Bulletin of the University of Rhode Island. Published quarterly by the University of Rhode Island, Kingston, Rhode Island 02881. Second-class postage paid at Wakefield, Rhode Island 02880.

The University

The University of Rhode Island is a coeducational state-assisted institution founded in 1892 as one of the land-grant colleges. In 1971 it became one of the first four sea grant colleges in the country. The University is located in the village of Kingston, in historic "South County," 30 miles south of Providence and six miles from the ocean.

The function of a university is the discovery and dissemination of truth. The University of Rhode Island carries out this function through its activities in the three major areas of instruction, research, and extension. To enable it to do so most effectively, the University has given support to the principle of freedom in inquiry and expression for both faculty and students, pointing out, however, that such academic freedom carries with it duties correlative with rights. The University holds that the common good depends upon the free search for truth and its free exposition.

Consistent with the University's land-grant tradition, preparation for a life's work and for intelligent and responsible citizenship is a major goal of instruction.

All programs aim at a balance of studies in the natural and social sciences, the humanities, and professional subjects.

Undergraduate students may earn a Bachelor of Science degree in any one of the seven degree-granting colleges of the University. Study in the College of Arts and Sciences may also lead to the degree of Bachelor of Arts, Bachelor of Fine Arts, or Bachelor of Music. In the two-year programs in dental hygiene and commercial fisheries, the degree of Associate in Science is conferred.

Study at the graduate level leads to the master's degree in over 60 areas of study and the degree of Doctor of Philosophy in 24.

The full-time teaching faculty numbers about 780, and there are over 11,000 graduate and undergraduate students at the University's main campus.

The University of Rhode Island prohibits discrimination on the basis of race, sex, religion, age, color, creed, national origin or handicap in the recruitment and admission of students, the recruitment and hiring of faculty and staff and the operation of its activities or programs, as specified by federal and state law. Inquiries concerning compliance with anti-discrimination laws should be addressed to the Affirmative Action Officer, University of Rhode Island.

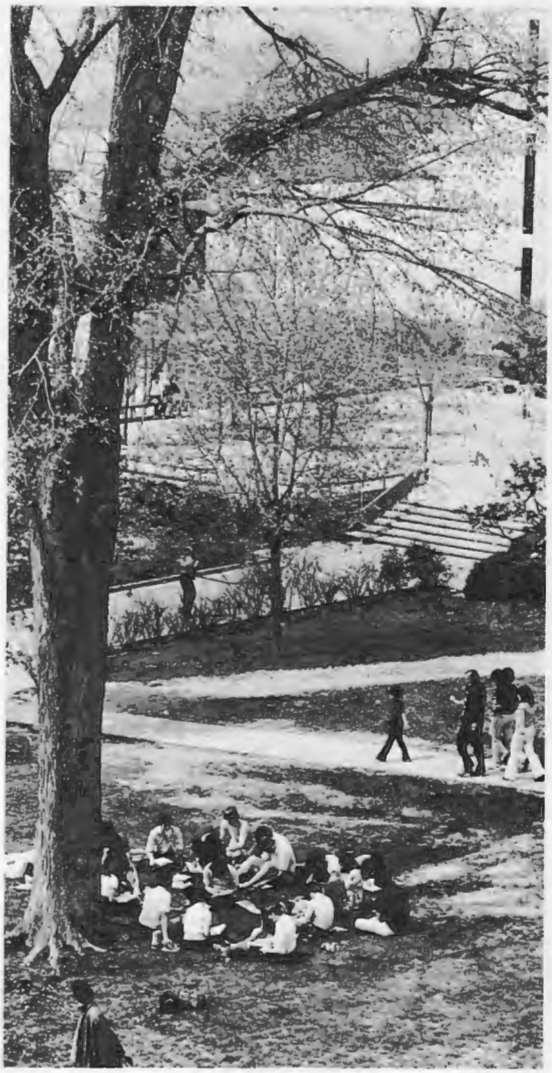
History

The University was originally chartered as the state agricultural school in accordance with an act of the Rhode Island legislature on March 23, 1888. The Oliver Watson Farm in South

Kingstown was purchased for the site of the school, and the old farmhouse, now restored, still stands on the campus today. The school became the state college by act of the state legislature on May 19, 1892, creating the Rhode Island College of Agriculture and Mechanic Arts, and the first class of 17 members was graduated in 1894.

Funds for the creation of state colleges came from the Morrill Act of 1862 which provided for the sale of public lands, the income from which was to be used to create at least one college in each state with the principal objective of teaching agriculture and mechanic arts. From this grant of land comes the name land-grant colleges, applied to the national system of state colleges.

In 1909 the name of the college was changed to Rhode Island State College. The original program of study in science, engineering and agriculture was revised and expanded. On March 23, 1951, by act of the state legislature, the college became the University of Rhode Island and the various schools became colleges within the University. In July 1970 the Board of Regents for Education succeeded the Board of Trustees of State Colleges as governing body for the state's institutions of higher learning. An historical outline may be found in the appendix.



The Campus

The University's main campus encompasses 1200 acres in the village of Kingston just off R.I. Route 138. The center of the University is a quadrangle of handsome granite buildings on Kingston Hill. Surrounding this are other academic buildings, student residence halls, and fraternity and sorority houses. On the plain below are the gymnasiums, athletic fields and tennis courts, and a freshwater pond. Agriculture experiment areas, dairy barns, and greenhouses are nearby.

The University has two other large tracts of land: the 165-acre Narragansett Bay Campus, six miles to the east, where the Graduate School of Oceanography, the Rhode Island Atomic Reactor, and several federal laboratories devoted to the marine sciences are located; and the 2300-acre W. Alton Jones Campus, 20 miles away in West Greenwich, the site of environmental education, research and conference facilities. The Division of University Extension has a building near the State House in Providence which is headquarters for the University's adult education program.

Accreditation

The courses and programs of study offered by the University of Rhode Island have been approved by national accrediting agencies and are accepted for credit toward college degrees by other approved institutions of higher learning. The national accrediting agencies which have approved the quality of the course offerings of the University of Rhode Island include the American Association of Universities, the American Association of Collegiate Schools of Business, the American Chemical Society, the American Council on Pharmaceutical Education, the American Dental Association (Council on Dental Education), the American Library Association, the American Psychological Association, the American Society of Journalism School Administrators, the Engineers Council for Professional Development, the National Association of Schools of Music, the National League for Nursing, the New England Association of Colleges and Secondary Schools, and the State University of New York.

The University is also an approved member institution of the American Association of University Women, the Council of Graduate Schools in the United States, the North American Association of Summer Sessions, and the National University Extension Association.

The University Libraries

The University's Library collection of over 600,000 volumes is housed in the newly expanded and remodeled University Library and its Rodman Hall Annex, the Division of University Extension Library in Providence, and the Claiborne Pell Marine Science Library on the Narragansett Bay Campus which was designated the National Sea Grant Depository in 1971.

The University Library, which holds the bulk of the collection, is a four-story, air-conditioned building where open stacks provide direct access to books, periodicals, documents, maps, microforms and audiovisual materials. The Special Collections Department collects and maintains rare books, manuscripts, the University archives and a variety of special interest materials. Service hours at the other libraries vary, but the University Library provides full reference, bibliographic and circulation services during most of the 90 hours per week it is open. Terminals linked to the University Academic Computer Center are available in the Library during the hours both facilities are operating. Coin-operated copiers are available for reproducing pages from books and journals, and for producing copy from microform. A computer-based bibliographic system makes most books available to users one week after their receipt.

ACADEMIC INSTRUCTION

Undergraduate Programs

All freshmen who enter the University to earn a bachelor's degree are first enrolled in University College. See page 33.

Graduate Study

Graduate study is offered leading to the degrees of Master of Arts, Master of Science, Doctor of Philosophy, and the master's degree in several professional fields. Within each college's chapter in this bulletin, the related graduate degrees are listed.

The Graduate Library School which offers study leading to the Master of Library Science degree is located on the Kingston campus. Students in undergraduate and other graduate

programs may, with the approval of their advisers, enroll in such library science courses as relate to their studies.

The Graduate School of Oceanography is located on the Narragansett Bay Campus of the University and offers study leading to the Master of Science and Doctor of Philosophy degrees. Instruction is limited to graduate study with the exception of one survey course at the 400-level.

A student holding the baccalaureate degree from this institution or from another having equivalent requirements may be admitted for graduate study providing that his credentials meet the standards set by the Graduate School and by the department in which he wishes to study, and that facilities for study are available in his field of interest. Among the standards required for full status admission are an undergraduate average approximating B or better and satisfactory scores on a nationally administered examination. Applicants with somewhat lower undergraduate averages but high examination scores may be admitted on conditional status. Individual departments may, however, apply admission standards which are higher than the general standards just described.

Application forms and a copy of the *Graduate School Bulletin,* which contains the detailed requirements and descriptions of advanced degree programs, are available from the Dean of the Graduate School, University of Rhode Island, Kingston, Rhode Island 02881. The zip code must be included in the applicant's return address. If, after studying the bulletin, the applicant has specific questions concerning particular degree programs or courses of instruction, these should be addressed to the chairman of the appropriate department. Applications must be returned to the Dean of the Graduate School.

Each applicant must submit (1) completed application forms in duplicate, with a $12 nonrefundable application fee (check or money order payable to the University of Rhode Island); (2) three letters of recommendation from individuals familiar with the applicant's work, preferably in the field for which he is applying; (3) two copies of an official transcript sent directly from each college or university attended; and (4) scores from the Graduate Record Examination aptitude tests (see the *Graduate School Bulletin* for those programs which require the GRE advanced tests or which require a different national test).

Applicants from foreign countries must complete the Test of English as a Foreign Language (TOEFL) with minimum scores of 500 for science students and 550 for non-science students. All inquiries from international students concerning applications, fees, housing, etc., should be directed to the Director for International Student Affairs, 4 Taft Hall.

The usual deadlines for receipt of applications are April 15 for September and Summer Session admission, and November 15 for February admission. See the *Graduate School Bulletin* for those programs which have earlier application deadlines.

Summer Session

The Summer Session currently is composed of two five-week sessions of regular classes in addition to several special workshops of varying length. Both provide educational opportunities in almost every academic department at the graduate and undergraduate level. The *Summer Session Bulletin* is published in the spring of each year and lists all courses and workshops, including necessary registration and fee information. Summer registrations are accepted on a first-come basis in the Summer Session Office, Green Hall, until the first day of each class. All students planning to use summer credits to satisfy degree requirements at the University of Rhode Island or another institution should have their program approved by their academic deans before registering.

Adult Education

The Division of University Extension provides adult residents of Rhode Island with an opportunity to enhance their liberal and professional education. Credit courses are offered in the sciences and the humanities, engineering, business, and home economics. Academic programs lead to the degrees of Bachelor of Science in General Business Administration, Industrial Engineering; Bachelor of Arts in English, Economics and Speech Communication, Master of Business Administration, Master of Arts in English, Master of Public Administration and a Master of Science in Industrial Engineering. A continuing education program in the daytime leads to the Bachelor of Arts in English, History, Psychology, Secondary Education, Speech Communication, or the Bachelor of Science in Home Economics Education or Child Development and Family Relations. The division operates certification programs for various professions as well as individual credit and noncredit courses. Institutes, seminars, conferences, and short courses are planned for business, industry, labor, government, and the professions. A counseling service includes psychological testing, and group and individual guidance. The division also does research on academic and administrative questions relative to continuing education for adults.

The teaching staff is drawn from resident faculty of the University and specialists in professional and business fields. Headquarters are in the University Extension Building, Providence. Evening courses are offered in Providence, on the Kingston Campus, and in such local communities as Davisville, Middletown and Westerly. A bulletin of extension courses may be obtained on request to the Division of University Extension, Promenade and Gaspee Streets, Providence, Rhode Island 02908.

RESEARCH AND EXTENSION PROGRAMS

Research

Active programs of research are carried on throughout the University. In addition to the strong research programs in the various departments, the University has established the following programs in specially defined areas. Support comes from foundations, commercial firms, federal and state governments, and the University.

The Coordinator of Research signs, on behalf of the University, applications for research grants, maintains files of funding agencies, keeps a current facilities inventory, and in general acts as a liaison officer for the President, the business manager, the academic deans, the Research Committee and the faculty in matters pertaining to the general research policy.

The Academic Computer Center

The Academic Computer Center has an IBM system/370 model 155 with 1536K of high speed storage, disk storage units, magnetic tape, card, and printer input/output devices, and an off-line plotter. The system's hardware and software accommodate both remote batch and interactive terminal usage with graphics support as well as normal batch processing. An intermediate-speed remote batch terminal is installed at the Narragansett Bay Campus. The Department of Electrical Engineering has a Data General Eclipse and two PDP-9 computers with a graphics display console linked to the Academic Computer Center's system. Various types of typewriter and display terminals for interactive use or remote job entry are located on the campus in most of the science and engineering departments as well as the College of Business Administration, the College of Pharmacy, the Graduate School of Oceanography, and the Academic Computer Center. Off-campus installations include the Division of University Extension and various high schools in the state.

The staff of the Academic Computer Center develops and maintains programming systems and application programs, conducts short courses and workshops, and provides programming assistance for the University community. Faculty members of the Department of Computer Science and Experimental Statistics provide consultation in numerical methods, statistical analysis, and computational techniques.

Agricultural Experiment Station

Established in 1888, the Agricultural Experiment Station within the College of Resource Development is concerned with basic and applied investigation in natural and human resources. This research aims at conserving and managing resources, at improving the quality of environments, at abating pollution and recycling waste materials, at enhancing rural environments, at developing more rewarding home life, and at supporting resource-using industry and business in the region.

Research is conducted in food and resource chemistry, resource economics, plant and soil science, plant pathology and entomology, forest and wildlife management, animal science, and animal pathology. A strong orientation to estuarine and marine problems and an interdisciplinary approach to resource research are station characteristics. The progress of research is reported quarterly in *Rhode Island Resources* and complete results of individual projects are issued in station bulletins. All are available to Rhode Island residents upon request to the director.

Bureau of Government Research

The bureau was organized in 1960 to provide service to municipalities and to the state. It operates as an independent unit within the University. The bureau maintains a municipal consulting service which assists Rhode Island communities in dealing with problems of governmental organization and administration. It has a publications program including a research series, an information series, and a monthly newsletter, and operates a program of conferences and awards. The bureau assists in the administration of the graduate program in public administration, maintains a public administration library and provides an information service for local government units.

Cooperative Extension Service

An educational organization within the College of Resource Development involving the federal and state governments and regional agencies (Eastern, Northern, Providence and Southern Rhode Island Cooperative Extension Services), the service's main function is to extend educational resources to the people of Rhode Island.

Extension programs are concerned with the following areas: (1) home economics for contemporary living with emphasis on consumer and management education, clothing, housing and home furnishing, child development and human relations, and nutrition; (2) 4-H and youth programs to assist young people to realize their individual potentials as responsible citizens; (3) resource development information related to home grounds, general or specialized farms, nurseries, orchards, forests, etc., to help groups and individuals enhance the well-being of the community.

Offices of the Cooperative Extension Service are located in Providence, Newport, Greenville, East Greenwich, and Kingston.

Curriculum Research and Development Center

Founded in 1969, the Curriculum Research and Development Center conducts sponsored research in the broad field of education. While specializing in curriculum evaluation and development at the elementary and secondary level, its staff also engages in basic research in a variety of areas including learning, measurement and human services. There are specialists in research methodology, science education, bilingual, bicultural, adult and career education, survey and census methods, educational program administration and testing.

The Curriculum Research and Development Center is an integral part of the Department of Education in the College of Arts and Sciences

and maintains close liaison with the Rhode Island Department of Education.

Division of Engineering Research and Development

This division was established in 1942 to coordinate the research activities of the College of Engineering. It disseminates the results of basic or fundamental investigations; conducts fundamental and applied research projects; provides opportunities for graduate students and highly qualified undergraduates to participate in research studies; and offers opportunities for members of the engineering faculty, through research, to keep abreast of advances in the profession.

The division is an integral part of the College of Engineering, and members of the college participate in all division projects. Facilities are available for research in the fields of chemical, civil, electrical, industrial, mechanical, materials, nuclear, environmental, and ocean engineering. Research is a requirement for all advanced degrees in engineering and the sponsored research of this division is primarily intended to provide students with the opportunity to fulfill this requirement.

Division of Marine Resources

This division is committed to providing broadly-based services to units of state and local government, business and industry and the general public in the area of marine needs and interests.

Coastal Resources Center

The Center is engaged in preparation of coastal and marine management plans for the state and region, and serves as the primary consultant of the Rhode Island Coastal Resources Management Council. Its technical staff is based at the Narragansett Bay Campus. The Center has produced a number of publications and sponsors research on marine and coastal research throughout the University.

The Jerusalem Marine Field Station offers facilities for many applied marine research studies including aquaculture and salt marsh ecology work. The research group is headed by a chief scientist and calls upon the scientific personnel and resources of the University to carry out the purposes of the Division of Marine Resources.

The Marine Advisory Service provides field specialists and information to the state's marine community under the public service responsibility of the Sea Grant Program. Projects include work with commercial fishermen, marina operators, local and state governments, elementary and secondary schools, marine resource managers, and individuals and businesses interested in marine enterprises. The Marine Advisory Service has headquarters at the Narragansett Bay Campus.

Graduate School of Oceanography

The Graduate School of Oceanography is located on the 165-acre Narragansett Bay Campus. The land borders the shore and includes a basin and dock within easy reach of both the bay and the open ocean. The University operates several vessels, the largest of which is a 177-foot research ship, ENDEAVOR, to begin operation in November 1976.

A number of buildings make up the Bay Campus shore facilities including laboratories, of-

fices, the Claiborne Pell Marine Science Library, a 12,000-square-foot research aquarium, and a specially designed facility which permits moderate-scale controlled ecosystems experiments. The school maintains the Jerusalem Field Station for applied research in Rhode Island waters in the fishing village of Jerusalem. The research program includes basic and applied studies in physical, chemical, geological and biological oceanography (including fishery biology).

International Center for Marine Resource Development

The University founded the International Center for Marine Resource Development in 1969 specifically to help other countries solve their marine resource problems through education, research, and extension programs. The Center's initial challenge from its major sponsor, the Agency for International Development (AID), was to develop expertise to meet marine resource problems posed by other countries and to provide educational experiences for international students and guests. Currently, the Center is assisting in several AID-sponsored research projects designed to improve the status of small-scale fishermen and fisheries in lesser developed countries which should contribute toward solutions of the world's food shortage problem.

Laboratories for Scientific Criminal Investigation

These laboratories in the Department of Pharmacology and Toxicology of the College of Pharmacy provide instruction, research, and service in the field of scientific criminal investigation. The laboratory staff works closely with the Rhode Island Attorney General's Office and also provides technical consultation for various law enforcement agencies, and special instruction and research in criminalistics, in which faculty members of various departments participate. The program sponsors a special course for police and law enforcement agencies.

Law of the Sea Institute

Established in 1965 the institute conducts a program of workshops and summer conferences focusing on the legal and political problems of the exploration, exploitation and control of the marine environment. An active publications program is carred out including occasional papers, proceedings of conferences and workshops, bibliographies, and other information services for the marine community. Although administered through the University, institute policies are determined by an executive board whose membership is from the University of Rhode Island as well as many other universities.

Program in Gerontology

This is a University-wide program under the general supervision of the provost for Health Science Affairs. It is interdisciplinary because problems of aging are interdisciplinary. Its purpose is to develop within university teaching a clear recognition of the aging process and its implications, to promote the scientific and humanistic study of gerontological problems, and to relate the development of gerontology at the University to the larger community. The program was developed as a resource for New England, and its activities are coordinated with those of the New England Center for Continuing Education in Durham, New Hampshire. It is administered at the University by a director and advisory committee. Students who wish to include a gerontological area of interest within their major concentration should consult the director.

Research Center in Business and Economics

The research activities of the College of Business Administration are centered in this organization established in 1965. The center initiates, conducts, and services research activities of the faculty in the fields of accounting, business education and office administration, business law, economics, finance, insurance, management science, marketing management, organizational management and industrial relations, and production and operations management. The center published *The New*

England Journal of Business & Economics, whose main focus is upon the business and economics issues which directly or indirectly concern New England.

Rhode Island Water Resources Center

The Rhode Island Water Resources Center, established in 1965, is the state center for research and training in all phases of water resources. There is a similar center or institute in each of the 50 states and Guam, Puerto Rico, the Virgin Islands and the District of Columbia, established through Public Law 88-379 in 1964. The states work cooperatively with the federal government in an effort "to assist in assuring the nation at all times of a supply of water sufficient in quantity and quality to meet the requirements of its expanding population."

Each center currently receives a federal appropriation each year to carry on its work. Congress may appropriate additional sums to match, on a dollar-for-dollar basis, funds made available to the center by the state or other nonfederal sources to meet the necessary expenses for specific water resources research projects.

Principal investigators of projects need not be employed at the University of Rhode Island: in fact centers are encouraged by the act to plan and conduct programs with such other agencies and individuals as may contribute to the solution of the water problems involved.

OTHER ORGANIZATIONS

The University is a member of the University Press of New England which publishes manuscripts originating on the six member campuses and elsewhere, as determined by its director and editorial board on which the University of Rhode Island is represented.

Faculty Government

The Faculty Senate represents the faculty and was authorized in 1960 by the general faculty to conduct in a responsible and efficient manner the business assigned to faculty jurisdiction by the law or by the Board of Regents. The Graduate Council is the representative body for the graduate faculty in determining the academic policies for graduate study.

University Ombudsman

The office of the ombudsman was created in 1972 to investigate complaints from members of the University community—students, faculty, or administrative personnel—that they have been unfairly dealt with in the normal channels of administrative process. The ombudsman office

does not replace normal channels, but is used when the normal channels do not adequately respond.

The ombudsman is a tenured member of the faculty who is elected by the general faculty. He is assisted by a student who has been nominated by the Student Senate and appointed by the President of the University.

Administrative Staff Association

A representative body for all full-time employees who are neither in the state classified service nor ranked members of the faculty, its purpose is to provide for the general welfare and equitable representation of administrative personnel in the government of the University.

The Alumni Association

Anyone who has attended the University for at least two semesters is automatically a member of the Alumni Association. The organization, which now numbers over 28,000, exists to promote the interests of the University and maintain the ties of alumni with their alma mater. The association publishes an *Alumni Bulletin* and has an annual fund drive.

University of Rhode Island Foundation

The University of Rhode Island Foundation was created in 1957 to encourage and administer gifts from private sources, with the primary purpose of building a substantial endowment, the income from which would assure continuing support to the University. The foundation is particularly concerned with activities of the University, its students and faculty for which adequate provision is not ordinarily made by appropriations from public funds.

Programs and Requirements

Consistent with its policy of allowing the greatest latitude possible in course selection, the University offers a wide choice to fill its general education requirements and encourages students to select free electives that cross departmental and college lines. This section deals with academic requirements, regulations and opportunities that are University-wide rather than college related. Students must check the curricular requirements of the colleges in which they plan to earn their degrees (pages 34-81).

Each curriculum at the University is designed primarily as a learning experience for the student. The University attempts to provide the successful student with a range of knowledge and skills which can, with appropriate motivation and initiative, be used in a variety of ways after graduation. Study options vary from the traditional liberal education to programs which are heavily vocationally oriented. Successful completion of any course of study at the University, however, does not guarantee that the student will find either a specific kind or level of employment.

Students interested in the career opportunities related to particular programs of study are encouraged to consult University College advisers, the appropriate department chairman, and/or the staff of the Office of Career Planning and Placement. For students who are uncertain about their career choices, the Counseling Center offers help.

GENERAL EDUCATION REQUIREMENTS

All undergraduate students in baccalaureate degree programs at the University and in its Division of University Extension are required to select and pass 45 credits of course work from Divisions A, B, and C. Only three credits may be substituted in any one division.

OTHER ACADEMIC REQUIREMENTS

Certain basic courses are required in many curriculums for transfer from University College into the degree-granting colleges at the junior-year level. These are listed in the individual college's curriculums.

The responsibility for meeting all course and credit requirements for the degree must rest with each individual student.

Students who desire to accelerate their programs and receive credit for courses taken at other institutions or during Summer Session or in the Division of University Extension at the University of Rhode Island must have prior approval from their academic deans.

INTERDEPARTMENTAL STUDY

Students are encouraged to develop interests across departmental lines and several interdepartmental programs have been developed.

Black Studies

Students who declare Black Studies as an area of interest (see page 36) may use the following courses to fulfill the requirements. BST 101, 102 (6 credits) are required. Elective courses (12 credits) may be selected from APG 313; ENG 345, 346, 444; HIS 150, 175, 345, 379, 384, 388, 580; PSC 495, 510; REN 595; SOC 340, 434. Permission may be obtained on ad hoc basis to use other courses that have as their central focus one or another aspect of the Black experience.

Food Science and Technology

The University of Rhode Island is among the group of universities officially recognized by the Institute of Food Technologists as offering a curriculum in Food Science and Technology. The All-University Food Science Committee coordinates and guides the program. Participating students are enrolled in the Colleges of Home Economics or Resource Development. Students in this interdepartmental program should follow the curriculum below. The program requires 130 credits.

General Education Requirements (27 credits) are selected from Divisions A, C or D.

Required Courses fulfill the general education requirements for Division B and include 10 to 12 credits in biological sciences (one course each in plant biology, animal biology and general microbiology); 28 credits in chemistry and physics (a two-course sequence in general chemistry, organic chemistry, and physics, and one course in analytical chemistry); 6 credits in mathematics (one course in algebra and trigonometry, and one in introductory calculus).

Major Area of Concentration (21 credits) includes FNS 337 and 207, FRC 431 and 432, ASC 441 and 444, MIC 412.

Directed Electives (18 credits) should be selected to provide further competence in the areas of food technology, food science or nutrition from the course offerings of the Departments of Animal Science, Food and Nutritional Science, Food and Resource Chemistry, and Microbiology.

Free Electives (18-20 credits) complete the program for a total of 130 credits.

Urban Affairs

The undergraduate program in Urban Affairs consists of seven different interdisciplinary degree concentrations, three in the College of Arts and Sciences and four in professional colleges. They are designed to provide students

with a general understanding of contemporary urban society and the opportunity to pursue specialized study of urban problems and prospects from the perspective of varied disciplines, whatever may be the students' interests and career objectives.

The seven concentrations are: (1) Personality and Culture in the Urban Environment, (2) Policy Formation in the Urban Environment, and (3) Spatial Development in the Urban Environment in the College of Arts and Sciences; (4) Business in the Urban Environment in the College of Business Administration; (5) Urban Engineering in the College of Engineering; (6) Home Economics in the Urban Environment in the College of Home Economics, and (7) Resource Development in the Urban Environment in the College of Resource Development.

In addition to the formal program of courses, there is practical experience in the form of internships, work-study activities, and/or research projects. Students are required, during their senior year, to participate in an interdisciplinary Senior Seminar in Urban Affairs for one semester, and they may choose to participate for a second semester. The seven programs are detailed in the appropriate college sections of this bulletin.

The Urban Affairs Program Coordinating Committee (see page 194) includes faculty members from departments throughout the University and supervises the operation of the Urban Affairs Program. With the endorsement of the faculty of the college concerned, the committee certifies completion of the concentration requirements for the appropriate undergraduate degree. A member of the committee serves as adviser for each of the seven concentrations and provides interested students with information.

PRE-PROFESSIONAL PREPARATION

Competition for places in graduate professional schools is keen, and a superior academic record throughout college is necessary for admission to these schools. Since requirements for the professional schools vary in their "essential" and "recommended" subjects, the student should consult the catalog of the professional school and then plan his or her undergraduate program accordingly. Those seeking careers as social workers may enroll as majors in sociology, including in their curriculum the social welfare courses. A basic foundation for graduate study, whether directed toward college teaching or research careers, can be provided through any of the liberal arts or science majors. The Bachelor of Arts curriculum provides specific majors for those planning to become journalists or public school teachers.

Prelaw Studies

For students who plan professional study of law, guidance and program advice are provided by departmental advisers assigned in University College and by concentration advisers within various departments and colleges.

Students interested in law school should consult the *Prelaw Handbook,* prepared by the Association of American Law Schools and the Law School Admissions Council, for general recommendations about prelegal education. The Association finds it inappropriate, given the wide range of a lawyer's tasks, to prescribe either a set of prerequisite courses for prelaw students or preferred major departments. Rather

it recommends that students choose their majors dependent upon their own individual intellectual interests and upon "the quality of undergraduate education" provided by various departments and colleges. "Shortly stated, what the law schools seek in their entering students is . . . accomplishment in understanding, the capacity to think for themselves, and the ability to express their thoughts with clarity and force." The Association emphasizes that "the development of these fundamental capacities is not the monopoly of any one subject-matter area, department or division."

Premedical and Predental Studies

For students who plan professional study in medicine, dentistry, podiatry or optometry, guidance and program coordination is provided by the adviser for the health professions and the faculty Premedical, Predental, Preveterinary Advisory Committee.

Each student should consult the prerequisites for each professional school to which he or she may expect to apply for admission. These are listed in *Medical School Admission Requirements*, published by the Association of American Medical Colleges, and *Admissions Requirements of American Dental Schools*, by the American Association of Dental Schools, which are revised annually.

Medical schools generally require a 3.2 to 4.0 grade point average and high scores on the required Medical College Admission Test (MCAT), taken preferably in the spring of the third undergraduate year. A score of 600 or above in each section of this test is required by many medical schools. Since only about 30 of 100 applicants to medical schools are admitted, it is wise to plan for an alternative career.

The recommendations for premedical preparation also apply to predental students, who are counseled by the same advisory committee. The Dental College Admission Test (DAT) is required, and normally this test is taken in the spring of the third undergraduate year. Competition for admission into dental schools is nearly as keen as that experienced by premedical students. Thus, an excellent academic record, along with a 5 or 6 in each section of the test, usually is required.

A premedical or predental student may choose to study in any liberal arts or science curriculum, so long as the courses that are required by medical schools are included. Most students major in one of the biological or health sciences or in a related field, such as pharmacy or chemistry.

A recommended course of study is outlined below. Italicized items are *indispensable* for admission to any medical or dental school. Ideally, these courses should be substantially completed before the MCAT or the DAT are taken.

Chemistry. At least 16 semester-hour credits, including *general inorganic,* qualitative and quantitative analysis, and *organic;* physical chemistry is sometimes required and is frequently recommended: *CHM 101, 102, 112, 114, 212, 227, 228, 226;* and in some cases 431 and 432, all with the associated laboratory courses.

Biology. At least 11 credits, including *general animal biology,* embryology,. physiology or anatomy, genetics: *ZOO 111,* 316, 321 or 345, BOT 352.

Physics. *At least 8 credits, including PHY 111, 112.*

Mathematics. At least 6 to 9 credits, through calculus, MTH 141, 142.

English and Communications. At least 12 credits, *including ENG 101, 102, or Scratch, or ENG 110, 120 and a year of literature.*

Modern Foreign Language. Through the intermediate level.

Psychology. At least 3 credits, PSY 113.

Sociology. At least 3 credits, SOC 202.

Preveterinary Studies

Students who are interested in preparing for a professional career in veterinary medicine are counseled by the Premedical, Predental, Preveterinary Advisory Committee. Requirements for admission into the study of veterinary medicine vary and the catalogs of veterinary schools should be consulted for specific requirements early in a student's undergraduate years. Many schools require the Veterinary Aptitude Test (VAT) or the Graduate Record Exam (GRE). Ordinarily, either test should be taken in the spring semester of the third undergraduate year. Moreover, experience in agriculture and animal husbandry is expected by some veterinary medical schools.

A preveterinary student may choose to follow the Bachelor of Science curriculum in Animal Science (described elsewhere in this *Bulletin*), or he or she could be guided by the course of study recommended above for premedical and predental students.

Competition for admission into schools of veterinary medicine is extraordinary. Therefore, evidence of high motivation and an outstanding academic record are essential.

HONORS PROGRAM

Juniors and seniors who achieve a cumulative average of 3.3 are eligible for participation in the University Honors Program. Honors students take part in the Honors Colloquium, a series of lectures and discussions on topics which change annually. They also undertake honors projects involving independent study within the department of their concentration or an approved related area.

Successful completion of the independent project and of six credit hours in the Honors Colloquium is recognized on diplomas and transcripts.

DEAN'S LIST

Full-time undergraduate students who have achieved certain levels of academic excellence in any semester shall be honored at the end of that semester by inclusion of their names on the *Dean's List.* The Registrar will publish lists of students who have attained the required quality point average.

A student may qualify for the *Dean's List* if he has completed 12 or more credits for letter grades in a semester. Freshmen and sophomores shall qualify by achieving a 3.0 quality point average; junior and seniors, a 3.2 quality point average.

INTELLECTUAL OPPORTUNITY PLAN

This "pass-fail" plan encourages students to increase their intellectual breadth and discover aptitudes in new areas of knowledge. A student

above the freshman level who is not on probation may register under this plan for courses considered by the college in which he is enrolled as free,unattached electives. Courses that are stipulated in the student's curriculum as degree requirements, general education requirements, and military science courses may not be included.

A student choosing to take a course under this plan must notify his adviser, academic dean and the Registrar's Office in writing, prior to the end of the add period of each semester. The instructor is not informed.

Grades will be S (satisfactory) or U (unsatisfactory). The S grade is credited toward degree requirements, but not included in the quality point average. The U grade is not credited and is the equivalent of an F grade in calculation of quality points. If a student has selected the S/U option for a course, then decides not to use the S/U option, he or she may change by notifying the Registrar before the last date for dropping courses.

A student may elect not more than three S/U courses each semester and not more than two S/U courses during a summer.

RESERVE OFFICERS TRAINING CORPS

The Military Science Department offers the ROTC Program which enables any college student to earn a commission in the United States Army while simultaneously earning a college degree. A four-year program exposes the military science student to military history, international relations, leadership, management and the principles of effective organization. A laboratory period allows students to put into practice the theory presented in academic instruction. Credit toward graduation is received for all classroom instruction and, for the final two years of instruction, each student receives a monthly stipend of $100. Those enrolled in military science courses are also eligible to compete nationally for full Army ROTC scholarships.

A modified two-year program is available to sophomores and graduate students which substitutes a six-week summer training period for the first two years of study. A ROTC graduate has the option to serve as a career officer in the active Army or in the Reserve force after a period of active service which may vary from three months to two years depending upon his desires.

GRADES AND POINTS

All grades are reported as A, superior; B, good, above average but not superior; C, average; D, low grade, below average, passing; F, failure; S, satisfactory; U, unsatisfactory.

Grades are given quality point values as follows: A, 4 points; B, 3 points; C, 2 points; D, 1 point; F, S and U, 0 points.

A grade may be reported as "incomplete" only when failure is caused by illness or by some comparable reason not within the control of the student. Incomplete grades are subject to regulations specified in the *University Manual*.

Any course may be dropped, by official procedures determined by the Registrar, during the first two weeks of the semester without fee. Courses officially dropped after the first two weeks of the semester and up to seven weeks prior to the last day of classes incur a fee of $5 per course. If the student has not dropped a course by the last seven weeks before the last

day of classes, the instructor must submit a grade.

A student may withdraw from a course later than the announced expiration date for withdrawal if at mid-term the student has requested but received no evaluation of his or her work in the course. Such withdrawal requires the consent of the department chairman. However, in the absence of the chairman, or if the chairman is the instructor, the student may withdraw from the course with the consent of the dean of the college.

Removal of failures in elective courses is not required, but removal of failures in required courses is. The course should be repeated when next offered. No limit is placed on the number of times a course may be repeated, but the credit requirement for graduation is increased by the number of credits repeated.

Certain courses do not lend themselves to precise grading and for these courses, only S (satisfactory) or U (unsatisfactory) shall be given to all students enrolled. S/U courses shall be labeled as such in the University catalogs and bulletins. S/U courses are not counted as courses taken under the Intellectual Opportunity Plan.

Probation and Dismissal

A student shall be placed on scholastic probation when his cumulative scholastic average falls below 2.0 after completing 23 or more credits, or when he has a deficiency of four (4) or less quality points below a 2.0 average after completing 22 or less credits.

A student shall be dismissed for scholastic reasons when he has a deficiency of eight (8) or more quality points below a 2.0 average after being on probation the previous semester. A student subject to dismissal shall be so notified by his dean; after which he shall have five days to file a written appeal with his dean. These rules are fully explained in the *University Manual.*

Students are expected to be honest in all academic work. A case of cheating or other form of academic dishonesty involving a penalty of suspension or dismissal from the University shall be reported by the academic dean of the college or school in which the student is enrolled to the Dean of Students who shall arrange for a hearing by the Board of Student Conduct and Scholastic Integrity. Procedures for such a hearing are described in the *University Manual.*

Copies of the *Manual* are available in the library and in deans' offices.

WITHDRAWAL FROM COLLEGE

An undergraduate student wishing to withdraw from the University at any time other than at the end of semester is required to secure a "withdrawal form" from the Office of the Dean of Students. This form, when completed, is taken to the Office of the Bursar for settlement of account.

The student who leaves the University during the course of a semester without officially withdrawing is held responsible for his registration for the semester.

UNDERGRADUATE GRADUATION REQUIREMENTS

To graduate, a student must have completed the work for, and must have achieved the minimum quality point average established by, the curriculum in which he is enrolled. Total quality points earned must equal at least twice the total number of credits for which the student has registered in that curriculum.

A transfer student who has met the requirements for two degrees and has taken an additional 30 hours (24 of which must be taken at the University of Rhode Island) beyond the minimum requirements for the initial degree may be granted an additional bachelor's degree.

Any student who has met the requirements for a second bachelor's degree and has completed an additional 30 hours of credit beyond the minimum requirements for the initial degree may be granted two bachelor's degrees.

A maximum limit of ten full semesters in one four-year curriculum will be allowed any student for graduation.

Exceptions to the requirements in the above paragraphs may be made upon recommendation by the college concerned.

Except in special cases, which shall be considered by the faculty of the college in which the student is registered, the work of the senior year must be taken in residence.

Students who attain, at the time of graduation, a cumulative quality point average (for at least one-half of their required credits at the University) of 3.3 shall be recognized as graduating with "distinction." Those who achieve a quality point average of 3.5 shall graduate with "high distinction" and those who earn 3.7, with "highest distinction."

A student who has successfully completed six semesters at the University in the curriculum in which he is registered, and then enrolls in an accredited professional college and receives a recognized professional degree, may apply for the degree of Bachelor of Science from the University of Rhode Island. The award, if approved, will be made at the next regular commencement. For veterans, only four semesters in residence are required. The other two may be fulfilled by his record in the service, evaluated in terms of University credit.

Admission and Registration

ADMISSION TO COLLEGE

The University desires that its undergraduates shall be men and women who are not only competent to do a good job in the classroom, but are also possessed of wide interests and positive qualities of character and personality. Students are selected for enrollment primarily on the basis of their academic competence without regard to age, race, religion, color, sex, creed, national origin, or handicap. Any person with a strong preparatory record, who possesses better than average intelligence, or who has special aptitudes or talents, should not hesitate to apply.

Candidates must meet the unit requirements of the University College as listed below for entrance to the University. Furthermore, to meet the requirements for entry to any of the other colleges in the University at the sophomore or junior level, applicants must complete the additional units recommended by the particular college to which transfer is intended. See page 33 for description of the University College.

Applicants are given individual consideration, but it is expected that all candidates will offer 16 units of college preparatory work as outlined below. If these requirements are not fully satisfied by secondary school certificate, they may be met wholly or in part by successful performance on appropriate examinations administered by the College Entrance Examination Board, the University, or State Departments of Education.

Unit Requirements

University College requires 4 units in English, 2 in Algebra and/or Plane Geometry, 1 in Physical or Natural Science, 1 in History or Social Science, and 8 additional units as specified below for individual colleges.

Arts and Sciences requires 4 units in English, 2 in Mathematics (2 in algebra or 1 in algebra and 1 in plane geometry), 1 in Physical or Natural Science, 1 in History or Social Science, 2 in any single Foreign Language, and 6 additional units. Majors in Chemistry and Physics require 4 units of Mathematics. Majors in Physical Education may substitute other college preparatory studies for a foreign language.

Business Administration requires 4 units in English, 3 in Algebra and Plane Geometry, 1 in Physical or Natural Science, 2 in History or Social Science, and 6 additional units.

Engineering requires 4 units in English, 4 in Mathematics (algebra, plane and solid geometry, and trigonometry), 2 in Physics and Chemistry, 3 in History, Social Science and/or Foreign Language, and 3 additional units.

Home Economics requires 4 units in English, 2 in Algebra and/or Plane Geometry, 1 in Science (chemistry preferred), 1 in History or Social Science, 2 in any single Foreign Language, and 6 additional units.

Nursing requires 4 units in English, 2 in Algebra and/or Plane Geometry, 2 in Physical or Natural Science, 1 in History or Social Science, and 7 additional units.

Pharmacy requires 4 units in English, 2 in Algebra and/or Plane Geometry, 1 in Physical or Natural Science, 1 in History or Social Science, and 8 additional units.

Resource Development requires 4 units in English, 2 in Algebra and/or Plane Geometry, 1 in Physical or Natural Science, 1 in History or Social Science, and 8 additional units.

It is strongly recommended that additional units be selected from languages, history, mathematics or science.

Application Procedures

Students should discuss their hopes and plans for study at the University with their academic counselors as early as possible to establish realistic goals and program selections. Admissions counselors at the University are happy to correspond with students on individual problems. Requests for application forms and information should be directed to the Office of Admissions, University of Rhode Island, Kingston, Rhode Island 02881.

Applications and requests for admissions information from foreign students should be addressed to the Director for International Student Affairs in Taft Hall at the University.

Students are enrolled at the beginning of the fall semester in September and at the beginning of the spring semester in January. High school seniors are urged to submit applications early in their final year of preparatory study as the University subscribes to a "rolling" admissions policy, reviewing folders as rapidly as complete credentials are submitted. However, some applicants find it to their advantage to hold their forms until senior mid-year grades are available so that their progress in the last year may be assessed by the Selection Committee. Closing date for fall term applications is March 1, and most decisions are reported in February, March and April. Closing date for spring term application is December 1.

Early decision is made on the application of any freshman candidate who has established a superior academic record, who has achieved above-average scores on the CEEB Scholastic Aptitude Test, and whose potential as a superior student is reflected in the secondary school endorsement. Applications which meet these qualifications and which are clearly labeled "Early Decision Candidate" are considered on a priority basis if filed prior to November 1.

Entrance Tests

All candidates for admission are required to take the Scholastic Aptitude Test, the English Composition Achievement Test, and at least two other achievement tests, administered by the College Entrance Examination Board in areas in which the candidate plans to continue his studies in college.

Applicants are encouraged to take these tests as early as may be practicable; delay beyond the January date materially reduces a candidate's prospects for approval. Full information concerning these tests may be obtained from local high schools or by writing to CEEB Headquarters at P.O. Box 592, Princeton, New Jersey 08540.

Applicants for the curriculum in Dental Hygiene are required to take the SATs and the Dental Hygiene Aptitude Test in lieu of three achievement tests. Full information concerning this test may be obtained from the University Office of Admissions or from the American Dental Hygienists' Association, 211 East Chicago Avenue, Chicago, Illinois 60611.

International students who are not immigrants must take an English proficiency test administered by the American Consulate or the Test of English as a Foreign Language (TOEFL) administered by the Educational Testing Service, Princeton, New Jersey 08540 U.S.A. Additionally the Scholastic Aptitude Test and three Achievement Tests are required as outlined above.

Interviews

Personal interviews are not part of the normal admissions procedure. It would be impossible for the admissions staff to interview all candidates, and individual conferences are arranged only if a unique problem requires personal discussion.

Group conferences are scheduled several afternoons each week during the fall and early winter months, and students and their parents are invited to participate in these meetings to get acquainted with the University. Visitors are requested to phone ahead (401-792-2164) to be scheduled for these meetings.

Early Admission

Students who have completed their junior year of high school with superior records are eligible

for early admission. A part-time study program may be arranged for students who wish to begin college study in their senior year while continuing their high school work. A full-time program may be arranged for those recommended for college admission without completion of the standard preparatory program.

Early admission students would normally have completed: 3 years of English, 3 years of mathematics, 2 years of foreign language, 2-3 years of social studies or history. They should rank in the top fifth of their high school class, have strong scores on the College Board PSAT, SAT or equivalent tests and strong endorsement of their preparatory schools.

Interested persons should discuss their plans with high school counselors early in their junior (11th) year and direct further inquiries to the University Admissions Office.

Advanced Standing

Advanced placement for freshmen is granted candidates who have completed college-level courses in high school as participants in the Advanced Placement Program. Decision in each case is based on a review of the candidate's record and scores on the Advanced Placement Tests of the College Entrance Examination Board. Entrance with advanced standing can accelerate the completion of degree requirements, or it can enrich the undergraduate program with greater scope for elective or advanced courses.

Transfer students who have attended, or are attending another college or university, are required to submit official transcripts of all work completed and a statement of honorable separation from each institution attended in addition to the usual high school record and entrance examination score reports. Except in very unusual circumstances, candidates incurring academic or disciplinary dismissal from other colleges are not eligible for admission. Candidates accepted with transfer credit are classified as freshmen, sophomores, juniors, or seniors according to the number of credits accepted for transfer. Priority in transfer assignments is granted candidates seeking entry at the junior or senior level.

CLEP Examinations

Students who have developed a meaningful competence in basic subject areas may demonstrate their mastery by completing the College Level Examinations sponsored by the College Entrance Examination Board. Advanced placement and a credit allowance are based on a review of the candidate's test scores and preparatory experience.

Proficiency Examinations

Students who show evidence of advanced knowledge or who have taken "enriched" programs in high schools may be exempt from certain courses and requirements if they take departmental proficiency examinations. A student who successfully passes such an examination earns credits as well as exemption from the course.

Upperclassmen interested in taking these exams should contact their academic dean. New students may obtain further information during orientation or from their assigned adviser in University College.

Readmission

Students formerly enrolled at the University and seeking reentry may obtain applications for readmission at the Office of the Registrar.

Health Questionnaire

Every newly entering student is provided a health questionnaire from University Health Services. It is expected that these questionnaires will be completed and returned promptly. This questionnaire provides University Health Services with basic information prior to the student's arrival on campus. Questionnaires are distributed only after admission to the University and therefore play no part in the process of acceptance to the University.

New England Regional Student Program

Under the cooperative plan of the New England Board of Higher Education (NEBHE), students from other New England states are admitted to certain curriculums at the University of Rhode Island which are not offered in their own states. Certain programs at other New England state universities are open to Rhode Islanders on a reciprocal basis. In both cases students pay in-state fees. However, if the student transfers out of the program of study that qualifies under the New England Student Program, out-of-state fees will apply. Details on the operation of this program are available on request from the New England Board of Higher Education, 40 Grove Street, Wellesley, Massachusetts 02181.

Special Program for Talent Development

The University encourages the application of economically and socially disadvantaged individuals from Rhode Island and has instituted a prematriculation program designed to assist such applicants whose education is below college preparatory level. There is special financial provision for students in this program. Interested individuals should apply to Special Programs for Talent Development, 210 Ballentine Hall, as early as possible in their senior year in high school.

REGISTRATION

Registration for each semester consists of two separate procedures: registering for course selections and payment of fees. Each college determines the specific policies governing the number of credits for which a student may register each semester. These policies may be found in the chapters dealing with each college.

Students failing to complete registration procedures as outlined below, are liable for a late registration fee of $15.

Student Exchange Program

Any full-time student matriculated at one of the public institutions of higher education in Rhode Island may enroll for a maximum of seven (7) credit hours of his or her full-time schedule per semester for study at one of the other public institutions at no additional expense. Each institution will determine and maintain the integrity of the degree to be awarded. Students will be subject to the course selection process applicable at the receiving institution. Summer session and continuing education registrants are not covered under this program. At the end of each academic year, the credits awarded under this exchange will be reported to the Board of Regents.

Students interested in participating in this program should consult the Registrar's Office.

Course Selections

Students must obtain registration forms at the announced time and place. Currently enrolled students register in November for the spring semester, and in April for the fall semester. It is the student's responsibility to make an appointment with his adviser to consult about his program for the coming semester and then submit his completed forms during the registration period, according to the announced instructions.

New and transfer students will be instructed concerning registration procedures. However, most freshmen make their course selections during the two-day orientation workshop in the summer preceding their first year.

Payment of Fees

Arrangements must be made with the Bursar for complete payment of tuition and/or fees by the due date. Class programs will be issued only for those students who have registered for course selections and satisfied payment requirements with the Bursar.

Drop and Add

Students are permitted to drop courses without a fee penalty (see page 23) during the first two weeks of classes and may add courses for two additional class days beyond these two weeks. The final day to drop courses is seven weeks before the last day of classes.

It is the student's responsibility to notify the instructor and/or the department if he intends to remain enrolled. Otherwise, the seat will be assigned to another student during the subsequent days of the add period.

A student who fails to appear in any class or course section, which is enrolled to capacity and for which there is a demand for seats, may be dropped by the instructor at the end of the drop period. Notification that the student has failed to appear in class is sufficient to accomplish this.

The department chairman may, in extenuating circumstances, request the Registrar to reinstate the student.

Veterans. In accordance with Veterans Administration regulations, all students receiving veterans' benefits are required to report to the University their withdrawal from any and all courses and/or the dropping of any courses. Enrollment verification for all veterans will be made monthly and failure to report withdrawal or drop activity to the Registrar will result in a reduction or termination of veterans' benefits. Veterans are required to use the withdrawal and drop procedures established by the Registrar for all students.

Audit

A full-time student who wishes to audit a course on a formal basis, which includes his name on the class roll and a notice of audit on his official transcript, must so declare to the Registrar within the add period. This includes a course added for audit or changed from regular credit enrollment to audit.

Change of Address

It is the responsibility of the student to complete a change of address form in the Office of the Registrar whenever a change is made in his local, campus, or mailing address.

Expenses and Student Aid

Charges and fees set forth in this bulletin are subject to change without notice.

The total cost for a year of resident study at the University is about $3100 for citizens of Rhode Island and about $4150 for out-of-state residents. These figures include $200 for books and supplies, $400 for miscellaneous personal expenses, and $55 for travel.

Students commuting to the University from their homes in Rhode Island should anticipate expenses of approximately $2500 a year. This figure includes $200 for books and supplies, $900 for personal expenses and travel, and a $500 allowance for room and board at home.

All charges are payable by the semester and are due and payable on receipt of the bill. Checks or money orders should be made payable to the University of Rhode Island.

Full-time Students Pay Per Year

General Fee	$745
Memorial Union Fee	66
Student Activity Tax	29
Accident and Sickness Insurance	34
Student Health Fee	80

Students Living on Campus Add

Room Rent	$730 to $830
Board—Monday Breakfast through Friday Dinner (15 meals) *or*	715
Monday Breakfast through Sunday Noon (20 meals)	840

Out-of-State Students Add[1]

Tuition	$145

Part-time Students

Part-time students, who register for up to 11 credit hours per semester, pay an $8 registration fee each semester. Residents of Rhode Island pay $33 per credit hour, and out-of-state students pay $80.

Resident Student Status

A student who is a resident of the state of Rhode Island does not pay the tuition fee of $1145, but a student from another state or a foreign country who is in Rhode Island primarily for educational purposes, even though he remains in the state during vacation periods, is considered a non-resident and pays the $1145 tuition fee.

The parents or legal guardian of a minor student must have been residents of the state for one year immediately preceding the first class day of the first term of a student's registration for that student to claim resident student status.

[1]See page 20 for exception to this under NEBHE interstate program.

An "emancipated student" must establish the same bona fide residency for in-state tuition exemption. An emancipated student shall mean a student who has attained the age of 18 years, and whose parents have entirely surrendered the right to the care, custody and earnings of the student and who are no longer under legal obligation to support or maintain him. If any of these tests is not met, he is presumed to be an unemancipated student. A nonresident student who reaches 18 years of age while a student does not by virtue of that fact alone become a resident student.

Dependents of members of the armed forces, as well as members of the armed forces, stationed in the state on military orders are entitled to classification as resident students.

The Director of Admissions classifies each student admitted to the University as a resident or nonresident student on the basis of all relevant information available to him. A student may appeal the decision to the Board of Residence Review. The above information is merely a summary of the regulations governing student classifications for tuition purposes. The complete text of the regulations adopted by the Board of Regents may be obtained from the Office of Admissions.

New Student Fees

A nonrefundable fee of $12 must accompany each application for admission. See page 18 for application procedure.

An advance deposit of $50 is required from every accepted student. The advance deposit, which is applied on the first term bill, will be forfeited if the applicant later withdraws his name.

Students returning after an absence of one or more semesters are subject to the same application fee and advance deposit as entering freshmen.

All new students, both freshmen and transfer students, also pay a nonrefundable matriculation fee of $25.

General Fee

All students, both resident and nonresident, pay a general fee of $745 per year. This fee covers the cost of benefits enjoyed by all students such as use of library, testing services, guidance, personnel supervision, placement, athletics, etc.

Student Assessments

Each student is assessed $29 per year which is distributed by the Student Senate to support a wide variety of student programs and activities. A Memorial Union fee of $66 per year is also assessed.

Late Fees and Special Fees

A late registration fee of $15 for the first day and $5 for each succeeding day (not including Sundays or holidays) is charged unless excused by the Registrar.

Each course dropped after the conclusion of the "drop and add" period (see page 21) incurs a $5 charge unless the student withdraws from the University.

Expenses for class trips in all courses and those incident to practice teaching in vocational education courses are charged to the students concerned.

Music. Students taking performance courses in music are charged an additional fee each

semester of $20 for 0 credit, $35 for 2 credits, and $50 for 3 and 4 credits.

Transcripts

Each student is entitled to one official transcript without charge. For each additional official transcript, the charge is $2. Copies will be mailed in response to written requests only, which should be addressed to the Office of the Registrar.

Transcripts will not be issued to students who have any unpaid financial obligation to the University.

Health Service Fees

The health fee is mandatory for all full-time undergraduates, all international students, and all newly entering graduate students. The University requires that all such students be insured through the University's Student Sickness and Accident Insurance unless evidence of comparable coverage in another plan is provided. The University's plan covers a 12-month period beginning in September. The rate for 1976-77 is $34. Returning graduate students who wish to participate in the health plan must make payment to the Bursar within the first two weeks of each semester if they wish to participate. The insurance coverage provisions that are noted above also apply to those returning graduate students who participate in the health plan. Spouses of students will be eligible to participate in the health plan on an optional basis.

Refunds

Refunds of payments made or credits against amounts due to the University shall be made to students who officially withdraw according to the following scale: during the first two weeks, 80 percent; during the third week, 60 percent; during the fourth week, 40 percent; during the fifth week, 20 percent; after five weeks, none.

The attendance period in which withdrawal occurs is counted from first day of registration, and includes weekends and holidays.

Where the student claims that the application of the above policy causes extraordinary hardship, the student may apply in writing to the respective department head requesting a review of his claim. The claim will be referred to a committee made up of the Directors of Residential Life, Dining Services, Financial Aid and Health Services, and the Dean of Students. All circumstances relating to the request for a variance from the general uniform University policy must be fully documented in the written claim.

The premium for the University Student Sickness and Accident Insurance is not refundable. Coverage extends through August 31 even though the student is no longer enrolled.

Housing Rates

Following are the proposed rates for University housing for the year 1976-77. For complete information write to the Director of Residential Life, Roger Williams Commons. All rates quoted are for double rooms. For single rooms, where and when available, $50 per year is added to the double rate. Board is mandatory for students living in residence halls.

Residence Halls

$730 Adams, Barlow, Bressler, Browning, Hutchinson, Merrow, Peck, Tucker, Weldin
$780 Butterfield
$830 Aldrich, Burnside, Coddington, Dorr, Ellery, Fayerweather, Gorham, Heathman, Hopkins

Housing and Dining Contract

University housing is contracted for the *entire academic year.* A deposit of $100 is required at the time of filing application for a room in the residence hall. This deposit will be applied on the first semester bill. A cancellation of the housing application will result in a pro rata credit on the semester bill according to the following schedule: from date of deposit to June 15, $100; from June 16 to the opening of the residence halls for the academic year, $62; after that time, no refunds will be made.

All residence hall rates are quoted for the period specified in the contract. Payments are due upon receipt of the bill from the Bursar's Office. Check and money orders are payable to the University of Rhode Island. A student vacating his assigned quarters before the end of the period under contract will be held responsible for the total charges for the entire period. No refund will be given when a student moves from University quarters to a private home or decides to commute.

All students living in University residence halls are required to purchase a 15-meal contract for three meals a day, Monday through Friday, for $357.50 per semester. A 20-meal contract at $420 per semester for three meals a day, Monday through Saturday, and brunch and dinner on Sunday, is available at the student's option.

These were the rates during the academic year 1975-76. The rising cost of labor and food may require the University to increase room and board rates in 1976-77.

Dining contracts begin on registration day and expire the last day of final examinations. They apply each day on which the University schedules classes or examinations according to the meal plan purchased. Meals are not served on holidays that fall on a Monday or Friday.

Students who require diets for health reasons must have their local physician submit a request for the special diet, with the diet prescribed, to the Director of Clinical Services, University Health Services. Special diets for other than health reasons cannot be provided.

Parents and guests of students, faculty and staff members, alumni, and guests of the University may purchase guest meal tickets at the dining rooms, or may use student guest coupons from student meal books. Various meal plans are available for commuting students on a semester contract basis. Information is available at the Dining Services Office.

Meal books are issued at registration and billed according to the contract signed. Only students withdrawing from the University will receive Dining Services refunds. Please refer to scale in the preceding column.

STUDENT FINANCIAL AID

Student financial aid is awarded without regard to age, race, sex, creed, or national origin.

The primary purpose for which the University administers financial aid is to insure that a student will not be denied the opportunity to pursue higher education because of a lack of funds. All financial aid is administered on the basis of financial need. The cost of attendance at the University minus the contribution expected from the family unit determines financial need. The University subscribes to and uses the services of the College Scholarship Service.

The College Scholarship Service, through its needs analysis, considers the financial strength of the family unit and its ability to contribute toward post-secondary educational costs. The Financial Aid Office (within the limitations of its financial resources) will try to meet the financial need of all students who apply.

Due to the variety of financial aid programs, the Student Financial Aid Office determines the programs for which the student is eligible and the amounts of financial assistance which will be offered. All students with financial need will be considered for both loan and employment opportunities. Grants will be awarded only after a student has applied for a Basic Grant and has submitted a Basic Grant Student Eligibility Report to the Student Financial Aid Office.

A list of named scholarships and loans may be found on page 196.

Application Procedure

Prefreshmen, transfer students, and other entering students should obtain a Parents' Confidential Statement (PCS) from their secondary school guidance counselor or the Student Financial Aid Office at the institution they are presently attending. Married and self-supporting students should file a Student Financial Statement (SFS) obtained from the Student Financial Aid Office. The PCS must be completed and filed with College Scholarship Service, Princeton, New Jersey, by *February 1* in order to meet the filing deadline of *March 1*. The SFS must be completed and filed with the College Scholarship Service, Berkeley, California, by *February 1* in order to meet the filing deadline of *March 1*.

The University of Rhode Island Application for Financial Aid will be mailed to students accepted for admission who have filed a PCS/SFS.

Students currently enrolled obtain a Student Financial Statement (SFS) or a Parents' Confidential Statement (PCS) at the Student Financial Aid Office in accordance with procedures and deadlines published on campus.

A late fee of $4 may be charged by the University for those students who submit their PCS/SFS after the College Scholarship Service processing deadline.

University Grants-in-Aid

The University holds funds which provide grant assistance to several hundred deserving students. To be awarded a grant, a student must have demonstrated financial need and a satisfactory academic record.

University Loans

There are two emergency loan funds available to students. For amounts up to $25, a separate application may be made in the Dean of Students Office, Green Hall. For amounts above $25—maximum $100—a separate application may be made in the Student Financial Aid Office, Davis Hall. These loans are offered to students in solving emergency financial situations only. They are short-term in nature (15-90 days), and are made when there is a means of repayment. All emergency loans must be repaid by May 15.

Federal Scholarships, Grants, Loans and Employment

The Education Amendments of 1972 (PL92-318) have made substantial changes in the National Direct Student Loan, Supplemental Educational Opportunity Grants, and College Work-Study Programs and have created a new Basic Educational Opportunity Grant Program.

Federal scholarships, grants, loans, and work-study programs are available to United States citizens and permanent residents of the United States only. A student must be at least half-time and in a matriculated course of study to be eligible for any of the following programs:

Basic Educational Opportunity Grants provide up to $1400 grants to students (the amount varies each year according to federal appropriation), but not more than one-half the cost of attending the University. A separate application must be submitted.

The amount of the grant varies, depending on need and the level of federal funding. Students are urged to pick up a Basic Grant application from their guidance counselor or from their Student Financial Aid Office.

Supplemental Educational Opportunity Grants are made to students who are of exceptional

financial need and who, but for this grant, would not be financially able to pursue their courses of study.

National Direct Student Loans are made available through the University from funds received from the federal government. The actual amount of the loan is determined by the student's needs and by the amount of federal funds received by the University. No interest is charged and repayment is not expected (1) while the borrower is at least a half-time student in college or graduate school; (2) for nine months after the completion of studies; (3) for up to three years while the borrower is in the Peace Corps, VISTA, or military service. When repayment is expected, there is an interest charge of 3 percent per year. Repayment may be made over a ten-year period, if necessary; however, minimum repayment is $30 per month. There are provisions for cancelling all or part of the loan if the student performs certain types of teaching or military service in a combat zone.

Nursing Student Loan/Scholarship Program. The Nursing Student Loan Program is available to students enrolled in the College of Nursing. This loan program contains cancellation features for service as a nurse similar to that for teachers in the National Direct Student Loan Program. Federal nursing scholarships are also available to students with exceptional financial need.

Health Professions Loan/Scholarship Programs are restricted to students in the College of Pharmacy. Loans are available to all students with financial need, scholarships to those with exceptional financial need. Since the scholarship program is being phased out, awards are limited to renewals.

College Work-Study Program. The University participates in this federally-supported program which provides part-time employment during the academic year and full-time employment during vacation periods with University departments and off-campus public and non-profit, nonsectarian, nonpolitical agencies. Other institutionally funded part-time employment is available to students. A listing of these jobs is available in the Student Financial Aid Office.

State Guaranteed Student Loans provide loans to students from lending institutions in their home areas which participate in the program. Program particulars vary from state to state. Maximum amounts available per year range from $1500 (R.I. present maximum) to a possible $2500. Repayment is not expected until after graduation or after the borrower ceases to be enrolled on at least a half-time basis. There are two types of guaranteed loans.

On subsidized loans the federal government pays the 7 percent interest while the student is in school if the student is eligible under the following conditions: (1) if the family's adjusted income is less than $15,000 on loans up to $2000 per year with no needs analysis necessary, (2) if the family's adjusted income is above $15,000 and a needs analysis indicates financial need, (3) if a financial needs analysis indicates need for a loan in excess of $2000.

For veterans' benefits see p. 21.

University of Rhode Island students seeking an interest subsidy under 2 or 3 above must file a PCS/SFS.

For students who are not eligible for a subsidized loan, the 7 percent interest is paid by the student from the date the loan is made.

Student Life and Services

An enriching collegiate experience results from a wise balance of academic and extracurricular activities. The University is fortunate in its country location, which allows space and opportunity for all sorts of outdoor activities and for a homogeneous campus life. The University has a strong student government and recognizes a wide variety of student organizations which offer to every undergraduate an opportunity to pursue his or her special interests and to develop qualities of leadership, character and personality. As far as possible, these organizations are operated by students and supported from a student activities fee, voted and expended by students.

Much of the undergraduate social and recreational life centers about housing units, fraternities and sororities, and the Memorial Union. A student board of directors working with the Director of Student Activities determines policy for the Union and plans a full program of social, cultural, intellectual and recreational activities.

Upon registration at the University of Rhode Island, a student automatically becomes a member of the University community with all the rights, privileges, and responsibilities that go with membership. Such rights and privileges include full use of the educational opportunities offered, the extensive physical facilities found on the campus, the opportunity to belong to student organizations, and to participate in social, recreational, cultural and spiritual activities, and the privilege of making decisions within the scope of the University's goals as an educational institution. As in any democracy, these rights and privileges are accompanied by responsibilities: the responsibilities to progress educationally, to respect the rights of others, and to know and obey the rules and regulations developed by the University community for the good of the total membership.

Rules and regulations for undergraduate students are explained in full in RAMPAGES, the student handbook, available in the Dean of Students Office or the Student Senate Office.

Confidentiality of Student Records

Procedures for the release and disclosure of student records maintained by the University are in large measure governed by state and federal laws. Where the law is silent, the University is guided by the principle that the privacy of an individual is of great weight and that as much information in a student's files as possible should be disclosed to the student upon request. A current or former University of Rhode Island student has the right to inspect and

review official records, files and data directly related to that student. This right does not extend to applicants, those denied admission to the University or those who were admitted but did not enroll.

Some records not available to students are: letters of recommendation obtained or prepared before January 1, 1975; employment records of students as University employees; clinical, medical, counseling or psychiatric records; parents' financial aid records and campus law enforcement records.

A student may challenge the factual and objective elements of the content of student records, but not the qualitative and subjective elements of grading. If the student objects to certain items included in his or her personal records, a grievance procedure has been established. Ultimately, a Hearing Board on Student Confidential Records could render a decision.

Third parties do not have access to personally identifiable records or information pertaining to students without the written consent of students who specify that the records be released. Parents are considered third parties.

Detailed guidelines for the release and disclosure of information from student records are available from the Dean of Students Office. These guidelines comply with the legal requirements of the Family Educational Rights and Privacy Act of 1974.

Dean of Students Office

The Dean of Students staff is concerned with the total educational experience students have on the campus. Programs and services are developed according to a continuing assessment of student needs in such areas as fraternity and sorority life, international student affairs, commuter affairs, new student orientation and student government. The staff is available to consult with students regarding academic, social, personal and living problems. A Veterans Administration representative is located in the Dean of Students Office to handle veterans' educational and financial needs.

New Student Orientation. All students who have received official notice of admission as freshmen are expected to attend a two-day summer orientation workshop where they learn what they can expect from the University and what the University expects from them.

During the two days students, working in small groups, plan their academic programs, learn registration procedures and register for fall classes, make new friends, discuss student life and become oriented to campus facilities and resources. The workshop staff are upperclass students who work under the supervision of the Dean of Students Office.

Students transferring to the University from another institution are invited to orientation programs planned especially to meet their needs. These programs are offered prior to the spring semester for students entering the University in January, and in the late spring and early summer for transfers enrolling in the fall.

Transfer orientation programs are sponsored by the Dean of Students Transfer Office, and coordinated and carried out by University students.

Project 70 is an innovative educational program. A living-learning community is developed within a residence hall and students integrate residence hall life with intellectual pursuits. A number of accredited courses are taught in the living unit each semester. The class atmosphere is informal with small group discussions and close student-teacher relationships. Classes are combined with planned social and cultural events. All programs are organized by the students and they change according to student involvement.

International Students

The Director for International Student Affairs consults with and advises foreign students and exchange visitor faculty on academic, financial, housing, and social problems. All communications from foreign students concerning applications for admission to undergraduate or graduate programs are handled by the office. Information concerning United States laws and regulations governing non-immigrant visas, including employment practices, is available from the office.

Counseling Center

The Counseling Center assists students to promote positive growth and development and to clarify any problem, decision, or other situations difficult to resolve alone. Three categories of service are: direct services, human development programs and preventive strategies. Student participation is entirely voluntary.

The staff is made up of counselors, psychologists, psychiatrists and educational specialists who have a wide variety of experience working with college students both individually and in groups. Students may discuss with them, freely and in confidence, their feelings, problems or interests, such as educational and vocational decisions, study skills and personal conflicts. Counseling services include individual counseling, group

counseling, life skills and life theme workshops, self-help services, testing or test information, and consultation.

Career Planning and Placement

The Office of Career Planning and Placement offers a program to help students to understand themselves, to understand the relationship between academic and vocational choices, to discover and develop alternatives, and finally to help them make the transition from the world of education to the world of work. It provides for counseling individually, in groups and in career seminars and workshops. The reference library includes information on careers and career development, employers and employment and graduate school. The office schedules on-campus interviews, and makes referrals and other employer listings available to all registrants including alumni.

Health

The University Health Services, located in the Potter Building, provides health services to all students who have paid the health fee. Services include outpatient care, limited emergency services, special clinics in gynecology, birth control, vaginitis, urology, internal medicine, surgery, wart removal, allergy, nutrition, and mental health. There are laboratory, X-ray and pharmacy facilities. Those who have allergies can receive allergy injections provided the vaccines are supplied.

Potter Building is staffed 24 hours a day by registered nurses and by physicians on weekdays from 9 a.m. to 5 p.m. On-call medical service is available for emergencies during hours when the physician is not on duty.

Services not provided at the Potter Building, including consultations in various specialties and hospital care, are available in the local community. All medical expenses incurred outside the University's Health Services are the responsibility of the student. Students who choose their own private physician must assume responsibility for expenses incurred.

Housing

Residence halls and boarding facilities are available to students during both the regular academic year and the Summer Session. There are 19 residence halls on the campus offering a variety of living accommodations including coeducational housing.

Undergraduate study-bedrooms are furnished with desks, chairs, dressers, drapes, and single beds. Automatic laundry facilities are available in each residence hall.

Students registering for rooms in the residence halls will have their applications filled in order of receipt. Room assignments will be made to the extent of facilities, and roommate requests will be granted when possible. For rates and contracts, see page 25.

Applications for all University housing should be made to the Director of Residential Life.

Dining

The three University dining rooms are operated basically for the convenience of resident students, and provide wholesome food well served at reasonable prices. All students living in a University dormitory are required to take meals in a University dining room. For rates and contracts, see page 25. Parents and guests of students, faculty and staff members, alumni, and guests of the University may be served in the dining halls, the Memorial Union, or the Faculty Center.

Commuting and Alternate Living Styles

About 40 percent of undergraduate students commute to classes from home or from off-campus housing. If circumstances require an occasional overnight stay, they may use the commuters' hostel at the edge of the campus.

Juniors and seniors at the University often choose to move off campus and live "down-the-line." Down-the-line refers to communities within a ten-mile radius of the campus where summer homes are rented to students for the school year. Typically, a student will pay approximately $55 a month, plus utilities, for each bedroom in a furnished house.

The majority of winter residents in these down-the-line summer communities are

students and they patronize nearby supermarkets, laundromats, restaurants, shopping centers and recreational facilities. Many commute by car-pool or bus.

Memorial Union/Student Activities

The Union building, which is a memorial to the men of the University who died in two world wars, houses a wide variety of services designed to provide a broad social, cultural, intellectual and recreational program. These include meeting rooms, lounges, bowling lanes, TV viewing room, video studio, offices for student organizations and chaplains, the University Bookstore, a restaurant, cafeteria, snack bar, pub, private dining rooms, ballroom and party room.

Services provided include an activities desk, barber shop, bank, travel agency, and record and art print libraries. Student cooperatives under the direction of the Kingston Student Services include a record shop, photography lab, youth hostel, housing directory and book exchange. Substantial commuter facilities accommodate the needs of non-resident students.

The Office of Student Activities, located in the Union building, is responsible for scheduling nonacademic activities on the campus and advising and assisting student organizations. The major emphasis of the professional staff is on a creative learning experience for the students.

Lectures and Arts Programs

Lectures and arts programs are presented throughout the year to enrich the more formal academic program of the University. Lectures of general and specialized interest are presented by visiting scholars. The Arts Council, on which faculty, students, and administration are represented, plans programs that include music and dance concerts, film programs, and theatre presentations. Student organizations sponsor a popular entertainment series and bring speakers of national or international prominence to campus. These are supported by student funds.

Religion

The University encourages the practice of religion on campus and gives the widest latitude to all creeds and religious beliefs. University chaplains and religious advisers of various faiths are available, as are facilities for religious services. In addition to offices and facilities in the Memorial Union, the Roman Catholic Center, the Episcopal Center and the Hillel Center are open to all members of the University community. Synagogues and churches of various denominations in the area welcome students to their services.

Religious organizations meet for worship and study, and sponsor other activities throughout the academic year.

Student Government

The Student Senate is a legislative body which represents the students to the administration and faculty and supervises extracurricular activities. It also distributes the activities tax among the various student organizations through its tax committee.

The Undergraduate Judicial Board hears alleged violations of student rules and regulations. More serious violations are handled by the Student Conduct and Scholastic Integrity Board which includes students and faculty members. If a student wishes to appeal his case, he may do so

to the higher Appeal Board on Student Conduct and Scholastic Integrity. All disciplinary action is considered confidential.

Individual residence halls form their own governments which establish and enforce rules within University guidelines.

The Interfraternity Council supervises fraternity affairs and passes regulations governing fraternity life. The Panhellenic Council does the same thing for sororities.

The Commuters Association is an organization that provides programs and assistance to commuter students.

Honor Societies

The University has chapters of a number of national honor societies, election to which is a recognition of accomplishment. The Society of the Sigma Xi is the scientific honor society and Phi Kappa Phi is the honor society for general scholarship. Mortar Board recognizes scholarship and leadership. In more specialized areas are the following: Alpha Kappa Delta (sociology), Alpha Zeta (agriculture), Beta Gamma Sigma (business), Kappa Delta Pi (education), Lambda Tau (medical technology), Omicron Delta Epsilon (economics), Omicron Nu (home economics), Phi Alpha Theta (history), Phi Sigma (biological science), Pi Delta Phi (French), Pi Mu Epsilon (mathematics), Pi Sigma Alpha (political science), Rho Chi (pharmacy), Sigma Delta Pi (Spanish), Sigma Pi Sigma (physics), and Tau Beta Pi (engineering).

Fraternities and Sororities

There are approximately 1400 fraternity and sorority members living either in University residence halls or in the 22 houses privately owned by alumni corporations. The organizations are service as well as social groups serving the University and individual fraternity and sorority members by promoting scholarship, citizenship and small-group living. Within the last ten years, ten new houses have been built in a newly opened section of the campus.

The fraternities, all of which are nationally affiliated, are Alpha Epsilon Pi, Chi Phi, Lambda Chi Alpha, Phi Gamma Delta, Phi Kappa Psi, Phi Mu Delta, Phi Sigma Kappa, Sigma Alpha Epsilon, Sigma Chi, Sigma Nu, Sigma Phi Epsilon, Sigma Pi, Tau Epsilon Phi, Tau Kappa Epsilon, Theta Chi, Theta Delta Chi, and Zeta Beta Tau.

The sororities, all nationally affiliated, are Alpha Chi Omega, Alpha Delta Pi, Alpha Xi Delta, Chi Omega, Delta Delta Delta, Delta Zeta, Phi Sigma Sigma, Sigma Delta Tau, and Sigma Kappa.

Athletics

The University offers an extensive program of athletics, sufficiently varied to provide an opportunity for every student to participate. The Tootell Physical Education Center for men and women has three pools, and a swimming program for recreation and competition is being developed.

Men's intercollegiate teams participate in baseball, basketball, football, golf, riflery, sailing, soccer, swimming, tennis, track and wrestling.

In addition to membership in the New England Conference of State Universities (Yankee Conference), the University holds membership in the National Collegiate Athletic Association and the Eastern College Athletic Conference.

The women's intercollegiate teams participate in basketball, fencing, field hockey, gymnastics, lacrosse, softball, swimming, fall and spring tennis, and volleyball. Membership in the Association of Intercollegiate Athletics for Women, the Eastern Association of Intercollegiate Athletics for Women, two women's affiliate associations of the Amateur Fencing League of America, and the college division of the United States Field Hockey Association, give the opportunity for several teams to attend regional and national tournaments. The expansion of women's athletic programs provides increased opportunities for a high level of competition for exceptional female athletes.

Intramural programs for men and women combine the values of competitive athletics and informal sports, and are in operation all year.

Those with sports interests may join the several clubs identified with particular sports.

Other Organizations

In addition to intercollegiate athletic teams, a number of organizations represent the University in competition, exhibitions, and public performances. The University Band, Chorus, and Orchestra are under music department direction, and students may receive credit for participation in any one of these. The University Theatre, under theatre department direction, presents several plays each year. The URI Debate Council is directed by members of the speech department and participates in intercollegiate debates. The Cheerleaders are active at varsity football and basketball games and rallies.

On campus there are about 30 professional organizations related to the students' academic interests and concentration areas and there are a number of groups serving social, recreational, cultural and political interests.

Students publish a semi-weekly newspaper, a yearbook, and a literary publication and operate WRIU, a campus radio station.

University College

Bernice Lott, *Dean*
Alice D. Gross, *Assistant to the Dean*

All entering students are enrolled in University College except those students in special two-year programs such as Dental Hygiene and Commercial Fisheries and registered nurses wishing to earn a bachelor's degree.

University College grants no degrees but offers all incoming students an opportunity to explore the variety of courses and programs open to them at the University before committing themselves to one program of concentration in a degree-granting college. Those students who have a clear educational or professional objective when they enter the University are encouraged to pursue that objective as directly and rapidly as possible.

The University College experience is based on a strong academic advising program. Advisers, who have regular office hours at the College, are drawn from the faculties of each of the degree-granting colleges. Each student has an adviser chosen from a subject area in which interest has been expressed. All students are assisted by their advisers to select courses of study that will satisfy the entrance requirements of the degree-granting college and curriculum of their choice.

When students have completed at least 45 credit hours and have met the course requirements of the curriculum they wish to pursue, they may transfer into a degree-granting college. It is the responsibility of University College to advise students of specific courses required for transfer. No degree-granting college may require a quality point average higher than 2.0.

In the few cases where enough space may not be available the students who show promise of high academic success in a particular program will be accepted first and wherever possible adjustments will be made in staff and facilities to accommodate the remaining students. Those students who cannot be admitted to the program of their first choice may enter another college or program for which they are qualified or spend additional time in University College preparing to meet the entrance requirements of another program.

Advanced Placement and Transfer Students

Students admitted to the University from an advanced placement program in high school must complete a minimum of 45 credit-hours in University College including their advanced placement credits. Students from other institutions who are transferring to the University of Rhode Island with less than 45 credits will first enter the University College. If they have earned 45 transfer credits and have met all the requirements for admission to a specific degree-granting college at the University, they may be admitted directly to that college, or they may elect to enter University College providing not more than 60 transfer credits are offered.

Requirements for admission with advanced standing are described on page 19.

College of Arts and Sciences

Barry A. Marks, *Dean*
Margaret D. Robb, *Associate Dean*
Gerry S. Tyler, *Assistant Dean*
Edward G. Benson, *Assistant Dean*

The objective of the College of Arts and Sciences is to enable students to understand our intellectual and spiritual heritage, the physical and biological world in which we live, and man's social, economic, and political development. Beyond this, the College provides several programs of professional training and a strong foundation for graduate study. In all its functions the College is dedicated to fostering a spirit of inquiry and independent thought. Emphasis is placed upon intellectual growth and the deep satisfaction derived from knowledge for its own sake.

The College has programs of study leading to the following degrees: *Bachelor of Arts*, *Bachelor of Science*, *Bachelor of Fine Arts*, and *Bachelor of Music*. The Department of Dental Hygiene provides programs leading to both the *Bachelor of Science* and the *Associate in Science* degrees.

For information about pre-professional preparation, see page 12.

HONORS PROGRAMS

Comprehensive honors programs are available for especially qualified junior and senior students. Eligibility depends on the quality of academic achievement during the previous two years. Qualified students may assist in research projects related to their major interests, enjoy graduate student privileges from the University libraries, and take graduate courses during their senior year. Honors programs are available in anthropology, biology, botany, chemistry, economics, education, English, geography, geology, history, journalism, languages, mathematics, microbiology, music, philosophy, physical education, physics, political science, psychology, sociology, speech and zoology.

Curriculums

Distribution Requirements

The 45 distribution credits are earned in Division A, humanities; Division B, natural sciences and mathematics; Division C, social sciences. At the student's option, 18 credits are taken in one of the divisions, 15 in another and 12 in a third.

The fourth area, Division D, communications, is optional. A student may take up to nine credits in Division D as part of the 45-credit total, but may not reduce any other divisional requirement by more than three credits.

Within each of the four divisions, no more than two courses may be taken for distribution credit in one department (discipline) or subject matter area.

To eliminate academic loads above the degree requirements, students in the advanced ROTC program may, with the approval of the dean of the college, apply a maximum of six credits of military science courses to reduce the distribution requirements.

Courses offered in the student's concentration department may not be used for distribution credits, except that students presenting a double concentration may apply courses from one concentration towards the College distribution requirements.

The student must maintain a 2.0 quality point average (QPA) in his concentration to meet graduation requirements. One half of the total number of credits needed in a given concentration must be earned at the University of Rhode Island.

Curricular Modifications

In exceptional cases, and subject to the approval of their department and of the dean, students may modify any curricular requirement except those for distribution, course level, minimum grade point average, and total credits. These may be modified only by the appropriate committees of the College.

Area of Interest — Optional

Students may elect to declare an area of in-

terest which will appear on their transcripts as a category separate from their concentrations. Credits may be drawn from any combination of concentration, distribution, electives, and course-level categories. An area of interest may be defined as (1) the completion of 18 or more credits offered within a department and approved by the department chairperson, or (2) the completion of 18 or more credits of related studies offered by more than one department and approved by a member of the faculty competent in the area of interest and the dean of the College.

Examples of such interdisciplinary areas of interest are Child Psychology, Public Relations, Renaissance Civilization and Women's Studies. It is the responsibility of the student to declare his or her area of interest no later than the beginning of the semester he or she expects to graduate. Students need not declare an area of interest.

Electives

The student will elect courses sufficient in credits to complete the 120 required for graduation. Courses may be taken in any college of the University.

Bachelor of Arts

The Bachelor of Arts curriculums provide a general cultural background and an opportunity for the student to concentrate in any one of 30 fields of study.

Curriculum Requirements

Each candidate for a Bachelor of Arts degree must meet certain minimum curriculum requirements having to do with quantity and quality. These requirements include the completion of at least 120 passed credits averaging, at graduation, C or better. On the University's grading system, that represents a cumulative quality-point average of 2.0 or higher. Of the 120 passed credits, at least 42 must be in upper-level courses, numbered 300 or above.

In addition to meeting the College distribution requirements, each candidate must complete a concentration and a number of elective courses. Except for elementary education, which requires 33 credits, the concentration totals 27 to 30 credits.

B.A. Concentration

The concentration is the discipline or subject area in which the degree is granted. It may include not only required courses within the concentration department but also courses in related subjects offered by the student or required by the department. The student should declare this concentration before the end of the fourth semester.

The concentration (with the exception of elementary teacher education) comprises no fewer than 27 nor more than 30 credits. These, however, are exclusive of any credits outside the concentration department but which may be required by that department as prerequisites. Including such prerequisites, the concentration may not exceed 36 credits.

The student may earn up to 45 credits in course work offered by the concentration department, counting as electives those credits earned in excess of the concentration requirements. Any credits in excess of 45 earned in the concentration department increase correspondingly the minimum number of credits required for graduation.

Concentration areas include: Anthropology, Art (history and studio), Biology, Chemistry, Classical Studies, Economics, Education (elementary and secondary), English, French, Geography, Geology, German, History, Italian, Journalism, Latin American Studies, Linguistics, Mathematics, Music, Philosophy, Physics, Political Science, Psychology, Russian, Sociology, Spanish, Speech, Theatre, Urban Affairs (personality and culture, policy formation, and spatial development).

Modified Concentration

In consultation with his adviser, and with the approval of the dean, a student may be permitted to modify the normal requirements of the department in which he is concentrating. With such approval, the program, consisting of no fewer than 27 nor more than 30 credits, will constitute the student's concentration.

Bachelor of Science

The Bachelor of Science curriculums are professionally oriented and, in general, meet the accreditation standards of national professional associations.

Curriculum Requirements

The general curriculum for the Bachelor of Science degree consists of the College distribution requirements, 12 credits of free electives, and a major of 30-45[1] credits within a department. In addition, a department may require for its concentration certain courses in other

[1]The student concentrating in chemistry, for ACS accreditation purposes, will be allowed 48 credits.

departments, with the stipulation that this will not preclude their application to the distribution requirements. Courses in the concentration department cannot be used to satisfy the distribution requirements. No more than 130 credits can be required in a program.

Each concentration within the B.S. curriculum has certain more specific requirements, as given on the following pages. These changes became effective in September 1970 and students previously enrolled in a B.S. curriculum may choose to fulfill the requirements under which they entered or to come under the new requirements.

Concentration areas include: Botany, Chemistry, Computer Science, Dental Hygiene, Geology, Mathematics, Medical Technology, Microbiology, Physical Education, Physics, Zoology.

Bachelor of Fine Arts

The curriculums provide the opportunity to discover and develop creative capacities in the fine arts. The emphasis is on richness of program and quality of experience rather than the development of isolated skills. Applicants registering for work toward the Bachelor of Fine Arts degree must receive permission of their concentration department. Students concentrating in art and in theatre specializing in scene design must submit portfolios. Theatre students who wish to specialize in acting must arrange for an audition with the Department of Theatre. Others must arrange for an interview with a departmental representative. Further details and appointments may be obtained through the University Admissions Office.

Curriculum Requirements

All candidates for the Bachelor of Fine Arts degree are required to select and pass 45 credits in distribution.

Concentration areas include: Art, Theatre.

Bachelor of Music

The Bachelor of Music degree is designed to prepare qualified students for careers in the field of music. The student may select one of seven areas of concentration dependent upon his aims and abilities.

Concentration areas include: Classical Guitar, Voice, Piano or Organ, Orchestral Instrument, Music History and Literature, Theory and Composition, Music Education.

All areas provide for a good background in academic subjects and each curriculum contains basic courses for the development of sound musicianship. An audition conducted by members of the music department staff is required for permission to register for work toward the Bachelor of Music degree.

Concentration in the music education curriculum includes courses in educational psychology, methods, and a teaching internship which leads to state certification for teachers.

The total number of credits for graduation is 125 (126 for music education majors).

Curriculum Requirements

All candidates for the Bachelor of Music degree are required to select and pass 45 credits in distribution.

Students concentrating in music education may include six credits in music to meet Division A requirements, and three credits in psychology and six credits in education to meet Division C requirements.

Students are encouraged to attend department-sponsored events each semester.

Associate in Science

The Department of Dental Hygiene offers a two-year program leading to the Associate in Science degree. The student in this curriculum is not required to meet distribution requirements but must complete 71 credit hours in a prescribed program outlined in the department offerings.

Anthropology

The Department of Sociology and Anthropology offers the degree of bachelor of arts (B.A.) in anthropology.

Faculty: Professor Bouvier, *chairman;* Professor Poggie; Assistant Professors Lynch, Loy, Pollnack and Turnbaugh; Instructor Guthrie.

anthropology must complete APG 401 (3) and 402 (3). The remaining 9 credits may be selected from course offerings in anthropology.

The recommended first course within each sub-discipline is numbered at the 200-level. These 200-level courses then serve as prerequisites for upper division courses in the sub-disciplines. Prerequisites for any course can be waived with the instructor's approval.

It is strongly recommended, but not required, that anthropology majors take at least one course in statistics and a foreign language up to the intermediate level.

Art

The Department of Art offers a bachelor of arts (B.A.) degree with a concentration in either art history or art studio and a bachelor of fine arts (B.F.A.) degree in studio.

An additional 6 credits must be selected from ART 213, 314, 221, 322, 231, 332, 233, 334, 243, 344. These credits may be taken in the same subject or in two different subjects.

An additional 6 credits must be selected from ART 403, 404, 405, 406.

ART 120 may not be counted toward degree requirements if ART 251 and 252 have been previously completed. A minimum of 9 credits of non-studio study in art is required. It is recommended that art majors elect at least 3 credits in the allied fields of music or theatre.

BACHELOR OF FINE ARTS

An additional 15 credits must be selected from studio courses numbered below 400.

ART 120 is required of all students and an additional 6 credits must be selected in art history. Students anticipating graduate study in art should note that some graduate schools require 12 credits in art history for entrance.

Outstanding entering students may, upon recommendation of their adviser and approval of the art faculty, be excused from certain required 100 and 200 level art courses and substitute upper level courses for those credits.

Student work accomplished as part of a course may, with the consent of the student, be retained by the Department of Art for teaching or exhibition purposes. When this work is no longer needed, the student will be notified. After notification, the work must be reclaimed within 60 days. Student works selected by the art faculty for inclusion in the permanent collection of the University may be purchased through negotiations with the student.

Students enrolled in the B.F.A program may use the electives remaining after completion of the distribution and concentration requirements to increase their credits in art without increasing total graduation requirements.

A total of 120 credits is required for graduation, distributed as follows: distribution requirements (45), major requirements in studio (39) and art history including ART 120 (9), electives (27).

In both curriculums, students must complete PSY 113 and 232.

The Department also offers sufficient courses to allow a student to complete an area of interest. Students should consult the department chairman or an education adviser in University College.

The following courses are required in the professional sequence: EDC 102 or 103 (3), 312 or 313 (3), 372 (3), 484 (12) and 485 (3).

In addition, secondary education students will take EDC 430; elementary education students will take EDC 329 and 427, 428.

All students in education will, in cooperation with their advisers, develop a 27-30 credit sequence of courses to meet the teacher certification requirement for competence in a subject area. Students may apply to the department from University College upon completion of their third semester or after 45 credits, whichever is later. University College students should consult with the education adviser as early as possible for further information, since spaces in programs are limited.

After admission to the department, all students must maintain an average of at least 2.20, and attain a grade of at least C in EDC 430 or 427 and 428 to be eligible for student teaching. Failure to meet these two conditions will lead to automatic dismissal from the program.

This curriculum is designed as a basic foundation in the earth sciences. It offers preparation for further work in areas such as sedimentology, coastal geology, petrology, geochemistry, geophysics, paleontology, paleoecology, mineral and energy resources, engineering geology, environmental geology and oceanography.

An emphasis in marine geology is possible by taking, in addition to marine-oriented geology courses, approved geology-related courses offered by the Graduate School of Oceanography and the Department of Ocean Engineering as science electives. Information about this and other similar options can be obtained from the chairman of the department.

Students concentrating in geology should note the requirement for field experience. An ap-

proved summer field camp for a minimum of 4 credits normally is undertaken following the junior year and related costs are the responsibility of the student. Minimum background for field camp normally includes GEL 320, 370 and 450. (Field camp is not required under the B.A. curriculum.)

BACHELOR OF SCIENCE

Students in this curriculum may follow the four-year general program in mathematics or select the option in applied mathematics during the junior and senior years.

The general program is designed to include the basic theories and techniques of mathematics. The required courses introduce the student to the principal areas of mathematics, and they provide a foundation for advanced study at the graduate level.

The applied mathematics option is intended for the student who anticipates a career as an applied mathematician or mathematical consultant with an organization such as an industrial or engineering firm or a research laboratory. The student learns the mathematical ideas and techniques most often encountered in such work, and is trained to solve mathematical problems. Although a theoretical foundation is developed, the emphasis is practical.

The following courses, totaling 12 credits, are required for students in both the general program and the option in applied mathematics: MTH 141, 142, 215, 243. These courses normally should be taken in the freshman and sophomore years. MTH 107, 108 and 109 are *not* open to students majoring in mathematics.

A student selecting the general program must complete, in addition to the courses listed above, 27 credits in mathematics, including MTH 316, 335, 336, 425, 462. Furthermore, the student in the general program must complete a minor concentration of 18 or more credits in one of the

following four areas: Biological Sciences (biology, botany, microbiology, zoology); Physical Sciences (astronomy, chemistry, geology, physics); Social Sciences (economics, geography, political science, psychology, sociology); Computer Science. Six credits in computer science may be counted toward the minor concentration in any of the first three areas. The program must include PHY 213, 285, and 214, 286.

Students selecting the applied mathematics option must complete, in addition to the 12 credits listed above, 30 credits as follows: MTH 437, 438, CSC 201, and 410 (12); 9 additional credits selected from MTH 143, 217, 244, 335, 418, 441, 444, 451, 452, 462, 471, 472; and 9 additional credits[8] from CSC 411, 413, ELE 210, EST 409, IDE 432, 433, MCE 162, 263, MGS 365, 366, 375, 445, PHY 213-285, 214-286, 322.

A total of 130 credits is required for graduation.

Medical Technology

This curriculum, leading to the bachelor of science (B.S.) degree, prepares men and women for work in a hospital or other medical laboratory. During the first three years, the emphasis is on general education and basic courses in biology, chemistry, mathematics, and physics necessary as background in the applied sciences. The senior year is a 12-month course of study and is taken in a hospital school of medical technology. This clinical program includes didactic and laboratory instruction in the various areas of medical technology and prepares the student for the national examination given by the Board of Registry of the American Society of Clinical Pathologists.

Applicants to this curriculum must have completed 65 credits by June of the sophomore year and have taken all courses listed below for the first two years of the curriculum. Students are selected for the clinical program by the staffs of affiliated hospital schools of medical technology during the junior year. Although acceptance into a hospital school cannot be assured, every effort is made to place students in this final year of instruction. Flexibility in the curriculum permits the student who is not accepted to fulfill requirements for the Bachelor of Science degree in another concentration such as microbiology, zoology, or certain related health sciences.

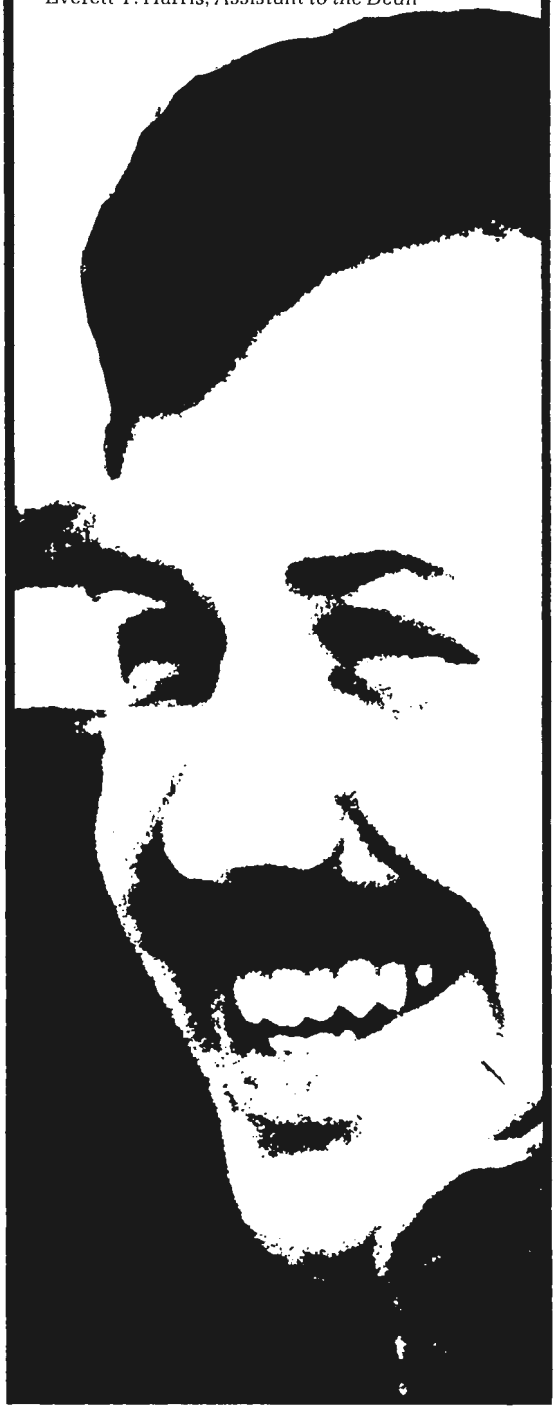
College of Business Administration

Richard R. Weeks, *Dean*
Eugene M. Johnson, *Associate Dean*
Everett T. Harris, *Assistant to the Dean*



The twelve curriculums in the College of Business Administration allow the student to develop competence in a special field of interest and prepare him to meet the changing complexities of life and leadership in the business community. Curriculums are offered in accounting with possible emphasis on governmental, private, and public accounting; business education; business education with an option in distributive education; finance; general business administration; insurance; management science; marketing; office administration; organizational management and industrial relations; operations management; real estate; and urban business.

Basic courses required of all undergraduates at the University introduce the student to the humanities, social sciences, physical and biological sciences, and the arts, which are becoming more and more important for success in the business world. The business curriculums develop the student's professional capabilities through a broad group of business courses with specialization in one area of study. Business programs provide a strong foundation in accounting, computer science, marketing, organizational management and industrial relations, production and operations management, and statistics. The College is strengthening its emphasis on the behavioral studies and computer technology to meet the needs of the business community and society as a whole. Emphasis is placed upon the total business environment as a part of the national and world economic structure. In all areas of learning, theory as well as analysis and decision-making is stressed.

Due to limited staff and facilities, transfers from University College to the undergraduate degree programs in business administration must be limited. Although cumulative averages are not the sole criteria for admission, those with overall quality point averages of less than 2.2 are advised that there is little chance for admission to these programs.

Ordinarily students must take required business courses at the University of Rhode Island. Those who expect to obtain a degree from this University must obtain prior approval to take work at other institutions.

The College of Business Administration is a professional school and has divided its courses into lower and upper divisions. The lower division courses constitute those taught in the freshman and sophomore years; the upper division, those taught in the junior and senior years. Junior college transfer credits may be applied to upper division courses only after a proficiency examination.

A student enrolled in the College of Business Administration must complete the curriculum in one of the major areas of concentration and must

obtain an average of 2.0 points or better in all required courses in his major area of concentration. Each student selects his major area of study by the second semester of his sophomore year.

All 500- and 600-level courses offered by departments in the College of Business Administration are open to matriculated graduate students only.

Organizational Management, Industrial Relations

The Department of Organizational Management and Industrial Relations offers a curriculum leading toward the bachelor of science (B.S.) degree. The master of business administration (M.B.A.) degree with an opportunity for specialization in organizational management and industrial relations is described in the *Graduate School Bulletin.*

This curriculum is intended to provide the student with a background in the conceptual, analytical, and applied aspects of the management of organizations. The areas of study focus upon decision-making from the perspective of the policy sciences. Courses tend to cluster in the areas of behavioral science, including organizational theory, business law, general business administration and policy, and industrial and labor relations. Courses are carefully integrated to include an overall introduction to business administration, with a number of complementary areas of study in organizational theory and behavior, the management of human resources, industrial and labor relations, personnel administration, general business administration, and business law.

Careers in business, government, hospital, and other organizations are open to students who have successfully completed the curriculum. These studies also provide a good background for graduate programs in management.

The Department of Management Science offers a curriculum in production and operations management leading to the bachelor of science (B.S.) degree. The master of business administration (M.B.A.) degree with an opportunity for specialization in production and operations management is described in the *Graduate School Bulletin.*

Issues, concepts and techniques encountered in efficiently managing the modern production function in industry and business are the main concerns of this curriculum. The modern production function is here defined in a wider sense, to include all kinds of operations which employ men and machines to produce visible goods as well as to render intangible services. A basic understanding of the management task of design and evaluation of the possible alternative operations and process are emphasized. Practice and implications of computer-based systems and operations in management are also investigated.

Specific topics discussed include assignment of facilities; product research and development; control of quality and quantity; design of operations and processes; aggregate planning of employment, inventory and production; budget and cost analysis; capital costs and investment criteria; information and material flows; evaluation of system performance.

College of Engineering

Lewis D. Conta, *Dean*
Robert H. Goff, *Associate Dean*

The College of Engineering offers to undergraduate men and women curriculums in biomedical electronic, chemical, civil, computer electronic, electrical, industrial, and mechanical engineering, engineering science, chemical and ocean engineering, mechanical and ocean engineering, and urban engineering. Because the same fundamental concepts underlie all branches of engineering, the freshman year courses are essentially the same for all curriculums, and the choice of a specific branch of engineering is generally delayed until the beginning of either the second term, or the second year of study. Students choosing one of the curriculums that include ocean engineering follow the curriculums for chemical or mechanical engineering for three years and choose the ocean engineering segment in the senior year.

All of the engineering curriculums are based on an intense study of mathematics and the basic sciences, and of the engineering sciences common to all branches of the profession. On this base is built the specific study in depth of the important principles and concepts of each separate discipline. These principles are applied to the understanding and solution of problems of current interest and importance in the field. Each curriculum is designed to provide the knowledge and ability necessary for practice as a professional engineer, or for successful graduate study, which may include law, business administration or medicine as well as the normal engineering and science disciplines.

The goal of the College is to stimulate the students to become creative responsible engineers, aware of the social implications of their work, and flexible enough to accommodate to the rapid changes taking place in all branches of engineering. Engineers from all fields are heavily involved in the solution of technological and socio-technological problems. The needs of industry are for balanced teams of both men and women from the different engineering areas.

Engineering students, in common with all other students in the University, must meet the University's general education requirements listed on page 10 of this catalog. In these courses students are exposed to and challenged by concepts from the humanities and social sciences to insure that the social relevance of their engineering activities will never be forgotten.

Students who have decided to major in engineering should select courses in general chemistry, natural sciences, general education electives, MTH 141, 142; EGR 101, 102; and either MCE 161, 162 or PHY 213 and 285. Specific requirements are listed for the freshman year in each of the curriculums that follow.

Students who are undecided about engineer-

ing, but who wish to keep it open as an option should take note that MTH 141 and 142, MCE 161 or 162 or PHY 213 and 285, and two courses in the natural sciences, one of which should be chemistry, are required for graduation from the College of Engineering, and are prerequisites for many engineering courses. They normally must be taken at an early state, preferably before transferring from University College to the College of Engineering. Students who have not taken them before entering the College of Engineering must confer with an engineering adviser to work out a program for completing all degree requirements. In such cases completion of graduation requirements may take somewhat longer than the normal time.

Biomedical Electronics Engineering

The bachelor of science (B.S.) degree in biomedical electronics engineering is offered by the Department of Electrical Engineering. Specialization in biomedical engineering is also available within the master of science (M.S.) and doctor of philosophy (Ph.D.) programs in electrical engineering, described in the *Graduate School Bulletin*.

Faculty: Associate Professor Jaron, *coordinator*. Assistant Professor Ohley; Adjunct Professor Karlson; Adjunct Assistant Professors Cooper and Most; electrical engineering faculty.

Biomedical engineers design medical instruments such as electrocardiographs, electroencephalographs, blood analyzers and X-ray machines used for diagnosis of disease; equipment such as radiotherapy machines, pacemakers and lasers for surgery, and develop artificial organs. They design computer systems to help physicians monitor critically ill patients, to correlate a multitude of disease symptoms in order to diagnose a disease, and to determine the best course of treatment.

Biomedical engineers are employed in (1) the medical instrument industry, where they design, manufacture, sell and service medical equipment; (2) hospitals, which employ engineers in increasing numbers to select, evaluate and maintain complex medical equipment and to train the hospital staff in their use, and (3) medical and biological research centers, which use the specialized training of the biomedical engineer to apply engineering techniques in research projects.

The biomedical electronics engineering program combines study in the biological sciences with those areas of engineering which are particularly important for the application of modern technology to medicine. With a few minor elective changes the program also satisfies the entrance requirements of most medical schools, but students who plan to go on to medical school should consult the premedical adviser and the coordinator of the biomedical electronics engineering program.

Chemical Engineering

The Department of Chemical Engineering offers a curriculum leading to the bachelor of science (B.S.) degree in chemical engineering and in cooperation with the Department of Ocean Engineering offers a curriculum leading to the bachelor of science (B.S.) degree in chemical and ocean engineering. The master of science (M.S.) and doctor of philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Bulletin.*

Faculty: Professor Treybal, *chairman.* Professors Gielisse, Mairs, Mohrnheim, Shilling, Thompson, and Votta; Visiting Professor Sebba; Associate Professors Barnett, Knickle, Rockett and Rose; Adjunct Associate Professor DiMeglio; Adjunct Assistant Professors Doyle, Sahagian, and Spano.

The chemical engineer is concerned with the application and control of processes leading to changes in composition. These may be chemical and physical processes, and *control* refers to achieving the desired goal at reasonable cost. The processes are most frequently associated with the production of useful products (chemicals, fuels, metals, foods, pharmaceuticals, paper, plastics, and the like), but also include such seemingly unrelated matters as removal of toxic components from the blood by an artificial kidney, and modeling the flow of exhaust gases from automobiles on the highway (turbulent diffusion and heat transfer coupled with chemical change). The chemical engineer's domain includes more efficient production and use of energy, processing of wastes, and protection of the environment.

Chemical engineers have a strong foundation in chemistry, physics, mathematics and basic engineering. Chemical engineering courses include the use of analog and digital computers, thermodynamics transport phenomena, mass transfer operations, metallurgy, materials engineering, process dynamics and control, kinetics and plant design. The student has the opportunity to operate small-scale equipment to determine efficiencies and operating characteristics, and to visit chemical plants in the area. Intensive work in the solution of complex problems is given in which economics and optimization of engineering design are emphasized.

A chemical engineer with a background in both chemistry and engineering can apply his knowledge of research and development, design, production and manufacturing not only to the areas listed earlier, but to many others such as textiles, dyes, petroleum, ceramics, paint, rubber and the like, as well as to biomedical, biochemical, ocean, space, nuclear energy, and environmental problems and processes.

The senior year curriculum for students concentrating in chemical and ocean engineering is listed under Ocean Engineering, page 69.

Civil and Environmental Engineering

The Department of Civil and Environmental Engineering offers a curriculum leading to the bachelor of science (B.S.) degree. The master of science (M.S.) and doctor of philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Bulletin*.

Faculty: Associate Professor McEwen, *chairman*. Professors Campbell, Nacci and Poon; Associate Professors Fang, Gentile, Lavelle and Moultrop; Assistant Professors Kelly, Marcus and Sussman.

The civil engineer is responsible for the planning, design, construction, management and research and development of systems which are necessary to satisfy the demands of modern civilization. Water supply and distribution, sewerage, solid waste disposal, air pollution, transportation systems, foundations for both land and ocean structures, dams, dock facilities and offshore towers, and buildings and bridges of many types are among the civil engineer's responsibilities.

The curriculum provides the student with sufficient background to pursue graduate study or to enter directly into professional practice in industry or government after graduation. The first two years are devoted largely to courses in mathematics, chemistry, physics and engineering science which are common to all engineering curriculums. In his last two years the student has a large degree of flexibility in developing his own program to meet his own professional goals through the selection of professional electives in environmental engineering, soil mechanics and foundations, structural engineering, and transportation and construction.

Those students interested in the application of civil engineering to the ocean and coastal zone may select as professional electives such courses as CVE 524, OCE 587, and courses from geology and ocean engineering.

Each student is required near the completion of both the sophomore and junior years to file a proposed plan of study which has been approved by his faculty adviser and the department.

Computer Engineering (Electronic)

The bachelor of science (B.S.) degree in electronic computer engineering is offered by the Department of Electrical Engineering. Specialization in computer engineering is also available within the master of science (M.S.) and doctor of philosophy (Ph.D.) programs in electrical engineering, described in the *Graduate School Bulletin*.

Faculty: Professors Jackson and Tufts, *coordinators*. Electrical engineering faculty.

Computers and computer-like devices have truly transformed society, particularly in the technologically advanced countries. Computers are everywhere, and all indications are that computers and computer components (digital devices) will be even more pervasive five or ten years from now. Computer engineering is concerned with the design and efficient use of large or small computers and the development of other machines and instruments which contain computers, or parts of computers, as essential building blocks, from the hand-held calculator to the large multi-terminal computer, and the programmable assembly machine. A programmable machine is one which will change its operation in response to a program or command.

Computer engineers may be employed in the design or planning, service, operation and sale of computer systems as well as the design, service and sale of complex machinery, instruments and systems—such as an automated subway—which require computers as essential parts. The employers may be industrial organizations, transportation companies, federal laboratories or local government.

The computer engineer must understand the fundamentals of computer logic and programming as well as the fundamentals of electronics and general engineering—mathematics, mechanics, electricity, magnetism, and heat transfer. He uses all of this knowledge to create new devices and systems which satisfy perceived human needs. Two four-year bachelor of science programs are available at the University to the student who wants to become a computer engineer: a computer technology emphasis in the senior year of the general electrical engineering program and the separate electronic computer engineering program which is described below.

Electrical Engineering

The Department of Electrical Engineering offers a curriculum leading to the bachelor of science (B.S.) degree. The master of science (M.S.) and doctor of philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Bulletin*. For the B.S. degree the student may elect a general program or an emphasis option in the areas listed on page 69.

[6]Required for graduation and recommended for freshman year, but not a prerequisite for the computer engineering courses of the sophomore and junior years.

[7]Prerequisite for advanced work in computer engineering, should be taken before the junior year.

[8]MTH 215 or other course approved by the department of Electrical Engineering.

Electrical engineers work in all areas in which electrical phenomena are involved. These areas include communication systems, computers, control systems, quantum electronics and electro-optics, electro-acoustics, energy conversion, antennas and radio propagation, design of electronic devices, and bioengineering.

Since electrical instrumentation is at the heart of modern science and technology, electrical engineers are not only employed in the computer, electronics, communications and power industries, but may also be found in such diverse enterprises as transportation, the chemical industry, large hospitals, medical schools and government laboratories. By carefully selecting elective courses the student should be able to enter any of these fields after graduation or be prepared for graduate study in engineering or physics.

The curriculum emphasizes the scientific basis of electrical engineering and the application of mathematical analysis to engineering problems. Work is required in atomic physics and the behavior of the solid state, electromagnetic theory and electronics. Creative use of scientific principles in problems of engineering design is stressed particularly in the senior year. Digital computer techniques are a part of many electrical engineering courses.

Extensive laboratory work with electrical and optical devices serves to bridge the gap between mathematical analysis and the real world of "hardware." Separate undergraduate laboratories are available for electrical measurements, electronics, pulse and digital circuits, computer graphics, microwaves and quantum electronics, materials, energy conversion, and systems. Selected students participate in advanced projects including image tube analysis, micro-electronics, investigation of optical properties of solids, optical and radio propagation, acoustics, computers, robotics and biological instrumentation.

Electrical engineering students should note that the four-year electrical engineering curriculum allows for 9 credits of completely free electives which do not have to satisfy any of the general education requirements. It is recommended, however, that elective courses be selected to satisfy the general education requirements in Divisions A, C and D (27 credits) as early as possible. Although Division B requirements of 18 credits will be satisfied automatically by courses specified in the electric engineering curriculum, it is recommended that students take some additional natural science such as ZOO 111, AST 108, BOT 111, GEL 103, or courses in mathematics or physics for which prerequisites have been satisfied. In choosing electives students may also consider Division D courses in communications.

The concentration requires 123 to 124 credits.

science, mathematics, physical science or a life science *approved by the student's adviser.*

The selection of the general program must be made after discussion with academic advisers, emphasis area advisers and other faculty. Each student must file (on a form available from the department office) before spring registration for the first semester of the senior year a detailed program of studies which is approved by his emphasis area adviser. Those who elect the general program must obtain approval of their course selections from their regular adviser. Students formally enrolled in the Honors Program remain with the honors adviser of the department who approved their individually determined programs.

The first semester is 14 credits including ELE 443 (5 cr.), emphasis course (3), professional elective (3) or emphasis laboratory (3), free elective (3).

The second semester is 15 credits including: emphasis course (3), emphasis laboratory (3) or professional elective (3), professional elective (3), free electives (6).

Engineering Science

The curriculum in engineering science is designed to allow more concentration in the basic sciences, engineering sciences, and interdisciplinary areas than is possible in the regular engineering curriculums. The degree earned is the bachelor of science (B.S.).

A core of required courses in the basic and engineering sciences provides the necessary foundation for further work in these areas. The 12 to 15 credits of specialized electives plus 6 credits of free electives afford ample opportunity for concentration, which may be in any one of the five undergraduate engineering departments, in mathematics, or in physics; or it may be in some interdisciplinary area cutting across two departments, one of which may not necessarily be in engineering.

With the proper choice of electives, this curriculum would prepare the student for either a professional career in industry or for graduate school.

The concentration requires 131-134 credits.

Industrial Engineering

The Department of Industrial Engineering offers a curriculum leading to the bachelor of science (B.S.) degree. The master of science (M.S.) degree also offered by the department is described in the *Graduate School Bulletin*.

Faculty: Professor C. James, *chairman*. Professors Nichols and Rubinsky; Associate Professors Branson and Lawing; Assistant Professor Shao.

The industrial engineering curriculum is designed to provide significant strength in mathematics, basic science, and engineering science, plus a carefully coordinated set of courses that are of particular importance to the professional industrial engineer. Mathematical modeling of physical systems, optimization, probability and random variables, production systems, materials processing and metrology are areas that receive considerable attention. The professional portion of the curriculum is augmented with computer science and professional electives.

Upon completion, the student will be prepared amply to pursue a career in the many engineering opportunities in industry, transportation, government, hospitals, and service organizations. The curriculum also provides an excellent background for further formal study in industrial engineering or related fields of physical science.

By using the professional and free electives for certain courses, the student can complete a bachelor of science degree in industrial engineering plus a master of business administration degree within five years. See the department advisers for further details. The concentration requires 125-129 credits.

Mechanical Engineering and Applied Mechanics

The Department of Mechanical Engineering and Applied Mechanics offers a curriculum leading to the bachelor of science (B.S.) degree in mechanical engineering and applied mechanics and, in cooperation with the Graduate Depart-

[12]Professional electives shall include at least 3 credits of mathematics. Students planning to do graduate work in biomedical engineering should take either ZOO 111 or BIO 101 before the senior year.

[13]A professional elective and a free elective are required in the senior year.

ment of Ocean Engineering, offers a curriculum leading to the bachelor of science (B.S.) degree in mechanical and ocean engineering. The master of science (M.S.) and doctor of philosophy (Ph.D.) degrees also offered by the department are described in the *Graduate School Bulletin.*

Faculty: Professor C. Nash, *chairman.* Professors Bradbury, G. Brown, Conta, Dowdell, Ferrante, Schenck, Test, M. Wilson and F. White; Associate Professors Bachelder, DeLuise, Goff, Hagist, Hatch, T. Kim, Lessmann and Parker; Assistant Professor Palm.

This curriculum provides a foundation in basic science, mathematics, engineering science, and general education to prepare the graduate to enter a professional engineering career. The curriculum is also excellent preparation for graduate school. Mechanical engineers are employed in large numbers in every industry. The program at the University of Rhode Island is unusually strong in providing a background in systems engineering, design, fluids, and the thermal sciences including energy and energy transfer.

The work in the first two years typically consists of basic courses in pure science (mathematics, physics, chemistry, electives), applied science (mechanics, electricity and magnetism, computer science), and general education (arts, humanities, social sciences, communication).

The junior year concentrates upon fundamental courses in mechanical engineering science (thermodynamics, fluid mechanics, systems and design, engineering analysis), plus further general education studies (Divisions A, B, C or D). The senior year allows the student to choose between two professional programs of study: (1) mechanical engineering, and (2) ocean engineering. These programs are supplemented by professional electives, free electives, and the completion of the University general education studies. Both programs provide a good function for further graduate studies.

In the last five semesters, the student takes an integrated series of laboratory courses which introduce laboratory technique and practical experience with the physical and engineering phenomena which are being covered in concurrent courses. In the senior year, the student carries out an individual project to develop creative ability and integrate the formal studies.

It is the responsibility of each student, in consultation with the adviser, to select electives in such a way as to satisfy the University's general education requirements. The recommended curriculum which follows suggests a procedure for doing this.

No specific courses are required for students from University College who desire to enter the Department of Mechanical Engineering and Applied Mechanics. However, the following list of courses contains all of the prerequisites for a degree in mechanical engineering and should be taken during the first three semesters: CSC 201 (3 cr.); EGR 102 (1), MCE 162, PHY 223 and ELE 210 or PHY 213, 285, 214 and 286 (8-9); MCE 263 (3);MTH 141, 142 and 243 (9); Division B electives, except mathematics but including CHM 101 and 102 which are required for graduation (7); Division A, C or D electives (15) for a total of 46-47 credits.

To receive the bachelor of science degree in mechanical engineering and applied mechanics, a student must satisfactorily complete all the courses in the following recommended curriculum, although the sequence may be changed.

The concentration requires 128-129 credits.

College of Home Economics

Elizabeth Walbert Crandall, *Acting Dean*

Study in home economics provides professional and pre-professional education for both men and women as well as opportunity for development of the individual as a person, a citizen and for home and family living.

The program of study includes work in the biological, physical and social sciences, the humanities and home economics. Opportunity for exploration is provided with students choosing their major fields of study at the end of the sophomore year. The degree of Bachelor of Science is awarded upon satisfactory completion of the curriculum. All programs are available to both men and women.

The curriculum requirements listed below are arranged in three groups. Group I includes general education courses, Group II includes home economics courses required of all students in the College, and Group III includes those courses required for the major emphasis. The maximum course load is 19 credits per semester. A student on probation may register for no more than 15 credits per semester.

A total of 128 credits is required for graduation.

CURRICULUM REQUIREMENTS

Group I General Education, 45 credits

Students are required to select and pass 45 credits of course work from the general education requirements as listed on page 10. Specific requirements of the College in each division are listed below:

Division A (18, 15, or 12 credits)

Home economics students must take one course in art, music or theatre; one course in literature.

Division B (18, 15, or 12 credits)

Home economics students must take one course in biological sciences or chemistry.

Division C (18, 15, or 12 credits)

Home economics students must take one course in economics and two courses in psychology and/or sociology.

Division D

No specific requirements.

Group II Home Economics Core, 12 credits

Students are required to select and pass one course in each of the following areas: CDF 150, 200 or 355; FNS 101, 207 or 237; HMG 210, 320 or 340; TXC 103 or 224; HEC 001.

Child Development and Family Relations

The Department of Child Development and Family Relations offers a curriculum leading to the bachelor of science (B.S.) degree. The master of science (M.S.) degree also offered by the department is described in the *Graduate School Bulletin*.

Faculty: Professor Fitzelle, *chairman*. Associate Professors Cohen, Greene, Lapin, Rae and Spence; Assistant Professors Blood, Cooper, Field, Kohut, K. Schroeder and L.S. Votta; Instructor Frank; Adjunct Professor Guthrie.

This curriculum provides a general background for work with children and families, building on the Home Economics Core (Group II) and in conjunction with the 29 elective credits necessary to complete the total of 128 credits required for graduation. Courses in Group II not chosen to fulfill the core requirements should be considered for inclusion among the elective credits.

Most professions that deal with children and families require academic work beyond the bachelor's degree for continuing professional work and advancement. Individuals with a baccalaureate degree are employed as preprofessionals, however, in nursery schools, day care centers, institutions and hospitals for children, recreational, child guidance, case work and other community agencies. Similarly, some of the courses in the curriculum plus certain others in education, meet the requirements for the Provisional Nursery-Kindergarten Certificate in Rhode Island. The Professional Certificate requires successful teaching experience for five years and additional academic work.

Group III

If not taken to meet Group II requirements, the following courses are required: CDF 150, 200, 270, 340, 355, 390, 400, 450, 302 or 403 or 406; in addition, 18 credits in the College of Home Economics or related areas subject to the approval of the department, with a maximum of 6 credits in any one area outside Home Economics. EDC 484 and CDF 375 may not be used.

Students who wish to meet the requirements for the Provisional Nursery-Kindergarten Certificate in Rhode Island should apply at the end of the fourth semester for permission to take EDC 484, and should plan to take the following courses in addition to Group III: EDC 102, 312, 484, 485; CDF 330 and 370.

Students interested in preparation for work in agencies serving individuals or groups with special needs should take CDF 375. Applications should be made at the end of the fourth semester for permission to take the course and to plan a program of courses with their adviser that will include electives appropriate to choice of field work.

Food and Nutritional Science

The Department of Food and Nutritional Science offers a curriculum leading to the bachelor of science (B.S.) degree. The master of science (M.S.) degree also offered by the department is described in the *Graduate School Bulletin*.

This curriculum, open to both men and women, offers a broad general study program or specific options as follows:

Dietetics. This program of study meets the requirements of American Dietetics Association approved dietetic internships.

Nutritional Science. Individual programs of study can be prescribed to provide both the broad scientific background and the specialized training necessary for a career in modern nutrition research, education or service.

Food Services Administration and Institutional Management. Programs in these areas can be arranged in cooperation with the College of Business Administration.

Food Science and Technology. An inter-college and inter-departmental program whereby students can follow a course of study meeting the educational standards established by the Institute of Food Technologists.

Programs of study can be arranged to prepare students as therapeutic or administrative dietitians, food and nutrition research technicians and scientists, quantity food service and institutional managers, and test kitchen, test panel and consumer education specialists. Qualified students can prepare for graduate studies.

Group III

If not taken to meet Group II requirements, the following courses are required: FNS 101, 207, 237, 331, 441; BCP 311; MIC 201; Oral Communication; Written Communication; in addition, a minimum of 11 credits must be selected

from the departmental offerings or related areas within or outside the College of Home Economics, subject to the approval of the department, for a total of 39 credits.

Students planning to major in Food and Nutritional Science should contact the department as soon as possible in order to plan a curriculum to meet individual needs.

It is recommended that students interested in Food and Nutritional Science take BIO 102 or ZOO 111 instead of BIO 101 to meet the prerequisites for ZOO 242 and 244 and that they take CHM 101, 102, 103 or 105 instead of CHM 107 to meet the prerequisite for CHM 124.

Food Science and Technology

This intercollege and interdepartmental program, that follows a course of study meeting the educational standards established by the Institute of Food Technologists, is described under Interdepartmental Study on page 11.

General Home Economics

The curriculum in general home economics leads to the bachelor of science (B.S.) degree. It provides for general education in all areas of home economics combined with a professional concentration selected by the student. Professional concentrations would prepare students for fields such as community agency work, consumer affairs, home economics extension, home economics in business, home economics journalism, and home economics in the urban environment.

Group III

If not taken to meet Group II requirements, the following courses are required: CDF 200, 340, 355; FNS 101, 207, elective; HMG 210, 320, 371; TXC 103, 206, 224; in addition, the student is required to take at least 15 credits for professional concentration designed to meet his/her professional goals (adviser approval required).

College of Nursing

Barbara L. Tate, *Dean*
Elizabeth L. Hart, *Assistant Dean*

The College of Nursing offers a curriculum leading to the bachelor of science (B.S.) degree. The master of science (M.S.) degree also offered by the College is described in the *Graduate School Bulletin*.

Faculty: Professors Tate and Cumings; Associate Professors Cumberland, DelPapa, Hart, Hirsch, J. Houston, Jacques, Kang, McElravy; Assistant Professors Barden, Castro, O'Flynn-Comiskey, Evans, Feather, M. Haggerty, Hames, Hitzig, Joseph, Kingsbury, Morgan, Munro, C. Pearson, Schwartz-Barcott, Waldman; Instructors Bissell, Byrnes, Dabek, Fortin, Kraus, Mackenzie, Nelson, Reimels.

The baccalaureate program is designed for men and women with academic, personal, and professional potential. It aims to develop mature, well-informed graduates who will take their places as responsible members of society in meeting the challenges of health care delivery and of continued learning.

The curriculum is based upon the belief that nursing is a creative behavior applied in the provision of human services for the promotion of health, prevention of illness, and care of the ill and that it is interdependent with all other disciplines concerned with health. Nursing knowledge is viewed as a unique synthesis drawn from the humanities, natural, biomedical and social sciences. The conceptual approach to nursing study incorporates the whole person and his environment, adaptation-level theory and nursing process. Nursing courses include observation and clinical practice in numerous hospitals, community agencies, schools, nursing homes and physicians' offices throughout the state of Rhode Island.

There are three routes to admission to the College of Nursing baccalaureate program:

1) *Students with no previous college of nursing study* begin their preparation in University College with dual enrollment in the College of Nursing. After completion of 45-60 credits which must include required foundation courses with a minimum 2.0 quality point average, they may apply for confirmed admission to the College of Nursing. Priority is given to students with strong academic records and positive recommendations from faculty in introductory nursing courses.

2) *Students with college study in another major* or some nursing study in another baccalaureate program and a minimum of 45 completed credits, if accepted by the University, may be admitted directly.

3) *Registered nurse students* who have completed diploma or associate degree programs are not required to submit scholastic aptitude scores

when seeking admission. As adult students who have developed a meaningful competence in basic subject areas, they may demonstrate their mastery by completing the College Level Examinations sponsored by the College Entrance Examination Board. Advanced credit allowances are based upon a review of the candidate's test scores and preparatory experience. Following direct admission to the College, students have the option of seeking credit by examination in subjects previously studied. They are required to enroll in some upper division nursing courses and to meet remaining program specifications.

The usual time for completion of all requirements for students with no previous college or nursing study is eight semesters and one summer session. All students in the College of Nursing meet all of the general education requirements of the University as listed on page 10. A minimal grade of C must be achieved in all required nursing courses. The faculty reserves the right to require withdrawal from the College of a student who gives evidence academically and/or personally of inability to carry out professional responsibility in nursing. The student is limited to 18 credits per semester except by permission of the Dean for special program adjustments or for participation in the Honors Program.

General expenses for students in the College of Nursing are approximately the same as for all other University students. Special items include uniforms, nursing equipment, transportation and one summer session. The use of an automobile or funds to meet public transportation costs is required during the semester of community health nursing experience, and can facilitate broadened opportunities for experience in all courses.

The program is approved by the National League for Nursing and the Rhode Island Board of Nurse Registration and Nursing Education. The graduate is eligible for examination for professional licensure.

College of Pharmacy

Heber W. Youngken, Jr., *Dean*
David H. Crombe, *Assistant Dean*

The College of Pharmacy offers a five-year curriculum leading to the bachelor of science (B.S.) degree in pharmacy and a four-year curriculum leading to the bachelor of science (B.S.) degree in respiratory (ventilation) therapy. The master of science (M.S.) degree, offered by all departments; the doctor of philosophy (Ph.D.) degree in pharmaceutical sciences, offered by all departments except Pharmacy Administration, and the master of science (M.S.) degree in environmental health sciences are described in the *Graduate School Bulletin*.

Pharmacy

This five-year curriculum is patterned on presently accepted programs of study recommended by the American Association of Colleges of Pharmacy, the American Council on Pharmaceutical Education and other interested organizations. It is accredited by the American Council on Pharmaceutical Education and by the University of the State of New York, Division of Professional Education.

It provides preparation for community and institutional pharmacy practice. In addition, students have opportunities through the selection of professional electives to commence a specialization in one of several areas of pharmacy, including hospital, clinical, manufacturing, medical supply servicing, drug analysis, administration and research.

The satisfactory completion of the degree in pharmacy is one of the prerequisites for a license to practice pharmacy. Licensure is obtained after graduation by successfully completing the examination given by the Rhode Island State Board of Pharmacy or those of other states. In preparation for this, students are encouraged to participate in externship or internship programs.

A quality point average of 2.000 in all required professional courses, given by the College of Pharmacy, is required for graduation with a B.S. degree in Pharmacy. This is in addition to University grade requirements.

Students in certain other New England states may enroll in pharmacy under the New England Regional Student Program. See page 20.

Respiratory Therapy[2]

The four-year program in respiratory (ventilation) therapy prepares students for an allied health specialty related to the management of respiratory disease. The ventilation therapist works with the physician, pharmacist, nurse, and other specialists in a hospital or institutional environment where multiple responsibilities are necessary in the care of patients.

Director: Clinical Instructor Demers

CURRICULUM REQUIREMENTS

During the first three years on campus, the emphasis is on general education requirements, described on page 10, and basic courses in biology, mathematics, chemistry, pharmacology, and physics as necessary background for this allied health profession. Upon completion of these academic courses, the senior year provides a 52-week course in an approved hospital where didactic and laboratory instruction in a clinical setting is given. After successfully completing the course, the student is eligible for the national examination given by the American Registry of Inhalation Therapists.

Although the three-year University curriculum meets the requirements for application to hospital programs, the hospital staff reserves the right to select applicants for admission to the clinical year in the hospital. Therefore, selection to a hospital program cannot always be assured at the completion of the third year on campus.

A concentration in respiratory therapy requires 131 to 133 credits.

College of Resource Development

Gerald A. Donovan, *Dean*
Albert L. Owens, *Director of Resident Instruction*

The College of Resource Development provides four-year curriculums in animal science, plant science, food science, natural resources, agricultural and resource technology, and urban affairs leading to the bachelor of science (B.S.) degree. It also offers a two-year program in fisheries and marine technology leading to the associate in science (A.S.) degree. These curriculums are administered by the Director of Resident Instruction working directly with the college faculty.

The activities of the Resource Development faculty differ from those of the other colleges in that most appointments carry joint responsibility for the formal research programs of the Agricultural Experiment Station and Cooperative Extension Service, in addition to the graduate and undergraduate teaching.

The departmental organization of the faculty reflects the discipline orientation of the research programs. Graduate programs leading to the master of science (M.S.) degree are offered by most departments and some programs lead to the doctor of philosophy (Ph.D.) degree. The master of community planning (M.C.P.) degree is offered by the Department of Community Planning and Area Development. These are described in the *Graduate School Bulletin.*

Bachelor of Science Curriculums

All four-year curriculums offered by the college demand a total of 130 credits and contain four categories of requirements: basic core, concentration, directed electives and free electives.

Consistent with the University's commitment to a general education philosophy, the *basic core* guidelines insure an exposure at low levels across the natural sciences, mathematics, social sciences, humanities and communication skills. Course experience common to all curriculums is summarized below. Additional basic core requirements of the several curriculums are included in the following curriculum statements, and represent an effort to communicate background experience essential to professional objectives or an extension of the general education philosophy.

The credits assigned to the *concentration* and *directed elective* categories are used by the student, in close conjunction with his faculty adviser, to develop an individualized program of study containing the desired depth and breadth in one or more disciplines consistent with career interests. By requiring the 24 concentration credits at the 300 level or above, high quality program is assured. The block of *free electives* gives the student freedom to explore areas widely separated from his principal interest.

With the exception of food science, all curriculums are characterized by a minimum of structure. This is a realistic recognition, on the one hand, that entering students vary widely in the degree of precision with which they have defined their educational goals. Many are still concerned with discovering their real aptitudes and interests, and use their undergraduate programs to this end. Those with precise professional objectives have no difficulty in shaping their programs to meet their particular needs. On the other hand the flexibility provided forces the student to play an important and continuing role in the direction and development of his/her program.

Common Basic Core Requirements

All curriculums contain the following commonality in their basic core course selections: 6-8 credits in animal and plant biology, 8 credits in general chemistry and/or other physical sciences; 3 credits in mathematics, 9-12 credits in the social sciences, 9-12 credits in the humanities and 6 credits in communication skills.

NATURAL RESOURCES

Students in this curriculum share a common concern over the complex problems associated with man's use or misuse of the nation's natural resources, and are preparing to play some role in their resolution. They are developing programs that vary from preparation for graduate programs in marine biology, oceanography, fisheries biology, wildlife management and resource economics to more technically oriented positions in the management and conservation of our soil, water, forest, fisheries and marine resources.

Additional basic core requirements include RDV 100, 101, 300 and a course in organic chemistry, physics, earth science, soils, resource economics, political science and sociology.

ANIMAL SCIENCE

This curriculum is designed for students who plan to continue their formal training in one of the diversity of disciplines in animal science including veterinary medicine, aquaculture, animal management, nutrition, physiology, pathology or applied genetics.

Additional basic core requirements include ASC 101, 102, a second course in general chemistry and a course in organic chemistry, physics, physiology, genetics, microbiology, calculus and statistics.

PLANT SCIENCE

This curriculum provides a framework within which students can develop a strong background in the basic and applied plant and related sciences. Most students are developing

programs that prepare them for graduate study in fields such as plant protection, nutrition, breeding, physiology and pathology.

Additional basic core requirements include PLS 104, 105, 212, a second general chemistry course, a course in organic chemistry, a biochemistry or second organic chemistry course, a course in earth science or physics, and a course in genetics, plant physiology, microbiology, algebra and statistics.

FOOD SCIENCE AND TECHNOLOGY

This curriculum involves a program of study that meets the educational standards of the Institute of Food Technologists, and is coordinated by the All-University Food Science Committee. Requirements appear under Interdepartmental Study on page 11.

AGRICULTURAL AND RESOURCE TECHNOLOGY

This curriculum is designed for students with career interests in the more practical or technical aspects of animal, plant and soil sciences, and consequently does not require the depth in the basic sciences provided in the science curriculums. Students are developing programs of study in areas such as ornamental horticulture, turf management, fish culture, animal management, and soil conservation.

Additional basic core requirements include a course in genetics, and four introductory courses from among those offered by the several departments of the college.

URBAN AFFAIRS

The curriculum in Resource Development in the Urban Environment is part of the interdisciplinary Urban Affairs Program (see page 11), and seeks to provide students with an understanding of how human and natural resources pertain to urban affairs. It is designed for students preparing for careers as urban extension agents or with social and community service organizations and agencies.

Additional basic core requirements include one course in the physical or biological sciences, and four introductory courses from among those offered by the several departments in the college.

TEACHER EDUCATION

Students with 36 or more credits in resource development course work can meet teacher certification requirements in Agri-Business and Natural Resources by including the following education courses in their undergraduate programs: EDC 102, PSY 113, EDC 312, RDE 444, EDC 484 (9-12 credits), RDE 486 (0-3 credits), EDC 485, and 9 credits in related mechanics courses.

Associate in Science Program

FISHERIES AND MARINE TECHNOLOGY

This two-year program, leading to the associate in science degree, was designed in cooperation with commercial fishermen and federal and state agencies to provide a thorough training for students intending to enter any sphere of commercial fisheries or marine technology. The 72-credit curriculum provides fundamental knowledge of fishing; vessel operation, equipment, handling, and navigation; fishing methods and gear; fishery business, economics, marketing and legislation; fish and their behavior.

Work on board ship, in the net loft, seamanship and navigation laboratories, engineering laboratory, and marine electronics and vessel technology laboratories make up a good proportion of credit hours. Formal classes on the campus will provide a background in the social, biological and physical sciences, as well as the professional subjects of navigation, seamanship, fishing gear and methods, engineering, marine electronics and vessel technology. Laboratory work is conducted on board the training vessel and in the waterfront laboratories.

This program is available to students in all New England states under the New England Regional Program sponsored by NEBHE (see page 20).

Courses of Instruction

All undergraduate courses offered at the University of Rhode Island are listed on the following pages by subject in alphabetical order. If any subject cannot be located readily, refer to the index. Courses numbered 001 to 099 are pre-freshman and special undergraduate courses and do not carry bachelor's degree credit. Those numbered 100 to 299 are lower division undergraduate courses and those numbered 300 to 399 are upper division undergraduate courses. The 400-level courses are generally limited to juniors and seniors majoring in a field, but open to other advanced undergraduates and to graduate students with permission.

The 500-level courses, listed in this bulletin by title line only, are graduate courses with a bachelor's degree usually prerequisite, but qualified seniors and honors students are admitted with permission. For a full description of these and courses at the 600- and 900-levels, see the *Graduate School Bulletin*.

Courses with two numbers, e.g. ACC 201, 202, indicate a year's sequence and the first course is either a prerequisite for the second or at least the two cannot be taken in reverse order without special permission. If a course is also offered by another department, this information appears following the course number. The roman numeral indicates the semester the course will be offered; the arabic numeral indicates the credit hours. Distribution of class hours each week is in parentheses. *S/U credit* signifies a course in which only satisfactory or unsatisfactory grades are given. The instructor's name follows the course description.

Twice a year, at the time of registration for the next semester, a *Schedule Book* is issued by the registrar listing the specific courses to be offered for that semester with the time of meeting, location, and instructor assigned for the section.
