The Quad Joins the Information Superhighway

by Kristen Schumann
Of The Grizzly

An addition to the facilities at Beardwood-Paisley-Stauffer, otherwise known as the Quad, appeared recently.

Five new Macintosh computers have been installed, equipped with e-mail access and standard software.

Located in Paisley lounge, the computers are available 24-hours a day, seven days a week. The one catch to this system is that one must

reserve a computer, which involves signing in at the front desk and leaving a student ID.

This procedure allows fair access to the computers on a waiting list type basis. While this may be convenient for anyone in the Quad who doesn't have a computer in her room, waiting may present a problem. In that case, it may be easier to skip the delay and go to Olin or the library. These new computers are usually occupied and appear to be a success.

The new computers have been a welcome addition to the Paisley Lounge

Was Darwin Right?

Dr. Philip Johnson Discusses Evolution

by Alicia Darby
Managing Editor

Biology Common Hour this past week was unlike any other this year.

It was not held in Thomas Hall; it did not deal with a specialized technique in molecular biology; and it was co-sponsored by the Departments of Biology and Philosophy and the Ursinus Christian Fellowship.

On Wednesday, Nov. 15, Dr. Philip Johnson, author of *Darwin on Trial and Reason in the Balance* and a law professor at University of California at Berkeley, spoke to faculty and students about the flaws in Charles Darwin's theory of evolution. The discussion drew an audience representative of many of the academic departments within Ursinus.

He discussed the source of morality from two opposing view points. First, from a non-Darwinian view,

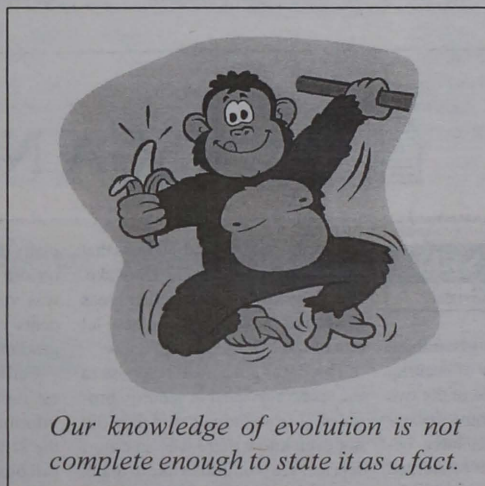

he argued that we were created by a supreme Creator (i.e. God) for a reason. According to the Darwinian view, as Johnson explained is, we are merely a product of genetic changes and we created the idea of God to explain our existence.

he assumed, to argue for religion, and the latter cannot be done in public schools. Therefore, children in public schools are not able to learn both sides of the issue. He told of how Alabama public schools have overcome this constraint. Each bi-

ology textbook used there now contains a statement which informs the students that evolution is a theory and can be doubted.

In his closing, Johnson listed some of the problems with Darwin's theory. Our knowledge of evolution is not complete enough to state it as a fact. Although there is evidence of small changes in species through mutations, there is no concrete way to demonstrate long-term evolution through natural selection.

Was Darwin right? Johnson never gave a clear answer, but instead presented both sides of the issue.

Our knowledge of evolution is not complete enough to state it as a fact.

According to Johnson, evolution is taught as a scientific fact in textbooks. To contest this view is also,

Women are Moving "Beyond the Double Bind"

by Marc Ellman

Co-Editor in Chief

Political writer and educator Kathleen Hall Jamieson told Ursinus students, on Tuesday, Nov. 14, that women are using education to get ahead in society and move "beyond the double bind."

Jamieson, 48, is a professor of communication and dean of The Annenberg School for Communication at the University of Pennsylvania.

She is the author of several books on politics and communication. Her lecture focused on ideas from her book "Beyond the Double Bind," which is a response to "Backlash," by Susan Faludi.

According to Jamieson, Faludi asserted in "Backlash" that "as women make progress, they elicit a

reaction that sets them back."

Jamieson was so enraged by this and by some "historical inaccuracies" that she decided to write "Beyond the Double Bind" as a response.

Jamieson said that women have historically been in numerous "double binds," which are essentially "no-choice choices."

She said that the first major bind is that of the "uterus-brain" conflict. According to Jamieson, in the 19th century doctors believed that women possessed a finite amount of energy, and that if a woman "exercised her brain, her uterus [would] dry up."

Jamieson said that women took advantage of higher education to overcome this stigma.

"Women sustain gains they attained in the past through higher education," Jamieson said.

Jamieson described the second bind as "silence and shame." She said that women who were outspoken in the 19th century were labeled promiscuous. Thus, women were very seldom expressed their opinions.

The third bind is "women using speech improperly." Jamieson told the story of her "heroine," E.W. Packard, who had been institutionalized by her husband, a minister, because he considered her to be "crazy" since she disagreed with him on scripture interpretations. Even though she was speaking out for her beliefs, she was in a double bind for "using speech improperly."

"Once [Packard] found her way out," Jamieson said, "she left her husband and worked to change the laws of Illinois so other women can't be institutionalized for disagreeing with their husbands."

"If you believe you are a victim and you don't use available resources, you will be a victim," Jamieson said.

Jamieson described another double bind called the "competence-femininity bind."

"People believe you can't be both," Jamieson said. "But you must be to be a professional."

Jamieson admitted she plays into this double bind because of the way she talks. Jamieson spoke very fast with little emotion and without much body movement.

"I don't give you any sense that there's a human being under this style," Jamieson said. She claims to speak the way she thinks.

"You listen to me for half an hour and you don't say 'what a warm, caring, nurturing person,'" Jamieson said. "Instead you say 'I bet she doesn't have a husband.'"

She showed that she has the capability of giving a different impression by speaking more slowly and in a softer tone. To illustrate, she moved away from behind the podium and leaned casually on the side of it. Then she approached the audience and explained how "lovely it is to be at Ursinus." The contrast in her behavior made the audience laugh.

Jamieson is originally from Minnesota. She received her undergraduate degree from Marquette College in Milwaukee and a Ph.D. in communication from the University of Wisconsin.

Besides "Beyond the Double Bind," she is also the author of "Dirty Politics: Deception, Distraction and Democracy," "Packaging the Presidency" and "Eloquence in an Electronic Age."

USGA News

by Christine Sofka

Special to The Grizzly

Many questions have arisen about the amount and quality of security on our campus. Because of the two recent incidents of crime in our neighborhood, students have become more and more concerned about safety. To really get a feel for the needs and wants of our students, USGA distributed a "Security Survey" to all students. The survey was very helpful in assessing the changes that should be made in order to increase the students' sense of security on this campus.

Your answers to the survey showed an overwhelming majority of interest in call boxes. Some students thought that call boxes would be a waste of money and resources, and they would not always be readily available in emergencies.

Also, a great concern was expressed about lighting on campus. Most of you thought that there just was not enough. Some of the areas you suggested need more lighting include: around the bookstore, on the track, in the front lawn of the college, right outside the library, on the path from Wismer to the Quad, behind Corson, around 942 and 944,

and by the path behind Thomas that goes from Reimert to 777/Omwake. If anyone knows of any other areas in need of more lighting, please let one of the USGA officers know.

There was not a great response to the escort service that security provides. A few students said they did not even know there was an escort service. We would also like to thank some of the men for admitting that you would use the escort service if it were more readily available. Your honesty really does mean a lot to us.

As for the number of security officers, most students commented that four security guards are enough, except on Thursday nights and the weekends. Some students also said that they do not know the security guards and would feel more comfortable if they saw them more and got a chance to know them.

We would like to thank everyone for taking the time to fill out our surveys and especially those of you who gave us your personal comments.

At our Nov. 14 meeting, Brian McCullough, Head of Security, was present at an open forum for all students to voice their opinions and concerns about the current security conditions on our campus, espe-

cially the issues that we asked about on our survey. Mr. McCullough was very receptive to all the students' concerns and many good suggestions were brought up.

Call boxes seemed to be the greatest topic of discussion. We were informed by Mr. McCullough that the school did purchase about six call boxes a few years ago, but they were never installed. We talked about different kinds of call boxes, where the call would go to, whether or not there should be a "red" button that goes straight to 911 in an emergency, and where some strategic places would be to install the call boxes. You can probably look forward to call boxes around campus sometime in the near future.

Suggestions also came up about having public phones (not pay phones, regular on-campus phones) installed in all the residence hallways and in all academic buildings. Students thought this would be a great convenience for everyone.

We would like to thank everyone who attended our open forum meeting and also Brian McCullough for being so receptive to the needs of our students.

Finally, this week's meeting will consist of WISMER CHAT. "What

is Wismer Chat?" you ask. It is your chance to let the people of Wismer and Zack's know what you like, dislike, need, want, absolutely cannot live without, despise or just about any other thoughts you have about the food, service, etc. So if you have something you want done, continued, or outright stopped, come and let the wonderful people of Wismer and Zack's know. They are open for our comments and suggestions and only want to satisfy the students. So come to the UNITY HOUSE at 7:30 on Tuesday night and let them know what you think.

We also welcome and encourage everyone to attend the USGA Open House on Tuesday, Nov. 21 from 4:00-6:00 p.m. in Berman Art Museum. All faculty and staff have also been invited. We will be serving hors d'oeuvres and beverages and we look forward to seeing you there. Bring any ideas and suggestions about making our campus a better place for you.

Don't forget about the Faculty Served Breakfast coming up. Have your favorite faculty member cater to your needs at Wismer on Monday, Dec. 11. It is always a nice study break and a fun way to get to know the faculty.

Olin Hall Open All Night

We are pleased to announce that Olin Hall will be available for late night study beginning Sunday, Nov. 19, 1995, at 12 a.m. The entire building will be open from Sunday night through Thursday night. One of the computer labs will also be open.

Students who wish to stay in Olin Hall beyond 12 midnight must sign in before 2:00 a.m. at the desk which will be located near the front entrance of the building. After 2:00 a.m., the building will be locked by Security. Students may remain in the building, but once they leave, they cannot reenter.

USGA will provide students to staff the desk between 12 midnight and 2:00 a.m.

This service will be reviewed at the end of the semester. Any questions or comments should be addressed to Raquel Szlanic of USGA, Dean Nolan or Dean Lucas.

We would also like to bring to your attention that Paisley Lounge is open 24 hours a day and has five Mac computers available for student use. Three IBM compatible computers and several printers for the same location are on order.

From Bed to Class in 3 Seconds Flat

by Melissa Forbes
Of The Grizzly

The Java Trench and Unity House will help to relax both students and teachers so that participating in discussions will become easier for both parties.

The classes being taught in both the Java Trench and Unity House include many of the Freshman liberal studies seminars. Teachers who wish to hold their seminars in either of these two places have volunteered.

The Ursinus community hopes that the idea of combining residential and academic life will be expanded in the future with classes being taught in both the Beardwood and Stauffer lounges.

So, students, it looks like all your dreams are finally coming true. Soon you'll be able to literally roll out of bed and roll right into your class.

"Could I have a cup of coffee and my homework to go, please?"

The next time you visit the Java Trench or the Unity House, you may find yourself walking into a "classroom" discussion. Beginning this semester, classes were held in the Unity House. Next semester, classes will be held in both the Unity House and the Java Trench. Now, Ursinus students are learning that education is not only found in a rigid classroom atmosphere.

The idea behind holding classes in informal atmospheres is to show students, as Dean Lucas stated, that "learning can take place in many different spaces; not just the traditional classroom."

She hopes that the atmosphere in

Ursinus' Tutoring Program

by Joseph Catalfano
Of The Grizzly

Since last week was National Education Week, a lunch was held then to inform local Congressman Jon Fox about the tutoring program that has existed at Ursinus the past 16 years. President Strassburger, as well as Deans Akin and Lucas and three Ursinus students, were among those in attendance.

Tutoring sessions offered through Ursinus often prove to be more financially practical than the average \$20-30 sessions held by professionals. Any student from neighboring elementary schools to Ursinus' evening division classes can request tutoring. Among those area school districts involved include Methacton, Perkiomen Valley, Spring Ford, and many others.

Students are tutored in a variety of subjects including math, sciences, and foreign languages. Reading, writing, and other specialty areas may be offered at elementary lev-

els. Ursinus evening division students also make numerous requests for courses taken at Ursinus.

The tutor's job not only includes helping with particular studies, but also nurturing both study skills and motivation in the student. Such a "mentoring technique" has led to the high regard that the tutoring program shares with the surrounding area. While students are receiving help, tutors are gaining experience both in leadership and social skills.

"I feel that Ursinus has an excellent tutoring program which has taught me just as much as the students that I tutor," one tutor said. "I have gained the ability to communicate to others in a clear way. By having to teach students, I find myself understanding the material better."

The coordinator of the tutoring program cites four basic highlights that have led to the success of this program over the last 16 years:

- 1) The interest of the college ad-

ministration

2) The academic standing of the tutoring students

3) The rapport established over the years with the area guidance departments

4) No government funds involved

Tutors receive \$8 per session held on campus, and \$10 per session if held at the student's home. Sessions average about an hour, and are arranged at the convenience of the tutor.

Any Ursinus student with a cumulative GPA of more than 2.65 is qualified to apply. Applications can be filled in Bomberger 103 during the hours of 3-4:30 PM Monday through Thursday.

"The tutorial project is definitely a worthwhile program at Ursinus College," one of the tutors said. "I find that the experiences I have during tutoring sessions are a valuable addition to my pre-student-teaching education."

A New Music Revolution

by Beatrice May
Opinions Editor

Wisner was the stage Saturday night for three local bands: "The Verge", "The Dismemberment Plan", and "The Bloodhound Gang".

Despite various technical difficulties, the show finally began at 8:45 p.m., with about 100 people in attendance.

Each group added new flavor to the listening pleasure of their audience. With only three members, *The Verge* performed first. They had a more instrumental style to their music, while keeping vocals to a minimum. One could compare their music to that of the late Jimi Hendrix. *The Dismemberment Plan*, on the other hand, had a punk beat. *The Bloodhound Gang* provided a more rap styled performance, often modeled after that of

The Beastie Boys.

Although *The Bloodhound Gang* is the only group of the three that is signed with a record company, each group performed a good representation of all types of their musical

many of their C.D. favorites, including "You're Pretty When You're Drunk" from their newest album, *Use Your Fingers*.

Because these groups are still up-and-coming within the business, many Ursinus audience members were not familiar with their work. Entertainment was provided, if not through the music of the groups, then in the form of the crazy movements some group members elicited.

Kudos to the brothers of Pi Omega Delta for sponsoring the groups that came. Events such as these help extend the variety of social events provided for students at Ursinus.

Author's note: I would like to thank Pi Omega Delta and all those who helped make this event a success.

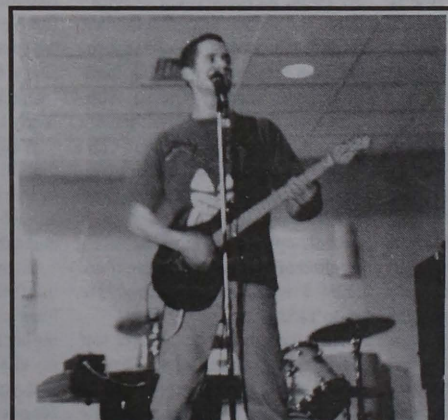

Photo by Kristen Schumann

style. *The Bloodhound Gang* performed

Welcome to the Miserable World of a Homosexual

I thought I would take this opportunity to put an end to the discussion concerning homosexuality.

As some of you already noted, this thread is tiresome and we have better things to think about at college like the new mall and what's on television.

I am going to take you on a journey that most heterosexuals will never see. You are about to witness the "homosexual lifestyle" (which differs from the "heterosexual lifestyle" due to the fact that we dress better).

Welcome to the miserable world of the homosexual.

Meetings are once a week. The location changes so that there is not undue burden on one host to provide the wine, cheese, and fresh cut flowers, although matching place settings can also be difficult.

During the summer there is a barbecue. After singing show tunes, the oath is administered. Our facilitator, who looks remarkably like Judy Garland, calls the meeting to order.

Most of our time is spent discuss-

ing the homosexual agenda. Our recruiters present the latest figures. Many of you don't realize that we must all devote one year to missionary work, a policy from which we are indebted to the Mormons. This is a relatively easy requirement satisfied by either hanging around schoolyards or the Barbra Streisand section of the local record store.

Lately we have been experimenting with various "reversion therapies". Our scientists have noted successes in this area. Impressionable teenagers are locked in a room and are forced to watch television. After twenty-four hours of near exclusive heterosexual representations of adultery, violence, misogyny, and irresponsible sexual behavior, teens are susceptible to an alternative.

For those recruits who stubbornly adhere to a Judeo-Christian value system, a close reading of the Bible usually yields "morally" based prohibitions on eating pork (Leviticus 11:7), wearing clothes of more than one fabric (Leviticus 19:19), wearing gold or pearls (1 Timothy 2:9),

not to mention divorce, which carries a penalty of stoning (Deuteronomy 22:22). The hypocrisy of selectivity ignoring only those rules considered anachronistic is not lost on the plebes.

The meeting usually concludes with an induction ceremony. With your right hand on the International Male catalog, one swears allegiance to Rock Hudson and pledges to have thousands of sex partners. In return you are given the "lifestyle" card, which is good for discounts at most hairdressers and florists. I've been told it can also be used for travel discounts. Tea is then served (herbal for the lesbians) and we discuss antiques.

I hope this puts an end to any lingering questions about our lifestyle. I forgot to mention that if anyone is interested in trying it out, there is an end of the year special discount for those who sign up before January 1. It includes a free gym membership. Feel free to ask questions.

Keith Brand

God and the GOP

by Jared Rakes

Of The Grizzly

All cops should be shot dead immediately. Heck, while we're at it, why not mow down random people on the streets? Sounds sensible to me, but then again I'm listening to gangsta rap right now. It makes me uncontrollable. I wasn't sure before, but now I'm certain God is dead.

If you believe this crap, then you're probably just a little too accustomed to reading what has seemed to dominate the Opinions pages of *The Grizzly* recently, that is, news and views seen through the eyes of the sometimes very near-sighted religious right. Now, before some of you get your panties in a bind, specifically those who've been proving the truth of the *Bible* by referring to passages from it-- which

is, of course, a very poor rhetorical strategy -- let me point out first and foremost that I am not trying to offend anyone.

Before I ramble any further from my point, let me confess to something far worse than the deviant activity that gangsta rap led me to. OK, here goes: I watched Rush Limbaugh yesterday (Gasp!). Ahh, I feel better already now that my dirty little secret is public (sorry, Dr. N., but I refuse to hide it). Anyway, let me just tell those of you who aren't masochistic enough to watch a whole episode, it was GREAT! I laughed my ass off the whole time. Then I realized something: He wasn't kidding.

He talked about the need for self reliance. OK, makes sense. Then he talked about how no person has the right to mooch off of the rest of the country. OK, still makes sense. Then

he patted himself on the back for one of his wonderful witticisms: he thought it would be funny to send can openers to people who would end up eating dog food because of Republican spending cuts. HA! Real funny you bloated, egotistical mental-capacity-of-a-urinal... Ahem. Sorry. Maybe I'm a little oversensitive, but starvation jokes just aren't funny to me.

Well, that would be all the news that fits, this week. Next time: Why to live by our own codes of ethics, and why the sky isn't falling due to atheism.

If, by now, you question why I may seem like some kind of raving lunatic, or you're wondering why the heck I'm even bothering to write my views without being able to claim that you will be eternally damned for not adhering to them, let me tell you why: Because I fucking can.

The Great Pizza Caper

To The Editor:

I work at Salvatore's Pizza Shop in Allentown, Pa. On Saturday, Nov. 2 we received an order for more than 90 sandwiches to be delivered to the Muhlenberg College field house for the Ursinus football team and cheerleaders. The order was very large, so I borrowed a friend's Ford Explorer to make the delivery. I work mostly for tips and the order was worth \$687. My tip that day was 0; nothing; rien! I want everybody at your college to know what a high class operation your football team and cheerleaders are. They might be intelligent enough to be in a private college, but they have no common sense or decency.

Carlos Loazza
cc: Head football coach

To the Editor:

I am responding to the letter written by Salvatore's Pizza Shop delivery man Carlos Loazza.

We have been ordering hoagies as a post-game meal for our football team for the past seven years. The order is placed on Monday morning of game week with the exact cost per person agreed upon. The business office then cuts a check for the amount. Any delivery charge is figured into the total.

After receiving Mr. Loazza's letter, I called to see if I understood the total we were billed by Salvatore's. The manager, John Ruffino, was unaware of, and surprised by, Mr. Loazza's complaint. In fact, Mr. Ruffino told me that he pays each driver a commission on every deliv-

ery.

I also did a quick telephone survey to see if Ursinus was the only college not giving tips to drivers. Johns Hopkins University, Gettysburg College, Muhlenberg College and Western Maryland College all order hoagies for their teams and none pays an "additional gratuity."

On Nov. 4, we conducted business as we have for the past seven years. However, this time, our Sports Manager, Brian Thomas, was treated rudely by Mr. Loazza after paying the pre-arranged bill with a \$687.00 check. Mr. Loazza may have had a bad day. He obviously has a problem unrelated to Ursinus College.

Steven L. Gilbert
Head Football Coach
Assistant Athletic Director

To the Editors:

As the cheerleading advisor at Ursinus, I welcome this opportunity to address the concerns that Mr. Carlos Loazza expressed in his recent letter to *The Grizzly* editors. Before I do that, however, I would like to note that Mr. Loazza has wrongly accused Ursinus' football players and cheerleaders of lacking any "common sense or decency" in not tipping him at the recent Muhlenberg game. The fact is that the players and cheerleaders have nothing to do with the ordering or paying for their post-game meal. That responsibility falls on the coach and advisor. I do not want the record to stand with the character of our dedicated students being denigrated.

With that being said, I will move on to clarifying this matter with the readers of *The Grizzly*. For all away football games, Coach Gilbert and I (as well as all the other coaches in Centennial Conference) order sandwiches and sodas for our students from local sub shops and have them delivered to the visiting locker rooms the day of the game. We call these orders in about a week ahead of the game and at that time ask for a final price from the vendor. We then request a check from the Business Office to be made out to the establish-

ment in the amount they quoted. We must submit our receipts for tax purposes. Gratuities are not something we can document, especially with this preordering arrangement. Therefore, we did not get into the habit of tipping the delivery people.

Mr. Loazza is correct in saying that we did not offer him a cash gratuity at the time of delivery. However, what he failed to include was that the manager of Salvatore's Pizza Shop, John Ruffino, provides his delivery people with a commission on orders of this size! Since our order was almost \$700, I am confident that Mr. Loazza received a nice size commission on our order.

In my work coordinating alumni events, I have had many occasions to work with caterers and restaurants. It is standard policy in that industry to add a 6% tax and an 18% gratuity for all commercial and large-scale orders. Ursinus football coaches and advisors have been ordering post-game meals like this for seven years, and have never once run into a situation like this (most likely, because it was our assumption that these local sub shops were already tacking on their standard 6%/18%).

Coco Minardi '91
Assistant Director of Alumni Affairs
Cheerleading Advisor

Dr. Nagy : Challenging the Claims

To The Grizzly:

Two months ago, you published my letter alleging that GALA supporters use verbal intimidation in an effort to silence disagreement with their views on homosexuality. The pro-GALA reaction was predictable and effectively proved my allegation. Mixed in with the hate language in their letters, however, there were several claims that I need to challenge.

Anne-Marie McMahon (*Grizzly*, Oct. 24) claims that "current research suggests 10% of the population" is homosexual. The 10% figure is actually based on the old and discredited work by Alfred Kinsey. Kinsey's results were skewed by some methodological errors, including the fact that 25% of his data came from convicted criminals, including sex offenders (Reinsman and Acyl, "Male Child Sexuality" in Kinsey, Sex, and Fraud: The Indocination of a People, Huntington House Publishers, 1990). Recent research actually shows the homosexual percentage is closer to 1 or 2% (Muir, "Homosexuals and the 10% Fallacy", *The Wall Street Journal*, March 31, 1993).

Keith Brand (*Grizzly*, Oct. 31) claims that statistics have shown

pedophilia and adultery are "overwhelmingly, and ironically associated with heterosexuals". With respect to adultery, the statistics are unnecessary to prove the claim; marriages are "overwhelmingly" heterosexual. The statistics on promiscuity, on the other hand, are an embarrassment to the homosexuals. Despite the AIDS epidemic, a 1984 study by the American Psychological Association found that the average male homosexual had 50 sexual partners per year (Sally Ann Stewart, "AIDS Aftermath: Fewer Sex Partners Among Gay Men", USA-Today, Nov. 21, 1984).

Contrary to Brand's claim, studies show that pedophilia is far more prevalent among homosexuals than among heterosexuals. According to a study published in 1986, for example, at least one-third of all child molestations involved homosexuals even though homosexuals represent less than 3 percent of the population (P. Cameron et al, "Child Molestation and Homosexuality", *Psychological Reports* 58, pp. 327-337). The prevalence of pedophilia, at least

among male homosexuals, is also suggested by the existence of NAMBLA (North American Man Boy Love Association) which is a male homosexual organization that lobbies for the legalization of pedophilia. Brand's claim is also undermined by personal ads for the procurement of boys as sexual partners in homosexual publications

A homosexual lifestyle may provide short-term pleasure for those afflicted with it, but the long-term effect is physical, mental, and spiritual degradation.

such as the Advocate (Reinsman, "Content Analysis of the Advocate", *Institute for Media Education*, Arlington, VA, 1992).

According to Brand, homosexual teen suicide is three times the national average. But, this figure is too high by a factor of at least 5 (Narrative Summary of Teenage Suicide Study, The Gallup Organization, Jan. 1991).

We have heard ad nauseam the

fallacious argument that homosexuals are "born that way", so homosexual activities should not be regarded as immoral. Although there may be such a thing as a genetic predisposition to homosexuality in some people, this doesn't account for nor excuse homosexual behavior any more than a genetic predisposition to alcoholism excuses drunkenness.

A homosexual lifestyle may provide short term pleasure for those afflicted with it, but the long term effect is physical, mental, and spiritual degradation. Anyone who encourages young homosexuals to accept this or any other sexual deviancy as "normal" is partially responsible for the eventual anguish

that it causes.

Sincerely,

Dr. Nagy
Physics Department

The Cave

Not very long ago, I had homework for a class which involved discussions of drug use, particularly marijuana. I wouldn't be giving away any big campus secret if I said that a good portion of the Ursinus campus smokes weed from time to time. Once in a while you hear about someone getting caught, but generally, it's not too hard to get away with it. In this regard, we reflect America as a whole. Marijuana is still illegal in this country, but it's not too damn difficult to use it without getting caught.

For years, we have all heard the anti-drug campaigns that the government tries to brainwash us with. I know lots of people who smoke pot and I have never seen anyone's brain turn into a fried egg. These campaigns are good in that they try to discourage kids from using harmful drugs. However, they have caused a sense of paranoia among the masses towards any drug, and this paranoia has made people ignorant of the facts. The facts are that you would have to smoke an enormous amount of

pot before it would come close to causing the amount of damage that the normal college student does just by drinking or using tobacco. Pot does have certain medicinal qualities to it, which are being kept from many suffering people by our overanxious government. People who take up are not all deviant criminals who will harm others; and most importantly, if pot were made legal to adults the foundations of the drug underground that causes so much crime and devastation would be toppled. People want something more when they can't have it.

The point I'm trying to make is that marijuana can be used sociably without causing any more harm than alcohol, tobacco, or caffeine. As I said, a lot of people here at Ursinus use it as a recreational drug, and this is still a very safe campus. If there is a leniency to alcohol, shouldn't there also be a leniency towards pot? After all, alcohol is easier to abuse because it's cheaper, and more addicting, and pot is just a cleaner, safer

diversion than alcohol. I wonder, if it weren't illegal, would our school tolerate it as much as they do drinking?

Yes, there are laws in our society. Laws are supposed to protect the people from dangers. But, just because the government passes a law, that doesn't make the law right or perfect. At one time alcohol was illegal, too. At that time, an underground opened up to sell and transport illegal alcohol, causing crime to run rampant. Sort of like the situation with pot today. I think that if it were made legal, that the criminal underground would crumble, just like it did when alcohol was made legal following prohibition.

Don't always believe what the government tells us. They aren't always right, and they don't always have good intentions. Pot, if used as a recreational tool, can be enjoyable and not too harmful. I hope that if you choose to use it, you will be responsible, and I also hope that you get away with it, because the government has no right to make your

decisions for you.

I know that there are a lot of people who disagree with me. Yes, it is dangerous to operate a vehicle while high. Yes, it is dangerous for pregnant mothers to use pot. Yes, it can be abused and lead to the use of more dangerous drugs. These things can all be prevented, though, by warnings and by being responsible, just like anything else. There are many facts on both sides of this argument, but I still hold that marijuana should be legalized and only then will it be controlled.

❖ ❖ ❖

As a side note, I just wanted to congratulate the staff of *The Grizzly* for the great job that you guys have been doing lately. This paper has really become a forum for debate and the paper is one hundred percent better than it was a few years ago. Thanks for all the hard work!

We're Not Secure!

by Brandy McLachlan
Of The Grizzly

Are we secure here at Ursinus? No, we are not. When I was first looking at Ursinus, they boasted about their tight quad security, and escorts that would walk you to and from buildings late at night. I had also assumed that lighting would not be a problem on a campus where students would surely be walking late at night. So far I have been disappointed with what I have seen.

I have witnessed men, saying they are fathers, walk right into the quad past security. It used to be that any male visitors had to sign in at the front desk in the quad. I am sure that was a hassle, but if men can walk right in without any trouble, I feel the hassle would be worth it in return for guaranteed safety.

I also have yet to see an escort service. Perhaps that is because I do not know how to reach them, but when in Olin late at night, there are not many ways to contact security. There is talk about putting call boxes around campus. This would be an excellent way to contact security late at night without having to search for a phone.

The lighting on campus is also terrible. There are many spots that are poorly lit and some with no light at all. I am pleased to see that more lights are being put up, but that is just a start.

Also in the quad, there are bars on the windows for the basement floors. Safe right? No, they pop right out because real bars would be a fire hazard. So what good are any bars at all if they do not serve their purpose?

I am glad to see the continuing talks on security given by the USGA, perhaps something can be done to increase safety measures. Luckily for us, Ursinus is a quiet campus and we are all basically capable of taking care of ourselves, but nothing is for sure and it would be nice to know that we are safe here.

See the results
of the USGA
security survey
on page 2.

◆◆◆◆◆ Movie Mania ◆◆◆◆◆

by Colin Tucker

Secret Agent 069

After a six year leave of absence, Bond, James Bond, has returned. In *Goldeneye*, the eighteenth Bond movie (not counting *Casino Royale* starring Woody Allen). Pierce Brosnan, former star of the television series *Remington Steele*, has taken over as the fifth actor to play Agent 007.

After the failures of recent Bond movies, many different lead actors have been proposed. Mel Gibson was almost signed as Bond, there was talk of a black James Bond, and the casting of a woman such as Sharon Stone to play 007 was even considered (I'm far from being a male chauvinist, but the idea of a "Jimina Bond" just doesn't seem to work for me). With Bond's studio, MGM/UA, in jeopardy, the future of the Bond franchise depends on this movie.

In the end, they chose the Irish Brosnan, who was previously considered as Bond in 1987, but he was tied up with *Remington Steele*. Producers address fans' concerns by attempting to bring back the old style Bond movie, such as the movies with Sean Connery such as *Goldfinger*, *Dr. No*, and *Diamonds Are Forever*.

The movie is about a satellite that delivers pulses that destroy all electronic devices in a 25 mile radius.

Secret agent 006 (Sean Bean), formerly one of Bond's closest friends, is a traitor who hijacks the satellite and threatens to hit London, destroying the world's economic infrastructure. Bond also has to contend with a femme fatale (Famke Janssen) named Vanya Onatopp (hint, hint) that crushes people to death with her thighs during sex! (If you gotta go, at least have fun doing it.)

The attempt to bring back the essence of Bond is rather successful. Brosnan, although he does not come close to possessing the screen presence or acting ability of the great Sean Connery, does a good job. He is young enough but not too young for the part, he puts more life into it than Timothy Dalton (but, then again, so could a crash-test dummy wearing a tuxedo), and is not light and cartoonish like Roger Moore. It also seemed to be in a much more freewheeling, far-fetched, over-the-top style than other recent Bond movies.

Despite the efforts to bring back the old Bond, some concessions have been made for the 1990s. M, Bond's boss, is now a woman (Dame Judi Dench), and she refers to Bond as a "sexist misogynist dinosaur." Moneypenny even talks of suing Bond for sexual harassment.

All that really let me down was not being able to see the new, drop-dead gorgeous BMW Z3 convert-

ible in action. It was only shown briefly driving around, but not in a chase. It seemed as if it was there just to be a shameless plug for BMW. Still, if I had \$27,950, one of them would be parked behind Hobson right now.

Although this was a good attempt to bring back the essence of Bond, it was still not perfect. As a devoted James Bond fan (I even endured the really crappy movies like *A View to a Kill*), here is my prescription for Bond to survive in a world of mega-budget

In two weeks-

Movie Mania visits
The White House

The American President
Starring Michael Douglas

action flicks with big stars such as *True Lies* and the Jack Ryan movies based on the Tom Clancy books.

1. **Better Heroines**-Although Swedish model Izabella Scorupco was not horrible, I would not have noticed if she was not in the movie. It seemed her only purpose was to look good, run around with Bond, and scream "Jahhhhhmes!" on cue. Bond movies need more heroines like the great ones of the past, such as Ursula

Andress, who was in *Dr. No*, the first Bond movie, and Diana Rigg, who was briefly Mrs. Bond until she was killed in *On Her Majesty's Secret Service*.

2. **Better Villains**-Again, Sean Bean as agent 006 was not bad, but wasn't great either. Who could forget Oddjob in *Goldfinger*, and Jaws in *The Spy Who Loved Me*?

3. **Even More Gadgets**-Bond gadgets, such as a grenade inside a pen that you click three times to detonate, and Dentonyne explosive toothpaste are the coolest!

4. **More Action**-*Goldeneye* did accomplish this, with explosions and chases galore, including a great tank chase through the streets of St. Petersburg. On the whole, today's theatrical audiences demand much more action, as opposed to past movies that concentrated on story and character development. It costs a fortune to go to the movies, and people want bang for the buck (no pun intended).

5. **Don't make too many movies**-until *Licence to Kill*, Bond movies were getting churned out like clockwork every two years. The studio should allow at least three years between movies, so demand is high when each new movie comes out. I certainly think the six-year hiatus will work to *Goldeneye's* advantage.

6. **K.I.S.S. (Keep it simple, stupid)**-*Goldeneye* also fulfilled this requirement. Although some de-

tails of the plot were a little complex, it still came down to James Bond saving the world from the bad guys, and that is always what Bond movies should be. So far, attempts to develop the character, such as *Licence to Kill*, in which Bond was pursuing a personal vendetta, have backfired drastically, as have attempts to place him in monogamous relationships. James Bond's character is not P.C. He is a womanizer and a killer. This character worked in many Bond movies including this one, so they should stick with it.

Although this movie had some minor flaws, it was still a great deal of fun to watch. Judging by the packed theaters (many showings this weekend were sold out), this movie should make enough money to keep James Bond alive. **Rating-8 (Very Good)**

Movie quote of the week- Last week's quote, "Risk is part of the game if you want to sit in that chair" was from *Star Trek: Generations*, and was identified by Dom "The Dominator" Bui. This week's quote, the final movie quote of the semester, and your last chance to be entered in the drawing for the *Star Wars* trilogy, is "Many things in here do not react well to bullets." My extension is 3212 if you know the quote. Information about the drawing for the trilogy will be in the next issue of *The Grizzly*.

Pi Nu Epsilon Sponsors Messiah Chat

On Monday, Nov. 27, Dr. John French, professor of music here at Ursinus and director of the College's choral ensembles, will speak on how the Messiah came to be.

The talk will begin at 9 p.m. in the Unity House.

The event is sponsored by Pi Nu Epsilon, Ursinus' honorary music fraternity.

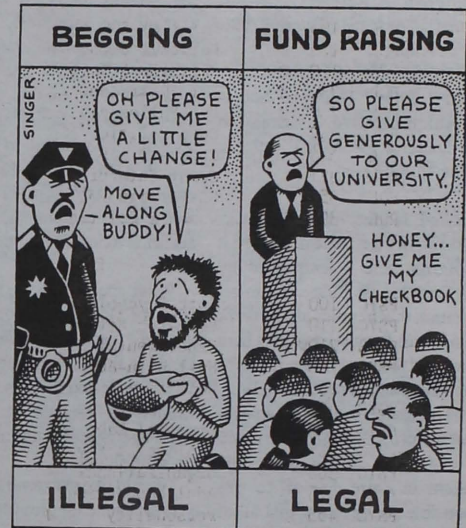

All students, staff and faculty are encouraged to attend! Refreshments will be served!

Answers to last week's crossword puzzle.

Roommates Wanted

Young professional male seeks roommate to share modern 3 bedrm townhouse: 1700 sq. ft., W/D, fireplace, 5-10 minutes from Ursinus. 2 rooms available, \$300-\$350 + utilities. Great house and great guy. Call Scott: 610-207-5677

I am looking for 2 non-smoking responsible females to share end townhouse - 20 minutes from campus. \$375/month for larger room. \$325/month for smaller room. Including utilities. 454-0196 Gilbertsville area.

ALUMNA SPOTLIGHT

by Laurie Falcone
Of The Grizzly

Name: Janene Paist '94
Major: French
Clubs/Activities: USGA, The Ruby, Member of Phi Alpha Psi, Le Cercle Francais, Resident Assistant, Orientation Assistant, Tutoring, Student Teaching
Field: International Business
Position Title: Bilingual Secretary/Administrative Assistant to Area Director for Africa, Europe, and the Middle East

I asked Janene for some background on her job. She described it as follows...She is employed by American Baptist Churches, an organization that handles all the work dealing with Baptist churches here and around the world. Her role is to act as a support person for her boss. Janene takes care of missionaries through correspondence with them. For example, during the ebola breakout in Zaire, her office was responsible for ensuring that all of their missionaries were safe and secure. For this reason, Janene said that her job is hectic. A lot of responsibility is involved, because people's lives are on the line everyday. Also, epidemics such as ebola are unpredictable; they could occur in multiple areas in the same week.

Thus, Janene's line of work is crucial to the lives of many people.

An interesting point in my interview with Janene came about when she told me how she landed this first job. As president of USGA, Janene gave a speech at graduation. A few days after the ceremony, she had her second interview at her job. During the interview, the interviewer congratulated Janene on her excellent speech. She wondered what he meant by this, and he answered her by saying that he had attended the graduation ceremony. Needless to say, the fact that her employer had "seen her in action" was a definite advantage for her in securing a position in the organization.

What special advice did Janene give for language majors? "Study abroad," was her emphatic response. Besides this experience being invaluable in itself, it is necessary. Immersing yourself in the native language is really the only way to become fluent.

I would like to extend a big thank-you to Janene for providing me with personal guidance as well as information for this article.

If you are interested in Janene's field, or any other career path, stop in the Career Planning & Placement Office, which is located on the first floor of Bomberger. The people there would be glad to help you!

What's Up in Wellness?

by Kim Ryan
Of The Grizzly

You've been studying for two weeks. You know every muscle in the body and the functions that each performs. You know where each originates. You know where each inserts. You know why and how each muscle does what it does.

You arrive early on the day of the test. You sit in your lucky seat hoping it will provide some much-needed magic. As the professor hands out the exam, you feel confident, prepared and ready. As you scan through the questions trying to get a feel for the material, your attention is immediately drawn to question #11. "List the nerves that innervate the following muscles": - parts a, b, c, d, e, f, g, h, i, j. Nerves?...your heart starts to pound a little quicker; she wants to know

the nerves? You suddenly feel your pulse begin to rise. Your hands start to sweat. Your face reddens with anger. You studied for two weeks learning everything, sacrificing your social life -- not to mention, your sanity. You can't wait to thank your buddy Larry who said nerves weren't going to be on the test.

Does this scenario sound familiar? Have you ever been in a similar situation? Learn to beat test anxiety.

Before the test:

- Ask the instructor what material will be covered
- Review all lecture and reading notes
- Try to predict possible test questions
- Relax for 10 minutes prior to the test
- Tighten and relax muscle groups

During the test:

- Survey the test and read directions carefully
- Budget your time
- Mark difficult items and go back to them later
- Work on one question at a time
- Concentrate only on what you are doing

Don't forget to BE OPTIMISTIC:

- Encourage yourself with positive thinking
- Don't allow a poor past performance to affect your attitude

Of course there may still be times when, regardless of how much you study, a test takes you by surprise (e.g. any UC science exams). When this happens, take a deep breath and pray for a large curve.

ROVING REPORTER

If anything should be changed about Ursinus, what should be first?

Dan Graf and Andy Ruhf, seniors
The artwork.

Jason Kline and Samantha Uriguen, juniors
Make the bookstore more accessible and more affordable.

Kylla Herbert, junior
No classes before 9 a.m.

Tony Aumiller, freshman
Computer labs and cable hookups (even for a small fee) available in old men's

Laura Owens, sophomore
There should be more emphasis placed on the arts.

Carrie Cooper, freshman
More diverse people.

Denise Martella, and Tara Patenaude, sophomores
Cash Equivalency should be available on Saturdays and Sundays.

Nicole Jacobson, freshman
More planned on and off campus activities on the weekends.

Najah DiPaolo-Brown and Angela Mullan, freshmen
More sections of smaller classes.

Bill Rhodes, freshman
Cleanliness in old men's.

Sgt. Grizz...Nothing
but the Bear Facts

11-09-95 at 8:35P.M. Security was called by students who observed a white pick-up truck driving on the men's lacrosse field. Security responded, but the truck was gone when they arrived.

Security received a number of calls from students about damage to buildings and downed power and telephone lines on campus. This was due to the wind storm that was experienced by the community. The students' assistance was appreciated by the Security Officers.

11-14-95 at 4:30P.M. Security was notified by Wood's Dining Service that sometime over the weekend, unknown person(s) removed a potted plant from the dining room. The matter is being investigated by Security.

11-14-95 at 4:45P.M. A student reported that sometime during the day, he lost his wallet. The student was advised to call the credit card companies and cancel his cards.

SGT. GRIZZ ADVISES ALL TO RECORD THE IDENTIFYING NUMBERS OF IMPORTANT CARDS ON A SEPARATE PIECE OF PAPER IN THE EVENT THAT THESE CARDS HAVE TO BE CANCELLED. THE CREDIT CARD COMPANIES WOULD RATHER HAVE YOU CANCEL THE CARDS THEN HAVE THEM USED FOR ILLEGAL PURCHASES.

THE SECURITY OFFICERS WOULD LIKE TO TAKE THIS OPPORTUNITY TO WISH YOU ALL A SAFE AND HAPPY THANKSGIVING.

Alien Lands at Ursinus: Observes Strange Life Forms

by Joseph Catalfano
Of The Grizzly

Thanksgiving (known to student populations as "Thanks-for-giving-us-the-dayoff Day") is already here. It seems Halloween (known to grumpy old folks as "Razor-Candy" Day) was just a few days ago. My first cue to this sudden increasing rate of time and decreasing rate of temperature was the frozen drool hanging from neighborhood stray dogs.

Just yesterday/last year I attended another college (which shall remain unnamed except for the initials F&M) until I decided to transfer to Ursinus. Being somewhat "new," as well as having already had another college experience, I feel it is my duty to you, fellow Ursinus students, professors, and janitors, to make you realize how thankful you should be.

Ursinus' location in Collegeville honestly has little more to offer than Lancaster, PA. Both areas are about as culturally diverse as the Million

Man March. Lancaster is as much fun as burning insects under a magnifying glass (an activity that has an entertainment value less than an episode of *Baywatch*) — except for the minor exceptions of cow-tipping and Amish carriage-jackings (The Club looks awfully funny around a horse's neck). Collegeville, on the other hand, has indeed gained in popularity since the arrival of campus stalkers and Caleb Fairley. Nothing like positive publicity.

All of Ursinus' facilities are relatively newer and cleaner than F&M's, with the minor exception of Pfahler, whose interior designer was the same one that brought such a fresh glow to Alcatraz. Classrooms are much "cozier" and conducive to learning, for example, the light color scheme and rugs in Olin Hall. F&M's hard, tiled appearance felt like being in an old age home, minus the smell of adult diapers and formaldehyde. They did have a huge phallus of a water tower erected smack center of the campus though. Fummers (idiotic nickname for F&M students) had a grand time

with the "big blue dildo" with comments such as "she's gonna blow!" and "water level's not too high today" — both comments that do not go over well while giving tours of the campus, or on parent's weekend.

I love parking at Ursinus! Sure there's education going on at Ursinus, but parking — now that is *extremely* important. I am always assured a parking space will be waiting for me in the same spot every day, while parking at F&M often became more violent than many family reunions. I once suggested to the F&M administration to turn its football field into a large parking lot since it was obviously not being used enough (as was shown by weekly game results). They didn't take my suggestion; the entire football team that was kind enough to send me threats of physical harm — as if one of them could successfully tackle me. Ursinus does, however, need to get rid of those horrid speed bumps. How do you expect me to go 80 mph to make class if I have to slow down? Why are they there anyway?

Food? I won't touch it — in more ways than one. No, no. The food here appears to be (honestly) something edible, although I do not have a meal plan myself (ha ha, suckers!). I do not know of any college student who doesn't complain about campus food, and believe me, if you were cooking for over 1200 people, delicacies such as Calves Liver ala Escargot would not be on the menu (although it could probably be found in a bathroom stall somewhere on campus). Beware of pea soup!

Artwork — now there is something we all seem to have an opinion about. Does anyone else find it insulting that after Ursinus students continuously denigrated our seemingly "artistically-challenged" and indecipherable sculptures that a LOVE sculpture pops up? What is the administration trying to say? —

HERE! DO YOU THINK YOU CAN MANAGE TO UNDERSTAND THIS, HUH? Personally, I think we should build a new Pfahler with used sculpture parts, and have that freaky "sitting woman" statue guard the building like gargoyles.

And you, the entire Ursinus student body and administration — although I may seem bitter and somewhat critical — I do love it here. You welcomed me with open arms and allowed me to join your warm family, for which I am eternally in your debt (not to mention the financial debt I won't be able to pay back in full until I'm 40). Which brings me to my next question — do you think you could forget about the parking ticket? I swear, I didn't know it was President Strassburger's reserved space!

Guidelines for Thanksgiving Vacation Residence Hall Closing

1. All residence halls will be closed and locked on Wednesday, Nov. 22. Students unable to vacate the halls by 5:30 p.m. will be required to wait with their belongings in the Wismer Lower Lounge. The Wismer Lounge will close at 8:00 p.m.

2. The residence halls reopen on Sunday, Nov. 26 at noon. Please do not plan to return until that time. During the recess period, halls will not be open for procurement of personal belongings.

3. The Dining Hall will be closed after lunch at 1:30 p.m. on Wednesday, Nov. 22. The Dining Hall will reopen for breakfast at 7:30 a.m. on Monday, Nov. 27.

4. Zack's Place will close at 7:00 p.m. on Wednesday, Nov. 22. It will reopen at 8 a.m. on Monday, Nov. 27 for counter service.

5. The College is not responsible for personal possessions. Items of value should be taken home. See the *Student Handbook* (page 29, item 7).

6. In an effort to improve security, students are required to do the following:

- Windows closed and locked, shades drawn
- Lights out, door locked
- Disconnect all electrical equipment with the exception of aquariums and refrigerators
- Remove all trash to a dumpster
- Sweep and clean floor

7. Any student found on campus without a break pass will be asked to leave campus immediately.

BEST WISHES TO ALL FOR A HAPPY THANKSGIVING!

Lady Bears Contend For Mobil Championship

Stephanie Casperson and Jamie Eissler both scored 17 points, and Megan Larkin grabbed an Ursinus-record 22 rebounds to lead the Bears to a 62-53 win over Misericordia in the opening game of the Mobil Tip-Off Tournament hosted by Trenton State College.

Ursinus was in control much of the game. The Bears led 32-33 at the intermission and were up 42-30 with 12 minutes left in the game. Misericordia then started to press and forced many of the Bears' 28 turnovers for the game. The Cougars battled back to tie the contest, 51-51, with 5:47 left. But then cold foul shooting and a stingy Ursinus defense took over, and Misericordia

would score just two more points.

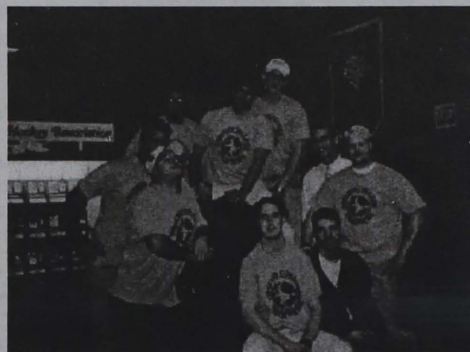

Larkin was a force on the boards, especially at the defensive end where she grabbed 16 rebounds. Ellen Cosgrove holds the old rebounding mark of 20, set against Muhlenberg in 1994. On the offensive end, Larkin added 13 points.

Missy Longhi led Misericordia with 21 points. She also added eight rebounds. Staci Hughes led the Cougars with 11 rebounds. However, she missed four straight foul shots late in the game and allowed Ursinus to pull away.

The Bears faced host Trenton State in the championship game Sunday afternoon, after the deadline for this article.

A PHILLY FAN

by Joel Schofer

Assistant Sports Editor

Friday night's Sixers game against the Cleveland Cavaliers provided both symbolism and proof that some force governing our vast universe does not like Tim Perry.

The Sixers were, to put it simply, awful, losing to the no-longer-winless Cleveland Cavaliers by a final score of 114-82.

Jerry Stackhouse and Vernon Maxwell had seven points each.

Clarence Weatherspoon, who admittedly is not fully recovered from a quadriceps strain, had five points. Jeff Malone, who apparently is suffering from a rare disease that causes all circular objects (such as a basketball rim) to move rapidly about in no particular pattern in one's field of vision, had 6 points.

To top it all off, Scott Williams, who is not really supposed to score, but is supposed to rebound, had no points and three rebounds in 22 minutes of stagnation on the court.

Looking back at the poor performance put on by the Sixers, I noticed

a little foreshadowing present in the pregame warmups that at the time could have indicated that things were not going to go the way the Sixers would have liked.

Sharone Wright's shoes oozed "Nike gel" all over the Spectrum floor, necessitating a ten minute delay in the game as the maintenance staff tried to clean it up.

As for foreshadowing, this unheard-of mishap could forecast nothing but misery for the Sixers, and misery is what all of the Sixers fans got.

As for symbolism, the gel in Sharone Wright's shoes is to the Sixers team as the maintenance staff that attempted to clean up the gel is to coach and general manager John Lucas. It's an ugly job, but someone's got to do it.

The previously mentioned proof of a grand unifying force that hates Tim Perry in our domain of scattered matter and energy came when Tim Perry stepped out on to the court.

Mr. Perry, who sees less playing time than head coach and two-way lineman Ashok Parameswaran of the Corporation, played for one full

minute. During that one minute Mr. Perry proceeded to make valuable use of his playing time by colliding with another player, requiring six stitches in his head.

Such bad luck experienced by one player is concrete evidence that whatever force created all that is around us absolutely despises Tim Perry, and I tend to share that opinion. (To those of you who may be questioning the divine implications of this incident, I must say that this incident tells you more about the nature of the "creator" than anything Professor "world famous" Johnson of Berkeley said during last week's biology common hour, and he's "world famous.")

I believe that in reference to the Philadelphia Eagles it is finally time that I admit to a gross underestimation of the Eagles talent.

Yes, I did predict a record of 6-10, and, at their current record of 6-4, it appears as if the Eagles will have at least a moderately successful season. They are a much more competitive team than I originally imagined, but...

Yesterday's game against the Giants is a very telling game. If they won the game coming off of last week's Sun-

day night slaughter of the Broncos, then they are truly a team to be reckoned with, a team that is developing a winning attitude. If they lost the game, as I think they probably did (sitting here and mulling it over on Saturday afternoon), then they are not quite ready to make a noticeable dent in the playoffs and have not developed the winning ways some Eagles fans believe coach Ray Rhodes is instilling.

In either case, let's hope that the wide receivers and Rodney Peete continued last week's ability to throw down the field, for that will be the key to any success the Eagles have in this year's playoffs.

Last Sunday, Randall Cunningham was the focus of the ESPN Sunday Conversation. During this conversation, he stated that he was a 32-year-old quarterback entering his prime and that his skills have not diminished. He also discussed what teams he would like to play for, specifically mentioning Buddy Ryan in Arizona or as a backup for Dan Marino, Steve Young, or Troy Aikman.

The interviewer, of course, questioned Randall's willingness to play a

backup role for another season. Randall, to paraphrase, said that he would willingly backup those three quarterbacks because he respected them. Implication: he doesn't respect Rodney Peete.

Randall, you are one hell of a team player! Go Eagles!

Then, to put the finishing touches on what was an interview for which he should be demoted to third string quarterback, he says something that truly makes me wonder how many cards he has in his deck.

He said, to paraphrase once again, that he would like the Eagles to make him a contract offer at the end of the season if the Eagles share the opinion that his skills have not diminished.

Randall, if the Eagles think your skills have not diminished? Hello? Don't you think you'd be playing if they shared that opinion? One word...IDIOT!!!

To return to my erroneous 6-10 prediction, I must unequivocally state that there is one way I can still be correct. In other words, there is only one way the Eagles will lose all of the rest of their games.

Four words...head coach Rich Kotite.

Men's Basketball

Season Opening Tourney Yields Split

The Ursinus men's basketball team used a tenacious defense to come from behind to defeat Delaware Valley (0-2), 74-49, in the consolation game of the Philadelphia Pharmacy Tip-Off Tournament, on Nov. 18. The Bears (1-1) trailed 13-4 with 12:40 to play in the first half, but then their defense tightened. Ursinus held the Aggies to one field goal the rest of the half, and a 22-0 run gave the Bears a 26-13 lead with 4:09 to play. Ursinus held a 39-19 lead at the half.

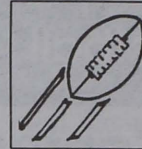

Fred Luck scored 17 points for the second straight game to lead the

Bears' offense. He also grabbed six rebounds. Freshmen Jason O'Neill and Ryan Costello added 12 and nine points, respectively, while Costello, an Owen J. Roberts grad, also added six rebounds. Pat Buysse led the Bears with seven rebounds, while Bernie Rogers had nine assists. James Godwin led Delaware Valley with 15 points. Matt Lewczyk added 12.

In the opening round on Nov. 17, Cabrini College, a NCAA Division III pre-season Top-20 selection, had little trouble handing Ursinus an 86-62 loss.

Cabrini led 40-30 at the intermission; however, a 7-0 run by the Bears cut that lead to seven, 46-39, with 14:57 to play. The Cavaliers were not threatened thereafter.

Nate Bowles led Cabrini with 19 points, while Bill Carr added 16. Fred Luck enjoyed the second-best game of his career in leading Ursinus. The senior captain had 17 points and seven rebounds. Pat Buysse added eight points and five rebounds. Bernie Rogers, who has led Ursinus in scoring and assists each of the past three seasons, was held to seven points and five assists.

Football

Bears Place Four On Centennial All-Conference Team

Ursinus senior defensive back Kevin Flanagan was the only Bears player chosen First Team All-Centennial Conference in a vote of the league's coaches on Nov. 13. Flanagan led the Bears with five interceptions. He was fourth on the team in tackles with 68. Flanagan had an interception in the Bears' final game at Dickinson, before suffering a separated shoulder in that contest.

Named to the second team were

senior linebacker Mike Ortman, and juniors Ron Floyd, a wide receiver, and Sean Barrera, an offensive tackle. Ortman was second on the team with 104 tackles. He also had four quarterback sacks, 10 tackles for loss, and three forced fumbles. Floyd led the conference in all games played with 52 receptions. He was fifth, with 29 receptions in league games. Barrera, at 6-foot, 270 pounds, is one of the most intimidating linemen in the conference.

CHUCK'S WAGON

by **Charlie Weingroff**
Sports Editor

If you know me, then I think you know what's coming. I just wanted to wait a week, just to let the dust settle.

And indeed it was about two weeks ago, that the dust did settle down on the practice field. And at about 8:00, the venerable Bill Loftus went down to the field to shut the lights off after The Corporation had completed its mission of capturing the Flag Football Championship.

It all started last year after APO kicked the hell out of us in the semifinals. We lost some key people off of an upstart rookie team that was shown little respect by the league commissioner.

We lost Big TJ, Sparky, and Bear Trax Trey Ward, 3 pretty key players. Returning, we had Scott Chalbert, Dan Tom, the best WR on any football team in the school Troy Gehret, an excellent QB in Jay Moran, as well as me, Steve Garbarini, Kenny and Jeff, Ashok, Stu, and Scott Winot. But we needed more, and I went to work actively recruiting.

Being a trainer with the football team, I knew several key players would not be coming back to play this year. Several invitations were extended with the return of a championship guaranteed. I like guaran-

tees. Some were accepted; some were revoked. With Moran as our supposed QB, I knew John Scorsone couldn't pass up rekindling the old Bonner connection out of the backfield. Along with Scor came Dwyer, Beast, and MacTear. 3 of these 4 gentlemen wound up as 1st team All-Wagon selections.

But things weren't all peachy, as Jason Frey would say. A group that was dubbed the 4 horseman promised to come aboard. This group, headed by Mr. Tony Esposito, was to include Joey Simione and Matty McCarte. Now this team would've been awesome. Not that we weren't without them. I didn't like it, but I respected Espo's decision to play elsewhere, but we were taken back when Moran decided to play on another team. Last year we were the only team willing to give him the light of day, and then he bagged us. Oh well, we have the shirts and he doesn't.

We brought in some huge people off the waiver wire, like Seth Tanner, John Rundle, and Big Paul Norris. But there was no better recruiting ground than the soccer team. Brian Webster, John Noone, and Brad Getz were incredible. After the installment of Getz at QB after a loss to an excellent Delta Pi team, we were not going to lose again. And surprisingly enough, we didn't.

We simply had too much talent. We beat every team. Blew most

out, but not all. It did take two years to do it, and if going out and assembling a team of the best athletes in the school was what it took to beat the mighty APO, then so be it. They have some very legit excuses for losing that I certainly won't quarrel with, like Burke's health and Boyer's absence, among other things. But I postponed the game over a week so everyone would be happy. I'm happy. The Corporation's happy. And whether you like it, or you don't like it, learn to love it, because we were the best thing going.

All right, that's a once a year thing.

Now to something that's also a yearly thing. Every year, no matter who is on the team, the Cleveland Browns suck. Let's start with Eric Turner. He is phenomenal, no question about it. Cracked vertebrae. See ya, not phenomenal this year. Vinny Testaverde at QB. Vinny T. is not horrible. He's not great or even really good, but he is ok. Sort of like milk. I mean, do you ever drink milk and say - Wow, that was great milk. No, milk isn't great. It can be ok at best. Vinny T. is ok. An ok QB can get you to the playoffs, if you have other pieces being graded...well, above ok. Vinny T. should be playing right now. He is better than Eric Zeier. Coach Bill Belichick is doing his team a tremendous disservice by not putting

the best 11 guys on the field every week.

And then there's that Andre Rison guy. Anyone that says he is overpaid, a stiff, a punk, a loudmouth, or a cheese doodle is both wrong and right. He is not overpaid, nor a stiff. No professional athlete is overpaid in my opinion. If anyone thought Andre Rison would have 4 catches for -8 yards at this point of the season, I'd say that person had barf for brains. He certainly is not earning 4. whatever million dollars he is making, but you pay for the past hoping it gets repeated. That's how things work for all you suckas you don't know. He can indeed be construed as a punk. He definitely is a loudmouth. And I have no idea why anyone would call him a cheese doodle.

Oh, and I guess the Browns will have blown somebody out this weekend, based on my fine critiques of the Feables and Niners last week. I now would like to discuss a gentleman named Kirk Muller. Kirk Muller is an excellent hockey player for the New York Islanders, a team that is much less than excellent, sort of. You see, last week I believe, Mr. Muller was sent down. Not to the minors as you may expect, but home. Home as in roof over head with cable TV. Never in all my years have I seen a player sent home. Kirk Muller is being paid to do nothing. Someone with the Island-

ers has decided that it is in the best interests of the Islander organization that this all-star player, albeit a contemptuous one who makes no bones about his ill-will towards the greater Long Island area where Kenny Miller lives, be paid \$2 million+ to not play with the team. Now I know Kirk Muller. Well, I did sit on his lap for a picture when I was 10. But I don't think he would pull a JR Rider and play bad on purpose. He's a class act. He doesn't like New York. Neither do I. Then why the hell did UltraClown GM Don Maloney trade one of the top 5 playmakers in the league, Pierre Turgeon, for him? I don't know. Maybe's he stupid or something.

Last week's question was promptly answered by a Marc DiFillipo. He was quick to respond that Mr. Perfect Curt Henning was the only wrestler to have a coach, rather than a manager. This man was named, oddly enough, The Coach. For the next World Wrestling Federation Trivia Question of the Week: **Jake "The Snake" Roberts had 2 snakes. Name them, and why did he have to get a 2nd one?** That's all for this week, every member of The Corporation can call themselves a champion, and the pleasure was all yours.
