

ASCC 2015

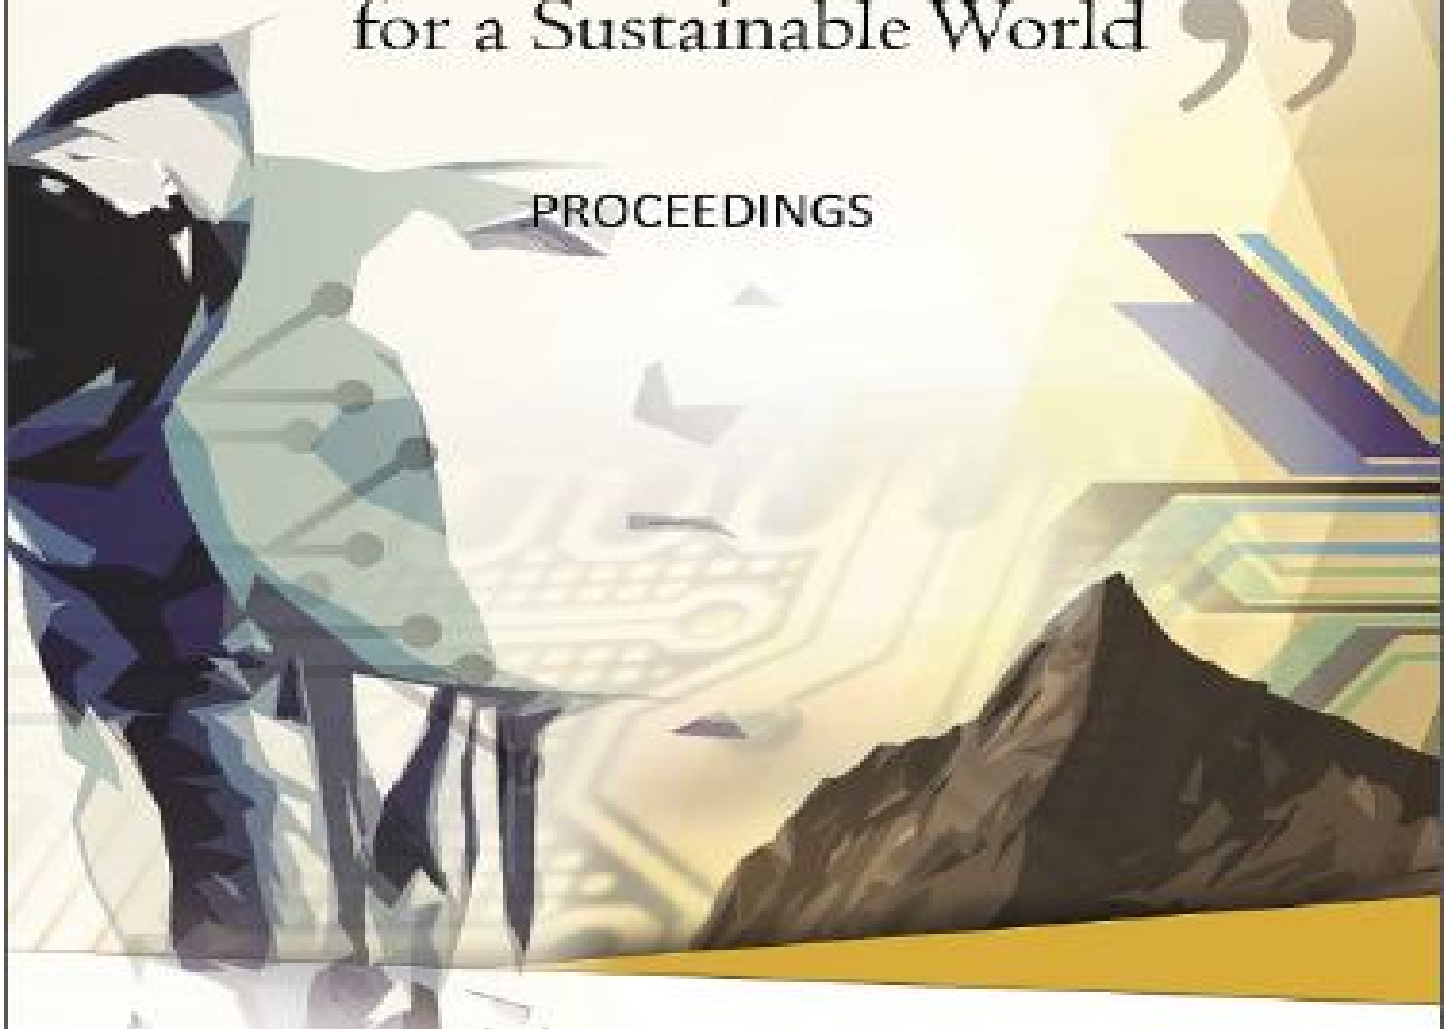

Kota Kinabalu, Malaysia

10th Asian Control Conference

Sutera Harbour Resort, Kota Kinabalu, Sabah
31st May - 3rd June 2015

“ Emerging Control Technique
for a Sustainable World ”

PROCEEDINGS

ISBN: 978-1-4799-7862-5

**Proceedings of the 10th Asian Control Conference, May 31-June 3,
2015, Kota Kinabalu Malaysia**

Printed in Malaysia

Table of Contents

2D Occupancy Grid Mapping With Inverse Range Sensor Model.....	1
A Backstepping based Flight Control Design for an Overactuated Flying Wing Aircraft.....	7
A Calculation Method of Crane Deflection Considering the Boom Gap.....	13
A Charge Pump based Power Conditioning Circuit for Low Powered Thermoelectric Generator TEG.....	18
A Collaborative Control of Brain Computer Interface and Robotic Wheelchair.....	24
A Comparison of Tracking Control Methods in Multi Legged Robots.....	30
A Computer Aided Design Method of Stabilizing Controllers for Chaotic Systems External Force Control.....	36
A Control of Sliding Doors For Realizing Well Being Livings.....	43
A Controller Design for Nonlinear Systems with Time Delay Using Closed Loop Step Response Data.....	48
A controller design method for unidentifiable linear SISO systems.....	54
A Data driven Predictive Controller Design based on Reduced Hankel Matrix.....	60
A Design Method for Modified Smith Predictors for Multiple Input Multiple Output Non Minimum Phase Time Delay Plants with Feedback Connected Multiple Time Delays.....	67
A Design Method of On demand Type Feedback Controller Using Coprime Factorization.....	71
A Distributed Algorithm for Grid based Search by a Multi Robot System.....	77
A Dynamic Output Integration Mechanism for LQG Power Networks with Random Type Parameters.....	83
A Fallback Control Study of Networked Control Systems for Cybersecurity.....	89
A Flyback SMPS LED Driver for Lighting Application.....	95
A Fully Distributed Approach to Resource Allocation Problem under Directed and Switching Topologies.....	100
A Fuzzy Neural Approach to Novel Color Balance With	

FPGA Implementation.....	106
A fuzzy time series prediction by GA based rough sets model.....	112
A hybrid method for brain MRI classification.....	118
A Mathematic Modeling for Hydraulic Transmission Line.....	123
A Mathematical Model of Immune Response to Tumor Invasion Incorporated with Danger Model.....	129
A Method for Autonomous Action Generation Based on The Easiness Criterion.....	135
A Method for Collision Free Assisted Navigation of Semi autonomous Vehicles In Dynamic Environments with Moving and Static Obstacles.....	141
A Method for Hand Eye Calibration of a Robot Vision Measuring System.....	147
A Method for Physiological Control of a Cardiac Assist Device.....	153
A Model Following Control using a Robust Gain Matrix based on the Normalized Plant.....	158
A Model Free Predictive Control Method by l_1 Minimization.....	164
A New Adaptive Control Method for a Class of Feedforward Nonlinear Systems with Unknown Growth Rate.....	170
A New Electronic Interface for Inductive Sensors.....	175
A New Family of Continuous Higher Order Sliding Mode Algorithm.....	179
A new model and control scheme for six DOF relative coupled motion of spacecraft formation.....	185
A New Predictive Control Technique for Force Control of Pneumatic Actuator Plant.....	191
A Nonlinear Adaptive Backstepping Approach for Coordinated Excitation and Steam Valving Control of Synchronous Generators.....	197
A Nonlinear MPC Based on Application of a Sequential Distributed Accelerated Gradient Method to the Continuation Method.....	203
A Note on Observability of Boolean Control Networks.....	209
A Novel Animal Model for Subcutaneous Soft Tissue Infection using Temporally Neutropenic <i>lys</i> EGFP mice.....	214

A Novel Fault Reconstruction Scheme for a Class of Nonlinear Systems.....	218
A Novel Fuzzy based Control Strategy for Grid connected Large scale Solar Farm with Supporting The Grid Frequency Regulation.....	224
A Novel Knee Exoskeleton For Overweight Person.....	232
A Novel Network Construction Via Nodes Mergence Approach.....	236
A Novel Node Joining Algorithm For Spectrum Aware Cluster Based Cognitive Radio Ad Hoc Network.....	242
A Novel PID Gain Tuning for a System with Target Specifications using Evolutionary Constrained Optimization.....	248
A Novel Q Scanning for Convex Hull Algorithm.....	252
A parameter space design method using simulation.....	257
A Practical Control Performance Index and PID Controller Design.....	263
A Precise Fuzzy Controller Developed for Overhead Crane.....	267
A proposition and an evaluation for compact multiple odor scan system.....	272
A prototype of cyber incident diagnosis mechanism for cyber attacks early recognition support system.....	278
A Reduce Chattering Problem Using Composite Nonlinear Feedback And Proportional Integral Sliding Mode Control.....	283
A representation model of collaboration In design process.....	289
A Review of 3 D Magnetic Properties Testing System for Measuring Rotational Core Loss of Soft magnetic Materials.....	294
A Review of S Band Antenna System G T Measurement Technique.....	300
A Review on the Current State of Artifact Removal Methods for Electroencephalogram Signals.....	306
A Robust Control Approach for Magnetic Levitation System based on Super Twisting Algorithm.....	312
A Root Locus Approach to Constructing Markovian Coupled Oscillators to Capture the Dynamics of a Non Markovian Quantum System.....	318
A Scenario Based Convex Formulation for Probabilistic Linear Constraints In MPC.....	324

A Simple Prediction Method of Ballistic Missile Trajectory to Designate Search Direction and Its Verification Using a Testbench.....	330
A Simplified Position Control of a Transverse Flux Type Linear Synchronous Motor Using Hall Sensors.....	337
A Solution to the Finite Escape Time in H Infinity Filter Based SLAM.....	343
A status of Control System Security In Japan.....	349
A Study of a New Controller Interface for Omnidirectional Robots.....	353
A Study of Discriminant Visual Descriptors for Sport Video Shot Boundary Detection.....	359
A study of driving trajectory for standing up motion support system.....	363
A Study on Tracking Performance of the Pneumatic System with Enhanced NPID Controller.....	368
A Support Vector Machine Based Technique for Online Detection of Outliers in Transient Time Series.....	374
A Time-Varying Saturated Synchronous Formation Controller for Nonholonomic Mobile Robots.....	380
A Variant Fisher Discriminant Analysis Algorithm and its Application to Fault Diagnosis.....	386
A wisd routing protocols for Leo Satellite Networks.....	392
Abnormal Operation Diagnosis in Human Machine Systems.....	398
Acceleration Feedback and Friction Compensation for Improving the Stability of Admittance Control.....	404
Action Learning to single robot using MAS A proposal of Agents action decision method based repeated consultation.....	410
Active Front Steering for Steer by Wire Vehicle via Composite Nonlinear Feedback Control.....	416
Active Front Wheel Steering System for 14 DOF Armoured Vehicle Model due to Firing Force Disturbance.....	422
Activity Recognition in Smart Homes Using Absolute Temporal Information in Dynamic Graphical Models.....	428
Adaptive Control Energy Recycling for Vehicle Suspension Systems.....	434
Adaptive Control for Vibration Suppression by Using Self organization Map.....	439

Adaptive control of air to air missile using Multilayer Neural Network feedforward and RISE feedback terms.....	444
Adaptive Iterative Learning Control Approach for PH Neutralization of Batch Processes.....	452
Adaptive Neuro Fuzzy Control of Wet Scrubbing Process.....	457
Adaptive Sliding Mode Control for Stabilization of Stochastic Chaotic Systems with Multi constraints.....	463
Adaptive Super Twisting Sliding Mode Control on Hydraulic Actuator of a 6 DOF Parallel Manipulator.....	469
Additional Internal Speed Feedback loop for Servomechanism Residual Vibration Active Damping.....	475
Agent Motivational and Repulsion Forces Optimization in Agent Basic Movement Model.....	480
Agile gait generation for an Anguilliform Robotic Fish.....	485
Algorithmic Modeling and Analysis of Nonlinear Biological Systems.....	491
Algorithms to select right driver nodes for Multi Agent Systems.....	497
An Evolved Climbing SAWR From Simulation to Realization with 3D Printing.....	503
An Extreme Learning Machine Approach for Chinese Speech Recognition.....	509
An H Controller Design Based on the Butterworth Filter Conversion.....	514
An H Infty Design for Dynamic Pricing in the Smart Grid.....	520
An Identification Procedure for Rate Dependent Friction Laws of Robotic Manipulator with Limited Motion Range.....	526
An Illumination Robust Algorithm based on Visual Background Extractor for Moving Object Detection.....	531
An Image Processing Approach for Mathematical Modeling of Flexible Structure.....	537
An Implantable artificial esophagus with the new food transport system based on the analysis of goats specimen.....	543
An Iterative Method for Solving Constrained Nonlinear Optimal Control Problems Using Legendre Polynomials.....	547
Analysis of classification performance of fNIRS signals from prefrontal cortex using different temporal windows.....	552

Analysis of Prediction Methods for Swarm Robotic In the case of Oil Spill Tracking.....	557
Analysis of the Storage Capacity In an Aggregated Heat Pump Portfolio.....	563
Analysis on Electrooculography Based on the Effect of Eye Massaging Device.....	569
Analytical Methods for Web Form Usability.....	575
Analyzing human s continuous learning processes with the reflection sub task.....	581
Angle Compensation by Fuzzy Logic for Balancing a Single wheel Mobile Robot.....	587
Application of Depth Sensor for Breathing Rate Counting.....	591
Application of disturbance observer based enhanced composite cascade control scheme to outlet temperature in process furnace control system.....	596
Approximate Feedforward Control.....	602
Artifact Removal from EEG Signals Using the Total Variation Method.....	608
ASPR based output feedback control with an adaptive predictive feedforward input.....	612
Assisted cloning of arbitrary unknown multi qudit state.....	618
Asymptotic Behaviour of Solutions of a Lotka Volterra System.....	623
Asymptotically Stable Adaptive Consensus Control of Multi Agent Systems Based on H Infinity Control Criterion.....	627
Asynchronous Cooperative Guidance for Multiple Intercepting Flight Vehicles - A Dynamic Target Coverage Approach.....	633
Attitude Control with a Region Based Method for an Unmanned Aerial Vehicle.....	639
Automatic detection system of the fallen down for the parked bicycle in the underground parking garage using optical flow method.....	644
Automatic Extraction of Specific Scene from Sports Video.....	649
Bayesian Dynamic Linear Model based Modeling Method for an Aniline Stripping Column.....	653
Bearing Only Unscented Smoothers for a Visual SLAM.....	658

Biologically Inspired Lighting Invariant Facial Identity Recognition.....	664
Biosignals based Intelligent Control Interface for Current Induced Physiological Devices.....	670
Building Quadrotors with Arduino for Indoor Environments.....	675
Calibration Model Design based on Weighted Nearest Correlation Spectral Clustering.....	681
Camera Calibration for Multi-Modal Robot Vision Based on Image Quality Assessment.....	687
Untitled.....	687
Capacity Estimation for Lithium Ion Batteries Using Adaptive Filter on Affine Space.....	693
Chameleon like Shooting Manipulator for Accurate 10 meter Reaching.....	699
Characteristics Evaluation of Stretchable Strain Sensor for Control of Pneumatic Artificial Muscle.....	706
Characterization of Motor and Propeller Sets for a Small Radio Controlled Aircraft.....	712
Characterizing and modulating the mechanical properties of hydrogels from ventricular extracellular matrix.....	718
Cigarette Packet Seal Defect Detection Based on Image Recognition Technology.....	723
CNG Diesel Dual Fuel Engine A Review on Emissions and Alternative Fuels.....	730
Communication based fault detection and Isolation for multi agent systems.....	734
Comparative Analysis of Multi Resolution Optical Flow Techniques for Flow Rate Estimation.....	739
Comparative Studies on Breast Cancer Classifications with K Fold Cross Validations Using Machine Learning Techniques.....	744
Comparison of an X4 AUV Performance Using A Direct Lyapunov PD Controller and Backstepping Approach.....	750
Comparison of PID Control and Linear Model Predictive Control Application to Regenerative Thermal Oxidizer System.....	756
Comparison of Single and Segmented excitation of Electrical Capacitance Tomography.....	761

Comparison of Two Control Schemes for Operating an Ultrasonic Scanning Device.....	767
Comparison of zero power controllers in double parallel magnetic suspension system with parallel connected coils.....	773
Comparisons Between Radial Basis Function and Multilayer Perceptron Neural Networks Methods for Nitrate and Phosphate Detections In Water Supply.....	779
Comparisons of Skill Index Algorithm In Driving for Human Adaptive Mechatronics.....	785
Complexity Reduced Explicit Model Predictive Control by Solving Approximated mp QP Program.....	791
Compound Learning Control for Autonomous Position and Obstacle Control of Aerial Hovering Vehicles.....	797
Comprehensive Design of Linear Control Systems and Its Application to PWM Inverters.....	803
Comprehensive Lane Keeping System with Mono Camera.....	808
Compressive Image Retrieval with Modified Images.....	814
Computational Aerodynamics of Long Segment Congenital Tracheal Stenosis with Bridging Bronchus.....	820
Conflict Pattern of Motorcyclist Red Light Runners RLR at Signalled Intersection.....	825
Consensus Algorithm for Obstacle Avoidance and Formation Control.....	830
Consensus Algorithm of Multi agent System with Binary Valued Communication.....	836
Consensus of multi agent systems with switched linear dynamics.....	842
Consensus Problem of High order Multi agent Systems under Predictor based Algorithm.....	848
Continuity of the Value Function In Sparse Optimal Control.....	854
Contraction support for the right ventricle by a shape memory alloy fibered artificial myocardium.....	859
Control of a novel single phase grid connected solar PV battery hybrid energy system.....	862
Control of the Position and Attitude of a Tethered Quadrotor Considering the Influence of a Tether.....	866
Control performance driven period and deadline selection for Cyber Physical Systems.....	872

Control Strategies for Improving Vehicle Stability State of the art Review	878
Controllability and minimum energy control of fractional systems	886
Controlling Parameters for Jatropha Biodiesel Production in a Batch Reactor	891
Convergence Rate Analysis of Delay Interconnected Positive Systems under Formation Control	894
Convergence speed analysis for evolutionary congestion games	900
Introduction	900
Problem formulation	900
Evolutionary congestion games	901
Dynamics of nondeterministic evolutionary congestion games	901
Dynamics of deterministic evolutionary congestion games	902
Application to traffic networks	903
General results	903
An illustrative example	904
Conclusion	904
References	904
Convergence Time Evaluation of a Gossip Algorithm over Signed Graphs	905
Cooperative Capture by Multi Agent using Reinforcement Learning	910
Cooperative Control for Self Organizing Microgrids via Physical Network Connectivity	916
Cooperative robust output regulation of linear minimum phase multi agent systems under switching network	922
Cortical Activation Pattern for Finger Movement	927
Cost effective Sludge Management Through Processing Capability Improvement Of A Sludge Drying Plant	931
Coverage control for homogeneous mobile sensors with Input constraints on a unit circle	936
Coverage Control on Multi Agent System	941
Data Driven Controller Synthesis for Negative Imaginary	

Systems_____	946
Data driven Model Free Adaptive Control for a Class of Interconnected Systems_____	951
Decellularized bovine meniscus in morphological assessment prior to bioscaffold preparation_____	957
Decentralized Disturbance Attenuation Control for Interconnected Power System_____	961
Decentralized Event Triggered Sliding Mode Control_____	968
Decentralized guaranteed cost control for uncertain large scale singular systems via proportional plus derivative state feedback_____	973
Delayed feedback selective pattern formation in reaction diffusion systems_____	979
Description of Multi Relationship Structure of Feeding Process_____	985
Design a Novel Asymmetric Bifurcating Microfluidic Channel for Cell Separation by Size_____	991
Design and Analysis of CentrUMS-ITB Unmanned Semi-Submersible Vehicle_____	996
Design and Implementation of an Industrial Generalized Predictive Controller on Multivariable Processes via Programmable Logic Controllers_____	1001
Design and Implementation of an Intelligent Vehicle System for Autonomous Valet Parking Service_____	1007
Design and modeling of hot compressed water extraction process for palm oil_____	1013
Design of a Data Driven Expert Controller_____	1019
Design of a Novel Quasi Zero Stiffness Based Sensor System for Measurement of Absolute Vibration Motion_____	1023
Design of a periodic photovoltaic charge discharge schedule reflecting power demand prediction error_____	1029
Design of Adaptive Voltage Control for Single Stage Boost Inverter_____	1035
Design of an Implicit Self tuning PID Controller Based on a GPC_____	1041
Design of an Optimal Sliding Surface for 2 DOF Twin Rotor MIMO System_____	1046
Design of Collision Warning System Based on	

Performance Based Approach that Considers Driver Behavior.....	1052
Design of Disturbance Response in Multirate Systems.....	1058
Design of Optimal GBN Sequences for Identification of MIMO System.....	1062
Design of Robust Controller for Multi functional Remote Weapon Carrier.....	1068
Determination of the end of the positioning phase using support vector machine.....	1072
Determining Subject Distance Based On Face Size.....	1078
Developing An Efficient Fuzzy Model for Phishing Identification.....	1084
Development and Performance Evaluation of a linear actuator based Wearable Assistive Device.....	1090
Development of 4WIS SBW in Wheel Drive Compact Electric Vehicle Platform.....	1096
Development of a Genetic Algorithm based Nonlinear Model Predictive Scheme.....	1102
Development of a Hybrid driven Autonomous Underwater Glider with a Biologically Inspired Motion Control System.....	1108
I. Introduction.....	1108
II. Development of Hybrid-Driven Autonomous Underwater Glider.....	1109
III. Artificial Homeostatic Motion Control System.....	1109
IV. Results and Analyses.....	1110
A. Sea Trial Test.....	1110
B. Benchmarking of Homeostatic Controller Performance.....	1111
C. Closed-loop Test and Validation.....	1112
V. Conclusion.....	1113
Acknowledgment.....	1113
References.....	1113
Development of a Self Propelled Machine for Hoiling Soil in Large Polybags in Oil Palm Nursery.....	1114
Development of an Simplified Modeling Control System for Maximization of Polymerization in a Pilot Plant.....	1119
Development of Diagnostic System for Atherosclerosis	

based on Intrinsic Fluorescence using Multispectral Imaging_____	1123
Development of KBES with Hazard Controlling Factors and Measures for Contracting Health and Safety Risk In Oil and Gas Drilling Process_____	1127
Development of Land Target Following System of Hexacopter_____	1132
Development of Load Carrying and Releasing System of Hexacopter_____	1138
Development of Non contact Carrier System using Solar Magnetic Suspension_____	1144
Development of pipette tips to control the spontaneously generated charge of droplets_____	1149
Development of Simulator for Pressure Controlled Cooling Pumps_____	1152
Development Of Target Tracking Control Of Gun Turret System_____	1158
Diagnosis of Distributed Faults In Outer Race of Bearings via Park's Transformation Method_____	1163
Direct Adaptive Neural Control of a Quadrotor Unmanned Aerial Vehicle_____	1169
Direct Vector Control of Induction Motors Based on Independent Estimation of Resistance and Flux_____	1175
Discrete Sliding Mode Control for a Non-minimum Phase Electro-hydraulic Actuator System_____	1181
Discrete Time LTR Design of Optimal Output Disturbance Cancellation Controllers Using Filtering Type Kalman Filters_____	1187
Distributed Consensus Strategy for Economic Power Dispatch In A Smart Grid_____	1193
Distributed Optimization with Equality and Inequality Constraints with Delayed Information of Feasibility_____	1199
Distributed robust control of linear multi agent systems under directed topology_____	1205
Double Loop Control Structure for Oscillatory Systems Improved PID Tuning via Multi Scale Control Scheme_____	1211
Drift Reduction in IMU only Pedestrian Navigation System In Unstructured Environment_____	1217

Dual Fuzzy Based MPPT for Dual Load Operation with Photovoltaic SEPIC Converter.....	1224
Dynamic Analysis of a Hexapod Robot with Parallel Leg Mechanisms for High Payloads.....	1230
Dynamic Event Observation and Partial State Perception for Distributed Supervisory Control.....	1236
Dynamic Zoning based on Situational Activity for ICS Security.....	1242
Dynamics and Control of Off Centered Crane Lifts.....	1247
Effective Environment for Memorizing Process Based on Electroencephalography.....	1253
Effects of Diagonal Dominance on Performance of Passive Fault Tolerant Servo Systems.....	1258
Efficient Image Stitching of an Image Sequence by Selecting Dominate Frames.....	1264
Efficient Wavenumber Selection Based on Nearest Correlation Louvain Method for NIR Calibration Modeling.....	1268
Electrogoniometric System An Instrumentation to capture knee movements for forward walking.....	1274
Electrospun Polycaprolactone PCL and PCL nano hydroxyapatite PCL nHA based Nanofibers for Bone Tissue Engineering Application.....	1278
EM TV Reconstruction Algorithm for Pinhole Type Fluorescent X Ray Computed Tomography.....	1282
Empirical Model of Reflective Bending Moment for Training Simulation of Needle Intervention.....	1288
Enhancing effectiveness of Virtual Reality Rehabilitation system Durlan Runtuh.....	1294
Ensemble Control of Open Quantum Systems Using Differential Evolution.....	1300
Equilibrium Points Analysis for Attitude Control of Spacecraft with Two Reaction Wheels.....	1306
Estimation Error Analysis of System Matrices In Some Subspace Identification Methods.....	1312
Estimation of Rice Planted Area Using Competitive Neural Network.....	1318
Evaluation of Waste Management Systems Using Fuzzy Cognitive Maps and Optimization.....	1324

Evaluation on Mechanical Impact Parameters in Piezoelectric Power Generation.....	1330
Existence and Uniqueness of Solution for Synthesis Problems of a Class of Gene Regulatory Networks.....	1336
Experimental characterization and modeling of telescope behavior at low velocities.....	1342
Fatty acid contents in cardiomyocytes in culture supplemented with linoleic and linolenic acids.....	1348
Fault Detection in a Rotational System with an Eccentric Load using Sliding Mode Observer.....	1352
Fault Diagnosis of Power Transformer Using Optimally Selected DGA Features and SVM.....	1358
Fault tolerant control of electromagnetic suspension system with simultaneous sensor and actuator faults.....	1363
Feedback Linearization Control of the Air Supply System of PEM Fuel Cells.....	1369
FingerCode for Identity Verification using Fingerprint and Smart Card.....	1375
Finite Time Control of Unmatched Uncertain Systems using Super Twisting Algorithm.....	1381
Force Optimization of a Linear Motion Type Electrostatic Microactuator using Finite Element Method FEM Analysis for High Thrust Performance.....	1386
Forward and inverse solution for the MEMS deformable mirrors in adaptive optics.....	1390
Fractional order identification for Electro-Hydraulic Actuator.....	1396
Freezing of Gait FoG Detection for Parkinson Disease.....	1401
Frequency Weighted Square root Optimal Hankel Norm Model Reduction.....	1407
Fruit Maturity Detection Using Neural Network and an Odor Sensor.....	1411
Fuel Economy Analysis of A Through-the-Road Hybrid Electric Vehicle.....	1415
Further results on exponential stability of linear discrete time systems with time varying delay.....	1421
Fusion of Thermal and Depth Images for Occlusion Handling for Human Detection from Mobile Robot.....	1427

Fuzzy B Spline For Three Dimensional Urban Slum Reconstruction From ENVISAT ASAR Data	1432
Fuzzy PID Gains Tuning Differential Evolution versus Second Order Analytical Algorithms	1437
Gait stabilization of a quasi passive walker based on energy balance by utilizing a mechanical oscillator	1443
Generating Chaos with Neural Network Differential Equation for Intelligent Fish Catching Robot	1449
Genetic algorithm for regionalization problem with adaptive equity constraint	1455
Green Pepper Stem Position Detection by Using a Piezo Sensor	1461
Growth Effects of Anastomosis Site on Patient specific Aortic Hemodynamics after Coarctation Correction A Numerical Study	1465
H ₂ controller reduction using the Riccati equations and the block balanced truncation	1470
H Control of Quantum Feedback Control Systems with Time Delay	1475
H infinity control for fuzzy time delay systems via dynamic output feedback	1481
Heavy Vehicle Stability and Rollover Prevention through Switching Model Predictive Control	1487
Hemodynamic Analysis of Controlled Antegrade Pulmonary Blood Flow after Bidirectional Cavopulmonary Anastomosis	1493
Hemodynamic Influence of Surgical Methods on Systemic to Pulmonary Shunt Modified Blalock Taussig Shunt Versus Melbourne Shunt	1498
High Precision Road Segmentation for Cover Level of Forward View Estimation via Stereo Camera	1503
Human Action Recognition using Wearable Sensors and Neural Networks	1509
Human Body Motion Interface for the Mobility and its Applications	1513
Human Tracking Method based on Improved Hog Real AdaBoost	1518
Hybrid Control Based on Type 2 Fuzzy Iterative Learning	

Control Strategies with Stewart Platform for Repetitive Trajectories.....	1524
Hybrid NNMPC PID Control of a Two Link Flexible Manipulator with Actuator Dynamics.....	1529
ICA Based Positive Semidefinite Matrix Templates for Eye Blink Artifact Removal from EEG Signal with Single Electrode.....	1535
Identification and Predictive Control of Spray Tower System using Artificial Neural Network and Differential Evolution Algorithm.....	1541
Identification of power spectra by reweighted and regularized nuclear norm minimization.....	1548
Image based Neural Network Controllers for Mobile Robots to Track a Human.....	1554
Image Restoration of Confocal Microscopy based on Deconvolution Algorithms for Biological Structure.....	1560
Impact Model and Control of Ultrasonic Excitation using Electromagnetic Acoustic Transducer.....	1566
Impact of Feature Extraction Techniques on Classification Accuracy for EMG based Ankle Joint Movements.....	1572
Impacts of IoT and Big Data to Automotive Industry.....	1577
Implementation of Energy Management System for a Split Parallel In Wheel Motor Hybrid Electric Vehicle.....	1582
Implementation of Reliable H Infinity Observer Controller for TRMS with sensor and actuator failure.....	1588
Improved SIFT Algorithm for Place Categorization.....	1594
Improvement of Batch TRN Using Mean Removal and Two-Step Search Method for Lunar Lander.....	1597
Improvement of Spring Forming Accuracy Using Minimum Variance Control.....	1603
Improvement on Ride and Handling Performance in HMMWV Suspension Control using Dual Acting Semi Active Suspension System.....	1609
Improving Data Clustering and Classification Using M3 Self Organizing Maps M3 SOM.....	1615
In Vitro Recellularization of Aorta Scaffolds Prepared by Sonication Treatment.....	1622
Inclination Angle Effect on Landmine Characteristics	

Estimation in Sandy Desert using Neural Networks.....	1626
Incorporation of pre classifier and nonlinear feature selection for tropical wood species recognition system.....	1632
Independent Wheel Drive Electric Vehicle IWD EV Handling and Stability Assessment via Composite Nonlinear Feedback Controller.....	1638
Injection of silver nano particles in cotton fibers by using supercritical carbon dioxide.....	1644
Input Shaped Model Reference Control of a Nonlinear Time Varying Double Pendulum Crane.....	1648
Integrally Accurate Resolver to Digital Converter RDC.....	1654
Integration of Electrochemical Detection into a Micropump for Continuous Monitoring System.....	1658
Intelligent Control of Capillary Irrigation System for Water saving Cultivation.....	1663
Intelligent Decision Supporting Tutor in Virtual Group Operation Control and Management based on e Learning System.....	1668
Intelligent Temperature Control of a Tropical Post harvest Storage System1.....	1674
Intelligent Trajectory Conversion and Inverse Dynamic Control of a 3 DOF Neuro Rehabilitation Platform.....	1680
Interleaved Luo converter for the residential PV grid connected systems.....	1686
Introducing Computer Programming to Secondary School Students using Mobile Robots.....	1692
Invariant Set Analysis for Discrete Time Polynomial Nonlinear Feedback Systems with Dynamic Quantizers.....	1698
Investigation of Model Parameter Variation for Tension Control of A Multi Motor Wire Winding System.....	1704
Investigation of Upper Limb Movement during Badminton Smash.....	1710
IQ Level Assessment Methodology in Robotic Intervention with Children with Autism.....	1716
IRest Interactive Rehabilitation and assessment tool.....	1722
Iterative Trajectory Generation for Mobile Robot to Pass Through the Waypoints.....	1728
Joint Unscented Kalman Filter for dual estimation in a	

bifilar pendulum for a small UAV.....	1734
Jumping Motion Control for 4 link Robot Based on Virtual Constraint on Underactuated Joint.....	1740
Laser Odometry Taking Account of the Tilt on the Laser Sensor.....	1746
Leader Following Bipartite Consensus of High Order Multi Agent Systems on Signed Networks.....	1750
Leader Following Consensus of General Linear Multi Agent Systems Event Triggered Schemes.....	1755
Learning multiple Granger graphical models via Group Fused Lasso.....	1761
Less Attention Event driven Model Predictive Control of Time delay System.....	1767
Linear Quadratic Regulator and Skyhook Application in Semiactive MR Damper Full Car Model.....	1773
LMI Based Mixed H2 H Control of a Bi Stable Dielectric ElectroActive Polymer.....	1780
LMI Based State Feedback Controller Design for Vibration Control of a Negative Imaginary System.....	1786
Longitudinal Attitude Control of a Hypersonic Vehicle with Angle of Attack Constraints.....	1792
Loop Back Interference Suppression for OFDM Signals via Sampled Data Control.....	1798
Lower body segmental dynamics control using eye blinking activity.....	1802
Lunar Terrain Parameter Estimation Using LMS for Hazard Detection and Safe Landing.....	1807
Lyapunov Theory vs Sliding Mode In Trajectory Tracking for Non holonomic Mobile Robots.....	1812
Manual Tracking Using Touchscreen Interfaces.....	1817
Maximization of Probability for Location of Event Occurrence Being k Covered.....	1823
Maximizing the Income for wind power plant integrated with a battery energy storage system using dynamic programming.....	1828
Mean Shift Based Direction Finding and Separation of Multiple Sources Using Microphone Array In the Presence of Spatial Aliasing.....	1833

Medical image based Analysis of Flow in Heart with Congenital Heart Disease Numerical Simulation of Intraventricular Flow	1837
MegaBits Electronic PnP Modules for Non Engineering Students	1843
Method to Detect Impression Evaluation Patterns on Music Listened to Using EEG Analysis Technique	1848
MFAC based Balance Control for Freeway and Auxillary Road System with Multi Intersections	1854
Miniature Parallel manipulator using TiNiCu Shape Memory Alloy Microactuators	1860
Mismatched Disturbance Compensation using Sliding Mode Control	1864
Mitigating Pilot Contamination In Massive MIMO System - 5G- An Overview	1870
Model based Predictive Sampled data Control and its Robustness	1876
Model Cart Control Using EMG Signal	1882
Model Predictive Control for Wind Power Generation Smoothing with Controlled Battery Storage Based on A Nonlinear Battery Mathematical Model	1886
Model Predictive Control Strategy Based on Prediction Error Feedforward for Superheating Process	1892
Model predictive current control for PMSM considering trade off between current ripple and number of switching operations	1898
Model Predictive Steering Control for Independent Driving and Steering Vehicles considering Coaxial Steering Mechanism Implementation to an Embedded CPU	1904
Modeling and analysis of a nuclear power plant s fuel transport system	1910
Modeling and Control of Multiple Drive Belt Conveyor Systems	1916
Modeling of SBR Aerobic Granular Sludge Using Neural Network with GSA and IW PSO	1922
Modelling of Submerged Membrane Bioreactor Filtration Process Using NARX ANFIS Model	1928
Modeling of Widely Liner Quaternion Valued Systems	

Using Hypercomplex Algorithms.....	1934
Modelling Video based Anomaly Detection using Deep Architectures Challenges and Possibilities.....	1940
modelling and simulation of different electrodes of electrostatic sensors.....	1948
Modelling and Simulation of Piezoelectric Actuator for Vibration Control.....	1955
Modelling And Verification Of 5 Degree Of Freedom Vehicle Longitudinal Model.....	1961
Modelling of a Conveyor belt Grain Dryer Utilizing a Sigmoid Network.....	1967
Modified Gamma Delta Routh Approximation Method for order Reduction of Discrete Interval Systems.....	1972
Modified Variable Gradient Method for Constructing the Lyapunov Function Using Nonlinear Programming Method.....	1977
Motion Control of a 1 DOF Pneumatic Muscle Actuator Positioning System.....	1983
Motion Estimation of Deformable Target over Infrared Camera Video In Coarse Resolution with Possible Frame Out of Target by Particle Filter.....	1988
Motion Recognition for Paraplegic Patients wearing a Powered Lower Limb Orthosis In Ascending and Descending.....	1994
Moving Towards Sustainable HCD for MAJ.....	1999
Multi objective Constrained Model Predictive Controller Design of Grid Inverter.....	2003
Multi objective LPV L2 Gain Control with Game theoretic Synthesis.....	2008
Multi surface Sliding Control of MIMO Autonomous Flight Systems.....	2013
Multiple Low Rank Matrix Approach to Switched Autoregressive Exogenous System Identification.....	2018
Multuser MIMO Precoding and User Scheduling for Mobile Communications.....	2024
Mutual Adaptation In Neuro Fuzzy System for Human Posture Recognition.....	2030
Nanopositioning Performance of MIMO MPC.....	2036
Nearly Cyclic Pursuit and its Hierarchical variant for Multi	

agent Systems_____	2042
Neural Based Predictive Learning Control_____	2048
Neurocinematics Based on Passive BCI Decoding Temporal Change of Emotional Arousal during Video Watching from Multi Channel EEG_____	2054
New Approaches to Parameter Estimation with finite samples_____	2057
New DXHS Algorithm for Periodic Vibration Control Numerical Simulation and Experimental Result_____	2063
New stability criteria for linear systems with interval time varying delays via an extended state vector_____	2069
Non Fragile Static Output Feedback Control Design with Guaranteed Cost of Uncertain Takagi Sugeno Fuzzy Systems_____	2075
Nonlinear Control for First Order Nonholonomic System with Hardware Restriction and Disturbance_____	2081
Nonlinear Control of Quadrotor UAV Using Takagi Sugeno Fuzzy Logic Technique_____	2087
Nonlinear Direct Adaptive Control of Quadrotor UAV using Fuzzy Logic Technique_____	2093
Nonlinear Model Predictive Control of anaerobic digestion process based on reduced ADM1_____	2099
Nonlinear Modeling and Vibration Control for a Flexible Manipulator_____	2105
Nonlinear Self Balancing and Speed Control Using WFCMAC for Seatless Electric Unicycles_____	2111
Nonlinear Stabilization with Bounded Controller_____	2117
Nonlinear System Identification based on NARX Network_____	2123
Nonlinear wave modeling and generic model control of Heat Integrated Distillation Column_____	2129
Novel Hybrid Maximum Power Point Tracking Algorithm for PV Systems under Partially Shaded Conditions_____	2135
Observability analysis and observer design for DC DC converters A generalized approach_____	2141
Observer Design For Lipschitz Nonlinear Systems With Time varying Output And State Delays_____	2147
Odor Measurement and Intelligent Classification_____	2153

Odor sensing method using olfactory receptors and fluorescent instrumentation.....	2159
Oil Extraction From Calophyllum Inophyllum via Soxhlet Extraction Optimization Using Response Surface Methodology RSM.....	2165
On Design Conservativeness in Networked Control Over A Quantized Lossy Channel.....	2171
On homogeneous parameter dependent quadratic Lyapunov function for robust H noise attenuation in switched linear discrete time systems with polytopic uncertainties.....	2176
On line Recognition of Finger Motions Using Wrist EMG and Simple PCA.....	2182
On the Industrial Plant Performance Operating Point Drifting Phenomenon.....	2187
Online optimal regulation and tracking control of nonlinear discrete time system with control constraints.....	2193
Online sequential extreme learning machine algorithm based human activity recognition using inertial data.....	2199
Untitled.....	2199
Online Sequential Extreme Learning Machine Based Detector on TLD Framework.....	2205
Operation Power Flow System Architecture and Control Challenges of Split Parallel Through the Road Hybrid Electric Vehicle.....	2210
Optimal Composite Nonlinear Feedback with Multi Objective Genetic Algorithm for Active Front Steering System.....	2216
Optimal Control for Discrete time Singular Systems with Multiplicative noise and Input Delay.....	2222
Optimal Control of Power Cost and Consumer Satisfaction Using Smart Grid Intelligent Energy Management System.....	2228
Optimal formation control of two wheeled vehicles using model predictive control.....	2234
Optimal Particle Ratio for Magnetorheological MR Fluid Damper In Prosthetic Limb.....	2240
Optimal Tracking by LTI Controllers over Scaled MIMO Additive White Noise Channels.....	2245
Optimal Tuning of PID PD Controller by PFS for Gantry	

Crane System	2251
Optimising Effect of Recycled Frying on Palm Oil Property Using Particle Swarm Optimisation	2257
Optimization of accelerated water extraction for ginger bioactive compounds	2262
Optimization of Capacity and Operational Scheduling for Grid Tied Microgrid using Pumped Storage Hydroelectricity and Photovoltaic	2267
Optimization of Fuzzy Neural Network using APSO for Predicting Strength of Malaysian SMEs	2273
Optimization of Nonlinear Multi Stage Process with Characteristic Changes through Locally Weighted Partial Least Squares	2279
Optimizing Vehicle MR Damper Semi Active Suspension Control System by L1 Adaptive Control with Linear Time Invariant Controller	2285
Optimum Partition of Sensing Field with Given Probability on Event Locations	2291
Output Feedback H Infinity Control of Constrained Linear Systems	2295
Output Stabilization of the System with Mismatched Uncertainties using Higher Order Sliding Mode Approach	2301
Overshoot Suppression Control based on Final Tracking Error Estimation and Quantifier Elimination	2307
Parallel mechanism Based Vibration Isolation System using Displacement Cancellation Control	2313
Parameter dependence of Fuzzy Cognitive Maps behaviour	2319
Parameterization of Stabilizing Linear Coherent Quantum Controllers	2325
Parametric study of a diffuser in a pressure driven micropump	2331
Partial Stability Based Vaccination Control of SEIR Epidemic Models	2338
Particle Swarm Optimization Based Identification of a Bouncing Spherical Robot	2344
PD like FLC Admittance control of Hexapod robot s leg vertical positioning for seabed locomotion	2350

PDE Battery Model Simplification for Charging Strategy Evaluation	2355
Performance Analysis of an ElectrooculographyBased on Intelligent Wheelchair Motion Control	2361
Performance Comparison between PD Fuzzy and PID controller	2367
Performance of FOPI with Error filter Based on Controllers Performance Criterion ISE IAE and ITAE	2373
Personal Pecularity Classification of Flat Finishing Tool Motion by using Self Organizing Maps for Skill Training	2379
Pheromone Based Kohonen Self Organizing Map PKSOM In Clustering of Tropical Wood Species Performance and Scalability	2384
Phishing Identification An Efficient Neuro Fuzzy Model Without Using Rule Sets	2389
Physical Interpretations of Negative Imaginary Systems Theory	2395
PI Controller Design of a dc dc Zeta Converter for Specific Phase Margin and Cross over Frequency	2401
PID tuned AIS hover control for lab scaled helicopter system	2407
Poly Caprolactone Chitosan based Scaffold Using Freeze Drying Technique for Bone Tissue Engineering Application	2411
Portable Heart Rate Measurement for Remote Health Monitoring System	2415
Position Control of Stewart Platform using Continuous Higher Order Sliding Mode Control	2420
Potential of Deep Seawater Aquaculture for Economic Transformation in Sabah Malaysia	2426
Power Consumption Rate Analysis of Bioloid Humanoid Robot	2432
Predicting the Boiling Point of Diesel Fuel using Adaptive Linear Neuron and Near Infrared Spectrum	2438
Prediction of Discrete Time Signals via Adaptive Estimation	2441
Predictor based Dynamic Surface Control for Flexible Joint Robot System with Input Time delay	2447
Preliminary Approach of FES Cycling Framework Model	

Development for Spinal Cord Injury Application Part 1	2452
Production and Education of the modular robot made by 3D printer	2457
Profile Face Detection using Flipping Scheme with Genetic Algorithm	2462
Profit Sharing reducing the occurrences of accidents by predicted action safety degree	2468
PSO based State Feedback Regulator for Stabilizing a Two wheeled Wheelchair In Balancing Mode	2474
QRS Subtraction Effect on Frequency Changes of Atrial Electrograms due to Isoprenaline and Atropine Infusion	2479
Radial Plate Fins Heat Sink Model Design and Optimization	2483
Range Measurement Based Localization and Circumnavigation of Multiple Irregularly Moving Unknown Targets	2488
Re stating technologies for rotational sensorless controlled AC motors at the rotating status	2494
Real time gait phase detection using wearable sensors	2500
Real Time Implementation of H Controller for UAV Helicopter using MATLAB based Embedded Programming Approach	2504
Real Time Optimization And Control Of 3DOF Helicopter System Via Extremum Seeking Algorithm	2510
Real Time Sensor Fusion for Micro Aerial Vehicles using Low Cost Systems	2516
Reconfigurable Command and Control of Network Centric Warfare	2522
Reduced Ripple Interleaved Cuk Converter with Phase Shifted PWM	2528
Reducing whole body vibration exposure of occupants in autonomous car by intelligent behavior	2534
Relationality Design for System of Systems	2540
Relaxed formation in cluttered environments using rotor craft UAV	2545
Residual Oil Recovery Using Bio Ethanol from Spent Bleaching Clay and Its Characterization	2551
Retrieving Wave Spectra Energy from Synthetic Aperture	

Radar of ENVISAT Satellite Data.....	2556
Robust Consensus of a Class of Linear Multi Agent Systems via Sampled Data Control.....	2560
Robust Control and State Estimation of Micro Aerial Vehicle using Sliding Mode Technique.....	2565
Robust Fault Diagnosis In Time Delay Systems.....	2571
Robust H 2 Filter Design for Bilinear Systems using T S fuzzy approach.....	2577
Robust LQR Design of Neutral Systems with Time Varying Delay and Polytopic Uncertainty.....	2582
Robust Properties of Pade Approximants Obtained by Network Learning.....	2588
Robust Self corrective Initial Alignment Algorithm for Strap down INS.....	2594
Robust stabilization of underactuated systems via fast terminal sliding mode.....	2600
Robust synchronisation of unstable linear time invariant systems.....	2606
Robust Trajectory Tracking Design of Unmanned Aerial Vehicles via Nonlinear Mixed H H Control Method.....	2612
Rotation Effects of Objective Functions In Parallel Distributed Multiobjective Fuzzy Genetics Based Machine Learning.....	2618
Rotation Matrix Optimization with Quaternion.....	2624
Rubust Observer for State of Charge Estimation of LI Ion Battery with Uncertainties.....	2630
Rule based plug In hybrid school bus Energy Management Control Strategy Simulation.....	2636
Sampling time scheduling for a CAN-based dynamical system - A simulation practice.....	2642
Schedule guidance system for slab extraction sequence from furnace in hot rolling process.....	2649
Security Analysis of Networked Systems In the Presence of Impulsive Attacks	
Security Enhancements of Networked Control Systems Using RSA Public Key Cryptosystem.....	2653
Selective Membrane for Detecting Nitrate Based on Planar Electromagnetic Sensors Array.....	2659

Selfsensing Unbalance Rejection and Reduction of the Gyroscopic Effect for an Active Magnetic Bearing System.....	2665
Sensitivity analysis of Radially Distributed Power System under Random Penetration of Photovoltaic Generation.....	2671
Sensorless Position and Velocity Estimation of Two Wheeled Inverted Pendulum Mobile Robot.....	2677
Settling Time Design for Finite time P PI Control and Parameter tuning method.....	2681
Shirt Pattern Recognizing and Tracking Behavior Analysis Using SURF On The Moving Human Target.....	2687
Sightseeing Plan Recommendation System using Sequential Pattern Mining based on Adjacent Activities.....	2692
Simple algebraic structure of Taylor expansion of sampled data systems Application to Identification of continuous time model from discrete time data.....	2698
Simple model of underactuated walking robot.....	2704
Simulated annealing particle swarm optimization SA PSO Particle distribution study and application In Neural Wiener based NMPC.....	2710
Simulated Real Time Controller Using Modified Hill Climbing Algorithm on Fixed Wing Airplane.....	2716
Simulation Comparison among Three Data Driven Control Methods for the Planar Manipulator.....	2721
Simulation of Palm Oil Expression In Screw Press Using Computational Fluid Dynamics Laying the Foundation.....	2727
Simulation of WirelessHART Networked Control System with Packet Dropout.....	2733
Simulations of Fiber Braided Bending Actuator Investigation on Position of Fiber Layer Placement and Air Chamber Size.....	2739
I. Introduction.....	2739
II. Actuator Design and Parameter.....	2739
A. Working Principle of a Fiber Braided Bending Actuator.....	2739
B. Variation of the Position of Fiber Layer Placement and the Air Chamber Diameter.....	2740
III. Simulation Setup.....	2741
IV. Results and Discussion.....	2741

V. Conclusion	2743
Acknowledgment	2743
References	2743
Simultaneous Localization and Mapping Survey Based on Filtering Techniques	2744
Single Sample Face Recognition via Lower upper Decomposition	2750
Single Sample Face Recognition via Lower-upper Decomposition	2750
I. Introduction	2750
II. The proposed method	2751
A. Image decomposition using LU decomposition	2751
B. The approximation image reconstruction via experimental estimation method	2751
C. Feature extraction and classification	2752
III. Experiments	2753
A. Face database	2753
B. Face recognition	2753
C. Discussion	2754
IV. Conclusion	2755
