

Brussels, August 25, 2011

Dear Colleague,

Thank you very much for your interest in my music and research! The themes for my dissertation, *Materials, Meaning and Metaphor: Unveiling Spatio-Temporal Pertinences in Acousmatic Music*, and the accompanying folio of acousmatic compositions were inspired and nourished by many, and diverse, sources. I hope that you enjoy listening and reading as much as I enjoyed composing and writing.

If you would like to present my music in a public venue and/or refer to my research in the context of your work, I would be delighted. Please contact me in advance if you wish to do so. Alternatively, I would be delighted to travel to your country to present my research and/or my music. Please contact me if you wish to plan such an event.

Thank you very much, again, for your interest in my music and research! Please don't hesitate to let me know if you have any questions. I would be happy to answer them.

I wish you a great listening and reading experience and look forward to hearing from you!

Kind regards,

Elizabeth Anderson, PhD
