¿Vale la pena tomarse interés en las clasificaciones internacionales?

- ¿De verdad miden algo?
- En su caso, ¿qué miden?
- ¿Tiene interés lo que miden?
- ¿Pueden ser útiles para informar la política científica de las instituciones?
- ¿Cómo combinar la información que aportan los rankings con otros datos bibliométricos institucionales?

Global Rankings

- **ARWU** (China)
- **THE** (UK)
- **US News** (USA)
- **NTU** (Taiwan)
- **CWUR** (United Arab Emirates)
- **URAP** (Turkey)
- **RUR** (Russia)

- **LEIDEN** (Holanda)
- **SIR** (Espanña)

Component Plot in Rotated Space

What ever happened to the teaching dimension

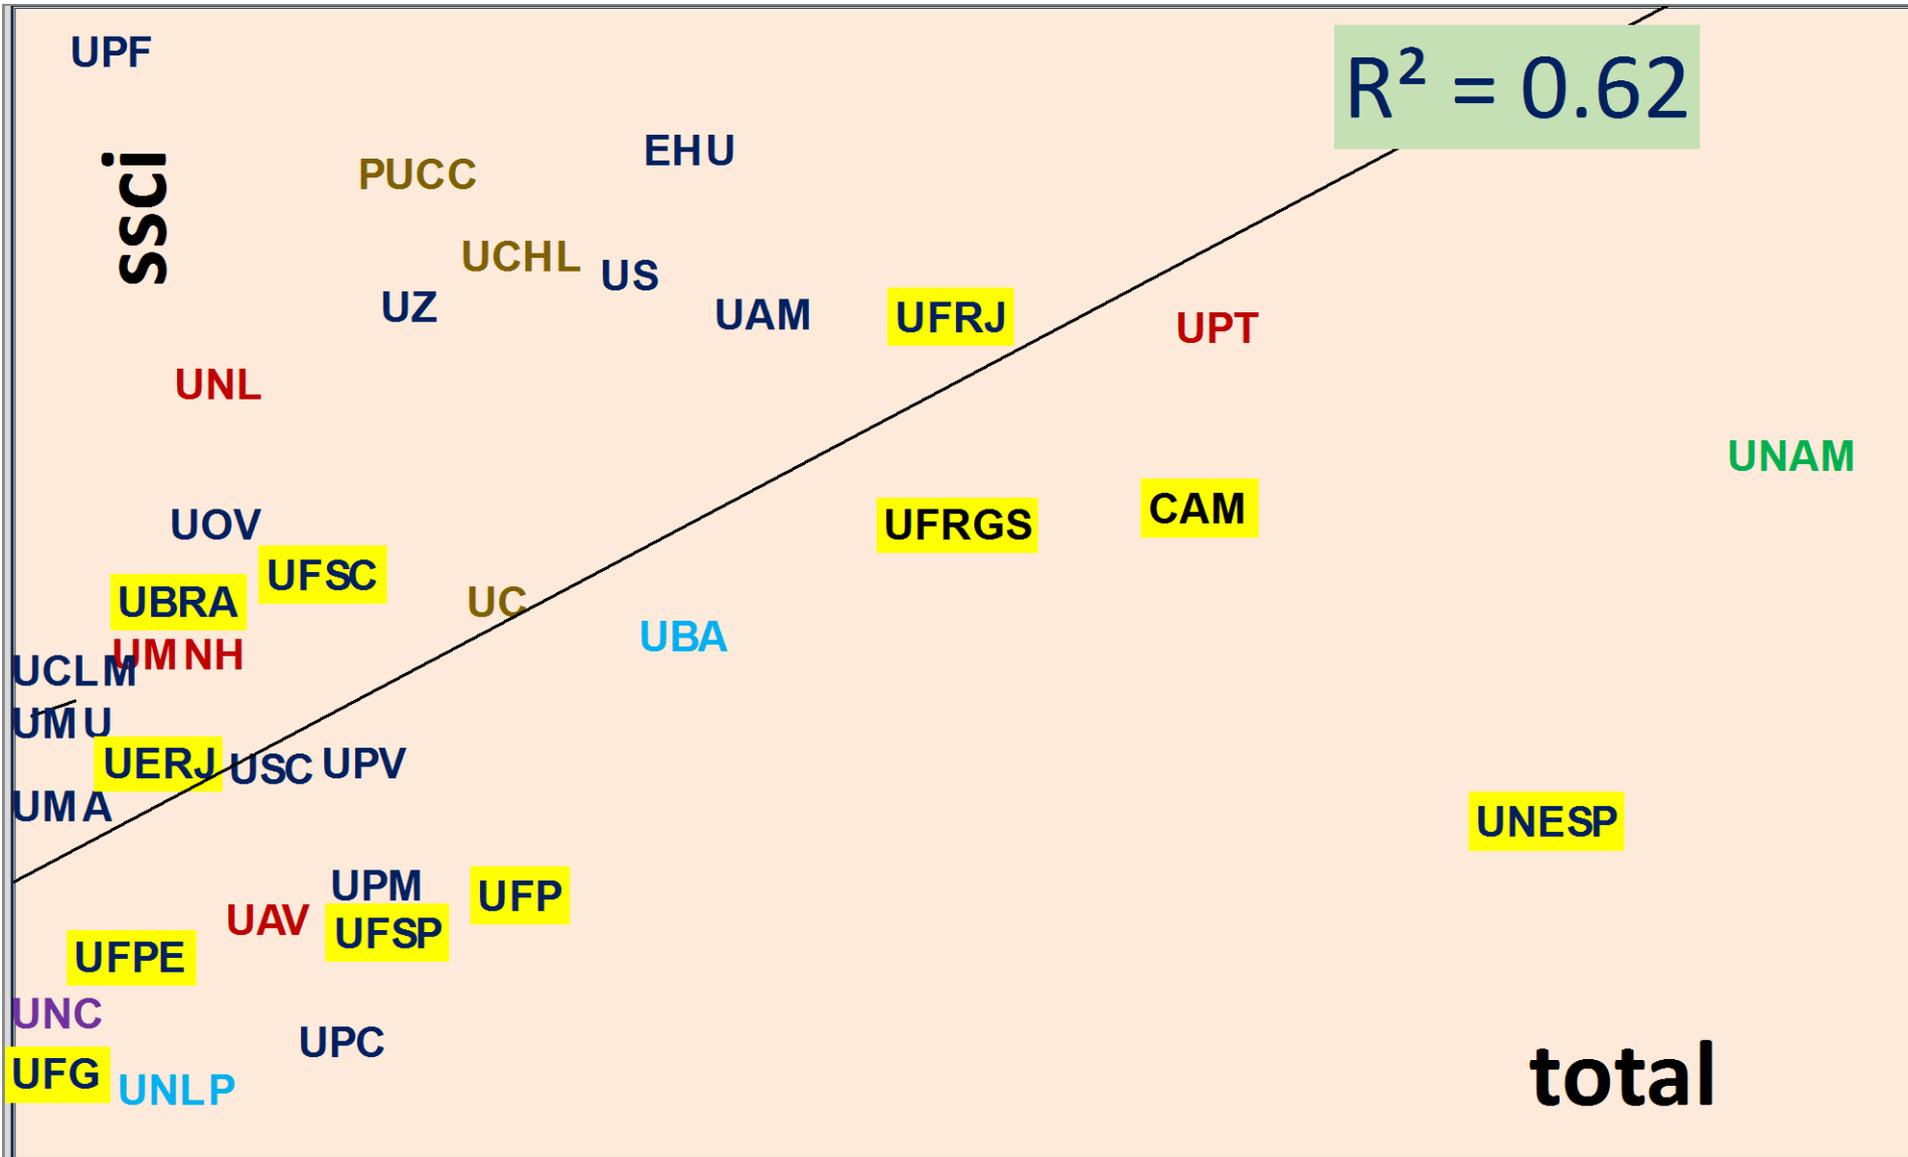

Para responsables universitarios

- La dimensión investigadora es la componente principal (y única) del conjunto de clasificaciones internacionales.
- De extender a dos componentes rotadas, una apuntaría cuenta de la cantidad y otra a la calidad de la producción investigadora
- La mejor dirección (para estar adecuadamente “indexado” en los rankings) es hacer (seguir haciendo) un buen trabajo investigador.

Segunda conclusión

- **Las decisiones informadas precisan de la comparación con modelos de referencia.**
- **Se puede utilizar la información que aportan las clasificaciones e índices bibliométricos, como herramientas de benchmarking.**
- **Dicho esto, recordemos que hay mucha vida fuera de la bibliometría...**
