as a partner, other person in the firm, suitably qualified external person, or a team made up of such individuals, none of whom is part of the engagement team, with sufficient and appropriate experience and authority to objectively evaluate the significant judgments the engagement team made and the conclusions it reached in formulating the report.²⁸ The application materials in ISQC 1 state that what constitutes sufficient and appropriate technical expertise, experience and authority depends on the circumstances of the engagement.²⁹

ISQC 1 and ISA 220 do not include reviewer independence or "cooling-off" requirements, or a requirement for the reviewer to be an associated person of a registered public accounting firm.

Similar to AS No. 7, ISQC 1 requires that the firm establish policies and procedures designed to maintain the objectivity of the reviewer.³⁰ Unlike AS No. 7,

²¹ See paragraph 8 of AS No. 7.

²² See paragraphs 92-94 of SQCS No. 7.

²³ See paragraph 5.e of SQCS No. 7.

²⁴ See paragraph 93 of SQCS No. 7.

²⁵ See paragraph 94 of SQCS No. 7.

²⁶ See paragraph 95 of SQCS No. 7.

²⁷ See paragraphs 39 and 40 of ISQC 1.

²⁸ See paragraph 12(e) of ISQC 1; paragraph 7(c) of ISA 220.

²⁹ See paragraph A47 of the Application and Other Explanatory Materials of ISQC 1.

³⁰ See paragraph 40 of ISQC 1.

the IAASB standards do not provide specific direction on maintaining objectivity. Instead, the application materials of ISQC 1 discuss policies and procedures for maintaining the objectivity of the reviewer.³¹

Engagement Quality Review for an Audit

Engagement Quality Review Process

PCAOB

Similar to the standards of the ASB and IAASB, AS No. 7 requires the reviewer to evaluate the significant judgments made and the related conclusions reached by the engagement team in forming the overall conclusion on the engagement and in preparing the engagement report; and to carry out the review through discussions with those performing the engagement and the review of documentation.³²

Further, AS No. 7 specifically requires the reviewer, among other things, to evaluate:

- The significant judgments that relate to engagement planning;³³
- The engagement team's assessment of and audit responses to significant risks, including fraud risks;³⁴ and
- The significant judgments made about identified misstatements and control deficiencies.³⁵

Also, AS No. 7 contains a requirement, similar to a requirement for audits of listed entities in ISA 220, according to which the reviewer, based on the procedures required by the standard, should evaluate whether appropriate consultations have taken place on difficult or contentious matters, and review the documentation, including conclusions, of such consultations.³⁶

According to PCAOB Rule 3520, *Auditor Independence*, "[a] registered public accounting firm and its associated persons must be independent of the firm's audit client throughout the audit and professional engagement period." Because of the importance of compliance with PCAOB and Securities and Exchange Commission ("SEC") independence requirements, AS No. 7 requires the reviewer to review the engagement team's evaluation of the firm's independence in relation to the engagement.³⁷

In 2004, the Board adopted Auditing Standard No. 3, Audit Documentation ("AS No. 3"). According to paragraph 13 of AS No. 3, the auditor must identify all significant findings or issues in an engagement completion document. AS No. 7 requires the reviewer to review the engagement completion document and confirm with the person who has overall responsibility for the engagement that there are no significant unresolved matters.³⁸

³¹ See paragraph A49 of the Application and Other Explanatory Materials of ISQC 1.

³² See paragraph 9 of AS No. 7.

³³ See paragraph 10.a of AS No. 7.

³⁴ See paragraph 10.b of AS No. 7.

³⁵ See paragraph 10.c of AS No. 7.

³⁶ See paragraph 10.h of AS No. 7.

³⁷ See paragraph 10.d of AS No. 7.

³⁸ See paragraph 10.e of AS No. 7.

Similar to the standards of the ASB and IAASB, AS No. 7 requires the reviewer to review the financial statements and the related engagement report.³⁹ Additionally, because an integrated audit includes an audit of internal control over financial reporting,⁴⁰ AS No. 7 requires the reviewer to review management's report on internal control.⁴¹

An issuer may publish various documents that contain information in addition to audited financial statements and the auditor's report thereon. The auditor is required to read the other information and consider whether such information, or the manner of its presentation, is materially inconsistent with information, or the manner of its presentation, appearing in the financial statements.⁴² Accordingly, AS No. 7 requires the reviewer to read other information in documents containing the financial statements to be filed with the SEC and evaluate whether the engagement team has taken appropriate action with respect to any material inconsistencies with the financial statements or material misstatements of fact of which the engagement quality reviewer is aware.⁴³

Finally, because of the importance to the audit process of effective communication between the auditor and those charged with governance, AS No. 7 requires the reviewer, based on the procedures required by the standard, to evaluate whether appropriate matters have been communicated, or identified for communication, to the audit committee, management, and other parties, such as regulatory bodies.⁴⁴

ASB

Similar to AS No. 7, SQCS No. 7 requires that the EQR procedures include an objective evaluation of the significant judgments made by the engagement team and the conclusions reached in formulating the report.⁴⁵ The EQR performed in accordance with SQCS No. 7 should include: reading the financial statements or other subject matter information and the report and considering whether the report is appropriate; review of selected documentation; and a discussion with the engagement partner regarding significant findings and issues.⁴⁶

In addition to the required procedures summarized in the preceding paragraph, an EQR performed in accordance with SQCS No. 7 may include consideration of certain other matters, examples of which are provided in the standard. SQCS No. 7 also provides examples of significant judgments that could be made by the engagement team.⁴⁷

IAASB

The EQR procedures required by the standards of the IAASB are similar to those required by the ASB.⁴⁸ Additionally, for audits of listed entities, the IAASB standards require the reviewer to consider: the engagement team's evaluation of the firm's independence in relation to the engagement; and whether

³⁹ See paragraph 10.f of AS No. 7.

⁴⁰ PCAOB Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That Is Integrated with An Audit of Financial Statements* establishes requirements and provides direction that apply when an auditor is engaged to perform an audit of management's assessment of the effectiveness of internal control over financial reporting.

⁴¹ See paragraph 10.f of AS No. 7.

⁴² See AU sec. 550, *Other Information in Documents Containing Audited Financial Statements*.

⁴³ See paragraph 10.g of AS No. 7.

⁴⁴ See paragraph 10.i of AS No. 7.

⁴⁵ See paragraph 85 of SQCS No. 7.

⁴⁶ See paragraphs 86 and 87 of SQCS No. 7.

⁴⁷ See paragraphs 88 and 89 of SQCS No. 7.

⁴⁸ See paragraph 37 of ISQC 1; paragraph 20 of ISA 220.

appropriate consultation has taken place on matters involving differences of opinion or other difficult or contentious matters, and the conclusions arising from those consultations.⁴⁹

Evaluation of Engagement Documentation

PCAOB

AS No. 7 includes a documentation review requirement that is similar to the requirement for audits of listed entities in the IAASB standards. According to AS No. 7, the reviewer should evaluate whether the engagement documentation that he or she reviewed when performing the required EQR procedures indicates that the engagement team responded appropriately to significant risks and supports the conclusions reached by the engagement team with respect to the matters reviewed.⁵⁰

ASB

Unlike AS No. 7, SQCS No. 7 does not require the reviewer to evaluate whether the engagement documentation satisfies certain criteria. Instead, SQCS No. 7 states that an EQR may include consideration of whether working papers selected for review reflect the work performed in relation to the significant judgments and support the conclusions reached.⁵¹

IAASB

Similar to AS No. 7, the IAASB standards require, for audits of financial statements of listed entities, that the reviewer consider whether audit documentation selected for review reflects the work performed in relation to the significant judgments and supports the conclusions reached.⁵²

Concurring Approval of Issuance and Resolution of Differences of Opinion

PCAOB

Under the Act,⁵³ the Board's standard on EQR must require concurring approval of issuance of each audit report. AS No. 7 states that the engagement quality reviewer may provide concurring approval of issuance only if, after performing with due professional care the review required by the standard, he or she is not aware of a significant engagement deficiency.⁵⁴ The firm may grant permission to the client to use the engagement report only after the engagement quality reviewer provides concurring approval of issuance.⁵⁵

Unlike the standards of the ASB and IAASB, AS No. 7 does not include an explicit provision for addressing differences of opinion. Firms may develop their

⁴⁹ See paragraphs 38(a) and 38(b) of ISQC 1; paragraphs 21(a) and 21(b) of ISA 220.

⁵⁰ See paragraph 11 of AS No. 7.

⁵¹ See paragraph 88 of SQCS No. 7.

⁵² See paragraph 38(c) of ISQC 1; paragraph 21(c) of ISA 220.

⁵³ See Section 103(a)(2)(A)(ii) of the Act.

⁵⁴ According to paragraph 12 of AS No. 7, "A significant engagement deficiency in an audit exists when (1) the engagement team failed to obtain sufficient appropriate evidence in accordance with the standards of the PCAOB, (2) the engagement team reached an inappropriate overall conclusion on the subject matter of the engagement, (3) the engagement report is not appropriate in the circumstances, or (4) the firm is not independent of its client."

⁵⁵ See paragraph 13 of AS No. 7.

own procedures for resolving such differences. Ultimately, however, under the standard, the reviewer may not provide concurring approval of issuance if there remains a significant engagement deficiency. If no concurring approval is provided, AS No. 7 requires that the EQR documentation include information that identifies the reasons for not providing the approval.

ASB

SQCS No. 7 does not include a requirement for the engagement quality reviewer to provide concurring approval of issuance. Instead, SQCS No. 7 requires the EQR be completed before the engagement report is released.⁵⁶ According to SQCS No. 7, when the engagement quality reviewer makes recommendations that the engagement partner does not accept and the matter is not resolved to the reviewer's satisfaction, the firm's procedures for dealing with differences of opinion apply.⁵⁷ The firm's policies and procedures should require that conclusions reached be documented and implemented, and the engagement report not be released until the matter, on which the difference of opinion has arisen, is resolved.⁵⁸

IAASB

The standards of the IAASB do not include a requirement for the engagement quality reviewer to provide concurring approval of issuance. Instead, the IAASB standards require that the engagement partner should not date the auditor's report until the completion of the EQR.⁵⁹ If differences of opinion arise between the engagement partner and the engagement quality reviewer, ISA 220 requires the engagement team to follow the firm's policies and procedures for dealing with and resolving differences of opinion.⁶⁰ ISQC 1 requires the firm to establish policies and procedures for dealing with and resolving differences of opinion between the engagement partner and the engagement quality reviewer. Such policies and procedures shall require that conclusions reached be documented and implemented, and the report not be dated until the matter is resolved.⁶¹

Documentation of an EQR

PCAOB

Because of deficiencies in the documentation of concurring reviews, the Board decided to strengthen the existing documentation requirements. AS No. 7 requires that documentation of an EQR should contain sufficient information to enable an experienced auditor, having no previous connection with the engagement, to understand the procedures performed by the engagement quality reviewer, and others who assisted the reviewer, to comply with the provisions of the standard, including information that identifies: the engagement quality reviewer, and others who assisted the reviewer; the documents reviewed by the engagement quality reviewer and others who assisted the reviewer; and the date the engagement quality reviewer provided concurring approval of issuance

⁵⁶ See paragraph 81 of SQCS No. 7.

⁵⁷ See paragraph 91 of SQCS No. 7.

⁵⁸ See paragraph 78 of SQCS No. 7.

⁵⁹ See paragraph 36 of ISQC 1; paragraph 19(c) of ISA 220.

⁶⁰ See paragraph 22 of ISA 220.

⁶¹ See paragraphs 43-44 of ISQC 1.

or, if no concurring approval of issuance was provided, the reasons for not providing the approval.⁶²

Unlike the standards of the ASB or the IAASB, AS No. 7 requires that the documentation of an EQR be included in the engagement documentation and provides requirements related to retention of and subsequent changes to the EQR documentation.⁶³

ASB

According to SQCS No. 7, the documentation of an EQR should state that the procedures required by the firm's policies on EQR have been performed, the EQR has been completed before the report is released, and the reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.⁶⁴

SQCS No. 7 requires that the firm should: establish procedures designed to maintain the confidentiality, safe custody, integrity, accessibility, and retrievability of engagement documentation; and establish policies and procedures for the retention of engagement documentation for a period sufficient to meet the needs of the firm, professional standards, laws, and regulations.⁶⁵

IAASB

The engagement quality reviewer is required to document that the procedures required by the firm's policies on the EQR have been performed, the EQR has been completed on or before the date of the auditor's report, and the reviewer is not aware of any unresolved matters that would cause the reviewer to believe that the significant judgments the engagement team made and the conclusions they reached were not appropriate.⁶⁶

ISQC 1 requires that the firm should establish policies and procedures related to the completion of the assembly of final engagement files; confidentiality, safe custody, integrity, accessibility and retrievability of engagement documentation; and retention of engagement documentation.⁶⁷

⁶² See paragraph 19 of AS No. 7.

⁶³ See paragraph 20–21 of AS No. 7.

⁶⁴ See paragraph 99 of SQCS No. 7.

⁶⁵ See paragraphs 63-71 of SQCS No. 7.

⁶⁶ See paragraph 42 of ISQC 1; paragraph 25 of ISA 220.

⁶⁷ See paragraphs 45-47 of ISQC 1.
