## I. SUMMARY FINDINGS

This survey is based upon two sets of information. Your team firstly scored the questionnaire informing us of their desired characteristics of an “outstanding leader”. Secondly, they have each scored their perception of you across the same questions. The difference between the first and the second is what we call the “*degree of fit*”.

Under no circumstances do we state that you should work to an ideal degree of fit of 100%. We encourage diversity; we encourage leaders to lead and be themselves. On some occasions that may mean leading in a way your team feel uncomfortable with and that may be totally appropriate.

What we do strongly promote however, is that leaders with a very low *degree of fit* will struggle to create change, will struggle to inspire and will find it difficult to motivate and develop their team.

We strongly encourage you to consider the areas where there are *gaps* and work with your team to either bridge those gaps or to communicate to your team so that there is a common understanding of why you lead in the way you do. Everybody is entitled to have their perception regardless of whether it is right or wrong. Your responsibility is to know what that perception is and manage it accordingly.

The information contained in this report is drawn from data received from the following contributors. The names are sorted alphabetically and do not represent the same sequence as shown later in this report. Only those that responded to **all** parts of the questionnaires could be incorporated.

*David Peterson*  
*Fred Davidson*  
*Hannah Adamson*  
*Harry Potter*  
*Katherine Ward*  
*Lisa Hart*  
*Peter Black*  
*Susan White*  
*Tom Jones*  
*Vikki Thompson*

The first table below shows the 5 categories that your group scored the highest. These are the most important aspects about leadership in their view.

The score represents the average of the group. The percentages show the “degree of fit” calculated from their perception of you. For example, #12. Integrity scored a fit of 87.0% and an average of 6.9. The higher the percentage, the higher the degree of fit between what your team wants from a leader and their perception of you. From our experience, scores of less than 80% may need some attention. The scores we have seen range from a low 60% to a high 90%.

| <b>TABLE 1</b>                        | <b>Average Score for an Outstanding Leader</b> | <b>Your Degree of Fit</b> | <b>CARGILL LEADERS</b> |            |                |
|---------------------------------------|--|---------------------------|------------------------|------------|----------------|
|                                       |  |                           | <b>High</b>            | <b>Low</b> | <b>Average</b> |
| 1. #12. Integrity                     | 6.90   | 87%                       | 96%                    | 36%        | 84%            |
| 2. #16. Performance Orientated        | 6.60   | 92%                       | 96%                    | 56%        | 84%            |
| 3. #5. Charismatic II - Inspirational | 6.56   | 85%                       | 93%                    | 30%        | 77%            |
| 4. #4. Charismatic I - Visionary      | 6.47   | 81%                       | 95%                    | 27%        | 78%            |
| 5. #8. Decisiveness                   | 6.03   | 86%                       | 93%                    | 48%        | 81%            |

The second table represents the characteristics that your group consider to **inhibit** effective leadership and that they score with a low average, basically implying they do not want this characteristic from their leader.

The percentages show the degree of fit. For example, if they do not want this characteristic and their perception is you do not display it, this would result in a high degree of fit 85% plus

| <b>TABLE 2</b>            | <b>Average Score for an Outstanding Leader</b> | <b>Your Degree of Fit</b> | <b>CARGILL LEADERS</b> |            |                |
|---------------------------|--|---------------------------|------------------------|------------|----------------|
|                           |  |                           | <b>High</b>            | <b>Low</b> | <b>Average</b> |
| 1. #13. Malevolent        | 1.38   | 87%                       | 98%                    | 26%        | 87%            |
| 2. #18. Self-Centred      | 1.48   | 83%                       | 91%                    | 32%        | 79%            |
| 3. #2. Autocratic         | 1.68   | 77%                       | 97%                    | 25%        | 77%            |
| 4. #15. Non Participative | 1.73   | 83%                       | 91%                    | 22%        | 77%            |
| 5. #10. Face Saver        | 2.43   | 67%                       | 89%                    | 50%        | 74%            |

**DIAGRAM 1**

This diagram shows **your** definition of an Outstanding Leader

*Average Scores for an Outstanding Leader - Mary Smith*

**DIAGRAM 2**

This diagram shows your **team's** definition of an Outstanding Leader

*Team's Outstanding Leader Scores*

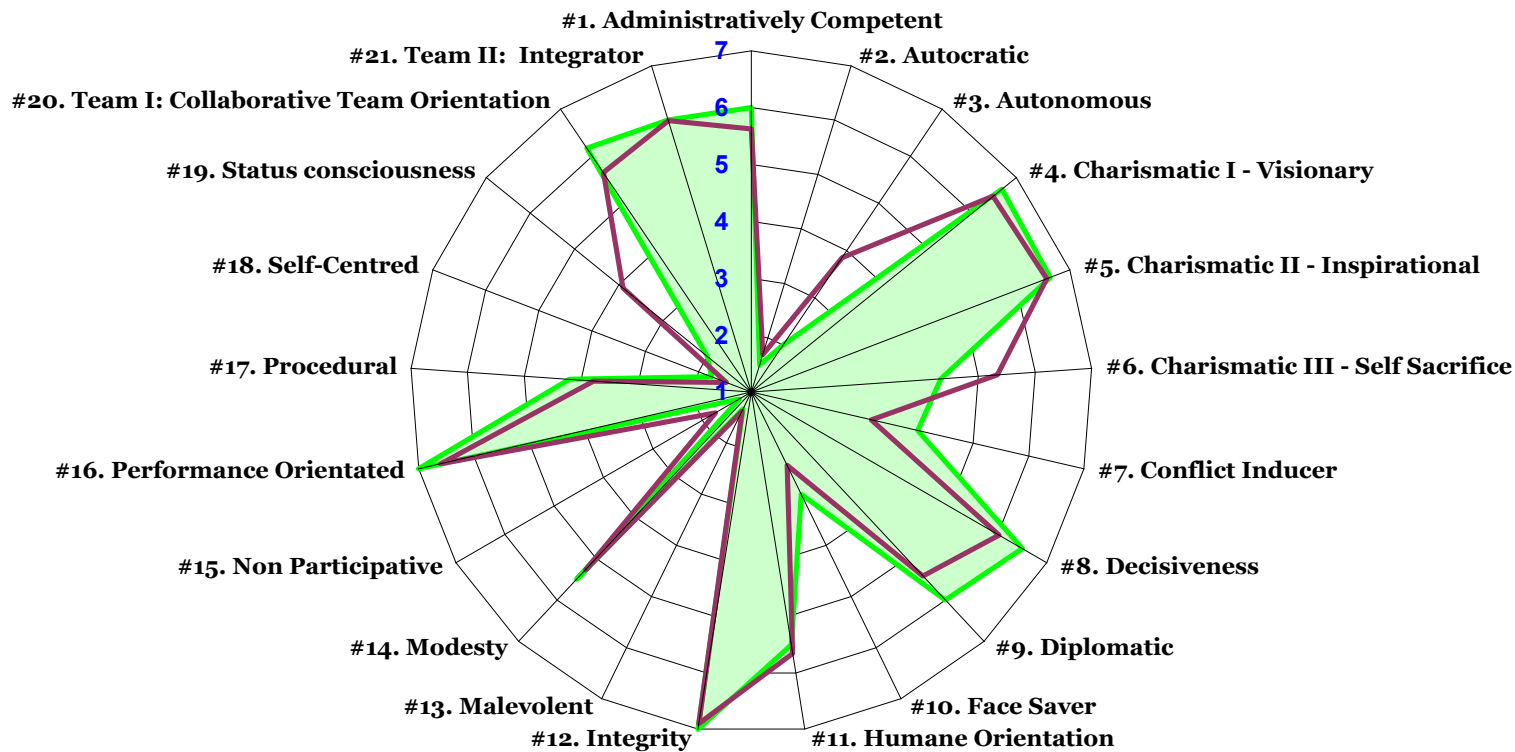

Graph lines show average (square box) and -1 standard deviation (lower point on line) and +1 standard deviation (top of the line)

**DIAGRAM 3**

This **Spider Diagram** contrasts your leadership values with your team's values. You completed a questionnaire outlining your desired leadership characteristics. Your team did exactly the same. Diagram 3 shows the two sets of scores. Research suggests that leaders will find it more difficult to lead a group successfully where some core values are significantly different e.g. Integrity. From Diagram 3 you can determine where there are similarities and differences.

## Your Leadership Values versus Your team's Leadership Values

Your scores
  Your team's scores

**DIAGRAM 4**

This diagram shows your team's perception of **YOU**

*Team's Perception of Mary Smith*

Lines show average (square box) and -1 standard deviation (lower point on line) and +1 standard deviation (top of the line)

**DIAGRAM 5**

This diagram is a combination of Diagrams 2 & 4. Each pair of lines represents your team's view of an outstanding leader and their perception of you. The difference between the averages (boxes) represents to fit between their desires and their perception of you.

*Degree of Fit - Mary Smith*

Lines show average (square box) and -1 standard deviation (lower point on line) and +1 standard deviation (top of the line)

## Leadership Fit Summary - Cargill Leader Summary

Over 200 leaders have participated in this questionnaire so far from 40 countries.

Many aspects of leadership is situational and making comparisons of leaders from around the world (based on this data) could be misleading, nevertheless below you will find the summary data from the database. Can I encourage you not to jump to conclusions without looking carefully into your situation first and ensuring you understand what your team are saying to you.

|   | <b>Your Score</b> | <b>----- C A R G I L L   L E A D E R S -----</b> |                    |                       |                            |

| #16. Performance Orientated                 | 92%               | 56%  | 96%                | 84%                   | 0.06                       |
| #17. Procedural                             | 78%               | 54%  | 91%                | 74%                   | 0.06                       |
| #18. Self-Centred                           | 83%               | 32%  | 95%                | 79%                   | 0.06                       |
| #19. Status consciousness                   | 79%               | 36%  | 95%                | 76%                   | 0.08                       |
| #20. Team I: Collaborative Team Orientation | 80%               | 34%  | 91%                | 79%                   | 0.09                       |
| #21. Team II: Integrator                    | 76%               | 30%  | 92%                | 79%                   | 0.07                       |

### **3. HIGH & LOW STANDARD DEVIATIONS**

There are some limitations with 'averaging' and to minimise them, the remaining sections of this report highlights specific questions, not groups, plus a standard deviation is shown in some areas.

Each of your team members scored the questionnaire on a scale of 1-7. Some areas resulted in a very common view amongst your team on their scores (a low deviation  $\leq 0.8$ ), however, some resulted in a wide spread of views (a high deviation  $\geq 1.5$ ). The following lists highlight 8 of these areas and the corresponding average scores of your team. At the extremes of the scaling, a score of 1 represents a behaviour or characteristic that your team feels **greatly inhibits** a person from being an outstanding leader, whereas a score of 7 represents a behaviour or characteristic that your team feels **contributes greatly** to a person being an outstanding leader.

#### **3.1 YOUR TEAM'S VIEW OF AN OUTSTANDING LEADER**

The list below is where your team have a common view across the whole group on what they desire from an outstanding leader:-

This list is sorted by standard deviation (ascending order)

##### **COMMON VIEW**

|   | <b>Avg</b> | <b>S. Dev</b> |
|---|------------|---------------|
| <i>105. Dishonest - Fraudulent, insincere</i>   | 1.0        | 0.0           |
| <i>16. Trustworthy - Deserves trust, can be believed and relied upon to keep his/her word</i> | 7.0        | 0.0           |
| <i>15. Sincere - Means what he/she says, earnest</i>  | 7.0        | 0.0           |
| <i>106. Hostile - Actively unfriendly, acts negatively toward others</i>                      | 1.1        | 0.3           |
| <i>88. Honest - Speaks and acts truthfully</i>  | 6.9        | 0.3           |
| <i>33. Arrogant - Presumptuous or overbearing</i>   | 1.1        | 0.3           |
| <i>24. Tyrannical - Acts like a tyrant or despot; imperious, dictatorial, authoritative</i>   | 1.1        | 0.3           |
| <i>11. Improvement-Oriented - Seeks continuous performance improvement</i>                    | 6.9        | 0.3           |

The list below is where your team have widespread views of what defines an outstanding leader. All these have high standard deviation. You will find it a challenge to satisfy their desires from a leader in these areas because they vary so much.

This list is sorted by standard deviation (descending order)

### **DIFFERING VIEW**

|   | <b>Avg</b> | <b>S. Dev</b> |
|---|------------|---------------|
| <i>25. Integrator - Integrates people or things into cohesive, working whole</i>  | 5.5        | 2.3           |
| <i>27. Provocateur - Stimulates unrest</i>  | 2.9        | 2.3           |
| <i>8. Independent - Does not rely on others; self-governing</i>   | 3.9        | 1.9           |
| <i>14. Risk taker - Willing to invest major resources in endeavours that do not have high probability of being successful</i> | 5.0        | 1.8           |
| <i>6. Intra-group competitor - Tries to exceed the performance of others in his or her group</i>                              | 4.1        | 1.8           |
| <i>7. Autonomous - Acts independently, does not rely on others</i>  | 3.5        | 1.7           |
| <i>1. Diplomatic - Skilled at interpersonal relations, tactful</i>  | 5.8        | 1.7           |
| <i>41. Formal - Acts in accordance with rules, convention and ceremonies</i>  | 4.5        | 1.6           |

### **3.2 YOUR TEAM'S PERCEPTION OF YOU**

The two lists that follow now consider your group's perception of you and this shows where they hold a common view (low deviation) of your performance and secondly where they hold a differing view (high deviation). The following lists highlight 8 of these areas and the corresponding average scores of your team.

Some may look negative, however, your team's preference for an outstanding leader may have been 1 (inhibits outstanding leadership) and in their perception of you all scored 1 (no evidence), therefore all having a common view.

See Appendix 1 for all 112 questions.

**COMMON VIEW**

This list is sorted by standard deviation (ascending order)

|   | <b>Avg</b> | <b>S. Dev</b> |
|---|------------|---------------|
| <i>106. Hostile - Actively unfriendly, acts negatively toward others</i>                        | 1.1        | 0.3           |
| <i>105. Dishonest - Fraudulent, insincere</i>   | 1.1        | 0.3           |
| <i>97. Ambitious - Sets high goals, works hard</i>  | 6.6        | 0.5           |
| <i>96. Performance-oriented - Sets high standards of performance</i>                            | 6.6        | 0.5           |
| <i>37. Secretive - Tends to conceal information from others</i>                                 | 1.4        | 0.5           |
| <i>80. Excellence-Oriented - Strives for excellence in performance of self and subordinates</i> | 6.5        | 0.5           |
| <i>63. Non co-operative - Unwilling to work jointly with others</i>                             | 1.5        | 0.5           |
| <i>55. Distant - Aloof, stands off from others, difficult to become friends with</i>            | 1.5        | 0.5           |

**DIFFERING VIEWS**

This list is sorted by standard deviation (descending order)

|  | <b>Avg</b> | <b>S. Dev</b> |
|--|------------|---------------|
| <i>54. Non-explicit - Subtle, does not communicate explicitly, communicates by metaphor, et allegory, et example</i> | 3.0        | 2.1           |
| <i>8. Independent - Does not rely on others; self-governing</i>  | 4.4        | 2.0           |
| <i>72. Indirect - Does not go straight to the point, uses metaphors and examples to communicate</i>                  | 2.6        | 1.9           |
| <i>62. Egotistical - Conceited, convinced of own abilities</i>   | 3.0        | 1.9           |
| <i>74. Self-effacing - Presents themselves in a modest way</i>   | 3.9        | 1.8           |
| <i>89. Domineering - Inclined to dominate others</i>   | 4.2        | 1.7           |
| <i>18. Intra-group Conflict Avoider - Avoids disputes with members of his or her group</i>                           | 3.9        | 1.7           |
| <i>111. Individualistic - Behaves in a different manner than peers</i>   | 3.3        | 1.7           |

#### **4. MAJOR & MINIMAL DIFFERENCES**

The model that underpins this leadership questionnaire and highlights the key differences between what your team desire from a leader and their perception of you. Appendix 1 shows how these differences have been calculated – the larger the number, the greater the difference in scores.

##### **4.1 MAJOR DIFFERENCES**

The list below shows the areas that have a larger difference when comparing the average scores of your team members:-

|  | <b>Difference</b> |
|--|-------------------|
| <i>89. Domineering - Inclined to dominate others</i>   | 2.50              |
| <i>2. Evasive- Refrains from making negative comments to maintain good relationships and save face</i> | 2.10              |
| <i>18. Intra-group Conflict Avoider - Avoids disputes with members of his or her group</i>             | 2.00              |
| <i>22. Clear - Easily understood</i>   | 2.00              |
| <i>25. Integrator - Integrates people or things into cohesive, working whole</i>                       | 1.90              |
| <i>46. Irritable - Moody; easily agitated</i>  | 1.80              |
| <i>53. Egocentric - Self-absorbed, thoughts focus mostly on one's self</i>                             | 1.80              |
| <i>33. Arrogant - Presumptuous or overbearing</i>  | 1.70              |
| <i>51. Compassionate - Has empathy for others, inclined to be helpful or show mercy</i>                | 1.70              |
| <i>87. Patient - Has and shows patience</i>  | 1.60              |

##### **4.2 MINIMAL DIFFERENCES**

This list shows the areas with the smallest differences, which implies that you are performing in a way your team require:-

|  | <b>Difference</b> |
|--|-------------------|
| <i>105. Dishonest - Fraudulent, insincere</i>  | 0.10              |
| <i>106. Hostile - Actively unfriendly, acts negatively toward others</i>   | 0.20              |
| <i>97. Ambitious - Sets high goals, works hard</i>   | 0.20              |
| <i>59. Cunning - Sly, deceitful, full of guile</i>   | 0.20              |
| <i>29. Unique - An unusual person, has characteristics of behaviours that are different from most others</i>                   | 0.20              |
| <i>112. Ritualistic - Uses a prescribed order to carry out procedures</i>  | 0.30              |
| <i>93. Elitist - Believes that a small number of people with similar backgrounds are superior and should enjoy privileges</i>  | 0.30              |
| <i>70. Non-egalitarian - Believes that all individuals are not equal and only some should have equal rights and privileges</i> | 0.30              |
| <i>52. Subdued - Suppressed, quiet, tame (REVERSE SCORE)</i>   | 0.30              |
| <i>80. Excellence-Oriented - Strives for excellence in performance of self and subordinates</i>                                | 0.40              |

I suggest you look for common themes in the above lists and choose a selection to address over the next six months.

## **5. WHERE NOW?**

1. Thank your team for contributing. Please reiterate that the data is totally confidential and under no circumstances do you see their scores nor does anybody else. They receive no information from me formally, but we do offer to facilitate a session amongst your team to help you try and bridge these gaps.
2. As a **group** you need to gain commitment to making necessary changes. That includes YOU and THEM. It is not their responsibility to change, nor is it solely yours. The changes can occur in three ways.
  - (a) **YOU** making a shift in your style to be more of a leader they want you to be – it is too early to commit to specifics now but I suggest you consider them over the next 2 months and we agree a plan.
  - (b) **THEY** make the commitment to move in your direction and to do that they need to understand your motives and reason behind your leadership style.
  - (c) Agree that **differences** are healthy and they should be maintained.

I suggest we try and look for one area in (a), (b) and (c) to be the priority for the next 6 months and develop a plan.

I strongly encourage that you validate any conclusions you draw from this report, by obtaining factual examples of the behaviour(s) from some or all of the participants.

3. You may be considering creating a more thorough development plan for yourself and would like assistance with its creation and structuring. Please contact me if you would like help. We would need to come to some arrangement of the amount of time and an agreement on the costs that would incur, but I am available to assist in whatever way is feasible.

Thank you once again for participating. Under no circumstances do we share your data with anybody where you can be revealed. Your participation has given us access to a wide variety of nationalities and is part of access to 2,500 people from 40 countries in Cargill. We are now building up an interesting picture of what various nationalities aspire to have from their leaders.

Please let me know if you need any further help.

## APPENDIX 1 LEADER: Mary Smith

**Min / Max** - The minimum and maximum scores given by your team members in response to a particular question.

**Avg** - The average score from your team, calculated by dividing all of the scores given by the number of team members that responded.

**Difference** - Sum of the absolute differences between the Outstanding Leader score and the Leader Perception score for each respondent divided by the total number of respondents.

**S. Dev.** - Standard Deviation shows degrees of consistency ( $\leq 1$ ) or diversification ( $\geq 1.5$ , to max of 2.7).

|  | Team's view of an  |     |     | Team's Perception |     |     | Red>1.5 | S. Dev. |
|--|--------------------|-----|-----|-------------------|-----|-----|---------|---------|
|  | Outstanding Leader |     |     | of Mary Smith     |     |     |         |         |
|  | Min                | Max | Avg | Min               | Max | Avg |         |         |
| 1. Diplomatic - Skilled at interpersonal relations, tactful  | 1                  | 7   | 5.8 | 4                 | 7   | 5.8 | 1.20    | 1.5     |
| 2. Evasive- Refrains from making negative comments to maintain good relationships and save face                                | 1                  | 6   | 2.8 | 2                 | 6   | 4.1 | 2.10    | 1.4     |
| 3. Mediator - Intervenes to solve conflicts between individuals  | 4                  | 7   | 5.4 | 2                 | 7   | 4.8 | 1.00    | 1.1     |
| 4. Bossy - Tells subordinates what to do in a commanding way   | 1                  | 3   | 1.6 | 1                 | 5   | 2.7 | 1.20    | 1.3     |
| 5. Positive - Generally optimistic and confident   | 6                  | 7   | 6.8 | 5                 | 7   | 6.4 | 0.80    | 0.7     |
| 6. Intra-group competitor - Tries to exceed the performance of others in his or her group                                      | 1                  | 7   | 4.1 | 2                 | 7   | 4.8 | 1.50    | 1.5     |
| 7. Autonomous - Acts independently, does not rely on others  | 1                  | 6   | 3.5 | 2                 | 6   | 4.7 | 1.40    | 1.3     |
| 8. Independent - Does not rely on others; self-governing   | 1                  | 7   | 3.9 | 1                 | 7   | 4.4 | 1.10    | 1.7     |
| 9. Ruthless - Punitive; Having no pity or compassion   | 1                  | 2   | 1.3 | 1                 | 4   | 1.6 | 0.70    | 0.9     |

| 97. Ambitious - Sets high goals, works hard  | 6                  | 7   | 6.6 | 6                 | 7   | 6.6 | 0.20 | 0.4    |
| 98. Motivational - Stimulates others to put forth efforts above and beyond the call of duty and make personal sacrifices | 3                  | 7   | 6.2 | 4                 | 7   | 5.6 | 1.00 | 0.9    |
| 99. Micro-manager - An extremely close supervisor, one who insists on making all decisions                               | 1                  | 2   | 1.4 | 1                 | 5   | 3.0 | 1.60 | 1.4    |
| 100. Non-delegator - Unwilling or unable to relinquish control of projects or tasks                                      | 1                  | 2   | 1.3 | 1                 | 4   | 2.2 | 0.90 | 1.0    |
| 101. Avoids negatives - Avoids saying no to another when requested to do something, even when it cannot be done          | 1                  | 4   | 1.8 | 1                 | 6   | 3.1 | 1.50 | 1.4    |
| 102. Visionary - Has a vision and imagination of the future  | 5                  | 7   | 6.4 | 5                 | 7   | 6.1 | 0.90 | 0.8    |
| 103. Willful - Strong-willed, determined, resolute, persistent   | 5                  | 7   | 6.0 | 5                 | 7   | 6.0 | 0.60 | 0.5    |
| 104. Ruler - Is in charge and does not tolerate disagreement or questioning, gives orders                                | 1                  | 2   | 1.5 | 1                 | 5   | 1.9 | 0.80 | 0.9    |
| 105. Dishonest - Fraudulent, insincere   | 1                  | 1   | 1.0 | 1                 | 2   | 1.1 | 0.10 | 0.3    |
| 106. Hostile - Actively unfriendly, acts negatively toward others  | 1                  | 2   | 1.1 | 1                 | 2   | 1.1 | 0.20 | 0.4    |
| 107. Future-oriented - Makes plans and takes actions based on future goals   | 6                  | 7   | 6.6 | 5                 | 7   | 6.1 | 0.50 | 0.7    |
| 108. Good Administrator - Has ability to manage complex office work and administrative systems                           | 5                  | 7   | 5.9 | 3                 | 7   | 5.6 | 0.70 | 0.7    |
| 109. Dependable - Reliable (REVERSE SCORE)   | 1                  | 4   | 1.5 | 1                 | 3   | 1.9 | 0.80 | 0.7    |
| 110. Dictatorial - Forces her/his values and opinions on others  | 1                  | 3   | 1.4 | 1                 | 5   | 2.5 | 1.20 | 1.2    |
| 111. Individualistic - Behaves in a different manner than peers  | 1                  | 6   | 3.2 | 1                 | 6   | 3.3 | 1.00 | 1.1    |
| 112. Ritualistic - Uses a prescribed order to carry out procedures   | 2                  | 5   | 3.9 | 2                 | 5   | 3.6 | 0.30 | 0.9    |

### Notes on Diff and S. Dev. Columns

These columns should be read together.

- A low Diff with a low SD ( $\leq 1$ ) means a good fit and all agree
- A low Diff with a high SD ( $>1.5$ ) means a good fit, but a few team members have a differing view
- A high Diff with a low SD means that this is an issue for the respondents
- A high Diff with a high SD means that there isn't a consistent view regarding the behaviour

## APPENDIX 2 - GLOSSARY

The words below have been defined in connection with the Leadership Questionnaires completed for this survey. They are to assist the understanding of the context of the question.

|                 |   |   |
|-----------------|---|---|
| Ambitious       | - | Strong desire to succeed in their goals.  |
| Autocratic      | - | A person who believes they have absolute and unrestricted authority.  |
| Autonomous      | - | Acts in accordance with rules/principles of one's own choosing.   |
| Calm            | - | Under control, not easily excited or annoyed.   |
| Cautious        | - | Showing care, forethought   |
| Characteristics | - | The typical or distinguishing attributes and qualities of a person, group, action or thing.                                   |
| Compassionate   | - | Having a feeling of distress and pity for the suffering or misfortune of another, often including the desire to alleviate it. |
| Cunning         | - | Someone who is adept at subtle or deceptive planning/action.  |
| Dictatorial     | - | A domineering or overbearing ruler expecting obedience.   |
| Diplomatic      | - | Skilled in negotiating; tactful in dealing with people.   |
| Domineering     | - | Acts arrogantly, believes in own self-importance.   |
| Empathy         | - | Identification with or sharing of another's feelings, situation, or attitudes.  |
| Endeavours      | - | Strenuous or conscientious attempt to accomplish something.   |
| Evasive         | - | Avoids the issue.   |
| Fraudulent      | - | Acts with the intent to cheat.  |
| Humble          | - | Someone who is respectful and doesn't wish to have the attention or focus on them.  |
| Humility        | - | Not boastful about own status or accomplishments.   |
| Independent     | - | Not reliant on others for support.  |

## European Organisation Effectiveness

|                         |   |  |
|-------------------------|---|--|
| Individualistic         | - | A person whose characteristics are unique.   |
| Interpersonal           | - | Relationship between two or more persons.  |
| Intervenes              | - | Enters a situation so as to change what is happening.  |
| Intra-group competitor  | - | Creates rivalry to increase performance of group.  |
| Loyal                   | - | Shows steady faithfulness to team/peers/Company.   |
| Malevolent              | - | Wishing or doing evil to others; Nasty; Hateful.   |
| Mediator                | - | Obtains agreement to disputes.   |
| Mobilise                | - | Organise for a purpose.  |
| Modest                  | - | Having or expressing a relatively low or moderate opinion of own abilities.                                      |
| Morale                  | - | The emotional condition of a person or group, as indicated by the level of enthusiasm, confidence, cheerfulness. |
| Motive arouser          | - | Awakens motivation within their team.  |
| Norms                   | - | An established standard of behaviour.  |
| Organised               | - | Coordinated; arrange methodically.   |
| Participate             | - | Become actively involved; to share in activities.  |
| Refrains                | - | Holds oneself back from doing or saying something  |
| Risk averse             | - | Opposed to the possibility of incurring loss or misfortune.  |
| Risk taker              | - | A person who proceeds in an action with little regard to the possibility of danger or risk.                      |
| Rivalry                 | - | An instance of competing.  |
| Save face (face-saving) | - | Potentially acting inappropriately to maintain dignity or prestige.  |
| Worldly                 | - | Sophisticated; Interested in events outside of own province/country.   |

## **1. OVERVIEW**

The purpose this report is identify whether there has been any perceived change/shift, in your leadership style. If so, is it a positive or a negative shift. It aims to identify areas for you to think about with respect to your effectiveness as a Cargill Leader and whether further development in those areas should be considered.

### **Background**

We have taken information from your previous Leadership Fit Report and compared it to responses received by those you have recently nominated once more. We are asking you to review changes within the 21 categories. Additionally, we have identified the top 5 categories (those that are valued the most - 'contributing greatly'), and the bottom 5 categories (those that are least valued - 'greatly inhibiting') that your team desire from an effective Outstanding Leader.

Some of your scores will be higher than others. Each person has special areas of competence and strength, and each person has areas that are opportunities for more development. To use the feedback to your advantage, it is important that you do not react to lower scores with anger, hurt, denial or defensiveness. If there are questions/categories that are lower than you expect - we strongly suggest that you obtain verification to these behaviours prior to creation of an action/development plan.

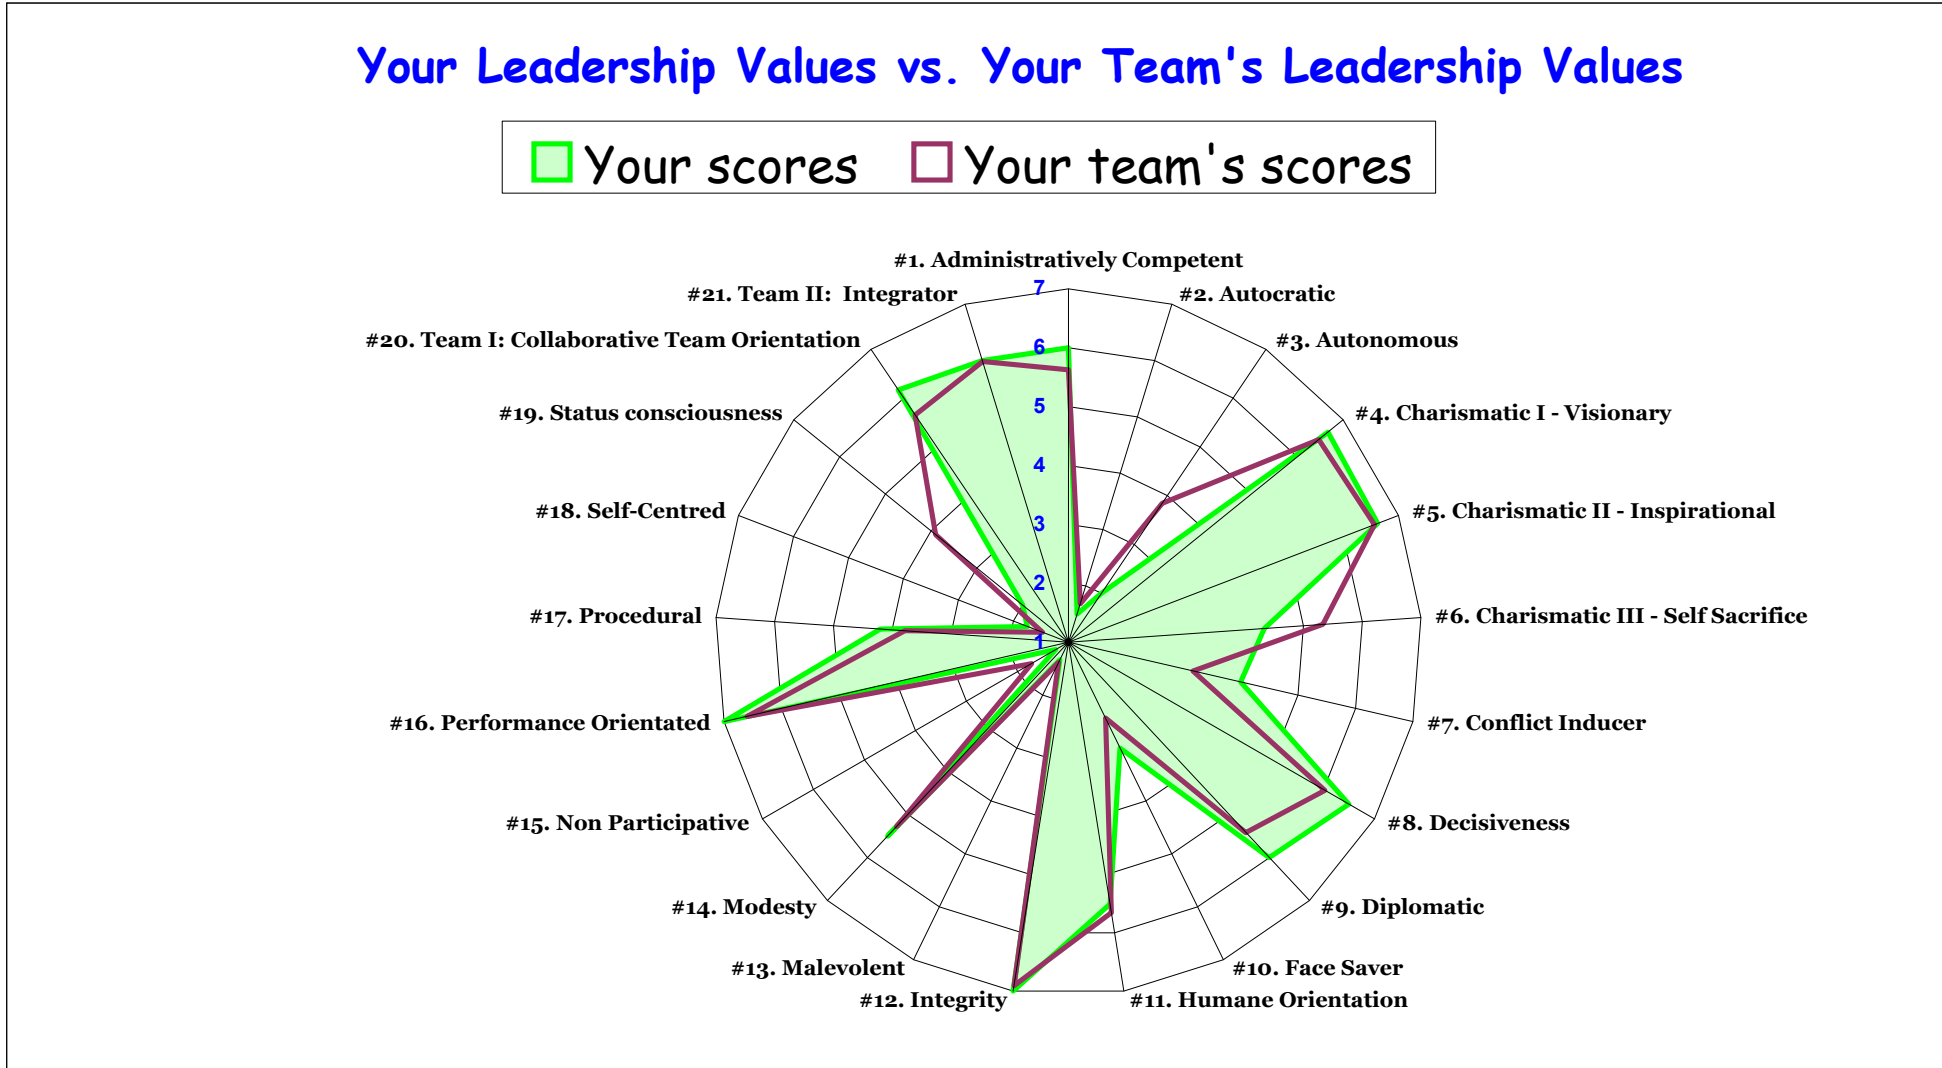

The information contained in this report is drawn from data received from the following contributors (the names are sorted alphabetically);

David Peterson\*\*  
Fred Davidson  
Hannah Adamson  
Harry Potter\*\*  
Katherine Ward\*\*  
Lisa Hart  
Peter Black \*\*  
Susan White  
Tom Jones  
Vikki Thompson\*\*

\*\* Denotes they have participated in the follow-up exercise

**DIAGRAM 1**

This **Spider Diagram** contrasts your leadership values with your team's values. You completed a questionnaire outlining your desired leadership characteristics. Your team did exactly the same. Diagram 1 shows the two sets of scores. Research suggests that leaders will find it more difficult to lead a group successfully where some core values are significantly different e.g. Integrity. From Diagram 1 you can determine where there are similarities and differences.

## 2. Have you Changed?

Table 1 shows the top five characteristics that your group consider to contribute to effective leadership. The score in the first column represents the average of the group. The percentages show the “degree of fit” calculated from their perception of you (previous and current). The higher the percentage, the higher the degree of fit between what your team wants from a leader and their perception of you. From our experience, scores of less than 80% may need some attention.

| <b>TABLE 1</b>                        | <b>Avge Score for an Outstanding Ldr</b> | <b>Prev. Degree of Fit</b> | <b>Current Degree of Fit</b> | <b>CARGILL LEADERS</b> |            |                |
|---------------------------------------|--|----------------------------|------------------------------|------------------------|------------|----------------|
|                                       |  |                            |                              | <b>High</b>            | <b>Low</b> | <b>Average</b> |
| 1. #12. Integrity                     | 6.90                                     | 87%                        | 94%                          | 96%                    | 34%        | 85%            |
| 2. #16. Performance Orientated        | 6.60                                     | 92%                        | 94%                          | 96%                    | 48%        | 84%            |
| 3. #5. Charismatic II - Inspirational | 6.56                                     | 85%                        | 88%                          | 93%                    | 26%        | 77%            |
| 4. #4. Charismatic I - Visionary      | 6.47                                     | 81%                        | 87%                          | 95%                    | 27%        | 79%            |
| 5. #8. Decisiveness                   | 6.03                                     | 86%                        | 89%                          | 93%                    | 48%        | 81%            |

The second table represents the characteristics that your group consider to **inhibit** effective leadership all of which have a low average, basically implying they do not want this characteristic from their leader.

The percentages show the degree of fit (previous and current). For example, if they do not want this characteristic and their perception is you do not display it, this would result in a high degree of fit.

| <b>TABLE 2</b>            | <b>Avge Score for an Outstanding Ldr</b> | <b>Prev. Degree of Fit</b> | <b>Current Degree of Fit</b> | <b>CARGILL LEADERS</b> |            |                |
|---------------------------|--|----------------------------|------------------------------|------------------------|------------|----------------|
|                           |  |                            |                              | <b>High</b>            | <b>Low</b> | <b>Average</b> |
| 1. #13. Malevolent        | 1.38                                     | 87%                        | 94%                          | 97%                    | 26%        | 87%            |
| 2. #18. Self-Centred      | 1.48                                     | 78%                        | 92%                          | 91%                    | 32%        | 79%            |
| 3. #2. Autocratic         | 1.68                                     | 77%                        | 87%                          | 97%                    | 25%        | 78%            |
| 4. #15. Non Participative | 1.73                                     | 83%                        | 84%                          | 91%                    | 22%        | 77%            |
| 5. #10. Face Saver        | 2.43                                     | 67%                        | 77%                          | 89%                    | 50%        | 74%            |

**DIAGRAM 2**

This **spider diagram** contrasts your Team's perception of your leadership style. They have completed a questionnaire scoring the "frequency" of 'behaviours/characteristics' they believe you portray. Once, approx. 12 months ago and secondly, during the last month. Diagram 2 shows the two sets of scores, averaging each main characteristic. From these you are able to determine where you've improved, remained constant or deteriorated.

## Your Team's perception of You: Previously vs. Current

■ Previous Perception   
 ■ Current Perception

## Leadership Fit Summary - Cargill Leader Summary

Over 200 leaders have participated in this questionnaire so far from 40 countries.

Many aspects of leadership is situational and making comparisons of leaders from around the world (based on this data) could be misleading, nevertheless below you will find the summary data from the database. Can I encourage you not to jump to conclusions without looking carefully into your situation first and ensuring you understand what your team are saying to you. The categories highlighted in **bold** correspond to the top 3 that contribute greatly to an effective leader and the bottom 3 that greatly inhibit effective leadership.

|   | <b>Your<br/>Prev<br/>Score</b> | <b>Your<br/>New<br/>Score</b> | <b>%<br/>Change</b> | ----- CARGILL LEADERS ----- |             |                |
|---|--------------------------------|-------------------------------|---------------------|-----------------------------|-------------|----------------|
|   |                                |                               |                     | <b>Low</b>                  | <b>High</b> | <b>Average</b> |

| #2. <b>Autocratic</b>                       | 77%                            | 87%                           | 9.3%                | 25%                         | 97%         | 77%            |
| #3. Autonomous                              | 71%                            | 66%                           | -5.4%               | 52%                         | 90%         | 71%            |
| #4. Charismatic I - Visionary               | 81%                            | 87%                           | 6.2%                | 27%                         | 95%         | 79%            |
| #5. <b>Charismatic II - Inspirational</b>   | 85%                            | 88%                           | 2.5%                | 30%                         | 93%         | 77%            |
| #6. Charismatic III - Self Sacrifice        | 71%                            | 71%                           | 0.1%                | 38%                         | 87%         | 74%            |
| #7. Conflict Inducer                        | 79%                            | 80%                           | 0.6%                | 51%                         | 91%         | 74%            |
| #8. Decisiveness                            | 86%                            | 89%                           | 3.4%                | 48%                         | 93%         | 81%            |
| #9. Diplomatic                              | 77%                            | 83%                           | 5.7%                | 30%                         | 91%         | 78%            |
| #10. Face Saver                             | 67%                            | 77%                           | 10.4%               | 50%                         | 89%         | 74%            |
| #11. Humane Orientation                     | 71%                            | 80%                           | 8.7%                | 38%                         | 92%         | 78%            |
| #12. <b>Integrity</b>                       | 87%                            | 94%                           | 7.3%                | 36%                         | 96%         | 84%            |
| #13. <b>Malevolent</b>                      | 87%                            | 94%                           | 7.0%                | 26%                         | 98%         | 87%            |
| #14. Modesty                                | 67%                            | 82%                           | 14.8%               | 29%                         | 90%         | 75%            |
| #15. Non Participative                      | 83%                            | 84%                           | 1.1%                | 22%                         | 91%         | 77%            |
| #16. <b>Performance Orientated</b>          | 92%                            | 94%                           | 1.6%                | 56%                         | 96%         | 84%            |
| #17. Procedural                             | 78%                            | 80%                           | 1.7%                | 54%                         | 91%         | 74%            |
| #18. <b>Self-Centred</b>                    | 78%                            | 92%                           | 13.9%               | 32%                         | 95%         | 79%            |
| #19. Status consciousness                   | 79%                            | 75%                           | -4.4%               | 36%                         | 95%         | 76%            |
| #20. Team I: Collaborative Team Orientation | 80%                            | 81%                           | 1.5%                | 34%                         | 91%         | 79%            |
| #21. Team II: Integrator                    | 76%                            | 82%                           | 6.2%                | 30%                         | 92%         | 79%            |

**DIAGRAM 3**

This diagram graphically represents your previous 'Degree of Fit' with your current 'Degree of Fit', highlighting positive or negative growth.

## **MAJOR & MINIMAL DIFFERENCES**

This section looks at the individual questions that underpins the leadership questionnaire. Below, in each table, there are ten questions highlighting the specific attributes where your team perceive you performing at a lesser standard than they would prefer and ten where they perceive you performing to their expectations. Appendix 1 shows each question (with min, max, average, difference & its Standard deviation), for a complete study.

### **MAJOR DIFFERENCES**

The list below shows the questions that have a larger difference when calculating the average difference between the desire scores and perception scores of your team members. From our experience, differences greater than 1.5 could imply a need for change:-

|   | <b>Difference</b> |
|---|-------------------|
| <i>27. Provocateur - Stimulates unrest</i>  | 2.10              |
| <i>7. Autonomous - Acts independently, does not rely on others</i>  | 1.80              |
| <i>25. Integrator - Integrates people or things into cohesive, working whole</i>  | 1.70              |
| <i>6. Intra-group competitor - Tries to exceed the performance of others in his or her group</i>                                | 1.60              |
| <i>68. Normative - Behaves according to the norms of his or her group</i>   | 1.60              |
| <i>98. Motivational - Stimulates others to put forth efforts above and beyond the call of duty and make personal sacrifices</i> | 1.60              |
| <i>111. Individualistic - Behaves in a different manner than peers</i>  | 1.60              |
| <i>14. Risk taker - Willing to invest major resources in endeavours that do not have high probability of being successful</i>   | 1.50              |
| <i>22. Clear - Easily understood</i>  | 1.50              |
| <i>39. Fraternal - Tends to be a good friend of subordinates</i>  | 1.40              |

### **MINIMAL DIFFERENCES**

This list shows the areas with the smallest differences, which implies that you are performing in a way your team require:-

|   | <b>Difference</b> |
|---|-------------------|
| <i>106. Hostile - Actively unfriendly, acts negatively toward others</i>  | 0.10              |
| <i>105. Dishonest - Fraudulent, insincere</i>   | 0.10              |
| <i>85. Non-participative - Does not participate with others</i>   | 0.10              |
| <i>112. Ritualistic - Uses a prescribed order to carry out procedures</i>   | 0.20              |
| <i>59. Cunning - Sly, deceitful, full of guile</i>  | 0.20              |
| <i>43. Intelligent - Smart, learns and understands easily (REVERSE SCORE)</i>   | 0.20              |
| <i>37. Secretive - Tends to conceal information from others</i>   | 0.20              |
| <i>97. Ambitious - Sets high goals, works hard</i>  | 0.30              |
| <i>93. Elitist - Believes that a small number of people with similar backgrounds are superior and should enjoy privileges</i> | 0.30              |
| <i>80. Excellence-Oriented - Strives for excellence in performance of self and subordinates</i>                               | 0.30              |

I suggest you look for common themes in the above lists and compare these with your previous report then choose a selection to address over the next three to six months.

## **5. WHERE NOW?**

1. Thank your team for contributing. Please reiterate that the data is totally confidential and under no circumstances do you see their scores nor does anybody else. They receive no information from me formally, but we do offer to facilitate a session amongst your team to help you try and bridge these gaps.
2. As a **group** you need to gain commitment to making necessary changes. That includes YOU and THEM. It is not their responsibility to change, nor is it solely yours. The changes can occur in three ways.
  - (a) **YOU** making a shift in your style to be more of a leader they want you to be – it is too early to commit to specifics now but I suggest you consider them over the next 2 months and we agree a plan.
  - (b) **THEY** make the commitment to move in your direction and to do that they need to understand your motives and reason behind your leadership style.
  - (c) Agree that **differences** are healthy and they should be maintained.

I suggest we try and look for one area in (a), (b) and (c) to be the priority for the next 6 months and develop a plan.

I strongly encourage that you validate any conclusions you draw from this report, by obtaining factual examples of the behaviour(s) from some or all of the participants.

3. You may be considering creating a more thorough development plan for yourself and would like assistance with its creation and structuring. Please contact me if you would like help. We would need to come to some arrangement of the amount of time and an agreement on the costs that would incur, but I am available to assist in whatever way is feasible.

Thank you once again for participating. Under no circumstances do we share your data with anybody where you can be revealed. Your participation has given us access to a wide variety of nationalities and is part of access to 2,500 people from 40 countries in Cargill. We are now building up an interesting picture of what various nationalities aspire to have from their leaders.

Please let me know if you need any further help.

## APPENDIX 1 LEADER: Mary Smith

**Min / Max** - The minimum and maximum scores given by your team members in response to a particular question.

**Avg** - The average score from your team, calculated by dividing all of the scores given by the number of team members that responded.

**Difference** - Sum of the absolute differences between the Outstanding Leader score and the Leader Perception score for each respondent divided by the total number of respondents.

**S. Dev.** - Standard Deviation shows degrees of consistency (<= 1) or diversification (>= 1.5, to max of 2.7).

|  | Team's view of an  |     |     | Team's Perception |     |     | Red>1.5 | S. Dev. |
|--|--------------------|-----|-----|-------------------|-----|-----|---------|---------|
|  | Outstanding Leader |     |     | of Mary Smith     |     |     |         |         |
|  | Min                | Max | Avg | Min               | Max | Avg |         |         |
| 1. Diplomatic - Skilled at interpersonal relations, tactful  | 1                  | 7   | 5.8 | 4                 | 7   | 6.0 | 1.00    | 1.5     |
| 2. Evasive- Refrains from making negative comments to maintain good relationships and save face                                | 1                  | 6   | 2.8 | 1                 | 6   | 3.1 | 1.10    | 1.2     |
| 3. Mediator - Intervenes to solve conflicts between individuals  | 4                  | 7   | 5.4 | 3                 | 7   | 5.3 | 1.20    | 1.1     |
| 4. Bossy - Tells subordinates what to do in a commanding way   | 1                  | 3   | 1.6 | 1                 | 5   | 2.0 | 0.50    | 0.8     |
| 5. Positive - Generally optimistic and confident   | 6                  | 7   | 6.8 | 5                 | 7   | 6.6 | 0.40    | 0.7     |
| 6. Intra-group competitor - Tries to exceed the performance of others in his or her group                                      | 1                  | 7   | 4.1 | 1                 | 7   | 4.5 | 1.60    | 1.7     |
| 7. Autonomous - Acts independently, does not rely on others  | 1                  | 6   | 3.5 | 1                 | 6   | 3.7 | 1.80    | 1.2     |
| 8. Independent - Does not rely on others; self-governing   | 1                  | 7   | 3.9 | 1                 | 6   | 3.5 | 0.90    | 1.1     |
| 9. Ruthless - Punitive; Having no pity or compassion   | 1                  | 2   | 1.3 | 1                 | 4   | 1.4 | 0.50    | 0.9     |
| 10. Tender - Easily hurt or offended   | 1                  | 4   | 2.0 | 1                 | 6   | 3.0 | 1.00    | 1.6     |
| 11. Improvement-Oriented - Seeks continuous performance improvement  | 6                  | 7   | 6.9 | 5                 | 7   | 6.5 | 0.40    | 0.7     |
| 12. Inspirational - Inspires emotions, beliefs, values, and behaviours of others, inspires others to be motivated to work hard | 6                  | 7   | 6.8 | 5                 | 7   | 5.8 | 1.00    | 0.7     |
| 13. Anticipatory - Anticipates, attempts to forecast events, considers what will happen in the future                          | 6                  | 7   | 6.5 | 4                 | 7   | 6.0 | 0.70    | 0.7     |
| 14. Risk taker - Willing to invest major resources in endeavours that do not have high probability of being successful         | 1                  | 7   | 5.0 | 1                 | 6   | 3.7 | 1.50    | 1.9     |
| 15. Sincere - Means what he/she says, earnest  | 7                  | 7   | 7.0 | 5                 | 7   | 6.7 | 0.30    | 0.6     |
| 16. Trustworthy - Deserves trust, can be believed and relied upon to keep his/her word   | 7                  | 7   | 7.0 | 5                 | 7   | 6.7 | 0.30    | 0.6     |
| 17. Worldly - Interested in temporal events, has a world outlook   | 5                  | 7   | 5.9 | 3                 | 7   | 5.3 | 1.00    | 1.2     |

| 107. Future-oriented - Makes plans and takes actions based on future goals   | 6                  | 7   | 6.6 | 5                 | 7   | 6.1 | 0.50 | 0.5    |
| 108. Good Administrator - Has ability to manage complex office work and administrative systems                           | 5                  | 7   | 5.9 | 4                 | 7   | 6.4 | 0.80 | 0.8    |
| 109. Dependable - Reliable (REVERSE SCORE)   | 1                  | 4   | 1.5 | 1                 | 2   | 1.3 | 0.50 | 0.5    |
| 110. Dictatorial - Forces her/his values and opinions on others  | 1                  | 3   | 1.4 | 1                 | 5   | 1.8 | 0.70 | 1.0    |
| 111. Individualistic - Behaves in a different manner than peers  | 1                  | 6   | 3.2 | 1                 | 6   | 2.6 | 1.60 | 1.6    |
| 112. Ritualistic - Uses a prescribed order to carry out procedures   | 2                  | 5   | 3.9 | 1                 | 6   | 3.9 | 0.20 | 0.4    |

### Notes on Diff and S. Dev. Columns

These columns should be read together.

- A low Diff with a low SD ( $\leq 1$ ) means a good fit and all agree
- A low Diff with a high SD ( $>1.5$ ) means a good fit, but a few team members have a differing view
- A high Diff with a low SD means that this is an issue for the respondents
- A high Diff with a high SD means that there isn't a consistent view regarding the behaviour

## APPENDIX 2 - GLOSSARY

The words below have been defined in connection with the Leadership Questionnaires completed for this survey. They are to assist the understanding of the context of the question.

|                 |   |   |
|-----------------|---|---|
| Ambitious       | - | Strong desire to succeed in their goals.  |
| Autocratic      | - | A person who believes they have absolute and unrestricted authority.  |
| Autonomous      | - | Acts in accordance with rules/principles of one's own choosing.   |
| Calm            | - | Under control, not easily excited or annoyed.   |
| Cautious        | - | Showing care, forethought   |
| Characteristics | - | The typical or distinguishing attributes and qualities of a person, group, action or thing.                                   |
| Compassionate   | - | Having a feeling of distress and pity for the suffering or misfortune of another, often including the desire to alleviate it. |
| Cunning         | - | Someone who is adept at subtle or deceptive planning/action.  |
| Dictatorial     | - | A domineering or overbearing ruler expecting obedience.   |
| Diplomatic      | - | Skilled in negotiating; tactful in dealing with people.   |
| Domineering     | - | Acts arrogantly, believes in own self-importance.   |
| Empathy         | - | Identification with or sharing of another's feelings, situation, or attitudes.  |
| Endeavours      | - | Strenuous or conscientious attempt to accomplish something.   |
| Evasive         | - | Avoids the issue.   |
| Fraudulent      | - | Acts with the intent to cheat.  |
| Humble          | - | Someone who is respectful and doesn't wish to have the attention or focus on them.  |
| Humility        | - | Not boastful about own status or accomplishments.   |
| Independent     | - | Not reliant on others for support.  |

## European Organisation Effectiveness

|                         |   |  |
|-------------------------|---|--|
| Individualistic         | - | A person whose characteristics are unique.   |
| Interpersonal           | - | Relationship between two or more persons.  |
| Intervenes              | - | Enters a situation so as to change what is happening.  |
| Intra-group competitor  | - | Creates rivalry to increase performance of group.  |
| Loyal                   | - | Shows steady faithfulness to team/peers/Company.   |
| Malevolent              | - | Wishing or doing evil to others; Nasty; Hateful.   |
| Mediator                | - | Obtains agreement to disputes.   |
| Mobilise                | - | Organise for a purpose.  |
| Modest                  | - | Having or expressing a relatively low or moderate opinion of own abilities.                                      |
| Morale                  | - | The emotional condition of a person or group, as indicated by the level of enthusiasm, confidence, cheerfulness. |
| Motive arouser          | - | Awakens motivation within their team.  |
| Norms                   | - | An established standard of behaviour.  |
| Organised               | - | Coordinated; arrange methodically.   |
| Participate             | - | Become actively involved; to share in activities.  |
| Refrains                | - | Holds oneself back from doing or saying something  |
| Risk averse             | - | Opposed to the possibility of incurring loss or misfortune.  |
| Risk taker              | - | A person who proceeds in an action with little regard to the possibility of danger or risk.                      |
| Rivalry                 | - | An instance of competing.  |
| Save face (face-saving) | - | Potentially acting inappropriately to maintain dignity or prestige.  |
| Worldly                 | - | Sophisticated; Interested in events outside of own province/country.   |

|                             |               |            |                      |                            |
|                             |               |            |                      |                            |
|                             |               |            |                      |                            |
|                             |               |            |                      |                            |
|                             |               |            |                      |                            |

# A Cargill Cross Cultural Leadership Study

**Leadership traits and employee expectations from their managers differ across cultures. This Cargill study outlines some important findings.**

## A Changing World

**G**lobalisation is changing the way we conduct business. Whereas, in the past, people working for multinational companies could focus on their own regions and prosper, today it is almost impossible to work for a global company without looking beyond your own national boundaries.

Globalisation is impacting Cargill at all levels – the regions we operate in, the skills you as employees need, the products we sell and the customers we target.

We see this demonstrated by the fact that more people are working with multiple cultures by selling across country borders, dealing with work practices across national borders and working with more teams of several nationalities.

## Our Challenge

With growth and expansion come challenges in the form of:

- Conducting business across countries and cultures
- Placing people in countries and cultures, other than their own
- Balancing a global company culture with the inevitable individual cultural differences among countries.

In today's global business environment, it has become increasingly common place for people to work outside their own country and lead teams from different cultures. This gives rise to a need for globally competent leaders who are capable of valuing cultural differences and achieving maximum effectiveness from people of varying nationalities.

To achieve this, we need to build a better understanding of what makes leaders effective across cultures and assess our current leaders.

## A Better Understanding

To reach a better understanding a cross-cultural leadership study was conducted in Cargill. The goal was twofold:

Firstly, to understand what people view as the key attributes of an outstanding leader. Metaphorically, who would you walk off a cliff for and why?

Secondly, to understand how current managers measure up against these attributes of effective leadership.

In all, over 2,500 Cargill people, representing over 40 countries, participated in the study and have candidly shared their opinions on

what they view as the most important attributes of a leader and whether their manager(s) possess them.

The results will help us gain a better understanding of cultural variations across countries as well as the effectiveness of a particular leader.

## The Questionnaire

All respondents were asked to complete two parts of a questionnaire.

The first part was to determine what individuals believe to be the key attributes of an outstanding leader.

The second part asked respondents to think specifically about their leader and how they rate against the attributes put forward. The result is the '**Degree of Fit**' between what individuals want out of their leaders and what, in reality, they get.

## Our Findings

### A common view

There are certain behaviours which respondents of all nationalities in Cargill agree, are integral to outstanding leadership:

**Integrity and Honesty.** This achieved the highest global score. All nationalities desire integrity and honesty in their leaders and there was very little difference between countries.

**Performance Orientation.** All participants surveyed desire a high degree of performance orientation in their leaders. They are looking for leaders who strive for excellence, high performance, results and constant improvement.

**Visionary.** Irrespective of countries and cultures, people want to understand and relate to the vision set by their leader.

**Inspiration.** Finally, there is inspiration – the ability to be enthusiastic, positive, encouraging and motivational. Inspiration scored highly across the majority of countries.

## Where do countries differ?

Similarly, there are a number of leadership attributes, which were found to be culturally contingent. In some countries they are seen to contribute to outstanding leadership and in others, to impede it.

**Conflict.** Whether it be avoiding conflict or engaging in conflict, was found to differ most widely around the world. Our study found that many American and British employees are uncomfortable with conflict, whereas people from countries that have seen significant change over the last 50 to 100 years demonstrated a greater willingness to tolerate conflict within the business environment.

**Administrative Attributes.** The degree to which leaders must be well-organised, methodical and adept at managing complex office work varies in importance. Japanese and German employees believe leaders should be very skilled in this area, whereas in countries, such as Britain and Argentina, administrative attributes were seen as less important.

**Autocratic.** People from many Western European countries and the USA will resist heavily if faced with an autocratic leader, whereas in some Asian and Eastern European countries, autocratic leadership has a less negative impact and can even be mildly positive.

**Modesty.** In some countries, such as India, the Philippines and Malaysia, a degree of modesty is desired in one's leader, whereas Cargill employees and managers in countries such as Brazil and Poland, see this as less important.

**Participation.** The degree to which leaders are actively participating in their team's day to day work varies amongst countries. In countries, such as France or the Netherlands, the participation of a leader is expected, whereas in Japan the opposite is true.

## Degree of Fit

Based on the two sets of results from the questionnaire, we are now able to start highlighting the gaps between what people perceive to be the most important attributes of a leader and how they are perceived in each category.

Areas where there is a high degree of fit are:-

- Integrity
- Performance Orientation
- Decisiveness

Areas and skills, where the degree of fit is lower and which Cargill leaders need to work on, are:-

- Ability to inspire and motivate
- Ability to increase the morale of the group
- Ability to lead without dominating
- Ability to manage but not micro-manage

## Application

So what have we learned and what are we going to do about it?

The main take-away from this study is that leadership varies from country to country but within a context of leadership, attributes such as integrity, performance orientation and being visionary are valued throughout Cargill.

It is also highly encouraging that many of Cargill's managers are ensuring that these attributes are put into practice.

Yet, there are no grounds for complacency. There are also leadership skills, which need to be improved by Cargill managers if the degree of fit between expectations and reality is to be increased.

It is our hope that what we learn from this study will make Cargill a truly high performing organisation.

Every leader, who took part in the study, will be taken through their results in considerable detail and encouraged to use them as a tool to judge their own performance.

It is our desire that this study will create a greater awareness of cultural differences amongst today's and tomorrow's leaders. We are currently working with leaders worldwide to stress the necessity of establishing a close fit between them and their team.

## Next Steps

We are now working with businesses to share more specific information to help them gain a better understanding of managing an international business. This involves running cross-cultural awareness sessions to help businesses understand why we work and behave differently due to our cultural backgrounds.

It is our hope that through this study, Cargill will be better equipped to operate internationally. We hope in the future to understand more deeply how we should develop global leaders. As a result it will also encourage everyone across Cargill to think more globally and be aware of the cultures they work in and with.

## Implications

The degree to which we respect and are aware of cultural differences has tangible implications for our businesses. If our awareness increases, our ability to move people from country to country should be more effective; our ability to set-up international teams to work on customer solutions should be common place. We should see evidence of less conflict arising simply due to misunderstandings.

If we choose to ignore these, the risk to our businesses is significant. If, however, we embrace and reconcile our cultural differences, the value we can create is immense.

## Think Globally & Act Locally!

It is our belief that as Cargill expands, the importance of working effectively with employees, customers and partners becomes more critical. To be the **world's local supplier** will require us to value and capitalise on our differences.

## Can we help?

We believe this study has given us a greater understanding of cultural differences, particularly those associated with leadership.

Does your business operate internationally? Will your business be expanding into new countries? Do you see conflict arising across countries that you cannot explain? Are you facing dilemmas in your international business where there is no straightforward answer?

Our tailored solutions offer practical help to bridge some of these challenges.

## Characteristics of an Outstanding Leader : Are there national differences?

By Dave McKie – Organisation Effectiveness

### FOR INTERNAL USE ONLY

*Conclusions drawn from a global study of leadership values.*

Acts of great leadership span industries, social classes, generations and the globe. Successful leaders have inspired people to follow them in pursuit of a shared goal regardless of the industry, social class or age. So what is leadership and how can its impact be so broad? The word “leadership” originates from the British military. To some people it has a positive meaning, to others, however, it may suggest an oppressive dictator. Although we see leadership demonstrated in the boardroom, at kindergarten, on the sports field and in the school playground, a challenge for Cargill and other global companies is to understand the impact of cultural differences on leadership.

The aim of this article is to deepen our understanding of cross-cultural leadership. The conclusions drawn from a recent Cargill study show that leadership characteristics vary from country to country, but not as much as one might think. In part, this suggests Cargill’s organisational culture is strong.

Most people, including employees in Cargill, want to be inspired and motivated to achieve a goal. Many people want to follow a leader who they can trust and who has a mission or vision in which they can share.

Although we find acts of great leadership across the globe, research suggests that there are differences depending on the culture. Are people in Iowa, USA inspired in the same way as people in Mumbai, India? Does a leader motivate a Japanese workforce in the same way as motivating a Brazilian team?

We are all part of the human race so we have a lot in common. We all laugh, cry, show passion, demonstrate anger, care for those we love and we need to feel a sense of belonging. Equally, however, we all have our differences, some of which are due to our cultural heritage.

During childhood we observed the behaviour of adults, which shaped our thinking and how we behave. For example, interrupting a conversation may have been frowned upon in some cultures, but not all. Very quickly we learned the difference between what was **right** and what was **wrong** and research suggests our “core

values” were established by the age of seven. Our values then became a lens through which we look and these values impact our perception of other’s behaviour. We naturally judge or perceive others based upon **our** values, not theirs. Sometimes our values can impair our judgment. This occurs when we have negative perception of an individual’s behaviour without attempting to understand if that person’s values caused it.

We may be unaware of our own values, especially those established during childhood. For example, if we live in an environment where debate and discussion are always very heated, voices are raised and emotions are openly expressed, then this will become a norm. A “norm” is a core value the impact of which we are unaware. Some people may believe emotional debate is unprofessional, especially if raised in a culture where calm discussion is a norm.

Often differences in values become visible in the way we behave. For example, everybody, regardless of their nationality and personality, has passion, however, we may see differences in **how** that passion is displayed. Some Latin cultures may argue that some Asian cultures lack passion, but the Latin perception of passion is based on a Latin definition or value which differs from most Asian countries.

## THE STUDY IN CARGILL

From October 2001 through September 2002, a questionnaire was completed by 2,200 people from 40 countries. This questionnaire asked them to rate the importance of various characteristics associated with outstanding leadership. Following is a sample question from the questionnaire:-

***Inspirational*** – *Inspires emotions, beliefs, values, and behaviours of others, inspires others to be motivated to work hard*

*A scale was used to determine where on the range **Inspiration** resides relative to outstanding leadership.*

***Greatly inhibits***

***No impact***

***Greatly contributes***

We have analysed the data by nationality and presented only the countries with a statistically significant number of responses.

The questionnaire was designed by Prof. Robert J. House from Wharton Business School, Philadelphia. His research has incorporated 30,000 responses from 60 countries.

The graphs displayed have had the scales adjusted for statistical reasons. The range after adjustments are:-

-1.0     inhibits outstanding leadership  
 0         no impact for outstanding leadership (neutral)  
 +1.2     greatly contributes to outstanding leadership.

**Please Note;** the following pages show analysis of 23 individual countries. For the purposes of this report, United States of America has been shortened to ‘America’.

## UNIVERSAL CHARACTERISTICS

The analysis from the results of Cargill’s questionnaires was conducted so that characteristics deemed critical for outstanding leadership were identified. From the 112 questions, the ten highest rated characteristics are:

1. Trustworthy
2. Inspirational
3. Performance Oriented
4. Team Integrator
5. Dynamic
6. Clear
7. Motivational
8. Positive
9. Visionary
10. Diplomatic

### 1. Trust

Trust received the highest score in Cargill, implying that people’s number one desire is to work for a leader that they can trust. There is little variation with age, nationality and years of service. This research suggests a trustworthy leader is a universal requirement within Cargill. For a leader to be outstanding, there must be a sense of trust. We have found that people from some countries prefer a smaller number of deep business relationships developed over a long period of time. In such countries, it can take longer for trust to be established. The table below shows how each country ranked this characteristic out of a total of 112 questions:

| <b>Q16: Trustworthy – Deserves trust, can be believed and relied upon to keep her/his work</b> |  |
|--|--|
| <i>Rank</i>  | <i>Country(ies)</i>  |
| 1  | America, Argentina, Australia, Brazil, Canada, China, France, Indonesia, Japan, Malaysia, Mexico, Singapore, Switzerland, Turkey |
| 2  | Great Britain, Netherlands, Philippines, Germany, India, Poland  |
| 3  | Spain, Venezuela   |
| 5  | Russia   |

## 2. Inspirational

The second highest score overall confirmed that people within Cargill want to be inspired by their leader. A related question (*Motivational*) also received a very high score.

Recently conducted external research suggests people are inspired in different ways. Personality and nationality are two contributing factors. It may, therefore, be inappropriate to assume we can inspire people using the same methods globally. For example, making a speech with passion, energy and conviction may inspire some, but it would be wrong to assume this approach works for all.

### Q12: Inspirational – Inspires emotions, beliefs, values and behaviours of others, inspires others to be motivated to work hard

| <i>Rank</i> | <i>Country(ies)</i>   |
|-------------|---|
| 1           | Great Britain, Netherlands, Philippines, India, Poland, Venezuela |
| 2           | Australia, Russia, Spain  |
| 3           | Brazil, Singapore   |
| 4           | America, Argentina, Canada, China, Germany, Switzerland           |
| 6           | Malaysia, Turkey  |
| 11          | Indonesia, Japan  |
| 13          | France, Mexico  |

### 3. Performance Orientation

People have a desire to work for a leader who values high performance, excellence and strives for continuous improvement. Table 3 shows the results for Performance Orientation. The

characteristics of a performance-oriented leader may vary from country to country. Performance orientation can be measured in a broad range of areas, including customer, employee, financial, production and community.

#### Q96: Performance-oriented – Sets high standards of performance

| <i>Rank</i> | <i>Country(ies)</i>      |
|-------------|--------------------------|
| 2           | Indonesia                |
| 5           | Canada, France           |
| 6           | America, Philippines     |
| 7           | Great Britain            |
| 8           | Malaysia                 |
| 9           | Switzerland              |
| 13          | Australia                |
| 14          | India                    |
| 24          | Mexico, Russia           |
| 28          | China, Poland, Singapore |
| 30          | Germany                  |
| 31          | Brazil, Netherlands      |
| 34          | Turkey                   |
| 37          | Venezuela                |
| 38          | Argentina                |
| 47          | Spain                    |
| 48          | Japan                    |

## 4. Team Integrator

People realise that dynamics of a team can be complicated and most countries within our data sample want a leader who is able to manage a group to effect greater productivity.

| Q94: Team builder – Able to induce group members to work together |                                     |
|---|-------------------------------------|
| Rank  | Country(ies)                        |
| 5   | Malaysia                            |
| 6   | Brazil, France, Germany, Poland     |
| 7   | Turkey                              |
| 8   | Argentina, Netherlands, Switzerland |
| 9   | Singapore                           |
| 10  | America, Canada, Russia             |
| 11  | Philippines                         |
| 12  | Great Britain, Spain                |
| 18  | Indonesia, Venezuela                |
| 19  | India, Japan                        |
| 26  | Australia, China                    |
| 27  | Mexico                              |

## 5. Dynamic

People's view of a "dynamic leader" varies by country. For example, some Asian cultures do not speak with significant changes in volume, tone or pace and rarely show an increase in body movement. To some this may suggest they are not dynamic, especially when compared with other countries, however, one must keep in mind differences in cultural values and norms when making assumptions. We have found Asian leaders to be dynamic, but that may be demonstrated differently than leaders in other countries, e.g. GB and the Netherlands.

### Q91: Dynamic – Highly involved, energetic, enthused, motivated

| <i>Rank</i> | <i>Country(ies)</i>           |
|-------------|-------------------------------|
| 2           | Turkey                        |
| 3           | France                        |
| 5           | Great Britain, India          |
| 6           | China                         |
| 7           | Netherlands, Spain, Venezuela |
| 8           | Philippines                   |
| 9           | Germany                       |
| 10          | Brazil, Mexico                |
| 11          | Singapore                     |
| 13          | Indonesia, Russia             |
| 14          | Switzerland                   |
| 18          | Australia                     |
| 19          | America                       |
| 20          | Argentina                     |
| 23          | Poland                        |
| 24          | Canada, Japan, Malaysia       |

## COUNTRY DIFFERENCES

For each country we have ranked the scores for each question to determine what was considered to be the most important and the least important. This allowed us to assess the differences in ranking between countries. For example, the highest ranked question for Spain was a **clear communicator** though Canadians ranked it 26<sup>th</sup> from a total of 112.

All of the scores were ranked to determine what is important overall for Cargill. **Brazil and Germany** were the only countries, out of the 23, to have **10 of their top 13** questions **identical to Cargill's overall**. The table below highlights some of these more significant differences:-

|                      |  |
|----------------------|--|
| <b>America (USA)</b> | Americans want leaders to be <b>ambitious</b> (8/112) compared with (43/112) <i>Brazil</i> and <i>Spain</i> . <b>Ambitious</b> ranked eighth for Americans - the highest rank overall. <b>Americans</b> and <b>Canadians</b> score <b>decisive</b> lower (38/112) than all others countries - <i>Japan</i> ranked it second.   |
| <b>Argentina</b>     | Argentines want their leaders to be <b>motivators</b> (3/112) – only <i>France</i> ranked this higher. They also want their leaders to be <b>confident</b> (6/112) compared with <i>Poland</i> (51/112). Argentines ranked <b>independent</b> 43 <sup>rd</sup> (43/112), highest rank for this question, as opposed to <i>Canada</i> (76/112).   |
| <b>Australia</b>     | Australians want their leaders to be <b>intellectually stimulating</b> (5/112) compared with <i>France</i> (48/112); <b>calm</b> (9/112) compared with <i>Mexico</i> (53/112) and a <b>proficient mediator</b> (10/112) compared with <i>Canada</i> (56/112). The Australians ranked these questions the highest.  |
| <b>Brazil</b>        | Brazilians are more acceptable of <b>provocateur</b> (64/112) leaders than the other countries, although, they do not care for <b>cynical</b> leaders (111/112) – unlike <i>French</i> citizens (86/112) who are more tolerant.  |
| <b>Canada</b>        | Canadians want their leaders to be <b>excellence oriented</b> (3/112) compared with <i>Russia</i> (48/112). <b>Canadians</b> and <b>French</b> want <b>visionary</b> leaders (7/112), highest ranked overall, compared with <i>Brazilians</i> (41/112). Additionally, <b>Canadians</b> with <b>Malaysians</b> and the <b>Swiss</b> least want <b>arrogant</b> leaders (108/112), compared with <i>Japanese</i> (89/112). |
| <b>China</b>         | Chinese want their leaders to be <b>diplomatic</b> (2/112) compared with <i>France</i> and <i>Switzerland</i> (39/112) and <b>logical</b> (11/112) – the only country to rank this within their top 20. These were the highest rank for any country.   |
| <b>France</b>        | French ranked <b>motivator</b> second – the highest rank for any country. French people want their leaders to be able to <b>anticipate the future</b> (4/112) compared with the <i>Filipinos</i> (47/112).   |
| <b>GB</b>            | The British want a <b>dynamic</b> leader, one of only four countries to rank this in their top 5. Britons ranked <b>excellence and performance oriented</b> 6 <sup>th</sup> and 7 <sup>th</sup> only <i>Canada</i> and <i>America</i> ranked these higher (3 <sup>rd</sup> and 5 <sup>th</sup> ; 5 <sup>th</sup> and 6 <sup>th</sup> respectfully).  |
| <b>Germany</b>       | Germans want their leaders to be <b>sincere</b> (1/112) – the only country to rank this first compared with <i>Russia</i> (39/112). They also want a <b>worldly</b> leader (24/112) compared with <i>Mexico</i> (66/112). Germans least want a <b>domineering</b> leader (105/112) compared with <i>Poland</i> (53/112).   |
| <b>India</b>         | Indians want their leaders to be <b>positive</b> (3/112) compared with (47/112) for <i>Poland</i> . <b>Indians</b> want their leaders to be <b>dynamic</b> (5/112), similar to <i>Britain</i> (5/112). They are more   |

|                    |  |
|--------------------|--|
|                    | accepting of <b>bossy</b> leaders (78/112) compared to <i>Australia</i> (107/112).   |
| <b>Indonesia</b>   | Indonesians want their leaders to be <b>consultative</b> (3/112) compared with <i>Germans</i> (51/112). Linked to performance, Indonesians want their leaders to be <b>effective bargainers</b> (5/112) – one of four countries that ranked this in their top 10.  |
| <b>Japan</b>       | Japanese want their leaders to be <b>decisive</b> (2/112) compared to <i>Americans</i> and <i>Canadians</i> (38/112). They also want their leaders to be <b>morale boosters</b> (3/112) compared with <i>Mexico</i> (51/112). Japanese admire <b>communicative</b> leaders (6/112) compared to <i>France</i> (56/112).   |
| <b>Malaysia</b>    | <i>Malaysians</i> with <i>Canadians</i> and the <i>Swiss</i> <b>do not</b> value <b>arrogant</b> leaders (108/112) compared with <i>Japanese</i> (89/112). <i>Malaysians</i> do not want <b>non-cooperative</b> leaders (109/112).   |
| <b>Mexico</b>      | <i>Mexicans</i> want a <b>just</b> leader (4/112) compared with the <i>Netherlands</i> (35/112). They want a leader who <b>builds confidence</b> (5/112) and is a <b>coordinator</b> (8/112) compared to <i>Poland</i> (51/112) and <i>Canada</i> (58/112) respectfully.   |
| <b>Netherlands</b> | The Dutch want their leaders to <b>anticipate the future</b> (4/112) compared with <i>Malaysia</i> (31/112). The Dutch least want a <b>dictatorial</b> leader (108/112), whereas <i>Russians</i> are slightly more tolerant (82/112).  |
| <b>Philippines</b> | Filipinos want their leaders to be <b>positive</b> (3/112) and <b>future-oriented</b> (12/112), compared with <i>Malaysians</i> (44/112). They ranked <b>unintelligence</b> the lowest (112/112) compared with <i>Japan</i> (91/112).  |
| <b>Poland</b>      | The Polish want their leaders to be <b>willful</b> (7/112) compared with <i>Russians</i> (62/112). The Poles ranked <b>administratively competent</b> highest (8/112) compared with <i>Netherlands</i> (54/112). Polish <b>do not</b> want a <b>subdued</b> leader (4/112), compared with <i>Germany</i> (79/112). Polish people are more tolerant of <b>domineering</b> leaders (53/112).   |
| <b>Russia</b>      | <i>Russians</i> want their leaders to be <b>improvement oriented</b> (1/112) – the only country to rank this 1 <sup>st</sup> compared with <i>France</i> (28/112). <i>Russians</i> want their leaders to be <b>integrators</b> (3/112) compared with <i>Canada</i> (52/112). <i>Russians</i> do not see <b>egotistical</b> (73/112) as negative as most countries. Russia was the only country that <b>did not</b> have either <b>trustworthy, sincerity or honesty</b> in the top 4 ranked questions. |
| <b>Singapore</b>   | <i>Singaporeans</i> want their leaders to be <b>encouraging</b> (4/112) compared with <i>Mexicans</i> (39/112). <i>Singaporeans</i> would like their leaders to be <b>sensitive</b> (25/112) compared with <i>Japanese</i> (68/112).   |
| <b>Spain</b>       | <i>Spanish</i> want a <b>clear</b> leader (1/112) compared with <i>Canadians</i> (26/112). <i>Spanish</i> <b>do not</b> see <b>tender</b> (79/112) as negative as the <i>Swiss</i> (103/112). <i>Spanish</i> want a leader who is able to find <b>win/win solutions</b> (4/112), whereas <i>Turks</i> feel this is less important (42/112)   |
| <b>Switzerland</b> | <i>Swiss</i> want their leaders to be <b>motivational</b> (17/112) compared with <i>Russians</i> (59/112). <i>Swiss</i> , with <i>Australians</i> and <i>Canadians</i> <b>do not</b> want a <b>secretive</b> leader (105/112) compared with <i>Argentines</i> (78/112).  |
| <b>Turkey</b>      | The Turkish want their leaders to be able to <b>anticipate the future</b> (4/112). They also want their leaders to be <b>communicators</b> (8/112).  |
| <b>Venezuela</b>   | <i>Venezuelans</i> <b>do not</b> want their leaders to be <b>egotistical</b> (103/112) compared with <i>Russians</i> (73/112). <i>Venezuelans</i> <b>do not</b> value <b>loners</b> as they ranked this is the lowest of all countries (107/112) unlike <i>Germans</i> who ranked it (81/112).   |

## **CHARACTERISTICS – POSITIVE & NEGATIVE**

So far this article has highlighted five leadership characteristics that are universally required in Cargill.

Now we would like to highlight four characteristics that are seen to be positive in some countries, but negative in other countries. The four are:-

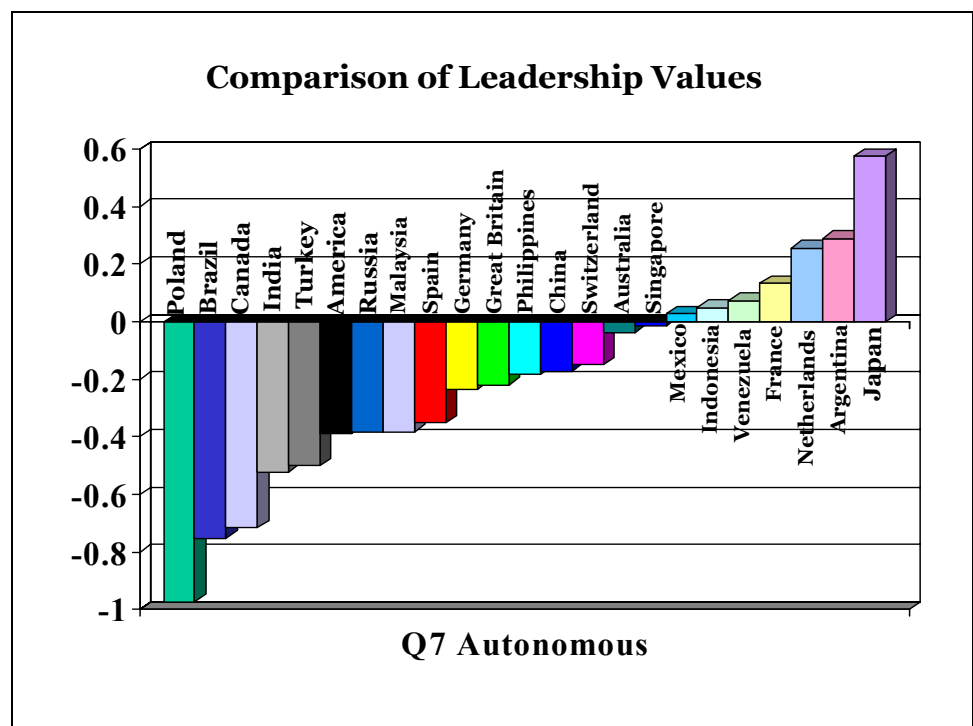

1. **Autonomous/Independent**
2. **Modesty**
3. **Risk Taker**
4. **Fraternal – being good friends with subordinates.**

The following graphs show values that have been computed for statistical and comparison reasons. The scale is centred at zero. A value higher than zero suggests a positive characteristic and a value lower than zero suggests a negative characteristic.

## 1. Autonomous

In Graph 1 the difference between Poland and Japan is evident. This suggests that Polish people see autonomy and independence as negative leadership characteristics. In contrast, Japan believes that autonomy is a positive characteristic and contributes to outstanding leadership. In some cases, but not all, we have identified an association between risk and autonomy. Some believe that too much autonomy increases risk.

GRAPH 1

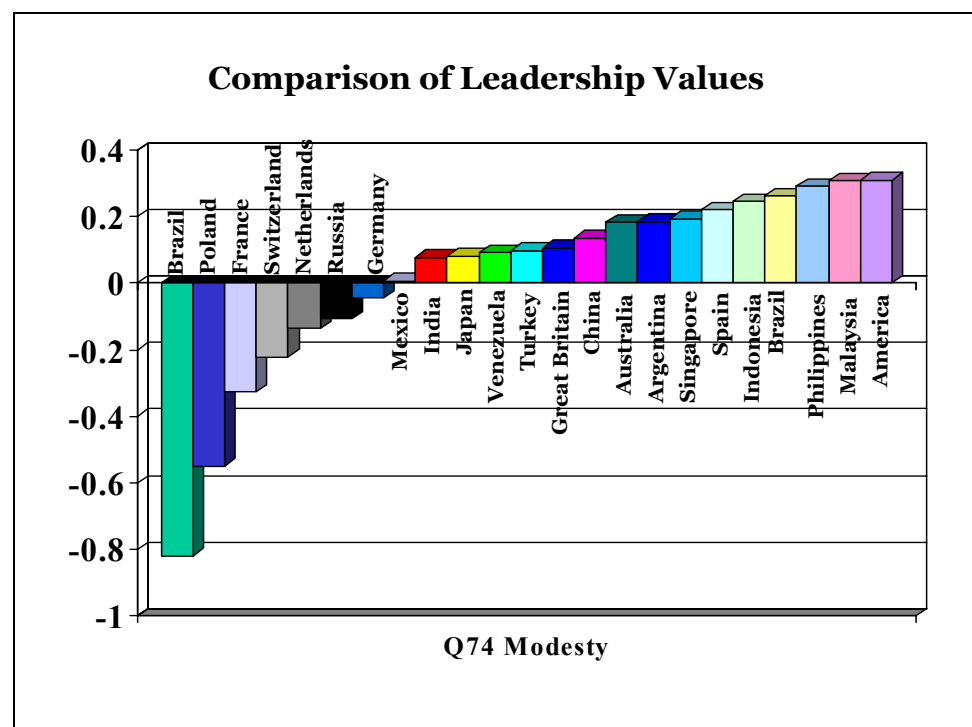

## 2. Modesty

Graph 2 shows 15 countries that consider modesty to be a positive leadership characteristic, however, Brazil and Poland see modesty as a negative characteristic.

The world famous boxer, Mohamed Ali and the philanthropist, Mother Theresa, are two people with entirely different approaches in how they presented themselves to the public. Some were inspired by what they said, others felt the total opposite.

GRAPH 2

### 3. Risk Taking

Graph 3 shows the attitude variations in Cargill regarding risk taking. The questionnaire was not assessing risk management, but the willingness to take risks. For example, Poland and Russia view this as a negative characteristic, whereas Argentina and India view it as a positive leadership characteristic.

GRAPH 3

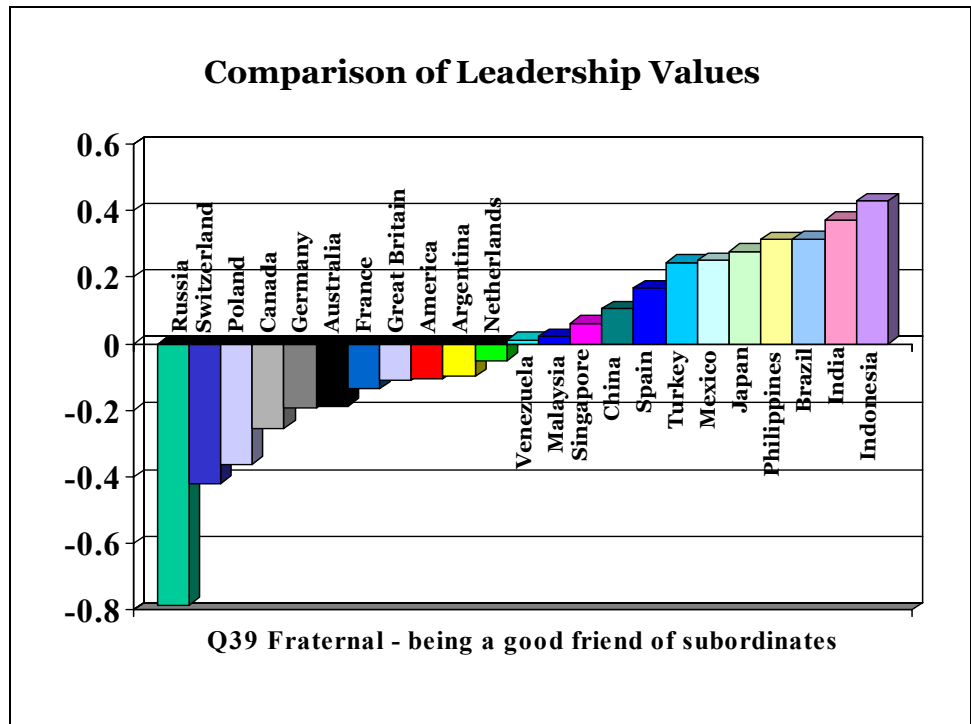

#### 4. Fraternal

For the purposes of this study, fraternal is defined as a leaders being “friendly” and “social” with their team.

Countries that place higher values on “relationships” consider fraternity to be more important for leaders.

GRAPH 4

## EFFECTIVE LEADERSHIP

Our aim at Cargill is to have 100% of employees engaged and committed to supporting its mission, vision and values. Developing effective leaders is a core ingredient in achieving this aim.

A tool to help leaders become more effective has been developed by Dave McKie. Leaders nominate 8-10 people. Each is given two identical questionnaires that they complete anonymously. The first questionnaire measures what they desire from a leader and the second measures the perception they have of their own leader. The leader receives extensive feedback on their personal “*degree of fit*” between what is desired and perception. The feedback is provided in the following categories:-

- #1. Administratively Competent
- #2. Autocratic
- #3. Autonomous
- #4. Charismatic I - Visionary
- #5. Charismatic II - Inspirational
- #6. Charismatic III - Self Sacrifice
- #7. Conflict Inducer
- #8. Decisiveness
- #9. Diplomatic
- #10. Face Saver
- #11. Humane Orientation
- #12. Integrity
- #13. Malevolent
- #14. Modesty
- #15. Non-Participative
- #16. Performance Orientated
- #17. Procedural
- #18. Self-Centered
- #19. Status Consciousness
- #20. Team I: Collaborative Team Orientation
- #21. Team II: Integrator

Embracing diversity and valuing differences must be central in what we do strategically and operationally. Our challenge is to learn more about the people we work with and their respective cultures. A greater understanding and awareness will improve our global effectiveness as we deliver solutions for customers and value for our shareholders.
