<u>Conferences</u> <u>Publications</u> <u>Membership</u> <u>About IAENG</u> <u>FAQ</u> <u>Contact Us</u>

The IMECS 2015 Program Committee

As the IMECS is organized by the International Association of Engineers and the Engineering Letters, some of the <u>editorial board</u> <u>members</u> of the Engineering Letters and the IAENG journals and the committee members of IAENG Societies are taking part in the IMECS 2015 International Program Committee.

IMECS MultiConference Co-chairs

Prof. Craig Douglas (honorary co-chair)

School of Energy Resources Distinguished Professor, Departments of Mathematics & Director, Institute for Scientific Computation, University of Wyoming, USA Visiting Professor and Associate Director, Center for Numerical Porous Media Methods King Abdullah University of Science & Technology, Saudi Arabia & Former Senior Research Scientist (corresponding to nonteaching full professor), Computer Science Department, Yale University, USA

<u>Prof. David Dagan Feng</u> (honorary co-chair) Head, School of Information Technologies, University of Sydney, Australia

<u>Prof. Alexander M. Korsunsky</u> (honorary co-chair) Professor of Engineering Science

Former Dean, Trinity College Department of Engineering Science, University of Oxford, UK

<u>Prof. Ping-kong Alexander Wai</u> (honorary co-chair)

Vice President and Chair Professor of Optical Communications

Hong Kong Polytechnic University, Hong Kong

Prof. Oscar Castillo

Professor and Research Director of Computer Science
Tijuana Institute of Technology, Mexico
Former Adjunct Professor of San Diego State University, USA
President of HAFSA (Hispanic American Fuzzy Systems Association)
Vice-Chair of the Mexican Chapter of the Computational Intelligence Society (IEEE)

Prof. Jeong-A Lee

Professor of Department of Computer Engineering Chosun University, South Korea

Dr. S. I. Ao (Congress secretary)

Ph.D. University of Hong Kong; Post-doc Oxford University Computing Laboratory, University of Oxford, U.K. & Harvard School of Engineering and Applied Sciences, Harvard University, USA; Former Visiting Professor, Cranfield University, UK & University of Wyoming, USA Editor-in-chief of Journal: Engineering Letters

IMECS Program Committee & Conferences Co-Chairs

Yousry H. Abdelkader Alexandria University, Egypt

Daoud Ait-Kadi University Laval, Canada

 Basim Al-Najjar
 Vaxjo University, Sweden

 Ali Allahverdi
 Kuwait University, Kuwait

 Bala P. Amavasai
 Sheffield Hallam University, U.K.

Carlos Henggeler Antunes University of Coimbra, Portugal

Djamel Bouchaffra Oakland University, USA

Indranil Bose The University of Hong Kong, Hong Kong
Anthony Brabazon University College Dublin, Ireland
Mietek Brdys The University of Birmingham, UK
Fidel Cacheda University of A Coruna, Spain

Alan Hoi-shou Chan City University of Hong Kong, Hong Kong

Felix T.S. Chan The Hong Kong Polytechnic University, Hong Kong

Chin-Chen Chang Feng Chia University, Taiwan

Pranay Chaudhuri University of the West Indies, West Indies
Chun-Hsien Chen Nanyang Technological University, Singapore

Chung Shue Chen INRIA, France

Mu-Song ChenDa-Yeh University, TaiwanQingfeng ChenDeakin University, Australia

Wallace Choy The University of Hong Kong, Hong Kong

T.S. Chung The Hong Kong Polytechnic University, Hong Kong

Orville Leverne Clubb City University of Hong Kong, Hong Kong

Manuel Jose Damasio Universidade Lusofona de Humanidades e Tecnologias, Portugal

Chuangyin Dang City University of Hong Kong, Hong Kong

Alexandar Djordjevich City University of Hong Kong, Hong Kong

Yu-fai Fung Hong Kong Polytechnic University, Hong Kong

G. Ganesan Adikavi Nannaya University, India

Robert Gay Kheng Leng Nanyang Technological University, Singapore

Zhao-qiang Ge Xi'an Jiaotong University, China

Goh Ong Sing National Technical University of Malaysia, Malaysia
Angel Marin Gracia de la Universidad Politecnica de Madrid, Spain

 Nalan Gulpinar
 University of Warwick, UK

 Phil Heaton-Adegbile
 University of Portsmouth, UK

Enrique Herrera-Viedma University of Granada, Spain

Josep R. Herrero Polytechnic University of Catalonia, Spain

Xu Huang University of Canberra, Australia

Chi-Kuang Hwang Chung-Hua University, Taiwan

Heung Suk Hwang TongMyong University, South Korea
Shigekazu Ishihara Hiroshima International University, Japan
Limin Jia Beijing Jiaotong University, China
Hsueh-Fen Juan National Taiwan University, Taiwan

Rajgopal Kannan Louisiana State University, USA

George P. Karatzas Technical University of Crete, Greece

Hideki Katagiri Hiroshima University, Japan

Graham Kendall University of Nottingham, UK

Kensaku Kikuta University of Hyogo, Japan

Haeng Kon Kim Catholic University of DaeGu, South Korea

Sung-il Kim Korea University, South Korea

Cartik Kothari The University of Memphis, USA

Mohan Krishnamoorthy CSIRO Mathematical & Information Sciences Division, Australia

Tadahiko Kumamoto Chiba Institute of Technology, Japan

Reggie Kwan The Open University of Hong Kong, Hong Kong

Ho Woo Lee Sungkyunkwan University, South Korea Layuan Li Wuhan University of Technology, China

Xueliang Li Nankai University, China

Yiming Li National Chiao Tung University, Taiwan

Chih-Min Lin Yuan-Ze University, Taiwan

Baoding Liu Tsinghua University, China Liping Liu University of Akron, USA

Elsa M. Macias Lopez Las Palmas de Gran Canaria University, Spain

Kazuaki Maeda Chubu University, Japan

Prabhat K.Mahanti University of New Brunswick, Canada

Qusay H. Mahmoud University of Guelph, Canada

Nikolaos Matsatsinis Technical University of Crete, Greece

George Mavrommatis Hellenic Military Academy, Greece

Michael McGuigan Brookhaven National Laboratory, USA

Patricia Melin Tijuana Institute of Technology, Mexico
Ludmil Mikhailov The University of Manchester, UK
Hiroshi Mineno Shizuoka University, Japan

Herman Monsuur Netherlands Defense Academy, The Netherlands

Chiung Moon Yonsei University, South Korea
Alejandro Murua University of Montreal, Canada

Nysret Musliu Vienna University of Technology, Austria

Didier Nakache

Jun Ni

The University of Iowa, USA

Lars Nolle

Nottingham Trent University, UK

A. Alper Ozalp

Uludag University, Turkey

Wan- Kai Pang The Hong Kong Polytechnic University, Hong Kong

Apostolos N. Papadopoulos Aristotle University, Greece
Selwyn Piramuthu University of Florida, USA

I.M. Premachandra University of Otago, New Zealand

Quah Tong Seng Nanyang Technological University, Singapore

Dharmendra Sharma University of Canberra, Australia
Jiuh-Biing Sheu National Chiao Tung University, Taiwan

Shey-Huei Sheu National Taiwan University of Science and Technology, Taiwan

Cornel I. G. Resteanu

National Institute for Research and Development in Informatics,

Bucharest, Romania

Carlos Romero Technical University of Madrid, Spain
Susumu Saito The Institute for Science of Labour, Japan
Tadeusz Sawik AGH University of Science & Technology, Poland

Rosemary R. Seva De La Salle University, Philippines
Elhadi Shakshuki Acadia University, Canada

Vrijendra Singh Indian Institute of Information Technology Allahabad, India

Yannis Siskos University of Piraeus, Greece

Yuri Grigoriyevich Stoyan Institute for Problems in Machinery of National Ukrainian Academy of

Sciences, Ukraine

Junping Sun Nova Southeastern University, USA Zhaohao Sun University of Wollongong, Australia

A.B. Rad Swinburne University of Technology, Australia
Marina Resta Universita' degli Studi di Genova, Italy
Maria Luque Rodriguez University of Cordoba, Spain
Raul Rojas Freie Universitat Berlin, Germany

Manoj Kumar Tiwari National Institute of Foundry and Forge Technology (NIFFT), India

Dat Tran University of Canberra, Australia

Francisco Herrera Triguero University of Granada, Spain

Lin-Yu Tseng Providence University, Taiwan

Shinichi Tsuda Tokai University, Japan
Gwo-Hshiung Tzeng Kainan University, Taiwan

Lev V. Utkin St.Petersburg Forest Technical Academy, Russia

Ismael Vaz
Universidade do Minho, Portugal
Jose Luis Verdegay
Universidad de Granada, Spain
Hsiao-Fan Wang
National Tsing Hua University, Taiwan

Long Wang Peking University, China

Shyh-Hau Wang Chung Yuan Christian University, Taiwan

Toyohide Watanabe Nagoya University, Japan

Frank Werner Otto-von-Guericke-University of Magdeburg, Germany

Igor Wojnicki AGH - University of Science and Technology, Poland

Ed Xuekui Wu University of Hong Kong, Hong Kong

Trong Wu Southern Illinois University Edwardsville, USA

Guangming Xie Peking University, China
Li Xu Zhejiang University, China
Susan H. Xu Penn State University, USA

Gi-Chul Yang Mokpo National University, South Korea

Xin-She Yang University of Cambridge, UK
Ali Riza Yildiz University of Michigan, USA
Kun-Ming Yu Chung Hua University, Taiwan
Cecilia Zanni Marc Bloch University, France
Xiaohua (Douglas) Zhang Merck Research Laboratories, USA

Zhe George Zhang Simon Fraser University, Canada

Yao Zhao Beijing Jiaotong University, China

Yong Zhao Nanyang Technological University, Singapore
Constantin Zopounidis Technical University of Crete, Greece

ICSE'15 Conference Committee Members

The titles and contact authors of submitted papers that have been reviewed and accepted (or accepted with minor revisions) for IMECS 2015 are listed here:

A C, D N, O Others

Titles (A. C)	Contact Authors
Titles (A_C) A Behavior Approach to Instant Messaging Worm Detection	Contact Authors Dr. hanxun zhou
A Business Architecture Capability Meta Model and Tool-set for Providing Function Point	
Estimation for Enterprise Architecture Management	Mr. Francois du Toit
A Cell-centered Scheme for Solving Anisotropic Diffusion Equations on Skewed Meshes	Dr. Lina Chang
A Closed-Loop High-Gain Multiphase-Switched-Capacitor-Inductor Step-Up DC-DC Converter	Prof. Yuen-Haw Chang
A Closed-Loop High-Gain Switched-Capacitor-Inductor-Based Boost DC-AC Inverter	Prof. Yuen-Haw Chang
A Cloud-based Wireless Mesh Network with Adaptive Data Storage Functions	Mr. Shengtao YANG
A Comparative Study of Analysing Transformed and Noisy Data in Taguchi Orthogonal Arrays	Mr. Nattapat Imsap
A Comparative Study on CT Image Segmentation Using FCM-based Clustering Methods	Prof. Chih-Hung Wu
A Comparison of Biomass Gasification Technologies using Data Envelopment Analysis	Dr. Choosak Pornsing
A Comprehensive Review on Long Term Evolution (LTE)-Advanced	Dr. Prashant Pandey
A Decision Support Application for Teak Log Supplier to Simulate Scenarios of Utilizing Forest Resources by Considering the Sustainability of Teak Log Supply	Mr. Silvester Adi Surya Herjuna
A Graphical User Identifier Suggestion Function Scheme Using Sketching for Mobile Web-Services	Mr. Yusuke Matsuno
A Method for Identifying Photo Composition of the Panoramic Image	Mr. Shin Yen Te
A Method for Investigation and Analyzing of Software Product Line Ecosystems	Dr. Abbas ramazani fard
A Network-Based Scalability Model for Distributed Real-Time Resource Management	Prof. Sergei Gorlatch
A New AM Demodulation Scheme with a Blind Carrier Recovery Method	Prof. Jeerasuda Koseeyaporn
A New Method Based on Tree Simplification and Schema Matching for Automatic Web Result Extraction and Matching	Mr. Yasar Gozudeli
A New Method for Marshaling of Freight Train with Generalization Capability Based on the Processing Time	Dr. Yoichi Hirashima
A New ONU-initiated Doze Mode Energy-saving Mechanism in EPON	Prof. I-Shyan Hwang
A Novel Approach for Classification of Congestive Heart Failure Using Relatively Short-term ECG Waveforms and SVM Classifier	Mr. Ken Ying-Kai Liao
A Novel Centralized Control Implementation For Identity-Location-Separated Network Architecture	Mr. Chaoqi Yu
A Novel Methodology for Test Scenario Generation Based on Control Flow Analysis of UML 2.x Sequence Diagrams	Mr. Saroj Kanta Misra
A Novel Symmetric Cryptography Algorithm for Fast and Secure Encryption	Dr. Aswathy A S
A Numerical Scheme for the Black-Scholes Equation with Variable Interest Rate Using Spectral Collocation and Backward-Differences	Dr. Roden Jason David, Ms. Fernandina Ko
A Parallel Minimum Attribute Co-reduction Accelerator based on Quantum-inspired SFLA and MapReduce Framework	Dr. Weiping Ding
A PC-Based Controller for the Computer Numerically-Controlled (CNC) LASER Machine	Mr. Jayson Rogelio
A PLC-Based Adaptive Control of Superheated Steam Treatment System (SSTS) for Stabilized Brown Rice (SBR)	Dr. Dominic Guevarra
A Practical Study of Exact-BASIC Codes at the MSR Point in Distributed Storage Systems	Miss Yumeng Zhang
A Proposal of Graph-based Blank Element Selection Algorithm for Java Programming Learning with Fill-in-Blank Problems	Prof. Nobuo Funabiki
A Python Class for Higher-Dimensional Schrodinger Equations	Dr. Amna Noreen
A report on Returns to Scale in UAE Banks	Dr. Aqila

Prof. Zulati Litifu

A Research on the Feasibility of Supplying Wind Power for Industrial-Park at Feeding

Terrnimal Development of the Control	
A Secure Mobile Payment Framework Based On Face Authentication	Mr. Zhaomiao Xu
A Source Code and Test Cases Impact Analysis Tool for Database Schema Changes A Standalone Near Filed Communication Based Library Automation System	Mr. Chanwit Sriarpanon Prof. Amol D. Potgantwar
A Study an Impact of Daylight with Period Time on Illuminance and Uniformity for Building	Dr. Chaiyan Jettanasen
A Systematic Approach for Configuration Management in Software Product Lines	Dr. K.L.S.Soujanya
Adaptive Delay Constraint Admission Control with Hierarchical DBA over GPON-LTE Converged Network	Prof. I-Shyan Hwang
Adaptive Feedforward Cancellation (AFC) in Sound Fields: Computer-Based Approach for Active Noise Control (ANC)	Mr. Suparoek Junsupasen
Adsorption of Pt from Chloride Leaching Solution of Spent Catalyst with Anionic Resins	Dr. PANPAN SUN
Air Conditioning Control System Learning Sensory Scale Based on Reinforcement Learning	Dr. Noritaka Shigei
Algorithms for Optimization of Convex Quadratic Functions	Miss BELABBACI Amel
An Agri-food Supply Chain Model for Cultivating the Capabilities of Farmers in Accessing Capital Using Corporate Social Responsibility Program	Mr. Rillo S Wahyudin
AN AUTOMATED TOOL FOR A NON-CONTACT, REAL TIME EARLY DETECTION OF DIABETES BY COMPUTER VISION	Dr. Jamal firmat banzi
An Efficient Implementation of Multi-Context Algebraic Reasoning System with Lazy Evaluation	Prof. Masahito Kurihara, Mr. ChengCheng Ji
An Empirical Research into the Effect of Blended Learning on English Writing Learning in Institutions of Higher Vocational Education	Dr. Mingyong Zhang
An Experimental Setup Investigation to Study Characteristics of Fault on Transmission System	Dr. Chaiyan Jettanasen
An Exploratory Study in Displaying Interactive Car Catalogue System on Multi-Touch Tabletop	Mr. Ahsanullah Abro
An Exploratory Study: an Integrated Approach for Design for Testability	Dr. Megha Joshi
An Extended HDL SoC TAB-model for Diagnosability and Repair	Dr. Woon Kian Chong
An FLP Model for Optimizing Supply Chain Management in Steel Company	Dr. Mansur Hassan
An Image Size Invariant Method for Quick Detection of Dissimilar Binary Images	Dr. Adnan Mustafa
An Improved Collaborative Filtering Recommendation Algorithm Combining Item Clustering and Slope One Scheme	Dr. Haipeng You
AN INTEGRATED SWITCHING TECHNIQUE FOR MINIMIZING POWER CONSUMPTION USING DOMINO LOGIC SYSTEM	Dr. Naveenkumar D
An Investigation of Residual Stress Gradient Effects in FIB-DIC Micro-Ring-Core Analysis	Dr. Alexander M. Korsunsky
An IT Driven Approach for Global Production Network Design	Mr. Carlo Hausberg
An Iterative Algorithm for Generalized Mixed Equilibria with Variational Inequalities	Prof. Ching-Feng Wen
An Optical Tunable Fiber Filter based on The Concatenated Single-mode Optical Fibers with Different Cut-off Wavelengths	Miss Wanvisa Talataisong
Analysis of Refraction Phenomenon on Green's Function with The Two Product of Gaussian-PDFs	Dr. Atirat Maksuwan
Analysis of Vehicle Tracking Maps in Iwate Prefecture Following the 2011 Tohoku Earthquake	Prof. Noriaki Endo
AOS: Adaptive Out-of-order Scheduling for Write-caused Interference Reduction in Solid State Disks	Dr. Pingguo Li
Application of Differential Evolution to Parameter Identification of Bhumibol Hydro Power Plant in Thailand	Dr. Jukkrit Kluabwang
Application of Language Modelling in Sentiment Analysis for Faculty Comment Evaluation	Mrs. Ria Sagum
Application of YIQ Color Model for Color Pattern Recognition with Shifted and Rotated Training Images in Optoelectronic Correlator	Dr. Chulung Chen
Applying Classifier Algorithms to Organizational Memory to Build an Attrition Predictor Model	Dr. K.M. Suceendran
Approximation for ARL of EWMA Control Chart with EAR(p) Process	Dr. WANNAPORN

	SURIYAKAT
Architectural Design for Allocation, Storage and Retrieval of Distributed Multimedia Data	Mrs. Nithya Deenadayalan
Assessing Household Energy Savings and Consumer Behavior in Padang City	Mrs. PRIMA FITHRI
Assessment of WileyPLUS' Instructional Design as Learning Management System Tool for Distance Learning	Dr. Dante L. Silva
Automated Translation of Java Control Flow into Promela	Miss Jirapat Lueangviriyayarn
Automatic Detection of Diabetic Retinopathy from Eye Fundus Images: A Review	Mr. Manpreet Kaur Sidhu
Band Mapped and Distributed Energy Best Tree Encoding Features for Tri-Phone-Based Automatic Speech Recognition	Mr. Sayed Zaky
Big Data Technology Adoption in Chinese Small and Medium-sized Enterprises	Dr. Woon Kian Chong
Block-diagonal preconditioner for Darcy equations with random coe cient	Dr. Adel Al-Mahdi
Business Analytics in Tourism, Exploring Event, Industry, and Brand Potentials	Dr. William Claster
Capacity and performance analysis of STC MB-OFDM UWB Systems	Dr. Ines BEN HASSINE
Characteristics and Behaviour of Transient Current during Lightning Strikes on Transmission Tower	Dr. Chaiyan Jettanasen
Classifications of Emotion Expressed by Filipinos through Tweets	Mr. Miguel Angelo Tolentino, Mr. Michael Jr. Pippin
Cloud computing: A new era of IT opportunity and challenges	Dr. G. Harsha Vardhan
Commercialization Strategy Formulation for University Spin-Off: A Case Study	Mr. Aam Hamid Al Ghabid
Common Design Elements and Strategies in Participatory Safety Sign Redesign among Construction Workers	Dr. Alan H.S. Chan
Compact S-box Hardware Implementation with an Efficient MVP-CSE Algorithm	Mr. Xiaoqiang ZHANG
Comparatative Performance Analysis of Modified Filter Bank MultiCarrier Prototype Filter Under Strategic Conditions	Dr. Er.A.S.Kang
Comparison Analysis Study in to Palm Print Image Acquisition Methods	Dr. K.Mariyappan
Comparison between Two HLL-type Riemann Solvers for Strong Shock Calculation on ALE Framework	Prof. Zhijun Shen
Comparison of Efficient parallel Index Algorithms used for RDF data store	Dr. Rajani Sharma
Comprehensive Curriculum of Programming for Engineers, its Teaching Models and in- Lab Monitoring Technique	Mr. Mohit Nitin Satoskar
Computer Ergonomic And Its Effects On Students' Interest in Computer Programming	Dr. Yekini Nureni Asafe
Corrective Controllers with Switching Capability for Modeling Matching of Input/State Asynchronous Machines	Prof. Jung Min Yang
Cross-Layer Design of Power Assignment and Power Balance in Wireless Ad-hoc Networks	Mrs. Arivoli Vijay

Dr. Ahmed AL.Darmaki

Cultivation and Characterization of Microalgae for Wastewater Treatment

The titles and contact authors of submitted papers that have been reviewed and accepted (or accepted with minor revisions) for IMECS 2015 are listed here:

A_C, D_N, O_Others

Titles (D_N)	Contact Authors
Data Network Threats and Penetration Testing	Dr. Vladimir Sanchez Padilla
DePAT: A Framework for Specification-Based Automatic Test Generation	Dr. Simona Vasilache
Deregulation of Electric Power in a Developing Economy: Prospects for Nigeria	Dr. Nnoli Kosisochukwu Pal
Design by Analysis versus Design by Formula of a PWR Reactor Pressure Vessel	Mr. Usman Tariq Murtaza
Design of Beidou satellite timing and communication system for power fault location system with traveling wave	Mr. HUANG Long
Design of Channel Filter based on Asymmetric One-Dimensional Defective Photonic Crystal for Broadband Responses	Miss Asmar Aming
Design Principles of Slotted Holes	Mr. Xiangyu Cheng
Development of a Region-of-Uninterest (ROU) Detection System for Multimedia Applications	Ms. Kana Miyawaki
DEVELOPMENT OF ELECTRICAL PORCELAIN INSULATORS FROM LOCAL CLAYS	Dr. Okolo C.C
Diffusion Stability of Mechanical Equilibrium in Compressible Isothermal Gases	Dr. K.Kaliyeva
Driving Behavior Analysis Based on Vehicle OBD Information and AdaBoost Algorithms	Mr. Shi-Huang Chen
Dropped Ball Travel Time using Variation and Integration	Dr Dieudonne Ndong Ovono
eAttendance System for Academic Institutions	Mr. Gaurav Madan
Economic and Environmental Impact Assessment of Micro Grid	Dr. Su Youli
Economic Value of Femtocell Networks for Mobile Solution	Mr. Akinlabi O Akindeji
Effect of Ambient Illumination, Brightness and Tilt Angle on Typing Performance	Mr. Kasidech Srestthaporn
Efficiency of Bivariate Copula on the CUSUM Chart	Ms. Sasigarn Kuvattana
Efficient Multimedia Contents Management System with Tag Recommendations	Dr. Seungmin Rho
ENERGY OPTIMIZATION FOR UAV COMMUNICATION USING GRID CONFIGURED ADHOC NETWORK	Dr. M. Suresh Kumar
Enhanced Mathematical Model for Studying Fundamental Behaviors of Injection Locked Relaxation Oscillator	Prof. Paramote Wardkein
Entropy Information Based Assessment of Cascade Control Loops	Prof. Junghui Chen
Equitable Total Coloring of Flower Snarks and its Related Graphs	Dr. Kh. Md. Mominul Haque
Establishing Relationships between Emotion Taxonomies Using the Vector Space Model	Mr. Lei Duan
ESTIMATION OF LEAD AND OTHER ELEMENTS IN CONTAMINATED SOIL OF BAGEGA IN ANKA LOCAL GOVERNMENT AREA OF ZAMFARA STATE, NIGERIA	Dr. BISHIR UMAR
Evaluation of a Similarity Search Method for Human Behavior (Extended LDSD)	Miss ZHANG ZUO
Evaluation of Music Classification Method based on Lyrics of English Songs	Mr. Mizuki Furuya
Evaluation of Sine-Based Chaotic Strategy for Adapting Inertia Weight of Particle Swarm Optimization	Prof. Yu-Huei Cheng
Existence and Uniqueness of the Navier-Stokes Problem for Compressible Flows	Dr. K.Kaliyeva
EXPERIMENTAL STUDIES ON PRODUCTION OF METHANE USING ANIMAL MANURE	Dr. Saravanan A M
Exploit Collision: Network Coding in Switch based on VOQ Scheduling Algorithm	Miss Li Ma
Exploiting the Potential Water Supply for Eco-Industrial Parks in an Extreme Arid Area	Prof. Zulati Litifu
Extraction of the Combination Rules of Colors and Derived Fashion Images Using Fashion Styling Data	Mr. Yuta Koge
Extraction of User Context for Recommendation from Access History	Mr. Takaaki Idera
Face-to-Face Interaction using Bluetooth and Gatekeeper	Dr. Priyaam Das
Facility Layout Design On The Agricultural Machinery Industry	Dr. Nilda Tri Putri

Feature Extraction based Approaches for Improving the Performance of Intrusion Detection Systems	Prof. Long-Sheng Chen
FIB-SEM Serial Sectioning Nanotomography of Flax Fibres	Dr. Alexander M. Korsunsky
Filter pattern for consistent use of data in real-time systems	Dr. Thierry Noulamo
Finite Difference Method for Boundary Value Problems Application: High Precision Electrostatics	Dr. David Edwards Jr
Finite Element Solution to Integral Equations	Dr Dieudonne Ndong Ovono
First-Order Perturbation of Correspondence Analysis with Multiple Categories	Prof. Masaaki Ida
Forecasting Optimal Production Program Using Profitability Optimization by Genetic Algorithm and Neural Network	Dr. Galal H. Senussi
Forecasting the Prices of TAIEX Options by Using Genetic Programming and Support Vector Regression	Dr. Chih-Ming Hsu
Framework Enabling End-Users to Maintain Web Applications	Mr. Masayuki Nii
Friction Stir Spot Welding between Copper and Aluminium: Microstructural Evolution	Prof. Esther Titilayo Akinlabi
Functional Cognitive Rehabilitation Game Technology Applying Orientation and Memory for Preventing Dementia	Dr. Seungmin Rho
Fundamental Design for a Beacon Device Based Unconscious Participatory Sensing System	Mr. Mizukami Takamasa
Funding-based Productivity Decision Support System for SMEs	Prof. Buliaminu Kareem
Hard Limit CoDel: An Extension of the CoDel Algorithm	Mr. Fengyu Gao
Hindi Speech Synthesis by concatenation of recognized Hand written Devnagri Script using Support Vector Machines Classifier	Mr. Saurabh Farkya
HiRE- A Heuristic Approach for user Generated Record Extraction	Dr.Santhi Thilagam
How to Select Measurement Points in Access Point Localization	Ms. Xiaoling Yang
Humanitarian Space and Security of Humanitarian Workers: A Review	Prof. Esther Titilayo Akinlabi
Hybrid Evolutionary Model for Diabetes Diagnosis	Dr. Ojugo, A.A
Hybrid Neural Network Models for Rainfall Runoffs: A Comparative Study	Dr. Arnold Adimabua Ojugo
Hydropower Producer Day-ahead Market Strategic Offering Using Stochastic Bi-level Optimization	Ms. Yelena Vardanyan
Identifying Stress-induced and LDL-induced Differentially Expressed Genes in Vascular Smooth Muscle Cells	Dr. Ka-Lok Ng
Identifying System Calls Invoked by Malware using Branch Trace Facilities	Mr. Yuto Otsuki
Image Dissection and Categorization in Satellite Metaphors from Space Video Reconnaissance	Dr. Dhanalakshmi V
Impact of Coagulation Mixing and Time on CST Values	Dr. Dewi Fitria
Impact of Rapid Mixing's Initial Value on CST and SRF values	Dr. Dewi Fitria
IMPLEMENTATION OF LEAN CONCEPTS IN SCRUBBER MACHINE	D., D.,
ASSEMBLY LINE- A CASE STUDY	Dr. Paramasivam K
Implementation of Self-Tuning Fuzzy PI Controller on DCS for Flow Control System	Mr. KHEMJIRA ASSAWATHANATORN
Incubation Scheme of the University Spin Off to Commercialize the Invention in Sebelas Maret University	Miss Citra Kusuma
Indirect Tracking of Functional Target for Respiration Compensation in Radiotherapy	Dr. Woon Kian Chong
Indoor Communication: Femtocell Behavior in an Indoor Environment	Mr. Akinlabi O Akindeji
Investigation into the Use of Mobile Technology in English Teaching and Learning in Institutes of Higher Vocational Education in Hubei Province in China	Dr. Zhang Mingyong
Isaac Newton, Leonhard Euler and F =ma	Dr. Ajay Sharma
Key Factors Affecting User Experience of Mobile Recommendation Systems	Dr. Woon Kian Chong
Latent Training for Convolutional Neural Networks	Dr. Zi Huang
Load Value Prediction Method to Utilize Prediction Miss Bias	Mr. Nobuhiro Moriwaki
Low Power State Machine Design for AES Encryption Coprocessor	Mr. Xiaoqiang ZHANG
Low-cost Bit Permutation Circuit with Concise Configuration Rule	Dr. He Zhangqing
Marketing via Social Networking Sites: A Study of Brand-Post Popularity for Brands in Singapore	0.0
Markovian Reliability Analysis for Software using Error Generation and Imperfect	Mr. Gireesh Kumar

The titles and contact authors of submitted papers that have been reviewed and accepted (or accepted with minor revisions) for IMECS 2015 are listed here:

A C, D N, O Others

Titles (O_Others)	Contact Authors
On Duality Concepts regarding Hypergraphs and Propositional Formulas	Prof. Stefan Porschen
On the Capability of a Fuzzy Inference System with Improved Interpretability	Mr. Hirofumi Miyajima
On the Entringer and Slater problem	Dr. Chunhui Lai
Online Signature Verification for Multi-modal Authentication using Smart Phone	Mr. Bruce Poon
On-Premises Cloud Storage - Security Aspects for Small and Medium-sized Enterprises Optimization of Microwave Vacuum Dryer Design Parameters using CST Microwave	Prof. Markus Stopper
Studio for Low-Moisture Food Application	Mr. Ronie Alamon
Optimizing Line Power Flows by Series Capacitor Placement	Ms. Samiya Zafar
Optimizing Line Power Flows by Shunt Capacitor Placement using Synchrophasor Technology	Ms. Samiya Zafar
Optimizing Pricing and Remanufacturing Decisions in Multi-level Green Supply Chain	Dr. Huang, Yun
OTK: Key Distribution Center at Cloud Providers towards Secure the Services	Mr. RAMARAO GOSE
Parallel Implementation of Iterative Methods for Solving PDEs	Dr. Muhammad Naveed Akhtar
Path Optimization for Electrically Inspecting Printed Circuit Boards with Alignment Marks	Dr. Hideki Katagiri
Path-overlap Avoidance in Multiple Route Construction for Mobile Relay on WSN	Mr. Yogi Anggun Saloko Yudo
PERFORMANCE ANALYSIS OF CLASSIFICATION AND CLUSTERING ALGORITHMS USING HADOOP MAHOUT	Dr. Asadi Srinivasulu
Performance Analysis of Maximum Power Transfer in Piezoelectric Energy Harvesting	Dr. Chaiyan Jettanasen
Performance Evaluation of Extended Kalman Filtering for Obstacle Avoidance of Mobile Robots	Prof. Chih-Hung Wu
Performance Evaluation of Photon Diffusion Models Configured in Planar Source Illumination Geometry for Quantifying the Optical Properties of Turbid Media	Prof. Sheng-Hao Tseng
Performance of a Variable Speed of the Split Unit Air Conditioning System using Fuzzy Logic Controller	Dr. Henry Nasution
Performance of Three Preconditioners for Image Deblurring Problem in Primal-Dual Formulation	Dr. FAISAL FAIRAG
Police Officer Selection Process for Incident Response	Miss Johanna Leigh
Power Supply Circuit With Zero Standby Power Consumption on Infrared Remote Controlled Product by Using Energy Harvesting	Prof. Akira Yamawaki
Practical Design of a Passive EMI Filter for Reduction of EMI Generation	Dr. Chaiyan Jettanasen
Prospective of Medical Cost for Diabetes Mellitus for Sex and Age Group in Range 2012-2050: Case of Mexico	Dr. Dora Elena Ledesma-Carrion
Provision Buffer for Ongoing Launch Product	Mr. KUO HSING WU
Putting a Technology Innovation Culture to Realize Indonesian Vision 2025: A Case Study	Dr. Wahyudi Sutopo
Putting Numbers to Value: Going Simplistic for Reaching Lean Manufacturing	Miss Zuhara Ivette Chavez Lopez
Python Classes for Numerical Solution of PDE's	Prof. Kare Olaussen
QBSA 4 W2S : QoS-Based Scalable Approach for Web Services Selection	Dr. Mansour Mekour
Queuing Model For Shinde Restaurant	Dr. Rameshwar Bhutada
Quine-McCluskey Repair Technique for Evolutionary Design of Combinational Logic Circuits	Mr. Xiaoqiang ZHANG
RAID-5 STRATEGY IN VIRTUAL HYBRID CLOUD (R5 VHC)	Dr. Ch Prem Kumar
Real Time Recognition of Filipino Sign Language Using Bayesian Network	Dr. Vera Geroda
Real-Time Implementation of a Power Series Based Nonlinear Controller for the Balance of a Single Inverted Pendulum	Prof. Hien Tran
Reliability Analysis for a Repairable System under N-policy and Imperfect Coverage	Dr. Richa Sharma
Remarks on Solving Algebraic Riccati Matrix Equations using a Hopfield Neural	Prof. Kazuhiko Takahashi

Network and Application to Optimal Control Problems	
Research in Modeling of Complex Adaptive Petri Net	Dr. Jun Wang
Research in Virtual Cotton Spinning Process based on CAPN	Dr. Jun Wang
RESEARCH ON MUTUAL COUPLING CORRECTION OF ARRAY OUTPUT SIGNAL BY BP NETWORK	Dr. Yuan Shiji
Response Surface Methodology for the Optimization of Paddy Husker by Medium Brown Rice Peeling Machine 6 Rubber Type	Dr.Surapong Banphan
Reversible Data Hiding with Lossless Data Embedding	Dr. Chinchu A.V
Review and analysis of Research and Application of Software Ecosystem	Dr. A.M.Yousefzade
Risk Management - Comparison of Islamic and Conventional banks in GCC	Dr. Aqila
Roadmap to a DO-178C Formal Model-Based Software Engineering Methodology	Dr. Emanuel Grant
Scalable Instruction Set Extension for Dual-field Public-key Cryptosystem	Dr. Wang Liao
Scientific Computing with HOMsPy	Dr. Asif Mushtaq
Selection of Anchor Nodes in Time of Arrival(TOA) for localization in Wireless Sensor Networks	Dr. K. Raghava Rao
Self Checking Systolic Sorter	Dr. Ali Maamar
Signal Persistence Checking of Asynchronous System Implementation using SPIN	Mr. Weerasak Lawsunnee
Simulation Analysis of Modified Filter Bank Multicarrier for Physical Layer Cognitive Radio under Radio Environment	Dr. Er.A.S.Kang
SIMULATIONS ON CAR REPARING TIME ESTIMATION	Dr. K.RADHA

The Design of Hotel Performance Management System in Padang

Difana Meilani, Ilham Anugrah

Abstract— As a tourist place, Indonesia is supported by its beautiful natural scenaries and unique cultures. Actually most of Indonesia incomes came from tourism sectors. Padang as the administrative center of West Sumatra is one of tourism places in Indonesia. Unfortunately, all the facilities and touris actractions here need improvement, for example the hotels. Hotels in Padang need attention on the performance management system. One of the them is Premier Basko Hotel. This hotel depends on profit targets and classification of IHRA (Indonesian Hotel & Restaurant Association). For the increasement of this hotel, SWOT (Strength, Weakness, Opportunity, Threats) analysis and balanced scorecard method were applied. It began with the strategic information gathering based on interviewing the company, then continue processing it into a questionnaire which based on SWOT research. At this point, it is known that Premier Basko Hotel is in quadrant II (strength-threat) SWOT analysis diagram. So, this hotel needs to implement a diversification strategy. It also has 14 types of alternative strategies with strategic goals, 14 factors on Critical Success Factors (CSF), 38 indicators on Key Performance Indicators (KPI), and 38 pieces forms of performance management system. All of these are as the form of guidelines for the performance management system Premier Basko Hotel.

Index Terms— Hotel, KPI, Performance Management System, SWOT-BSC

I. INTRODUCTION

INDONESIA'S beautiful natural views and cultural diversities are the advantages that Indonesia has to be a tourist place. As a tourist place, it is going to contribute greatly to the nation's economy.

West Sumatra as part of Indonesia tourism has to provide facilities and tourist attractions and this is the role and responsibility of the central government. Through interviews with the Licensing to The Tourism Section Head of Culture and Tourism of Padang, it is known that the attractiveness of tourism in Padang is the mix of natural shades to legend, cultural attractions, sports interests, and supported with a taste of traditional Minangkabau food that has been widely recognized by the world. The combination can be encountered on various objects and attractions such as Air Manis Beach, Caroline Beach, Nirwana Beach, Siti Nurbaya Festival, Dragon Boat Festival and Tour of The Batur. The presence of food such as rendang, beef jerky

Manuscript received January 8, 2015; revised February 1, 2015. Difana Meilani is a lecturer in Industrial Engineering Department, Faculty of Engineering, Andalas University, Padang, West Sumatera, Indonesia (e-mail: difana.meilani@gmail.com and difana@ft.unand.ac.id).

Ilham Anugrah was with Andalas University, Padang, West Sumatra, Indonesia. (email:anugrah.ilhamanugrah@gmail.com)

and various chips Sanjai, are the tourist attractions of Padang. So it can be concluded that tourism sector is the focus of development and the biggest income of Padang.

Realizing tourism as an economic power of Padang, revamping and improving the assessment of development of various objects are needed. One of the objects is the hotels. Hotels are included as a primary means of supporting tourism activities. From interviewing IHRA executive director of West Sumatra, Elvis Syarif, he said that, the hospitality industries like hotels need a guidance for internal performance improvement.

Premier Basko Hotel is one of the 52 unit hotels in Padang [3]. This Hotel is located at Jalan Prof. Dr. No. Hamka. 2A Padang. It has 180 rooms with 9 units of different types, 9 units meeting rooms with different capacities, restaurant with international cuisine, lounges, swimming pool, laundry, as well as a wide range of facilities at the business center. Actually, it is the only 5 star hotel in Padang. This hotel is applying SWOT (Strength, Weakness, Opportunity, and Threat) in its effectiveness operational.

Rangkuti said that SWOT is a form of long-term development plan in the streamline operations, based on the opportunities, threats, strengths and weaknesses of the company [9], [20]. The combination of SWOT analysis of the balanced scorecard method, which was introduced by Robert S. Kaplan and David P. Norton in 1992 is able to give a clear description for the improvement and development direction of the company [11].

So the design of the performance management system generated from the combination of these two methods can be a guide for Premier Basko Hotel in particular, and for industry hospitality in general.

II. REVIEW OF RELATED LITERATURE

A. Hotel

There are several definitions of a hotel. The following is two of them.

- 1. Hotel Proprietors Act, 1956 said that hotel is a company managed by its owner, by providing services in food, beverages, and room for people who are travelling, and they are able to pay amount of money based on the service they got without any special agreement [8].
- 2. Endang, 2013 said that Hotel is a commercially organized lodging which meets the government's requirements by providing services in food, beverage, and other services [4].

Endang classified a hotel which is [4]:

1. Based on the layout of the building

ISBN: 978-988-19253-9-8 IMECS 2015 ISSN: 2078-0958 (Print); ISSN: 2078-0966 (Online)

- a. Resort hotel: a hotel which is located in the attractions
- b. City hotel: a hotel which is built in urban areas.
- c. Airport hotel: a hotel which is built adjacent to the airport.
- d. Urban hotel: a hotel which is built in rural areas.
- e. Suburb hotel: a hotel which is built in the suburb.
- 2. Based on long time stay
 - a. Transit hotel: a hotel that is used for one or two nights.
 - b. Resident hotel: a hotel that is used as a residence.
 - Semi resident hotel: a hotel that is used as a temporary shelter.
- 3. Based on room tariff
 - a. American plan: hotels with room rates + the cost of three meals.
 - b. European plan: hotels with room rates which do not include the cost of eating.
 - Modified American plan: hotels with room rates + the cost of two meals.
 - d. Continental plan: hotels with room rates which include continentall breakfast basis.
 - e. Bermuda plan: hotels with room rates which include American breakfast.
- 4. Based on the number of hotel rooms
 - a. Small hotel: a hotel with number of rooms maximum 28 units.
 - b. Medium hotel: a hotel with number of room around 28-299 units.
 - c. Large hotel: a hotel with number of rooms more than 300 units.

B. Performance Management

There are several definitions of performance. Rizki and Mutia shows that performance is a whole view of the condition of a company in a certain period of time, and it is the result of an achievement from a company operational activities by processing the available resources [22]. While Wibowo said that performance is the result of a strong work associated with the strategic objectives of the organization, customer satisfaction and contribute to the economic [23].

Performance management is an agreement-based interactive control model [18]. Performance measurement is an essential part of the performance management. By measuring, people transform complex reality into simplified numerical concepts that can be communicated easily and acted upon. According to Lebas, the simplification of reality by measuring is the prerequisite of successful management [15]. Similarly, Bititci et al and Forza, argue that performance measurement is at the heart of the performance management process and it is of critical importance to the effective and efficient functioning of performance management [2], [5].

C. Balanced Scorecard

A Robert S. Kaplan and David P. Norton agreed that Balanced Scorecard is one measurement set for getting a quick and whole view of a business based on the financial which contains the finished programs in order to complement the size of the non-financial and operational, customer satisfaction, internal processes, innovation and

size of operations of organizational improvement activities, in order to spur future financial performance [13].

Balance scorecard has four terms, as follows:

- 1. Financial and nonfinancial indicators
- 2. Past, present and future indicators
- 3. Internal and external indicators
- 4. Cause and effect indicators

The balanced scorecard has four perspectives [12]. According to Kaplan and Norton, they are:

- 1. Finance
- 2. Customers
- 3. Internal business processes
- 4. Learning and growth

D.SWOT

Rangkuti said that SWOT stands for strength, weakness, opportunity and threat. It is a kind of company development which derived from a long term planning in creating effective operational activities based on SWOT [1]. TOWS' matrice is a way for brainstorming in order to create several alternative or strategies for the company [6], [7].

E. SWOT - Balanced Scorecard

The implementation of SWOT - balanced scorecard in a company can produce speed and ease monitoring and controlling a business [23]. Conjoining the SWOT matrix with the balanced scorecard (BSC) makes a systematic and holistic strategic management system [16]. Here is a picture of a SWOT matrix - the balanced scorecard:

BSC SWOT	Finance	Costumer	Internal Business Process	Learning & Growth
Ctronatha	Financial	Costumer	Internal	Learning &
Strengths	Strengths	Strengths	Business	Growth
Weaknesses	Financial	Costumer	Internal	Learning &
Weakilesses	Weaknesses	Weaknesses	Business	Growth
Onnortunities	Financial	Costumer	Internal	Learning &
Opportunities	Opportunities	Opportunities	Business	Growth
Threats	Financial	Costumer	Internal	Learning &
imeats	Threats	Threats	Business	Growth

Fig. 1. Matrice of SWOT-BSC

F. CSF and KPI

Critical Success Factors (CSF) are the essential elements for the success of the company in implementing the strategy [19]. CSF is determined based on the process of collecting data in order to reach the goals of every stakeholder.

Once CSF is known, the Key Performance Indicators (KPIs) can be formulated. Here is some characteristics of CSF:

- 1. Easy to understand
- 2. Can be optional choice
- 3. Related to balanced scorecard perspective
- 4. Focus on specific areas

Key Performance Indicators (KPI) is a set of measurements that focuses in every critical performance aspect for the success of a company in present and future [19].

ISBN: 978-988-19253-9-8 IMECS 2015

III. RESEARCH METHOD

Below is the flowchart of research methodology:

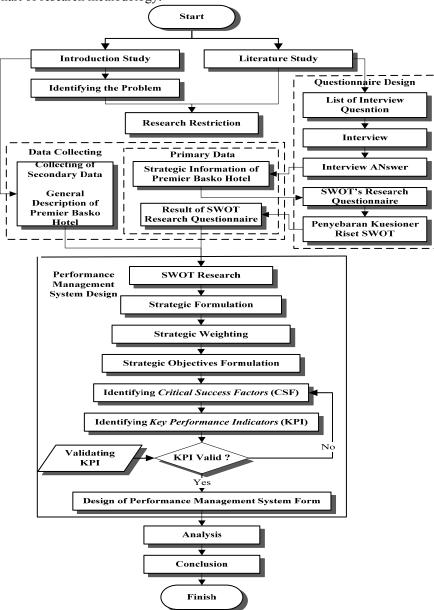

Fig. 2. Flowchart of Research Method

IV. RESULT AND DISCUSSION

A. Data Collecting

The data of the internal and external aspects (strategic information) of Premier Basko Hotel were obtained from the formulation of the questions list and from the interview. The results were then written in SWOT research questionnaire. The questionnaire was distributed to 8 respondents that responsible in Hotel manageria. They are the General Manager, Head of the Department of Human Resources, Accounting, Housekeeping, Sales & Marketing, Front Office, Food & Beverage and Engineering. From the questionnaires, we can know the average existing condition from respondents of the hotel and the average urgency handling also from the respondents. From this, the rank or the handling priority can be determined and it is shown in Appendixes Table I

B. Data Processing

1. Research of SWOT

The position of the hotel which is based on the difference between the average values of accumulative aspects of internal and external and with the median value (value of 3). The position of the hotel is in quadrant II (strength-threats) with the coordinate (0.17, -0.19).

2. Strategic Formulation

The strategic formulation at Premier Basko Hotel can be obtained with TOWS matrix by brainstorming in order to create several alternatives or strategies at the hotel. The alternative strategies for Premier Basko Hotel is derived from the result of strategic formulation on TOWS matrix. The strategies are divided into SO (Strengths Opportunity),

ISBN: 978-988-19253-9-8 IMECS 2015

WO (Weakness Opportunities), Strengths Threat (ST) and WT (Weakness Threats). It is shown in Table II Appendix

3. Strategic Weighting

Weighting strategy is done by assessment (in value range 1-5) for each alternative strategy which is based on the relationship of each indicator in relation to the external and internal aspects. The highest weight is 368 from the ST strategy and the strategic alternatives is strengthening the characteristic of the hotel.

4. Formulation of Strategic Objectives and Identifying Critical Success Factors

Formulation of strategic objectives is done by classifying each alternative strategy into four perspectives in balanced scorecard. Critical Success Factors (CSF) are obtained from the critical factors of each hotel strategy objectives. The strategic objectives and the Critical Success Factors of Premier Basko Hotel are as shown in Table III Appendix.

- 5. Key Performance Indicators of Identifying and Validating The valid Key Performance Indicators (KPI's) in the Premier Basko Hotel is shown in Table III Appendix
- 6. Designing form of Performance Management System

 There are 38 forms of Performance Management
 System that have been designed for the Premier Basko
 Hotel

V.CONCLUSION

From the research, it is concluded that Premier Basko Hotel is currently in kuadran II (strength-weaknesses) SWOT analysis diagram, so the hotel needs to implement diversification strategic. It is a strategic for collecting all internal powers and avoiding all company external threats in order to get all the long term opportunity. This research also produces 14 strategic alternatives for Premier Basko hotel. Furthermore, this Hotel also has 14 Critical Success Factors (SCF) and 38 Key Performance Indicators (KPI), and 38 forms of performance management system which can be a guidance for Premier Basko Hotel in improving company performance management system quality.

APPENDIX A

Appendix A shows the table of the Existing Condition and urgency handling from the respondents of Premier Basko Hotel, table of TOWS Matrix at Premier Basko Hotel and also table of Strategic Objectives, Critical Success Factors and Key Performance Indicator of Premier Basko Hotel
