New Bookstore Anticipated Fall 1998

by Jesse Federman
of the Grizzly

For several readily apparent reasons, the Ursinus College bookstore leaves much to be desired. Aside from the fact that many students feel text book prices are a bit exorbitant, it is extremely small—even for a college of less than 1200 students—and its location is inconvenient. These gripes have not gone unnoticed by administration however, and thankfully, by next year, these problems should be taken care of with the construction of a bigger, better (but not necessarily cheaper) bookstore.

In order to reconcile this pressing need, the college has invited two companies to compete for ownership of a new bookstore which is scheduled to be completed early in the fall semester of 1998. Both groups will submit proposals specifi-

ying their plans by the end of 1997, which will then be reviewed by a panel of 10 to 12 students, faculty, and staff. According to Dr. Pilgrim, who is heading the panel, ownership will be awarded to the company which manages to "convince us they can run a store well, the way we would like it to be run."

The first of the two is the Follett Company, which has owned the current bookstore for nearly 15 years. It is the largest campus bookstore operation in the country, managing more than 500 college and university stores across the United States. The second is the Little Professor Bookstore, located in the Trappe Shopping Center. Once Ursinus has granted ownership to one of these two entities, the college will receive a fee from the company and nothing more. The new store is essentially a business, and thus profits and losses are all handled by the company, not the school. Decisions concerning ev-

erything from merchandising to resale to price mark-ups will be made solely by either Follett or Little Professor. Ideas on these matters will be included in the proposals, so the panel can ensure that such decisions will be made responsibly.

Students who are dissatisfied with the current bookstore might feel that Follett should not even be given consideration in this matter, but Dr. Pilgrim urges that such criticism is unfounded. He mentions a study conducted by the Student Faculty Committee last year which compared the Ursinus Bookstore with those of approximately 15 other, comparable institutions.

Dr. Clark, a History professor who was on the committee, explains that their research revealed that, in general, the price mark-ups made in our bookstore did not exceed the norm. The average textbook mark-up, which included new, used, and traded books, came to approximately 25%, and the average merchandis-

ing mark-up, which included Ursinus clothing and paraphernalia, totaled about 50%. Both figures were in keeping with the standard mark-ups made at the other schools surveyed.

Despite these somewhat reassuring results, the committee came to another overwhelming conclusion. "We were in unanimous agreement," asserts Dr. Clark, "that the store needed a new site. It needed to be more central." Dr. Pilgrim firmly agrees, and is certain the new bookstore's location, which has already been chosen, will prove more convenient.

The new store will be constructed next to Wismer, a much more readily accessible spot without a doubt. The steep hill just outside of Zack's will be completely dug out to make room for the two-story building. Dr. Pilgrim's panel has been working with an architect for a year with hopes of committing to a final design by the end of this coming Janu-

ary. The new owner will also have input into this matter.

If all goes as planned, by the time final exams are over at the end of this year, the two proposals will have been reviewed and an owner will have been chosen. Though Dr. Pilgrim claims he is not unhappy with the current bookstore, he is undeniably excited about next year's plans. "We will have a proper bookstore for the first time in history," he exclaims, "For the past 35 years we have not had a proper site or a proper building." Finally, we will have both.

Capano Charged with First Degree Murder

by Melinda C. Albert
of the Grizzly

On Wednesday, November 12, a Black Jeep driving in the north bound lane of I-95 in Wilmington, Delaware was pulled over by a slew of law enforcement officials. It was no ordinary traffic stop, for the officers were there to arrest prominent Delaware attorney and power player, Thomas J. Capano, Jr., the charge, first degree murder.

Although, Capano had long been the primary suspect in the disappearance of Anne Marie Fahey, and the target of a grand jury investigation, he was never convicted of any crime. However, his younger brother Gerard turned him in. According to a police affidavit, Gerard told authorities that he helped his older brother Thomas dump a body into the Atlantic. The body was in a 5-foot-long cooler, that was closed with a chain and lock. Thomas Capano loaded

it on Jerry's boat, and they rode about 60 to 75 miles out into the ocean. Thomas pushed the cooler overboard, but it would not sink. He then began to shoot holes into the cooler to make it sink, but he was still unsuccessful. Thomas then pulled the cooler back on board, removed the corpse from inside, tied it to an anchor, and threw it overboard, into 200 feet of water. Fahey's body still has not been found, and experts are dubious that a discovery will ever be made.

Though few people interviewed knew the details of the case, several Ursinus community members wished to comment publicly. Michael Bauer, a Ursinus College junior who has a twin brother with whom he maintains a very close relationship, agrees with Gerard Capano's reaction. Although Bauer admitted that turning your brother in is a difficult decision, it is ultimately the right thing to do. "The principles of right and wrong ex-

ceed everything, including brotherhood" stated Bauer.

Gerard claims that at the time he did not know that the corpse was that of Anne Marie Fahey. Thomas simply told him that he had 'taken care' of someone who was trying to extort him. No one knows exactly why Gerard waited so long to come forward with his information, but it was said that prosecutors had been putting the heat on the younger Capano to confess what he knew about Fahey's disappearance. This after, Gerard and his wife faced child endangerment charges, after police raided their home and found drugs and weapons that were in an unlocked safe, in reach of their two small children.

Fahey, the scheduling secretary for Delaware's Governor Carper, was last seen having dinner with Capano in a posh Philadelphia restaurant, on the night of June 27, 1996. According to her diary, she was trying to end their three-year,

stormy, love affair, and prosecutors believe this is why Capano killed her.

It is alleged that Capano alluded arrest for so long because of a lack of evidence, and the friendships which he maintained with members of the Delaware legal system, from judges to local police officers. The Capano Family is known in Delaware as multi-millionaire developers, with many social and political connections, in contrast to Fahey, who comes from a working class Irish background. However, all of these factors became irrelevant when the FBI took over the investigation.

Dr. Richardson, Associate Professor of Psychology, believes that Capano felt he was above the law, probably because of his wealth and fame. "I think what it [the case] really shows is the whole glamorous, beautiful people syndrome has its morbid sides," related Richardson.

Dr. Espadas, Spanish Professor and Delaware resident, feels that Capano killed Fahey because he could not accept the fact she did not want to be with him, and he was accustomed to getting what he wanted. "I think he is as guilty as sin, but it has to be proven. I think they may have a hard time, because of the lack of evidence on Capano", stated Espadas.

Meanwhile, Thomas Capano is in Wilmington's Gander Hill Prison, awaiting trial. He and his lawyers decided not to accept a plea bargain, in which Capano would have pleaded guilty to a federal charge - kidnapping resulting in murder - that would have spared Thomas Capano the possibility of the death penalty. Now his fate will lay in the hands of the jury.

Background information from the internet, Phila. Inquirer, and Wilmington News Journal

Time To Procrastinate

by **Stephanie Palmer**
of the Grizzly

I'd like to teach the world to sing in perfect harmony. I'd like to help all Ursinus students find new and different ways to procrastinate during finals! (That line doesn't fit does it?! Heh-heh-heh)

Ursinus students suffered a tragic loss in the beginning of the year. We lost two great friends- Minesweeper and Solitaire. They were taken out of the computer labs by those academic computing tyrants! To arms fellow comrades, students and procrastinators. We need to find new and better ways to procrastinate. We need to find a way to deal with writer's block. We need to find a solution with endless possibilities. We need ... we need to surf the NET!! (a light bulb goes off and the Stars Wars theme plays in the background.)

This cry goes out to all the

pseudo hackers! What are the cool websites that can help us clear our minds and gain insight when writing those term papers at the last minute. Well, with the help of some friends and a few freaks I was able to find out about a few websites that most people seem to enjoy.

A website my friend recently discovered is www.jopardy.com. This page is the coolest. If you have the right computer and speakers the Jeopardy! theme song plays as the site opens up. If you are a new user they tell you to sign in and select a password. The best thing is that its free! You don't have to enter in you credit card number in order to play. You can play regular jeopardy or college jeopardy. Do you think you have what it takes to play? If not you can always play Wheel of Fortune which is just a click away. Now, on the P.E.T.S. meter (Procrastination Estimated Time Scale). Jeopardy! takes about 10 minutes to play or 20 if you don't

think you are dumb enough after the first time.

Another cool website that my mother showed me is not for the squeamish. This website is www.rotten.com. Anything and everything that is utterly horrible and disgusting is on this page. There was a picture of Mr.

"... slack off, procrastinate and do a little studying."

Bobbit's road side penis and people with elephantiasis of all body parts. Would anyone like to see a testicle that weighs FIFTY pounds? I thought so! Well this is the site for you. The P.E.T.S. meter gives this site about 5 minutes. It's pretty gross, but it definitely puts your mind back on your paper.

Of course everybody's favorite

cartoon is on the Net. South Park is located in www.comedycentral.com. Those little rascals have their own games and cute graphics. It is very eye pleasing. You can build Michael Jackson's baby (with the right equipment) or you can check out some of the other comedy central shows. You can also read your horoscope and purchase merchandise. (Tip: I don't recommend sending your credit card number through the computer. You could end up with twenty magic lip sex toys!) The P.E.T.R. meter (oops!) P.E.T.S meter gives this site about 15 minutes. The novelty wears off soon.

There are also thousands more websites to choose from. People who like games can download their hearts away at www.happypuppy.com. They have over 500 games such as Tomb Raider, Quake and Diablo. Another game site is www.classicgames.com. You can play poker, chess, bridge, black-

jack, and checkers with other people around the country who feel like killing time. The P.E.T.S. meter gives these sites a WARNING!. They are great big humungazoid time suckers. Play at your own risk!

There are more groovy sites on the net. If you have trouble finding sites you can always go to Yahoo! or Net Search and look up any topic. One fun thing to do is find out who the other people in the world are that have websites with your name. I found out that there is lady named Stephanie Palmer who writes awful poetry about nature. She sucks!

You can also go to the Ursinus Homepage. You can learn about courses, read about the college's history, or send e-mail bombs to the president (that's a joke!).

So, slack off, procrastinate and do a little studying. But when you fail your test and your paper sounds like Dr. Seuss remember the Daily Double you got right while writing it.

Have Faith

by **Arathi Reddy**
of The Grizzly

There are many out there who do not believe in the power of prayer, they think that it is simply a waste of time and energy. If it is such a waste of time, why do so many people around the world do it and see and feel results from it?

Many people do not pray because they do not believe in it. They feel as though prayer is just "speaking to yourself and giving yourself a pep-talk to make things happen." Another person told me that "prayer has nothing to do with a god or a higher power, it is instead thought control which forces you to believe in something. And if something happens people want to say it is because of prayer."

Personally, I believe that prayer is more than just a "pep-talk" or thought control. Prayer, no matter what religion you are, or are not, has the power to do miracles in one's own life or someone else's.

Can prayer, faith and spiritual-ity really improve a person's

physical health? A growing and surprising body of scientific evidence says they can.

A 1995 study at Dartmouth-Hitchcock Medical Center found that one of the best predictors of survival among 232 heart surgery patients was the degree to which the patients said they drew comfort and strength from religious faith. Those who did not have faith, had more than three times the death rate of those who did. Another survey on blood pressure and depression showed that people who regularly attend religious services have been found to have lower blood pressure, less heart disease, lower rates of depression and generally better health than those who don't attend.

"People, a growing number of them, want to examine the connection between healing and spirituality," says Jeffrey Levin, a doctor at Eastern Virginia Medical School. More and more medical schools are adding courses on holistic and alternative medicine with titles like "Caring for the Soul."

The following is a telephone poll of 1,004 Americans taken for TIME/CNN in June of 1996.

DO YOU BELIEVE:

In the healing power of personal prayer? (YES 82% NO 13%)
Praying for someone else can help their illness? (YES 77% NO 21%)
God sometimes intervenes to cure people with a serious illness? (YES 77% NO 18%)
Doctors should join their patients in prayer if the patient request it? (YES 64% NO 27%)

By looking at this survey one can see how many prayer believers there are. It is pretty amazing to think that so many people have so much faith in something that is non-factual, intangible and invisible. Prayer does help in ways that are inexplicable, kind of like a little miracle. Try it sometime, it could make you a believer also.

*** The information presented comes from TIME Magazine, June 19th 1996 under "Faith and Healing."

Horoscopes

by Carolyn Harfman
of The Grizzly

Scorpio the Scorpion (Oct.21-Nov.20) - The Sun in your sign and the Moon in Leo is putting you in a pretty good position to ask for a raise. A person in authority is in a generous mood, ask for what you have been wishing for...you will get it. All of the hard work you have been doing is paying off. Take the weekend and relax.

Sagittarius the Archer (Nov.21-Dec.20) - The Sun in the last few degrees of Scorpio and the Moon fully in Leo puts you at odds this week. Both are diametrically opposed. They possess leadership qualities that you have been trying to establish for yourself. You have to choose which one to go with. Go with your gut. A manipulative friend is at it again...tell him no and he will back off for good.

Capricorn the Goat (Dec.21-Jan.20) - You have been spending more than you are saving. Remember the holidays are just around the corner and with no cash to spare you need to go on a spending diet. A significant other from your past will try to reemerge. Don't buy into empty promises...they are never going to become real.

Aquarius the Water Bearer (Jan.21-Feb.20) - You are stuck between a rock and a hard place. You don't

know whether to follow the rules or show a little imagination. Imagination always makes life more fun! This weekend use that insightful mind of yours to think of an unusual excursion. The unexpected is just around the corner.

Pisces the Fish (Feb.21-Mar.20) - Work is what you have been up to. It is getting to be the most important aspect of your life. Let loose and go with the flow this weekend. A roadtrip would be the answer to the unnecessary stress that you have been putting on yourself.

Aries the Ram (Mar.21-Apr.20) - The moon in Leo is bringing out your energetic side. Don't put that energy to waste, use it to work off that tension that has been building. Your mental strength is also increasing. Serenity is what you have been working for and you finally achieved it. Take the weekend off to relax some more... and think of interesting ways to burn off that energy.

Taurus the Bull (Apr.20-May19) - Conflicts are surrounding you. Try to stay out of them, or you will find yourself in the middle of World War III. Don't be pushed into going against your good judgment, it has worked for you so far. Put your stubbornness aside this weekend and go with what others want to do...you can't get your way all of the time.

Gemini the Twins (May 21-June 20) - You and your friends can over-

come anything. Work together and you will be able to solve that pesky problem that has been hanging over your heads. More heads are better than one. This weekend stay in with friends and let loose.

Cancer the Crab (June 21-July 20) - Staying involved is all you have been thinking about. Putting your nose in where it doesn't belong can get you in a lot of trouble. This week concentrate on minding your own business. You are the most important person to yourself anyway. This weekend catch up on building work.

Leo the Lion (July 21-Aug.20) - Venus is controlling your world this week, which means you are in the right position to start a new relationship. Mars is coming into your sign at the end of the week, moving you to a more stable balance of work and fun. This weekend hang out with some new friends.

Virgo the Virgin (Aug.21-Sept.20) - The battle for your destiny is still raging between Leo and Scorpio. Whoever wins the outcome is good. You are entering a major crossroad in your life. Choose the path that will make you stronger. This week put time into old friendships, every now and then they need some re-energizing.

Libra the Scales (Sept.21-Oct.20) - You're playful mood has had a bad effect on your workload. Procrastination has been the name of your game this past week. This week concentrate on your work and you will be able to hang out on the weekend.

Foreign Correspondence

by Jay Wilkes and
Lauren Newkirk
of The Grizzly

Good day, lads and lassies. Or should I say "good evening"? Sitting in Wismer or Zack's over your burgers and fries, you all may not realize that there are several of us over in Europe who are recovering from the weekend as well, only we're 5 or 6 hours ahead of you! Along with two other Ursinus students and over 300 Americans, I made the crazy decision to leave Philly cheese steaks (in the case of Ursinus students), Natty Lites (um, wait) and full-length beds in return for fish and chips, single malt whisky, and small, barely heated flats. That's right — I'm in Edinburgh, Scotland for the fall term. I can tell you now that there's more to this city, and to Scotland, than simply poor substitutes for American culture and a bunch of skinny, underdressed lads running around shooting up heroin...

When I arrived in Edinburgh (pronounced "Edin-burra" in Scots), I was simultaneously enthralled and dismayed. My romanticized version of Scotland included kilted men blowing carefully into bagpipes on street corners, of fog and rain and gale-force winds buffeting small island fishing villages, of purple moors and Mel Gibson, blue-faced and brave, waving his longsword through the mid-sections of Englishmen.

This is not what I witnessed. I find the city air is polluted (Edinburgh is one of the heaviest polluting cities in Britain) and smells of yeast and barley from the huge McEwan's Brewery downtown. On my street, which is one block away from Edinburgh Castle itself, I witness loads of homeless either drunk, asking for change, or sleeping in doorways. The streets, although cleaned daily, are heavily littered, dark and gloomy. Any "real" Scottish locals I find in pubs outside the city center, which houses the University of Edinburgh. And they're all English and rather wealthy even by American standards.

Then I discovered that my four flatmates were English boarding school girls. My flat was freezing (62 degrees), and was a whole 10 minutes away from mail campus. I also realized that British television was not as entertaining as American programming, and their food not as tasteful as "Philly" steaks! What ever happened to the hot dog? The gallon of milk? Real ketchup? What was a spoiled American suburbanite to do??

Really, this story has a happy ending, but must be continued next week when Andy White, another senior in denial, describes "Auld Reekie." He can tell you about fly fishing in the Highlands and the club scene — one of the best in Britain. It's been the best experience of my life so far, and E-burgh's one of the coolest cities in Europe, so stay tuned...

What's Up In Wellness

by Tricia Murnane
of The Grizzly

Mononucleosis, called "mono" for short is an illness that can be caused by several agents. The Epstein-Barr Virus causes more than 95% of the cases that are diagnosed in adolescents and adults. Mono is commonly transmitted through saliva, which is why it is sometimes referred to as the kissing disease. The signs and symptoms of mono usually will not appear for 4 to six weeks after the initial infection.

Once mono finally appears the most common symptoms are: sore throat, fatigue, swollen glands, fever, muscle aches, and sometimes a skin rash. Often times, the spleen will become enlarged. All of these symptoms do not need to be present for a person to have mono, but if any of these symptoms appear and persist, it would be a good idea to seek medical attention.

Mono is usually tested for with a routine blood test. There are no specific medications for mono, so a doctor will usually just treat the symptoms. In most cases a person that is infected with mononucleosis will be up and about in two weeks. The actual "sick time" varies in every case. For very bad cases, bed rest is very important.

One thing to be aware of though, is that it is ok to return to normal everyday activities as long as they are not rigorous physical activity or contact sports. One must be careful because of the enlarged spleen.

Since mono is transmitted through saliva, it is not important to "quarantine" a person with the illness. It is very rare for a person to contract mono through casual contact. This is important to remember in case your roommate is ever diagnosed with the illness. You should also be aware that mononucleosis can stay in the system, without symptoms, for up to a year after the initial infection.

If you have any questions about mono, feel free to stop in at the Wellness Center for information.

"Like Visiting an Old Friend"

by John Shoen
of The Grizzly

Last week at Ursinus the classic tale of Oedipus was brought to life in our own Ritter Theater. The new musical version of Oedipus is set in Thebeville, West Virginia, and the "fun and entertaining" cast of characters, made up of our own U.C. students, were fortunate enough to have Bob Johnson, the play's author, come to see the production.

Mr. Johnson was "thrilled to see a cast who looked like they were having fun," and said that watching Protheatre perform Oedipus was

"like visiting an old friend." He was very satisfied with the show, and joined the actors after Saturday's show to celebrate a job well done.

The play proved to be very entertaining, and added modern twists to some old ideas. From virtual infanticide to dancing lesbians in the N.R.A., Mr. Johnson's propensity for creative metaphors made the play a joy to watch.

The next stop for Oedipus is New York City, where Bob Johnson hopes to see it play to some varied audiences as it opens in the Wings theater, an off-off Broadway house. After the show runs in the Wings, Johnson wants to transfer it to another off-off Broadway house for and open ended run.

**FROM THE
SIDELINES**

**by Kevin McGovern

What a difference a couple of weeks makes.

I thought that at this stage of the game the Eagles would be trying to figure out who to draft with their lottery pick. But low and behold, the Eagles are in the hunt for the division title. How?

Well, they finally put in a QB who is not a smuft and who can throw the deep-out. Also, they signed special teams GOD Randy Kinder who can cover kicks and punts.

Bobby Hoying has been nothing short of spectacular. he looks like a future AllPro.

Despite the fact that he has looked this good, I would like everyone to remember that Ty Detmer looked impressive in his first three games as well. I think he is going to be good, but I am not ready to put him in the Hall of Fame. Let's just hope he continues to develop.

Despite some reservations, I think Hoying can lead the Eagles to the divisions title. If the Eagles win their last three games they will win the division.

I will go on record right now by guarantee that the Eagles will beat the Giants. The game is at the Vet and the Giants cannot put points on the board. The Redskins are hurting; Gus Ferotte is out for the season, and Terry Allen has a broken thumb.

The game that sacres me most is the Falcons -- they can put points on the board and they lead the league in sacks.

Anyway, it will be interesting...

HERE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!**

NCAA Preview: Bishop's Best Bets

**by Rob Bishop
of The Grizzly**

Around this time of year the shiny dome of Dick Vitale appears everywhere on television. The sight of that face means one of two things: that college basketball is in swing, or he is now doing diaper commercials. It is a more likely chance that college basketball is in season and the top teams are beginning to play.

So get the polls ready and the brackets set up for the start of another exciting, unpredictable year.

Of course there are the usual elites: Duke, Kansas, North Carolina, and the National Champs Arizona to fill the top spots every year.

The 97-98 season will bring many changes for plenty of college teams.

The absence of Dean Smith and Rick Patino will be dearly missed in college ball. Tubby Smith will replace Patino at Kentucky, who was a proven head coach at Georgia. Dean Smith's assistant coach at North Carolina Bill Guthridge has the honor of taken over the position of the winningest head coach in college history.

Michigan also begins the season with a new head coach in Brian Ellerbe, in place of the basketball illiterate Steve Fisher.

Each of these new coaches should have no problem holding the level of their team's play to the customary high standard that has been set forth in the past.

As for the top players these coaches have the luxuries to teach, it is an impressive line-up of extraordinary talent throughout the country. Here are my picks for First Team All-American.

Raef Lafrentz was an All-American last year for Kansas and there is no reason why he won't be this

year. At 6'9" he can shot from 15 feet out, as well as take it strong to the basket. He has the tools to be a big-time power forward in the NBA. Look for him to receive the Player of the Year award.

Antwan Jamison was also an All-American last year for Dean Smith, but will the change in coaches effect his style of play, I doubt it. He is an all around force in the paint. Jamison will need teammates Shermon Williams and Vince Carter to hit outside shots to open it up inside against opposing teams compact defenses.

Vince Carter will be the key to Carolina's success. When this Jordanesque talent is playing to his abilities he is one of the top players in the country. It has been difficult for him to get adapted to college ball, but this is the year he will explode into the spotlight.

Keon Clark is a 7-foot center that not too many people on the east coast know about, mainly because the only time UNLV is on TV is at 1 o'clock in the morning.

If you get a chance to see him you will immediately be able to pick out the lanky but athletic Clark. He averages about 7 blocked shots and 10 dunks per game. When he comes back from his 11-game suspension the rims will be rocking once more.

Mike Bibby led his Arizona Wildcats to a NCAA Championship last year as a freshmen, and proved to the world that he was years ahead of his age.

This 6'1" point guard has the ability to be playing in the NBA as I type. No freshmen should come into college games and control them the way Bibby did last year. His toughness will carry his strong team a long way, but they won't

be as fortunate to have teams rolling over for them.

Paul Pierce a teammate of Raef Lafrentz and together they will be an unstoppable duo. Pierce is 6'7" with a huge wingspan that helps him play even bigger. He has exceptional range from beyond the arc and slashes like he is a point guard. He can do pretty much anything coach Roy Williams asks of him.

Brian Earl is the superstar point guard for the Princeton Tigers. In the last four tournaments Princeton has played in past two years, he has gotten three of the MVP awards. He was second in the nation in 3-point field goals last year and was one of the top assistmen in the Ivy league.

His 6'2" 176 frame is feared throughout the country, which helps him post up most of the guards he is matched up against. He is an all around consistent player who rarely commits a turnover. This proficient style of Princeton ball will help them to be a top contender for the National Championship this year.

As for the teams these impressive athletes play for, they are all stacked high on the list of my top 25 preseason poll. The usual powerhouse teams are still up leading the pack as they do every year, but there could be some surprises on this list that would even leave Dicky V speechless.

The few uncommon teams that are represented on the top 25 poll may seem out of the ordinary, but once March Madness comes around all of these teams will join the ranks of the elite, proving their status as top dogs in the NCAA.

**BISH'S
TOP 25**

1. KANSAS
2. DUKE
3. ARIZONA
4. N. CAROLINA
5. TEMPLE
6. MICHIGAN
7. PRINCETON
8. UCLA
9. S. CAROLINA
10. PURDUE
11. KENTUCKY
12. NEW MEXICO
13. UTAH
14. XAVIER
15. UCONN
16. STANFORD
17. FRESNO STATE
18. ST. JOESPH'S
19. CLEMSON
20. IOWA
21. MARYLAND
22. LOUISVILLE
23. INDIANA
24. OKLAHOMA
25. ARKANSAS PINE BLUFF

Soccer Seniors Reflect on Disappointing Season

**by Jay Wilkes
of The Grizzly**

1997 marked the end of six seniors men's collegiate soccer careers.

For four years, five of the six seniors dedicated part of their fall semesters to the men's soccer team. They gave all their efforts and will truly be missed next season.

I had a chance to talk with some of the seniors and asked them what they thought of the end of their careers.

Scott King said, "It's a shame this season was my last, especially how it went, but, I still enjoyed playing."

King also said that this year was probably the last time he would play on a competitive soccer team. However, he said that if the opportunity presents itself, he would gladly play again. Regardless, Scott gave a great effort this season even if it was his last.

Vince Milano and Pat Vesay had similar feelings about the season. Both are glad they played, but wish it had gone better. However, they both agree that they need and plan to enjoy some time away from the game.

Milano said, "I may not play right away, but I plan to get my foot in wherever I can."

"I plan to rest for now and enjoy the off-season," added Vesay.

The time they are away may vary for both of them, but they both want to share their knowledge of soccer. Both plan to coach at some point in their futures.

Kerim Oncu is the last senior I was able to talk to about the season. He thought this may be the last competitive team on which he play. He doesn't think he will coach in the future, but hopes to have children who will play soccer.

If he does, he said, "I hope my kids might play and I could live vicariously through them."

**CONGRATULATIONS
TO ALL OUR FALL
ATHLETES!**

**THANKS
FOR ANOTHER
GREAT SEASON!**
