Format: 1 credit: one 2- hour lab per week.

Four sections of approximately 16 students each week.

Materials: Student handouts, Online materials, Atlases, etc.

Required : **A.D.A.M. Interactive Anatomy 4 Student Lab Guide,**
3rd. Edition

Organization: The laboratory parallels the coverage of material in various biomedical and pharmaceutical science courses in the required professional pharmacy curriculum.

Course Objectives:

1. To provide instruction in anatomy through the use of computers and hands-on dissections
2. To provide instruction in physiology through the use of computer simulation models and in vivo laboratory techniques.
3. To provide experience in problem solving and critical thinking in the laboratory setting.

Grading:

1. Each laboratory is worth 10 points for a total of 130 points for the semester.
2. Grading for each lab will be by attendance verification plus any instructor specific evaluation tool(s) such as lab reports or data compilations.
3. The following grades can be earned by achieving the corresponding minimal percentage points as follows:

A---90%	C---70%
B---80%	D---65%

4. **ATTENDANCE IS MANDATORY!** Students who have not attended a lab and have not turned in a lab report (when required) will not be given credit for that lab. A missed, unexcused lab will lower the course grade by one letter grade. Students should attend that lab section assigned; lab swapping is permitted on a very limited basis with instructor approval.
