Opinions Sought on Pass/Fail Option

by Jennifer Courtney
Of The Grizzly

"What did you get in your Liberal Studies Seminar?"

"Pass."

"I know you passed, but what grade did you get?"

"Pass. That's the grade."

Might this be a conversation some of you might hear in the near future? It's up to you and the faculty to decide.

Two weeks ago, Academic Council formed a subcommittee to find as much information and get as much feedback as possible about implementing a pass/fail option at Ursinus.

Tina Wailgum, ESS professor and head football trainer, is chair of the committee, which also consists of English professor Margot Kelley,

politics professor Steven Hood, biology professor Mary Fields and Registrar Barbara Boris.

"There are no guidelines or proposals set yet.

Right now the committee is only in the process of researching this idea and all its aspects."

The committee will gather information on pass/fail programs at other colleges and universities, seek out pass fail options and bring back both sides in a report to Academic Council.

The committee met for the first time on Tuesday, April 16, and devised questionnaire that will be put forth to the faculty over e-mail

this week. Faculty members will be asked four questions:

1. What types of courses do you want to see as pass/fail (core, departmental, labs, exploration, etc.)?
2. Would you support students changing from letter grade to pass/fail or vice versa during the semester?
3. How many of 128 credits can be taken as pass/fail?
4. What type of assurance would you want from students that they'll work as hard as if they were taking the class for a letter grade?

They are encouraged to respond to Boris on e-mail with any and all ideas, questions, concerns, pros and cons by May 1.

Students are also encouraged to give their opinions in one of two ways.

First, you can fill out the form on

page two of *The Grizzly*.

Second, read "The Pass/Fail Option Policies of Centennial Conferences," now on reserve in the library.

Give Wailgum your feedback by e-mail, letters, phone (x2101) or in person. She is asking everyone to respond in some way.

There are no guidelines or proposals set as of yet. Right now the committee is only in the process of researching this idea and all its aspects.

They will give a report to Academic Council who will decide if a pass/fail option could even work at Ursinus.

The report is dependent on student and faculty feedback and will only be as the response from the campus.

Undergraduate Research Conference to be held Saturday

The first annual Centennial Conference Student Research Colloquium will be held Saturday, April 27.

Students from Dickinson, Johns Hopkins, Ursinus, Washington and Western Maryland will present papers in the humanities, sciences and the social sciences. All students and faculty are invited to attend the event, which will begin at 10 a.m. in Olin Auditorium.

Freshmen and sophomores curious about undergraduate research and conferences are encouraged to attend.

Cantor Recalls Songs of the Holocaust

by Marc Ellman
Of The Grizzly

"Songs of the Holocaust," a program of musical experiences, was presented by Cantor Neil Schwartz in Wismer Parent's Lounge on Monday, April 15, in honor of Yom Hashoa (Holocaust Day).

The program was part of Ursinus' annual Holocaust Commemoration. Gov. Tom Ridge proclaimed Tuesday, April 16, as the day of Remembrance in Pennsylvania in honor of those who suffered through and died in the Holocaust.

Schwartz, a cantor at the Keshet Zion Synagogue in Reading, sang a variety of songs from various periods of the Holocaust. A cantor is a clergy person who specializes in Jewish music.

"Many Jews created poems and songs as a sort of passive resistance," Schwartz said. Many of the poems were later set in music.

Schwartz, who was accompanied by piano player Dean Kruppenbach, sang in both Yiddish and English translation.

"There are over 100 songs relating to the Holocaust," Schwartz said. "This is not fun music. It's not a fun subject."

Schwartz began the program by lighting a

Yahrzeit (memorial) candle in memory of the 6 million Jews who were killed during the Holocaust.

The first song Schwartz sang was written by Mordechai Gebirtig after a pogrom in a Polish town in 1938. The song seemed to say, "Watch out, a storm is coming."

"Our poor little village burns.... Don't just stand, put out the fire, for our little village burns."

Gebirtig was shot on June 4, 1942.

Schwartz explained that many Jews were killed in the ghetto by mobile death squads. One of the ways these squads murdered was by making the Jewish people line up in front

of a ditch they dug. The squads then used machine guns to shoot the Jews into the ditch.

Many Jews who survived the ghettos were sent to concentration camps. There were six death camps. The most destructive was Auschwitz, where approximately 1.5 million Jews were killed.

"There was Jewish resistance," Schwartz said. "We did not go to our death like sheep to the slaughter." He added that many Jews sang songs while on their way to the gas chambers.

The toughest song for Schwartz to sing was written by Pavel Friedman, who lived in a

Dr. Lobo Wins Grant for Biology Labs

by Jill Schnader

Features Editor

The National Science Foundation recently awarded a grant of \$20,362 to Dr. Anthony Lobo of the Biology Department for an instrumentation and lab improvement program.

In November, Dr. Lobo applied for the grant in a proposal entitled "Microbial Diversity and Molecular Identification: Reconfiguring the Microbiology Curriculum." The money is part of a "match" program, given on the condition that Ursinus will match the amount

granted by the NSF.

Lobo plans to use the grant for special Microbiology equipment to allow the culturing of unconventional microorganisms needing unique and extreme environments in which to grow. The bacteria can then be studied by research students as well as those in molecular biology courses. "A lot of exciting new discoveries in biotechnology are coming out of studies of these unconventional bacteria. This equipment will open more new opportunities for students to study these organisms," explained Lobo.

"Potemkin" village, which was set up to appear as a humane setting when the Red Cross came to see what was happening. The many children who lived there were well-fed and dressed during Red Cross visits, but soon after were sent to death.

"The last, the very last, so richly brightly, dazzling yellow.... That Butterfly was the last one. Butterflies don't live in here."

"I'm convinced that the butterfly is Friedman," Schwartz said. "He knew he wouldn't get out of the ghetto."

Friedman was killed at the age of 14.

Swartz ended the program with a special version of the Mourner's Kaddish, a prayer for the deceased. The rendition was interjected with the names of death camps and places where Jews perished.

"This program reflects upon a testimony to the human need for artistic expression, during even

What's Up In Wellness

by Jennifer Urban

Of The Grizzly

Walking - Everyone is doing it, but why should you? Walking is a safe and easy form of exercise which can be done almost anywhere at anytime and by almost anyone. It has the lowest rate of exercise injury while providing the same conditioning benefits as jogging or swimming. Nowadays, nearly 35 million adults walk for exercise virtually everyday, and another 15 million do so 2 or 3 times a week.

In the past walking was often dismissed as being "too easy" to be taken seriously, but recently walking has gained new respect as a means of improving physical fitness. Studies have shown that when done briskly and on a regular basis, walking produces numerous health benefits such as the following:

- ◆ Improves overall physical fitness
- ◆ Improves blood flow to all parts of the body
- ◆ Burns calories and fat
- ◆ Helps to keep bones stronger for longer
- ◆ Relieves stress and tension
- ◆ Decreases blood pressure

So, next time you have an errand to run or have some free time, go out and take a walk by yourself or with some friends. Walking is fun and beneficial to your health!

**Openings for Woods Hole
Marine Biology Course**

Several openings remain in the Marine Biology course to be held from May 21 to June 8 at the Marine Biological Laboratory, Woods Hole, Cape Cod, Mass. The four-credit lecture and laboratory course, taught by Dr. James Sidie, is now available to Ursinus and non-Ursinus students.

The course deals primarily with the biodiversity of the coastal intertidal zone. Students visit a different habitat each day, make collections of algae, shellfish and fish and identify them. Daily classroom lectures supplement the field investigations. The rest of the course consists of individual research projects based on the identified organisms. Past research projects have included studies of marine bacteria, responses

to light in invertebrates, circadian rhythmicity in plankton, fiddler crab population dynamics, sea water chemistry, algal biodiversity, and a photographic atlas of juvenile fish.

Among the habitats studied are rocky intertidal beaches, sandy beaches, mud flats, cobble beaches, salt ponds, eelgrass communities and salt marshes. Toward the end of the course, class members take a whale watching trip from Provincetown.

The fee for the course is \$920, which includes room, board laboratory fees, tuition, and round-trip transportation from Collegeville to Woods Hole. The application deadline is April 30, 1996. If interested, please contact Dr. James Sidie.

Biologists Have Stepped Out of Bounds

by Sean Sarles

Special to the Grizzly

Biology is, like any other science, an empirical school of thought.

Furthermore, science defines itself as a method of obtaining knowledge of the physical or material world through observation and experimentation. However, the branch of biology that studies evolution does not limit itself by this definition.

Evolutionary biologists have stepped out of bounds.

My apologies to those who are tired of the evolution debate. I know it seems that the arguments never seem to persuade anyone.

Whether or not God takes part in evolution (to one degree or another)

is not my concern here; nor am I trying to support a Biblical version of evolution.

The purpose of this article is to point out that the argument should not have started in the first place. The persons responsible for the con-

.....
 Evolutionary biologists
 are the Jehovah's
 Witnesses of materialism.

fusion are the biologists.

Evolution is a field that spans virtually every other branch of biology. For the most part, the details revealed by evolutionary theory are reliable because these details can be verified through observation and experimentation.

Natural selection as a method for evolution is also a legitimate theory.

The debate lies in the association of natural selection with its "mindless" cause. The "mindless" term is one that is often portrayed in naturalistic evolutionary thought.

Richard Dawkins, a prominent evolutionary biologist, describes natural selection as, the blind, unconscious, automatic process which Darwin discovered, and which we now know is the explanation for the existence and apparently purposeful form of all life, (which has no purpose in mind). Statements to this effect can also be heard in the Biology 111 lecture.

It is the use of the term "mindless" that creates the dispute. Using the term "mindless" is a reference to the lack of a consciousness that calls

into question a divine purpose.

But to discuss a transcendent mind that bestows purpose to the world, either existing or not existing, is to discuss philosophy.

A quick review of the above definition of science will reveal that the study of the divine does not lie within the realm of experimentation and observation.

It is very wrong for science to disguise a materialist philosophy under the name of science. Even worse is the attempt to disprove (or prove for that matter) the existence of God in a laboratory.

By definition, it is impossible to put the transcendent in a test tube. Evolutionary biologists insist on accrediting natural phenomena to the absence of a creator.

The question that must be asked

is why do they make such an assertion despite the fact that it is completely beyond the realm of scientific exploration to do so?

Well, these scientists are trying to convince you to believe in the materialist values to which they themselves subscribe.

In essence, they are saying: "If you believe in science, then you should not believe in God." Evolutionary biologists are the Jehovah's Witnesses of materialism. They knock on your door and expect you to buy into their views.

(For further exploration, look into Phillip Johnson's *Darwin on Trial*. His criticisms of evolution has enlightened many undergrads, myself included. Much of the above, I credit to him.)

When the Right Go Wrong, They Bring Us All Down

The right can be wrong.

Last week in *The Grizzly* Todd Breneman's article "Environmental Wackos called for environmentalism to be outlawed, because its leftist dogma caused the Unabomber to ruin the lives of many with bombs.

Before I go any father let me state that I am a card carrying member of the republican party and consider myself a conservative.

I think Todd is taking it a little too far when he says what drove the unabomber to bomb was being an environmentalist. To prove his point he tried to suggest the impeachment of Vice President Al Gore because his book *Earth in the Balance* was the motivation behind the Unabomber's actions. This assumption cannot be father from the truth.

A book written in 1992 can not be responsible for bombings that started in 1978. While Al Gore's views on the environment, and the health of our planet may be extreme, it is not a manifesto to incite violence. It is simply a book written by a man who grew up in the 70s where everyone was under the auspices that we were all doomed if we did not do something to protect our planet.

His book has revived a movement that fell in popularity during the 1980s. I think all it has accom-

plished is getting a part of our population, mostly youth, interested preserving Mother Earth the way they see fit. And by no means is this a bad thing unless Todd plans to teach his children about animals at the Natural History Museum instead of at the Zoo.

Blowing up people or things is not what I call an environmental action in the first place, so I think any rational individual wants to protect their planet by less destructive means.

If Todd wants to complain about liberalism or environmentalism being responsible for the unabombers actions, he should take a step back and look at what he is doing.

He is defending the person by saying his action are not his own and merely the result of a group mentality that calls for violence. In other words, he is offering the Unabomber an excuse.

There are a whole bunch of other factors that must be considered before authorities can decide what really drove the Unabomber to bomb. For example, who he killed and how their positions affected the unabombers should be considered. The Unabomber was an "academic", but why was he using the knowledge he obtained from Harvard and the University of Michigan to build

bombs in a shack in Montana and not further his cause by rational means?

Were his ideas not mainstream or acceptable to the academic community? Someone with his abilities could have certainly found a more constructive way.

Party affiliation did not make the Unabomber, and it cannot be the sole reason anyone else in our country goes to extremes.

Liberal or Conservative ideas do not call anyone to build bombs, that are held up in a shack in Montana to avoid taxation or shoot up abortion clinics.

No matter what group the Unabomber belonged to does not out weigh the malfunction in his head that caused him to do what he did. "The devil made me do it" is an expression that is used far too much in this country. We can impeach Al Gore, throw Rush Limbaugh off the air and disband Operation Rescue, but it won't make the world a safer place for professors, FBI agents or abortion doctors. There will be people that take their cause to the extreme no matter who they are.

electricity is being used to run computers that are left on. Look at how much water is being wasted in the restrooms. And

how much solid waste is being thrown out in the trash cans. We bet it's a lot.

Now, here are some simple ways you can produce less waste at work. When you're at the copier, only make the copies you need. Use both sides of the paper when writing a memo. Turn off your light when you leave. Use a lower watt bulb in your lamps. Drink your coffee or tea out of mugs instead of throwaway cups.

IT'S A CONNECTED WORLD. DO YOUR SHARE.

Todd Brenneman Should Not Be a Writer

The day the April 16 issue of the Grizzly was distributed, I watched my two roommates argue for more than a half hour about an article entitled "Environmental Wackos." One argued that Todd Brenneman hated environmentalists because he used the term treehugger. For him, the term treehugger seemed to have a very negative connotation. My other roommate believed that Todd didn't have a problem with environmentalists. He thought Todd's article seemed to have a sarcastic tone because Todd argued that environmentalist literature played a big role in the Unabomber's actions. After reading the article myself, I understood why they were arguing. I hesitate when I write "article" because I'm not sure really that "article" is an appropriate label for what Todd Brenneman wrote.

For me at least, the title newspaper article connotes the notion of a clear and coherent writing style. Sometimes, I even think an article should contain a focus on subject matter. I was under the impression also that, generally, articles are written with a purpose in mind. I suppose I'm just not aware of this new style of writing which employs pitiful attempts at sarcasm.

I have difficulty agreeing or disagreeing with Todd because he never really makes clear if he believes environmentalism will bring about more Unabombers or if he believes the press has created a ridiculous association between the Unabomber and environmentalists. I'm not sure whether Todd supports or rejects environmentalism. I am sure my fellow students and I would find it very enlightening if Todd

could state clearly his point of view on these subjects. Also, I have no idea who "the wise one" or "the environmentalist" are. Sometimes, naming exactly who you are making reference to can be very helpful to your readers. It's just a tip, but doing this will make your "articles" easier to understand.

I suggest, Todd, if you decide to write your articles with a sarcastic tone, be sure people can understand what the hell you are talking about. Be sure your audience knows how you feel about the subject you are addressing.

Surely, the Grizzly cannot be so hard up for writers that we, as your readers, must be subjected to "articles" such as "Environmental Wackos."

Class of 1997

STUDENT PHOTOGRAPHY CONTEST

Are you a budding Ansel Adams? A blossoming Annie Leibovitz?

Enter the Ursinus Magazine photo contest and **win \$100 --** and have your work published in the magazine, which goes to 14,000 alumni all over the world! **Second prize is \$75.**

Here are the details. Subject matter must be Ursinus people and scenes. Submit as many prints as you wish, black-and-white or color, to College Communications in Corson Hall. **Deadline is May 3.** Label your work clearly as contest submissions; include your name and phone number. All submissions become property of Ursinus College, and can be used in other publications and promotional materials.

Winners will be announced on May 10.

◆◆◆◆◆ Movie Mania ◆◆◆◆◆

by Colin Tucker
The sausage king of Chicago

Before I begin this week's reviews, I have to talk about a complaint I received. A very nice colleague of mine at this fine school expressed to me in a very polite manner that many people did not appreciate the comments I made in last week's column about Nicole Kidman, specifically that I indicated that the dress made her "look pregnant," and that "Tom Cruise shouldn't let her leave the house looking like that." She told me that the first comment conveyed the message that I thought pregnancy was unattractive and that the comment about Tom Cruise was rather chauvinistic.

Let me emphasize that those statements were only meant to be humorous. They do not express the way I really feel. I certainly do not consider myself a male chauvinist, and I hope no one else does. I write

this column for you, the readers, and if there is one thing I hate to see, it's a disappointed reader. I hope that I addressed your problems and that you all continue to read my column.

Finally, I would like to thank the person who talked to me because, unlike many other people, you were extremely polite when you approached me, and I appreciate all constructive criticism (Note to the crank-caller: "Your review sucked" and "You're dumbass" do not constitute constructive criticism). If you have a problem with anything that I write, please do not hesitate to speak to me about your problem.

The Birdcage- Based on the popular 1978 French film *La Cage Aux Folles*, *The Birdcage* is about a gay couple, Armand and Albert (Robin Williams and Nathan Lane), whose son is getting married. The girl whom their son is marrying is the daughter of an ex-

tremely conservative senator (Gene Hackman) who believes homosexuality is responsible for the downfall of society. When the in-laws decide to visit, the Goldmans have to hide all evidence that they are gay, which includes hiding the extremely effemi-

stupid *Ace Ventura: When Nature Calls* and the boring *Father of the Bride Part II*) and it was refreshing to see a really funny comedy that was well-written and well-acted. Although the first 45 minutes dragged just a tad, the rest of the movie made up for it, with a constant barrage of slapstick and spoken gags that were very entertaining

was a very believable character. He seemed more maternal than a lot of mothers that I know.

This was a very well done and humorous film that is in tune with the 1990s. I would not hesitate to recommend it. **Rating- 8 (Very good)**

Next Week...
The *Batman* trilogy
-Reviews of the three movies
-Sneak preview of the fourth movie

The movie seems to poke fun at conservative ideals and even Christianity to some degree (the Goldmans are Jewish), but the movie is too zany and exaggerated to take any of it seriously.

As usual, Gene Hackman and Robin Williams are terrific, but I think the real star in this movie was Nathan Lane, who played Albert. Lane is an accomplished Broadway stage actor and you may recognize his voice, because he was Timon the meerkat in *The Lion King* ("Why do I always have to save your AAAAAA!"). He was very funny, but was not over the top at all and

Movie quote of the week- Last week's quote: "Let me drive. I won't make a fool out of you," was guessed by only one person, senior Karen Fleshman, who will soon be the world's greatest genetic counselor. I guess that was a pretty hard quote. It was from *Days of Thunder*, the Tom Cruise movie about stock car racing. There are only a couple more weeks until I give away the *Batman* trilogy, so these next couple of weeks will be your last chances to guess the quotes. This week's quote is "Evil will always triumph over good because good is dumb." If you know the quote, E-mail me, see me, or call me at x3212.

Baseball Takes Over First Place

Baseball

Courtesy Of The Baseball Team

To begin last week, the Bears traveled to F&M and came from behind to defeat the Diplomats, 5-4. Senior Erik Hansen started but needed fellow senior Scott Keith to come in and shut them down and get the win. Senior Dan Tomlinson broke out of his slump going 3 for 5, with a key

RBI in the ninth inning.

F&M came to Collegeville on Friday and upset the Bears with sophomore Brian Creelman on the mound, 13-7. Junior Brian MacTear and Tomlinson were both 3 for 4.

On Saturday, the Bears hosted the climactic showdown with Washington College and their pair of highly touted pitching aces. The Bears

The Bears are currently in sole possession of first place in the Centennial Conference with a 12-2 conference record, and a 22-5 mark overall.

hung on dramatically in the first game of the doubleheader to win by the score of 10-9. Keith got the win in the opener. A 7-run fifth inning was the key with sophomore Mike

Romello getting a key RBI single and Tomlinson added a 2-run single. Senior Mike Aceto was 2 for 2 with 2 RBIs, and Aaron Rychling was 2 for 3 with 2 RBIs and a home run. MacTear kept up his hot bat by going 2 for 3.

In the nightcap with the Shoremen, UC unloaded on Scott Quinn for 9 runs in the fifth inning to seal the victory with a score of 12-3. Sophomore Nate Smiley pitched a strong game to get the win. A 2 out 2-run single in the fifth by Romello in the fifth gave the Bears some breathing room, and later Tomlinson (3 for 3)

hit a monstrous 3-run home run to left center to put the game away. Senior Joe Burke broke out of a slump with a 2 for 4 game with a home run. Key hitters were Aceto who was 2 for 3 with a triple, and MacTear, who was 2 for 3 with a pair of doubles.

The Bears are currently in sole possession of first place in the Centennial Conference with a 12-2 conference record, and a 22-5 mark overall.

A REFRESHER COURSE IN HOME ECONOMICS.

We'd like you to take this simple test to see if your home is as energy efficient as possible.

Ready? Let's begin. How many of you have TV's? How many times have you left the room and left it

If all gas-heated homes were properly weather stripped we'd save enough natural gas to heat 4 million homes.

on? How many times have you fallen asleep watching it only to wake up to the "Star Spangled Banner"? And what about your

lamps and lights? Do you turn

them off when you exit a room?

Is your house excessively lit during

the day? Next, check your

thermostat. Odds are, it could

use adjusting. And finally, see if

there's a draft coming from your

windows and doors. If there is,

you're letting valuable

energy fly right outside.

Now, for the answers.

Try installing timers

on your lights and television.

They're simple to

use, and inexpensive.

Turn your

thermostat up or

down a few

degrees. If you

get cold, grab a

sweater or a blanket. If you're

hot, wear fewer clothes.

As for your windows and

doors, a couple packages of \$3.00 weather

stripping should do the trick.

Turning off your lights can save electricity and reduce carbon dioxide pollution.

If everybody adjusted their thermostat by 6 degrees we could save up to 190,000 barrels of oil a day.

Each of these things will help save natural resources for the years to come. And if we can do that, we all deserve high marks.

Track & Field

Throwers Shine Caine Qualifies

by S. Caggiano
Of The Grizzly

Ursinus track and field continued to show its strength in the weights at the Widener Invitational. Rachele Pecovsky, in her usual winning style, rounded up a pair of second places in the shot and discus, while Angela Caine placed fifth in the shot with a season best throw of 33' 4 1/2", qualifying her for Mid-East Regionals. Freshmen standouts Kelly McCarthy and Anthony O'Hara placed second and fifth respectively in the javelin. Senior

Jen Seng, with a personal best throw of 100' 10", placed fifth.

On the track, Ursinus men Brian Delin and Steve Garbarini ran to third and sixth places respectively in the 400. The Ursinus men and women continue to show improvement elsewhere with season best performances turned in by Carrie Haslbeck (1500), Sarah Welsch (shot put), Dan Nibouar (1500), Tony Palladino (100 and 200), Mike Haines (javelin and 200), and Barry Keppard (800).

The Bears travel to the Millersville Invitational next Saturday to compete in their final meet before Conference Championships.

Women's Tennis Struggles

Courtesy of the Women's Tennis Team

The Ursinus women's tennis team got off to very late start with virtually no pre-season practice. Due to the sudden and unannounced resignation of the last year's coach, the team did not receive a coach until two weeks before the first match. Having missed crucial pre-season practice time, the team is struggling to compete with opponents who have been in training since the Fall semester. The Lady Bears cannot seem to break their losing streak with a disappointing 0-7 record. The line-up for the team is as follows: Junior Courtney Kraemer at #1 singles, Senior Tri-Captain Mary Greiss at #2 singles, Senior Tri-Captain Michelle Lim at #3 singles, Senior Tri-Captain Melanie McMullin at #4 singles, Sophomore

Women's Tennis

Katie Weinrich at #5 singles, and Sophomore Lauren Newkirk at #6 singles. Sophomores Karen Amichetti, Heather Dromgoole and Emily Robles play exhibition singles and doubles and fill in at #5 and #6 singles. Playing #1 doubles are Lim and Kraemer; #2 doubles are Greiss and McMullin, and #3 doubles are Weinrich and Newkirk.

The team has lost to Swarthmore, F & M, and Washington all by the score of 0-9 with all players losing in straight sets. The Bears also lost 0-9 to Haverford with Lim losing in 3 sets at #2 singles. Lim and Greiss almost upset Haverford at #2 doubles with a close 7-9 loss. On April 13, the team traveled to Western Maryland only to come away with another 0-9 loss. Lim again made it to three sets at #2 singles but lost in the third set.

On April 17, the Bears fell to Dickinson 0-5. UC lost all three doubles matches with Kraemer and Lim losing a close match, 6-8 at #1 doubles. Only two of the single's matches were played to completion before the match terminated due to Dickinson's long drive home.

On April 19, the Bears made their best showing yet with a 2-7 loss to Johns Hopkins. The #3 doubles team of Weinrich and Newkirk came on strong to overpower Hopkins with an impressive 8-5 victory. Greiss at #3 singles also won due to a retired opponent. Greiss played an exhibition match and won in straight sets. Lim, at #2 singles, played her third three set match of the season only to lose.

The team traveled to Gettysburg last Saturday.

A PHILLY FAN

by Joel Schofer
Asst. Sports Editor

The Eagles have once again sent me reeling, baffled beyond belief! Why? Why would they do such a thing? Alright, maybe I should tell you what I'm so irate about.

On Saturday the 1996 NFL draft began and the Eagles had the 25th pick. You would think that this first pick was a tremendous opportunity to plug some of the glaring holes in the linebacking crew, interior defensive line, or at tight end. You would think.

For some unknown reason, head coach Ray Rhodes looked at his roster, which already consisted of left tackles Steve Wallace, Bernard Williams, and Barrett Brooks, and saw need for another left tackle, apparently Mayberry.

Mayberry, a young left tackle

from some Division II (yes, that's what I said) program in Texas, is 6'4.5" and 320 pounds of fourth string left tackle that we absolutely did not need. Why? Why would they do such a thing?

Maybe Rhodes wants to form a barbershop quartet out of his left tackles? Maybe Rhodes just liked his name? Germaine Mayberry. Say it once, say it twice. It's got kind of a ring to it.

Well, obviously I'm not very happy with the Eagles first round draft pick because I just can't figure out why (Why?), but the rest of the Eagles draft, as of Sunday morning, made a lot of sense.

They drafted a young tight end in Jason Dunn, who obviously fills a need. They also drafted a young safety to replace Greg Jackson and a young quarterback, Bobby Hoyoing of Ohio State, to serve as a possible quarterback in the future.

In the later rounds of the draft, Rhodes needs to address the linebacking crew and defensive line, but who knows? Maybe we'll pick another left tackle so that we can field a full basketball team.

About basketball...no, I can't do it. They are so BAD!!!

The Flyers are in the midst of their first playoff series, just in case you hadn't noticed, deadlocked with the Tampa Bay Lightning 1-1 as of Sunday morning and fresh off getting their faces kicked in during a 2-1 overtime loss.

They lost 50 goal scorer LeClair to a sprained left ankle and Dave Otto and John Druce to sprained knees. Eric Lindros even left the game for about a period with a bruised kneecap. Basically, the Lightning, a team that has been called the best eighth seed ever to be in the NHL playoffs, came into the Flyers' village (yes, their village) and raped

their women and took their children. Maybe that was a little graphic and inappropriate, but that's what happened. Murder and rape.

LeClair is doubtful for Sunday night's game, which basically means that if you ask LeClair he's playing, but if you ask the trainers and doctors he's not. Lindros also is healthy enough to play, but it's not these two that I care about.

Shawn Antoski. Lace 'em up, big guy, and go kill someone. Murder, rape, pillage, and do all the things they did to us.

The Flyers will most likely win this series, but win or lose I just hope the Flyers take off someone's head.

Watching the Phillies game the other day I noticed something I really didn't like. Benito Santiago had wandered out to first base with a first baseman's mitt and was impersonating a real first baseman.

Now, I don't know about you because you haven't told me, but I do not want Santiago playing first. Why do the Phillies always try to put people at positions they don't play? They do it all the time! Jaun Samuel in center field. Gregg Jefferies in left field. Lenny Dykstra in left field. Darren Daulton in left field. Need I go on? No.

The Phillies have a fine young player in Gene Schall, who they've already sent back to the minors because of his lack of offensive production since Gregg Jefferies' injury. What did he get? Forty at bats?

Forty at bats is not enough to judge Schall's ability to produce at the major league level and it's not enough to warrant turning our best catcher into our worst infielder.

Ursinus Lady Bears Keep Climbing In The Rankings

Women's Lacrosse

by Mary Hearl
Of The Grizzly

The undefeated Ursinus Bears, ranked 15th in the beginning of the season, has now increased their standing to 3rd in the nation. The question is, where will they be in the rankings after their recent loss to Trenton State? The answer: They certainly deserve to move ahead because Ursinus gave the Lions of Trenton their closest game of the season. Yes, they lost, but by no means was it an easy win for Trenton.

Ursinus travelled to Trenton State on April 18th realizing this game was a test to see how good they are compared with the nation's best competition. The top-ranked Lions (7-0) had an 80 game winning streak and an undefeated streak of 42 wins in a row at home. But did that scare our Lady Bears? No way. At intermission Ursinus trailed 7-4 but came back within the first ten minutes of the second half. Judie Marcus scored back-to-back goals to pull Ursinus within one goal, 8-7. The game went back and forth until Trenton

pulled away with a 10-7 lead. However, the Bears never gave up for a minute. Strong performances by goalie Kim Ryan and attack players Judie Marcus and Jen Howe threw a scare into Trenton's team.

Jen Howe led the Bears with four goals and two assists. Marcus scored twice and assisted on a goal. Amy Minnich, Meme Hamlin, and Missy Myers each scored one goal. Trenton outshout Ursinus 29-25. Kim Ryan saved 12 shots for the Bears, while Belinda Warwick stopped 13 shots for the Lions. Kelly Portser,

playing defense, was quoted as saying, "We earned the respect we deserve and proved we can play with the best."

Ursinus came back on Saturday the 20th with another big win in a Centennial Conference match up with Dickinson. The game was not one of their best and at times the Bears seemed tired. At half, the score was 6-4, in favor of Ursinus. The Bears turned the heat on in the second half when Marcus and Howe led the attack with some incredible goals.

Once again, Jen Howe led with four goals. Judie Marcus added three goals to help the Bears, while Amy Minnich and Missy Myers each contributed two goals. Meme Hamlin had one goal and two assists. Kim Ryan had nine saves and the Bears combined for 29 shots on goal. Dickinson's Jess Colby and Carrie Norris were the leaders with two goals apiece.

Ursinus moves onward and upward meeting Millersville on Monday, April 22.

CHUCK'S WAGON

by Charlie Weingroff
Sports Editor

When I came back from Easter Break, I stopped at Redners before I went to my room. I waded through the hicks and locals to buy some Gatorade, and they had a great deal on 32 oz bottles for 89 cents. For the non-Gatorade drinkers of the world, that's a pretty good deal. Well, the deal with these bottles of Gatorade is that under the cap, they have an NBA team and how many games it will take them to win the NBA Finals series. Like so far, I've gotten the Charlotte Hornets in 5, and I said take care, brush your hair, and then I trashed it. I've gotten 2 different Golden States, one in 5 and one in 7. Golden State is going to be nice enough this year to give their lottery selection to the Orlando Magic, because they will not be in the playoffs this year. I trashed them both. The fourth bottle I opened had one that I haven't decided what to do with yet. Houston Rockets in 4. Now what do I do with that one?

The Houston Rockets winning the NBA Finals in 4 straight games? Fairy tales do come true, and it could happen to you. Nobody would buy New York State lottery tickets if they didn't. But can it happen three straight years for the Rockets? Not the lottery thing. I mean winning the NBA championship for 3 years in a row. As it stands right now, the Houston Rockets are the reigning champions of the NBA.

They are very far from being the best team in the NBA; in fact, they're far from being a really good team. They're far from El Paso and Dallas, because even though they're in the same state, Texas still is pretty big. The Rockets are just another run of the mill, just-squeak-by-like-John-Noone type of team that happened to be good enough in the meaningless regular season to get to go the playoffs. They were that middle of the pack team 2 years ago. They were that team last year, and they're that team again this year. And then they have Hakeem McCuen, the same guy that if he shot 35 times a game, people would say he was the best player in the league. The Houston Rockets can win the championship this year. They outlasted the refs as they swept the Magic last year. Who's to say they can't do it again.

The NBA, that's who. I'm going to keep the cap, but if there is any doubt in anyone's mind that the Chicago Bulls will not win the NBA championship this year, be it based on basketball skills, baseball skills (Jordan played right field for the Birmingham Barons a year a half ago), football skills (Pippen played quarterback in high school), sky surfing skills, skills that pay the bills, pie eating skills, powerbombing skills, or the NBA just mandating a title for the return of a glorified Michael Jordan, you are very foolish.

If the Bulls played anyone straight up, they're going to win. Give them the Rockets. They win. Give them

the Magic, the Spurs, the Lakers with Fat Magic, the Bulls win. Give them Happy Beef, the Bulls win. It may be close, but I'll take the Bulls in 6. Every old man and his uncle says that sports were so much better back in the day. Grandpa Joe says, "You never seen a player like Mickey Mantle nowadays." And that shady old man that you always wondered about down the street, the one that never got married or cleaned the yard, says, "The greatest teams played way back when." Well, when the Bulls' 2nd best regular season in the history of pro sports is validated by an inevitable championship, just like the Miami Dolphins in 1972, who had the greatest season of any sport ever, we can say we saw the greatest of all time. And the NBA will sit back it its leather EZ chair and just smile.

Plus, we got to see Matt Miller eat 66 wings in 5 minutes. Now how does that compare to 60 Chicken McNuggets in 1 hour? We have seen some of the greatest performances of all time.

When Kirk and I were at Trenton State for the girls lacrosse game, we began discussing an interesting proposition. How come teams don't take one of their worst players and have them go out and start a fight with the other team's best player? No matter who starts it, both players get booted. One team loses a scrubby player, and the other team loses their best player. Not a bad trade-off. So upon further investigation, Patty McGinty volunteered to take out Trenton State's best player for

obvious reasons. Everyone involved agreed she would be an excellent choice, and she was pretty pumped up about it. Unfortunately, it didn't materialize, but it was pretty ironic because if we look at the St. Louis Blues - Toronto Maple Leafs NHL playoffs 1st round series, we see that this goon technique--taking out another team's good players--is an excellent tool in offering your team the best chance to win. Hey, isn't that what it's all about?

Well, perhaps that's what former Ranger, now Maple Leaf Nick Kypreos was thinking about when he plowed Blues' goalie Grant Fuhr, finishing his season with a knee injury. Now Kypreos is saying he was cross-checked by Blues' defenseman Chris Pronger and George Hankins, and that propelled him into Fuhr. Grant Fuhr is awesome. Without him, the Blues are not as good a hockey team. Nick Kypreos is not awesome. The Leafs will not miss him. Hockey perpetuates goons and fighters with places for them on every team, and Kypreos has and always will be a goon, like Hartle, among others with the soccer team. Whether he did it on purpose, we'll never know. But in any situation, the team that loses one of their good players is screwed with nothing they can do about it. Underhanded and cheesy? Yes. Successful? Very. It's 10 o'clock, and do you know where your children are?

A man answers to the name of Cecil. He is not a thin man, but

neither was Babe Ruth. He has little agility, yet he stole the 1st base of his career this year. He is a man of swagger, yet not that of Tom Guzzoian proportions. Cecil Fielder has begun this baseball season by doing one thing. He has hit bombs. Major bombs. He has hit bombs early, and he has hit them often. At one point we were looking at 9 homers in 55 at bats. So, we can expect in a normal, 600 at-bat year for Cecil, about 98 home runs. Um, yes, that would be a new record...by 37. Cecil's only hitting 0.230 or so, so maybe that's why he's hitting so many home runs, but hey, you've got to hit 9 before you can hit 10, and 10 before 20, and so on and so on, and 60 before 61. You've got to start somewhere. Don't I know.

Last week Ashok returned to the ranks of successful answerers beating out a valiant verbally strung out attempt from Dave Myers to recall that the Beverley Brothers' first names were Beau and Blake. They had that kind of desirable gimmick with the wavy blonde hair and light blue robes, but they had some pretty good battles with the Road Warriors back in the day. It's always back in the day. In what may be the last *World Wrestling Federation Trivia Question of the Week*: What was George "The Animal" Steele's little gray doll's name? That's all for this week--next week may be the end--and once again, the pleasure was all yours.

Editor's note: The opinions in this article are those of the writer alone, and are not necessarily those of *The Grizzly* or Ursinus College.
