

■ THE UNIVERSITY OF CALIFORNIA ■ IRVINE

an introduction

WELCOME TO UCI!

Whether you are a prospective student, teacher, researcher, career-seeker or a visitor, I hope this introduction will encourage you to learn more about the people and programs at Irvine.

Our goals are to create a distinctive character, and to build a campus with an instruction and research capability particularly suited to the needs of society as we approach the twenty-first century.

Welcome to these pathways of excellence in education!

Daniel G. Aldrich Jr.
Daniel G. Aldrich, Jr.

ACADEMIC HALLMARKS

The Irvine campus is designed for the modern man. It regards the past with respect, but without nostalgia. It is unashamed of modern society, un-intimidated by modern problems, stimulated by modern opportunities.

Perhaps most important to students is the opportunity to be a part of an innovative process in close relationship with outstanding academic leaders. Faculty members have been attracted from leading institutions throughout the nation and abroad, in large part by the opportunity and challenge to seek fresh ways to educate modern man. The examples are numerous.

Before specializing, students are urged to develop individual programs with a minimum of required courses and a broad range of electives. To encourage students to explore subjects beyond their primary area of interest and preparation, enrollment in many such courses is permitted on a pass-fail basis. Credit for many courses is by independent study and examination.

The campus is a model for computer-assisted instruction. The computer is seen not as a “dehumanizing” machine but as an invaluable tool which supplements the book in importance to education.

In the exploding biological sciences, animal and plant life are examined according to their structures; in addition, they are explored in another dimension, psychobiology.

The fine arts are dedicated to educating the performing artist. To help this process the Division of Fine Arts frequently employs resident professional artists.

Undergraduate through postdoctoral instruction is offered in the College of Arts, Letters and Science and by the Graduate Division. The College is composed of the Divisions of Biological Sciences, Fine Arts, Humanities, Social Sciences, and Physical Sciences. Teacher education courses also are offered. Irvine's first professional schools are the School of Engineering and the Graduate School of Administration.

Students can prepare for graduate work in each of these areas and also for admission to other campuses in professional schools such as law, medicine, dentistry, journalism, nursing, agriculture, or veterinary medicine.

To support the academic program, the present library of approximately 150,000 volumes will be expanded to 400,000 volumes by 1971.

STUDENT LIFE

Students have an unusual opportunity to share in making the traditions and the policies which give UCI a distinct character.

At UCI students are considered as young adults; the University community is regarded as a model of society. Thus respect for freedom is the condition upon which its abundance rests, and our objective is to direct that freedom in the democratic development of guidelines governing campus society and ultimately society at large.

The first student body instituted an honor code for both social and academic behavior; this code rests centrally on the conviction that matters of conduct are best met at the personal level.

While UCI aspires to greatness in both size and quality, close student-faculty relationships will be maintained. Virtually all faculty members serve as academic

advisors not as an additional chore tacked on to normal classroom duties, but as a responsibility integral to teaching.

Many student groups promote academic, cultural, political, and social activities, and also serve the community. Programs on campus vary widely, from gallery showings to symphonic concerts; students frequently perform in University dramatic and musical productions. As a matter of course, many noted lecturers, poets, and performers appear each year on campus.

Spurred by the resounding cry of "ZOT!" UCI's Anteaters have had outstanding success in intercollegiate athletic competition. Varsity and freshman teams currently compete in water polo, basketball, sailing, crew, golf, tennis, swimming, and gymnastics. A varied intramural program is available to all members of the University community.

WHERE TO LIVE

Two types of on-campus housing are available: residence cottages at Mesa Court and apartments at Verano Place.

The two-story residence halls at Mesa Court for unmarried undergraduate students are attractively designed to provide an atmosphere conducive to study and constructive use of leisure time.

One and two bedroom apartments at Verano Place are occupied by married graduate and undergraduate students, and some single undergraduate students.

A card for use in requesting housing information is included in the admission packet sent out from the Admissions Office. Information about housing and food service is available from the Housing Office which is open Monday through Friday, 8 a.m. to noon and 1 to 5 p.m.

WHAT ARE THE COSTS?

Although individual expenditures will vary considerably, there are some fixed fees. Tuition is free to every student who has been a legal resident of the state for a period of one year immediately preceding the opening day of the quarter for which he wishes to enroll. Non-resident students pay \$980 a year plus fees.

The incidental fee for student services is \$219 a year for both graduate and undergraduate students. The Associated Students fee is \$21. About \$150 for books and supplies, and \$460 for personal expenses (clothing, laundry and transportation) are realistic estimates.

A typical budget for room and board is \$1,000, bringing the average annual costs for a California resident living on campus to about \$1,850. For information on monthly rates for apartments write or visit the UCI Housing Office. All charges are subject to revision by The Board of Regents.

Financial assistance is available through scholarships, fellowships, loans, and employment. The Office of Financial Aids welcomes inquiries.

HOW TO APPLY

Undergraduate admissions requirements are uniform on all campuses of the University of California. Admission to the University entitles the student to attend the campus of his choice, if the required facilities are available. Applications are processed in only one Office of Admissions, and therefore applications should not be directed to more than one campus of the University.

Applications for admission as an undergraduate should be filed with a non-refundable fee of \$10 with the Office of Admissions, 1210 Library Building, University of California; Irvine, California 92664.

Application forms for admission to graduate status are available on request from the Office of Graduate Admissions, University of California; Irvine, California 92664.

Complete information on admissions is contained in the UCI catalogue available at 50¢ per copy from the Registrar's Office.

COMMUNITY RELATIONS

The University of California Extension makes the resources of the University available to individuals and organizations. Its aims include the intellectual and cultural development of adults through continuing education.

Extension programs vary from one-day conferences and short lecture series to courses of two or more quarters and certificate programs requiring up to several years. For a catalogue or other information, write University Extension, University of California; Irvine, California 92664.

The community has an opportunity to be active in Irvine campus affairs through membership in the Friends of UCI, Friends of the UCI Library, UCI Town and Gown, University Gallery Associates, the Big I Boosters, and the University Interfaith Foundation.

A Speakers Bureau provides specific programs for interested groups in the community.

For information on these and other activities, write to the Public Affairs Office, University of California; Irvine, California 92264, or telephone 714/833-6922.

HOW UCI BEGAN

A gift of 1000 acres of Irvine ranch land was accepted by the University's Board of Regents and the deed was recorded January 29, 1961. The Regents purchased an additional 510 acres from the Irvine Company in January 1964.

Coordinated planning of the ranch, the University community, and the campus was achieved by retention of the architectural and planning firm of William L. Pereira and Associates.

With the selection of Daniel G. Aldrich, Jr., as Chancellor, January 19, 1962, UCI was cast in the role of carrying forward the spirit of service to the community in meeting the educational needs of a new era.

The long range development plan in June 1963 presented an arrangement of plazas for each academic discipline radiating from a large central park and an inner circle of buildings.

Dedication of the site in conjunction with the first meeting of The Board of Regents at Irvine was held at impressive ceremonies June 20, 1964, with President Lyndon B. Johnson as principal speaker.

The first buildings constructed on the campus were the Library-Administration, Commons, Humanities-Social Science, Fine Arts, Natural Science,

Science Lecture Hall, Campus Hall (gymnasium-auditorium) and Mesa Court, a complex of 10 residence cottages to house 500 single students.

The eight major buildings were completed for the opening of classes, October 4, 1965, with an enrollment of 1589 students, freshmen through post-doctoral, and a faculty of 114. The enrollment for the second academic year was 2377 with a faculty of 211.

Added the second year were 100 apartment units at Verano Place and a student center next to the Science Lecture Hall. Construction began on additional housing units and dining facilities for occupancy in the fall of 1967.

The second phase of major construction began in the spring of 1967 with the Student Health Center to be completed in the spring of 1968 and the Physical Science Building scheduled for occupancy early in 1969. Planned for completion later in 1969 are two School of Engineering Buildings, the Fine Arts Village, and additions to the Library and Central Plant.

Estimated for 1990 are a campus enrollment of 27,500 and a University community of 150,000 persons.
