

Enclosure 1

Phd. Thesis of M. J. Arnot

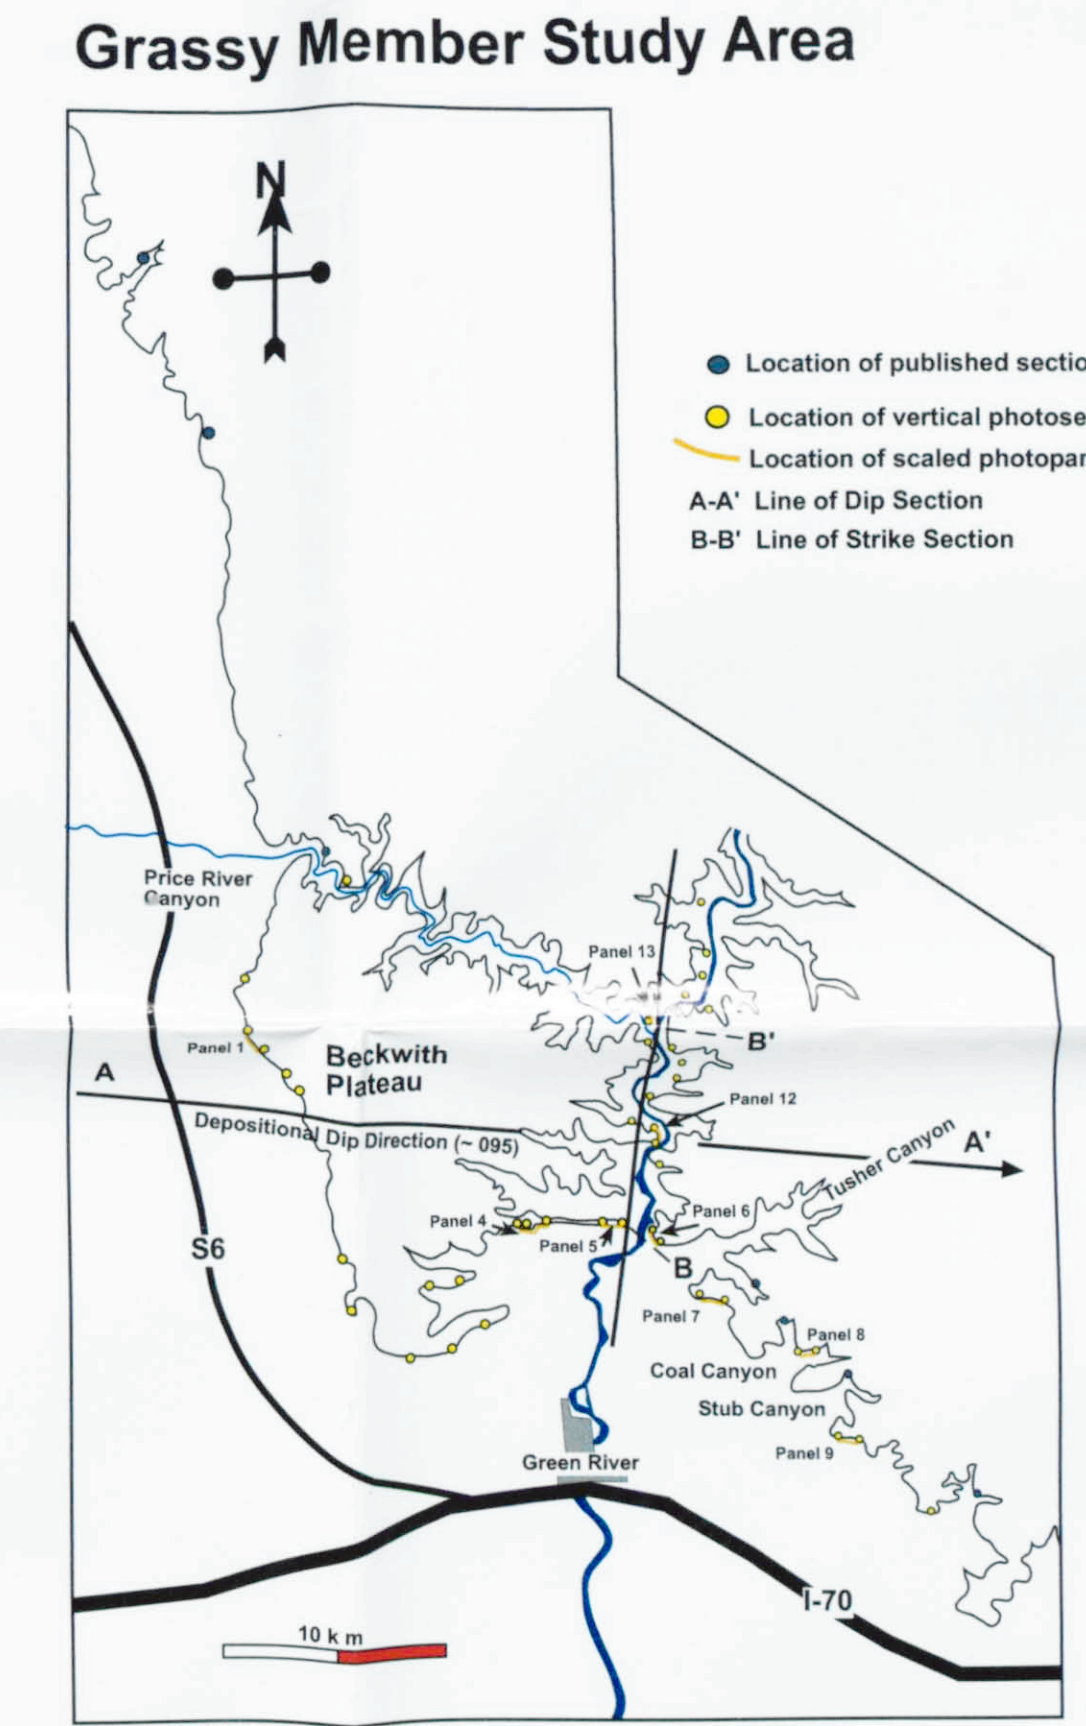

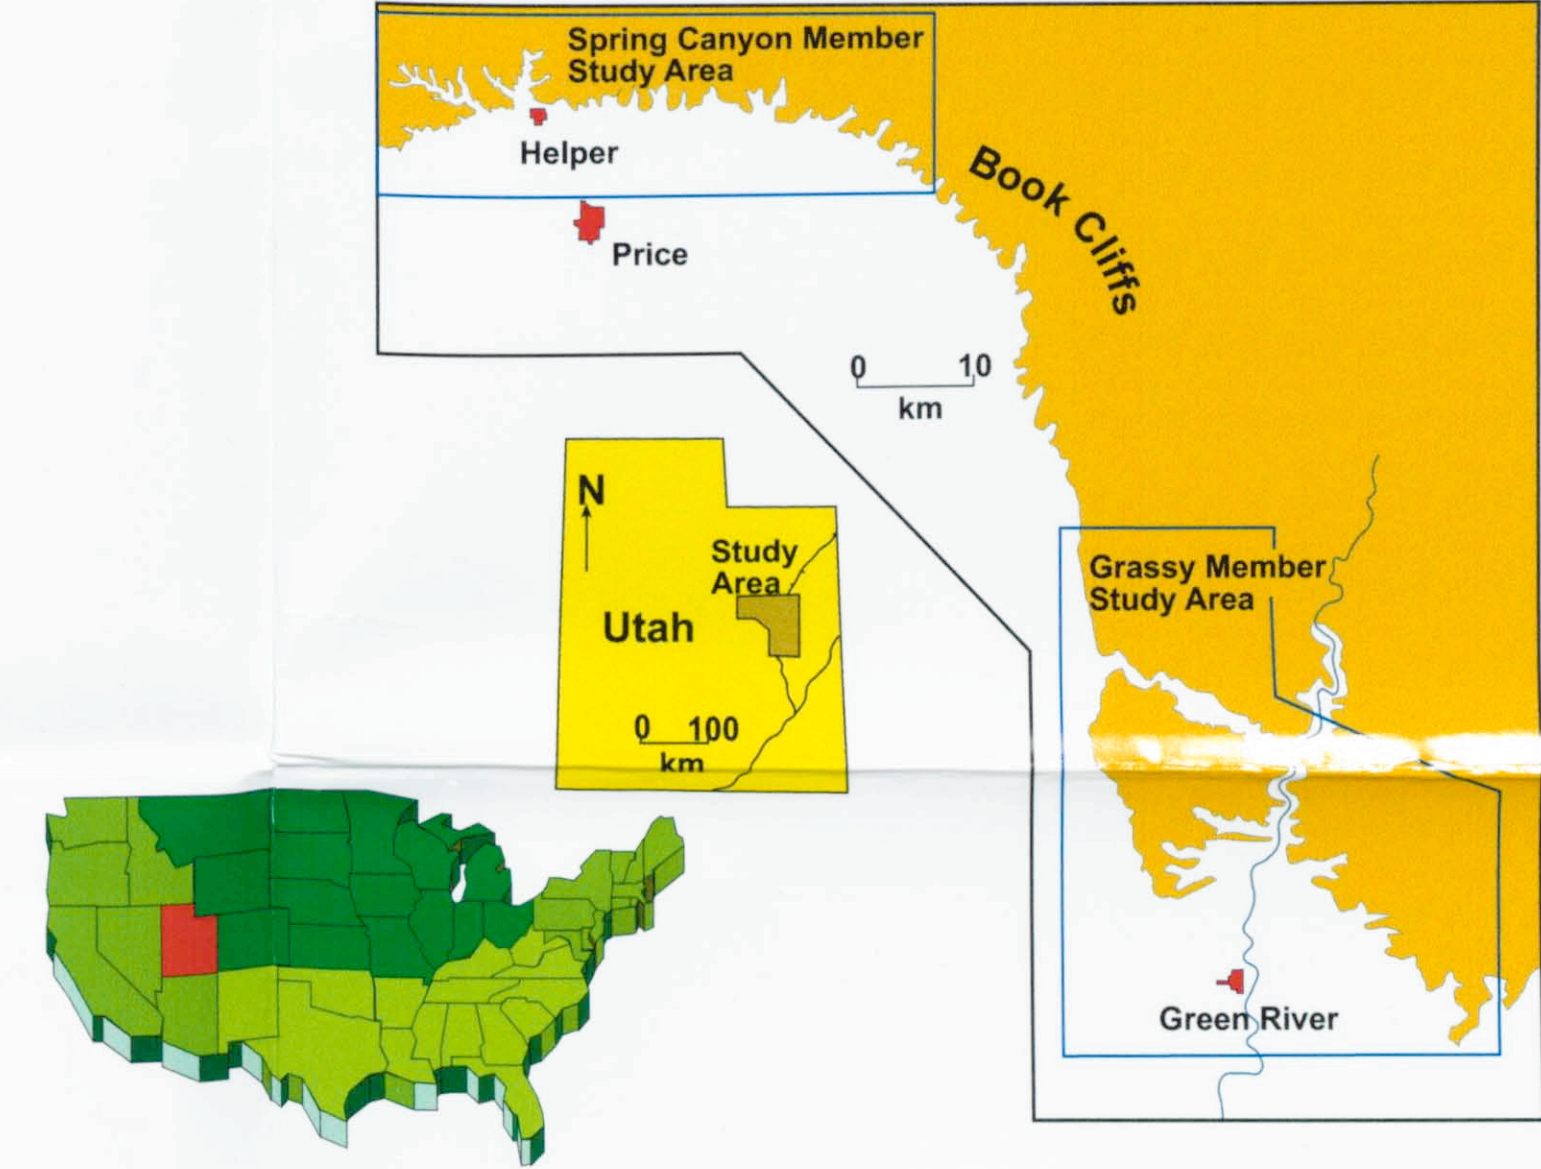

**Title: Quantitative Outcrop Analogue Data
for Modelling of Storm-Dominated,
Shallow Marine Shoreface Reservoirs**

Enclosure 1

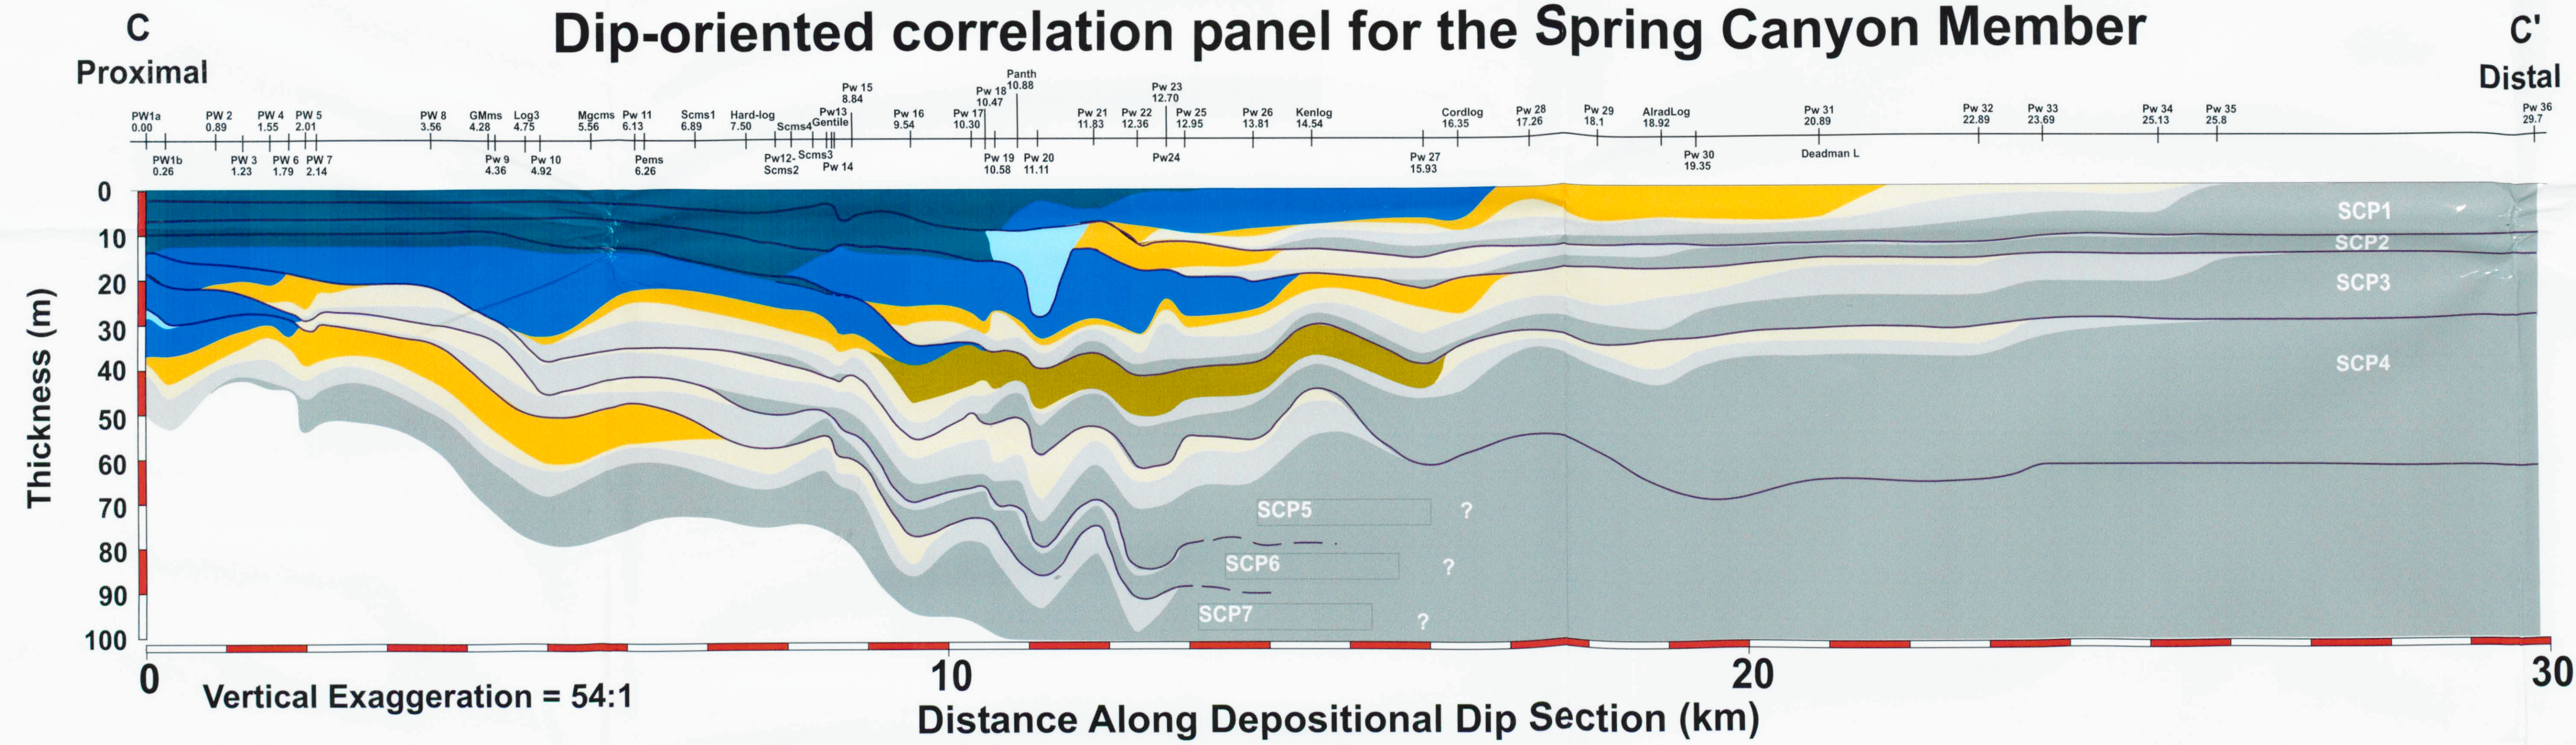

Dip-oriented correlation panel for Grassy Member sequence 1 (GS1)

- Location of vertical photosections
- Location of sedimentary log
- Location of scaled photopanel
- ~ 7200 ft contour
- Road
- C-C' Line of dip section

Dip-oriented correlation panel for the Spring Canyon Member

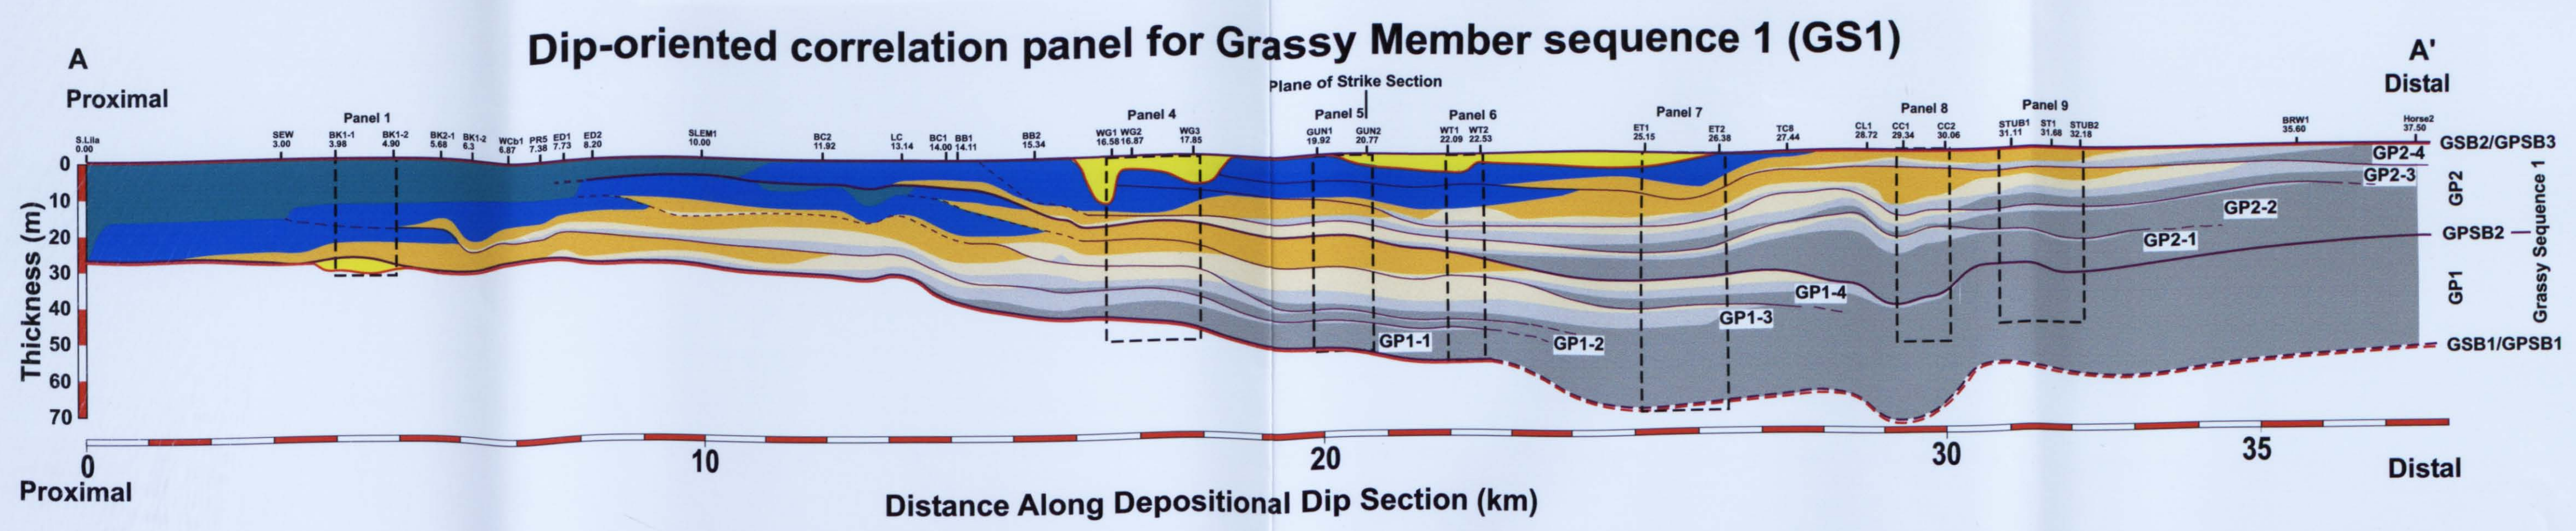

- Sequence Boundary
- Parasequence/Bedset Boundary
- BB2 11.93 Log name and distance along dip section (km)
- Coastal Plain/Tidal
- Incised Valley Fill
- Upper Shoreface (USF)
 - Undifferentiated Upper Shoreface
 - Deltaic (Delt)
 - Deltaic facies
- Middle Shoreface (MSF)
 - SCS Dominated Sandstone
- Lower Shoreface (LSF)
 - Discontinuous Shales
 - HCS Dominated Sandstone
- Lower Shoreface - Heterolithics (LSF-Het)
 - Sandstone Dominated Heterolithics
- Offshore-Transition (Off-Trans)
 - Offshore Shale and Siltstone Dominated Heterolithics

Enclosure 2

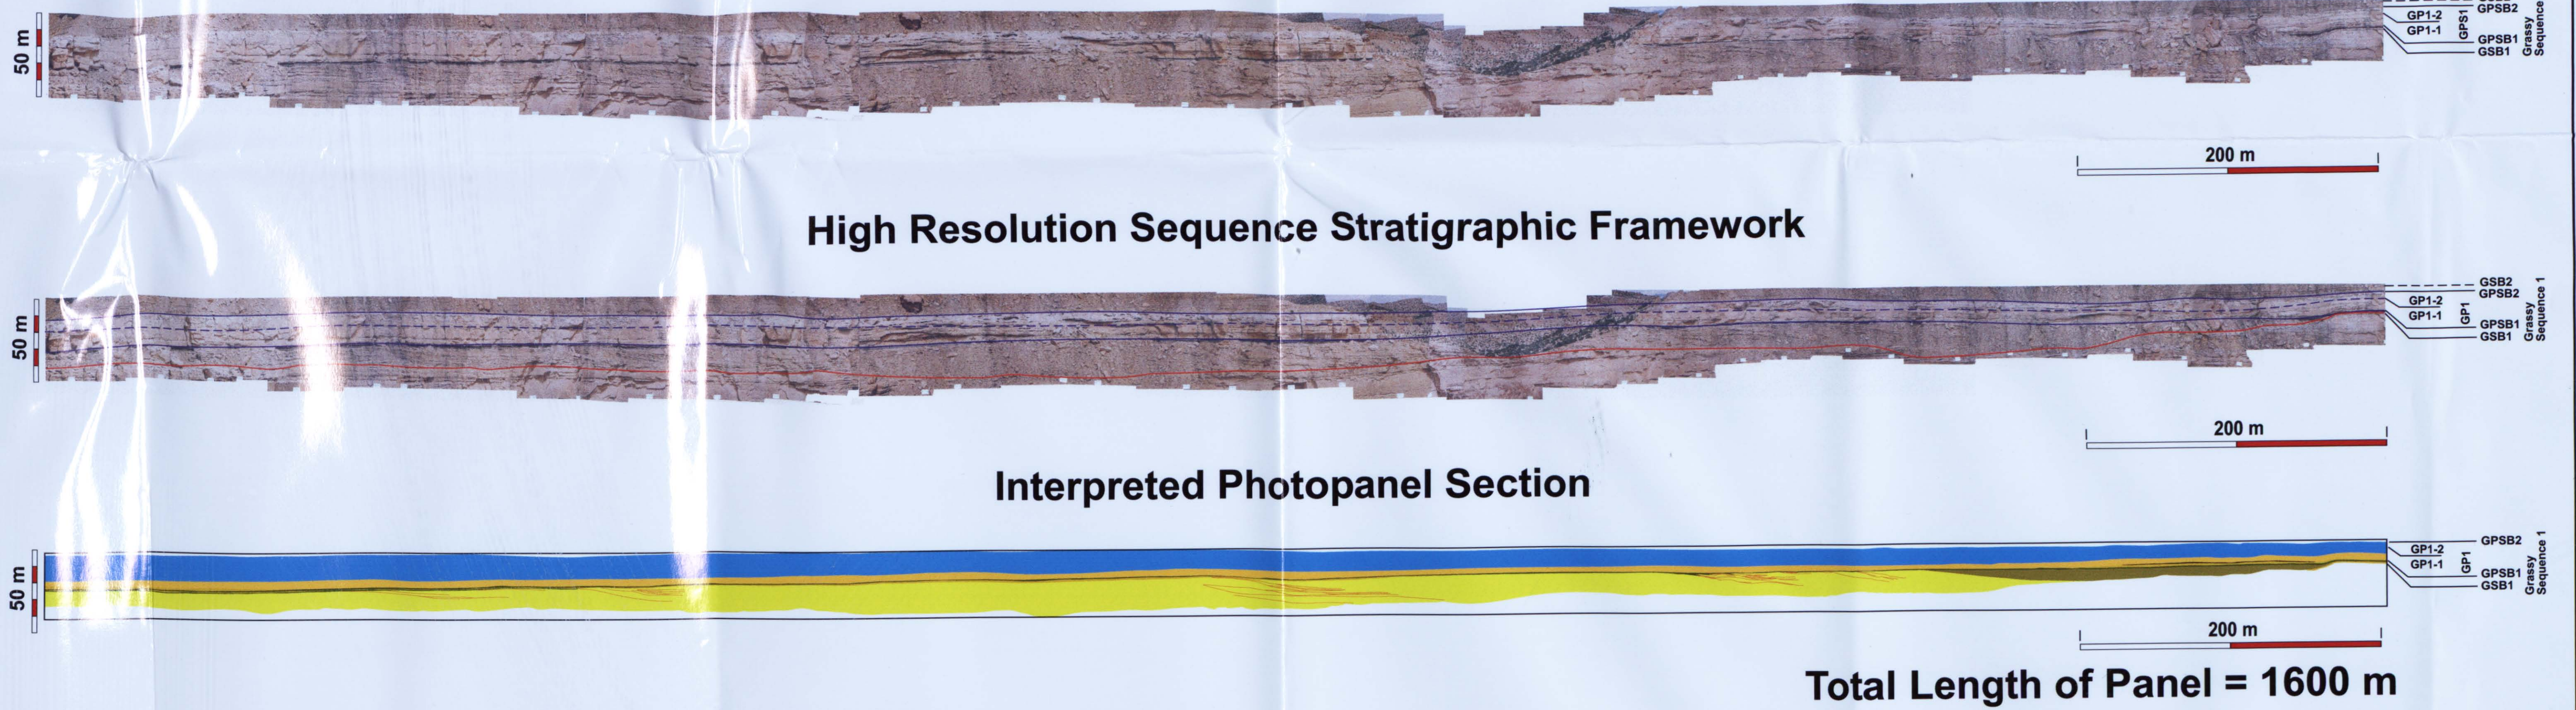

Phd. Thesis of M. J. Arnot

**Title: Quantitative Outcrop Analogue Data
for Modelling of Storm-Dominated,
Shallow Marine Shoreface Reservoirs**

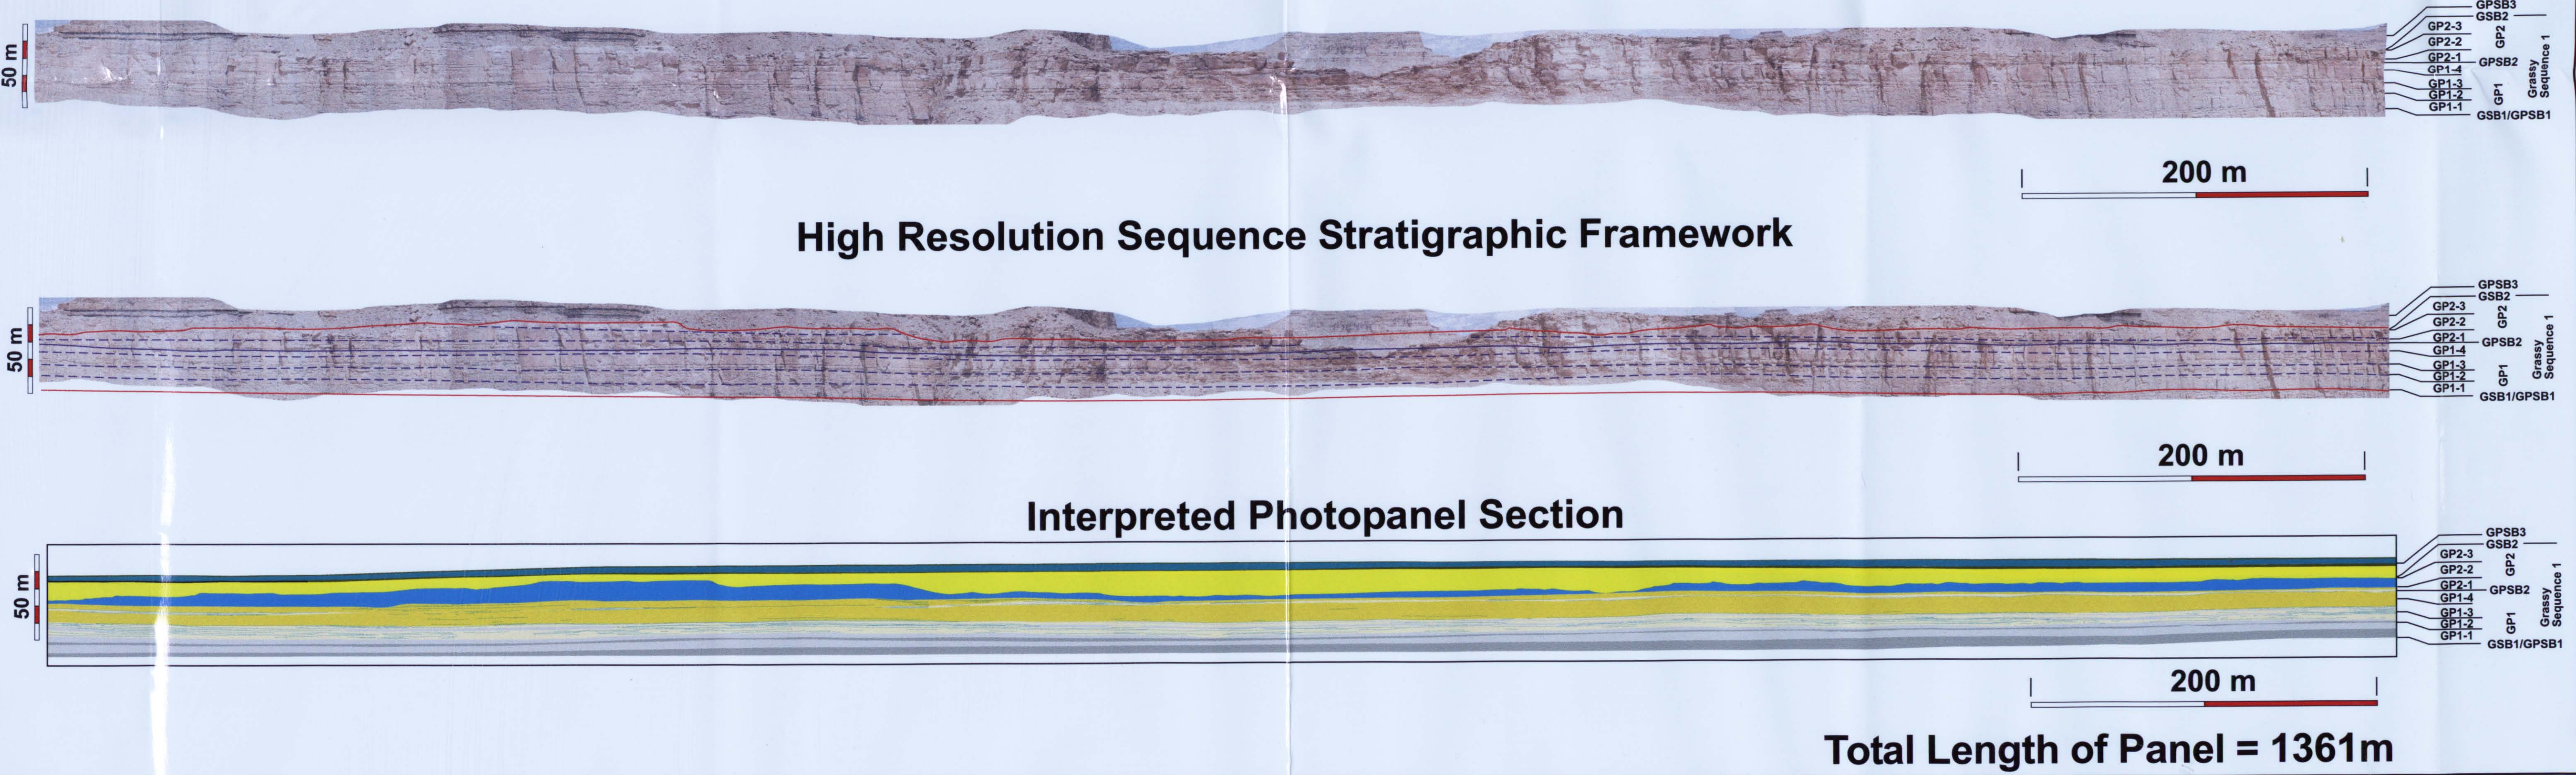

Enclosure 2: Panel 1, Panel 4 and Panel 5

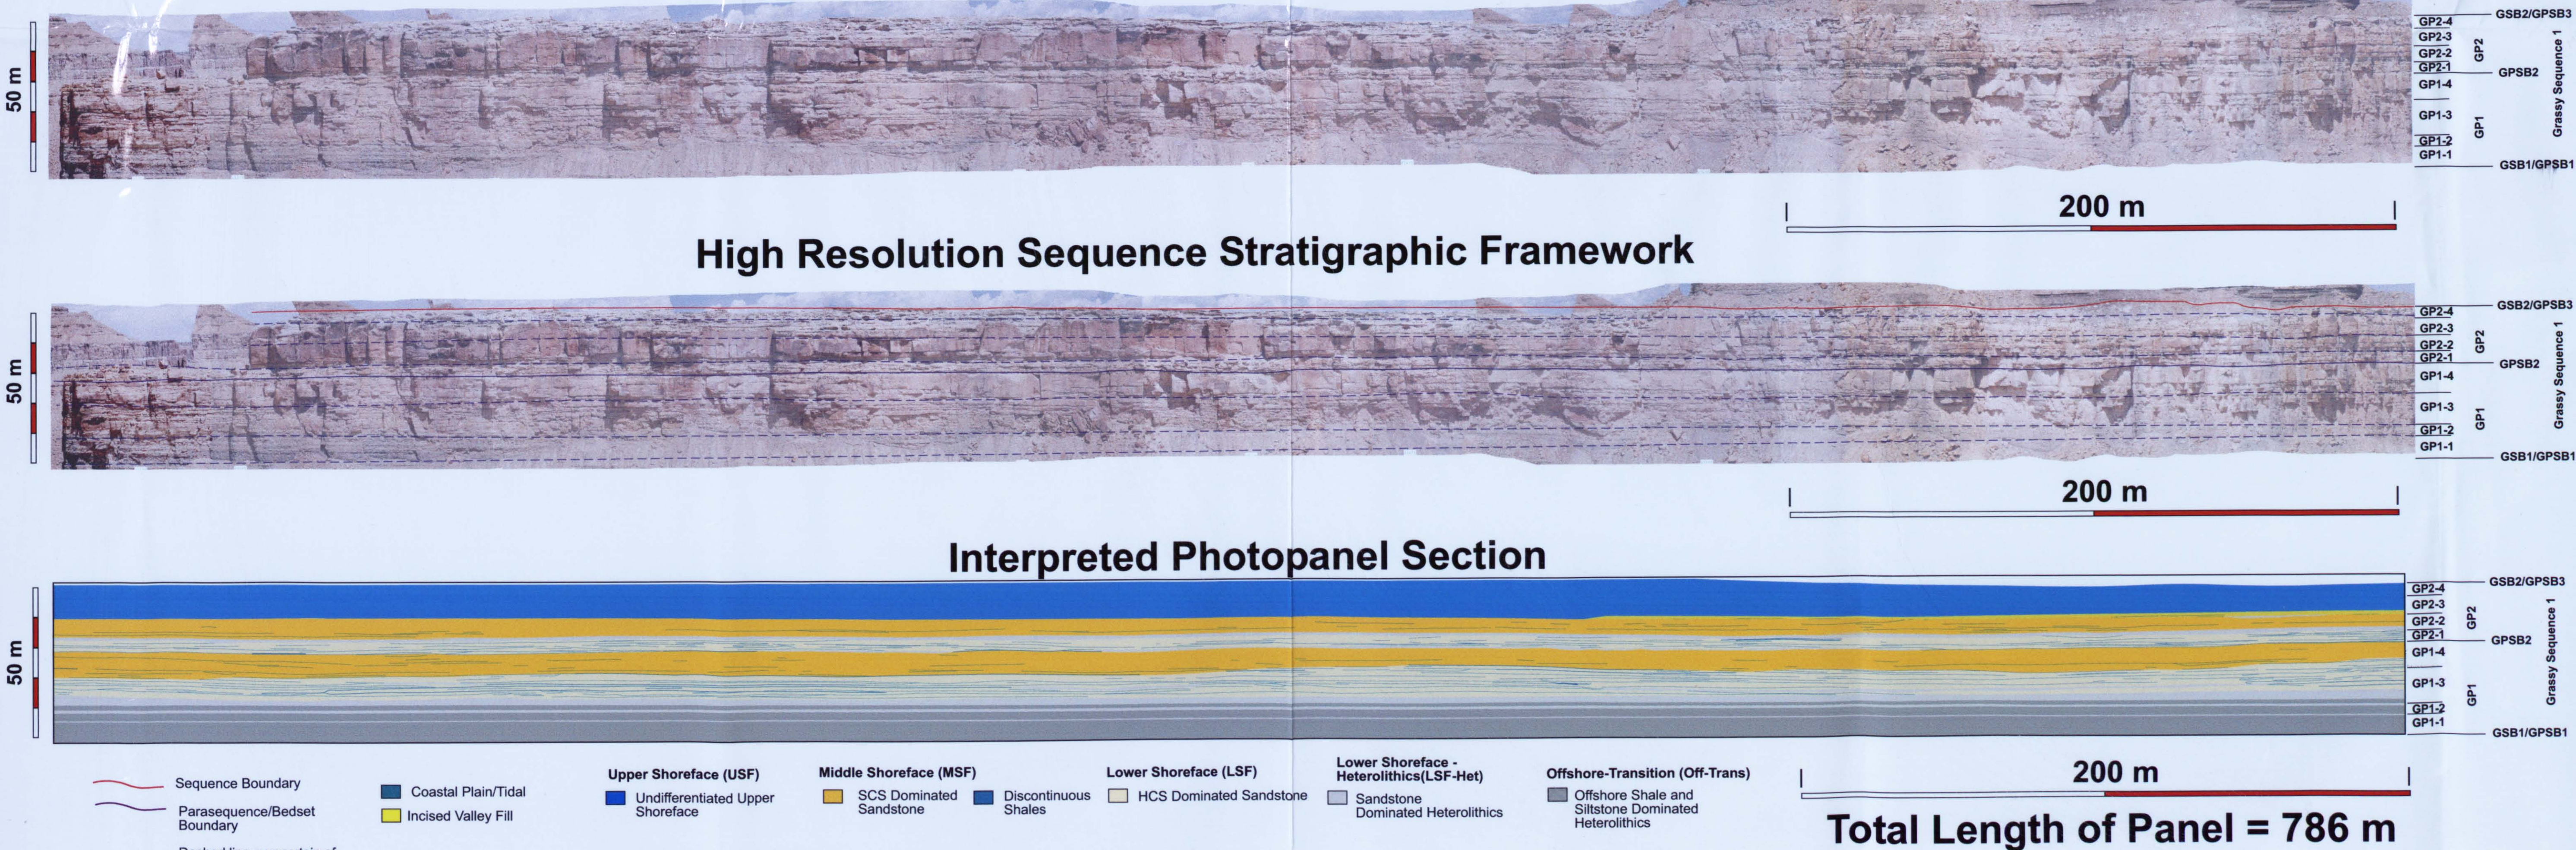

Photopanel Section 1 (Beckwith Plateau)

Photopanel Section 4 (West of Gunnison)

Photopanel Section 5 (Gunnison Butte)

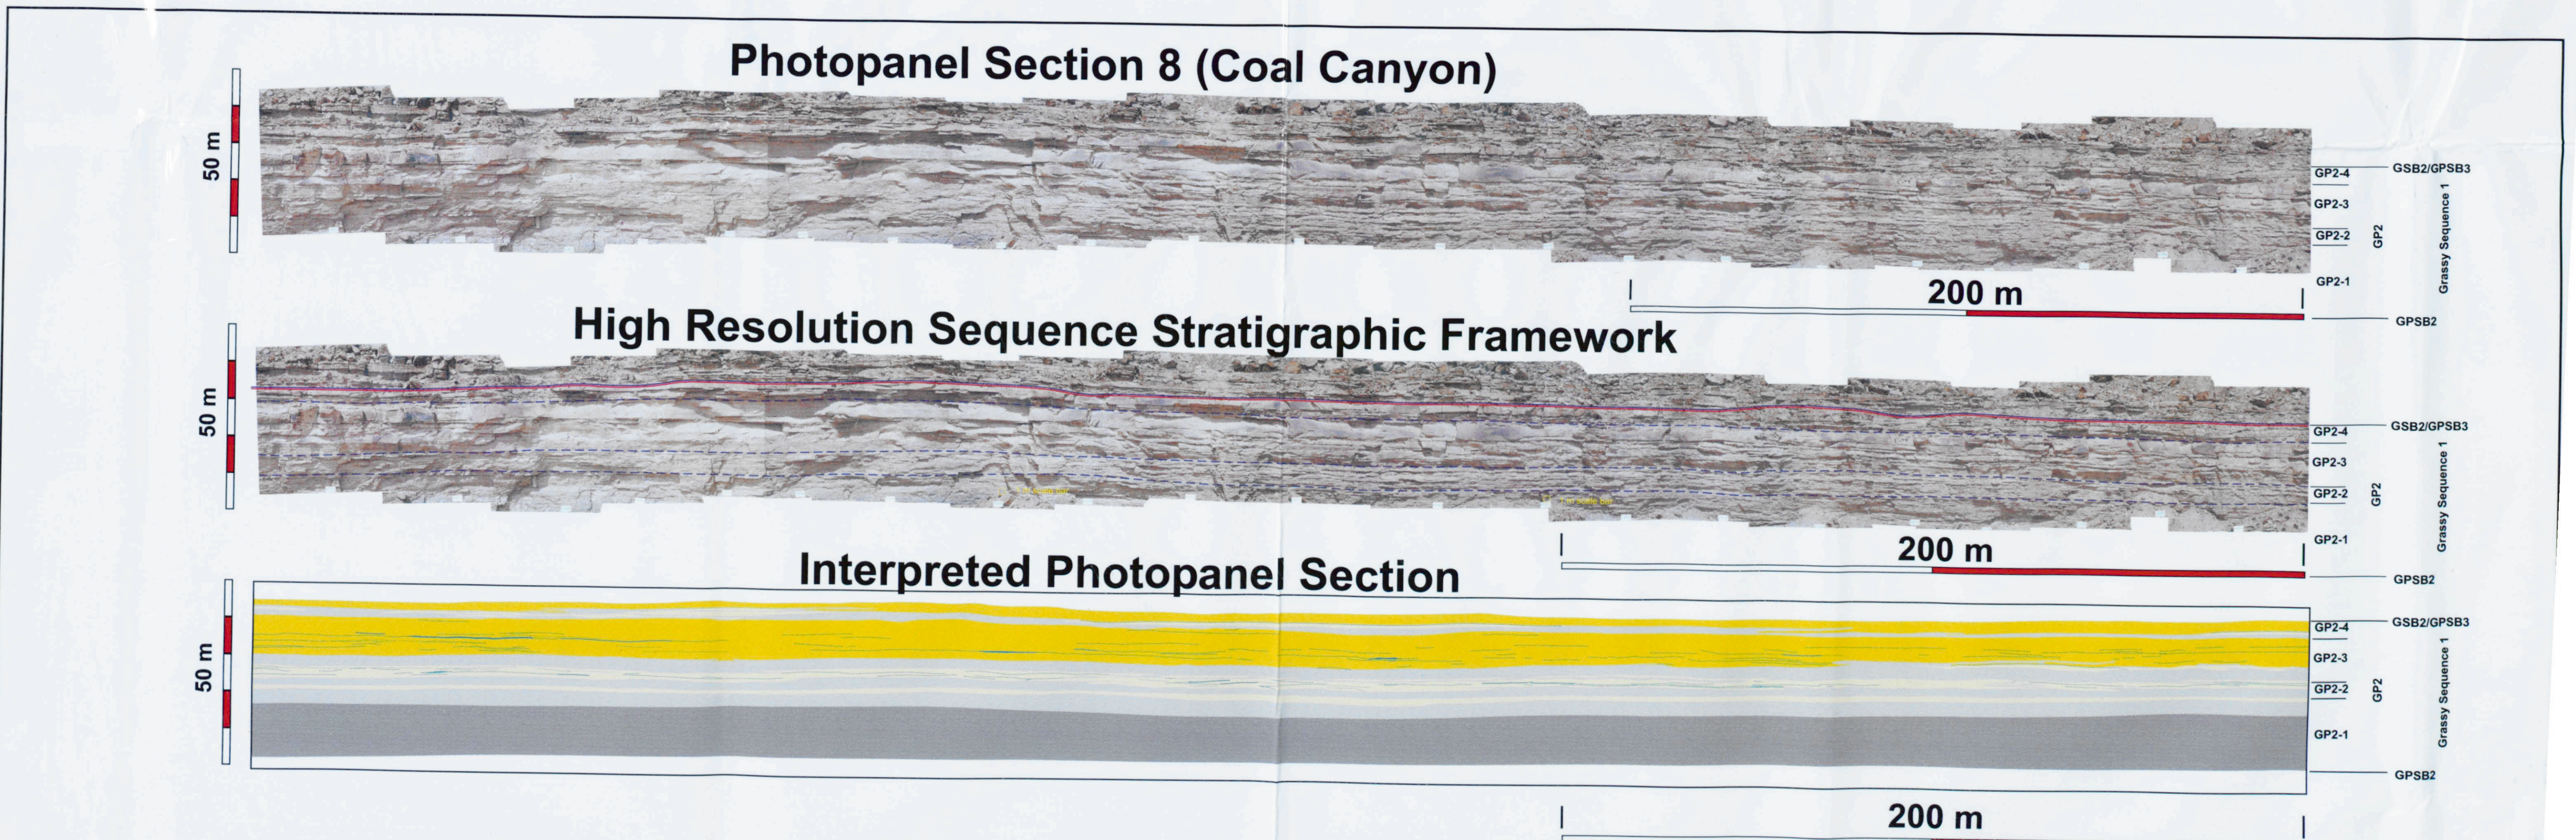

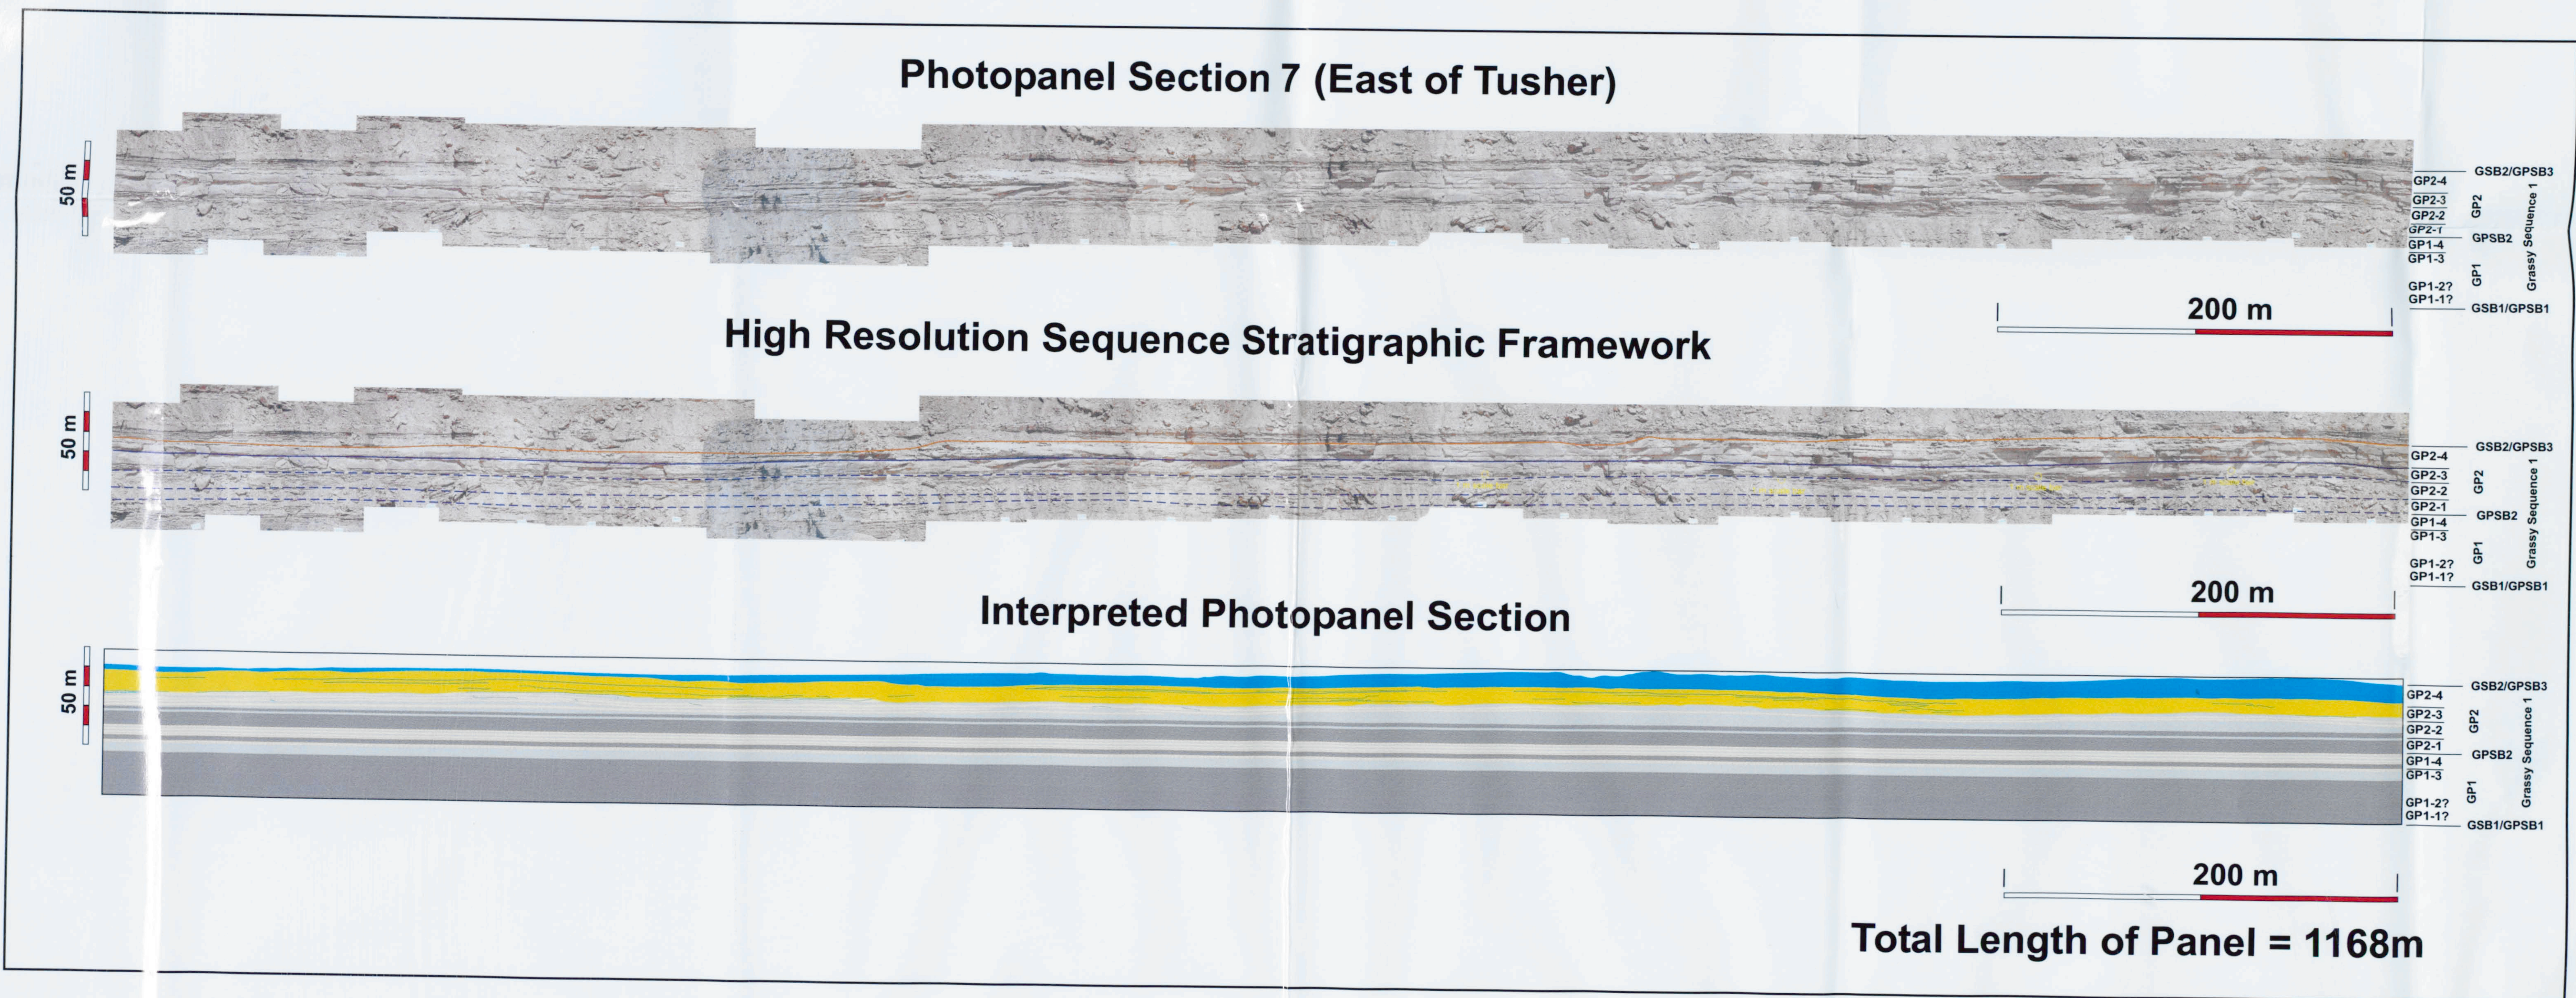

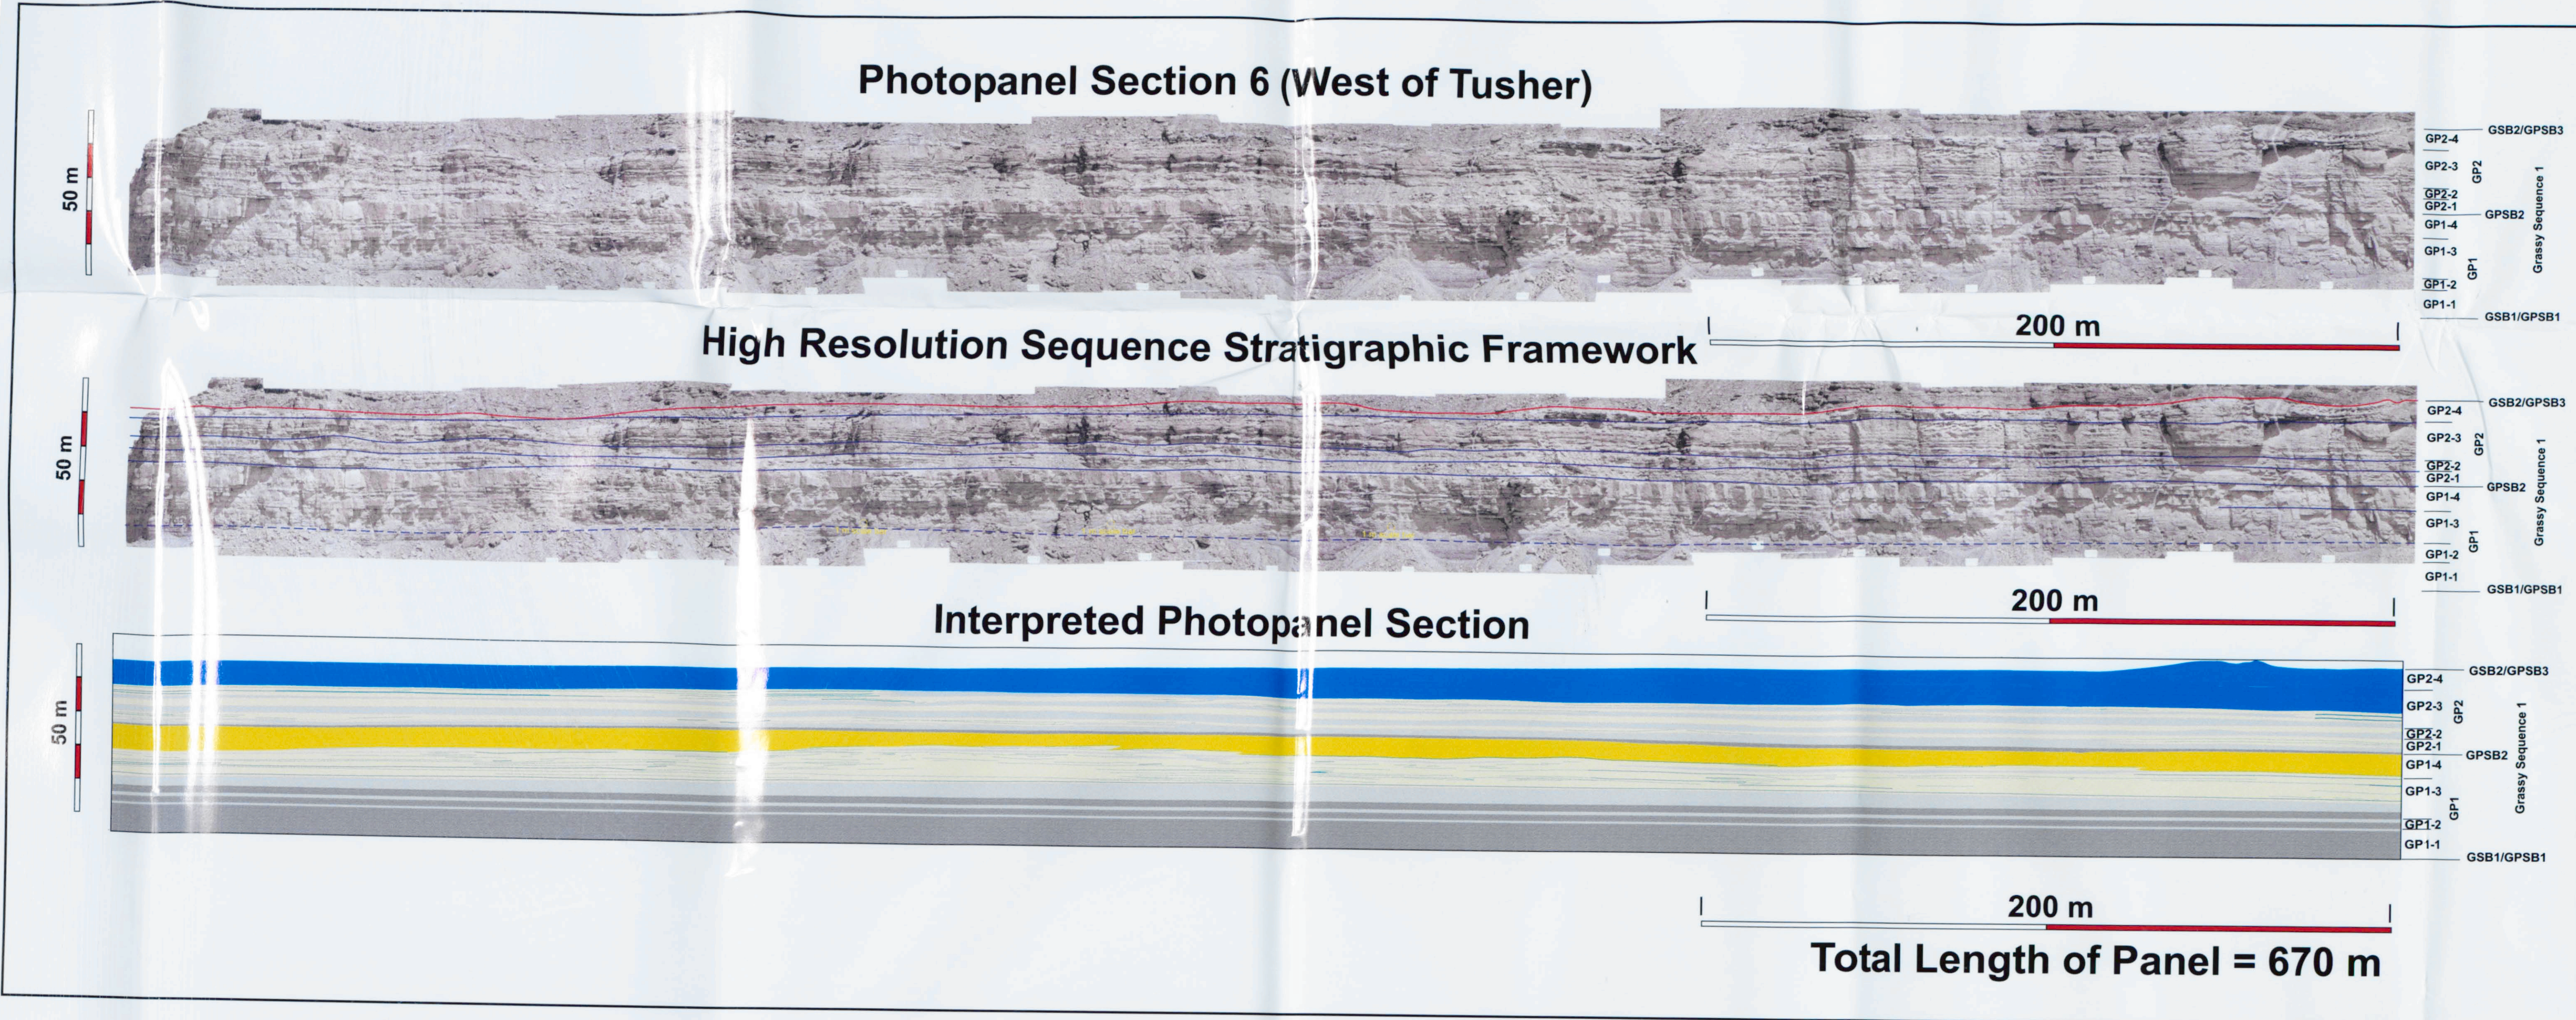

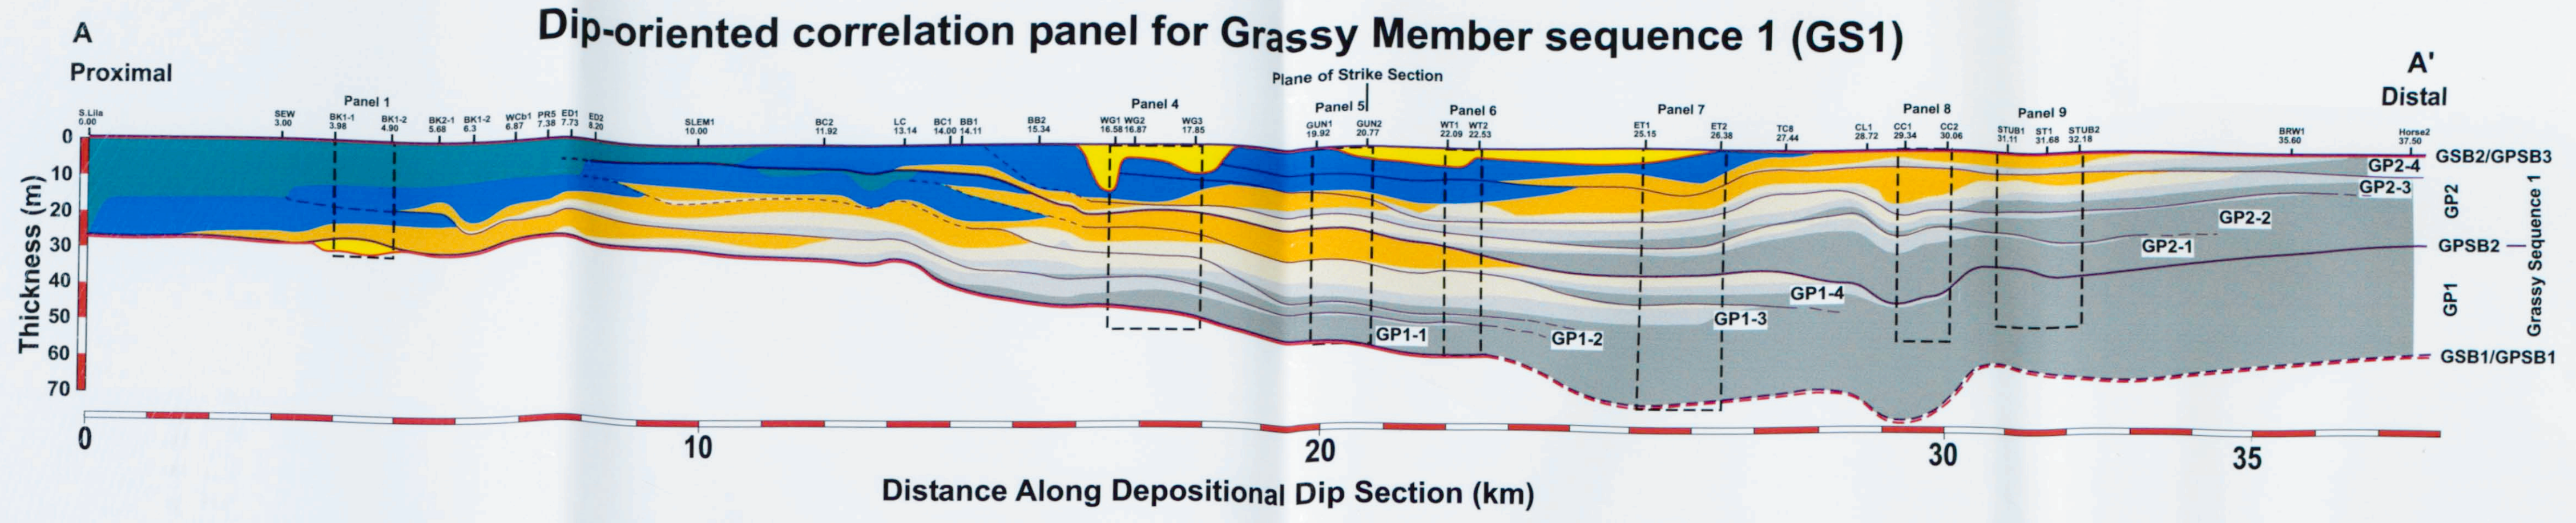

- Sequence Boundary
- Parasequence/Bedset Boundary
- Dashed line = uncertain of exact location
- Coastal Plain/Tidal
- Undifferentiated Upper Shoreface
- Upper Shoreface (USF)
- Incised Valley Fill
- SCS Dominated Sandstone
- Discontinuous Shales
- HCS Dominated Sandstone
- Lower Shoreface (LSF)
- Sandstone Dominated Heterolithics
- Lower Shoreface - Heterolithics (LSF-Het)
- Offshore-Transition (Off-Trans)
- Offshore Shale and Siltstone Dominated Heterolithics

Enclosure 3

Phd. Thesis of M. J. Arnot

**Title: Quantitative Outcrop Analogue Data
for Modelling of Storm-Dominated,
Shallow Marine Shoreface Reservoirs**

Enclosure 3: Panel 6, Panel 7 and Panel 8

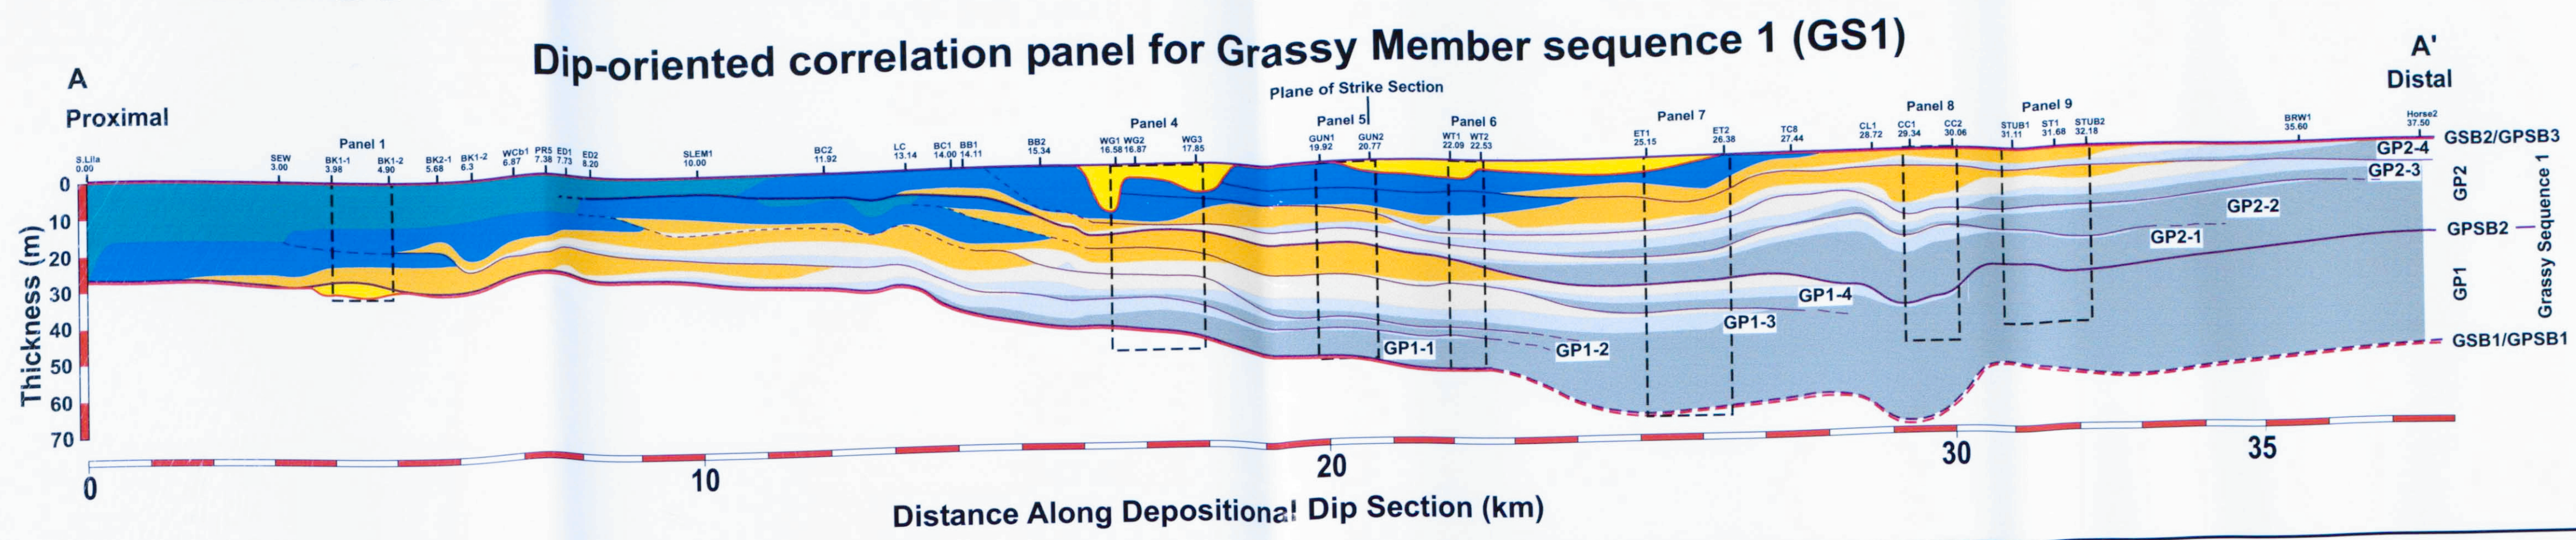

Enclosure 4

Phd. Thesis of M. J. Arnot

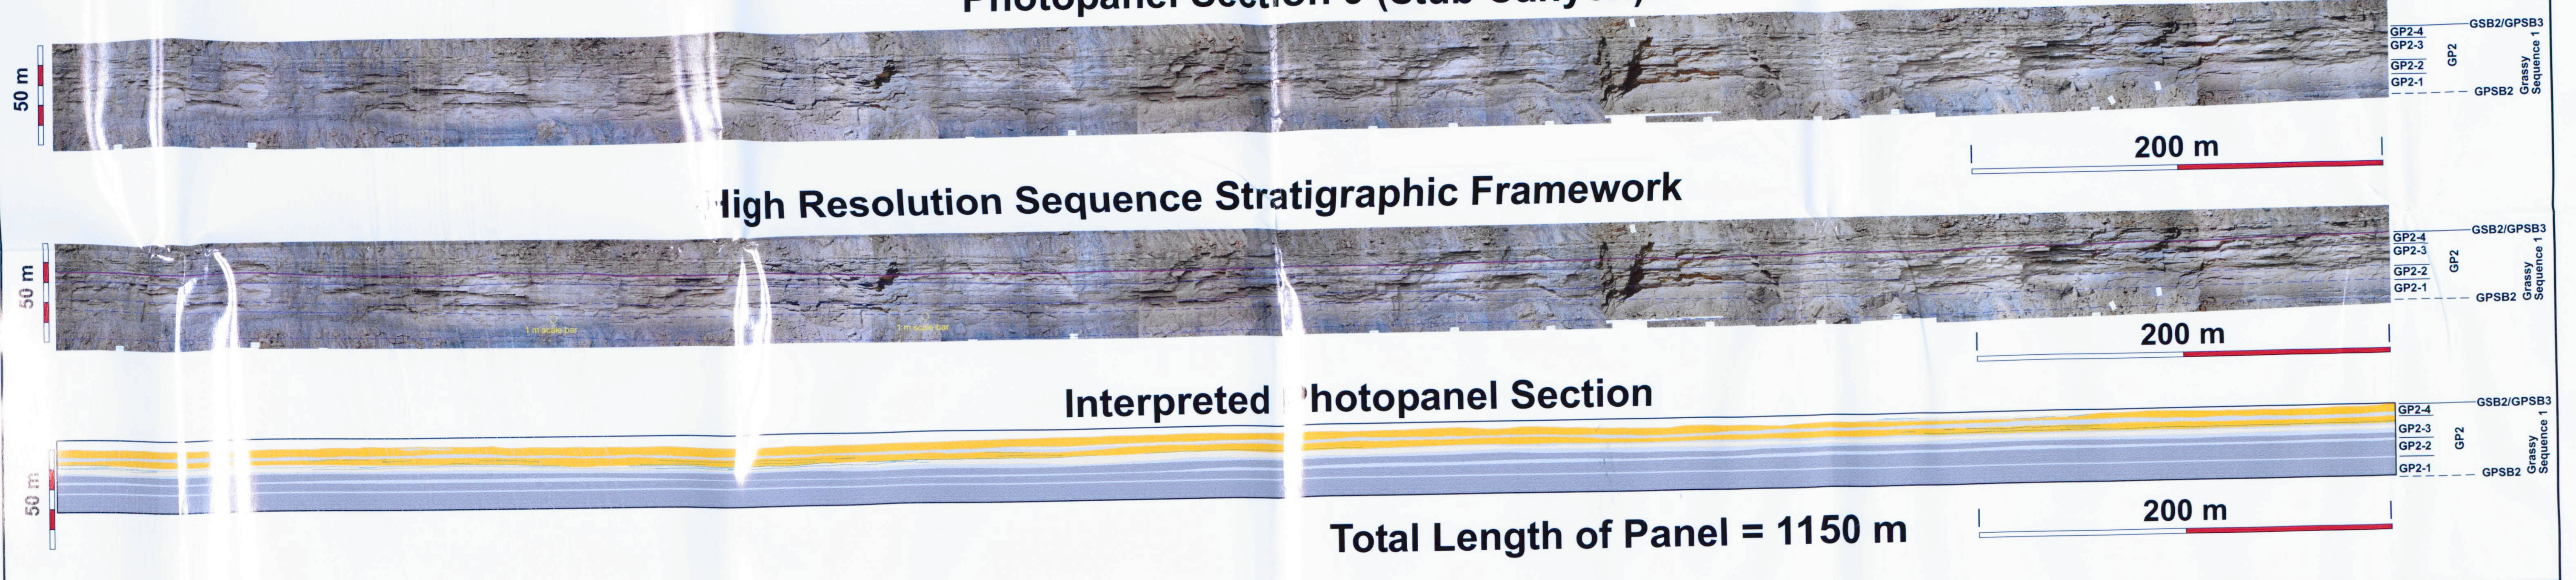

Title: Quantitative Outcrop Analogue Data
for Modelling of Storm-Dominated,

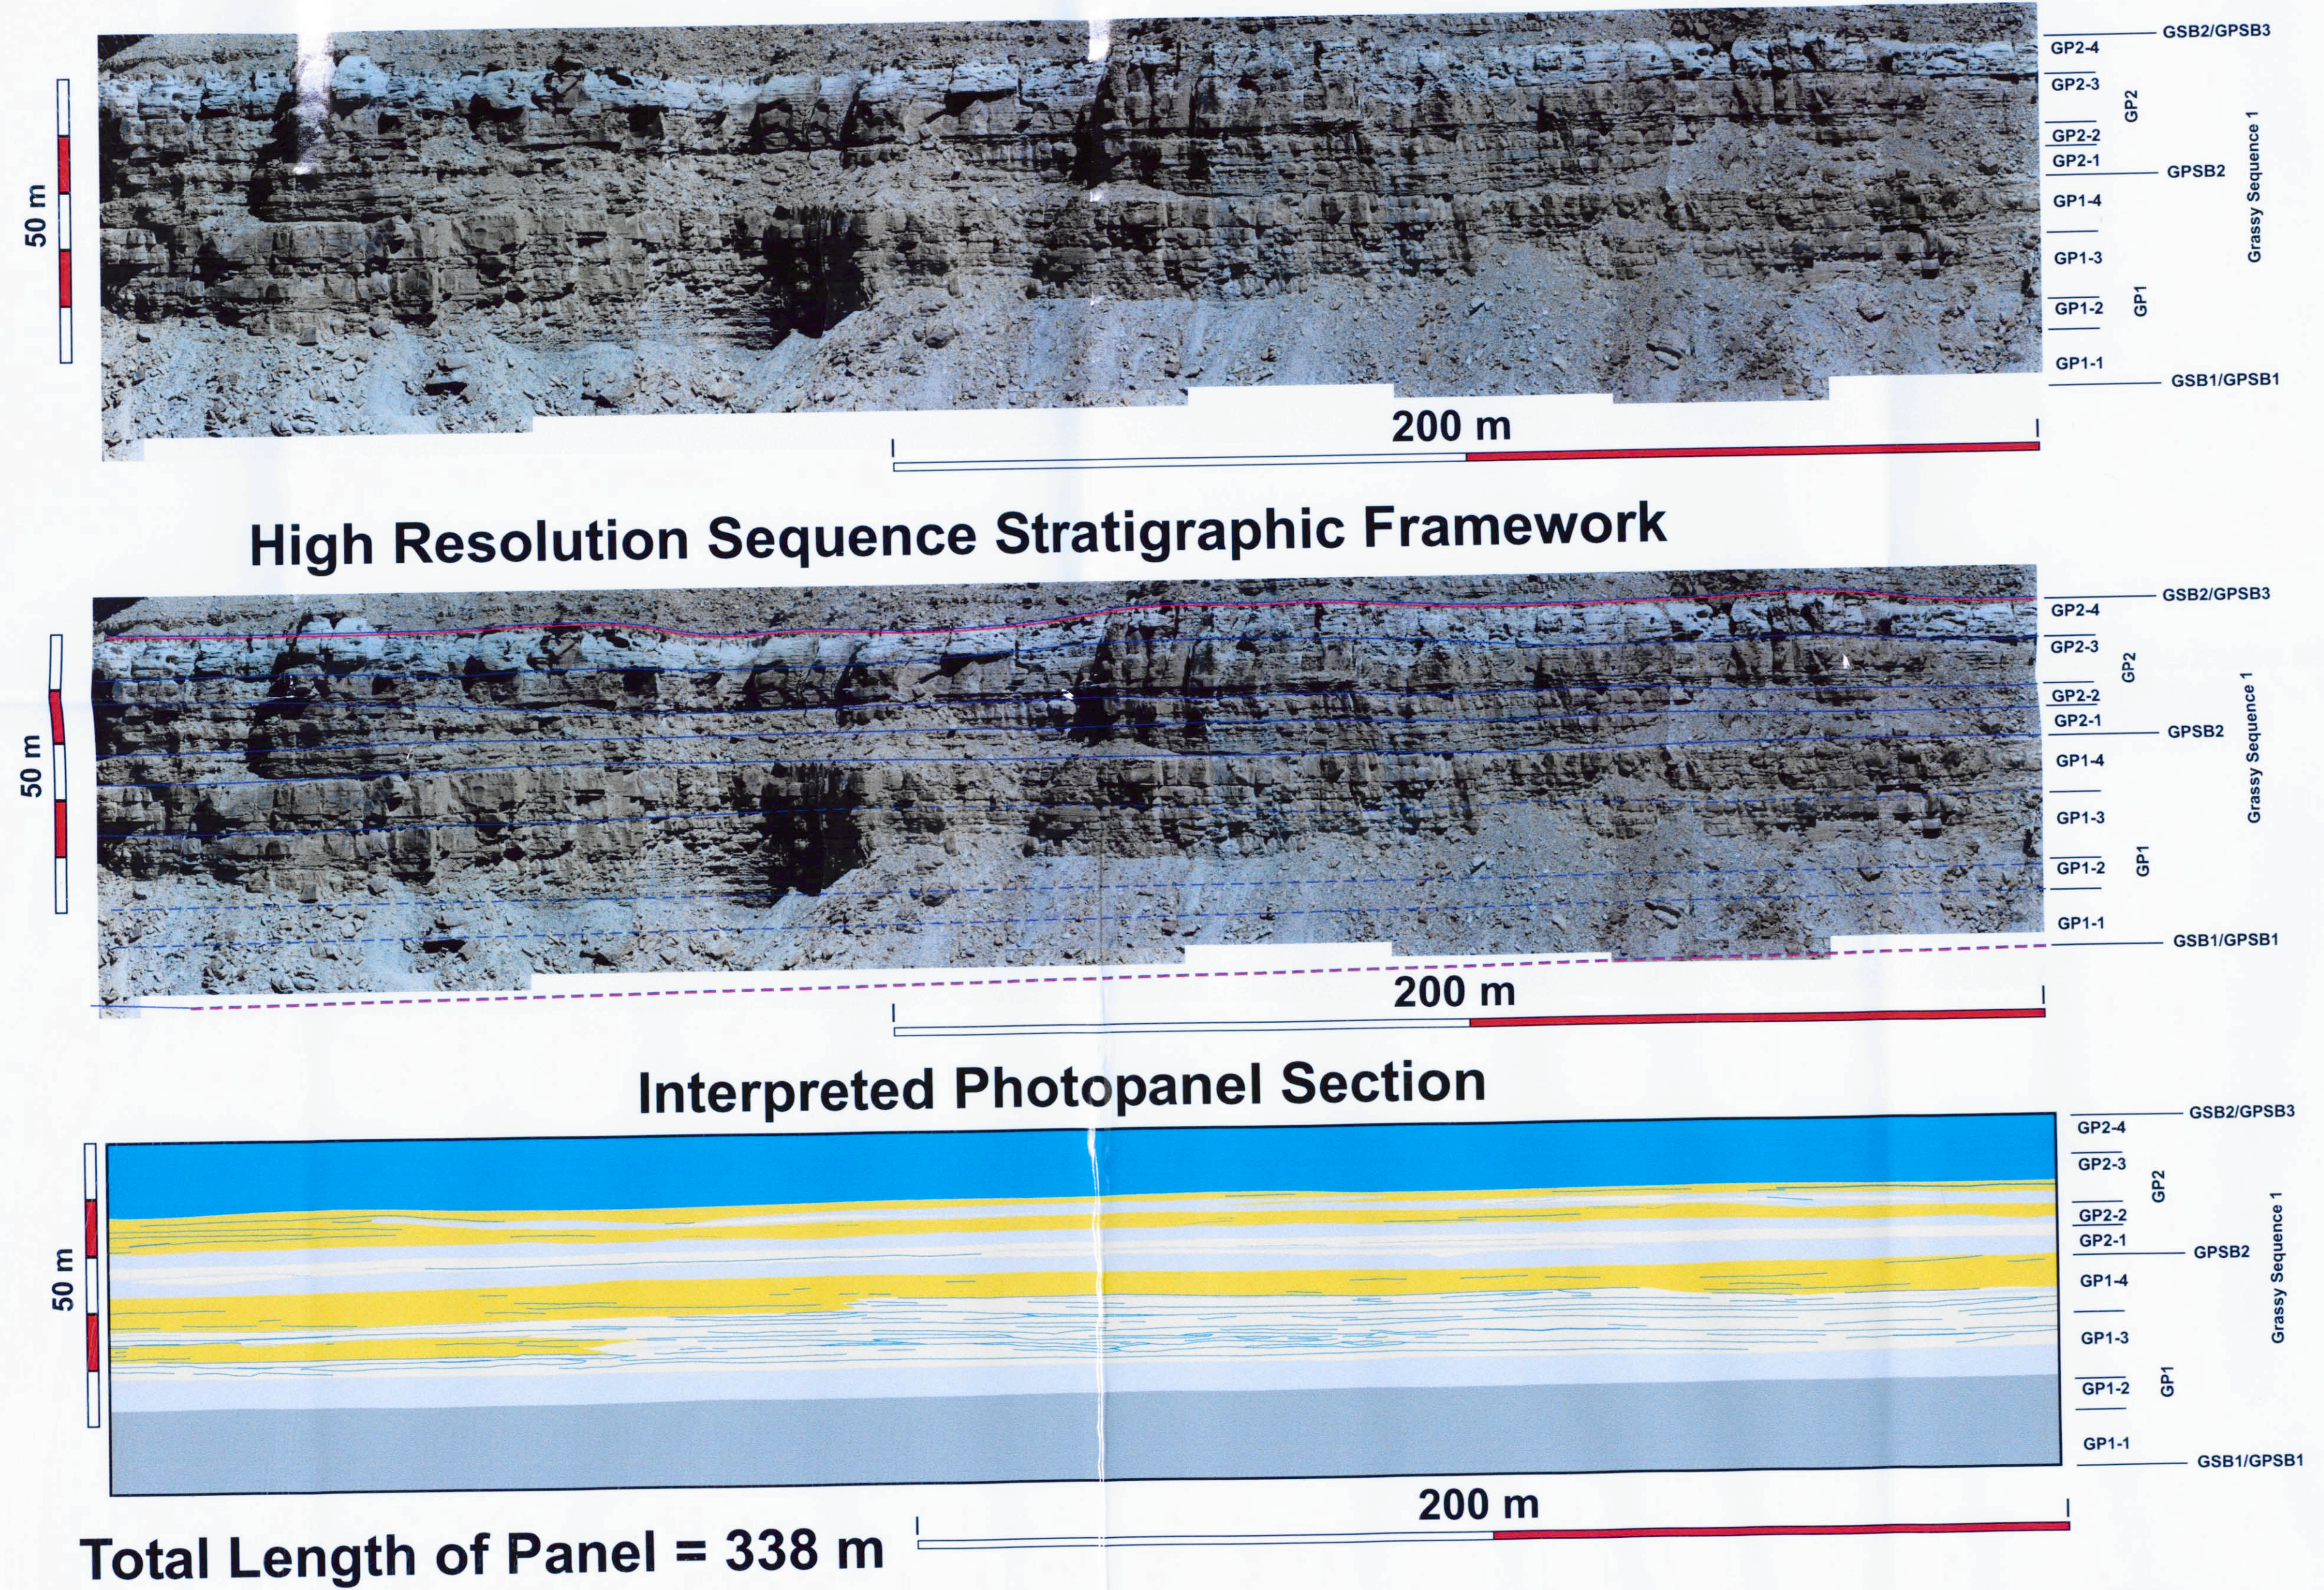

Enclosure 4: Panel 9, Panel 12 and Panel 13

Photopanel Section 9 (Stub Canyon)

Photopanel Section 12 (Stone Cabin)

Photopanel Section 13 (Price River Confluence)
