Prevalence and molecular characterisation of *Cryptosporidium* from dairy cattle in five farms in Kuantan (Article)

Yusof, A.M.^{ab} [✉](#), Isa, M.L.M.^{ab} [🔍](#)^aDepartment of Basic Medical Sciences, Kulliyah of Nursing, International Islamic University of Malaysia, Jalan Sultan Ahmad Shah, Bandar Indera Mahkota, Kuantan, Pahang, Malaysia^bIntegrated Cellular and Molecular Biology Cluster (iMolec), Integrated Centre for Research Animal Care and Use, International Islamic University Malaysia, Jalan Sultan Ahmad Shah, Bandar Indera Mahkota, Kuantan, Pahang, Malaysia

Abstract

[View references \(42\)](#)

Cryptosporidium spp. are ubiquitous enteric protozoan parasites that cause diarrhoeal disease known as cryptosporidiosis. This research was conducted to find the prevalence of *Cryptosporidium* from dairy cattle in Kuantan, Pahang, Malaysia and to identify the genotype of *Cryptosporidium* by using 18S rRNA gene. Besides, this study aims to investigate the association between *Cryptosporidium* infection and the age of dairy cattle. A total of 375 stool specimens of dairy cattle were collected and concentrated with formal-ether concentration technique. The *Cryptosporidium* oocysts were detected with modified Ziehl Neelsen staining. *Cryptosporidium* species was identified by nested PCR amplification of 18S rRNA gene. Based on microscopic examination, 16.3% (61/375) dairy cattle were positive for *Cryptosporidium* infection. This research has shown that the highest prevalence of *Cryptosporidium* was recorded in calves with the percentage of 17.4% (12/69), followed by adult cattle and yearling with the percentage of 16.1% (29/180) and 15.9% (20/126), respectively. The findings demonstrated that there was no significant difference ($p > 0.05$) in *Cryptosporidium* infection rates by age. Molecular characterisation revealed that the species of *Cryptosporidium* found in dairy cattle was *Cryptosporidium* ryanae. The present study suggested that proper hygiene practices must be practiced by farmers in order to control the *Cryptosporidium* infection. © 2017, Malaysian Society of Applied Biology. 16-301-0465	International Islamic University Malaysia	IUM

Funding text

The authors would like to express the gratitude and appreciation to the officers from the Department of Veterinary Services, Kuantan Malaysia and the farmers for assisting and supporting in various ways throughout the study. The study was funded by IUM Research Initiative Grant (RIGS) no. 16-301-0465.
