Chapter-8

Be Aware of Stealing- A Campaign

Khaliq Ahmad/Norazleen bt. Othman

INTRODUCTION

Stealing is very obvious to us and it is an important issue to be look out. When a person takes something that belongs to somebody else without permission it is consider as a stealing. There are many case of stealing that has been identified in this university. Without our awareness, it's happened continuously and it is very difficult to stop it. Many people have been involved in these unethical practices. It is involving the students its self or the outsiders. Generally, we blame other people because of this case but it is important to notices that stealing usually happened because of our faults. Therefore, we have introduced Awareness Campaign of Stealing in this university and we want to target this campaign to all students in this university on each Kuliyyah and Mahallah. Generally we want to expose this campaign to students to create the behavior of always being careful and helping to remember each other in keep their belongings. We also held this campaign in this university because there are not many that we heard about save our belongings from the theft.

This campaign also wants to identify several cause and effect on the case of stealing. The obvious cause of stealing is the carelessness among student. From our observation, students take easily on the cases of stealing. It is because they usually left their belongings in the place that are not saved without proper observation. There are several cases happened in several Mahallah because students are rarely lock their door when they want to go out, not even that, this cases also happened when they are on their room and not aware to people that enter to their room.

The case of stealing have a greater impact on the student life because the lose of their precious belonging. For an example, the stuff that is usually being stolen is laptop, purse, headphone, money and so on. This will affected their study and they have to make a report in order to get their stuff back. We also want to stress about the role of effected party on this case such as principle, fellows, security, students and so on. They have an important role and responsibility to avoid or reduce this case. The right action must be taking to observe this case and to make it does not happened again.
