About this Series

“Lecture Notes in Electrical Engineering (LNEE)” is a book series which reports the latest research and developments in Electrical Engineering, namely:

- Communication, Networks, and Information Theory
- Computer Engineering
- Signal, Image, Speech and Information Processing
- Circuits and Systems
- Bioengineering

LNEE publishes authored monographs and contributed volumes which present cutting edge research information as well as new perspectives on classical fields, while maintaining Springer’s high standards of academic excellence. Also considered for publication are lecture materials, proceedings, and other related materials of exceptionally high quality and interest. The subject matter should be original and timely, reporting the latest research and developments in all areas of electrical engineering.

The audience for the books in LNEE consists of advanced level students, researchers, and industry professionals working at the forefront of their fields. Much like Springer’s other Lecture Notes series, LNEE will be distributed through Springer’s print and electronic publishing channels.

More information about this series at <http://www.springer.com/series/7818>

Contents

Part I

QoS-aware Mapping and Scheduling for Integrated CWDM-PON and WiMAX Network	3
Siti H. Mohammad, Nadiatulhuda Zulkifli and Sevia M. Idrus	
Resource Management Scheme Based on Position and Direction for Handoff Control in Micro/Pico-Cellular Networks	11
Dong Chun Lee, Kuinam J. Kim and Jong Chan Lee	
A Pilot Study of Embedding Android Apps with Arduino for Monitoring Rehabilitation Process	21
Safyzan Salim, Wan Nurshazwani Wan Zakaria and M. Mahadi Abdul Jamil	
A Security Protocol based-on Mutual Authentication Application toward Wireless Sensor Network	27
Ndibanje Bruce, YoungJin Kang, Hyeong Rag Kim, SuHyun Park and Hoon-Jae Lee	
A Noninvasive Sensor System for Discriminating Mobility Pattern on a Bed	35
Seung Ho Cho and Seokhyang Cho	
A Fault-Tolerant Multi-Path Multi-Channel Routing Protocol for Cognitive Radio Ad Hoc Networks	43
Zamree Che-aroon, Aisha Hassan Abdalla, Khaizuran Abdullah, Wan Haslina Hassan and Md. Arafatur Rahman	

Study of Sound and Haptic Feedback in Smart Wearable Devices to Improve Driving Performance of Elders	51
Chularas Natpratant and Nagul Cooharajanane	
Indoor WIFI localization on embedded systems	59
Anya Apavatjirut and Ekkawit Boonyasiwapong	
Bacterial Foraging-based Power Allocation for Cooperative Wireless Sensor Networks	67
Mohammad Abdul Azim, Zeyar Aung and Mario E. Rivero-Angeles	
 Part II	
Maintaining a Trajectory Data Warehouse Under Schema Changes with the Mobile Agent View Adaptation Technique	79
Wided Oueslati and Jalel Akaichi	
Traffic Analysis in Concurrent Multi-Channel Viewing on P2PTV	85
Koki Mizutani, Takumi Miyoshi and Olivier Fourmaux	
Evaluation Method of MANET over Next Generation Optical Wireless Access Network	93
M.A. Wong, N. Zulkifli, S.M. Idrus and M. Elshaikh	
A Feedback Mechanism Based on Randomly Suppressed Timer for ForCES Protocol	103
Lijie Cen, Chuanhuang Li and Weiming Wang	
Operational Analysis of Interarrival Rate-based Queuing Management Mechanism for High-speed Networks	111
Mohammed M. Kadhum and Selvakumar Manickam	
E-Government project enquiry framework for a continuous improvement process, status in Malaysia and Comoros	125
Said Abdou Mfoihaya and Mokhtar Mohd Yusof	
Objective Non-intrusive Conversational VoIP Quality Prediction using Data mining methods	135
Sake Valaisathien and Vajirasak Vanijja	

A Hybrid Incentive-based Peer Selection Scheme for Unstructured Peer-to-Peer Media Streaming Systems. 143
 Victor Romero II and Cedric Angelo Festin

A Transmission Method to Improve the Quality of Multimedia in Hybrid Broadcast/Mobile Networks 151
 Hyung-Yoon Seo, Byungjun Bae and Jong-Deok Kim

A Failureless Pipelined Aho-Corasick Algorithm for FPGA-based Parallel String Matching Engine. 157
 Hyun Jin Kim

Revised P2P Data Sharing Scheme over Distributed Cloud Networks 165
 Wonhyuk Lee, TaeYeon Kim, Seungae Kang and HyunCheol Kim

LQDV Routing Protocol Implementation on Arduino Platform and Xbee module. 173
 Ho Sy Khanh and Myung Kyun Kim

A Virtualization and Management Architecture of Micro-Datacenter. 181
 Byungyeon Park, Wonhyuk Lee, TaeYeon Kim and HyunCheol Kim

Multi-disjoint Routes Mechanism for Source Routing in Mobile Ad-hoc Networks. 189
 Baidaa Hamza Khudayer, Mohammed M. Kadhum and Wan Tat Chee

Passive Network Monitoring using REAMS 205
 Amir Azodi, David Jaeger, Feng Cheng and Christoph Meinel

Low Latency Video Transmission Device 217
 Chanho Park and Hagyoung Kim

Part III

Comparative Investigation of Medical Contents using Desktop and Tabletop Technologies. 225
 Tahir Mustafa Madni, Yunus Nayan, Suziah Sulaiman and Muhammad Tahir

Dynamic-Time-Warping Analysis of Feature-Vector Reliability for Cognitive Stimulation Therapy Assessment	235
Tuan D. Pham	
An Algorithm for Rock Pore Image Segmentation.	243
Zhang Jiqun, Hu Chungjin, Liu Xin, He Dongmei and Li Hua	
Action Recognition by Extracting Pyramidal Motion Features from Skeleton Sequences	251
Guoliang LU, Yiqi ZHOU, Xueyong LI and Chen LV	
P-PCC: Parallel Pearson Correlation Condition for Robust Cosmetic Makeup Face Recognitions	259
Kanokmon Rujirakul and Chakchai So-In	
Flight Simulator for Serious Gaming	267
Aruni Nisansala, Maheshya Weerasinghe, G.K.A. Dias Damitha Sandaruwan, Chamath Keppitiyagama, Nihal Kodikara Chamal Perera and Prabhath Samarasinghe	
Potential Z-Fighting Conflict Detection System in 3D Level Design Tools	279
Pisal Setthawong	
Efficient Motion Estimation Algorithms for HEVC/H.265 Video Coding	287
Edward Jaja, Zaid Omar, Ab Al-Hadi Ab Rahman and Muhammad Mun'im Zabidi	
A Synthesis of 2D Mammographic Image Using Super- Resolution Technique: A Phantom Study.	295
Surangkana Kantharak, Thanarat H. Chalidabhongse and Jenjeera Prueksadee	
Using complex events to represent domain concepts in graphs.	303
Riley T Perry, Cat Kutay and Fethi Rabhi	
Unequal Loss Protection Mechanism for Wi-Fi based Broadcasting system using a Video Quality Prediction Model	313
Dong Hyun Kim, Hyung-Yoon Seo, Byungjun Bae and Jong-Deok Kim	
An Approximate Matching Preprocessing for Efficient Phase-Only Correlation-Based Image Retrieval.	319
Honghang Wang and Masayoshi Aritsugi	

Pixel Art Color Palette Synthesis 327
 Ming-Rong Huang and Ruen-Rone Lee

Introducing a New Radiation Detection Device Calibration Method and Estimating 3D Distance to Radiation Sources. 335
 Pathum Rathnayaka, Seung-Hae Baek and Soon-Yong Park

Integrating Feature Descriptors to Scanpath-based Decoding of Deformed Barcode Images 343
 Poonna Yospanya and Yachai Limpiyakorn

Detecting and extracting text in video via sparse representation based classification method 351
 Bo Sun, Yang Wu, Feng Xu, Yongkang Xiao, Jun He and Chen Chao

Part IV

A Cost Model for Client-Side CaaS 361
 Chaturong Sriwiroj and Thepparit Banditwattanawong

A Reliability Analysis of Cascaded TMR Systems 369
 Hyun Joo Yi, Tae-Sun Chung and Sungsoo Kim

Availability Analysis for A Data Center Cooling System with (n,k)-way CRACs. 377
 Sohyun Koo, Tae-Sun Chung and Sungsoo Kim

Abstract. Cognitive Radio (CR) has been proposed as a promising technology to solve the problem of radio spectrum shortage and spectrum underutilization. In Cognitive Radio Ad Hoc Networks (CRAHNs), which operate without centralized infrastructure support, the data routing is one of the most important issues to be taken into account and requires more studies. Moreover, in such networks, a path failure can easily occur during data transmission caused by an activity of licensed users, node mobility, node fault, or link degradation. Also, the network performance is severely degraded due to a large number of path failures. In this paper, the Fault-Tolerant Cognitive Ad-hoc Routing Protocol (FTCARP) is proposed to provide fast and efficient route recovery in presence of path failures during data delivery in CRAHNs. In FTCARP, a backup path is immediately utilized in case a failure occurs over a primary transmission route in order to transfer the next coming data packets without severe service disruption. The protocol uses different route recovery mechanism to handle different cause of a path failure. The performance evaluation is conducted through simulation using NS-2 simulator. The protocol performance is benchmarked against the Dual Diversity Cognitive Ad-hoc Routing Protocol (D2CARP). The simulation results prove that the FTCARP protocol achieves better performance in terms of average throughput and average end-to-end delay as compared to the D2CARP protocol.

Keywords: Multi-path multi-channel routing; Cognitive radio ad hoc network; Fault tolerance; Fast route recovery; Joint path and spectrum diversity

1 Introduction

The recent experiment results conducted by the Federal Communications Commission (FCC) [1] have proved that the static spectrum allocation policy, which allows each
