

EVALUATION OF CORPORATE SOCIAL RESPONSIBILITY PROGRAM IMPLEMENTATION IN BOGOR PDAM TIRTA PAKUAN, WEST JAVA PROVINCE

Ismartaya
State University of Jakarta
Ismantaya.unj@gmail.com

Abstract

The purpose of this research is to determine whether the evaluation of corporate social responsibility program implementation in Bogor PDAM Tirta Pakuan has been implemented in accordance with the vision, mission, and objectives of the company. PDAM Tirta Pakuan has a vision of CSR as a pioneer in the implementation of social responsibility in Bogor city especially and Indonesia in general. Through this vision, PDAM Tirta Pakuan Bogor city would really seriously implement the CSR programs. Based on these purposes, this research is done by evaluating the CSR programs which are implemented by PDAM Tirta Pakuan Bogor city and use CIPP evaluation model to conduct an evaluation of the program. The type which is used on this research is evaluation research with a qualitative approach. The source of information used is the Chief Executive of CSR PDAM Tirta Pakuan Bogor. Data collected by observation, interview and documentation. Test validity of this research by using triangulation technique, while data analysis is done by reducing the data, presenting and concluding. The result shows that the program Tirta Pakuan care as the company's strategy goes according to the purposes and plans that have been made by the company.

Keywords: *evaluation, corporate social responsibility, CIPP Model*

Corporate Social Responsibility (CSR) is an ongoing commitment to the corporate world to act ethically and contribute to economic development of the local community or society in general, along with the increase of the living standards of workers and their families (Frankl, 2007). The concept of CSR is inseparable from sustainable development (sustainable development). Sustainable development, not only understood as concern for the environment, but also includes economic and social development. The implementation of CSR appropriately in the community will maintain the quality of the environment, improve the quality of human resources, and enhance the ability of the local economy. The company has a social responsibility as stipulated in the Law of the Republic of Indonesia No.40 of 2007 regarding company in Chapter IV, Social and Environmental Responsibility in article 74 provides:

1. The Company which conducting its business activities in the field and / or related to the natural resources required to implement the Social and Environmental Responsibility.
2. Social and Environmental Responsibility as referred to in paragraph (1) an obligation of the Company's budgeted and accounted for as an expense of the Company which are carried out with due regard to decency and fairness.
3. The Company which did not carry out the obligations referred to in paragraph (1) be sanctioned in accordance with the provisions of the legislation.
4. Further provisions regarding Social Responsibility and Environmental regulated by Government Regulation.

In 2012 the government published Government Regulation No. 47 Year 2012 about Social and Environmental Responsibility Company Limited. This regulation was finally recognized that CSR is a company authorized by stating that the preparation and implementation of CSR is the authority of the board of directors or the company's AGM.

The setting of Corporate Social Responsibility in Indonesia is not only imposed on private companies, but also to state that carries on business in the interest of the public. CSR arrangements for SOEs can be found in the Law on State Enterprises.

Implementation of Corporate Social Responsibility in SOEs, are followed by the Decree. SOE Kep-236 / MBU / 2003 jo. Candy. SOE No.Per-05 / MBU / 2007, so it has the main points of thought or consideration as follows:

1. Given that one of the purposes and objectives of the establishment of state-owned enterprises are participating actively provide guidance and assistance to small entrepreneurs group, cooperatives, and community, the SOEs can set aside part of net income for the purposes of fostering of small co-operatives and community development around the SOE.
2. Company and Housing of the Government (SOEs) shall implement the Partnership Program and Community Development Program, while for SOEs Persero Open implementation of the Partnership and Community Development Program can refer to the implementation of the Partnership Program and Community Development Program at Persero and Perum (Non Open SOE).

Partnership Program with Small Entrepreneurs and Community Development Program firstly set in Permeneg SOE No. 236 / MBU / 2003 on SOEs. Since as set this regulation not adequately operational basis for implementing enterprise BUMN Partnership program with a Small Business and Community Development Program, then Permeneg SOE No. 236 / MBU / 2003 on SOE replaced by Permeneg SOE No. PER-05 / MBU / 2007 about SOE Partnership Program with Small Entrepreneurs and Community Development Program, April 27, 2007. The government will support companies that has social concern.

By paying attention to the benefits of CSR, most companies in the city of Bogor has implemented CSR. Mayor of Bogor, Dr. Bima Arya asserted, CSR program in the city of Bogor conducted by enterprises or private companies are already running, but it has not integrated yet still walk on their own. City Government considers that the CSR program that had been distributed a number of companies have not had a significant impact on the city of Bogor and surrounding communities.

That case became the background for the emergence of the concept of Corporate Social Responsibility, especially in the city of Bogor. Charity activity basically has become a tradition and customs of the people of Indonesia, especially based on the teachings of religion. Today Corporate Social Responsibility has developed quite rapidly. One driving force is a paradigm shift for the business world is not solely for profit, but it must also behave ethically and contribute to the creation of a social investment. Yusuf Wibisono (2007: 71) which is commonly done by companies which are doing charitable, philanthropic and organizing community development programs (community development).

This study is an evaluation research because it is the general aim of this study is to assess the benefits, contributions, and the feasibility of CSR programs are undertaken by companies and enterprises in the city of Bogor, to discover and develop and enhance program implementation of CSR is right on target for the company as well as for its stakeholders, including the government. In particular the research objectives are as follows:

Assess the goal-setting, the profile of the beneficiary and the basic programming of CSR by companies and enterprises to the needs of beneficiaries; Review the company's support and structural aspects of the organization, qualification and financing program leaders; Assess the implementation of CSR programs in terms of understanding the program by beneficiaries, use of budgets and monitoring; Reviewing the results of the implementation of CSR programs for companies, beneficiary communities, and governments. The difference in the research done by the Mukti Dawn compared to

this study, namely: The focus and Fajar Mukti research was to determine the setting of corporate social responsibility.

Fajar Mukti research suggested the government to amend the Law on Investment and Company Law in order to have the same meaning, which is actually right Iebih Corporate Social Responsibility is not regulated in the legal sphere.

Corporate Social Responsibility research results and various aspects, social, legal and financial, evaluation research reinforced the need for the implementation of CSR at private companies and SOEs, in order to provide an assessment of the implementation of the program and provide advance model of csr that would provide the optimal benefits for companis and their stakeholders

Other research relevant David Ariansyah, The implentation of Corporate Social Responsibility and Cultural Organization in PDAM Tirta Pakuan Bogor and The Influence of Community Satisfaction in Bogor. (Implementation of Corporate Social Responsibility and Cultural Organization on PDAM Tirta Pakuan Bogor Effect on Public Satisfaction Bogor City

There are differences in research conducted by David Ariansyah with this research.

1. David Ariansyah research focuses on the impact felt by the company after conducting Corporate Social Responsibility both in terms of internal (corporate culture) and external (reputation).
2. David Ariansyah research does not provide improvement suggestions collaborative model of Corporate Social Responsibility intact so as to create responsible and sustainable relationship between the company and its stakeholders, especially the public and the government.

METHODS

The method used in research in PDAM Tirta Pakuan are evaluative research methods, with the CIPP evaluation model. CIPP evaluation model which stands for: Context evaluation, input evaluation, Evaluation Process and Product evaluation. Fourth abbreviation of the CIPP that is the evaluation component.

CIPP evaluation model used in the study in PDAM Tirta Pakuan is because it is more comprehensive and effective in describing, obtaining and providing useful information for judging decision alternatives. Comprehensive evaluation model CIPP Iebih among other evaluation models, because the object of evaluation is not just the product itself but also include context, input, process, and outcome. The concept of this Stufflebeam view that an important purpose of evaluation is not to prove, but to improve. The substance and methods of evaluation will provide an assessment of "good-bad" or "success-failure" with regard to the state of achievement of the work program, so that the results of the evaluation is objective and useful, so this assessment is strongly emphasized the importance of ethics and approaches reliable.

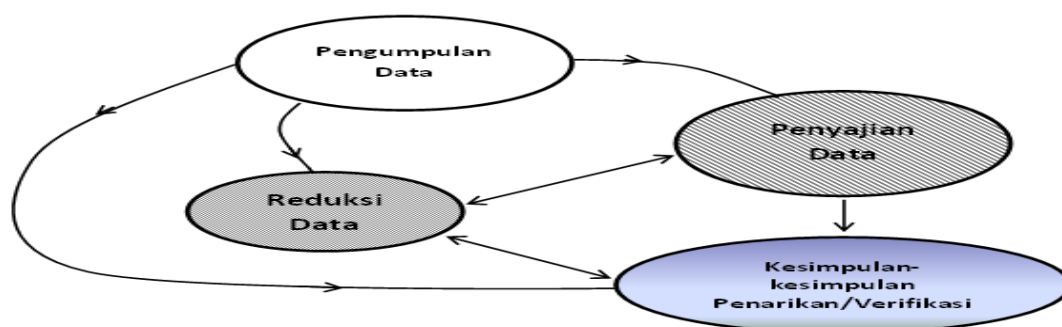

Qualitative researchers as a human instrument, serves to fix the focus of research, selecting informants as a source of data, collecting data, assessing data quality, data analysis, interpret the data and make conclusions on the findings. While the process of collecting primary data and secondary data in this study carried out through the following activities: observation interviews, documentation and triangulation

Analysis of the data used in this study using qualitative data analysis. The data analysis of qualitative research refers to the model introduced by Miles and Huberman (1992: 16), which define the analysis in three streams of activity, namely the reduction of the data (data reduction), presentation of data (data display), and conclusion / verification (conclusion drawing / verification). Martthew B. Miles and A. Michael Huberman (1994: 8-12) Flow analysis of the data in question, can be seen in the image below. Each of these stages are described as follows:

Source: Miles and Huberman (1994: 12)
