OF THE
CITY OF DUBLIN TECHNICAL SCHOOLS,
FOR THE SESSION, 1901-1902.

THE Governors of the City of Dublin Technical Schools beg to present this, their Sixteenth Annual Report.

During the Session, which opened on the 19th September, 1901, classes were held in 31 subjects, and 1,274 pupils were enrolled, as against 1,134 in the preceding Session. The total number of Class entries was 1,671, as against 1,470 in the previous Session, and the attendance of students each evening was good, and well maintained.

Early in the Session Mr. W. Vickers Dixon, who had been identified with the working of the Schools for fifteen years, was appointed Inspector for Ulster under the Department of Agriculture and Technical Instruction, and the Governors, by an unanimous resolution, expressed their sense of the valuable services he had rendered during his long connection with the management of the Institution.

Mr. Arnold Graves, who was one of the founders of the Schools, and who had acted as Honorary Secretary from their formation, also resigned, in November, but the Governors are pleased to know that his services are always available should circumstances exceptionally require them.

In November, 1901, Mr. Louis Ely O'Carroll was appointed, Secretary to the Board of Governors and Principal of the Schools.

The results of the Examinations under the Board of Education the City and Guilds of London, the Society of Arts, and the Local

Examinations held under the Schools' regulations, were very satisfactory. For the first time the Schools were made a centre for Examinations under the Society of Arts, and pupils can now obtain standard Certificates in those Commercial subjects which run side by side with purer Technical Education. It is very creditable to record that at the Examinations referred to fifty-seven per cent. of the pupils who sat passed, and obtained certificates.

Appended will be found the results of all the Examinations.

The new buildings, which had been commenced in August, 1899, were opened at the beginning of the year, but only in a few of the Class-rooms could satisfactory instruction be given, as the equipment was incomplete, and part only of the requisite apparatus and machinery had been received from the makers.

The Buildings cost £8,366 18s. 1d. ; the heating, plumbing, and lighting, £654 13s. 7d. ; and Architect's fees, £528 3s. Orders were given for woodwork fitting to the value of about £2,000, and machinery was purchased for the sum of £2,500. When the equipment and furnishing, which is going on apace, is completed, the Schools will be capable of providing instruction of a thoroughly good Technical character for about two thousand pupils.

During the Session the Schools were visited by the Inspectors from the Department of Agriculture and Technical Instruction, and the following summary of report sent in to the Department regarding the work of the Schools was received :—

“ Very satisfactory progress has been made in the work of the Schools, and the equipment in all Departments is being largely increased or renewed. In Mechanics and allied subjects better equipment of models and apparatus is being provided, and will render the teaching of these subjects more efficient.

“ Attention may be drawn to the excellent diagrams devised by the Teacher of Building Construction, which largely contributed to the success of the class.

“ Opportunity is now afforded for the teaching of the various branches of Physics practically by the provision of a new Laboratory.

“ The completion of a new Chemical Theatre before the end of the Session, and the equipment of a new Chemical Laboratory for the coming Session, will still further add to the valuable work hitherto done in the Schools.

“ The teaching of Elementary Art suffered from inadequate accommodation, a defect which, it is satisfactory to note, will be removed during the coming Session, by the provision of suitably appointed Art Rooms.”

A statement showing the total income and expenditure of the Technological and Commercial subjects will be found at end. The statement of the receipts and expenditure for Science and Art, and the Building Accounts is published in the Corporation Accounts.

A List of Life Members and Subscribers, and of the attendances of the Governors will also be found at end.

The Governors desire to return their thanks to Mr. M. Crowley, Mr. Purser, Mrs. Fraser, Mrs. W. R. J. Molloy, the Master Builders' Association, and the Dublin Guild of Master Painters, Messrs. Dockrell & Sons, Messrs. Kennan & Son, Mr. John Mulligan, Messrs. Manfield & Sons, Mr. E. J. Long, Mr. J. F. Keatinge, Mr. John Sibthorpe, Mr. William Martin, Messrs. Walkers, Parker & Co., Chester, for special prizes and donations, and also to the other subscribers.

Early in May the Department of Agriculture and Technical Instruction sent out a circular letter inviting specimens of Technical Work from the various Technical Schools for the Exhibition in Cork. The City of Dublin Technical Schools, in response, furnished a section with examples of Art Studies and Work in Metal Plate, Tailoring, Painting and Decorating, and Building Construction, which showed the value of Technical Instruction and the capabilities of pupils technically trained.

All of which the Governors beg to submit as their Report, this 17th day of December, 1902.

(Signed),

JOHN MULLIGAN, *Chairman.*

JOHN GOOD, *Deputy-Chairman.*
