Assalamu 'alaikum Wr. Wb.

After reading thoroughly and giving necessary advices, herewith, as the advisor, we state that the thesis of

Name : Indra Pujiyanto

SRN : 113221148

Title : Improving Students' English Vocabulary Mastery Through Random Pictures at 8th Grade Students of MTs N Boyolali in the Academic Year 2015/2016

Has already fulfilled the requirements to be presented before The Board of Examiners (munaqosyah) to gain *Sarjana* Degree in English Department.

Thank you for the attention.

Wassalamu 'alaikum Wr. Wb.

Approved by

The Dean of Islamic Education and Teacher Training Faculty.

DEDICATION

This thesis dedicated to:

*My beloved father, mother, and my grandmother (Mr. Teguh Wiyono, Mrs. Sarwini, Mrs. Landep),
who never stop give me love, support, and prayer*

*My beloved younger brother and sister (Ibnu Muhammad Kalifi and Jenic Maulia Rachma), who
always support me*

My Alma mater, State Islamic Education of Surakarta

MOTTO

“Allah does not give something you want. More than you know, but Allah give something you need. Then you’ll realize those all of the best. That is pure life.”

(The Researcher)

“Only to you we pray and only to you we ask for help”

(Al Fatihah :5)

“My preparation make me perfection”

(The Researcher)

ACKNOWLEDGEMENT

Assalammu'alaikum wr.wb.

Alhamdulillah, first thanks to Allah S.W.T who has given us the mercy, guidance, and presents in our life. Sholawat and Salam are for the great Prophet Muhammad S.A.W who leads us to the truth. The researcher could accomplish her thesis with helps and supports from the others. Therefore the researcher would like to express her gratitude as follows:

1. Dr. Mudofir, S.Ag., M.Ag., as the Rector of State Islamic Institute of Surakarta,
2. Dr. H. Giyoto, M. Hum., as the Dean of Islamic Education, Teacher Training Faculty of State Islamic Institute of Surakarta, and the consultant who has given his guidance to the best result of the thesis,
3. All lecturers and office staffs of English Education Study Program, thanks for giving the service and time during her study,
4. Drs. H. Mushonif, M. Pd as the Headmaster of MTs N Boyolali who had permitted her to carry out the research at MTs N Boyolali,
5. Nur Aida, S. Pd., as one of English teacher of MTs N Boyolali, for guidance, kindness, patient and help her during the research,
6. The family of MTs N Boyolali for facilitating, helping, participating in this research,
7. My beloved family (Mr. Teguh, Mrs. Sarwini, Mrs. Landep, and Mr. Noyo) who always give their pray, support, and affection for researcher,

9. My beloved younger brother and sister (Ibnu Muhammad Kahfi and Jenic Maulia Rachma), who always support and guide me to finish of this research,
10. My the best Partner Laila Safaatun, S. Pd who always support, prayer, and care with me,
11. My friends Kusnul, Ifti, Mas Daroji, Bika, Aulia Pitik, Lia, Fauzan, Gupik gengs, Anjar and others who I can't mention one by one, thanks' for motivation and love me,
12. Everyone who impossible mention one by one.

The researcher realizes that this research is far from being perfect. The researcher will be delighted to accept any constructive criticism and suggestion. She greatly expects that this research will be useful and give contribution for the readers.

Wassalammu'alaikum wr.wb.

ABSTRACT

Indra Pujiyanto. 2017. *Improving Student's English Vocabulary Mastery Through "Random Picture" (A Classroom Action Research for Eight Grade Students of MTs N 1 Boyolali in the Academic Year of 2015/2016)*. Thesis. English Education Department, Islamic Education and Teacher Training Faculty. IAIN Surakarta.

Advisor : Dr. H. Guyoto, M. Hum

Key Words : Vocabulary, Random Picture

The problems of the research are How good is the implementation of teaching vocabulary using random pictures and What are the strengths and weaknesses of the implementation of random pictures for vocabulary mastery in the eighth grade students at MTs N Boyolali in the academic year 2015/2016. The research subject is the Eight Grade Students of MTs N 1 Boyolali. The objectives of the research are to know how good the implementation of teaching vocabulary using random pictures and to find out the strengths and weaknesses of the implementation of random pictures of vocabulary mastery at eighth grade students at MTs N Boyolali in the academic year 2015/2016.

The research was Classroom Action Research (CAR). The research was conducted in MTs N 1 Boyolali, which is located Jl. Kemuning No. 32 Boyolali. The population was The population of this research is the eighth grade students in MTs N Boyolali that consisted of 10 classes. The sample of the research is class VIII G. The researcher chose the sample by using cluster random sampling technique. The data was collected by using pre-test, treatment and post-test. The analysis qualitative data use in this research was the observation of student's activities during teaching learning process, and the interview before and after Classroom Action Research (CAR).

The result of this research showed that firstly, Random Pictures could improve the students' Vocabulary Mastery. This improvement was proven by the findings after the research was conducted. The findings were: the students could answer questions about describe the picture correctly, they could determine the thing that describe "picture", they could summarize the material of descriptive text, and then the score of vocabulary mastery get improve. Those improvements caused by the implementation of Random Pictures are strengthened by the mean score of pre-test and post-test 2. The mean score gets improved from the pre-test to post-test 2. The students get 60.89 in the pre-test and 84 in the post-test 2. There are only 20.54 % students who reach the passing grade (70) in the pre-test. Meanwhile there are 89.47 % students who reach the passing grade on the post-test 2. The improvement of the students who achieve the passing grade is 68.93 %. From those reasons above, it can be concluded that Random Pictures was able to improve the students' vocabulary mastery. Secondly, the students gave good response towards the implementation of Random Pictures in Vocabulary Mastery. It was proved by the result of questionnaire which showed that 77.14 % students like the implementation of Random Pictures for Vocabulary Mastery.

CHAPTER I

INTRODUCTION

This chapter discussed the background of the study, problem of the statement, objectives of the study, the benefits of the study, and the definition of key terms.

A. Background of the study

Human being needs language in this world. It is important to help people to communicate with others. English is one of language used in international communication. English is used by most people in this world because it is easy to be learnt by people even they never know about English yet. Mastering English is very important in this global era. It is caused by the needs of globalization, which make people around the world to interactive each other.

The important device in a language is word. According to Fauziati (2010: 155), Vocabulary is central of language teaching in learning. Vocabulary is the most fundamental thing in the mastery of a language. It is an element that links the four skill of language such as listening, reading, speaking, and writing. Native speakers learn most of their useful vocabulary through listening. Students who have a lot of vocabulary to improve their listening skill they will be able to understand what they heard. When the learners feel ready to speak they can then draw on this previous listening. So when learners have enough receptive vocabulary they can be helped to use some of them productively in speaking also, when the word appears in a context that provides a lot of clues to its meaning, this is an opportunity to practice the most important of all vocabulary learning strategies, guessing from context is such a widely applicable and effective strategy in reading comprehension. Then, vocabulary

mastery is useful writing skill (Nagy in Dewi 2015: 2120). In writing the learners need to extend their productive vocabulary to include the specialid vocabulary of their areas of stydy and interest.

Realizing how important the vocabulary, Allen (1997: 49) said that vocabulary is very important in a language, when we learn a language like English, we learn the words of language. Students must continue to learn words as they learn structure as they practice in target language. Vocabulary is needed to master the four skills (listening, speaking, reading, writing) in English. Without mastering vocabulary, people will not be able to use English effectively.

Vocabulary is one of elements of language that should be learnt and taught. David Nunan (1991: 117) argues that the acquisition of an educated vocabulary is essential or successful second language, because without an extensive vocabulary, students will be unable to use the structure and function. It means, vocabulary is the first component that must be learnt by students in learning language.

Meanwhile, Jhon Read (1991: 117) stated that vocabulary knowledge involves knowing the meaning of words and therefore the purpose of a vocabulary test is to find out whether the learners can match each word with a synonym, a dictionary – type definition or an equivalent word in their own language. It is the most important element to make someone more understand the language. Without sufficient vocabulary, people cannot communicate and express their ideas easily both oral and written form. In a formal education (school), a teacher is one of components who have an important role in learning process. From explanations above, it can be inferred that learning vocabulary is important.

Based on explanation above, it can be conclude that vocabulary is the basic component of language. Without a sufficient vocabulary, someone can not communicate effectively or express his ideas both oral and written from. Therefore vocabulary mastery must be on the first priority in English language teaching.

MTs N Boyolali is one of school that has the indicators of low in vocabulary. Based on interview with the English teacher, this school has own indicators of low in vocabulary such as: (1) the students got difficulties in memorizing the word; (2) the students were confused in translate English words; (3) the students could not pronounce the words correctly; (4) the students could not arrange the sentences by using correct word grammatically. The research has done the research in MTs N Boyolali because the reasons above. MTs N Boyolali is a favorite school but condition of students need more attention in English learning system.

Another reason about low achievement in vocabulary view from English teachers statement when the researcher did interview on February, 9th 2015. The criteria minimum requirement is 75, but there were many students can not reach the criteria minimum requirement. They just got the score about 65. From the result of interview, the researcher found several problems about students' vocabulary mastery. They problem were students' competence and classroom situation.

The first problem, the students have low competence. It is viewed from the statement of majority students who say the English is a difficult lesson. On of students in eight grade (Nisa) state that, "vocabulary is very difficult to remember because we must remember many6 words. Today, I remember vocabulary. Tomorrow, I have forgotten it and the teacher give a new vocabulary again. Besides, I get difficult to pronounce the word".

Based on the statement above, the researcher found several problems about students' vocabulary mastery such as the students got difficulties memorizing the words. The kind of difficulty is found when the students got the question from the teacher, read the text and answered the exercise. Secondly, the students were confused in translate the English words. Thirdly, the students could not pronounce the words correctly. English written from is different with pronouncing, so it makes the students got difficulty to pronounce.

The second problem is the classroom situation category, the researcher also found problem in this category. Some students made noisy in teaching learning process. They chatted with others friends or some students disturbed the other ones, so it made the friends that paid attention the lesson would be lose concentration. The students tended to be passive learners. The researcher observed that the students were silent when their teacher asked them about responses and difficulties to the material they have learned. Lastly, students' attention to learn English was no optimal. The students paid little attention during teaching learning process. Some students did not pay attention to teacher's explanation, but they drew something in their books.

The problems were not only from the students who have difficulty in accepting the lesson but also the difficulty of the teacher to delivered the material. When the researcher did pre-observation in the class., the teacher used three-phrase technique in English teaching. Three phrase technique is the technique of teaching process using three steps; before, in process, and after. The teacher applied this technique well, but she did not use a supporting media in teaching learning process. The teaching learning process would fell monotouns without a media. The students would difficulty to accept the lesson. They also would feel bored, less enthusiastic, and discouraged to learn.

Vocabulary is one of elements of language that should be learnt and taught. David Nunan (1991: 117) argues that the acquisition of an educated vocabulary is essential or successful second language, because without an extensive vocabulary, students will be unable to use the structure and function. It means, vocabulary is the first component that must be learnt by students in learning of language.

Meanwhile, Jhon Read (19991:117) stated that vocabulary knowledge involves knowing the meaning of words and therefore the purpose of a vocabulary test is to find out whether the learners can match each word with a synonym, a dictionary – type definition or an equivalent word in their own language. It is the most important element to make someone more understand the language. Without sufficient vocabulary, people cannot communicate and express their ideas easily both oral and written from. In a formal education (school), a teacher is one of components who have an important role in learning process. From explanations above, it can be inferred that learning vocabulary is important.

From those the reasons, the researcher tries to use “Random Picture” as the technique to increase the students’ interest in teaching learning English. Through playing Random Pictures in a class, the teacher could find out the ability and creativity of the students. Therefore, the students were not bored and easy to memorize vocabulary in the learning process. The researcher chose Random Picture because Random Picture was an interesting technique to study English especially in Junior High school like playing a game. Teaching English to children needs a special technique. The best way to teach child’s vocabulary was by providing a variety of opportunities for new interesting experience. One of the techniques used Random Picture, by description random picture the students can study and play together

with their friend in the class. It was very attractive and interesting. Teaching vocabulary in Junior High school was not easy. The teacher would have many problems in teaching English.

Based on the problem, the researcher conducted an action research under title **“IMPROVING STUDENT’S ENGLISH VOCABULARY MASTERY THROUGH “RANDOM PICTURE” (A Classroom Action Research for Eight Grade Students of the of MTs N 1 Boyolali in the Academic Year of 2015/2016)”**.

B. Problem Statements

Based on the background of the study, there are some problem statements which will be formulated as follow:

1. How good is the implementation of teaching vocabulary using random pictures in of the eighth grade students at MTs N Boyolali in the academic year 2015/2016?
2. What are the strengths and weaknesses of the implementation of random pictures for vocabulary mastery in the eighth grade students at MTs N Boyolali in the academic year 2015/2016?

C. Objectives of the Study

Based on problems statement the researcher found the objectives of the study such as:

1. To know good the implementation of teaching vocabulary using random pictures of the eighth grade students at MTs N Boyolali in the academic year 2015/2016.
2. To find out the strengths and weaknesses of the implementation of random pictures of vocabulary mastery at eighth grade students at MTs N Boyolali in the academic year 2015/2016.

D. Limitation of problem

In this research, the researcher made a limitation of the problem to avoid the study of being too large in scope. In this research, the researcher limited the problem in vocabulary mastery. It was just because as the researcher observed that vocabulary is the basic element of four skills in English lesson (listening, speaking, reading, and writing).

The researcher used random picture as the media as the technique, because this technique is familiar for Indonesian. It was possible for students to apply it easily. So it would interest the students to study English and there were many “real” language and offered a rich source of authentic input, especially in the term of vocabulary. For this research, the researcher focused on improving students’ vocabulary ability. The source of the materials was from the syllabus, and lesson plan which would be taught to the eighth grade students of MTs N 1 Boyolali. The researcher started doing the observation when the researcher did *PPL*. From the interview with the English teacher, the eighth grade students of MTs N Boyolali had low score in improving vocabulary.

There were some vocational Junior High School in Boyolali but the researcher chose MTs N 1 Boyolali as object an of the research. The researcher used random picture technique because random picture technique is the new technique there.

The researcher chose the eighth grade students of MTs N 1 Boyolali, especially on G class as the main object of the research because the students were unmotivated in learning English in this class. It could be indicated by the low mark or score of this subject. Students at the eighth grade students especially on G class always get the English lesson only twice in a

week and the difficulty that is got by the teacher when she teaches about vocabularies where the students of this class tend to forget the words easily.

E. Benefit of the Study

This research can give positive results. It is expected that the result of this study can give some benefits as follows:

1. Theoretical Benefit

- a. The result of the research could be used as the reference for those who want to conduct a research about improving students' English vocabulary mastery.
- b. The result of the research could be useful for English teacher in their teaching English vocabulary.
- c. The finding of this research would be enrich the technique in teaching English vocabulary.

2. Practical benefit

- a. For the English Teacher
- b. This study is intended to be valuable for the teacher in guiding the students in mastery their vocabulary.
- c. For the Students

The result of the study would help them in mastering vocabulary. This study could give benefit to the students in mastering vocabulary and the new the strategies used for better understanding in the processes underlying in mastery vocabulary.

3. For the other Researcher

This study was valuable for enriching the literary study, particularly among the researcher and who wants to take research about vocabulary especially vocabulary mastery of the students.

F. Definition of Key Terms

There are some key terms which are used by the researcher in conducting this thesis:

1. Improving

Improving is process becoming or making something better (Oxford Dictionary, 2008:222).proving is deepest the student's enlarge understanding in remember their vocabulary (Fatimah, 2005: 7)

2. Random picture technique

Random picture technique Wright (1997: 10) says that random picture technique one of a technique to improve learning English process activity in the class by using kinds of picture. Which help to solve a problem or generate ideas for new ways of doing English learning proces. Look at the picture, be inspired and think how the picture relates to student's problem. There are no wrong or right answer, all ideas are valid. (Wright, Andrew. 1997. *Picture For Language learning*. Cambridge: cambridge University Press).

3. Vocabulary

According to Hornby (1995:1331), vocabulary is a total number of words, which (with rules of combining them) make up a language. Thornbury (2002:13) states, “without grammar very little can be conveyed, without vocabulary nothing can be conveyed.Mastery

4. Mastery

Mastery means great skill or knowledge, complete control, (Oxford Learner's Pocket Dictionary, 1995: 256). In this research, mastery means the students mastery in their vocabulary.

5. Classroom Action Research

Classroom Action Research is a form of research in which practitioners reflect systematically on their practice, implementing informed action to bring about improvement in practice. (Wallance, Michel J. 1998. Action Research for Language Teacher. Cambridge: University Press)

G. Previous Studies

The researcher presents the previous study that will use in this research. There were a study that conducted by the other researcher that similar of research design in this research. First, the researcher was conducted by Ririn Dwi Astuti Kartikasari. She was the student of English Education of IAIN Surakarta. She was done with entitled "Improving Students' Speaking Skill Using Role Play at the Third Grade Students' of SMA 1 Wonosari", the research was done at 2013 in SMA 1 Wonosari. This research, based on its background, commonly the third grade students of SMA 1 Wonosari have low speaking skill. The research shows that the students in class XII IPS 1 of SMA 1 Wonosari was more interest when they were speaking using role play in speaking class. This research implied that the role play technique can improve students' speaking skill. It was improving the speaking class at the third grade students in SMA 1 Wonosari by using role play media.

Second, the researcher was conducted by Neaty Muttahidah. She was a student of English Education UIN Syarif Hidayatullah Jakarta. She was done with entitled "Improving Students'

Vocabulary Through Vocabulary Card (A Classroom Action Research in the First Grade of MTs. Nurul Falah School at Pondok Ranji Ciputat Tangerang)", the research was done at 2011 in MTs Nurul Fatah Pondok Ranji Ciputat Tangerang. This research based on background, commonly the first grade students of MTs Nurul Fatah Pondok Ranji Ciputat Tangerang. The subject of this research was consisted 30 students' of first grade.

The method used in this study was Classroom Action Research (CAR). The classroom action research design applied in this study was a collaborative with the English teacher in the class. The Classroom Action Research was done based on Kemmis and Mc Taggarts' design, it content of two cycles in each cycle consists of planning, acting, observing, and reflecting. The data was gathered thought qualitative and quantitative data. The qualitative data were gained by analyzing the interview and observation result. Then, quantitative data were obtained from the students' vocabulary score of pretest, posttest, and questionnaire.

CHAPTER II

THEORITICAL REVIEW

A. Review of Vocabulary

1. Definition of Vocabulary

There are a lot definition of vocabulary. Fauziati (2010: 155) explains that vocabulary is central to language and critical importance typical language learner. Without a sufficient vocabulary, someone can not communicate effectively or express his ideas in both oral and written from. Hatch and Brown (1995: 1) state that vocabulary is a list or set of words for a particular language or a list or set of words that individual speakers of a language might use. Since vocabulary is a list, that only system involved is alphabetical order dictionaries.

Mc Whorter (1989: 310) states vocabulary means the ability to recognize individual words and to associate meaning with the particular combination of letters that form the word. Interpreting from Mc Whorter theory. Vocabulary is recognized from groups of letters that stand for or represent build a word: this word has meaning. Another states combining a letter into a word. It will build a new vocabulary. Furthermore, Burn (1975: 295) explains that vocabulary is stocks of words used by person, class a profession.

Based on explanation above, it can be concluded that vocabulary is the main key to understand foreign language. It is a list of words which are supposed to know or learn. It is also symbol of ideas in which it is needed to express and to communicate.

2. Vocabulary Mastery

Coulson et all (1987:1050) define taht mastery is skill. Or knowledge. It means mastery is the ability to use one of knowladge. While Hornby (1995:523) says that mastery is the complete control or knowledge. Mastery is the whole power or ability to direct knowledge. It means mastery is the ability to combine skill and knowledge in one certain area.

Vocabulary mastery is the basic knowladge in learning English. Coady and Hucking (1998: 5) say that vocabulary is the central languange and of critical importance to language learning for the young lerners. Mastering vocabulary is important for young learners since vocabulary knowledge, as one the basic component, plays an important role in the four language skill (Burn, Roe, and Ross, 1984: 285). It gives contribution to learners to perfom their skill better.

The process of vocabulary mastery is not simple. The vocabulary mastery can not be done spontaneous but systematically. Vocabulary mastery is then defined as students' complete knowledge of meaning and form of words in context appropriately. Broadly in Renoly (2014: 2056) defined, vocabulary is knowledge of words and word meanings.

When someone learns something, he or she must know what the thing that he or she learns. In the same condition, when someone wants to learn vocabulary, it will be better when he or she knows what the vocabulary is. It will make the learner easily in learning vocabulary. Actually, there are some definitions of vocabulary learning. It based on some sources, they are as follows:

1. “Vocabulary is a list or collection of words and phrases usually alphabetically arranged and explained or defined” (Mariam Webster, 2010).

2. “Vocabulary is a list or collection word arranged in alphabetical order and explained; a dictionary or lexicon, either of a whole language, a single work or author, a branch of science, or the like; a work-book” (Brainyqueto, 2010)
3. Besides that, the other definition of vocabulary is, “vocabulary is the sum total of the word used in a language, by speaker, or for dictionary making” (Hartmann & James, 1998:108).
4. In the Oxford Advanced leaner’s Dictionary of Current English, Hornby (1995) defines vocabulary as: (1) the total numbers of word in a language; (2) all the word known by a person or to use in particular book, subject, etc; (3) a list of words with their meaning (informal).
5. “Vocabulary is one of language components. It supports the teaching and learning of the four language skills of reading, listening, speaking and writing” (Dedy Suryana, 1990).

As the language component, vocabulary must be taught in proper way. In his book, Dedi suryana states that; vocabulary divided into:

1. Vocabulary skill involved deducing meaning from the context, use of Dictionary, word information coining, and ignoring unfamiliar word.
2. Vocabulary activities involved word guessing, word association, crossword puzzle, cline, word-classification, and rid dies.

From some definitions of vocabulary, it can be concluded that vocabulary is some words that are arranged alphabetically and it is used in a language to express one’s idea in either oral or written from and particularly involved in teaching certain foreign language.

a. Word Class

Class is the classification of word of a language depending on their function in communication (Hatch and Brown, 1995:218). Word class membership is an important lexical feature, in this case are noun, verbs,adjectives, and verbs.

1) Nouns

Nouns can be divided into subclasses. There are proper nouns and common nouns.

There are also count nouns, mass nouns, abstract nouns, and concrete nouns.

2) Verb

Verb are words that denote action. Process verbs which have no definite and point also seen fewer verbs like than strong action. Vandler place verbs into four classes: activities (run, walk, look for), accomplishment (built, kill, paint a picture), achievements (recognize, find, lose, understand, hear) and states (know, love, have, desire)

3) Adjective

Adjective are used to highlight qualities or attributes. Certain adjective are typical used to describe particular nouns. Adjective can point out positive or negative qualities. One reason why linguist believe that positive adjective are learned more easily is that they are unmarked.

4) Adverb

Adverbs are similar to adjective in many ways although they typically assign attributes to verbal, to clauses or to entire sentences rather than to noun. Locative adverb, like here and there are used very early by young children as ways of pointing to the location of object. Time adverbs, like now, then and yesterday are used by second language learners as an initial way to mark.

b. Word meaning

The two important issues in word meaning students' usually get difficulties to infer are synonymous and antonymous.

1) Synonyms

Hatch and Brown (1995:19) explain that synonyms are words that share meaning. Although dictionaries list synonyms as words with similar meaning, the fact X is synonym for Y does not mean that Y necessarily a synonym for X. One of the most important ways for making text together is with the use of synonym or chains of related words. It might be selected words that are not synonymous but which still refer to the same object.

2) Antonyms

Hatch and Brown (1995: 20) define antonyms as words that mean the opposite. They present interesting problem for anyone seriously interested in semantic feature analysis. The feature on which the two words contrast can be identified. Many apparent opposites, however, are really extreme points on graduated classes. This is

especially true of adjective. Hot and cold may seem like opposites, but temperature is scale, and it is a judgement as to what constitutes hot just bisected into a plus and a minus value. In the same way, pairs like big-small, many-few, tall-short, happy-unhappy, and long-short ate the opposite ends of scales.

Based on definition above, it can be concluded that vocabulary mastery is the students' knowledge concerning with words and meaning, including word class (noun, adjective, verb and adverb) and word meaning (antonym and synonym).

3. The Importance of Vocabulary

Vocabulary is the basic of English language. In every lesson, teacher has to introduce new words and ask the students to practice them, making clear the meaning and the ways in which each can be used. It means that vocabulary has important role in English teaching including reading, speaking, listening, and writing. David Wilkins, quoted by Thornbury (2002: 13), "Without grammar very little can be conveyed, without vocabulary nothing to be conveyed." It show that how important vocabulary learning in language learning.

Allen (1997: 149) said that vocabulary is very important in a language, when we learn a language like English, we learn the words of language. Students must continue to learn words as they learn structure as they practice in target language. Vocabulary is needed to master the four skills in English. Through vocabulary, we convey our ideas, emotion, and efficiently. Without mastering it, people will not be able to use English effectively.

Coady and Huckin (1998:5) say that vocabulary is central to language and of critical importance to the typical language learner. It means that vocabulary takes an important role

in teaching language. With more vocabulary, the learners will be easily in understanding and using language without any difficulties.

Based on the explanations above, it can be concluded that vocabulary is very important element in language learning. Vocabulary has a function to support other language skills. The skills are listening, speaking, reading, and writing. If the students have more vocabulary, they will be able to master those language skills easily.

4. Kind of Vocabulary

Several experts divided vocabulary into different types. Lewis and Hill (1992: 99) divide vocabulary into two types, active and passive vocabulary. Active vocabulary is the words that the students can understand, pronounce correctly and use constructively in speaking and writing. While passive vocabulary is words that the students recognize and understand when they occur in context. But which learners can not produce correctly themselves.

One other experts, Hatch and Brown (1995: 218) classify the vocabularies into two based on their functional categories, they are major classes and closed classes. They are explained as follows with examples.

a. Major classes

- 1) Nouns: it refers to person, place or thing, i.e. Tom, beach, pen, etc.
- 2) Adjective: it refers to the words that give more information about a noun or pronoun, i.e. diligent, lazy, smart, beautiful, handsome, etc.

- 3) Verb: it refers to the words that denote action, i.e. cook, study, play, write, etc.
- 4) Adverb: it refers to the words that describe or add to meaning of a verb, adjective, another adverb or a whole sentence, i.e. beautifully, quickly, slowly, etc.

b. Closed Classes

- 1) Pronouns: it refers to nouns that have already been mentioned, i.e. he, she, they, him, her, them, etc.
- 2) Preposition: it refers to the words that help locate items and actions in time and space, i.e. at, on, in, above, behind, under, etc.
- 3) Conjunction: it refers to the words that connect sentences, phrases or clauses, i.e. and, or, but, etc.
- 4) Determiner: it refers to the words that used before a noun to show which particular example of the noun you are referring to, i.e. a, an, the, that, this, those, my, your, etc.

5. Teaching Vocabulary

Coady and Huckin (1998:11) explains there are ways to teach new vocabulary, there are more interesting, more effective and more memorable ways and helping to fix in students' minds, there are:

a. Demonstrate

The demonstration both helps to make the meaning clearer, and help to fix the word in the students' mind. If every word is 'explained' in the same way, either by translation to verbal explanation, they merge into a sea of language in which it is difficult to distinguish individual items. Demonstration highlights a particular word and helps associate it in the students' mind with visual and aural memories.

b. Use the real thing

Teacher becomes so pre-occupied with teaching that sometimes they explain, or even draw on the blackboard things which are immediately available in the room. Sometimes the explanation is more complicated than pointing.

c. Draw or Sketch

Teachers do not need to be artists to make simple sketches which illustrate meaning, particularly if they bear in mind the advice given above teaching contrast rather than meaning itself.

d. Use the blackboard to show scale or grade

Words like *cool*, *orange* (colour), or *probably* may be explained by presenting them with groups of related words:

Hot *red* *certainly/definitely*

Warm *orange* *probably/possibly*

Cool *yellow*

Cold

e. Antonyms

It is worth mentioning that the explanations given are not exact definitions of the word, the level of explanation must be suitable to the students' level of explanation must be suitable to the students' level of English at the time so that dictionary like accuracy can often be counter productive.

f. Synonyms

Sometimes it is helpful particularly with a relatively unimportant word or passive vocabulary to provide a quick synonym explanation. It is still helpful if teacher remembers to say *it is similar in meaning to...., rather than it means the same as....*, the former phrase helps to build up in the student's mind the idea that language consists of choice, that words do not mean the same as each other, the second undermines this important attitude.

g. The dictionary

The process of learning a new word also provides practice in important learning skills, dictionary using and for those using a good monolingual dictionary, ensure that they do have other examples for words used in the context, a note on its stress, etc.

h. Verbal explanation

Some language items are best explained by being used in a variety of contexts with the teacher commenting on the use. It is important with such explanation to use more than one context to avoid any incidental features of that particular context.

This kind of explanation is particularly useful in dealing with the lexical items common within functional teaching. Most functional phrases are best explained by two or three examples and a description of the function performed. It is not usually necessary to add further explanation.

i. Translation

Although some teachers use this technique, it is equally true that others do not use it. To some it is seen as boring and traditional. For some words, however, the only sensible way to explain is by translation. This is often the case with certain types of technical word-measures and for words which are 'a kind of...'

6. Testing Vocabulary

A good knowledge of English vocabulary is important for anyone who wants to use the language; therefore knowledge of vocabulary is often tested. It is important that the test maker be aware of what someone is doing when testing vocabulary.

Testing vocabulary has many types. Thornbury (2002: 130) said the types of testing vocabulary are as follows:

a. Multiple Choice Test

Multiple choice tests are a popular way of testing in that they are easy to score (a computer can do it). They are easy to design (or seem to be). Moreover, the multiple choice format can be used with isolated words, words in sentence context, or words in whole texts. Here, for example is a 'word only' example:

Table 2.1 the example of multiple choice test

Tangle	means	a. A type of dance
		b.a tropical forest
		c.a confused mass
		d.a kind of fruit

b. Rearranging

Students have to rearrange give words so that the sentence makes sense and grammatically correct. Example: me/tall/as/she/as/is

c. Cloze Test

Cloze test based on a text with gaps which are put there regularly after every seventh, eighth or ninth word. The examinee has to complete the gaps with appropriate words. The example of cloze test:

Table 2.2 the example of cloze test

Tumbu fly
<p>In Africa south of the sahara, another (1) the _____ treveller may ancounter is (2) _____ tumbu or mango fly, which (3) _____ its eggs on clothing laid (4) _____ on the ground to dry. (5) _____ larvae hatch and burrow their (6) _____ in to the skin, causing boil-like (7) _____. These can be avroided by (8) _____ that clothes, bedding, etc., are (9) _____ spread on the ground to dry.</p>

d. Word Formation

Students have to change the form of word so that it fits to a particular sentences. They have to show that they understand the context and that they know various forms of a word. For Example:

The next time you go to the supermarket don't forget to buy the BIGGEST bottle of kitchen clearer you can to (1) your work surface. Recent (2) ... research in America has shown that the kitcen is often the most (3) of all rooms in the home. The (4)

of food, heat, and dampness means the kitchen is (5) ... a breeding ground for bacteria that can cause stomach upset and vomiting.

Table 2.3 the example of word formation

BIG	INFECT	SCIENCE
HYGIENE	COMBINE	

e. Matching

The normally test meaning of words through matching usually words of the of the opposite meaning. Students do not produce any vocabulary, they only match given words. Example:

Put these words into the correct column:

Apple, grape, carrot, banana, cauliflower, spinach, strawberry, potato, cherry, watermelon.

Table 2.4 the example of matching

FRUITS	VEGETABLES

f. Dictation

The examiner dictates a text and students write it down. Here the teacher examine mainly spelling or pronunciation and also listening. Dictation is an easy way of testing for the teacher because the preparation is minimal.

g. True / false

According to a text or listening the teacher prepares a set of statements and students have to circle true or false. This type of listening is typically used for testing reading or listening abilities, however, it can have much wider usage. The teacher can test also synonym, antonym, grammatical forms, etc.

h. Questions and answer (Open question)

This type of exercise can be based on a text or a listening but it does not have to be based on anything as well.

i. Gap filling

This method is often mixed up with cloze test but it is a completely different type. This type can be used for various proposes: it can test, for example, irregular verb or preposition.

j. Transformation

This type students are given sentence which they have to put into another form.
Example:

Put the following sentences into past simple tense:

She likes her job.

Jane wears jeans.

k. Error Corection

Students are given sentence with errors which concern mainly grammar.

l. Translation

Students receive sentence or a test in their mother tongue and their task is to translate into English

m. Information Transfer

The students do not answer any question, but they write some information about the text and this way they show if they have understood it.

The researcher just used a part of them which appropriate in this research, they were: multiple choice, translation and rearranging.

B. Theoretical Description

There are some definitions of vocabulary composed by some experts. Fauziati (2002: 155) states that vocabulary is central to language and of critical importance to typical language learner. Without a sufficient vocabulary, one cannot communicate effectively or express his idea both oral and written from. When the learners do not know how to enrich their vocabulary, they often gradually lose interest in learning. Meanwhile, Ur (1996: 60),

states that vocabulary could be defined roughly as word teacher teach in the foreign language.

Vocabulary plays important role in mastering English. Rivers in Nunan (1992: 17) stated that vocabulary is essential for successful study on the second language. Wilkins in Thornbury (2005: 13), summed up that without nothing can be conveyed. Vocabulary refers to all word in the whole language used in particular variety. Hornby (1995: 133), states vocabulary is a total of words in language. From the definition above, the researcher tries to conclude that vocabulary is a total number of word symbols of ideas in which it is important to learn vocabulary as a result to master in English.

C. The Kinds of Vocabulary

When learning vocabulary, someone will find some type of vocabularies. They are:

a. Reading vocabulary

Reading vocabulary is all the words someone can recognize when reading. This is the largest type of vocabulary simply because it includes the order three. By doing that people can master reading vocabulary. They comprehend the text well when they read the text. The teachers usually give the list or word that related to the text for their students in order to comprehend the text well. The list words can be called the reading vocabulary. It can make the students easy in comprehending the text. The students will get the difficulty in comprehending the text when they do not know the meaning of the word.

b. Listening vocabulary

Listening vocabulary is all the words he or she can recognize when listening to speech. This vocabulary is aided in size by content and tone of voice. The listening vocabulary can help the students have some vocabulary, the can comprehend the oral text well.

c. Writing vocabulary

Writing vocabulary as all the words he or she can employ in writing. As consider to the previous two vocabulary types, the writing vocabulary is stimulated by its user. When the students are asked by theirs teacher to make a story, something that very important that must be acquired by the students is the vocabulary acquisition. Someone that has some vocabulary will be able to make the story well. He or she even can make the story that is long but someone that his or her vocabulary is limited will feel difficult in making a long story. In conclusion, the writing vocabulary has an important role in writing activity.

d. Speaking vocabulary

The speaking vocabulary is all the worlds he or she can use speech. Due to the spontaneous nature or the speaking vocabulary, words are often misused. This misuse – though slight and unintentional – may be compensated by facial expression tone of voices, or hand gestures. When the people want to be able to speak in English fluently, they must have some vocabulary. If people just have a limited vocabulary acquisition, they will get some difficulties in his or her communication. They even tend to feel doubt when they speak to others.

Besides that, Haycraft (1997:44) distinguishes the kind of vocabulary in two parts. They are:

- a. Active vocabulary: the words which students can understand, pronounce correctly, and use constructively in speaking and writing; Harmer (1991:159). He also adds that active vocabulary refers to vocabulary that students have been taught or learnt and which they are expected to be able to use. Active vocabulary is productive learning referring to speaking and writing.
- b. Passive vocabulary: words which the students recognize and understand when they occur in context, but which learner himself cannot produce correctly. Harmer (1991:159) also adds that passive vocabulary refers to words which the students will recognize when they meet them but they will probably not be able to produce. Passive vocabulary is receptive learning referring to reading and listening.

The learners are hoped to have these vocabularies to master the English language. As we know that in English, there are four skills. They are speaking, reading, listening, and writing. Several people say that if someone has a good vocabulary acquisition, he or she will be able to master four skills. From this statement, we can conclude that vocabulary is one of the factors needed to master the four skills in English language. Then, he or she will do the exercise in reading or listening comprehension. He or she can also write everything that he or she wants to write. On the other hand, someone will have a doubt to speak English if he or she does not have a good vocabulary acquisition. He or she even gets some difficulties when he or she does the task in reading and listening comprehension test.

D. Teaching Vocabulary

In this case, we are interested in vocabulary learning goal. In addition, we can make that goal be specific. The most ambitious goal is to know all of the language (Nation, 2001:6). From that statement, we can describe that the aim learning vocabulary is want to know about language.

According the American Heritage Dictionary, teaching is a complex activity involving integrates skill, sharing ideas or opinions. Teaching vocabulary is giving knowledge about words to the students in order they will be able to improve their vocabulary and able to use them correctly. The purpose of teaching vocabulary is to help the students bring meaning and take the meaning from word sign, signals and symbols. To reach the goal, the students must remember many things about word and their ways as well as the word themselves. Concoran (1980: 157), states that the teacher is responsible for teaching students to recognize and identify to put the word together in to phrase not only teach the students to memorize the words but also teach them to analyze and implicate the word in writing. In conclusion, teaching vocabulary is teaching of words and meaning used for improving speaking, reading, and writing ability.

Wallace (1982:207) explains that teaching vocabulary has to be the following thing:

a. Aim

The aim is to clear for the teacher, how many things listed does the teacher expect the learners to be able to achieve the vocabularies? What kind of what?

b. Quantity

The teacher may have decided the number of vocabulary items to be learned. How new words in a lesson can the learners learn? If there are too many words, the learners may become confused or discouraged.

c. Need

In teaching vocabulary, the teacher has to choose the words that are really needed by the students in communication. They communicate and get the words they need.

d. Frequent Exposure and Repetition

Frequent exposure and repetition mean that the teacher should give much practice.

E. The Way to Improve Vocabulary

Vocabulary learning strategies are a part of language learning strategies which in turn a part of general of general learning strategies which in turn a part of general of general learning strategies (Notion, 2001:271). Strategy is a really important in teaching vocabulary.

There are some strategies or ways how to improve vocabulary mastery:

a. Game

This way is really good in improving vocabulary. Children enjoy constructive play and games. They are not only motivating and fun but can also provide excellent practice for improving pronunciation, vocabulary, grammar, and the four language skills (Brewster, Ellis, Girard, 2002: 173) from the statement we know that a game give a positive effect in arising students' desire. They will be fund end automatically they do and learner some vocabularies. Game also provides our student skills in every part of English language. They can help to improve attention span, concentration, memory, listening skills and reading skills (Brewster, Ellis Girard, 2000)

The effective way in improving vocabulary is involved in game. Every technique has their own disadvantages. Handing the time is the first problem in game. If we cannot control our time, means you have waste your time. Some of games are a cooperation group, it is good but there is a distance between smart student and low student.

b. Word cards

In the simplest form of learning from words cards, a learner writes a foreign word on one side of small, easily carried card and its first language translation.

Using word card can improve vocabulary mastery; it is reasonable because it is really efficient to save our time. The use of word cards provide an opportunity for learner to focus on the underlying concept of a word that runs through it various related uses (Nation, 2001:302) of course it has many advantages. It reduces the number of word to be learned. Like this, learners find the same word in the different meaning. It is good because one word can be interpreted more meaning in many concepts. For example *please turn right and you are right.*

c. Listening to music

Listening is an effective way to teach vocabulary. Learning vocabulary through listening is one type of learning through meaning-focused input (Nation, 2001:114). That statement allows us to the definition that learners need an explanation about the running word in the input in order to guess the words in appropriate context. They will be fun because they like the music. In addition when we learners are listening the music there is sound (music) so reduces a little bit of boring. Music will encourage the learners to match the word in a good context. But the way in selecting song is important too. A wrong song will kill our student desire.

d. Reading short story

Reading short story can help student improving their vocabulary. The most important condition to encourage learning relates to the choice of what is read, namely interest (Ellis in Nation, 2001: 118). Teacher can help learner's interest by choosing stories that learners are likely to be interested in. As a teacher that our task to understand our students.

F. The Definition of Random Pictures Technique

Random picture technique is one of a technique to improve learning English process activity in the class by using kind of picture. It help to solve a problem or generate ideas for new ways of doing English learning process. Look at the picture, be inspired and think how

the picture relates to student's problem. There are no wrong or right answers, all ideas are valid (Wright, Andrew. 1997. *Picture for Language Learning*. Cambridge: Cambridge University Press).

Random picture technique is one activity to increase student's vocabulary in English. It often is one of the most effective ways of integrating language skills in the language classroom. Through the terms 'random picture' have been interpreted in many different ways by both teachers and textbook writers, both activities offer flexible yet principled way of tailoring intergraded skills to learner needs. Mc Donough (1994:217) states that

"Network vocabulary and simulation work, on the other hand, usually requires the learners to take part in communication which involves personal experience and emotion."

According to Ronald charter in vocabulary and language Teaching (1988:12) states "The list contain a word from the target language, either a synonym in that target language, or a translation in mother tongue, and these can be accompanied by a picture or some mean of graphic or other monomeric representation".

While according to Aston in an Interaction workbook (1982) states "Mapping words activities can involve practice, especially, although by no means exclusively, where younger learners are involved".

From the statements above the writer concludes that speaking activities based on graphics are often a useful way of giving students' valuable practices, either when they are in the classroom activities or outdoor activities. The relationship between the Mapping Words and its effect to improve student's skill in mastering vocabulary, Nunan (1991) states

that “This activity is also useful way of developing notion of conversational listening skills in that the listener can ask for further clarification if something has been understood.”

G. Phase of Random Pictures Technique

A model for structuring words activities in the classroom is offered by Herbert and Sturridge (1979). In this case, Herbert and Sturridge state that “The structure incorporates the flexibility mentioned above with respect to how task can be graded, the role of the teacher during the activity and to the type of material to be used”.

They suggest three-phase sequences for staging Random pictures techniques in teaching vocabulary they are:

1. First-phase; the informational input can either be in the form of a memorizing to read or perhaps it could be listening based
2. Second-phase; the information that other learners have similar with respect to some of the measure above, and very different in other case.
3. The third-phase; the feedback phase, has to handled carefully so as not to become a negative account of what went wrong. For error analysis it might be possible to give a report on general types of mistake that were made in the group, or where and how communication broke down, as well as giving individualized feed back to learners.

H. Teaching English Vocabulary at Junior High School

1. Teaching Technique at Junior High School

Teaching technique used by teachers when teaching subjects in the classroom rather monotonous, the conventional techniques such as lectures and translation. This technique does not involve the learners in the learning process. Whole learning process with more conventional technique centered on the teacher as the teacher, thus making passive learners. This resulted in the students feel bored and less interested in the subject of English. Requirement of an innovative technique for teaching learning vocabulary is the students are interest to learn and also enjoy the flow of the material. One technique that can be used is uses a random picture. Random picture thinking is way to develop activities in all directions by relying on image and the relationship between one branch with another branch, also in a more interesting and unique. Random images technique made of learners to think creatively and focus on themes that are being discuss, learners will also be excited by using random image were picture of interesting and key is the core concept and supported discussions with a variety of colors. Random image technique has never been applied before in the process of teaching learning English at MTs N Boyolali.

2. Curriculum

a. Principle of Competency-Based Curriculum

There are several theoretical principle that implicate and suopoort the design of the curriculum. The Theory is adopted as a systematic thought is taking a decision of various formulas.

1.)Competence model

There Number of competencies relate to language learning, which have different perspective point of view. The using of a competence model is motivated by pedagogical language consideration which develop and revolute since about three years ago (Curriculum, 2004:1)

The model is formulated as communicative competence as represented by Celcea – Marcia in Curriculum 2004 (2004:1) language is not merely a set or rules, but a means of communication. This model is formulated a Communicative Competence (CC). Communicative Competence indicates that the main competence target in language education is Discourse Competence. It mean that when someone communicates either orally or written form. She or involved in a discourse. Discourse is a means of communication which is influenced by topics, the interrelationship of the doers, and the way of communication whether it is held in spoken or written. This communication event involves cultural and situational context.

To communicate, the students need four language skills, namely: listening, reading, and writing. In order to gain acceptable language, they still need linguistic cultural and strategic competencies. The function of each competency can be explained as follow:

- (a) the language skill refers to abilities to choose suitable utterances, or theoretical steps.
- (b) Linguistic competence includes the use of grammar, vocabulary, pronunciation, intonation, and so on.
- (c) socio-cultural competence refers to ability the use the language based on the cultural contexts.
- (d) strategic competence is the simplifying, asking for repetition, opening dictionary etc.
- (e) discourse competence is ability to unify, organize, or to connect the components so that the message of communication would be integrated in cohesive, and coherence way.

2.) Language Models

Looking at the language as social phenomena, language model is used as the theoretical background in curriculum 2004. It puts the language on context of culture and context of situation.

a) Context of culture

In previous part, it has been stated that's language is used as communication system among people in the context of culture and context of situation.

b) Context of situation

Every communication happens in context of situation which has 3 components, namely: field, tenor, and mode. Field refers to what is happening, or subject matter. Tenor refers to relation of the person or interpersonal relation who involved. Mode refers to the ways of communication or channel used whether it is spoken or written.

b. Converged of Competency – based curriculum

Competency-based Curriculum (taken for development broad Education. Hand out (2003) covers:

1.) Graduate/passing grade competences

Its knowledge, skill and behaviours and also values that are reflected in thinking and acting.

2.) Cross Curriculum Competences

Its abilities and competence for life long period that are needed for achieving the life potential thing business world, and next education. It consists of nine competence of cross curriculum competences.

3.) Group of lesson Competence

Its knowledge, skills, behavior and value that are reflected in thinking and behaving after the learners finished a group of lessons.

4.) The Basic Competence of certain lesson

It is knowledge, skills and values that are reflected in thinking and behaving or acting after the learners finished a certain lesson.

5.) Standard competence

A statement about knowledge, skills and behavior that are needed for doing a certain job based on competence performance criterion in decided standard.

Standard competence relates to two kinds of standards they are standard of context: it covers knowledge, behavior and kill and then standard competence covers performance criterion standard competence is an evaluation focus.

6.) Target to be achieved

The main target to be achieved in this study is that students should be able to master and memorize English vocabulary that can be applied properly in their lives. Due to the memorization of vocabulary will help students when they conduct English conversation with others.

I. Rationale

English as a foreign language has been taught not only to the students in the junior high school but also the young learners especially for vocational junior high school. Vocabulary is the most important elements for students in learning English especially in economic field. It will be difficult to learn English if the students lack of vocabulary mastery. English words are different in latter and pronunciation Based on the background study students can't pronounce or read the English words correctly and remember the meaning because they learn a foreign language.

Some vocabulary of students learning consists of concrete things. Teacher can bring to introduce words. Introduction a word with random picture can help students to memorize easily because directly words make them impressive to learn vocabulary. The concept is to provide the activities that are meaningful through deep exercise and experiences which is interesting during teaching and learning process in the classroom. Random picture over come because problem of students that were difficult to recall words. Random picture can be the way to point out their problems. It has close relation with students remember best when they have done something with the words they are learning. So, it will be beneficial if random picture was used to improve the student's vocabulary mastery and it is assumed that using random pictures can improve vocabulary mastery of students.

J. Hypothesis

Based on the rational above, the hypothesis of this research is “Random pictures technique can be improve the students’ vocabulary mastery at Eight grades students MTs N Boyolali in academic year 2015/2016”.

CHAPTER III

RESEARCH METHODOLOGY

This chapter presents research methodology which consists of (1) Research Design, (2) Research Setting, (3) Population, (4) Sampling, (5) Sample, (6) Technique of Collecting the Data, and (7) Technique of Data Analysis.

A. Research Design

In this research, the researcher uses classroom action research (CAR) as the research design. It is called CAR because the research focuses on a particular problem and a particular group of students in a certain classroom. There are some definitions of action research proposed by some experts. Mills (2000) defines action research as systematic inquiry done by the teacher or other individuals in teaching or learning environment to gather information about and subsequently improve the ways their particular school operates, how they teach, and how their students learn.

Anne burns (1999: 30) suggests a number of general features, which characterized the action research. They are:

- a. Action research is contextual, small-scale and localized, it defines and investigates problem within a specific situation.
- b. It is evaluation and reflective as it aims to bring about change and improvement in practice.
- c. It is participatory as it provides for collaborative investigation by teams of colleagues, practitioners and researchers.

- d. Changes in practice are based on the collection of information or data which provides imputes for change.

From the explanation above the researcher can conclude strategy of teaching is depend on the reflection done by the researcher and her collaborator, and then it is important for the collaborator and the researcher to make a relational note. In the reflection the researcher and her collaborator make the strategy to solve the problem which appears in the classroom activity.

The researcher uses “Kemmis and Taggart model”. It consists of four steps namely: planning, acting, observing, reflecting. Improvement of the problem in this research is brought about by a series of cycles.

The research design in this research is a collaborative classroom action research. It means that the researcher collaborates with the English teacher of MTs N Boyolali as observer and collaborator. In conducting the research, the researcher's role is as an English teacher who teaches English vocabulary through vocabulary pictures, while the real English teacher's role is as an observer who observes the action of the research while teaching learning activities happens in the classroom. She also acts as a collaborator when helps the researcher in designing lesson planning, carrying out the reflection, and determining the follow up of the research.

B. Research Setting

This research will be conducted at the eighth grade students in MTs N Boyolali in academic year 2015/2016. It is located in Jl. Kemuning No. 32 Boyolali. It is divided into nine until ten classes of each grade, which named with alphabet “A-J”. The classroom

characterized by standard classroom which consists about 38-40 students. The research will be conducted from March, 17th 2016 to April, 30th 2016. Here is the list of activities which had been done;

Activities	Time
1 st observation	June 9 th 2015
2 nd observation	June 16 th 2015

C. Population, Sampling, Sample

In this case it discusses about the population and sampling and sample. By focuses on the location and subject the point will be gotten easily and help the researcher to collecting the data need.

1. Population

Population is the group to which the result of the study was intended to apply while the sample is a group in a research study on which information was obtained (Fraenkel and Wallen, 1993: 79). The population of this research is the eighth grade students in MTs N Boyolali. There are ten classes that namely VIII A, VIII B, VIII C, VIII D, VIII E, VIII F, VIII G, VIII H, VIII I, and VIII J.

2. Sampling

In this research, researcher will use cluster random sampling technique to the total population. It is used because of the homogeneous of subjects of the study. The sample of this research will divide in one class. It will be taught uses random pictures as the media. The researcher checks cluster random sampling such as:

- a. The first, listing all the class in a small paper
- b. Second, writing each class in a small paper

- c. Third, rolling the paper
- d. The last, put into the glass and shaking the glass until two of them come out decided the experiment class and control class.

3. Sample

Arikunto (2002:109) stated that sample is one part of the population that analyzed.

After finished the sampling, researcher find class VIII B as a sample.

D. Technique of collecting the data

Technique of collecting data explains about how the way of collecting data for the research. The researcher will use the test as a technique of collecting the data. According to Sukmadinata (2013: 223) test is to assess the result of the study in certain period. The test is used to know the students' vocabulary mastery achievement after being given treatment. Vocabulary test in this research is used as media to get the primary data of the students' Vocabulary score.

The researcher will use three steps of research; pre-test, treatment, and post-test. Before giving treatment the researcher applied a pre-test. In treatment the researcher taught English three meeting in treatment. After giving treatment the researcher gave post-test. The test could show whether the result of the pre-test and post-test are different or not.

a. Pre-test

The researcher will give pre-test to both groups (experimental group and control group) as the sample of research. Pre-test aimed at knowing the students' vocabulary ability.

b. Treatment

After pre-testing the sample will be treated by using Mind Mapping for experimental class in teaching vocabulary. The researcher will do this treatment in 3-4 times.

c. Post-test

In this part, after the students is treated by using Random Pictures in teaching vocabulary skill for experimental class and traditional teaching for control class. The researcher delivers a test to all of students as the sample and asks them to do the test individually. Finally, the students' answer sheet submitted and the students' results will treat as the data of the study.

E. Technique of data analysis

The analysis qualitative data use in this research is the observation of student's activities during teaching learning process, and the interview before and after classroom action research (CAR). In this case, the researcher collects the entire data which have gain. In analyzing the numerical data, first the researcher tries to get the average of students' vocabulary score per action which one cycle. It is used to know how well students' score as a whole on vocabulary skill. It will be use the formula:

Mean with the symbols is \bar{X} Where:

$$\bar{X} = \frac{\sum f_x}{N} \quad \sum x = \text{the sum of the students' scores}$$

$$n = \text{the sum of the students}$$

Second the researcher will try to get the class percentage which pass the minimal mastery level criteria (KKM) considering English subject gains score 60 which is adapted for the school agreement at MTs N Boyolali. It uses the formula:

$$P = F / N \times 100 \%$$

P : the class percentage

F : total percentage score

N : number of students

Third, after getting mean of students' score per actions, the researcher identifies whether or not there might have students' improvement score on

$$y_1 - y$$

$$P = \frac{y_1 - y}{y} \times 100\%$$

Vocabulary comprehension is from pre-test up to post-test score in cycle 1 and cycle 2.

In analyzing it, the researcher will use the formula:

P : Percentage of students' improvement

Y : pre-test result

Y₁ : post-test 1

$$Y_2 - y$$

$$P = \frac{Y_2 - y}{y} \times 100\%$$

P : Percentage of students' improvement

Y : pre-test result

Y₂ : post-test 2

CHAPTER IV

RESEARCH FINDINGS AND DISCUSSION

This chapter discusses the results of the research. The objectives of this research were to identify: the improvement of the students' English vocabulary mastery through random pictures, the students' response to the implementation of random pictures in vocabulary mastery, also the strengths and weaknesses of the implementation of random pictures in vocabulary mastery. This chapter describes and discusses the data collected from the research. This chapter also covers research implementation and discussion.

A. Research Findings

Research findings are taken from the data collected during the research. The research consisted of two cycles in which each cycle consisted of planning, acting, observing, and reflecting. After each cycle completed, the researcher gave the students a test to know whether the students' vocabulary improved or not. The description of the research findings can be explained as below:

1. Process of the Research

This research was a classroom action research. The researcher was not only an observer but also a teacher in this research. After the researcher conducted his pre-research activities and found a problem in English teaching learning especially vocabulary, the researcher asked permission to the English teacher Mrs. Nur Aida to conduct a CAR in the one of his class. Then, she chose a class that he considered as the class which had the lowest ability in vocabulary. Finally, she chose VIIG with random sampling technique as a class to conduct CAR. Based on the English teacher's

suggestion, the researcher conducted his research in grade VIIG. The researcher spent approximately two months in conducting the research.

The researcher conducted the research with two steps. The first step was doing pre-research activities and the second step was conducting the research. The pre-research activities were done before the research, such as observation, interviews, and pre-test. Whereas the implementation of the research consisted of two cycles in which each cycle included planning, implementing, observing, and reflecting. The whole research process can be explained as follows:

a. Pre-Research

Before conducting the research, the researcher did the pre-research first. The purpose of pre-research was to identify the problems occurred in English teaching learning process. The problems were identified through class observation, and interview with the teacher and students. Then, the researcher proved the existence of the problem by the result of the pre-test. The researcher did pre-research activities on Monday, March 4th 2016. The result of each activity in the pre-research could be explained as below:

1) Observation

Before conducting his research, the researcher did observation in order to know the problems faced by the students. Based on the interviews with both the teacher and students which said that the problem was vocabulary, the researcher did observation during teaching learning process in English lesson.

During the observation, the researcher found that the students were bored when they could do the task. They said that it was difficult, while the English teacher

used the book to explain and gave the task to students. The material on that day was based on the syllabus.

After, the teacher asked the students to answer the task with the vocabulary that there have, but most of them grumbled again. Some students said that they were not clear and so difficult for them. The students' statements while English lesson was bored and difficult because they didn't have a lot of vocabularies and didn't understand the mean of the word in English.

2) Interview

The research interviewed the teacher and the students. Interview was with the English teacher, on Wednesday, March 16th 2016. The result of the interview showed that there was a problem in vocabulary mastery. The teacher said that the students' score of vocabulary was the lowest among the other skills. Meanwhile, interview with the students conducted after observation in the class and before the researcher was doing a pre-test. The students said that vocabulary was the most difficult part of English. They also said that they were bored in the English learning process. To know how far the students' ability in vocabulary, then the researcher asked them to do a pre-test.

3) Pre-test

To ensure that the students in MTs N Boyolali had problems in vocabulary mastery, the researcher asked them to do a pre-test. It was done on (Wednesday, March 16th 2016 11.00-11.45 AM). The pre-test was done to prove whether the students had difficulties in vocabulary or not. The other purpose of this pre-test is to know the ability of the students in vocabulary mastery before treatment/media from

the researcher is implemented. By doing this kind of test, the researcher is able to compare the students' vocabulary before and after the implementation of the research. The result of this pre-research could be drawn as below:

Table 4.1 The Result of Pre-Test

NO	NAMA	PRE - TEST
1	AA	67
2	ABS	47
3	AF	47
4	AANS	67
6	ANK	53
7	ASH	53
8	ARNR	73
9	UMD	67
10	DA	47
11	FWD	67
12	FNU	53

13	HFBA	60
14	INP	80
15	IN	53
16	KRR	67
17	KIR	73
18	LNA	67
19	MA	67
20	MPYS	47
21	MSA	73
22	MGFS	73
23	MIP	53
24	MI	47
25	NI	47
26	NR	73
27	NNZ	53
28	NAAK	40
29	NMH	73
30	NAAL	53
31	OTA	67
32	PTN	60
33	PDP	67
34	RIW	53

35	RAYS	60
36	TTR	67
37	TJ	60
38	URA	73
	TOTAL	2314
	MEAN	61

From the table above, it is known that the students' mean score is only 60.89 meanwhile the passing grade is 70. It means that their pre-test score is the passing grade. Moreover, from 38 students, only 8 students who successfully achieve the passing grade. From this pre-test, it can be concluded that the students in VIII G have problems in vocabulary mastery.

b. Research Implementation

After pre-research activities (observation, interview with both the teacher and students and pre-test), the researcher concluded that the students' vocabulary in MTs N Boyolali was low. For that reason, the researcher conducted a research in this class. The research consisted of two cycles which each cycle consisted of three meetings.

Each cycle of this research could be explained as below:

1) Cycle 1

- a) Planning the action

Knowing the students' problems in Vocabulary Mastery and the class condition during English lesson in which most students was noise when asked to do vocabulary tasks, the researcher plans to teach them vocabulary using random

pictures. In the researcher's opinion, Random Pictures is an effective way to teach vocabulary. It can attract the students' attention because it displays not only to use in daily activities. Random pictures are also an appropriate media to teach vocabulary. The students will use their visualization in vocabulary using Random Pictures. Therefore, the researcher decides Random Pictures for improving the students' vocabulary mastery.

In this point, the researcher prepared everything that necessary in the implementation of the research. Those necessary things are:

(1) Making a lesson plan and designing the steps in doing the research

Each lesson plan consists of three activities, namely opening, main activities, and closing. The first activity is opening. The opening consists of greeting and checking the students' attendance. Main activities involve building knowledge of fields and implementing Random Pictures in Vocabulary Mastery.

While closing consists of reflecting the lesson, making summarize, pointing out to the next material and saying goodbye. In the first cycle, the researcher plans to have three meetings and uses the third meeting for doing post-test 1.

(2) Preparing the material

In this study, the researcher uses Random Pictures as a media in teaching vocabulary, while kind of text used in this study is Descriptive text. So, the researcher prepares pictures on descriptive text. The researcher takes the material from the book, the internet, and *LKS*. For the pictures, the researcher

chooses *the theme on the chapter in the syllabus* for the first meeting and for the second one.

(3)Preparing notebook and camera

The researcher also prepares the notebook to write down the result of observation during the teaching learning process. She also prepares a camera to take the pictures during teaching-learning process in the classroom.

b) Implementing the action

(1)Meeting 1 (Monday, October 10th 2016)

(a)Opening

This meeting was conducted at 08.30-10.15 AM. The researcher began the meeting by saying salam, greeting the students, asking their condition, and checking their attendance.

(b)Main Activity

The researcher explained what kinds of text which the researcher would use in this research. Then, the researcher explained about descriptive text.

The researcher explained about what descriptive text is, its purpose, its generic structures, and its language features. The researcher also gave an example of descriptive text through Random Pictures. The examples fruits pictures.

(c)Closing

After the explanation about descriptive text and giving the students an example random pictures of descriptive text, the researcher asked the students several questions about the descriptive text and asked them to

make the summary of the lesson. The researcher also explained that in the next meeting the researcher would show them Random Pictures as a media in teaching vocabulary. Then the researcher said goodbye.

(2)Meeting 2 (Thursday, October 13th, 2016)

(a)Opening

The second meeting was conducted at 10.15-11.45 AM. The researcher started this second meeting by saying salam, greeting the students, asking their condition, and checking their attendance.

(b)Main Activity

In this meeting, the researcher introduced Random pictures of descriptive text for vocabulary. The researcher used Random pictures with theme “Public transportation” and asked the students to choose one of pictures in the theme. The researcher explained the material of descriptive text to students. Then, he asked the students to made descriptive text with a picture. It was expected that the students would be easier in deciding the vocabularies so that the students could be easily descript the picture based on the picture. After that, the students were asked to collect the tasks of the description of the picture to the teacher in the class and the teacher started to corrected the tasks and give the score.

(c)Closing

The researcher asked the students some questions related to the materials and asked the students to summarize the material of descriptive text. The

students then mentioned the purpose, material, and sequence steps to achieve the purpose based on the picture, especially descriptive text. The researcher also told the students that in the next meeting she would conduct a test. For the last, the researcher said farewell.

(3)Post-Test 1 (Monday, October 17th, 2016)

After the second meeting, the researcher gave the students post-test 1. This test was held on 08.30-10.15 AM. This test was done to know whether the students' vocabulary mastery improved or not after the researcher implemented random pictures as the media in vocabulary mastery. The researcher used Random pictures with the theme "school's facilities" The result of post-test 1 could be drawn as below:

Table 4.1 The Result of Post-Test 1

NO	NAMA	POST - TEST 1
1	AA	73
2	ABS	67
3	AF	73
4	AANS	73
5	AMI	73
6	ANK	73

7	ASH	73
8	ARNR	80
9	UMD	73
10	DA	73
11	FWD	76
12	FNU	67
13	HFBA	67
14	INP	80
15	IN	73
16	KR	73
17	KIR	80
18	LNA	73
19	MA	73
20	MPYS	60
21	MSA	80
22	MGFS	80
23	MIP	67
24	MI	67
25	NI	67
26	NR	80
27	NNZ	67
28	NAAK	53

29	NMH	80
30	NAAL	67
31	OTA	73
32	PTN	67
33	PDP	73
34	RIW	67
35	RAYS	67
36	TTR	73
37	TJ	67
38	URNA	80
	TOTAL	2728
	MEAN	72

After doing post-test 1, it can be known that the students' mean score of vocabulary mastery has increased. In the pre-test, they only get 60.89 while in post-test 1 they get 71.89. It proved that the implementation of random pictures for vocabulary is an effective way to improve the students' vocabulary mastery.

c) Observing

(1)Meeting 1

In this meeting, the researcher explained about descriptive text. The students were active in doing the tasks about descriptive text. After the researcher explained the descriptive text, the researcher gave the students pictures with the theme “fruits”. They looked interesting in the random pictures although few students were still noisy. Most students gave full attention when they used random pictures as a media of teaching learning process. They wrote down all the description of pictures. The researcher only helped them in defining the meaning of some difficult words and gave them feedback because most students could get the detailed vocabulary. After the random pictures were being given the students, one of the students in VIII G said “*Harusnya yang test remain (pre-test) pakai video ini miss, jadi semuanya bisa jelaskan dan menggambarkan. Kalau pakai gambar seperti ini kan lebih gampang mau nyeritain apa*”. While other students said together “*Iya Miss*”. Indirectly, by the students’ comments, the researcher could make a temporary conclusion that the students gave good responses toward the implementation of random pictures.

(2)Meeting 2

In this meeting, the researcher gave random pictures with the theme Public transportation students looked very interested with the random pictures as a media. GDP, one of students n VIII G asked the researcher “*gambarnya unik unik miss?*” while HFB said, “*bener ya apik banget jelaskan gampang*”. The students looked very interested because random pictures displayed something new for them, something that they had never known before. The

situation of the class was more effective than before. The students concerned with random pictures.

(3)Meeting 3

In this meeting, the researcher conducted a test which called post-test 1. The result of this test would be compared with the result of pre-test so that the ability of the students in vocabulary.

In this test, the researcher gave the theme school's facilities, the students made the description of the pictures. The researcher also found that there were few students who copied their friends' answers. But most students did not do that. The students seemed very calm in doing the test. They looked very concerned.

d) Reflecting

After doing treatments and post-test 1, the researcher did reflection to know the positive and negative results from the research. The positive results of the research are: firstly, the students' improvement in vocabulary mastery. It is proved by the comparison between the students' mean score of pre-test and post-test 1. The mean score of pre-test is 60.89 whereas the mean score of post-test 1 is 71.78. The mean score of pre-test is under the passing grade whereas the mean score of post-test 1 is above the passing grade. Secondly, the students pay more attention while vocabulary mastery so the situation of the class turns to be more effective. Before vocabulary test using random pictures, the situation of the class

was very noisy. They grumbled when were asked to do vocabulary. It is very different after the implementation of random pictures as a media in vocabulary mastery. The students kept calm when they were asked to do vocabulary using random pictures.

In her reflection, the researcher also found the negative results from the implementation of random pictures for vocabulary mastery. The negative results of this research are: firstly, several students were still noisy when answering the questions on their worksheet. They copied their friend' answer. Secondly, there are six students whose score are still under the passing grade. Thirdly, the media in conducting vocabulary mastery through random pictures provided in the class is incomplete.

2) Cycle 2

a) Revising Plan

After finding the positive and negative results of the research, the researcher has to revise the plan in order to maintain the positive results and decrease the negative ones. Here, the researcher focused on improving the students' comprehension in vocabulary mastery. Therefore, the researcher will do the following things in order to improve the students' vocabulary mastery such as: (1) giving more explanation to the students about the material, (2) giving more attention to the student's response to the researcher's question, (3) monitoring all the students' activity when the process of teaching learning, and (4) giving more interesting random pictures to the students.

b) Implementing the action

(1)Meeting 1 (Monday, November 7rd 2016)

(a)Opening

This is the first meeting of cycle 2. This meeting was conducted at 10.15-11.45 AM. In the opening, the researcher said *salam*, greeted the students, asked their condition, and checked the students' attendance

(b)Main activity

The researcher used random pictures of descriptive text as a media in teaching vocabulary mastery. The random pictures were "Public facilities". The students were asked to look the pictures and they had to take a note to identified of pictures and then description for it.

(c)Closing

The researcher asked the students to summarize the lesson. The students mentioned the video's goal, material, and sequence steps to achieve the goal. Then the researcher said goodbye.

(2)Meeting 2 (Thursday, November 10th 2016)

(a)Opening

This is the second meeting for giving material to the students. This meeting was conducted at 08.30-10.15 AM. As usual, the researcher said *salam*, greeted the students, asked their condition, and checked their attendance.

(b)Main activity

In the main activity, the researcher gave random pictures and asked the students to find the information in the pictures by themselves. The random pictures were theme "Animals". After the pictures gave, the researcher

asked some students to come forward to bring the description that was written. Unlike the previous meeting, some students were brave to come forward to retell about the description of the picture.

(c) Closing

The research asked the students several questions and had them to summarize the material. She also said that at the next meeting, she would do post-test 2 as the final of the research and she would also give them the questionnaire to know the students' response to the implementation of YouTube video for listening. After that, the researcher said *salam*.

(3) Post-test 2 (Saturday, November 12th, 2016)

After the second meeting of cycle 2, the researcher did post-test 2 to know the students' vocabulary mastery after the implementation of Random Pictures. Random Pictures that used was "*Things*" Then, the researcher compared the result of post-test 2 with the score of pre-test and post-test 1. So that, it could be known whether the students' vocabulary mastery improved or not. Post-test 2 was done on Saturday, November 12th, 2016 at 10.15-11.45 AM. The result of post-test 2 is drawn as below:

4.3 The result of post-test 2

NO	NAMA	POST - TEST 2

c) Observing

(1)Meeting 1

In this meeting, the researcher gave random pictures of public facilities and asked the students to take a note. They noted all the information and description the picture, they had got from the picture. The situation of the class was quieter than before. The students did not grumble when asked to do

vocabulary. When the researcher asked them why they did not grumble anymore, LA said "*Lha dulu kan Cuma pakai awangan miss, ekarangkan pakai gambar lebih enak.*" This student's sentence was strengthened by the response of the students when the researcher asked the students several questions based on random pictures. The students gave good responses. They answered all the questions and most of them were true.

(2)Meeting 2

In this meeting, after the researcher gave random pictures "animals" she asked the students to come forward to retell the information and description they had got from the random pictures. In the previous meeting, most students were not brave to come forward to retell the information they had got, but in this meeting, some students were brave to come forward to retell the information they had got from the random pictures. When the researcher asked them why they were brave to come forward, unlike the previous meeting, HFB, one of the students said "*Lha tiap pertemuan bawa gambar terus miss, jadi lama2 suka bahasa inggris lagipula kan pakaigambar lebih menarik, jadi kan mudah,*".

Based on the students' statements, the aims of the researcher to use interesting media while vocabulary with the random picture is achieved by the students. The students also got more understanding if vocabulary English utterances through random pictures.

(3)Meeting 3

The researcher conducted post-test 2 in this meeting. Similar with pre-test and post-test, post-test 2 consisted of fifteen questions. The Random Pictures for

post-test 2 with the theme “*things*” Unlike the previous test, no one of the students tried to copy their friends’ answers. They seemed very concerned with their own worksheet and tried to wrote the description of the picture. The situation of the class was very quiet. After the students submitted their work, the researcher gave them a questionnaire which was aimed to know their responses toward the implementation of Random Pictures for vocabulary.

d) Reflecting

In cycle 2, the researcher found some improvements in the students and the class situation. Firstly, the students’ improvement on Vocabulary Mastery. It is proved by their comparative score among pre-test, post-test 1, and post-test 2. In the pre-test, their mean score is only 60.89 but it increases up to 71.78 in post-test 1, and 83 in post-test 2. By these tests results, it can be known that the students’ vocabulary mastery gets improved. Secondly, the students’ attitude also gets improved. In the first cycle, most of them were not brave to come forward, but in this second cycle, some students came forward to retell of descript they had got from the picture. They also did post-test 2 by themselves. Unlike in the first cycle, no one copied their friends’ answers. Thirdly, the class situation is more effective than before. The students did not grumble anymore when were asked to do activities relating to vocabulary class. They also gave more attention to Pictures. Fourthly, the result of the questionnaire showed that the students gave good response toward the implementation of Random Pictures for Vocabulary. The explanation of the results of the questionnaire will be explained next.

Besides the positive results, the researcher also found negative results which the researcher could not solve during the research. The negative results of this research are 1) the lack of media in implementing Random Pictures for Vocabulary. Implementing Random Pictures for Vocabulary needs some paper. 2) The use of media in implementing Random Pictures for Vocabulary depends on the process. It means, vocabulary through Random Pictures cannot be implemented when the media (pictures) cannot be there and trouble.

2. The Students' Responses toward the Implementation of Random Pictures for Vocabulary

To know the students' responses toward the implementation of Random Pictures for Vocabulary, the researcher asked them to fulfill a questionnaire. The questionnaire was a closed questionnaire. It meant that the researcher provided several answers dealing with the questions, so the students only needed to choose among several answers provided. This questionnaire consisted of ten questions with three options of answers for each question. The answers to the questions are yes, no, or sometimes.

From all of the questions, 77.14 % students give a good response (answering yes), 18.21 % of them give the answer "some time", and 4.65 % students give a bad response (answering "no"). Based on the result of each question, it can be concluded that the students give good response toward the implementation of Random Pictures for Vocabulary.

3. The Strengths and Weaknesses of the Implementation of Random Pictures for Vocabulary

There were the strengths and weaknesses of the implementation of Random Pictures for Vocabulary. Based on the data collected, the researcher identifies the strengths and weaknesses of the implementation of Random Pictures for Vocabulary. The strengths of the implementation of Random Pictures for Vocabulary could be described as follows:

1. The implementation of Random Pictures improves the students' Vocabulary Mastery.
2. The situation of the class while the implementation of Random Pictures is better than before the implementation of Random Pictures.
3. The students show better attitude when using Random Pictures for Vocabulary.

Meanwhile, the weaknesses of the implementation of Random Pictures could be explained as these:

1. The lack of media in implementing Random Pictures for Vocabulary. Implementing Random Pictures for Vocabulary needs some paper.
2. The use of media in implementing Random Pictures for Vocabulary depends on the process. It means, vocabulary through Random Pictures cannot be implemented when the media (pictures) cannot be there and trouble.

B. Discussion

This research's purposes are: to improve the students' vocabulary through random pictures, to know the students' response to the implementation of random pictures in vocabulary, and to know the strengths and weakness of the implementation of random pictures. The researcher decides to stop the cycle after the result of cycle 2 has shown the

final result which covers the purposes of this research. The discussion of each research finding can be described more detail as below:

1. YouTube video can improve the students' Vocabulary Mastery The sentence above could be proved by the mean score of the students' from pre-test until post-test 2. The students get 60.89 in their pre-test, 71.78 in post-test 1, and 83 in their post-test 2. The improvement of the students' mean score can be drawn as follow:

Table 4.4The Improvement of the Students' Mean Score

Score	Cycle	Students' Mean Score		
		Pre-Test	Post-test 1	Post-test 2
Score		60.89	71.78	83
Score's Improvement		-	10.89	11.22

Based on the table above, the improvement of the students' score in Vocabulary Mastery shows that Random Pictures is an effective way to improve the students' Vocabulary Mastery.

2. The students show good responses toward the implementation of Random Pictures for Vocabulary Mastery.

The researcher gave the students the questionnaire in order to know the students' response to the implementation of Random Pictures for Vocabulary class. The questionnaire type is a closed questionnaire which the options of the answers are provided by the researcher. The questionnaire consists of ten questions and three kinds of answers, they are: yes, sometimes, and no. The students were asked to choose "yes, "sometimes", or

“no” which was suitable for their condition. It shows that 77.14 % of the students answered yes for the questions, 18.21 % students answered sometimes, and 4.65 % students said no. from this result, it can be concluded that most students give good responses towards the implementation of Random Pictures for Vocabulary Mastery.

3. There are strengths and weaknesses of the implementation of Random Pictures for Vocabulary Mastery

Based on the researcher’s observation, she finds some strengths and weaknesses of the implementation of Random Pictures for Vocabulary Mastery. The strengths of the implementation of Random Pictures are:

- a. Random Pictures improves the students’ Vocabulary Mastery Random Pictures provides visualization for the students so they are easier in deciding the vocabularies. They can memorize what they have described the pictures. Relate the vocabularies with what they have look and text description the meaning of it. Finally, they can answer the questions about vocabulary material on Random pictures very well and their Vocabulary Mastery improves.

b. Random Pictures improves the situation of the classroom

Through Random Pictures, the situation of the class during teaching learning process especially vocabulary improves. It is because the students are interested in Random Pictures as media in vocabulary mastery. Before the research is conducted, the students grumbled when they were asked to do Vocabulary. They said that vocabulary was difficult because the students were busy. It is very different with the class situation while the researcher is implementing Random Pictures as a media in teaching vocabulary. The students do not grumble anymore, they simply keep calm when the

teacher used the media of Random Pictures. So, that it could be said that the situation of the class was more effective because of the implementation of Random Pictures in the class.

c. Random Pictures influences the students' attitude during Vocabulary class

Before the implementation of Random Pictures, the students were not confident in answering the questions of the text description. They felt worried that the text description was an error. They had no self-confidence to text description the pictures by themselves. Then, this problem was solved by Random Pictures. During the implementation of Random Pictures, the students did not copy their friends' text description because their picture was different. Therefore, Random Pictures could influence the students' attitude to be better and braver.

Besides the strengths, there are also some weaknesses of the implementation of Random Pictures, such as:

- a. The implemented of Random Pictures for vocabulary was lack. The random pictures could not be implemented while the paper, picture, and the tools of write and text description. So that, when the teacher wants to implement Random Picture for vocabulary, the tools of text description picture must be banned.
- b. The media were provided by the class in conducting vocabulary through random pictures were incomplete.

CHAPTER V

CONCLUSION, IMPLICATION, AND SUGGESTION

This chapter describes about the conclusion, implication, and suggestion of the collaborative action research conducted at the eighth grade students of MTs N Boyolali in 2015 / 2016. This chapter is also presented as the final discussion from the research finding.

A. Conclusion

Based on the research findings, the researcher could draw some conclusion. Firstly, it can be concluded that Random Pictures can improve the students' Vocabulary Mastery. This improvement is proven by the findings after the research was conducted. The findings are: the students could answer questions about text description the picture correctly, they could determine the thing that text description of "picture", they could summarize the material of descriptive text, and then the score of vocabulary mastery get improved.

Those improvements caused by the implementation of Random Pictures are strengthened by the mean score of pre-test and post-test 2. The mean score gets improved from the pre-test to post-test 2. The students get 60.89 in the pre-test and 84 in the post-test 2. There are only 20.54 % students who reach the passing grade (70) in the pre-test. Meanwhile there are 89.47 % students who reach the passing grade on the post-test 2. The improvement of the students who achieve the passing grade is 68.93 %. From those reasons above, it can be concluded that Random Pictures is able to improve the students' vocabulary mastery.

Secondly, the students give good response towards the implementation of Random Pictures in Vocabulary Mastery. It is proved by the result of questionnaire which showed that 77.14 % students like the implementation of Random Pictures for Vocabulary Mastery.

Thirdly, in implementing Random Pictures for vocabulary, there are some strengths and weaknesses. The strengths of the implementation of Random Pictures for vocabulary mastery are:

1. The implementation of Random Pictures improved the students' vocabulary mastery
2. The situation of the class while the implementation of Random Pictures is better than before
3. The students show better attitude when the teacher or researcher uses Random Pictures for Vocabulary Mastery

Besides the strengths in the implementation of Random Pictures for vocabulary mastery, there are also the weaknesses of the implementation of random pictures which can be drawn as follow:

1. The lack of media in implementing Random Pictures for Vocabulary. Implementing Random Pictures for Vocabulary needs some paper.
2. The use of media in implementing Random Pictures for Vocabulary depends on the process. It means, vocabulary through Random Pictures cannot be implemented when the media (pictures) cannot be there and trouble.

B. Implication

In achieving the goals of teaching and learning process, it is very important to apply an appropriate technique or method. The appropriate technique or method will give good effect in both process and result of the teaching and learning process. The implementation of Random Pictures in teaching vocabulary has shown that it is an effective way to improve the students' vocabulary mastery. So that, it can be concluded that Random Pictures can be used as an alternative way to achieve a maximum result in teaching vocabulary.

C. Suggestions

Based on the research findings, the researcher would like to give some suggestions related to the teaching Vocabulary Mastery.

1. For the Teachers

Vocabulary is the most difficult subject for most students. The students often grumble when they are asked to do vocabulary task. For that reason, the teacher must create an enjoyable situation when teaching and learning process of vocabulary class. It can be done by using an appropriate media such as Random Pictures. By using pictures, the students will be enthusiastic in joining vocabulary and the teaching learning process of vocabulary can run well. If the teaching learning process can run well, the objectives of the study can be achieved.

2. For the Students

Both of the teacher and the students have a great role in the teaching learning process. It will be meaningless if the teacher applies an appropriate method and technique to teach vocabulary but the students do not respond. In achieving the objectives of the study, both of the teacher and students must be cooperative. The teacher must apply an

appropriate method and technique in teaching learning process and the students must be active. Therefore, the participation of the students especially in vocabulary class is very important.

3. For Other Researcher

This study is only a little effort in improving the students' vocabulary mastery. It is done by implementing Random Pictures as the media in teaching vocabulary. It is expected for the other researcher that the result of this study will be useful for further research conducted in the future for better teaching and learning process.

**RENCANA PELAKSANAAN PEMBELAJARAN
(RPP)**

SMP/MTS	: MTs N Boyolali
Kelas/Semester	: VIII (Delapan) / 1
Standar Kompetensi	: 5. Memahami makna teks tulis fungsional dan esei pendek sederhana berbentuk <i>descriptive</i>
Kompetensi Dasar	: 5.3 Merespon makna dan langkah retorika dalam esei pendek sederhana secara akurat, lancar dan berterima yang berkaitan dengan lingkungan sekitar dalam teks berbentuk <i>descriptive</i>
Jenis teks	: teks <i>descriptive</i>
Aspek/Skill	: Membaca
Alokasi Waktu	: 4 x 40 menit (2x pertermuan)

1. Tujuan Pembelajaran

Pada akhir pembelajaran, siswa dapat merespon makna dalam:

- Menentukan benar, salah atau tidak relevannya suatu pernyataan berdasarkan informasi yang terdapat dalam bacaan deskriptif
- Menjawab pertanyaan-pertanyaan berdasarkan informasi yang terdapat dalam bacaan atau gambar
- Mengidentifikasi struktur teks descriptive
- Menemukan main idea
- Mencari idiomatik meaning
- Menemukan tujuan komunikasi teks
- Mendeskripsikan tempat, benda, dan ciri-ciri seseorang

❖ Karakter siswa yang diharapkan :

Percaya diri(Confident)
 Dapat dipercaya (Trustworthiness)
 Rasa hormat dan perhatian (respect)

 Tekun (*diligence*)

2. Materi Pembelajaran

- ◆ Descriptive text is text that contain of Identification and description
- ◆ The purpose To describe a particular place, things, or person.
- ◆ The Generic structure : **Identification** : identifies the phenomenon to be described
Description : describes parts, qualities, and the characteristic of the person, place, or thing to be describe
- ◆ Grammatical feature :

1. **Focus on specific participants**
2. **Use identifying process**

4. **Use of simple present tense**

Text descriptive

I have a car. It is my means of transportation. Almost everybody I go to work by car. Therefore, maintaining the car is very crucial. It needs to be serviced regularly. Beside servicing the engine, I have to pay attention to all the tyres.

Inside my car there are some important tools such as scissor, lead, pick, jack for wheel alarmed. It is very important to change a generator, a tyre compressor, a tyres changer and did all tyres lifter, but I should check all tyres regularly before driving.

3. Metode Pembelajaran: Metode diskusi

4. Langkah-langkah Kegiatan

Pertemuan pertama dan kedua.

A. Kegiatan Pendahuluan

Apersepsi :

- Tanya jawab tentang verb 1, to be, bentuk kalimat simple present tense
- Menjawab pertanyaan berdasarkan informasi dalam bacaan

Motivasi :

- Menjelaskan pentingnya materi yang akan dipelajari berikut kompetensi yang harus dikuasai siswa

B. Kegiatan Inti

Eksplorasi

Dalam kegiatan eksplorasi, murid:

- ☞ Mendengarkan informasi tentang tujuan pembelajaran
- ☞ Membaca deskripsi sebuah gambar

- ☞ Memberikan contoh kalimat simple present tense dengan kata yang ada s/es dalam teks deskripsi

Elaborasi

Dalam kegiatan elaborasi, murid:

- ☞ Mengelompokkan kata bentuk verb 1
- ☞ Mengelompokkan dan memberikan contoh kalimat simple present tense
- ☞ Memfasilitasi peserta didik melalui pemberian tugas, diskusi, dan lain-lain untuk memunculkan gagasan baru baik secara lisan maupun tertulis
- ☞ Memberi kesempatan untuk berpikir, menganalisis, menyelesaikan masalah, dan bertindak tanpa rasa takut

Konfirmasi

Dalam kegiatan konfirmasi, guru:

- ☞ Guru bertanya jawab tentang hal-hal yang belum diketahui siswa
- ☞ Guru bersama siswa bertanya jawab meluruskan kesalahan pemahaman, memberikan penguatan dan penyimpulan

C. Kegiatan Penutup

Dalam kegiatan penutup, guru:

- ☞ bersama-sama dengan peserta didik dan/atau sendiri membuat rangkuman/simpulan pelajaran;
- ☞ melakukan penilaian dan/atau refleksi terhadap kegiatan yang sudah dilaksanakan secara konsisten dan terprogram;
- ☞ memberikan umpan balik terhadap proses dan hasil pembelajaran;
- ☞ merencanakan kegiatan tindak lanjut dalam bentuk pembelajaran remedi, program pengayaan, layanan konseling dan/atau memberikan tugas baik tugas individual maupun kelompok sesuai dengan hasil belajar peserta didik;
- ☞ menyampaikan rencana pembelajaran pada pertemuan berikutnya.

5. Sumber belajar

- a. Buku teks yang relevan.
- b. Gambar-gambar yang relevan

6. Penilaian

Indikator Pencapaian Kompetensi	Teknik Penilaian	Bentuk Instrumen	Instrumen/ Soal
<ul style="list-style-type: none"> • Menjawab pertanyaan tentang : • Makna gagasan • Makna tekstual dalam 	Tes tulis	PG	<p><i>1. Choose the best option based on the text.</i></p>

<p>teks descriptive</p> <ul style="list-style-type: none"> • Langkah retorika teks descriptive • Tujuan komunikatif teks descriptive • Ciri kebahasaan teks descriptive • Membaca nyaring teks descriptive 		T / F	<p><i>2. State whether the statements are TRUE or FALSE.</i></p> <p><i>3. Answer the questions</i> <i>Read the text</i></p>
--	--	-------	---

a. Instrumen:

Read the text below and answer the questions.

1. *What is the text tell about?*
2. *Who is "I" in this text above?*
3. *What is the main idea in the first paragraph?*
4. *What is the purpose of the text?*
5. *Find the verb 1 in the text above and make a good sentence? (Minimum 2)*

b. Pedoman Penilaian

1. Untuk tiap nomor, tiap jawaban benar skor 4, kecuali untuk nomor 5 jawaban benar skor 9.
2. Jumlah skor maksimal $(4 \times 4) + 9 = 25 \times 4 = 100$
3. Nilai maksimal = 100

$$4. \text{Nilai Siswa} = \frac{\text{SkorPerolehan}}{\text{SkorMaksimal}} \times 10$$

c. Rubrik Penilaian (untuk nomor 7 dan 8)

Uraian	Skor
Isi benar, tata bahasa benar	4 / 9
Isi dan tata bahasa kurang tepat	3 / 6
Tata bahasa benar tapi jawaban salah	2 / 4
Tidak dijawab	0

A School library is a library where students, staff, or school members have access to enlarge their knowledge by reading.

There is one school library in senior high school Gemolong. The library is located in near the teacher's room. Our school library is large, because there are 18 tables and 17 desks. Our school library also comfortable because there 2 fans.

In our school library, there is one librarian. His name is Mr. Andrian Arie. There are 10 kinds of books, including public works, philosophy, religion, social sciences, pure science, applied science, language, art, and culture, literary and historical geography. All of them totaled 5.937 books. in our school library there are many kinds of newspaper. The newspaper are various and up to date. There books and newspaper are only for the education, enjoyment and entertainment for all members of school, but also to enhance and expand the school curriculum.

9. Metode Pembelajaran: Metode diskusi

10. Langkah-langkah Kegiatan

Pertemuan pertama dan kedua.

C. Kegiatan Pendahuluan

Apersepsi :

- Tanya jawab tentang verb 1, to be, bentuk kalimat simple present tense
- Menjawab pertanyaan berdasarkan informasi dalam bacaan

Motivasi :

- Menjelaskan pentingnya materi yang akan dipelajari berikut kompetensi yang harus dikuasai siswa

D. Kegiatan Inti

Eksplorasi

Dalam kegiatan eksplorasi, murid:

- ☞ Mendengarkan informasi tentang tujuan pembelajaran
- ☞ Membaca deskripsi sebuah gambar

- ☞ Memberikan contoh kalimat simple present tense dengan kata yang ada s/es dalam teks deskripsi

Elaborasi

Dalam kegiatan elaborasi, murid:

- ☞ Mengelompokkan kata bentuk verb 1
- ☞ Mengelompokkan dan memberikan contoh kalimat simple present tense
- ☞ Memfasilitasi peserta didik melalui pemberian tugas, diskusi, dan lain-lain untuk memunculkan gagasan baru baik secara lisan maupun tertulis
