PREFACE

This issue of the Mineral Industries Map and Directory of Illinois Mineral Operators is the third revision of the map and directory first published in 1920. It represents a compilation of data obtained through correspondence and from the files of the Illinois State Geological Survey, and also from the Directory of Shipping Mines of the State Department of Mines and Minerals, for which information grateful acknowledgment is herewith made.

The demands for this map and directory, not only by mineral operators but also by others interested in the mineral industries of Illinois, justify frequent revision in order that the most recent and accurate information regarding the identification and location of the State's mineral industries will be available.

It has been the aim to make the data contained on the map and in the directory exact concerning Illinois' commercial mineral operators and their industries. The impossibility of attaining absolute perfection in a work of this scope can be readily appreciated, but it is believed that errors have been reduced to the minimum. The receipt of new information and the correction of errors and omissions will be much appreciated.

M. M. LEIGHTON, *Chief*

DIRECTORY OF ILLINOIS MINERAL OPERATORS

JULY 1, 1930

INTRODUCTION

This directory, supplementing the Mineral Industries Map, contains three lists of mineral operators. The first gives the names of the operators in alphabetical order, and the commodities which they produce. It serves as a cross index when only the name of an operator is known. In the second list the names of the operators are arranged alphabetically according to commodity. The list includes also the main office address of each operator; the post office address of the plant, pit, mine, or quarry; the means of transportation; and the county and reference number by which the location on the map may be found. The third list is arranged numerically by counties. It serves as a cross index when a location, but not the name of the operator, is known.

Specific examples may be taken to illustrate the use of the directory and map: (1) If information is desired regarding the sand and gravel pit in Madison County indicated on the map by the green triangle numbered 1, reference to List III (page 58) shows that the operator is the Stocker Gravel and Construction Company; by referring to that name in the alphabetical list of sand and gravel producers (page 51) the remainder of the data on this company and pit may be obtained. (2) If, on the other hand, the location of the Stocker Gravel and Construction Company's pit is desired, reference to List II under sand and gravel for construction purposes and roads, shows the county and reference number to be Madison 1; on the map the symbol in Madison County numbered 1 indicates the location of the pit. (3) If only the name of a producer is known, as, for instance, Consumers Company, reference to List I (page 7) shows that this operator produces limestone. Opposite the name, Consumers Company, in the alphabetical list of limestone producers (page 39) further information is given regarding the quarry.

Changes in ownership of the mineral industries are so numerous and frequent that new editions of this directory are necessary from time to time in order to keep the information up-to-date. Revisions, corrections of possible errors, and suggestions for improvement will be greatly appreciated and, so far as possible, incorporated in later editions of both map and directory.

To all of those companies and individuals who lent their co-operation by complying with requests for information, the Survey extends its thanks.

ABBREVIATIONS OF RAILROAD NAMES

A. & E.	Alton and Eastern
A. & S.	Alton and Southern
A. T. & S. F.	Atchison, Topeka and Santa Fe
B. & O.	Baltimore and Ohio
