# The University

The University of Rhode Island is a medium-sized state university in the southern part of Rhode Island in the village of Kingston. In part because of its unique location near the ocean and six miles from Narragansett Bay, the University has developed strong marine programs and has been designated one of the national sea grant colleges. As a land-grant college since its founding in 1892, it emphasizes preparation for earning a living and for responsible citizenship, carries on research, and takes its expertise to the community in extension programs.

The University enrolls about 11,000 students on its Kingston campus and another 4,000 in credit courses throughout the state. About half of the 13,000 undergraduates are resident students; there are about 2,500 graduate students, and a full-time teaching faculty of over 800.

**The Campus.** The University has a spacious country campus 30 miles south of Providence in the northeastern metropolitan corridor between New York and Boston. The center of campus is a quadrangle of handsome old granite buildings surrounded by other newer academic buildings, student residence halls, and fraternity and sorority houses. On the plain below Kingston Hill are gymnasiums, athletic fields, tennis courts, a freshwater pond, agricultural fields, and greenhouses.

In addition to the Kingston campus, the University has three other campuses. The 165-acre Narragansett Bay Campus, six miles to the east overlooking the west passage of the Narragansett Bay, is the site of the Graduate School of Oceanography. The Rhode Island Atomic Reactor and several federal laboratories devoted to marine sciences are also located there. The College of Continuing Education has a building in downtown Providence. In the western section of the state, 20 miles from Kingston, is the W. Alton Jones Campus. Its 2,300 acres of woods, fields, streams, and ponds is the site of environmental education, research, and conference facilities.

**History.** The University had its beginning in the state agricultural school chartered in 1888. The Oliver Watson farm was purchased as a site for the school, and the old farmhouse, now restored, still stands on the campus. The school became the Rhode Island College of Agriculture and Mechanic Arts in 1892, and the first class of 17 members was graduated two years later.

The Morrill Act of 1862 provided for the sale of public lands, the income from which was to be used to create at least one college in each state with the principal purpose of teaching agriculture and mechanic arts. From this grant of land comes the name land-grant applied to the national system of state colleges and, in a later adaptation of the concept, federal funds given

to colleges for marine research and extension are called sea grants.

In 1909 the name of the college was changed to Rhode Island State College, and the program of study was revised and expanded. In 1951 the college became the University of Rhode Island by act of the General Assembly. The Board of Regents for Education appointed by the governor became the governing body for the University in 1970. An historical outline may be found in the appendix.

All freshmen who enter the University to earn a bachelor's degree are first enrolled in University College (see page 29). Undergraduates have a wide choice of programs from which to choose a concentration and the advising program in University College provides help in making this decision and in choosing appropriate courses.

The programs listed on the previous page are presented in detail in chapters describing the individual colleges. Interdepartmental curriculums and areas of interest are detailed in the chapter on University Programs and Requirements.

**Graduate Study.** Study at the graduate level leads to the master's degree in over 60 areas of study and the degree of Doctor of Philosophy in 24. Students may earn the following degrees:

- Master of Arts
- Master of Science
- Master of Business Administration
- Master of Community Planning
- Master of Library Science
- Master of Marine Affairs
- Master of Music
- Master of Public Administration
- Doctor of Philosophy

**Graduate School.** Students holding the baccalaureate degree from this University or from another having equivalent requirements may be admitted for graduate study, providing that their credentials meet the standards set by the Graduate School and by the department in which they wish to study, and that facilities for study are available in their field of interest. Among the standards required for full status admission are an undergraduate average approximating B or better and satisfactory scores on a nationally administered examination. Applicants with somewhat lower undergraduate averages but high examination scores may be admitted on conditional status. Individual departments may, however, apply admission standards which are higher than the general standards just described.

Within each college's chapter in this bulletin, the related graduate degrees are listed. A *Graduate Bulletin*, containing complete information on graduate study and application forms, is available from the Dean of the Graduate School, University of Rhode

Island, Kingston, RI 02881. Further information may be requested from the chairperson of the appropriate department. Applications are returned to the Dean of the Graduate School.

Each applicant must submit (1) completed application forms in duplicate, with a \$15 nonrefundable application fee (check or money order payable to the University of Rhode Island); (2) three letters of recommendation from individuals familiar with the applicant's work, preferably in the field for which he or she is applying; (3) two copies of an official transcript sent directly from each college or university attended; and (4) scores from the Graduate Record Examination aptitude tests. See the *Graduate School Bulletin* for those programs which require the GRE advanced tests or which require a different national test.

Applicants from foreign countries must complete the Test of English as a Foreign Language (TOEFL) with minimum scores of 500 for science students and 550 for non-science students. All inquiries from international students concerning applications, fees, housing, etc., should be directed to the Director for International Student Affairs.

The usual deadlines for receipt of applications are April 15 for September and Summer Session admission, and November 15 for February admission. See the *Graduate School Bulletin* for those programs which have earlier application deadlines.

The *Graduate Library School* on the main campus offers study leading to the Master of Library Science degree. Students in undergraduate and other graduate programs may, with the approval of their adviser, enroll in library science courses that relate to their studies.

The *Graduate School of Oceanography* on the Narragansett Bay Campus, six miles from Kingston, offers study leading to the Master of Science and Doctor of Philosophy degrees in the areas of biological, chemical, geological and physical oceanography. Instruction is limited to graduate study with the exception of a survey course in general oceanography and an intensive program designed to provide undergraduates with a total involvement for one semester in a marine laboratory

setting. Both of these offerings are at the 400 level.

The 165-acre Narragansett Bay Campus borders the shore and includes a basin and dock within easy reach of both the Bay and the open ocean. The University operates several vessels, the largest of which is a 177-foot ocean-going research ship, *Endeavor*.

A number of buildings make up the Bay Campus and include a quadrangle of laboratories, offices, and the Pell Marine Science Laboratory; a 12,000-square-foot research aquarium; a towing test tank; and a specially designed facility which permits moderate-scale controlled ecosystems experiments.

**College of Continuing Education.** This College offers classes and degree programs in continuing education and degree programs designed for adults whose family or work responsibilities have caused interruption in their formal post-high-school education. Academic programs lead to Bachelor of Science degrees in business administration; industrial engineering; nutrition and dietetics; food science technology; general home economics; home economics education; human development, counseling, and family studies; and textiles and clothing. Bachelor of Arts degrees may be obtained in economics, English, history, psychology, secondary education, and speech communication. The Bachelor of General Studies degree offers concentrations in business institutions and human studies. Graduate level programs include Master of Business Administration, Master of Library Science, Master of Marine Affairs, Master of Public Administration, Master of Science in Computer Science, Master of Science in Electrical Engineering, and a Master of Science in Mechanical Engineering and Applied Mechanics.

Courses are offered in the morning, afternoon, and evening, and students enrolling in a degree program may attend at a time most convenient for them. A nursery school provides nursery education for young children mornings during the week.

Certification programs for various professions as well as individual credit and non-credit (CEU) courses are also offered. In addition, institutes, seminars, conferences, and special courses are planned for business, in-

dustry, labor, government, and the professions.

Psychological Testing Services provides psychological testing and group and individual guidance. This office administers the CLEP examinations.

The College operates community centers throughout the state. Both credit and non-credit evening courses are offered in Kingston, Middletown, and Westerly.

**Summer Session.** The College of Continuing Education has administrative responsibility for developing and coordinating the University's summer offerings. Courses are offered in two terms at both Kingston and Providence: a four-week pre-session and a six-week main term. In addition, a number of special programs of varying duration are offered at varying dates in the alternate term. Students may attend either or both campuses, and enroll in day or evening courses offered in any summer term.

Students expecting to apply summer credits to their degree programs are advised to obtain prior approval of their academic dean before registering. Maximum course load is 6 credits in the four-week pre-session and 7 credits in the six-week main session, including courses taken simultaneously in the alternate term. Exceptions are allowed with permission of the student's academic dean.

## Academic Services

**The University Libraries.** The University's library collection of over 650,000 bound volumes and 650,000 volume-equivalent microforms is housed in the University Library in Kingston, at the College of Continuing Education in Providence, and in the Claiborne Pell Marine Science Library on the Narragansett Bay Campus. The latter was designated the National Sea Grant Depository in 1971.

The University Library, which holds the bulk of the collection, has open stacks which provide direct access to books, periodicals, documents, maps, microforms, and audiovisual materials. The Special Collections Department collects and maintains rare books, manuscripts, the University archives, and a variety of special in-

terest materials. Service hours at the other libraries vary, but the University Library provides full reference, bibliographic, and circulation services during most of the 90 hours a week it is open. Terminals linked to the Academic Computer Center are available in the Library during the hours both facilities are operating. A computer-based bibliographic system makes most books available to users one week after their receipt.

**The Academic Computer Center.** The Academic Computer Center has an Intel AS/5 computer with 4096K of high-speed storage, disk storage units, magnetic tape, card, and printer input/output devices, and an on-line plotter. The system's hardware and software accommodate both remote batch and interactive terminal usage with graphics support as well as normal batch processing. A Prime 400 minicomputer which supports timesharing and intermediate-speed remote batch input is installed at the Narragansett Bay Campus. The Department of Electrical Engineering has a Data General Eclipse and two PDP-9 computers with a graphics display console linked to the Academic Computer Center's system. Various types of

typewriter and display terminals for interactive use or remote job entry are located on the campus in most of the science and engineering departments as well as the College of Business Administration, the College of Pharmacy, the University Library, and the Graduate School of Oceanography. Off-campus installations include the College of Continuing Education and various high schools in the state.

The staff develops and maintains programming systems and application programs, conducts short courses and workshops, and provides programming assistance. Faculty in the Department of Computer Science and Experimental Statistics consult on numerical methods, statistical analysis, and computational techniques.

## Research and Extension

Within the state system of higher education, the University has the major responsibility for graduate education which is interdependent with a strong program of research. There are active research programs in almost all departments of the University, and in 1979-80 funds for research totalled

\$20,661,377. Support comes from foundations, commercial firms, federal and state governments, and the University. Applications for research grants are signed by the University's Coordinator of Research who is the liaison officer for the president, the business manager, the academic deans, the Research Committee and the faculty in matters pertaining to general research policy.

The results of research and the expertise of the faculty and staff are made available to the general public in extension programs and publications.

In addition to research conducted in the various departments, the University has established the following research and extension programs in specially defined areas; these are described in detail in the appendix.

**Agricultural Experiment Station** (College of Resource Development)

**Bureau of Government Research**

**Center for Energy Studies**

**Center for Ocean Management Studies**

**Cooperative Extension Service** (College of Resource Development)

**Curriculum Research and Development Center** (College of Human Science and Services)

**Division of Marine Resources**, including Marine Advisory Service, Coastal Resources Center, National Sea Grant Depository, and Regional Coastal Information Center

**International Center for Marine Resource Development**, including Consortium for the Development of Technology (College of Resource Development)

**Laboratories for Scientific Criminal Investigation** (College of Pharmacy)

**Research Center in Business and Economics** (College of Business Administration)

**Rhode Island Water Resources Center** (College of Engineering)

**URI Clearinghouse for Volunteers** (College of Human Science and Services)

The University distributes the results of its research in publications available to the public. These include a

series of marine bulletins, technical reports, and Cooperative Extension and Agricultural Experiment Station bulletins.

The University also publishes through the *University Press of New England*, of which it is a member. Manuscripts originating on the seven member campuses and elsewhere are published as determined by the director and the editorial board on which the University is represented.

## The University Community

In addition to the student body, the University community is made up of faculty, administration, staff, and alumni. The *Faculty Senate* represents the faculty and was authorized in 1960 by the general faculty to conduct the business assigned to the faculty by law or by the Board of Regents for Education. The *Graduate Council* is the representative body for the graduate faculty and determines the academic policies for graduate study. The office of *University Ombudsman* investigates complaints from students, faculty, and administrative personnel that they have been unfairly dealt with in the normal channels of administrative process. The ombudsman is a tenured member of the faculty, elected by the general faculty, and is assisted by a student nominated by the Student Senate and appointed by the president.

The *Instructional Development Program* exists to assist the faculty in its teaching responsibilities. Workshops, colloquiums, and seminars, as well as personal consultations, assist faculty interested in increasing their teaching effectiveness.

The voice of the alumni is heard through the *Alumni Association* which includes all those who have attended the University for two semesters or more and whose class has graduated. The organization, with about 45,000 members, promotes the interests of the University and maintains the ties of alumni with their alma mater through programs, services, and the publication of a bulletin. An annual fund drive provides scholarship aid.

The University receives less than half of its support from the state. The balance comes from student fees and tuition, federal grants, and auxiliary

enterprises and other miscellaneous sources. The *University of Rhode Island Foundation* encourages and administers gifts from private sources to build a substantial endowment for continuing support of the University. It is concerned with the support of University activities for which adequate provision is not ordinarily made by appropriations from public funds.

**Handicapped and Minorities.** The University makes every effort to comply with all federal regulations relating to discrimination and accessibility for the handicapped. A large percentage of the buildings on campus are available to the handicapped, (see map on p. 189) and special provision is made to assure that no student is prohibited from pursuing a course of study because of restricted access to buildings.

The University of Rhode Island prohibits discrimination on the basis of race, sex, religion, age, color, creed, national origin, or handicap and discrimination against disabled and Vietnam era veterans in the recruitment, admission or treatment of students, the recruitment, hiring or treatment of faculty and staff, and the operation of its activities and programs. This is in compliance with state and federal laws, including Titles VI and VII of the Civil Rights Act of 1964 as amended, Title IX of the 1972 Education Amendments to the Higher Education Act, Executive Order 11246, as amended, Sections 503/504 of the Rehabilitation Act of 1973, and Section 402 of the Vietnam Era Readjustment Assistance Act of 1974. Inquiries concerning compliance with antidiscrimination laws should be addressed to the Affirmative Action Officer, University of Rhode Island. Questions regarding provisions for the handicapped should be directed to the Committee to Meet the Needs of the Handicapped.

# Programs and Requirements

Consistent with its policy of allowing the greatest latitude possible in course selection, the University offers a wide choice to fill its general education requirements and encourages students to select free electives that cross departmental and college lines. This section deals with academic requirements, regulations and opportunities that are University-wide rather than college-related.

The University attempts to provide the successful student with a range of knowledge and skills which can, with appropriate motivation and initiative, be used in a variety of ways after graduation. Study options vary from the traditional liberal education to programs which are heavily vocationally oriented. Successful completion of any course of study at the University, however, does not guarantee that the student will find either a specific kind or level of employment.

Students interested in the career opportunities related to particular programs of study are encouraged to consult University College advisers, the appropriate department chairperson, and/or the staff of the Office of Career Services. For students who are uncertain about their career choices, the Counseling Center offers help.

The University administration, which has the responsibility of maintaining academic standards for such purposes as accreditation, determines the courses and program requirements. These may be changed without

prior notice to the student, but an effort will be made in such cases to adjust requirements to take into account the best interests of the student. Changes in the academic calendar due to major storms, labor unrest, or other circumstances, may be made when it is in the best interest of the institution, and without prior notice to the students.

**Accreditation.** The courses and programs of study offered by the University of Rhode Island have been approved by national accrediting agencies and are accepted for credit toward college degrees by other approved institutions of higher learning. The national accrediting agencies which have approved the quality of the course offerings of the University of Rhode Island include the American Association of Universities, the American Assembly of Collegiate Schools of Business, the American Chemical Society, the American Council on Pharmaceutical Education, the American Dental Association (Council on Dental Education), the American Library Association, the American Psychological Association, the American Society of Journalism School Administrators, the Accreditation Board for Engineering and Technology, the National Association of Schools of Music, the National League for Nursing, the New England Association of Colleges and Secondary Schools, and the State University of New York.

The University is also an approved member institution of the American Association of University Women, the Council of Graduate Schools in the United States, the North American Association of Summer Sessions, and the National University Extension Association.

## General Education Requirements

**These requirements apply to freshmen entering in the fall of 1981 and transfer students entering in the fall of 1981 with fewer than 15 transferrable credits. All other students must follow the General Education requirements outlined in the Undergraduate Bulletin for 1980-81 or the year in which they matriculated at the University.**

The University of Rhode Island believes that all undergraduate students, regardless of their degree program, need experience in the study of fundamentals which builds upon the student's previous education and continues to be advanced through the undergraduate years and beyond. Thus, all bachelor's degree students follow the same university-wide General Education requirements.

General Education is that part of the undergraduate curriculum in which students explore a broad spectrum of intellectual subjects, approaches, and

perspectives. The General Education component of the curriculum aims to help accomplish these three goals: (1) develop further the essential English communication abilities upon which advanced studies depend; (2) offer experience in five broad subject areas: fine arts and literature, letters, mathematics, natural sciences, and social sciences; and (3) expose the student to a foreign language or culture.

The General Education program is divided into the following components which correspond to these goals:

**English Communication.** 6 credits in English communication, at least 3 of which must be in a course designed specifically to improve written communication skills;

Transfer students may receive General Education credit for courses taken at other institutions as long as such credits are in courses equivalent to courses given General Education credit at the University of Rhode Island.

In the Colleges of Arts and Sciences and Human Science and Services and for the Bachelor of General Studies, credits within a student's own field of concentration may not be counted towards General Education requirements in Fine Arts and Literature, Letters, Natural Sciences or Social Sciences. In other colleges, credits within a student's professional college may not be counted towards any General Education requirements. However, courses which serve as prerequisites for a concentration may be used to fulfill the General Education requirement.

Students must meet the curricular requirements of the colleges in which they plan to earn their degrees. Some colleges require that students select specific courses from the above lists. Therefore, students must refer to the requirements specified for their programs (pages 30-77).

## Other Academic Requirements

Certain basic courses are required in many curriculums for transfer from University College into the degree-granting colleges at the junior-year level. These are listed in the individual colleges' curriculums.

The responsibility for meeting all course and credit requirements for the

degree must rest with each individual student.

Students who desire to accelerate their programs and receive credit for courses taken at other institutions or during Summer Session or in the College of Continuing Education must have prior approval from their academic deans.

## Interdepartmental Study

Students are encouraged to develop interests across departmental lines, and interdepartmental curriculums and areas of interest have been developed.

**Black Studies.** Students who declare Black Studies as an area of interest (see page 31) may use the following courses to fulfill the requirements. BST 101, 102 (6 credits) are required. Elective courses (12 credits) may be selected from APG 313; ENG 345, 346, 444; HIS 150, 175, 345, 379, 384, 388, 580; PSC 495, 510; REN 595; SOC 340, 434. Permission may be obtained on an ad hoc basis to use other courses that have as their central focus one or another aspect of the black experience.

**Comparative Literature Studies.** This program is offered jointly by the Department of English and the Department of Languages represented by the following national literatures: French, German, Greek, Italian, Latin, Portuguese, Russian, and Spanish. One of the concentration options and some individual courses are interdisciplinary. For a description of the curriculum and a listing of the courses see pages 36 and 90.

**Consumer Affairs.** This interdisciplinary program is designed for students who wish to develop effective strategies for dealing with complex social and economic systems relating to consumer concerns. Although affiliated with the Division of Interdisciplinary Studies in the College of Human Science and Services, coursework is drawn from a variety of colleges and departments to provide a broad perspective on issues relating to consumers. An internship or field experience is an integral part of the pro-

gram. Interested students should consult with the program head or a member of the Consumer Affairs Coordinating Committee for program planning and course approval. (See page 64).

Students who declare an area of interest in consumer affairs are required to complete 18 credits in selected course work. Suggested courses might include: CNS 220, 320, 350, 420, and 422, as well as courses in political science, marketing, and business law.

**Gerontology.** This is a University-wide program. Its purpose is to develop within University teaching a clear recognition of the aging process and its implications, to promote the scientific and humanistic study of gerontological problems, and to relate the development of gerontology at the University to the larger community. The program, which is administered by a director and an advisory committee, maintains a consulting relationship with both the Rhode Island Institute of Mental Health and the Medical Center General Hospital. These and other alliances afford opportunities for research and practicum experience to students interested in problems of aging.

Students who declare gerontology as an area of interest must complete 18 hours of relevant course work. HCF 220 is required. Other gerontology courses include FSN 307, HCF 221, 380, 420, 421, 431; RCR 416 and SOC 438.

Interested students should contact the director of the program and are advised to do so as early as possible, preferably not later than the beginning of the senior year.

**New England Studies.** Students who declare New England Studies as an area of interest must take either NES 300 or 310 and elect at least one course from each of the following four categories: (1) Cultural Patterns — PSC 221, APG 317, ENG 430; (2) Aesthetic Dimensions — ART 263, ENG 347, 440; (3) Historical Dimensions — HIS 335, 346, 362; (4) Physical Dimensions — BOT 323, 418, 424; FMT 118, FOR 301, 302, GEL 101, 455-57. Permission may be obtained from the Committee for New England Studies to use any rotating topics course, seminar, etc., whose focus is on some aspect of New Eng-

land as a substitute for any of the above courses.

**Special Populations.** This new, interdepartmental area of interest provides students the opportunity to explore the theory and gain practical experience through working with people who have special needs. This includes people who are handicapped (physically, emotionally, mentally, or educationally) or are different (socioeconomically, behaviorally, culturally) and as a result have special needs.

A minimum of 18 credits may be earned by taking the required courses (NUR) 101, HCF 200 or PSY 232, PSY 442), a minimum of 3 credits in supervised field experience, and a minimum of 7 credits of selected electives. Courses are chosen in consultation with an adviser from one of the participating departments: Education; Food Science and Technology; Human Development, Counseling and Family Studies; Nursing; Physical Education, Health and Recreation; Psychology; Sociology; Speech; Textiles, Clothing and Related Art; Theatre. The College of Human Science and Services administers the program and interested students should contact the program head, Jeannette E. Crooker (130 Tootell Center) for more information and a complete listing of possible electives.

**Textile Marketing.** This undergraduate interdepartmental curriculum may be pursued through the College of Human Science and Services (Department of Textiles, Clothing and Related Art) or through the College of Business Administration (Department of Marketing). The programs are: Textile Marketing or Marketing-Textiles.

Textile marketing managers are responsible for planning and directing the flow of textile products from the manufacturer to the consumer. The concentration, which provides a strong background in both textiles and marketing, is designed to give students the opportunity to explore the areas of styling and design, manufacturing, market research, consumer behavior, advertising, promotion, fashion, and sales. The specific requirements of the curriculum may be found on pages 52 and 67.

**Urban Affairs.** The undergraduate program in Urban Affairs consists of seven different interdepartmental degree curriculums, three in the College of Arts and Sciences and four in professional colleges. They aim to provide students with a general understanding of contemporary urban society and the opportunity to pursue specialized study of urban problems and prospects from the perspective of varied disciplines, whatever may be the students' interests and career objectives.

The seven concentrations are: (1) Urban Social Processes, (2) Policy Formation, and (3) Spatial Development, in the College of Arts and Sciences; (4) Business in the Urban Environment, in the College of Business Administration; (5) Urban Engineering, in the College of Engineering; (6) Home Economics in the Urban Environment, in the College of Human Science and Services, and (7) Resource Development in the Urban Environment, in the College of Resource Development.

The curriculum in each area of concentration consists of a common core of courses and specialization courses. All students are required to take URB 210 and URB 498 or 499. In addition, they must select three courses from the following: CPL 410, PSC 460, GEG 411, ECN 402, SOC 434, and HIS 363. The specialization courses are detailed in the appropriate college section under each area of concentration in this bulletin.

The Urban Affairs Program is coordinating its offerings with the Department of Social Sciences at the Community College of Rhode Island. Students at the junior college are encouraged to consult with their advisers if they wish to transfer to any one of the concentrations in the College of Arts and Sciences.

The Urban Affairs Program Coordinating Committee includes faculty members from departments throughout the University and supervises the operation of the program. With the endorsement of the faculty of the college concerned, the committee certifies completion of the concentration requirements for the appropriate undergraduate degree. A member of the committee serves as adviser for each of the seven concentrations and provides interested students with information.

**Women's Studies.** This program is designed for students who are interested in the interdisciplinary study of the culture and experiences of women. Courses are currently offered in three different colleges and nine different departments in order to provide a wide perspective. For a complete description of the curriculum see page 46.

### Preprofessional Preparation

Competition for places in graduate professional schools is keen, and a superior academic record throughout college is necessary for admission to these schools. Since requirements for the professional schools vary in their "essential" and "recommended" subjects, the student should consult the catalog of the professional school and then plan his or her undergraduate program accordingly. Those seeking careers as social workers may enroll as majors in sociology, including in their curriculum the social welfare courses. A basic foundation for graduate study, whether directed toward college teaching or research careers, can be provided through any of the liberal arts or science majors. The bachelor of arts curriculum provides specific majors for those planning to become journalists or public school teachers.

**Prelaw Studies.** For students who plan professional study of law, guidance and program advice are provided by departmental advisers assigned in University College and by concentration advisers within various departments and colleges.

Students interested in law school should consult the *Prelaw Handbook*, prepared by the Association of American Law Schools and the Law School Admissions Council. The association finds it inappropriate, given the wide range of a lawyer's tasks, to prescribe either a set of prerequisite courses for prelaw students or preferred major departments. Rather, it recommends that students choose their majors dependent upon their own individual intellectual interests and upon "the quality of undergraduate education" provided by various departments and colleges. "Shortly stated, what the law schools seek in their entering students is . . .

accomplishment in understanding, the capacity to think for themselves, and the ability to express their thoughts with clarity and force." The association emphasizes that "the development of these fundamental capacities is not the monopoly of any one subject-matter area, department or division."

**Premedical Studies.** For students who plan professional study in medicine, guidance and program coordination is provided by the premedical adviser and the Premedical, Pre dental, Pre-veterinary Advisory Committee.

The student should consult the prerequisites for professional schools to which he or she may expect to apply for admission. These are listed in *Medical School Admission Requirements*, published annually by the Association of American Medical Colleges.

Medical schools generally require at least a 3.3 grade point average and high scores on the required Medical College Admission Test (MCAT), taken preferably in the spring semester of the third undergraduate year.

The new MCAT was given for the first time in the spring of 1977. From an evaluation of the distribution of scores after this first administration of the test, it is reasonable to assume that successful applicants to medical schools will rank in the intervals

above 10 in the 15-interval scoring system.

All candidates must have personal interviews with the Premedical, Pre-dental, Preveterinary Advisory Committee. Normally these interviews will take place during the spring semester of the third undergraduate year.

Since only about 27 of each 100 applicants to medical schools are admitted, it is wise to plan for an alternative career.

**The University of Rhode Island-Brown University Early Identification Program for Rhode Island Residents.** This is a plan for the early identification and acceptance into the program in medicine at Brown University of highly motivated, exceptionally qualified and interested students at the University of Rhode Island and at Providence College. The plan offers virtual assurance of a position in Brown's program in medicine, so long as the student completes the required courses and maintains a good academic performance. The program is designed to encourage a few of the most highly motivated students, who are Rhode Island residents, to make an early commitment to the study of medicine at Brown by providing them with acceptance assurance similar to that afforded students entering Brown's medical education program directly from high school.

URI students with cumulative averages of 3.5 and above are interviewed and evaluated by the URI Premedical, Pre-dental, Preveterinary Advisory Committee after the completion of their freshman year. Certain of these students are then recommended by the URI Premedical Adviser on the basis of an excellent academic record, exceptional promise as a premedical student, apparent suitability for the profession of medicine, Rhode Island residency and a desire to study medicine at Brown. At the beginning of their sophomore year, these nominated students are interviewed and their applications are evaluated by the Medical Education Program Undergraduate Affairs Committee of Brown University.

Upon acceptance, they have the same status as their Brown counterparts, while continuing their studies at the University of Rhode Island. Like the Brown students, they are free to major in the arts or humanities, if they

wish, as long as they complete the required premedical courses. As undergraduates they are also invited to take one or two of their premedical courses on the Brown campus with their future classmates, and are invited to colloquiums and various social events sponsored by the Brown Medical Student Society.

After the students in the Early Identification Program have been graduated from URI, at the point of entering the first year of the program in medicine, they go through the same promotions process required of all medical education program students. Academic performance, interviews with members of the Admissions Committee, Medical College Admissions Test (MCAT) scores, and faculty recommendations are all reviewed. Upon promotion they become full-fledged first-year medical students at Brown University.

**Pre-dental Studies.** The recommendations for premedical preparation also apply to pre-dental students, who are counseled by the same advisory committee.

The student should consult the course requirements for each dental school to which he or she may expect to apply for admission. These are listed in *Admissions Requirements of American Dental Schools*, published annually by the American Association of Dental Schools.

The Dental Admissions Test (DAT) is required, and normally this test is taken in the spring of the third undergraduate year. Competition for admission into dental school is nearly as keen as that experienced by premedical students. Thus, an excellent academic record, along with a 5 or 6 in each section of the test, usually is required.

Each candidate must have personal interviews with the Premedical, Pre-dental, Preveterinary Advisory Committee. Normally these interviews will take place during the spring semester of the third undergraduate year.

**Premedical and Pre-dental Curriculum.** A premedical or pre-dental student may choose to study in any liberal arts or science curriculum, so long as the courses that are required by medical schools are included. Most students

major in one of the biological or health sciences or in a related field, such as pharmacy or chemistry.

A recommended course of study is outlined below. Italicized items are indispensable for admission to any medical or dental school. Ideally, these courses, or their equivalents, should be substantially completed before the MCAT or the DAT is taken.

**Chemistry.** At least 16 semester-hour credits, including *general inorganic*, qualitative and quantitative analysis, and *organic*; physical chemistry is sometimes required and is frequently recommended: CHM 101, 102, 112, 114, 212, 227, 228, 226; and in some cases 431 and 432, each with the associated laboratory.

**Biology.** At least 11 credits, including *general animal biology*, embryology, physiology or anatomy, genetics: ZOO 111, 316, 321 or 345, BOT 352.

**Physics.** At least 8 credits including PHY 111, 112.

**Mathematics.** At least 6 to 9 credits, through calculus, MTH 141, 142.

**English and Communications.** At least 12 credits, including WRT 101, 102 and a year of literature.

**Modern Foreign Language or Greek or Latin.** Through the intermediate level.

**Social and Behavioral Studies.** At least 6 credits. Psychology: PSY 113, Sociology: SOC 202.

**Preveterinary Studies.** Students who are interested in preparing for a professional career in veterinary medicine are counseled by the Premedical, Pre-dental, Preveterinary Advisory Committee. Requirements for admission into the study of veterinary medicine vary and the catalogs of veterinary schools should be consulted for specific requirements early in a student's undergraduate years. Many schools require the Veterinary Aptitude Test (VAT) or the Graduate Record Exam (GRE). Ordinarily, either test should be taken in the spring semester of the third undergraduate year. Moreover, some experience in the animal sciences is expected by some veterinary medical schools.

A preveterinary student may choose to follow the Bachelor of Science cur-

riculum in Animal Science (described elsewhere in this *Bulletin*), or he or she could be guided by the course of study recommended above for premedical and pre dental students.

Each candidate must have personal interviews with the Premedical, Pre-dental, Preveterinary Advisory Committee. Normally these interviews will take place during the spring semester of the third undergraduate year.

Competition for admission into schools of veterinary medicine is extraordinary. Therefore, evidence of high motivation and an outstanding academic record are essential.

### Honors Program

The University Honors Program offers bright and motivated students opportunities to broaden their intellectual development and to strengthen their preparation in their major fields of study. The program consists of honors courses for freshmen, an honors colloquium for sophomores, tutorial courses for juniors and individual honors projects or special seminars for seniors. The courses offered in the first two years treat general topics and may count toward the satisfaction of general education requirements. The courses offered in the last two years are specialized in nature and count towards the satisfaction of concentration requirements. Eligibility standards are established yearly by the Honors Program and Visiting Scholars Committee.

In order to graduate with honors, a student must complete, with a QPA of 3.0 or better, at least 15 credits of course work in the Honors Program, including the third year tutorial (6 credits) and the fourth year honors project or special seminar (6 credits). However, eligible students may register for any number or pattern of honors courses they choose.

### University Year for Action

This program provides a full-time one or two semester internship experience for students interested in public service careers. It is especially designed for the gifted student who

wishes to combine classroom learning with a field experience apprenticeship. Students may apply from any undergraduate curriculum which permits 15-30 credits of free electives to be used for an internship. Placements are available in mental health, social services, community planning, urban affairs, nutrition, women's studies, law, public health, resource management, and many other fields. To apply, students must have junior or senior standing and a minimum QPA of 2.50.

### Dean's List

Full-time undergraduate students who have achieved certain levels of academic excellence in any semester are honored at the end of that semester by inclusion of their names on the Dean's List. The Registrar will publish lists of students who have attained the required quality point average.

A student may qualify for the Dean's List if he or she has completed 12 or more credits for letter grades in a semester. Freshmen and sophomores shall qualify by achieving a 3.0 quality point average; juniors and seniors, a 3.2 quality point average.

### Intellectual Opportunity Plan

This "pass-fail" plan encourages undergraduate matriculated students to increase their intellectual breadth and discover aptitudes in new areas of knowledge. A student above the freshman level who is not on probation may register under this plan for courses considered by the college in which he or she is enrolled as free, unattached electives. Courses that are stipulated in the student's curriculum as degree requirements, general education requirements, and military science courses may not be included.

A student choosing to take a course under this plan must notify his or her adviser, academic dean and the Registrar's Office in writing, prior to the end of the add period of each semester. The instructor is not informed.

Grades will be S (satisfactory) or U (unsatisfactory). The S grade is credited toward degree requirements, but not included in the quality point aver-

age. The U grade is not credited and is the equivalent of an F grade in calculation of quality points. If a student has selected the S/U option for a course, then decides not to use the S/U option, he or she may change by notifying the Registrar before the last date for dropping courses.

A student may elect not more than three S/U courses each semester and not more than two S/U courses during a summer.

### Reserve Officers Training Corps

The Military Science Department offers the ROTC Program which enables any college student to earn a commission in the United States Army while simultaneously earning a college degree. A four-year program exposes the military science student to military history, international relations, leadership, management, and the principles of effective organization. A laboratory period allows students to put into practice the theory presented in academic instruction. Credit toward graduation is received for all classroom instruction and, for the final two years of instruction, each student receives a monthly stipend of \$100. Those enrolled in military science courses are also eligible to compete nationally for full Army ROTC scholarships.

A modified two-year program is available to sophomores and graduate students which substitutes a six-week summer training period or an on-campus six-credit summer program for the first two years of study. An ROTC graduate has the option to serve a three-year duty tour in the Active Army or a six-year, part-time tour in the Army Reserve Force.

### Grades and Points

All grades are reported as A, superior; B, good, above average but not superior; C, average; D, low grade, below average, passing; F, failure; S, satisfactory; U, unsatisfactory.

Grades are given quality point values as follows: A, 4 points; B, 3 points; C, 2 points; D, 1 point; F, S and U, 0 points.

A grade may be reported as "incomplete" only when course work has been passing but has not been completed due to illness or another reason which in the opinion of the instructor justifies the report of incomplete. Incomplete grades that are not removed from an undergraduate student's record by the following mid-semester will remain on the student's permanent record.

Making up failures in elective courses is not required, but making up failures in required courses is. The course should be repeated when next offered. No limit is placed on the number of times a course may be repeated, but the credit requirement for graduation is increased by the number of credits repeated.

Certain courses do not lend themselves to precise grading and for these courses, only S (satisfactory) or U (unsatisfactory) shall be given to all students enrolled. S/U courses shall be labeled as such in the University catalogs and bulletins. S/U courses are not counted as courses taken under the Intellectual Opportunity Plan.

**Probation and Dismissal.** A student shall be placed on scholastic probation when his or her cumulative scholastic average falls below 2.0 after completing 23 or more credits, but not if he or she has a deficiency of four (4) or fewer quality points below a 2.0 average after completing 22 or less credits.

A student shall be dismissed for scholastic reasons when he or she has a deficiency of eight (8) or more quality points below a 2.0 average after being on probation the previous semester. A freshman student who earns less than a 1.0 average in his or her first semester shall be automatically dismissed. A student subject to dismissal shall be so notified by the dean, after which he or she shall have five days to file a written appeal with the dean.

Students are expected to be honest in all academic work. A case of cheating or other form of academic dishonesty, such as plagiarism, shall be reported by the academic dean of the college or school in which the student is enrolled to the Director of Student Relations who shall arrange for a hearing by the University Board on Scholastic Integrity. Procedures for such a hearing are described in the *University Manual*.

## Withdrawal from College

An undergraduate student wishing to withdraw from the University at any time other than at the end of semester is required to secure a "withdrawal form" from the Office of Counseling and Student Development. This form, when completed, is taken to the Office of the Bursar for settlement of account.

A student who leaves the University during the course of a semester without officially withdrawing may get grades of failure in his or her courses.

If a student officially withdraws from the University after mid-semester, a symbol of "W" shall be recorded for each course in which he or she was registered. A student who withdraws from the University and seeks readmission for the next semester, may be readmitted only upon approval by the Scholastic Standing Committee for the college or school in which registration is desired.

## Undergraduate Graduation Requirements

To graduate, a student must have completed the work for, and must have achieved the minimum quality point average established by, the curriculum in which he or she is enrolled. Total quality points earned must equal at least twice the total number of credits for which the student has registered in that curriculum.

A transfer student who has met the requirements for two degrees and has taken an additional 30 hours (24 of which must be taken at the University of Rhode Island) beyond the minimum requirements for the initial degree may be granted an additional bachelor's degree.

Any student who has met the requirements for a second bachelor's degree and has completed an additional 30 hours of credit beyond the minimum requirements for the initial degree may be granted two bachelor's degrees.

Students who have met the requirement for two separate concentrations within any single bachelor's degree curriculum have earned a double major and may have both fields listed on their permanent records.

A maximum of ten full semesters in

one four-year curriculum will be allowed any student for graduation.

Exceptions to the requirements in the above paragraphs may be made upon recommendation by the college concerned.

Except in special cases, which shall be considered by the faculty of the college in which the student is registered, the work of the senior year must be taken in residence.

Students who complete at least 60 credits of their work at the University are eligible to graduate with distinction. Those who attain a cumulative quality point average at the time of graduation of at least 3.30 will be recognized as graduating "with distinction." Those who achieve a quality point average of 3.50 will graduate "with high distinction" and those who attain a 3.70, "with highest distinction."

A student who has successfully completed six semesters at the University in the curriculum in which he or she is registered, and then enrolls in an accredited professional college and receives a recognized professional degree, may apply for the degree of Bachelor of Science from the University of Rhode Island. The award if approved, will be made at the next regular commencement. For veterans, only four semesters in residence are required. The other two may be fulfilled by the service record evaluated in terms of University credit.

## University Manual

University regulations governing matters such as grading, probation and dismissal, academic integrity, withdrawal from college, and graduation requirements are fully explained in the *University Manual*. Copies of the *University Manual* are available in the Library and in the deans' offices.

# Admission and Registration

## Admission to the University

Ideally, admission to the University is a mutual selection process. It is hoped that those students who seek admission will also be the kind of students sought by the University: those who will benefit from the educational opportunities afforded by the University, those who will be stimulated and challenged by doing undergraduate work in an environment that includes scholarly research and graduate study; those who are committed to becoming contributing members of the University. Students are selected for enrollment primarily on the basis of their academic competence and without regard to age, race, religion, color, sex, creed, national origin, or handicap.

Candidates must meet the unit requirements of the University College as listed below for entrance to the University. Furthermore, to meet the requirements for entry to any of the other colleges in the University at the sophomore or junior level, applicants must complete the additional units recommended by the particular college to which transfer is intended. See page 29 for description of the University College.

Applicants are given individual consideration, but it is expected that all candidates will offer 16 units of college preparatory work as outlined below. If these requirements are not fully satisfied by secondary school study, they may be met wholly or in part by suc-

cessful performance on appropriate examinations administered by the College Entrance Examination Board, the University, or the State Department of Education.

### Unit Requirements

*University College* requires 4 units in English, 2 in algebra and/or plane geometry, 1 in physical or natural science, 1 in history or social science, and 8 additional units as specified below for individual colleges.

*Arts and Sciences* requires 4 units in English, 2 in mathematics (2 in algebra or 1 in algebra and 1 in plane geometry), 1 in physical or natural science, 1 in history or social science, 2 in any single foreign language, and 6 additional units. Majors in chemistry and physics require 4 units of mathematics.

*Business Administration* requires 4 units in English, 3 in algebra and plane geometry, 1 in physical or natural science, 2 in history or social science, and 6 additional units.

*Engineering* requires 4 units in English, 4 in mathematics (algebra, plane and solid geometry, and trigonometry), 1 in physics and 1 in chemistry, 3 in history, social science and/or foreign language, and 3 additional units.

*Human Science and Services* requires 4 units in English, 2 in algebra and/or

plane geometry, 1 in physical or natural science, 3 in history, social science, and/or foreign language, and 6 additional units.

*Nursing* requires 4 units in English, 2 in algebra and/or plane geometry, 2 in physical or natural science, 1 in history or social science, and 7 additional units.

*Pharmacy* requires 4 units in English, 3 in algebra and plane geometry, 2 in physical or natural science, 1 in history or social science, and 6 additional units.

*Resource Development* requires 4 units in English, 2 in algebra and/or plane geometry, 1 in physical or natural science, 1 in history or social science, and 8 additional units.

It is strongly recommended that additional units be selected from languages, history, mathematics, or science.

**Application Procedures.** Students should discuss their plans for study at the University with their academic counselors as early as possible to establish realistic goals and program selections. Admissions counselors at the University will be glad to correspond with students on individual problems. Requests for application forms and information should be directed to the Office of Admissions, University of Rhode Island, Kingston, RI 02881.

Applications and requests for admission information from international students should be addressed to the Director for International Student Affairs, 37 Lower College Road, University of Rhode Island.

Students are enrolled at the beginning of the fall semester in September and at the beginning of the spring semester in January. High School seniors are urged to submit applications early in their final year of preparatory study as the University subscribes to a "rolling" admissions policy, reviewing folders as soon as complete credentials are submitted. However, some applicants find it to their advantage to hold their forms until senior mid-year grades are available, so that their progress in the last year may be assessed by the Selection Committee. Closing date for fall term applications is March 1, and most decisions are reported in February, March and April. Closing date for spring term application is December 1.

*Early decision* is made on the application of any freshman candidate who has established a superior academic record, who has achieved above-average scores on the CEEB Scholastic Aptitude Test, and whose potential as a superior student is reflected in the secondary school endorsement. Applications which meet these qualifications and which are clearly labeled "Early Decision Candidate" are considered on a priority basis if filed prior to November 1.

Applicants to the Bachelor of Music degree program must audition and must contact the music department for specific requirements.

**Entrance Tests.** All freshman candidates for admission are required to take the Scholastic Aptitude Test. This test is administered by the College Entrance Examination Board. Applicants who have been away from formal studies for at least three years should contact the Admissions Office concerning entrance requirements.

Applicants are encouraged to take the SAT as early as possible in their senior year; delay beyond January date materially reduces a candidate's prospects for a timely decision. Full information concerning this test may be obtained from local high schools or by

writing to CEEB Headquarters at P.O. Box 592, Princeton, New Jersey 08540.

Applicants for the curriculum in dental hygiene are required to take the SAT and the Dental Hygiene Aptitude Test. Full information concerning this test may be obtained from the University Office of Admissions or from the American Dental Hygienists' Association, 211 East Chicago Avenue, Chicago, Illinois 60611.

International students who are not immigrants must take an English proficiency test administered by the American Consulate or the Test of English as a Foreign Language (TOEFL) administered by the Educational Testing Service, Princeton, New Jersey 08540, U.S.A. Additionally, the Scholastic Aptitude Test is required as outlined above. English placement tests are required of all incoming undergraduate students.

**Interviews.** Personal interviews are not part of the normal admissions procedure. It would be impossible for the admissions staff to interview all candidates, and individual conferences are arranged only if a unique problem requires personal discussion.

*Group conferences* are scheduled several afternoons each week during the fall and early winter months. Students and their parents are invited to participate in these meetings to get acquainted with the University. Visitors are requested to phone ahead (401-792-2164) to be scheduled for these meetings.

**Campus Tours.** The University provides daily tours of the campus for visitors, Monday through Saturday, while classes are in session. The tours are conducted by students. Group tours for high schools and other organizations may also be arranged. For more information about this service phone (401-792-2737).

**Early Admission.** Students who have completed their junior year of high school with superior records are eligible for early admission. A part-time study program may be arranged for students who wish to begin college study in their senior year while continuing their high school work. A full-time program may be arranged for

those recommended for college admission without completion of the standard preparatory program.

Early admission students would normally have completed: 3 years of English, 3 years of mathematics, 2 years of foreign language, 2-3 years of social studies or history. Students should be academically competitive within their high school class, have corresponding scores on the College Board PSAT, SAT or equivalent tests, and the endorsement of their school.

Interested persons should plan with their high school counselor early in their junior (11th) year and direct further inquiries to the University Admissions Office.

### Advanced Standing

*Advanced placement for freshmen* is granted to students who have completed college-level courses in a high school participating in the Advanced Placement Program and have passed with a grade of 3 or better the CEEB Advanced Placement Examination in the subject area for which advanced placement is sought. In addition, students also may take proficiency examinations administered by departments of the University to be granted advanced placement. Entrance with advanced standing can accelerate the completion of degree requirements, or it can enrich the undergraduate program with greater scope for elective or advanced courses.

*Transfer students* who have attended, or are attending another college or university, are required to have official transcripts sent directly from the institution, whether or not they expect or desire credit for such work; their high school record must also be submitted. Most successful applicants offer a cumulative grade point average above 2.5. Except in very unusual circumstances, candidates incurring academic or disciplinary dismissal from other colleges are not eligible for admission. Candidates accepted with transfer credit are classified as freshmen, sophomores, juniors, or seniors according to the number of credits accepted for transfer. The transfer of General Education credits is described on page 10.

**Proficiency Examinations.** Students who show evidence of advanced knowledge or who have taken "enriched" programs in high schools may be exempt from certain courses and requirements if they take departmental proficiency examinations. A student who successfully passes such an examination earns credits as well as exemption from the course.

Upperclassmen interested in taking these exams should contact their academic dean. New students may obtain further information during the orientation or from their assigned adviser in University College.

### College Level Examination Program.

**CLEP General Examinations.** Students who have not been pursuing formal studies for at least three years may take the CLEP General Examinations to demonstrate what they have learned from a variety of life experiences. URI students must secure prior approval from their academic dean to take the exams for credit. Transfer students may receive credit from CLEP General Examinations taken prior to enrollment at URI provided that their scores meet URI standards and provided that their academic dean judges that the CLEP credit does not duplicate other transfer credit.

CLEP General Examinations may be taken in the following areas (URI credits for these are shown in parentheses):

	<i>Minimum score</i>
English Composition (English composition elective 3 credits <sup>1</sup> )	560
Fine Arts (Fine Arts elective, 3 cr.)	46
Literature (Literature elective, 3 cr.)	45
Biological Sciences (Natural science elective, 3 cr.)	46
Physical Sciences (Physical science elective, 3 cr.)	44
Social Sciences (Social science elective, 3 cr.)	46
History (History elective, 3 cr.)	45
Mathematics (no credit)	

**CLEP Subject Examinations.** Academic departments may use CLEP Subject Examinations as proficiency exams to test students' mastery of the subjects

taught by the department. A department which judges a CLEP Subject Examination to be a satisfactory proficiency exam decides what credit should be awarded within the department to students who pass the exam, establishes the minimum score for credit, decides whether students must answer the optional essay questions supplied by CLEP, and decides whether students must pass a supplementary department test, such as a lab exam. The following CLEP Subject Examinations are accepted by departments as proficiency examinations.

**Readmission.** Students formerly enrolled at the University and seeking reentry may obtain applications for readmission at the Office of the Registrar. Readmitted students are subject to a \$15 application fee and must make a \$50 advance deposit. All applications for readmission must be submitted to the Office of the Registrar no later than August 15 for the fall semester and December 31 for the spring semester.

**Health Questionnaire.** Every newly entering student is provided a health questionnaire from University Health Services. It is expected that these questionnaires will be completed and returned promptly. This questionnaire provides University Health Services with basic information prior to the student's arrival on campus. Questionnaires are distributed only after admission to the University and therefore play no part in the process of acceptance to the University.

In accordance with Section 16-38-2 of the General Laws of Rhode Island, the University must have a certificate signed by a licensed physician giving proof of rubella (German measles) immunity for each new female student between the ages of 15 and 35.

**New England Regional Student Program.** Under the cooperative plan of the New England Board of Higher Education (NEBHE), students from other New England states are admitted to certain curriculums at the University of Rhode Island which are not offered in their own states. Certain programs at other New England state universities are open to Rhode Islanders on a reciprocal basis. Regional students at the University will be charged the in-state fee plus a surcharge of 25 percent. However, if the student transfers out of the program of study that qualifies under the New England Student Program, out-of-state fees will apply. Details on the operation of this program are available on request from the New England Board of Higher Education, 68 Walnut Road, Wenham, Massachu-

sets 01984, or high school guidance offices. The Office of the Registrar provides information pertaining to this program for students who are already enrolled at the University.

Prospective students who wish to claim eligibility for this program must state so in the appropriate section on their application for admission. Continuing or returning students claim eligibility by contacting the Registrar's Office with a formal request prior to the end of the add period of the semester in which regional status is to be effective.

**Special Program for Talent Development.** The University encourages the application of economically and socially disadvantaged individuals from Rhode Island and has instituted a prematriculation program designed to assist such applicants whose education is below college preparatory level. There is special financial provision for students in this program. Interested individuals should apply to Special Programs for Talent Development, Taft Hall, as early as possible in their senior year in high school. High school graduates or those with an equivalency diploma are also encouraged to apply.

## Registration

All students must register for courses at the Registrar's Office in order to be properly enrolled.

**Preregistration.** The University pre-registers matriculated (official degree-seeking) students who meet the eligibility requirements as defined in the *Schedule of Courses*. Preregistration generally occurs in March and October for the following semester. However, freshmen entering in the fall semester preregister at specified dates during the summer. Additional information is available from the Office of the Registrar.

**Registration Day.** This is held the day before classes begin for both the spring and fall semesters. All matriculated students who did not preregister (or who did not receive a final schedule) must register at Keaney Gymnasium on this day.

**Late Registration.** Matriculated students who are unable to register at Keaney will be required to register late, beginning on the first day of classes and continuing no later than the end of the published add period. Such

students must pay a \$15 late registration fee during the week in which registration day falls; \$50 thereafter.

**Non-matriculated Students.** Such students must apply each semester to the Admissions Office for permission to enroll and for registration instructions. Registration takes place during the first week of classes.

**Payment of Fees.** Arrangements must be made with the Bursar for complete payment of tuition and/or fees. If, at any time during the semester, it becomes apparent that a student has not met his or her financial responsibilities with the University, the registration for that semester is subject to immediate and irrevocable deletion. Class schedules will be issued only for those students who have registered for courses and satisfied payment requirements with the Bursar by the announced due date. Students who have not satisfied payment requirements by the announced due date will have their preregistration class schedules irretrievably cancelled and will be required to register on registration day.

**Drop and Add.** Students are permitted to add courses during the first two weeks of classes.

Any course may be dropped, by official procedures determined by the Registrar, before the second weekday prior to the end of the add period (the third weekday, if the add period ends on Monday). During the two or three days before the end of the add period, a course may be dropped only if another course is simultaneously added.

It is the student's responsibility to notify the instructor and/or the department by the second class meeting if he or she intends to remain enrolled. Otherwise, the seat may be assigned to another student.

**Audit.** An auditor may be admitted to class on a space-available basis with the consent of the instructor as indicated by the instructor's signature on an audit authorization form which must be filed in the Office of the Registrar. The course instructor shall determine the extent to which an auditor may participate in class activities. An auditor's name shall not appear on official class rosters, on the grade report, nor will the course be posted to the student's permanent record.

**Flexible Scheduling.** Simultaneous enrollment in Kingston classes and College of Continuing Education classes may give scheduling flexibility to students with special time and location restrictions. Students should consult their academic adviser or college dean for further information.

**Off-Campus Study.** A full-time student who wishes to study at another college or university and use that course work to satisfy graduation requirements at the University of Rhode Island must register for off-campus study with the Registrar to ensure that grades and credits will be accepted. The student must obtain signed approval for the off-campus courses from the dean of his or her college. Off-campus study includes summer sessions, one or two semesters at another American university, or study abroad. A student may not ordinarily study off campus during the senior year. Students who wish to maintain registered status and pre-registration eligibility while studying off campus, must register for off-campus study for each semester of ab-

sence from the University of Rhode Island campus.

**Student Exchange Program.** Any full-time student matriculated at the University of Rhode Island, Rhode Island College, or Community College of Rhode Island may enroll for a maximum of seven credit hours of his or her full time schedule per semester for study at one of the other public institutions at no additional expense. Students will be subject to the course selection process at the receiving institution. Summer Session and Continuing Education registrants are not covered under this program.

Information regarding this program is available at the Office of the Registrar.

**Study Abroad.** Students who participate in study abroad programs sponsored by the University of Rhode Island or other institutions may receive credit for coursework and retain their status as matriculated students by obtaining signed prior approval for their courses and registering for off-campus study for each semester of absence from the University of Rhode Island campus. Information regarding these procedures is available from the Study Abroad Adviser, University College, Roosevelt Hall.

**Veterans' Educational Benefits.** Full information describing these benefits may be obtained from your base education officer or from the Veterans Administration Regional Office, 321 South Main Street, Providence, Rhode Island 02903. A toll-free number is available for inquiries by asking the long distance operator for Enterprise 5050.

Veterans who are eligible and who wish to receive VA educational benefits must notify the Office of the Registrar in person. In order to satisfy Veterans Administration regulations, all students who receive VA educational benefits must report all changes in academic status to the veterans' registration clerk in the Office of the Registrar.

Recipients of VA educational benefits are also governed by the same University policies as all other students and are, therefore, responsible for completing those procedures described in the *Schedule of Courses* for

effecting changes of status (adding and dropping courses, changing address, withdrawing from the University, etc.).

The *University Manual*, the *Graduate Student Manual*, and the *Students' Guide to URI* further explain the University's policies and procedures concerning the following: 1) the grading system and standards of progress required of the student by the University and the conditions for dismissal for unsatisfactory grades; the allowed probationary period, and the conditions of reentrance for academically dismissed students (See: *University Manual*, Chapter 8; *Graduate Student Manual*, Appendix A; *Students' Guide to URI*, Section 2). 2) the records of academic progress maintained by the University and furnished to the student (See: *University Manual*, Chapter 8; *Graduate Student Manual*, Appendix C; *Students' Guide to URI*, Section 2). 3) the policies and regulations relating to student conduct and conditions for dismissal for unsatisfactory conduct (See: *University Manual*, Chapters 5 and 6; *Graduate Student Manual*, Appendix A; *Students' Guide to URI*, Section 2).

**Change of Address.** It is the responsibility of the student to complete a change of address form in the Office of the Registrar whenever a change is made in his or her local, campus, or mailing address.

# Expenses and Student Aid

## Expenses

Charges and fees set forth in this bulletin are subject to change without notice.

The total cost for a year of resident study at the University is about \$5,000 for citizens of Rhode Island and about \$7,600 for out-of-state residents. These figures include \$240 for books and supplies, and \$732 for miscellaneous personal expenses and travel.

Students commuting to the University from their homes in Rhode Island should anticipate expenses of approximately \$4,425 a year. This figure includes \$240 for books and supplies, and \$2,834 for miscellaneous personal expenses and transportation.

All charges are payable by the semester and are due and payable on receipt of the bill or by the due date indicated on the bill. Checks or money orders should be made payable to the University of Rhode Island.

### Students Living in a Fraternity or Sorority Add

Average board	1,050.00

### Part-time Students

Part-time students, registered for up to 11 credit hours per semester are charged the fees below:

Tuition, per credit hour

Out-of-state students	123.00
Registration fee per semester	8.00
Memorial Union fee, 1-4 credits	7.50
5-11 credits	15.00

**Resident Student Status.** A student who is a resident of the state of Rhode Island pays the in-state fee, but a student from another state or a foreign country who is in Rhode Island primarily for educational purposes, even though he or she remains in the state during vacation periods, is considered a non-resident and pays the out-of-state fee.

The parents or legal guardians of a minor student must have been residents of the state for one year im-

mediately preceding the first class day of the first term of a student's registration for that student to claim resident student status.

An "emancipated student" must establish the same bona fide residency for in-state tuition exemption. An emancipated student shall mean a student who has attained the age of 18 years, and whose parents have entirely surrendered the right to the care, custody, and earnings of the student and who are no longer under legal obligation to support or maintain him or her. If any of these tests is not met, he or she is presumed to be an unemancipated student. A non-resident student who reaches 18 years of age while a student does not by virtue of that fact alone become a resident student.

Dependents of members of the armed forces, as well as members of the armed forces stationed in the state on military orders, are entitled to classification as resident students.

The Director of Admissions classifies each student admitted to the University as a resident or non-resident student on the basis of all relevant information available to him. A student may appeal the decision to the Board of Residence Review. The above information is merely a summary of the regulations governing student classifications for tuition purposes. The complete text of the regulations adopted by the Board of Regents may be obtained from the Office of Admissions.

<sup>1</sup>See page 18 for exception to this under NEBHE interstate program.

**Tuition Waiver for Senior Citizens.**

Permanent residents of Rhode Island who are 60 years of age or older are entitled to take courses at the University without payment of tuition, although other fees and charges are still applicable. Admission to particular courses will be granted on a space-available basis. Eligible persons should contact the Office of the Registrar.

**New Student Fees.** A nonrefundable fee of \$15 must accompany each application for admission. See page 16 for application procedure.

An advance deposit of \$50 is required from every accepted student. The advance deposit, which is applied on the first term bill, will be forfeited if the applicant later withdraws his or her name.

Students returning after an absence of one or more semesters are subject to the same application fee and advance deposit as entering freshmen.

**General Fee.** All students, both resident and nonresident, pay a general fee of \$1,028.00 per year. This fee covers the cost of benefits enjoyed by all students, such as use of library, testing services, guidance, personnel supervision, placement, athletics, etc.

**Student Assessments.** Each student is assessed \$44 per year which is distributed by the Student Senate to support a wide variety of student programs and activities. A Memorial Union fee of \$116.00 per year is also assessed.

**Late Fees and Special Fees.** A late registration fee of \$15 is charged to students whose registration is not completed before the first day of classes.

Expenses for class trips in all courses and those incident to practice teaching in vocational education courses are charged to the students concerned.

**Applied Music Fees.** Students taking performance courses in music are charged an additional fee each semester of \$60 for 0 credit, \$80 for 2 credits, and \$120 for 3 and 4 credits.

**Student Nurses' Fees.** Beginning in the sophomore year, student nurses must purchase authorized uniforms and

nursing equipment. The approximate cost is \$175.

**Transcripts.** Each student who graduates from the University is entitled to one official transcript without charge. The fee for all other transcripts is \$2, except that the fee for multiple copies ordered at the same time is \$2 for the first copy and \$.50 for each additional copy. Copies will be mailed in response to written requests only, which should be addressed to the Office of the Registrar.

Transcripts will not be issued to students who have any unpaid financial obligation to the University.

**Health Service Fees.** The health fee of \$122.50 is mandatory for all full-time undergraduates, all international students, and all full-time graduate students. The University requires that all such students be insured through the University's Student Sickness and Accident Insurance unless evidence of comparable coverage in another plan is provided and the student completes, signs, and returns a waiver card to the Bursar's Office by the announced term bill due date. Part-time students and spouses of students are eligible to participate in the health and insurance plan on an optional basis.

The health fee covers all outpatient care at Health Services with the exception of laboratory and X-ray services. Students must have insurance which covers these services.

**Refunds.** Refunds of payments made or credits against amounts due to the University shall be made to students who officially withdraw according to the following scale: during the first two weeks, 80 percent; during the third week, 60 percent; during the fourth week, 40 percent; during the fifth week, 20 percent; after five weeks, none.

The attendance period in which withdrawal occurs is counted from first day of registration and includes weekends and holidays.

The premium for the University Student Sickness and Accident Insurance is not refundable. Coverage extends through August 31 even though the student is no longer enrolled.

**Reassessment of Fees.** Fees are reassessed and adjusted according to the credit enrollment and/or student status resulting from drop/add transactions as processed by the Registrar during the add period. Subsequent to the add period, term bills are only reassessed for part-time students who add credits. The dropping of credits after the add period does not reduce term bills.

**Housing Rates.** Following are the rates for University housing for the year 1981-82. For complete information write to the Director of Residential Life, Roger Williams Commons. All rates quoted are for double rooms. For single rooms, where and when available, \$60 per year is added to the double rate. Board is mandatory for students living in residence halls.

**Residence Halls**

\$1,383	Adams, Barlow, Bressler, Browning, Hutchinson, Merrow, Peck, Tucker, Weldin
\$1,450	Butterfield
\$1,518	Aldrich, Burnside, Coddington, Dorr, Ellery, Fayerweather, Gorham, Heathman, Hopkins

The average projected room rate (including social fees) for fraternities and sororities for 1981-82 is \$1,180. The average projected board rate for fraternities and sororities is \$525 per semester.

**Housing and Dining Contract.** University housing is contracted for the *entire academic year*. A deposit of \$100 is required at the time of filing application for a room in the residence hall. This deposit will be applied on the first semester bill. A cancellation of the housing application will result in a pro rata credit on the semester bill according to the following schedule: from date of deposit to June 15, \$100; from June 16 to the opening of the residence halls for the academic year, \$62; after that time, no refunds will be made.

All residence hall rates are quoted for the period specified in the contract. Payments are due in full by the published term bill due date each semester or upon receipt of bill from the Office of Residential Life. Checks and money orders are payable to the University of Rhode Island and should be remitted to the Office of the Bursar.

A student vacating his or her assigned quarters before the end of the period under contract will be held responsible for the total charges for the entire period. No refund will be given when a student moves from University quarters to a private home or decides to commute.

All students living in University residence halls are required to purchase a 15-meal contract for three meals a day, Monday through Friday. A 20-meal contract for three meals a day, Monday through Saturday; brunch and dinner on Sunday are available at the student's option.

Dining contracts begin on registration day and expire the last day of final examinations. They apply each day on which the University schedules classes or examinations according to the meal plan purchased. Meals are not served on holidays.

Students who require diets for health reasons must have their local physician submit a request for the special diet, with the diet prescribed, to the director of Clinical Services, University Health Services, each semester. Special diets for other than health reasons cannot be provided.

Parents and guests of students, faculty and staff members, alumni, and guests of the University may purchase guest meal tickets at the dining rooms, or may use student guest coupons

from student meal books. Various meal plans are available for commuting students on a semester contract basis. Information is available at the Dining Services Office.

Meal books are issued at registration and billed according to the contract signed. Only students withdrawing from the University will receive Dining Services refunds. Please refer to scale on page 22.

**Indebtedness to the University.** Failure to make full payment of all required fees or to resolve other debts to the University (for example, unreturned athletic equipment, overdue short-term or emergency loans, lost library books, debts to the Office of Residential Life for damages, obligations required by the University Judicial System) may result in the cancellation of preregistration for the following semester, denial of registration until the payment is made, and/or disenrollment. Appropriate University departments will provide the student with notice of the debt, reason for it, and a review, if requested. A student must fulfill all financial obligations to the University before receiving transcripts or a diploma.

## Student Financial Aid

Financial Aid is money made available from federal, state, local, or private sources which helps students attend the postsecondary institutions of their choice. At the University of Rhode Island these varied sources are administered by the Student Financial Aid Office in Roosevelt Hall. The financial aid program is designed to serve students from the widest possible range of society and all students are encouraged to apply.

In most cases financial aid will be awarded in a "package" of grants (which do not have to be repaid), loans (which have to be repaid), and student employment opportunities (part-time jobs while attending school). The purpose is to assist the students in meeting the costs of attendance at the University of Rhode Island. To continue receiving financial aid it is necessary to re-apply and demonstrate sufficient financial need each year, and maintain satisfactory academic progress.

Financial aid to students is awarded without regard to age, race, sex, creed, national origin, or handicap.

**Determination of Financial Aid.** A student does not have to be from a low-income family to qualify for financial aid, but does have to have "financial need." A "need" is the difference between what it costs to attend the University and what the student and family can contribute from financial resources. The family, insofar as it is able, is expected to bear primary responsibility for financing their son's or daughter's college education, and the student is also expected to earn a portion of the resources for college expenses, usually through summer employment.

**Eligibility.** Only citizens, nationals, or permanent residents of the United States are eligible to apply for financial aid. Foreign students desiring information about financial assistance should contact the Office of International Student Affairs at the University.

To be considered for most types of aid, a person must have been accepted and enroll as a matriculated student at the University. Special students and students attending only during summer sessions are ineligible.

**Application Procedures.** Residents of Rhode Island, Connecticut, Massachusetts, New Jersey, Pennsylvania, or Vermont should complete a Financial Aid Form (FAF) specifically printed for their state. Residents of another state should complete the national Financial Aid Form and apply for a *Basic Educational Opportunity Grant (BEOG)* by checking the appropriate box on the FAF. The Undergraduate Student Financial Aid Application should also be completed and returned to the Student Financial Aid Office in Roosevelt Hall.

Approximately four weeks after filing the FAF, the applicant will receive a Basic Grant Student Eligibility Report (SER). The SER should be submitted to the Student Financial Aid Office even if the student is ineligible for a Basic Grant.

**Application Dates.** The FAF should be mailed to the College Scholarship Service in Princeton, NJ, after January 1 and before February 15. The URI Un-

dergraduate Student Financial Aid Application should be submitted to the Student Financial Aid Office prior to March 1.

Applications completed on or before the above dates will receive first consideration for financial aid awards; however, late applications will be processed as long as funds remain available.

#### Federal Aid Available

*Basic Educational Opportunity Grant (BEOG).* The Basic Grant is designed to form the foundation of all aid received. Each applicant is mailed a Student Eligibility Report (SER) which must be forwarded to the Student Financial Aid Office. The amount of the Basic Grant, with a maximum of \$1,900, depends upon the costs at the institution and the number of credits for which the student enrolls.

*Supplemental Educational Opportunity Grant (SEOG).* The SEOG is intended to assist undergraduate students with financial need. SEOG awards are available in amounts ranging from \$200 to \$2,000 per year.

*National Direct Student Loan (NDSL).* Eligibility is based on need. Undergraduates are limited to borrowing \$3,000 for the first two years of their program with a maximum of \$6,000 for four years. Graduate students may borrow up to \$12,000 including undergraduate loans. These loans have a simple interest rate of 4% annually. Interest does not accrue until six months after graduation or withdrawal. Minimum payments of \$30 per month are required, and the repayment period may extend up to ten years.

*Nursing Student Loan/Scholarship Programs.* The Nursing Student Loan is available to students enrolled in the College of Nursing. The long-term low-interest loans become due and payable should the student leave the nursing program for any reason. Both the loans and the federal Nursing Scholarships are designed to assist financially needy students achieve careers in nursing.

*Health Professions Loan Program.* This loan program is restricted to students in the College of Pharmacy. Loans are

available to all such students with financial need.

*College Work-Study Program (CWSP).* This federally supported program provides part-time employment during the school term and full-time employment during the vacation periods. The jobs may be either with University departments, or with off-campus, non-profit, non-sectarian, non-political agencies. Other institutionally funded employment is also available. A list of these jobs is available in the Student Financial Aid Office. (Limited funding could curtail the summer employment program.)

*Guaranteed Student Loan Program.* Students may apply for loans under the Guaranteed Loan Program through local lending institutions. Interest on loans, until six months after graduation or withdrawal, will be paid by the federal government. Simple interest of 9% annually is charged once the repayment period begins.

Undergraduate dependent students may borrow up to \$2,500 per year with a maximum of \$12,500. Undergraduate independent students may borrow up to \$3,000 per year with a maximum of \$15,000. Graduate students may borrow up to \$5,000 per year, with a maximum of \$25,000, including undergraduate loans.

In addition, parents of dependent students may borrow up to \$3,000 per year, with a maximum of \$15,000 to help defray educational costs. Annual interest on the parents' loan is 9% and repayment must begin within 60 days after the loan is received.

#### University Aid Available

*University Scholarships.* Scholarship awards require not only financial need, but evidence of high academic potential. Some scholarships have specific restrictions, such as place of residence, major, class year, etc. A list of available scholarships may be found in the Appendix.

*University Grants-in-Aid.* The University provides grants to several hundred students. To be awarded a University grant, the student must have demonstrated financial need, and a satisfactory academic record.

*Regular Student Employment (IPR).* Jobs funded by the University are available to several hundred students. Jobs are listed in the Student Financial Aid Office.

*Athletic Awards.* Athletic awards are made upon the recommendation of the Athletics Department to athletes who meet the established qualifications. These awards, rather than being based on need, are based upon athletic ability. Students interested in such assistance should contact the Department of Athletics.

*University Loans.* Emergency loans of from \$10 to \$100 are available to full-time students. These loans are short-term in nature (14-90 days), and can be made only when there are means of repayment. Application forms are available at the Student Financial Aid Office.

#### Other Sources of Aid

*Rhode Island State Scholarships and Grants.* Undergraduate residents of Rhode Island who have been accepted for enrollment may be considered for Rhode Island State Scholarships or Grants. While both are based upon need, the scholarships also require a strong academic record in high school. The Rhode Island State Scholarship and Grant Program is administered by the Rhode Island Higher Education Assistance Authority, 274 Weybosset Street, Providence, Rhode Island.

There are many additional sources of financial aid available to students who qualify: scholarships from private organizations, clubs, labor unions, fraternities, sororities, and businesses; Vocational Rehabilitation financial support; Veterans Administration benefits, including survivor benefits; and Social Security benefits. Students should apply directly to the source if they believe they qualify.

A list of the scholarships and loans may be found on page 181. For veterans' benefits see page 20.

# Student Life and Services

An enriching college life has a well-balanced mix of academic and extracurricular activities. The University offers a unique blend of student organizations and activities with emphasis on student-run services and businesses.

## New Student Orientation

Orientation programs which facilitate the students' entry into the campus community are administered by the Office of Counseling and Student Development. New students are taxed a nominal amount to cover such expenses as room, meals and materials associated with their orientation program.

**Summer Orientation Workshops.** All students who are beginning University careers attend a two-day workshop to plan their academic programs, to register for fall classes, to learn what to expect of the University, and to begin to acquire the skills essential to successful transition from high school and home to the University community. These programs are planned to personalize the student's first experience with the University as each one participates, with a group of approximately 15 classmates, in workshop projects. Admitted students receive workshop registration materials in May.

Special programs are planned for parents of new students to coincide with some of the workshop dates.

**Transfer Orientation Programs.** Students transferring to the University from another institution are encouraged to attend workshops planned especially to acquaint them with some of the unique features and procedures of this University. These workshops differ substantially from beginning student programs. They deal with the issues and problems associated with transferring from another educational institution to the University of Rhode Island. Students admitted with advanced standing receive orientation information and reservation materials in May for the June and July workshops and in early January for mid-winter orientation.

**Initial Orientation for International Students.** Programs just prior to the formal beginning of the academic year assist the international student to function effectively, comfortably, and with reasonable initial success in the new environment. Because successful transition to American culture, values, and institutions as well as to American academic life is crucial, new international students are required to attend the program. Full information regarding arrival dates and orientation program costs are mailed to students in the spring. In planning educational budgets, international students should

set aside \$75 to cover cost of room, meals and program expenses. This expense is in addition to University fees specified in this bulletin.

**Commuter Student Orientation.** A one-day program is held just prior to the start of the fall semester. This special commuter orientation is presented by the Office of Student Life and is designed to address the problems, needs and concerns of new commuter students. Commuter orientation complements the summer orientation workshops and explores commuter-related issues and concerns in more detail.

## Life Styles

**Residence Halls and Dining Centers.** Residence halls and boarding facilities are available to students during both the regular academic year and the Summer Sessions. There are 19 residence halls on campus offering a variety of living accommodations including coeducational housing. Students registering for rooms in the residence halls will have their applications filled in order of receipt. Room assignments will be to the extent of facilities, and roommate requests will be granted when possible. Freshmen are guaranteed space in residence halls if they send in their housing deposit on time. For rates and contracts, see page 22.

Applications for residence hall living should be made to the Director of Residential Life.

Three dining centers are operated by the University for the convenience of resident students. These centers were constructed with private bond funds. To guarantee payment, the University requires all students living in residence halls to purchase a 15- or 20-meal dining contract as described on page 23.

**Fraternities and Sororities.** There are approximately 1,300 fraternity and sorority members living in the 22 nationally-affiliated houses privately owned by alumni corporations. The staff of the Office of Student Life advises these groups. The Greek houses promote scholarship, citizenship, and small-group living. Within the last 14 years, 12 new houses have been built on campus. Purchasing and business management for these houses is provided by a private corporation controlled by the fraternity and sorority members. The average room and board charges for fraternities and sororities is approximately \$75 less than for University residence halls and dining centers. Approximately 175 freshmen live in fraternities and sororities each year. Interested freshmen should contact the Office of Student Life.

**Commuting from Family Home.** Approximately 2,000 students commute to the University from home. The advantages of home cooking, privacy, lower costs, and opportunity to keep high school friends are balanced against numerous challenges: acquiring information about all aspects of the University, returning to campus for evening events, transportation problems, and budgeting one's time. Various services are coordinated by the Office of Student Life to meet commuter needs. Dining Services offers special meal plans for commuters; Health Services provides a satellite clinic of preventive services; the Commuter Information and Referral Center, staffed by peer advisers, is a clearinghouse of information providing quick and accurate answers to any questions about University life. A car pool matching service is available in the Memorial Union Ram's Den.

**Commuting from "Down-the-line."** Approximately 2,000 students commute from houses or apartments in the southern Rhode Island area known as "down-the-line." Juniors and seniors often choose to move off campus and live within a ten-mile radius of the campus where summer homes are rented to students for the school year. Typically, a student will pay \$75-100 a month, plus utilities, for each bedroom in a furnished house. The majority of winter residents in these down-the-line summer communities are students and they patronize nearby supermarkets, laundromats, restaurants, shopping centers and recreational facilities. Many commute by car pool or bus. The Office of Student Life administers an off-campus housing service along with the commuter services mentioned above. Most services are located in the Commuter Lounge in the Memorial Union.

**Older Students.** Approximately 800 students (10% of the undergraduate population) on the Kingston campus are over 25 years of age. There is a student organization called Older Student Association (OSA) for these men and women who chose not to, or were unable to, attend college right after high school. Some are married, with family responsibilities. Some also have jobs and are part-time students. Some older students are attending school with G.I. Bill benefits. Some have retired from a first career and want to prepare for a second. Older students are encouraged to seek advice from the Admissions Office staff. Programs and services for this group of students are coordinated by the Office of Student Life.

**Minority Students.** Approximately 300 students use the variety of services for minority students. Black students, native American students, Hispanic students, and other minority students have formed special interest groups to further meet their needs. Services are coordinated by the Office of Student Life.

**International Students.** More than 200 international undergraduate students, graduate students, and visiting faculty are advised and served by the Department of International Student Af-

airs. Assistance is provided in the academic, financial, housing, and social areas. All communication from foreign students concerning applications for admission to undergraduate or graduate programs, non-immigrant visas, and employment are handled by this office.

**Handicapped Students.** Handicapped students are encouraged to notify the Coordinator of Handicapped Services in the Office of Student Life concerning the nature of their handicap before their arrival on campus. Programs and services are coordinated by this office.

## Student Government

The Student Senate is a legislative body which represents the students to the administration and faculty and supervises extracurricular activities. It also distributes the activities tax among the various student organizations through its tax committee. Individual residence halls form their own governments. The Interfraternity Council supervises fraternity affairs and the Panhellenic Association governs sorority life. The Commuter Association provides social and other assistance to commuter students.

## University Judicial System

Administered by the Office of Student Life, the University Judicial System is designed to promote student growth and to preserve the atmosphere of learning necessary to the well-being of all students. Community standards of behavior and University policies for students are published in the student handbook, *Rampages*. The Judicial System receives complaints or allegations from aggrieved parties, the available facts are gathered and evaluated, and the case may be referred for formal judicial action by one of the University judicial boards or by administrative action (if the student admits guilt and chooses administrative action). Sanctions range from "no further action" to suspension or dismissal from the University and may include conditions relating to the nature of the violation.

## Student Activities

More than 120 student organizations are advised by the Student Activities Office staff through consultation services, technical expertise and information. Thousands of students participate in the activities sponsored by these organizations.

**Lectures and Arts Programs.** Lectures and arts programs are presented throughout the year to enrich the more formal academic program of the University. Lectures of general and specialized interest are presented by visiting scholars. The Arts Council, on which faculty, students, and administration are represented, plans programs that include music and dance concerts, film programs, and theatre presentations. Student organizations sponsor a popular entertainment series and bring speakers of national or international prominence to campus. These are supported by student funds.

**Student-run Businesses.** The Student Senate business arm, called Kingston Student Services, controls and operates a variety of student-oriented businesses from a record and film shop in the Memorial Union and the campus youth hostel (primarily for commuters) to a used book exchange. Other student-controlled businesses include the fraternity and sorority cooperative buying service and the various residence hall cooperatives for purchase of food and sundry items, and management, with some full-time help, of the multi-thousand dollar food services in the Memorial Union.

**Athletics.** The University offers an extensive program of athletics, sufficiently varied to provide an opportunity for every student to participate. The Tootell Physical Education Center and the Keaney Gymnasium provide excellent facilities, including three pools, three gymnasiums, three weight training rooms, and a modern athletic training room. A bubble air structure covers an indoor track and is connected to the Keaney building. The outdoor facilities include the newly renovated Meade football stadium, 21 tennis courts, two softball diamonds, a baseball field, a lighted lacrosse/soccer field, a new all-weather track, a field hockey field,

and numerous practice fields for recreation and competitive activities.

Men's intercollegiate teams participate in baseball, basketball, football, golf, soccer, swimming, tennis, cross country, and indoor and outdoor track.

In addition to membership in the Eastern Athletic Association, the University holds membership in the Yankee Conference (football) and the National Collegiate Athletic Association.

The women's intercollegiate teams participate in Division I basketball, field hockey, gymnastics, lacrosse, softball, volleyball, cross country, and indoor and outdoor track. They also participate in Division II swimming and diving, and tennis. URI holds membership in the Association of Intercollegiate Athletics for Women and the Eastern Association of Intercollegiate Athletics for Women. The expansion of women's athletic programs provides opportunity for a high level of competition for exceptional female athletes on both the regional and national level.

Intramural programs for men and women combine the values of competitive athletics and informal sports, and are in operation all year.

Those with sports interests may join the several clubs identified with particular sports.

**Honor Societies.** The University has chapters of a number of national honor societies, election to which is a recog-

nition of accomplishment. The Society of the Sigma Xi is the scientific honor society, Phi Beta Kappa is a national liberal arts honor society, Phi Eta Sigma is a national honor society for freshmen, Phi Kappa Phi is the honor society for general scholarship, and Mortar Board recognizes scholarship and leadership. In more specialized areas are the following: Alpha Kappa Delta (sociology), Alpha Zeta (agriculture), Beta Alpha Psi (accounting), Beta Gamma Sigma (business), Kappa Delta Pi (education), Delta Pi Epsilon (business education), Eta Kappa Nu (electrical engineering), Lambda Tau (medical technology), Omicron Delta Epsilon (economics), Omicron Nu (home economics), Phi Alpha Theta (history), Phi Sigma (biological science), Phi Sigma Iota (foreign languages, literature, and linguistics), Pi Delta Phi (French), Pi Mu Epsilon (mathematics), Pi Sigma Alpha (political science), Pi Tau Sigma (mechanical engineering), Rho Chi (pharmacy), Sigma Delta Pi (Spanish), Sigma Pi Sigma (physics), Sigma Theta Tau (nursing), and Tau Beta Pi (engineering).

**Other Organizations.** In addition to intercollegiate athletic teams, a number of organizations represent the University in competition, exhibitions, and public performances. The University Band, Chorus, and Orchestra are under music department direction, and students may receive credit for partici-

pation in any one of these. The University Theatre, under theatre department direction, presents several plays each year. The URI Debate Council is directed by members of the speech department and participates in intercollegiate debates. The Cheerleaders are active at varsity football and basketball games and rallies.

On campus there are about 30 professional organizations related to the academic areas and there are a number of groups serving social, recreational, cultural, and political interests.

Students publish a newspaper four times a week, a bi-weekly gazette, a yearbook, and a literary publication, and operate WRIU, a local AM and a statewide FM radio station.

## Student Services

**Career Services.** The Office of Career Services assists students to understand themselves, to understand the relationship between their education and career choices, to discover and develop alternatives and finally, to make the transition from the academic environment to the working world. It provides individual counseling, developmental career groups and workshops. A Career Resource Center has information on specific careers, job-search strategy, job openings, employer literature and graduate schools. The office coordinates the on-campus recruiting program and makes other employer listings available to all students as well as alumni.

**Counseling Services.** The Office of Counseling and Student Development helps students relate their personal paths of development to the intellectual and interpersonal experiences they encounter in the University setting. The staff of this office works to keep education at a personal, individual level by offering assistance to students in choosing a field of study; developing effective study habits; coping with crises; building satisfying relationships with faculty, staff, and other students; making the transition to the University environment; solving emotional problems, or planning for graduate school or a career.

The staff is made up of counselors,

psychologists, psychiatrists, and educational specialists who have a wide variety of experience working with students, both individually and in groups. In addition to direct counseling services, the staff offers a variety of programs designed to develop essential life skills, to examine crucial life themes, or to make successful life transitions.

University chaplains and religious advisers of various faiths are also available to all students. Religious organizations meet for worship and study, and sponsor other activities throughout the academic year.

**Memorial Union.** A student board of directors working with the Director of the Memorial Union determines policy for the Union and plans a full program of social, cultural, intellectual and recreational activities. The Union building is a memorial to the men of the University who died in two world wars. It houses a wide variety of educational, social, cultural and recreational services and facilities. These include meeting and conference rooms, lounges, browsing room, study rooms, dark rooms, student video center, radio station, campus newspapers, games room, offices for student organizations, student technical services, craft center, cafeteria, snack bar, restaurant, pub, private dining rooms, ballroom and party room.

Among the services provided are a full service bank, travel agency, unisex hair salon, credit union and a center where copying facilities and typewriters are available.

**Health Services.** The University Health Services is open to all students who have paid the health fee. Outpatient services in the Potter Building include limited emergency treatment, special clinics in gynecology, birth control, urology, internal medicine, surgery, wart removal, allergy, nutrition, and mental health. There is also a laboratory as well as X-ray and pharmacy facilities. Allergy injections are given, provided the vaccines are supplied.

The Health Education Department of Health Services in Roosevelt Hall is concerned with teaching students to take care of themselves and to become informed consumers of health-care services. It is open Monday through Friday, 8 a.m. to 4 p.m. Outpatient

services during the academic year are available seven days a week, 24 hours a day. Physicians are available Monday through Friday from 8 a.m. to 8 p.m., and for a weekend clinic. Physicians are on call at other times. Nurses are on duty at all times. Specialists are available only at limited times.

Hospital care is available in the local community. All medical expenses incurred outside the University's Health Services are the responsibility of the student. Students who choose their own private physician must assume responsibility for expenses incurred.

## Confidentiality of Student Records

Procedures for the release and disclosure of student records maintained by the University are in large measure governed by state and federal laws. Where the law is silent, the University is guided by the principle that the privacy of an individual is of great importance and that as much information in a student's file as possible should be disclosed to the student upon request. A current or former student has the right to inspect and review official records, files and data directly related to that student. This right does not extend to applicants, those denied admission to the University or those who were admitted but did not enroll. Some records are not available to students.

A student may challenge the factual and objective elements of the content of student records, but not the qualitative and subjective elements of grading. Third parties do not have access to personally identifiable records or information pertaining to a student without the written consent of the student who specifies that the records be released. Parents are considered third parties.

Detailed guidelines for the release and disclosure of information from student records are available from the Office of Student Life. These guidelines comply with the legal requirements of the Family Educational Rights and Privacy Act of 1974.

# University College

Diane W. Strommer, Dean

All entering students are enrolled in University College except registered nurses and students in special two-year programs. University College offers all other incoming students the opportunity to explore the variety of courses and programs available at the University before they commit themselves to one program of concentration in a degree-granting college. Students who have a clear educational or professional objective when they enter the University are encouraged to transfer to a degree-granting college as directly and rapidly as possible, usually by the end of their first year.

University College grants no degrees. Through its strong program of academic advising, its purpose is to assist new students in making a smooth transition to the University and to provide special assistance, programs, and events for freshmen and sophomores. Advisers, who have regular office hours at the college, are faculty members who represent each of the curriculms in the degree-granting colleges. Each student is assigned an academic adviser who is a specialist in the area which the student plans to pursue or who has a particular interest in working with students who have not yet declared a major. Advisers help students to select and schedule the right courses, become familiar with University procedures, and obtain whatever assistance may be needed.

If more students seek access to a

program than can be accommodated due to limited facilities or faculty, those students who have shown the highest promise for academic success in the program will be admitted first. Where such limitations exist, the student must apply for acceptance in the program under conditions established by the specific department or college. This applies specifically to programs which have been declared "over-subscribed" by the Vice President for Academic Affairs. Students who cannot be admitted to the program of their first choice may request entry into another program for which they have satisfied entrance requirements, or spend one or two additional semesters in University College preparing to qualify for another program.

**Special Program for Talent Development.** This program, administered by the University College, has as its primary concern young people who could not go to the University without the program's assistance. For further information, see page 19.

**Study Abroad Office.** The Study Abroad Office is under the auspices of University College. Its function is to assist students in planning courses of study in foreign countries, as well as travel and living arrangements. The Study Abroad adviser assists students in handling the procedures for obtaining prior approval for courses to be

taken abroad and for retaining matriculated status at the University of Rhode Island during the period of absence from campus.

# College of Arts and Sciences

Barry A. Marks, *Dean*  
Margaret D. Robb, *Associate Dean*  
Gerry S. Tyler, *Associate Dean*  
Donald J. Farish, *Assistant Dean*

The objective of the College of Arts and Sciences is to enable students to understand our intellectual heritage, the physical and biological world in which we live, and our social, economic, and political development. Beyond this, the college provides several programs of professional training and a strong foundation for graduate study. In all its functions the college is dedicated to fostering a spirit of inquiry and independent thought. Emphasis is placed upon intellectual growth and the deep satisfaction derived from knowledge for its own sake.

The college has programs of study leading to the following degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, and Bachelor of Music. The Department of Dental Hygiene provides programs leading to both the Bachelor of Science and the Associate in Science degrees.

For information about preprofessional preparation, see pages 12-14.

## Curriculum Requirements

**Basic Liberal Studies.** The University's General Education Requirements are the foundation of a program called Basic Liberal Studies, required of all students in the College of Arts and Sciences. This series of courses is intended to insure that students have educational experiences which will

help them to become informed and responsible participants in society and will contribute to the full development of their individual capabilities. It embodies the philosophy and fundamental knowledge which characterizes an arts and sciences education.

Courses are selected from the list approved by the College of Arts and Sciences (see below). Students are limited to one course per discipline (as identified by course code) within each division, except that they may take both parts of a designated two-course sequence.

Students in Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), and Bachelor of Music (B.M.) programs earn six credits each in Letters, Natural Sciences, Social Sciences, and Fine Arts and Literature (three of which must be in Fine Arts and three in Literature), three credits in Mathematics, and six in English Communication, including at least three credits from a course devoted to written communication skills. Students in these programs must satisfy the University's foreign language/culture requirement as specified.

Students in Bachelor of Arts (B.A.) programs earn nine credits each in Letters, Natural Sciences, Social Sciences, and Fine Arts and Literature (at least three of which must be in Fine Arts and three of which must be in Literature), three credits in Mathematics and six credits in English Communication, including at least three credits from a

course devoted to written communication skills.

Students in B.A. programs must satisfy the University's foreign language/culture requirement in one of the following ways: (1) course work through the intermediate level (104 for modern languages; 302 for classical languages), or (2) demonstration of competence through examination, or (3) study abroad in an approved academic program for one semester.

All students are prohibited from applying courses from their concentration department to the Basic Liberal Studies requirements in Fine Arts and Literature, Letters, Natural Sciences, and Social Sciences except that students presenting a double concentration may apply courses from one concentration department toward these requirements.

#### Culture Clusters

See list of approved foreign culture clusters in the general education requirements on page 10. Students in the College of Arts and Sciences must select courses within a culture cluster from two different departments.

**Honors Programs.** Comprehensive honors programs are available for especially qualified junior and senior students. Eligibility depends on the quality of academic achievement during the previous two years. Qualified students may assist in research projects related to their major interests, enjoy graduate student privileges at the University libraries, and take graduate courses during their senior year. Honors programs are available in anthropology, biology, botany, chemistry, computer science, economics, English, geography, geology, history, journalism, languages, mathematics, microbiology, music, philosophy, physics, political science, psychology, sociology, speech, and zoology.

**Concentration.** Any student who has met the requirements for two separate

concentrations within any single bachelor's curriculum has earned a double concentration and may have both fields listed on the transcript.

The students must maintain a 2.0 quality point average (QPA) in their concentration to meet graduation requirements.

One-half of the total number of credits needed in a given concentration must be earned at the University of Rhode Island.

**Curricular Modifications.** In exceptional cases, and subject to the approval of their department and of the dean, students may modify any curricular requirement except course level, minimum grade point average, total credits and the Basic Liberal Studies requirements. These may be modified only upon approval of a petition by the Scholastic Standing and Petitions Committee of the College. Petition forms are available in the Dean's Office.

**Area of Interest — Optional.** Students may elect to declare an area of interest which will appear on their transcripts as a category separate from their concentration. Credits may be drawn from any combination of concentration, Basic Liberal Studies courses, electives, and course-level categories. An area of interest may be defined as (1) the completion of 18 or more credits offered within a department and approved by the department chairperson, or (2) the completion of 18 or more credits of related studies offered by more than one department and approved by a member of the faculty competent in the area of interest and the dean of the college.

*Examples* of such interdisciplinary areas of interest are Child Psychology, Music Merchandising, Public Relations, Renaissance Civilization, and Black Studies. It is the responsibility of the student to declare his or her area of interest no later than the beginning of the semester when graduation is expected.

**Electives.** The student must elect courses sufficient in credits to complete the 120 required for graduation. Courses may be taken in any college of the University.

**Course Load.** No student may take more than 19 credits per semester without permission from the adviser and the dean.

**Graduation.** It is the responsibility of the student to submit a graduation worksheet, signed by his or her adviser, to the Dean's Office. Deadlines for submission are as follows:

May Graduation — November 1  
August Graduation — April 1  
December Graduation — August 1

## Bachelor of Arts

The Bachelor of Arts curriculums provide a general cultural background and an opportunity to concentrate in any one of 28 fields of study.

**Curriculum Requirements.** Each candidate for a Bachelor of Arts degree must meet certain minimum curriculum requirements having to do with quantity and quality. These requirements include the completion of at least 120 passed credits averaging, at graduation, C or better. On the University's grading system, this represents a cumulative quality-point average of 2.0 or higher. Of the 120 passed credits, at least 42 must be in upper-level courses, numbered 300 or above.

In addition to meeting the requirements of the Basic Liberal Studies Program, each candidate must complete a concentration and a number of elective courses. The concentration totals 27 to 30 credits.

**B.A. Concentration.** The concentration is the discipline or subject area in which the degree is granted. It may include not only required courses within the concentration department but also courses in related subjects offered by the student or required by the department. The student should declare this concentration before the end of the fourth semester.

The concentration comprises no fewer than 27 nor more than 30 credits. These, however, are exclusive of any credits which are outside the concentration department but may be required by that department as prerequisites. Including such prerequisites,

the concentration may not exceed 36 credits.

The student may earn up to 45 credits in course work offered by the concentration department, counting as electives those credits earned in excess of the concentration requirements. Any credits in excess of 45 earned in the concentration department increase correspondingly the minimum number of credits required for graduation.

*Concentration areas include:* anthropology, art (history and studio), biology, chemistry, classical studies, economics, education, English, French, geography and marine affairs, geology, German, history, Italian, journalism, Latin American studies, linguistics, mathematics, music, philosophy, physics, political science, psychology, Russian, sociology, Spanish, speech, theatre, urban affairs (urban social processes, policy formation, and spatial development).

**Modified Concentration.** In consultation with the adviser, and with the approval of the dean, a student may be permitted to modify the normal requirements of the department in which the student is concentrating. With such approval, the program, consisting of no fewer than 27 nor more than 30 credits, will constitute the student's concentration.

## Bachelor of Science

The Bachelor of Science curriculums are professionally oriented and, in general, meet the accreditation standards of national professional associations.

**Curriculum Requirements.** All candidates for the Bachelor of Science degree must fulfill the requirements of the Basic Liberal Studies Program and complete a major of 30-45<sup>1</sup> credits within a department. In addition, a department may require for its concentration certain courses in other departments, with the stipulation that this will not preclude their application

to the Basic Liberal Studies Program requirements. No more than 130 credits can be required in a program.

Each concentration within the B.S. curriculum has certain more specific requirements, as listed on the following pages.

*Concentration areas include:* botany, chemistry, computer science, dental hygiene, geology, mathematics, medical technology, microbiology, physics, zoology.

## Bachelor of Fine Arts

The curriculums provide the opportunity to discover and develop creative capacities in the fine arts. The emphasis is on richness of program and quality of experience rather than the development of isolated skills. Applicants registering for work toward the Bachelor of Fine Arts degree must receive permission of their concentration department. Students concentrating in theatre specializing in scene design must submit portfolios. Theatre students who wish to specialize in acting must arrange for an audition with the Department of Theatre. Others must arrange for an interview with a departmental representative. Further details and appointments may be obtained through the University Admissions Office.

**Curriculum Requirements.** All candidates for the Bachelor of Fine Arts degree are required to meet the requirements of the Basic Liberal Studies Program.

*Concentration areas include:* art, theatre.

## Bachelor of Music

The Bachelor of Music degree is designed to prepare qualified students for careers in the field of music. Students may select one of eight areas of concentration dependent upon their aims and abilities.

*Concentration areas include:* classical guitar, voice, piano or organ, orchestral instrument, music history and literature, theory and composition, jazz studies, music education.

All areas provide for a good background in academic subjects and each curriculum contains basic courses for the development of sound musicianship. An audition conducted by members of the music department staff is required for permission to register for work toward the Bachelor of Music degree.

Concentration in the music education curriculum includes courses in educational psychology, methods, and a teaching internship which leads to state certification for teachers.

The total number of credits for graduation is 125 (126 for music education majors).

**Curriculum Requirements.** All candidates for the Bachelor of Music degree are required to meet the requirements of the Basic Liberal Studies Program.

Students are encouraged to attend department-sponsored events each semester.

## Associate in Science

The Department of Dental Hygiene offers a two-year program leading to the Associate in Science degree. Students in this curriculum are not required to meet the Basic Liberal Studies Program requirements but must complete 71 credit hours in a prescribed program outlined in the department offerings.

## Anthropology

**Coordinator:** Associate Professor Kuhn (Languages)

The choice of courses in a student's program of concentration and in the area of special interest must have both sufficient range (genre, period, and at least two literatures) and a specific focus. It must be approved by an adviser and the Comparative Literature Advisory Committee consisting of members from the Departments of English and Languages.

Students must complete a minimum of 30 credits in one of the three concentration options:

The Department of Computer Science and Experimental Statistics offers the Bachelor of Science (B.S.) degree in computer science. The Master of Science (M.S.) degree programs in computer science or experimental statistics and the Doctor of Philosophy (Ph.D.) in Applied Mathematical Sciences with specialization in computer science or statistics are described in the *Graduate School Bulletin*.

**Faculty:** Professor Hemmerle, chairperson. Professors Carney, Merenda and L. T. Smith; Associate Professors Bass, Carrano, Hanumara, Heltshe, Lawing and Weiderman; Assistant Professors Lamagna and Tetreault.

The curriculum is designed to provide a broad introduction to computer science fundamentals. Emphasis is on computer software and applications. The required mathematics preparation provides a basis for advanced work. Students will be well prepared for graduate study in computer science or for careers in computer-related areas.

Demand for computer science has far exceeded the department's resources. Therefore, the number of students concentrating in computer science enrolled in the College of Arts and Sciences will be limited to 35 per year. University College students and students in other curriculums will be considered for admission to the College of Arts and Sciences as computer science concentrators each January. Selection will be based primarily upon grade point average.

A registration priority is in effect for all computer science courses. Preference is given to computer science majors, followed by students whose curriculum requires computer science, followed by all others. Students who have preregistered for computer science courses will be given preference, within the above constraints, regardless of their curriculum. Therefore, preregistration is strongly recommended.

Students in this curriculum must complete a minimum of 36 credits in computer science and experimental statistics as follows:

CSC 201 (3), 202 (3), 220 (3), 240 (3), 283 (1), 285 (1), 302 (3), 311 (3), 350 (3), 382 (1), 411 (3), 412 (3), 413 (3), and EST 409 (3).

**ASSOCIATE IN SCIENCE**

This two-year curriculum of 71 credits prepares the student to perform ancillary clinical services which contribute to the maintenance of good oral health, educate both children and adults in oral hygiene, and assist the dentist to allow him more time for the treatment of patients.

The program is designed to allow transfer students from other colleges and curriculums to attain the Associate in Science degree. Two months of experience as a dental assistant is recommended for all students entering the dental hygiene program. At the completion of the first clinical year, the student is placed in a private dental office for one month of field training experience.

## BACHELOR OF ARTS

Students selecting this field of concentration must complete a minimum of 30 credits in geology, including GEL 103 (3), 106 (1) and 104 (3). GEL 105 (ESC 105), normally may not be included.

The B.A. curriculum provides more flexibility than the B.S. program in the choice of courses and offers the possibility of highly individualized programs in consultation with the faculty adviser. The B.A. curriculum can provide an appropriate background for geology-related fields dealing with resources, environmental studies, conservation management, and others. Students intending to pursue graduate studies in the geosciences should consider the B.S. curriculum in geology. The federal government identifies GEL 320, 321, 370, 410, 440, 450, and supporting sciences as a basic background for geologists.

Students interested in earth science teaching should contact the Department of Geology for details of a cooperative program with the Department of Education.

## BACHELOR OF SCIENCE

This curriculum is designed as a basic foundation in the earth sciences. It offers preparation for further work in areas such as sedimentology, coastal geology, petrology, geochemistry, geophysics, paleontology, paleoecology, mineral and energy resources, engineering geology, environmental geology, and oceanography.

An emphasis in marine geology is possible by taking, in addition to marine-oriented geology courses, approved geology-related courses offered by the Graduate School of Oceanography and the Department of Ocean Engineering as science electives. Information about this and other similar options can be obtained from the chairperson of the department.

Students concentrating in geology should note the requirement for field experience. An approved summer field camp for a minimum of 4 credits normally is undertaken following the junior year, and related costs are the responsibility of the student. Minimum background for field camp normally includes GEL 320, 321, 370 and 450. (Field camp is not required under the B.A. curriculum.)

A total of 126 credits is required for graduation. Following is the suggested sequence of courses for the first four semesters. Completion of these courses fulfills the Letters Division requirements and satisfies prerequisites

for upper-division geology courses. Late concentrators, transfer students and others wishing to modify this schedule should consult their geology faculty adviser.

## BACHELOR OF ARTS

Students in this curriculum may tailor a program to suit their individual needs and interests. They should meet with their adviser no later than the end of the first semester of the sophomore year to plan a complete program. This program, and any subsequent changes in it, must be approved by the adviser and the department chairperson. It must contain at least 30 credits in mathematics, and include MTH 141 (3), 142 (3), 215 (3), and 243 (3) as well as two courses at the 400 level.

MTH 107, 108, and 109 are not open to students majoring in mathematics.

## BACHELOR OF SCIENCE

Students in this curriculum may follow the four-year general program in mathematics or select the option in applied mathematics during the junior and senior years.

The general program is designed to include the basic theories and techniques of mathematics. The required courses introduce the student to the principal areas of mathematics, and they provide a foundation for advanced study at the graduate level.

The applied mathematics option is intended for the student who anticipates a career as an applied mathematician or mathematical consultant with an organization such as an industrial or engineering firm or a research laboratory. The student learns the mathematical ideas and techniques most often encountered in such work, and is trained to solve mathematical problems. Although a theoretical foundation is developed, the emphasis is practical.

The following courses, totaling 12 credits, are required for students in both the general program and the option in applied mathematics: MTH 141, 142, 215, 243. These courses normally should be taken in the freshman and sophomore years. MTH 107, 108 and 109 are not open to students majoring in mathematics.

A student selecting the general program must complete, in addition to the courses listed above, 27 credits in mathematics, including MTH 435, 437, 438 and 6 credits selected from MTH 316, 425, and 462.

Furthermore, the student in the general program must complete a minor concentration of 18 or more credits in one of the following four areas: biological sciences (biology, botany, microbiology, zoology); physical sciences (astronomy, chemistry, geology, physics); social sciences (economics, geography, political science, psychology, sociology); computer science. Six credits in computer science may be counted toward the minor concentration in any of the first three areas. The program must include PHY 213, 285, and 214, 286.

Students selecting the applied mathematics option must complete, in addition to the 12 credits listed above, 30 credits as follows: MTH 437, 438, CSC 201, and 202 (12); 9 additional credits<sup>8</sup> selected from MTH 143, 217, 244, 418, 435, 441, 444, 451, 452, 462, 471, 472; and 9 additional credits from CSC 411, 413, ELE 210, EST 409, IDE 432, 433, MCE 162, 263, MGS 365, 366, 375, 445, PHY 213-285, 214-286, 322, 331, 341.

A student who intends to do graduate work in mathematics is advised to also take MTH 316.

A total of 130 credits is required for graduation.

## Medical Technology

This curriculum, leading to the Bachelor of Science (B.S.) degree, prepares men and women for work in hospitals or medical laboratories. During the first three years, the emphasis is on general education and basic courses in biology, chemistry, mathematics, and physics necessary as background in the applied sciences. The courses of the senior year are taught off campus by the staffs of affiliated hospital schools of medical technology. The senior year is a 12-month program of study and starts

<sup>8</sup>To gain experience using mathematics in a variety of applications the student is encouraged to select, in addition to the required nine credits, as many electives from this list as possible.

soon after completion of the third year of the curriculum, in June or early July. It is taken at one of the following hospitals which are about 30 miles from the main campus of the University: Miriam Hospital, Rhode Island Hospital, St. Joseph Hospital, which are in Providence; the Memorial Hospital of Pawtucket; or the Rhode Island Medical Center in Cranston. The clinical program includes didactic and laboratory instruction in the various areas of medical technology and prepares the student for the national certification examinations.

Applicants to this curriculum should have completed 62-65 credits by June of the sophomore year and should have taken all courses listed below for the first two years. Students are selected by the University Committee on Medical Technology and by program officials of the hospital schools. Since the number of students admitted to this professional curriculum is limited, interested students should consult early in their college career with the director so that they will be familiar with the requirements and application procedures. Flexibility in the curriculum permits the student who is not accepted to fulfill requirements for the Bachelor of Science degree in another concentration such as microbiology, zoology, or certain related health sciences.

A total of 130 credits is required for graduation.

## Speech Communication

The Department of Speech Communication offers the Bachelor of Arts (B.A.) degree with curriculums in speech communication studies and preprofessional studies in communicative disorders. The Master of Arts (M.A.) degree programs in communicative disorders, i.e., in speech pathology and audiology, are described in the *Graduate School Bulletin*.

The department programs provide maximum flexibility in planning for a wide variety of academic and occupational goals in speech communication studies and preprofessional studies in communicative disorders. The curriculum is personalized for each student. While the student plays a dominant role in curriculum planning, his or her program is closely supervised by the adviser. Specific curricular, extracurricular and internship programs are planned as integral parts of each student's program. Departmentally approved courses give the student broad variety or specific depth, dependent on the student's needs and goals. Courses outside the department which are related to student communication needs and goals are encouraged and may be counted as concentration credits.

## Urban Affairs

The Urban Affairs Program Coordinating Committee offers three concentrations in the College of Arts and Sciences for the Bachelor of Arts (B.A.) degree: Urban Social Processes in the Urban Environment, Policy Formation in the Urban Environment, and Spatial Development in the Urban Environment. The courses that comprise these concentrations are offered by colleges throughout the University.

The Urban Affairs Program is described on page 12.

Students who select one of these three concentrations must complete five courses chosen from the core for the concentration, three or four courses chosen from the remaining courses, and one or two semesters in the Senior Seminar in Urban Affairs. Each of the concentrations requires a minimum of 30 credits.

Students who wish to major in one of these concentrations should consult the appropriate member of the Urban Affairs Program Coordinating Committee for assistance in the formulation and approval of their concentrations.

<sup>13</sup>Students will individualize the remaining credits in consultation with their adviser.

**Urban Social Processes.** This concentration examines the functions of urban social systems, explores urban social issues which affect the lives of individuals in an urban environment, and investigates individual and systems-change strategies. Students gain an understanding of the systemic forces which act on individuals in urban societies to produce both positive and negative outcomes. Poverty and social class, the welfare system, race, crime, rapid environmental change, all generate social issues which take on particular significance in an urban setting and have a dramatic impact on the lives of urbanites. In addition to a thorough grounding in theory, students are directed toward research and intervention techniques which they may extend, with graduate training, into the social sciences, criminology, social work, community planning, and other urban-oriented fields. Students seeking jobs at the baccalaureate level may work in social agencies (e.g. welfare, youth development, the criminal justice system), the governmental departments which sponsor and monitor these agencies, or specialized educational facilities (e.g. halfway houses, pre-school enrichment programs, alternative high schools).

Students are expected to satisfy the common core requirements. In addition, they must select one of the following courses to satisfy methodological skills: APG 402; EST 408, 409; PSY 300; SOC 301.

Students are also required to select 4 courses from the following: APG 319; ECN 401, 403; HCF 220, 480; HIS 339, 343; HMG 401; MGT 301; PSC 420, 483, 486; PSY 435; SOC 314, 316, 330, 336, 340, 410, 418, 438; SPE 315. Students are encouraged to arrange for an urban affairs internship.

**Policy Formation.** This concentration identifies the decision-making processes within the metropolis, examines the ways in which public policies are formulated and implemented, and considers ideas about the substance as well as the outcome of the policy-formation processes. An understanding of such decision-making processes requires knowledge of the political, administrative, managerial, planning, and economic aspects of urban life. Students completing the concentration

should be prepared for entry-level administrative jobs in government agencies, business firms and community organizations, or for activist careers in politics. They might undertake graduate work in law, public administration, community planning, business, or related disciplines.

Students are expected to satisfy the common core requirements. In addition, they are required to select one course from PSY 300; SOC 301; MGS 201; MTH 451; EST 408, 409; GEG 482; to satisfy the methodological skill requirements. They are also required to select three courses from the following: ECN 342, 401, 402, 403, 464; HIS 323, 324, 339, 340, 341, 343, 363; PSC 460, 466, 483, 495, 498; CPL 410; FIN 341, 396; MGT 321, 422, 423; REN 310; GEG 411, 421, 452, 512; SOC 336, 340, 342, 434, 436. Practicum or internship experience is required in this concentration. It may be obtained through URB 397.

**Spatial Development.** This concentration gives the student an interdisciplinary viewpoint of the spatial structure and environmental character of the city. The curriculum is designed to focus special attention on the arrangement, allocation and interrelationships of human and physical resources. Man's relation to the urban ecosystem is examined in terms of the processes, patterns, networks and activities that produce the spatial and temporal organization of urban communities. Analytical and methodological skills may be acquired from courses in cartography, remote sensing, and statistics. The structure of the concentration should prepare the student to deal effectively with the increasing problems of rapid urban growth and environmental deterioration.

Employment opportunities are available in such activities as urban systems analysis, economic impact studies, cartographic drafting and air photo analysis, industrial location and regional development, and urban environmental problems. Spatial development students should be prepared for work in organizations or agencies that handle questions such as equal allocation of resources, reduction of regional disparities in goods and services, and developing effective alternatives to problems in housing, poverty, pollution, and other human

concerns. These organizations can be in either the private or the public sector.

Students are expected to satisfy the common core requirements. In addition, they are required to select one course from EST 408, SOC 301, GEG 482 and a course from GEG 421, PLS 343 and ESC 301 to satisfy the methodological skill requirements. They are also required to select three courses from the following: HIS 399; CPL 410, 434, 520; ZOO 262, HMG 340; FIN 341; PSC 460, 466; SOC 434; ECN 402; GEG 512; INS 313; BSL 333; CVE 315; EGR 204. Students are encouraged to acquire an internship experience.

## Women's Studies

This new interdepartmental program in the College of Arts and Sciences leads to a Bachelor of Arts (B.A.) degree in Women's Studies. The aim of the program is to provide an option for students who are interested in the interdisciplinary study of the culture and experiences of women.

The Women's Studies program requires 30 credits for a concentration. Four required courses are: WMS 200; a statistics (e.g., EST 220, PSY 300) or methodology course (e.g., ENG 310, SOC 301, SPE 304) approved by the Advisory Committee; WMS 300; and WMS 400. Six courses to complete the concentration may be selected from the following: ART 280 (Topic: Women in Art), ENG 360A, 360B, 360C, 385, HCF 330, 430, 432, 505, 559, HIS 118, 145, 347, HMG 320, NUR 150, PSY 480, SOC 312, 342, 513, SPE 310 (Topic: Rhetoric of the Women's Movement), and SPE 420 (Topic: Rhetoric of Early Women Suffragists). In addition to this list, there are special courses offered by various departments each year which may also be selected with prior approval by the Advisory Committee.

The Women's Studies Advisory Committee also strongly recommends that concentrators take an additional 18 credits in a specialized area as an "area of interest."

# College of Business Administration

Richard R. Weeks, *Dean*  
John R. Wish, *Associate Dean*  
Hilda A. Allred, *Assistant Dean*  
Everett T. Harris, *Assistant Dean for  
Administration*

The 16 curriculums in the College of Business Administration allow the student to develop competence in a special field of interest and prepare him or her to meet the changing complexities of life and leadership in the business community. Curriculums are offered in accounting with emphasis possible on governmental, private, and public accounting; business education with options in distributive education, social/business-secretarial, training director, and administrative management; finance; general business administration; insurance; management; management information systems; management science; marketing; marketing with a textiles option; production and operations management; real estate; and urban business.

Basic courses required of all undergraduates at the University introduce the student to the humanities, social sciences, physical and biological sciences, and the arts. The business curriculums develop the student's professional capabilities through a broad group of business courses with specialization in one area of study. Business programs provide a strong foundation in accounting, computer science, marketing, organizational management and industrial relations, production and operations management, and statistics. The college emphasizes the behavioral studies and computer technology to meet the needs of the business community and society as a whole. Emphasis is placed upon

the total business environment as a part of the national and world economic structure. Theory, analysis, and decision-making are stressed in all areas of learning.

The College of Business Administration is a professional school and has divided its courses into lower and upper divisions. The lower division courses constitute those taught in the freshman and sophomore years; the upper division — those taught in the junior and senior years. Courses taken by transfer students at the lower division level may be applied to satisfying upper division requirements only after successful completion of a validating examination. All 500- and 600-level courses offered by departments in the College of Business Administration are open to matriculated graduate students only.

A student enrolled in this college must complete the curriculum in one of the major areas of concentration and must obtain a cumulative quality point average of 2.00 or better for all required courses in the major area of concentration. Students wishing permission to substitute required courses or waive other requirements may petition the college's Scholastic Standing Committee. Petition forms are available in the dean's office.

Due to limited staff and facilities, transfers from University College to the undergraduate degree programs in business administration must be limited. Although cumulative averages

are not the sole criterion for admission, students with overall quality point averages of less than 3.0 are advised that there is little chance for admission to these programs. Students who have not satisfied entrance requirements may petition the Scholastic Standing Committee of the college for a waiver of those requirements during their fourth or succeeding semesters. Students in the University College business programs who have not met entrance requirements to the college are permitted to enroll only in 100- and 200-level business courses and in non-business courses.

To ensure that students in business majors have access to required courses, upper level courses will be open only to juniors, seniors, and graduate students. A strict registration priority will be followed. Highest priority will be given to seniors in the College of Business Administration and in the major, followed by graduate students, juniors in the college and the major, seniors in the college but not in the major, juniors in the college but not in the major, seniors in other colleges, and juniors in other colleges. Students following an approved area of interest will be assigned as though they were in the college but not in the major.

## Curriculum Requirements

The following two years are common to all curriculums except business

education, office administration, and marketing textiles option.

**The Freshman Year Program** is 15 credits in each semester. The sequence MGS 101-102 is begun in the first semester and finished in the second. A speech elective from Group C is taken in either of the two semesters with the balance of credits in general education and liberal electives.

**The Sophomore Year Program** is 15 credits in each semester. The ACC 201-202, ECN 125-126, and MGS 201-202 sequences are begun in the first semester and completed in the second. BED 227 and MGS 207 are taken in alternate semesters. The balance of credits is made up of general education and liberal electives.

**General Education Requirements.** Students are required to select and pass 39 credits of coursework from the general education requirements as listed on page 9. Specific requirements of the College of Business Administration in each group are listed below:

*Groups A, F, L, and N.* Any course for which prerequisites have been met.

*Group M.* MGS 101 in the freshman year.

*Group S.* ECN 125, 126 in the sophomore year.

*Group C.* Speech elective from Group C in the freshman year; BED 227 (Group Cw) in the sophomore year.

**Electives.** Professional electives are upper-level courses offered by departments in the College of Business Administration.

Liberal electives are courses offered by departments outside the College of Business Administration.

Free electives may be either professional or liberal electives.

**Area of Interest — Optional.** After choosing a major field, students may elect to declare an area of interest which will appear on their transcripts as a category separate from their major. Credit may be drawn from any combination of concentration, distribution, electives, and course-level categories. An area of interest may be defined as (1) the completion of 18 or

more credits offered within a department and approved by the department chairperson or (2) the completion of 18 or more credits or related studies offered by more than one department and approved by a member of the University faculty, competent in the area of interest, and the Scholastic Standing Committee of the College of Business Administration. Students must declare their area of interest no later than the beginning of the semester they expect to graduate.

## Accounting

The Department of Accounting offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) degree, which provides the education recommended by the American Institute of Certified Public Accountants for the practice of public accounting, and the Master of Business Administration (M.B.A.) degree with an opportunity for specialization in accounting are described in the *Graduate School Bulletin*.

*Faculty:* Professor Vangermeersch, chairperson. Professor Martin; Associate Professors Matoney, Schwarzbach, Swanson and P.S. Wood; Assistant Professors Cairns, Hamilton, Looney and St. Pierre; Special Instructor Fradin.

The increased scope of governmental and business activities has greatly extended the field of accounting and has created an unprecedented demand for accountants both in government and in industry. This curriculum has been designed to meet that demand.

In addition to providing a general cultural and business background, the curriculum offers specialized training in the fields of general accounting, cost accounting, and public accounting. It offers specific, basic training to students who wish to become general accountants, industrial accountants, cost analysts, auditors, credit analysts, controllers, income tax consultants, teachers of specialized business subjects, certified public accountants, government cost inspectors, government auditors.

The broad scope of the courses offered makes it possible for a student who is interested in any of the fields of

accounting to obtain fundamental training in the field of his or her choice, whether this training is to be used as an aid to living or as a basis for graduate study.

## **Insurance**

The Department of Finance and Insurance offers a curriculum in insurance leading to the Bachelor of Science (B.S.) degree. The Master of Business Administration (M.B.A.) degree with an opportunity for specialization in insurance is described in the *Graduate School Bulletin*.

Insurance is a basic industry which functions throughout the economy to indemnify loss and reduce risk. In performing these functions, insurance companies, through their home and branch offices, their agencies and bureaus, currently employ about a million persons in a great variety of jobs (selling, administrative, technical, research, etc.).

For success in this industry, the professional concept with its emphasis on expert knowledge has become increasingly important, and students in this

curriculum are prepared for and encouraged to work toward the professional designations conferred by the American College of Life Underwriters (C.L.U.) and the American Institute of Property and Liability Underwriters (C.P.C.U.).

The curriculum offers comprehensive preparation for diversified career opportunities in insurance, including satisfaction of state requirements for agents' and brokers' licenses in fire and marine, casualty and surety, and life and accident-sickness fields. It is approved by state insurance departments in Rhode Island and New York.

The Department of Management Science offers a curriculum in production and operations management leading to the Bachelor of Science (B.S.) degree. The Master of Business Administration (M.B.A.) degree with an opportunity for specialization in production and operations management is described in the *Graduate School Bulletin*.

Issues, concepts, and techniques encountered in efficiently managing the modern production function in industry and business are the main concerns of this curriculum. The modern production function is here defined in a wider sense, to include all kinds of operations which employ men and machines to produce visible goods as well as to render intangible services. A basic understanding of the management task of design and evaluation of the possible alternative operations and processes is emphasized. Practice and implications of computer-based systems and operations in management are also investigated.

The operations management major prepares students to become certified production and inventory controllers. Certification examinations are administered by the national Educational Testing Service (ETS) and prepared by practitioners in the American Production and Inventory Control Society. Coursework in the major goes well beyond that necessary for the examinations and should put the students at the forefront of the field.

Among the topics covered in the major are: forecasting, capacity planning, inventory planning, material re-

quirements planning, and operations scheduling and control.

# College of Engineering

James W. Dally, Dean  
Robert H. Goff, Associate Dean

The College of Engineering offers undergraduate curriculums in biomedical electronics, chemical, civil, computer electronics, electrical, industrial, mechanical engineering, chemical and ocean engineering, civil and ocean engineering, mechanical and ocean engineering, and urban engineering. Because the same fundamental concepts underlie all branches of engineering, the freshman year courses are quite similar for all curriculums, and the choice of a specific branch of engineering may be delayed until the beginning of either the second term, or the second year of study. Students electing one of the curriculums that include ocean engineering follow the curriculums for chemical, civil, or mechanical engineering for two or three years and enroll in many ocean engineering courses in the junior and senior year.

All of the engineering curriculums are based on an intense study of mathematics and the basic sciences, and of the engineering sciences common to all branches of the profession. On this base is built the in-depth study of the important principles and concepts of each separate discipline. These principles are applied to the understanding and solution of problems of current interest and importance in the field. Each curriculum is designed to provide the knowledge and ability necessary for practice as a professional engineer, or for successful graduate study, which may include

law, business administration or medicine as well as the normal engineering and science disciplines.

The goal of the college is to stimulate the students to become creative, responsible engineers, aware of the social implications of their work, and flexible enough to adjust to the rapid changes taking place in all branches of engineering. Engineers from all fields are heavily involved in the solution of technological and socio-technological problems. The needs of industry are for balanced teams of both men and women from the different engineering areas.

Engineering students, in common with all students in the University, must meet the University's general education requirements listed on page 9 of this catalog. In these courses students are exposed to and challenged by concepts from the humanities and social sciences to insure that the social relevance of their engineering activities will never be forgotten. In selecting courses to satisfy these requirements, students should consult with their advisers to be certain that they have chosen courses which satisfy both the University requirements and the requirements of the Accreditation Board for Engineering and Technology. The requirements in mathematics and natural sciences are satisfied by required courses in the engineering curriculums. Three credits must be taken in the Foreign Language and Culture

group, and six credits each in English Communications, Fine Arts & Literature, Social Sciences, and Letters. In two of the latter three groups two-course sequences must be taken. The second course of the two-course sequence may not be at the 100 level, unless it has the first course as a prerequisite or is an obvious continuation of the first.

Entering students who have chosen a specific curriculum should follow the particular program listed below. Those who have decided to major in engineering, but have not selected a specific program, should select courses in general chemistry, general education electives, MTH 141, 142; EGR 102; MCE 162 and/or PHY 213 and 285.

Students who are undecided about engineering, but who wish to keep it open as an option, should take note that MTH 141 and 142, MCE 162 or PHY 213 and 285, and a course in chemistry, are required for graduation from the College of Engineering, and are prerequisites for many engineering courses. They normally must be taken at an early stage, preferably before transferring from University College to the College of Engineering. Students who have not taken them before entering the College of Engineering must confer with an engineering adviser to work out a program for completing all degree requirements. In such cases completion of graduation requirements may take somewhat more than the normal time.

To meet graduation requirements students enrolled in the College of Engineering must satisfactorily complete all courses of the curriculum in which they are registered and must obtain a grade point average of 2.0 or better in all required science, mathematics, and engineering courses (including professional electives).

**Freshman Year.** All engineering curriculums have similar programs during the freshman year. This provides some degree of flexibility to those students who are uncertain about their choice of curriculum. Except for those students enrolled in the Chemical and the Chemical and Ocean curriculums, all engineering students take the following 17-credit program in the first semester.

- 3 CHM 101 Gen. Chemistry I
- 1 CHM 102 Lab. for CHM 101
- 1 EGR 102 Basic Graphics

## Biomedical Electronics Engineering

The Bachelor of Science (B.S.) degree in biomedical electronics engineering is offered by the Department of Electrical Engineering. Specialization in biomedical engineering is also available within the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs in electrical engineering, described in the *Graduate School Bulletin*.

*Faculty:* Assistant Professor Ohley, coordinator. Adjunct Professor Karlson; Adjunct Assistant Professors Cooper, Most, and Williams; electrical engineering faculty.

Biomedical engineers design medical instruments such as electrocardiographs, electroencephalographs,

blood analyzers and X-ray machines used for diagnosis of disease, equipment such as radiotherapy machines, pacemakers and lasers for surgery and develop artificial organs. They design computer systems to help physicians monitor critically ill patients, to correlate a multitude of disease symptoms in order to diagnose a disease, and to determine the best course of treatment.

Biomedical engineers are employed in (1) the medical instrument industry, where they design, manufacture, sell and service medical equipment; (2) hospitals, which employ engineers in increasing numbers to select, evaluate and maintain complex medical equipment and to train the hospital staff in their use, and (3) medical and biological research centers, which use the specialized training of the biomedical engineer to apply engineering techniques in research projects.

The biomedical electronics engineering program combines study in the biological sciences with those areas of engineering which are particularly important for the application of modern technology to medicine. With a few minor elective changes the program also satisfies the entrance requirements of most medical schools, but students who plan to go on to medical school should consult the premedical adviser and the coordinator of the biomedical electronics engineering program.

For transfer from the University College to the College of Engineering in the Biomedical Electronics Engineering program students must have completed *all science and mathematics courses required during the first two semesters* (see below) with grade average of C or better.

The concentration requires 138 credits.

## Chemical Engineering

The Department of Chemical Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree in chemical engineering and in cooperation with the Department of Ocean Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree in chemical and ocean engineering. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Bulletin*.

*Faculty:* Professor Estrin, *chairperson*. Professors Barnett, Shilling and Votta; Associate Professors Knickle, Rockett and Rose; Assistant Professors Brown, Bryers and Gray; Adjunct Associate Professor DiMeglio; Adjunct Assistant Professor Sahagian.

The chemical engineer is concerned with the application and control of processes leading to changes in composition. These may be chemical and physical processes, and control refers to achieving the desired goal at reasonable cost. The processes are most frequently associated with the production of useful products (chemicals, fuels, metals, foods, pharmaceuticals, paper, plastics, and the like), but also include such seemingly unrelated matters as removal of toxic components from the blood by an artificial kidney, and modeling the flow of exhaust gases from automobiles on the highway (turbulent diffusion and heat transfer coupled with chemical change). The chemical engineer's domain includes more efficient production and use of energy, processing

of wastes, and protection of the environment.

Chemical engineers have a strong foundation in chemistry, physics, mathematics and basic engineering. Chemical engineering courses include the use of digital computers, thermodynamics, transport phenomena, mass transfer operations, metallurgy, materials engineering, process dynamics and control, kinetics, and plant design. The student has the opportunity to operate small-scale equipment to determine efficiencies and operating characteristics, and to visit chemical plants in the area. Intensive work in the solution of complex problems is given in which economics and optimization of engineering design are emphasized.

A chemical engineer with a background in both chemistry and engineering can apply his knowledge of research and development, design, production, and manufacturing not only to the areas listed earlier, but to many others such as textiles, dyes, petroleum, ceramics, paint, and rubber, as well as to biomedical, biochemical, ocean, space, nuclear energy, and environmental problems and processes.

The senior year curriculum for students concentrating in chemical and ocean engineering is listed under Ocean Engineering, page 61.

Programs can be designed for those interested in special areas such as material sciences, biochemical engineering, and pollution control, in general chemical engineering. Programs for those interested in entering dental and medical schools, or schools of business administration, can also be constructed, sometimes requiring a few courses beyond the 130 regular credits.

The concentration requires 130 credits.

**Civil and Environmental Engineering**

The Department of Civil and Environmental Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree in civil and environmental engineering and, in cooperation with the Department of Ocean Engineering, a curriculum leading to the Bachelor of Science (B.S.) degree in Civil and Ocean Engineering. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees, also offered by the department, are described in the *Graduate School Bulletin*.

*Faculty:* Professor Kelly, chairman. Professors Nacci, Poon and Silva; Associate Professors Fang, Marcus, McEwen, Sussman and Urish; Assistant Professors Al-Kazily and Wright.

Civil engineers are responsible for researching, developing, planning, designing, constructing, and managing many of the complex systems and facilities which are essential to our modern civilization. These include: water supply and pollution control systems; all types of transportation systems from pipelines to city streets; structural systems from residential buildings to city skyscrapers, power plants, and offshore platforms. Civil and environmental engineers play important roles in planning and administration with government agencies at all levels, especially those dealing with public works, transportation, en-

vironmental control, water supply, and energy.

The curriculum provides the students with sufficient background to pursue graduate study or to enter directly into professional practice in industry or government after graduation. The first two years are devoted largely to courses in mathematics, chemistry, physics, and engineering science which are common to all engineering curriculums. In their last two years students have a large degree of flexibility in developing their own programs to meet their own professional goals through the selection of professional electives in environmental engineering, soil mechanics and foundations, structural engineering, and transportation and construction.

No later than the first midsemester of the junior year each student is required to file a proposed plan of study which has been approved by the faculty adviser and the department. Professional electives and general education electives must be selected in consultation with the adviser to satisfy the Accreditation Board for Engineering and Technology accreditation requirements.

The junior and senior year curriculum for students concentrating in civil and ocean engineering is listed under Ocean Engineering, page 61.

## Computer Electronics Engineering

The Bachelor of Science (B.S.) degree in computer electronics engineering is offered by the Department of Electrical Engineering. Specialization in computer engineering is also available within the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs in electrical engineering, described in the *Graduate School Bulletin*.

*Faculty:* Professors Jackson and Tufts, coordinators. Electrical engineering faculty.

Computers and computer-like devices have truly transformed society, particularly in the technologically advanced countries. Computers are everywhere, and all indications are that computers and computer components (digital devices) will be even more pervasive five or ten years from now. Computer engineering is concerned with the design and efficient use of large or small computers and the development of other machines and instruments which contain computers, or parts of computers, as essential building blocks, from the hand-held calculator to the large multi-terminal computer, and the programmable assembly machine. A programmable machine is one which will change its operation in response to a program or command.

Computer engineers may be employed in the design or planning, service, operation, and sale of computer systems as well as the design, service, and sale of complex machinery, in-

struments, and systems — such as an automated subway — which require computers as essential parts. The employers may be industrial organizations, transportation companies, federal laboratories, or local government.

The computer engineer must understand the fundamentals of computer logic and programming as well as the fundamentals of electronics and general engineering — mathematics, mechanics, electricity, magnetism, and heat transfer. Engineers use all of this knowledge to create new devices and systems which satisfy perceived human needs.

For transfer from the University College to the College of Engineering in the Computer Engineering program students must have completed *all science and mathematics courses required during the first two semesters* (see below) with a grade average of C or better.

The concentration requires 129 credits.

## Electrical Engineering

The Department of Electrical Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Bulletin*.

*Faculty:* Professor Jackson, *chairperson*. Professors Birk, Haas, Kelley, Lengyel, Lindgren, Mardix, Mitra, Polk, Poularikas, Sadasiv, Spence and Tufts; Associate Professors Daly and Prince; Assistant Professors Kay and Ohley; Adjunct Professors Biberman, Karlson, Hall and D. Middleton; Adjunct Associate Professor Banerjee; Adjunct Assistant Professors Cooper, McColough, Most and Williams.

Electrical engineers work in all areas in which electrical phenomena are involved. These areas include communication systems, computers, control systems, quantum electronics and electro-optics, electro-acoustics, energy conversion, antennas and radio propagation, design of electronic devices, and bioengineering.

Since electrical instrumentation is at the heart of modern science and technology, electrical engineers are not only employed in the computer, electronics, communications, and power industries, but may also be found in such diverse enterprises as transportation, the chemical industry, large hospitals, medical schools, and government laboratories. By carefully selecting elective courses, the student should be able to enter any of these fields after graduation or be prepared for graduate study in engineering or physics.

The curriculum emphasizes the scientific basis of electrical engineering and the application of mathematical analysis to engineering problems. Work is required in network and systems theory, atomic physics and the behavior of the solid state, electromagnetic theory, and electronics. Creative use of scientific principles in problems of engineering design is stressed particularly in the senior year. Digital computer techniques are a part of many electrical engineering courses.

Extensive laboratory work with electrical and optical devices serves to bridge the gap between mathematical analysis and the real world of "hardware." Separate undergraduate laboratories are available for electrical measurements, electronics, pulse and digital circuits, microprocessors, computer graphics, microwaves and quantum electronics, optics, materials, energy conversion, and systems. Selected students participate in ad-

vanced projects including microelectronics, investigation of optical properties of solids, optical and radio propagation, acoustics, computers, robotics, and biological instrumentation.

Electrical engineering students should note that the four-year electrical engineering curriculum allows for three credits of completely free electives which do not have to satisfy any of the general education requirements. Although the natural science requirement will be satisfied automatically by courses specified in the electrical engineering curriculum, it is recommended that students take some additional courses in mathematics or physics for which prerequisites have been satisfied.

For transfer from the University College to the College of Engineering in the Electrical Engineering program, students must have completed *all science and mathematics courses required during the first two semesters* (see below) with a grade average of C or better.

In two of the three specific groups — Fine Arts and Literature, Social Sciences, and Letters — both courses chosen must be in the same area of concentration and must be selected from a list provided by the Electrical Engineering Department. Cooperative work in industry carrying academic credit (ELE 495, 496) is available for a few particularly talented and motivated students who are willing to devote more than average effort to their studies and who are capable of much better than average performance.

The Department of Electrical Engineering offers a five-year B.S.-M.S. cooperative program. Academic course work is alternated between periods of engineering practice at companies or government laboratories selected by the department.

A total of 14 months of industrial experience is obtained in three segments: (1) 3 months, summer between sophomore and junior year; (2) 3 months, summer between junior and senior year: ELE 495 (3 credits); (3) 8 months, second semester of senior year plus the following summer: ELE 496 (6 credits).

The three assignments are usually, but not necessarily, taken at the same company. The industrial experience grows in technical complexity as the student progresses through the program, with the first industrial experience having a small technical content and the eight-month period at the end

of the senior year being a junior engineering position. The student earns credit toward his or her degree for the work done and experience gained during the second and third assignments.

Students interested in this program should contact Dr. J. C. Daly, the department's cooperative work coordinator.

**Industrial Engineering**

The Department of Industrial Engineering offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) degree also offered by the department is described in the *Graduate School Bulletin*.

*Faculty:* Professor C. F. James, chairperson. Professor Nichols; Associate Professors Lawing and Shao; Assistant Professor Odrey and Garber.

The industrial engineering curriculum is designed to provide significant strength in mathematics, basic science, and engineering science, plus a carefully coordinated set of courses of particular importance to the professional industrial engineer. Mathematical modeling of physical systems, optimization, probability and random variables, production systems, manufacturing engineering, computer aided manufacturing, and metrology are areas that receive considerable attention. The professional portion of the curriculum is augmented with computer science and professional electives. Computer applications are required throughout the curriculum.

Upon completion, the student will be amply prepared to pursue a career in the many engineering opportunities in industry, transportation, government, hospitals, and service organizations. The curriculum also provides an excellent background for further formal study in industrial engineering or related fields of engineering and physical science.

By using the professional and free electives for certain courses, the student can complete a Bachelor of Science degree in industrial engineering plus a Master of Business Administration degree within five years. See the department advisers for further details.

The concentration requires 128-132 credits.

## Mechanical Engineering and Applied Mechanics

The Department of Mechanical Engineering and Applied Mechanics offers a curriculum leading to the Bachelor of Science (B.S.) degree in mechanical engineering and, in cooperation with the Department of Ocean Engineering, offers a curriculum leading to the Bachelor of Science (B.S.) degree in mechanical and ocean engineering. The Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Bulletin*.

*Faculty:* Professor Kim, *chairperson*. Professors G. Brown, Dally, DeLuise, Dowdell, Ferrante, Hagist, Hatch, Nash, Schenck, Test, M. Wilson and F. White; Associate Professors Datseris, Ghonem, Goff, Lessmann, Palm and Sadd; Assistant Professors Halliday, Henderson and Shukla; Instructor Das; Adjunct Assistant Professors Dunlap, Messier and Patton.

This curriculum provides a thorough and well-rounded foundation in basic science, mathematics, engineering science, and general education to prepare the graduate to enter a professional engineering career. The curriculum is also excellent preparation for graduate school. Mechanical engineers are employed in large numbers in every industry where they frequently assume positions of leadership. The program at the University of Rhode Island is unusually strong in providing a background in systems engineering, design, fluids, and the thermal sciences including energy and energy transfer. Computer applications are stressed throughout the curriculum. All undergraduates are invited to join the Student Section of the American Society of Mechanical Engineers which sponsors industrial plant visits, special lectures, and other activities.

The work in the first two years consists of basic courses in science (mathematics, physics, chemistry), applied science (mechanics, electricity and magnetism, computer science, theory of mechanisms), and general education (humanities, social sciences, communication).

The junior year concentrates on fundamental courses in mechanical engineering (thermodynamics, fluid mechanics, systems engineering, engineering analysis), materials science, engineering economy, and electronic devices. Further general education studies are also covered.

The senior year in mechanical engineering includes machine design, heat transfer, manufacturing processes, and a wide variety of professional electives such as mechanical control systems, advanced fluid mechanics, advanced mechanics of materials, dynamics of machines, internal combustion engines, alternate energy systems including solar and wind energy, power plants, lubrication and bearings, thermal environmental engineering, and vibrations.

Throughout the program the student takes an integrated series of laboratory courses which introduce laboratory techniques and provide practical experience with the physical and engineering phenomena being covered in concurrent courses. Digital computer techniques are included. The Academic Computer Center's IteI AS/5

Digital Computer is used. Students also use the department's microcomputer and computer graphics facilities.

To receive the Bachelor of Science degree in mechanical engineering, the student must satisfactorily complete all the courses in the following curriculum, although the sequence may be changed. The curriculum shown below is for the class of 1985 and subsequent classes. Students in the classes of 1982-1984 should obtain a check sheet from their advisers.

The concentration for the classes of 1985 and subsequent classes requires 133 credits.

Those students desiring an undergraduate specialization in ocean engineering may choose the program in mechanical and ocean engineering. Students enrolled in mechanical and ocean engineering must follow the program of study of mechanical engineering during the freshman and sophomore years. The junior and senior years' curriculum for this major is listed under Ocean Engineering.

This curriculum totals 133 credits.

## Urban Affairs

The curriculum in urban engineering is part of the interdisciplinary Urban Affairs Program (see page 12). It is designed to prepare students for systems-oriented activities in the analysis and solution of urban problems. Beginning with core work in mathematics, physics, chemistry and zoology, the curriculum includes computer science, ecology systems engineering, and operations research, as well as work in the social sciences and humanities which provide a general understanding of contemporary urban society. The curriculum includes a summer internship at the end of the junior year and a senior seminar which brings together students in urban affairs concentrations from all parts of the University.

Students who wish to major in this curriculum should consult the appropriate member of the urban Affairs Program Coordinating Committee for assistance in the formulation and approval of their curriculums.

M. Thelma Kenyon, *Assistant Dean for Administration*

The College of Human Science and Services is a people-oriented college that was designed to focus on the human and non-human resources needed to help individuals and groups solve human problems encountered in contemporary society. Programs in the college provide training for professionals to assess human problems and to develop the helping skills necessary for the effective delivery of human services to individuals and groups in need. These programs include both formal and informal experiences with people in a wide variety of public service settings and enable students to develop the competencies needed in the emerging field of human services.

The college offers undergraduate programs in human development and family studies; home economics; home economics education; textiles, clothing and related art; textile marketing; physical education, health, and recreation; and elementary and secondary education. It also offers interdisciplinary programs in general home economics, gerontology, urban affairs, consumer affairs and special populations. Students are encouraged to maintain close contact with their advisers in order to be informed of new curriculums and course options as they develop.

The degrees currently offered by the college include: (1) a Bachelor of Science degree with concentration in physical education; (2) a Bachelor of Science degree with a concentration in

textile marketing; and (3) a Bachelor of Science degree in home economics with concentrations in human development and family studies; general home economics; home economics education; home economics in the urban environment; and textiles, clothing, and related art; and (4) a Bachelor of Arts degree in elementary and secondary education.

The college is currently composed of four departments and a Division of Interdisciplinary Studies.

The Institute of Human Science and Services, the research and service branch of the college, promotes these activities in human service areas across all departments of the college. The institute carries on research in education and educational testing, lifelong learning, human transition, child development, special populations, gerontology, and exercise physiology. Faculty who are involved in the research of the institute also teach within the various departments of the college.

The college sponsors the URI Clearinghouse for Volunteers, a service which matches prospective volunteers with positions in Rhode Island's human science and service agencies, giving students opportunities to explore career options and provide needed service.

## General Education Requirements

All students pursuing a bachelor's degree in the College of Human Science and Services (except those enrolled in the B.A. degree program in elementary and secondary education<sup>1</sup>) are required to develop a 39-credit program in general education within the framework listed below. For a complete description of the general education requirements see page 9.

Individual programs may require specific courses for their area.

*English Communication* (6 credits) A minimum of 3 credits in written communication from courses in Group Cw; a minimum of 3 credits in oral communication from courses in Group C approved for general education.

*Fine Arts and Literature* (6 credits)

*Foreign Language and Culture* (6 credits)

*Letters* (6 credits)

*Mathematics* (3 credits)

*Natural Sciences* (6 credits)

*Social Sciences* (6 credits) A minimum of 3 credits from psychology, sociology, or anthropology courses approved for general education.

Total: 39 credits.

**Division of Interdisciplinary Studies.** This division provides an environment in which faculty and students may bring together interdisciplinary programs and courses of study in human

science and services. The division functions to promote and encourage the creation, implementation, and evaluation of interdisciplinary courses and programs of study taught by faculty from two or more departments within the University. In addition, the division assumes responsibility for the development, review, and implementation of programs of study which draw significantly on two or more human science and services departments. The division maintains administrative responsibility for the following programs: General Home Economics (see page 65); Home Economics in the Urban Environment (see page 67); Consumer Affairs (below); Gerontology (see page 11); and Special Populations (see page 11).

**Area of Interest Option: Interdisciplinary Non-Degree Programs.** The college currently offers an area of interest option for all students enrolled in the college. Under this option students may declare an area of interest which will appear on their transcripts as a category separate from their major. Credits may be drawn from any cohesive combination of courses. An area of interest may be defined as (1) the completion of 18 or more credits offered within a department and approved by the department chairperson, or (2) the completion of 18 or more credits of related studies offered by more than one department and approved by a member of the faculty competent in the area of interest and the dean of the college. It is the responsibility of the student to declare and obtain approval for an area of interest no later than the end of the add period at the start of the senior year.

## Consumer Affairs

This curriculum leads to the Bachelor of Science (B.S.) degree in consumer affairs. This interdisciplinary program within the Division of Interdisciplinary Studies provides a general background for students who wish to develop effective strategies for dealing with complex social and economic systems relating to consumer concerns. Coursework in consumer affairs is combined with selected courses in business, economics, political science

and related areas. Field experience and internships are an integral part of the program.

Graduates with this degree may choose careers in consumer affairs in business, social service agencies, local or state government consumer protection agencies, Cooperative Extension Service, and Consumer Education.

Students are required to take CNS 220, 320, 420, MKT 334, BSL 333, and CNS 470 or MKT 491. An additional 15 credits must be selected from a specified list of consumer related courses.

In addition, students are required to take 12 credits in a professional concentration. A total of 128 credits is required for graduation.

## Education

The curriculum in elementary and secondary teacher education leads to the Bachelor of Arts (B.A.) degree. The Master of Arts (M.A.) degree programs in education are described in the *Graduate School Bulletin*.

The curriculums offer a balanced program of academic preparation and professional training. The required professional courses contribute directly both to teaching skills and to the teacher's role in society.

The department also offers sufficient courses to allow a student to complete an area of interest. Students should consult the department chairperson or an education adviser in University College.

The following courses are required in the professional sequence: EDC 102 or 103, 312 or 313, 371 or 372, 484, and 485; PSY 113 and 232.

In addition, secondary education students will take EDC 430; elementary education students will take EDC 427 and 428 prior to student teaching and EDC 424 after student teaching. EDC (MUS) 329 is also strongly advised for elementary students.

<sup>1</sup>Students enrolled in the elementary and secondary education programs leading to the B.A. degree should follow the general education requirements for the College of Arts and Sciences (see page 30).

Students may apply to the department from University College upon completion of University College requirements and should consult with the education adviser as early as possible for further information, since openings in the programs are limited.

All students in the department will plan, in cooperation with an adviser, a second concentration of 27-30 credits. This may or may not be declared as a "double concentration." The second concentration of secondary education students must be in the area for which a teaching certificate is sought.

After admission to the curriculum, all students must maintain an average of at least 2.20, and attain a grade of at least C in EDC 430 or 427 and 428 to be eligible for student teaching. Failure to meet these two conditions will lead to automatic dismissal from the program.

A total of 120 credits is required for graduation.

## General Home Economics

The curriculum in general home economics leads to the Bachelor of Science (B.S.) degree in home economics. Interdisciplinary in nature, the program provides for academic work in all areas of home economics combined with a professional area of interest selected by the student. Professional areas of interest prepare students for fields such as community agency work, home economics in business, journalism, and home economics in the urban environment.

Students are required to take five to six credits from FSN 150, 201, 207, or 237; six credits from HCF 150, 200, or 201; HCF 330, 357; CNS 210; three credits from CNS 220, or 320; CNS 340; HSS 320; HEC 400; TXC 103, 224; three credits from TXC 216, 327, 340, or 440. Students are required to take additional courses that will give a total of 15 credits in one area of home economics (FSN, HCF, CNS or TXC) with at least 9 credits at the 300 or 400 level.

In addition, students are required to take 18 credits in a professional area of interest, of which at least 9 credits are to be taken in a single area (adviser approval required); and field experience for at least 3 credits (adviser approval required).

A total of 128 credits is required for graduation.

## Home Economics Education

The curriculum in home economics education leads to a Bachelor of Science (B.S.) degree in home economics. The Master of Science (M.S.) degree is also offered by the department and is described in the *Graduate School Bulletin*.

The curriculum provides the following two options:

**Option I: Teacher Certification.** This program meets the state of Rhode Island requirements for certification (K-12) and also meets the Interstate Certification Compact which allows certification reciprocity with 31 states. The student teaching experience in the public schools (as well as additional field experiences) is included in the program during the senior year.

*Note:* Eligibility for student teaching will require a student to maintain a 2.5 quality point average in home economics courses and attain at least a C grade in HED 337 Teaching Effectiveness. Failure to meet these two conditions will lead to automatic dismissal from the certification option in the Home Economics Education Teacher Program.

**Option II: Non-Teacher Certification.** This program prepares individuals to teach and direct home economics educational activities in settings such as business, community agencies, adult programs, and home economics cooperative extension. An eight-credit eight-week intern experience is included in the program during the senior year.

Students are required to select and pass one course in each of the following home economics core areas: HCF 150, 200, or 330; FSN 201, 207, or 237; CNS 210, 220, 320, or 340; TXC 103 or 224. If not taken to complete the core requirements, students must also complete HCF 200, 330 and one HCF elective; EDC 102 or 403, or 407, and 312; EDC 484 or HED 483; HED 334, 337, EDC/HED elective; FSN 201, 207, FSN elective; CNS 320, 340, CNS elective; TXC 103, 216, a clothing construction course.

A total of 128 credits is required for graduation.

## Human Development and Family Studies

The curriculum in human development and family studies leads to a Bachelor of Science (B.S.) degree in home economics. The Master of Science (M.S.) degree also offered by the department is described in the *Graduate School Bulletin*. The undergraduate curriculum provides a general background for work with children, families, and adults. Most such professions require academic work beyond the bachelor's degree for continuing professional work and advancement. Individuals with a baccalaureate degree are employed as professionals, however, in nursery schools, day-care centers, institutions and hospitals, recreational, child guidance, case work, and other community agencies. Some of the courses in this curriculum, plus certain others in education, meet the requirements for the Provisional Nursery-Kindergarten Certificate in Rhode Island. The Professional Certificate requires successful teaching experience for five years and additional academic work.

Students are required to select and pass one course in each of the following home economics core areas: FSN 201, 207, or 237; CNS 210, 220, 320, or 340; TXC 103 or 224. Students must also take: HCF 150, 200, 203, 357, 330, 304, 400, 430, 310 or 420 or 406. Additionally, students must complete 18 credits in home economics or related areas subject to the approval of the departments, with a maximum of six credits in any one area outside home economics. EDC 484, 485 and HCF 380 may not be used.

Students who wish to meet the requirement for the Provisional Nursery-Kindergarten Certificate in Rhode Island must take the following courses in addition to the above: EDC 102 and 312, 484, and 485; HCF 301 and 303. The sequence of courses is extremely important since placements for student teaching will be during the fall semester only. Students interested in certification must apply by their third semester. It is suggested that they see their University College advisers as early as possible in their program.

A total of 128 credits is required for graduation.

## Physical Education, Health and Recreation

This curriculum leads to a Bachelor of Science (B.S.) degree with a concentration in physical education. The Master of Science (M.S.) program in physical education is described in the *Graduate School Bulletin*.

The curriculum, composed of two major options, is designed for students who plan to pursue a career within the broad field of health, physical education, recreation, and dance. Students may prepare for certification as public school teachers while selecting additional emphasis in either elementary physical education, secondary physical education, athletic coaching, athletic training, or health education. For those who may be interested in other than school careers the curriculum offers a non-teaching option with specializations in dance, physical fitness, corrective and adapted physical education, as well as in a variety of individualized interdisciplinary areas.

Regardless of which of the two options the student is pursuing, the following courses are required of all majors: HLT 123, PED 270, 369, 370, physical activity majors practicum (8 credits), and physical education emphasis area (12-24 credits).

The following non-physical-education courses are required of all students and may be taken to partially fulfill the general education requirements: BIO 101, 102, chemistry or physics (3 credits), ZOO 121, 242, 343, PSY 113, 232, EDC 312, SPE 101 or 102.

All students are also required to complete a minimum of eight practicum credits taken from the following: one credit from PED 121 or 122; two credits from PED 123, 124, 125, or 126; one credit from PED 221, 222, or 223; one credit from PED 251 or 252; one credit from PED 325, 326, or 327; one credit from PED 130, 230, 330, 335, or 340; one credit from PED 321. The above requirements are considered minimal.

**Teacher Certification Option.** This option is designed for students seeking teacher certification in health and physical education at the elementary or secondary school level. It allows a broad exploration of subject area, but

is flexible enough to provide areas of emphasis in (1) elementary physical education, (2) secondary physical education, (3) athletic coaching, (4) health education, (5) athletic training. Students not desiring to pursue an emphasis area will fulfill requirements of the general program of studies. Completion of the certification program fulfills the requirements for teacher certification in the state of Rhode Island.

Within the teacher certification option, the following additional courses are required: HLT 172<sup>2</sup> PED 285, 295, 380, 410, 314, or HLT 356<sup>3</sup>, EDC 484, 485.

Students electing elementary physical education for emphasis must take PED 324, 351, 352, 354 and either PED 315 or 317.

Students electing secondary physical education for emphasis must take PED 315, 317, 324, and either PED 247 or 248. Students must also complete an additional six credits from PED 243, 331, 362, 364, 384, 386, RCR 290, 383, or FSN 207. Only one coaching course may be applied.

Students electing coaching for emphasis must take PED 243, 263, 315, 317 and four credits from PED 247, 248, 362, 364, 384, 386, or FSN 207.

Students who do not specialize in any of the above areas must complete a minimum of twelve credits of physical education, including PED 324, 315, 317 and an additional eight credits selected from EDC 401, FSN 207 or any other departmental offering excluding intercollegiate athletics.

**Non-Teacher Certification Option.** This option is designed for students seeking preparation for careers in non-school settings. The option provides additional opportunity for specializations in (1) dance, (2) physical fitness, (3) corrective and adapted physical education, (4) interdisciplinary areas of interest.

In addition to the requirements listed above for all physical education majors, students in the non-teacher option are required to take: RCR 382, PED

317, three credits of seminar, and 12 credits of supervised field work.

This interdisciplinary curriculum leads to a Bachelor of Science (B.S.) degree in home economics by combining courses of study in home economics and urban affairs. The home economics in the urban environment curriculum adds an understanding of urban areas and their people to a student's preparation in a broad home economics program. Students gain integrated understanding of families and their use of human and non-human resources to attain family goals, and the urban-related courses familiarize the students with the special needs of families in urban areas. Students with such a major might seek careers in urban cooperative extension, social welfare agencies or consumer protection agencies.

Students are required to select and pass one course in each of the following home economic core areas: HCF 150, 200, or 330; FSN 201, 207, or 237; CNS 210, 220, 320, or 340; TXC 103, or 224. # College of Nursing

Barbara L. Tate, *Dean*  
Myrtle S. Matejski, *Assistant Dean*

The College of Nursing offers a curriculum leading to the Bachelor of Science (B.S.) degree. The Master of Science (M.S.) degree also offered by the college is described in the *Graduate School Bulletin*.

*Faculty:* Professors Garner, Kang, Tate; Associate Professors Castro, Feather, Hirsch, Houston, Matejski, McElravy and Schwartz-Barcott; Assistant Professors Abbate, Barden, Bissell, DeCosta, Evans, Fortin, Furlow, Haggerty, Halpin, Hames, Joseph, Manfredi, Minardi, Morgan, O'Flynn, Pearson, Smith and Waldman; Instructors Burchard, Hogan, Kachadourian, Risio, Ryan, Stumpf and Sullivan.

The baccalaureate program is designed for men and women with academic, personal, and professional potential. It aims to develop mature, well-informed graduates who will take their places as responsible members of society in meeting the challenges of health care delivery and of continued learning.

The curriculum is based on the belief that nursing is a creative activity which provides human services for the promotion of health, prevention of illness, and care for the ill, and that it is interdependent with all other disciplines concerned with health. Nursing knowledge is viewed as a unique synthesis drawn from the humanities, and natural, biomedical, and social sciences. The conceptual approach to

nursing study incorporates the whole person and his environment, adaptation-level theory, and nursing process. Nursing courses include observation and clinical practice in numerous hospitals, community agencies, schools, nursing homes, and physicians' offices throughout the state of Rhode Island.

There are three routes to admission to the College of Nursing baccalaureate program.

1) *Students with no previous college of nursing study* begin their preparation in University College with dual enrollment in the College of Nursing. After completion of 45-60 credits which must include required foundation courses with a minimum 2.2 quality point average, they may apply for confirmed admission to the College of Nursing. Priority is given to students with strong academic records and positive recommendations from faculty in introductory nursing courses.

2) *Students with college study in another major or some nursing study in another baccalaureate program* and a minimum of 45 completed credits, if accepted by the University, may be admitted directly.

3) *Registered nurse students* who have completed diploma or associate degree programs are not required to submit scholastic aptitude scores when seeking admission. As adult students who have developed a meaningful compe-

tence in basic subject areas, they may demonstrate their mastery by completing the College Level Examinations sponsored by the College Entrance Examination Board. Advanced credit allowances are based upon a review of the candidate's test scores and preparatory experience. Following direct admission to the college, students have the option of seeking credit by examination in subjects previously studied. They are required to enroll in some upper division nursing courses and to meet remaining program specifications.

The usual time for completion of all requirements for students with no previous college or nursing study is eight semesters and one summer session. All students in the College of Nursing meet all of the general education requirements of the University as listed on page 9. A minimal grade of C must be achieved in all required nursing courses. The faculty reserves the right to require withdrawal from the college of a student who gives evidence academically and/or personally of inability to carry out professional responsibility in nursing. The student is limited to 18 credits per semester except by permission of the dean for special program adjustments or for participation in the Honors Program.

General expenses for students in the College of Nursing are approximately the same as for all other University students. Special items include uniforms, nursing equipment, transportation, and one summer session. The use of an automobile or funds to meet public transportation costs is required during the semester of community health nursing experience, and can offer broader opportunities for experience in all courses.

The program is approved by the National League for Nursing and the Rhode Island Board of Nurse Registration and Nursing Education. The graduate is eligible for examination for professional licensure.

# College of Pharmacy

Louis A. Luzzi, Dean  
Lois Vars, Assistant Dean

The College of Pharmacy offers a five-year curriculum leading to the Bachelor of Science (B.S.) degree in pharmacy and a special curriculum leading to the Bachelor of Science (B.S.) degree in respiratory (ventilation) therapy. The Master of Science (M.S.) degree, offered by all departments; the Doctor of Philosophy (Ph.D.) degree in pharmaceutical sciences offered by all departments except pharmacy administration, and the Master of Science (M.S.) degree in environmental health science are described in the *Graduate School Bulletin*.

## Pharmacy

This five-year curriculum is patterned on presently accepted programs of study recommended by the American Association of Colleges of Pharmacy, the American Council on Pharmaceutical Education, and other interested organizations. It is accredited by the American Council on Pharmaceutical Education and by the University of the State of New York, Division of Professional Education.

It provides preparation for community and institutional pharmacy practice. In addition, students have opportunities through the selection of professional electives to commence a specialization in one of several areas of pharmacy, including hospital, clinical, manufacturing, medical supply

servicing, drug analysis, administration, and research.

The satisfactory completion of the degree in pharmacy is one of the prerequisites for a license to practice pharmacy. Licensure is obtained after graduation by successfully completing the examination given by the Rhode Island State Board of Pharmacy or those of other states. In preparation for this, students are encouraged to participate in externship or internship programs.

Students begin their preparation in University College with a dual enrollment in the College of Pharmacy. All students requesting transfer from University College to the College of Pharmacy must have at least a 2.0 overall quality point average in those basic science courses required for transfer; viz., at the end of three semesters CHM 101, 102, 112, 114, and 227; MIC 201; MTH 141; PHY 109; ZOO 111 and 121; at the end of four semesters the foregoing courses plus CHM 226 and 228; ZOO 242 and 244 (or equivalent courses, where permitted).

A quality point average of 2.0 in all required professional courses given by the College of Pharmacy is required for graduation with a B.S. degree in pharmacy. This is in addition to University grade requirements.

Students in certain other New England states may enroll in pharmacy under the New England Regional Student Program. See page 18.

<sup>1</sup>Registered nurse students take NUR 211 (3 credits) and free electives in place of NUR 101 and 220.

# College of Resource Development

Gerald A. Donovan, *Dean*  
Albert L. Owens, *Associate Dean for  
Resident Instruction*

The College of Resource Development offers undergraduate programs leading to the Bachelor of Science (B.S.) degree in animal science and technology, aquaculture and fishery technology, food science and nutrition, natural resources, plant science and technology, and urban affairs. A number of options have been developed within most programs to permit students to prepare for specific graduate study, further professional training, or for specialized careers at the B.S. level. Entering freshmen and transfer students with fewer than 24 credits should matriculate in one of these programs as well as in University College. Students may select one of the options at the time of transfer from University College or later, with approval dependent upon favorable review by the program faculty. The college also offers a two-year program in fisheries and marine technology leading to the Associate in Science (A.S.) degree. All undergraduate programs are administered by the Associate Dean for Resident Instruction together with the academic advisers and the program faculties.

The Resource Development faculty differs from those in the other colleges in that most hold joint appointments with the Rhode Island Agricultural Experiment Station and/or the Rhode Island Cooperative Extension Service. These units represent the formal research and public service functions of the college and are funded with fed-

eral and state monies. In addition, some faculty members have formal commitments to the International Center for Marine Resource Development and the Sea Grant program.

Graduate programs leading to the Master of Science (M.S.) degree are offered in most departments. Several programs lead to the Doctor of Philosophy (Ph.D.) degree. The professional degree of Master of Community Planning (M.C.P.) is offered by the Department of Community Planning and Area Development. Detailed descriptions of the several graduate programs appear in the *Graduate School Bulletin*.

The faculty is grouped below according to the orientation of their research and graduate programs.

## Bachelor of Science Curriculum Requirements

All B.S. programs offered in the college require a minimum of 130 credits in three categories: general education (36 credits), free electives (12 credits), and program (82 credits).

The *general education* requirements provide exposure to English communications, mathematics, natural sciences, social sciences, letters, fine arts/literature, and foreign language/culture as directed by the University faculty, and must be selected from the approved lists of courses for the several categories.

A block of *free elective* courses is available in each program to give students the opportunity to explore areas of knowledge that may be unrelated to their principal program.

The *program* requirements include introductory professional courses, basic sciences, concentration courses, and supporting electives. Advisory materials for each program include a list of these courses. These are available upon request from the Office of Resident Instruction. Students, working closely with their faculty advisers, may shape their programs to accommodate general or specific needs and interests not represented by one of the options.

Students pursuing an *option* will encounter much more structure, particularly in the basic sciences and in the concentration requirements. The structure reflects specific admission requirements to graduate or professional programs on the one hand, and the

professional requirements of an accrediting agency on the other. The additional requirements for the options are also available on request from the Office of Resident Instruction.

## Animal Science and Technology

This program is for students interested in applied animal science careers. Options are available to students interested in veterinary medicine, animal sciences, and in various phases of the equine or laboratory animal industries. Those students who intend to use their study in animal science as credentials for secondary school teaching should also enroll in this program.

The program requires a minimum of 7 credits in introductory animal science and genetics; 8 credits in zoology and botany; 8 credits in inorganic chemistry; and 3 credits in algebra/trigonometry. In addition, 9-12 credits shall be selected in basic sciences, 24 credits of concentration courses, and 26-29 credits of supporting electives approved for the program.

**Preveterinary Option.** This option prepares students for admission to veterinary schools offering the D.V.M. degree and requires a demonstrated capability in the basic science. Because admission requirements among schools are not totally uniform and are subject to change, students should determine specific requirements of the schools in which they are interested. Those who are not accepted for veterinary training will be well prepared to pursue graduate programs in animal physiology and health.

In addition to the requirements of the program, option students must complete the following basic science requirements: two-semester sequence in organic chemistry (8), biochemistry (3), microbiology (4), general physics (8), introductory calculus (3), and intermediate calculus or statistical methods in research (3). Three credits in animal anatomy and physiology are required in the concentration. The remaining credits shall be selected from the concentration courses and supporting electives approved for this option.

All permanent undergraduate courses offered at the University of Rhode Island are listed on the following pages by subject in alphabetical order. If any subject cannot be located readily, refer to the index. Courses numbered 001 to 099 are pre-freshman and special undergraduate courses and do not carry bachelor's degree credit. Those numbered 100 to 299 are lower division undergraduate courses and those numbered 300 to 399 are upper division undergraduate courses. The 400-level courses are generally limited to juniors and seniors majoring in a field, but open to other advanced undergraduates and to graduate students with permission.

The 500-level courses, listed in this bulletin by title line only, are graduate courses with a bachelor's degree usually prerequisite, but qualified seniors and honors students are admitted with permission. For a full description of these and courses at the 600- and 900- levels, see the *Graduate School Bulletin*.

Courses with two numbers, e.g. ACC 201, 202, indicate a year's sequence and the first course is either a prerequisite for the second or at least the two cannot be taken in reverse order without special permission. If a course is also offered by another department, this information appears following the course number. The roman numeral indicates the semester the course will be offered, SS means the course is offered during the Summer Session, the arabic numeral indicates the credit hours. Distribution of class hours each week is in parentheses. S/U credit signifies a course in which only satisfactory or unsatisfactory grades are given. The instructor's name follows the course description. Courses which meet the General Education requirements are designated with a letter in parentheses, indicating the appropriate group, as follows:

- (A) - Fine Arts and Literature
- (F) - Foreign Language and Culture
- (L) - Letters
- (C) - English Communication (General)
- (Cw) - English Communication (Written)
- (M) - Mathematics
- (N) - Natural Sciences
- (S) - Social Sciences

The schedule of courses is issued by the Registrar immediately before the preregistration period for each semester and again just before registration day. The schedule of courses lists the specific courses to be offered that semester with the time of meeting, location, and instructor assigned for the section.
