TWENTY-SIXTH

ANNUAL REPORT

ON THE

CITY OF DUBLIN

Municipal Technical Schools.

SESSION 1911-1912.

We have pleasure in presenting the Twenty-sixth Annual Report of the City of Dublin Technical Schools.

During the Session, which opened on the 26th September, 1911, 2,601 Students were enrolled, being an increase of 729 over the roll of the previous year. But a still more satisfactory feature was the large total of Class Entries, 6,236, for this indicates that the Students generally have entered for Courses of Study involving two or more Classes. The increase on the previous Session was 1,261.

Of the new Classes started, the chief were for Accountancy, Brass-finisher's Work, Aeroplane Modelling and Construction, Surveying and Levelling, &c., which Classes should be popular additions to our curriculum.

In connection with the last two Classes named open air demonstrations and practices were held weekly in the Phoenix Park.

The new Technical Institute at Bolton Street was opened for Classes at the beginning of the Session. This Institute is intended for Building, Engineering, Printing, and the Book-producing Trades, and the extension of its proper work will be pushed forward as soon as the Commercial Classes which have been temporarily accommodated there can be provided for in some more suitable neighbourhood. These Classes in Commerce were very largely attended and were successfully conducted. In some cases Classes had to be multiplied to accommodate the large number of applicants.

Domestic Economy Classes were held at the Kevin Street, Chatham Row, and Rutland Square Schools, and Extension Courses, mainly for the wives and daughters of artisans, were held in four populous districts of the City. It is gratifying to find that all these Classes were extremely well-attended and much appreciated, and that the majority of the Students who entered for Examinations were successful. One of our Needlework Students gained a First Class Certificate "with distinction" together with the Bronze Medal of the National Union of Teachers.

A First Place at the Feis Ceoil with Gold Medal was obtained by a Student of our School of Music, while several Silver Medals and other successes were won by our Music Students at the Father Matthew Feis. One Candidate obtained Honours in the Middle Grade at the Examinations of the London College of Music.

At the Industrial Exhibition held by the Royal Dublin Society the First and Second Prizes in Wood-carving and the Second and Third Prizes in Art Iron Work were gained by the Students of our Craft Classes.

As usual a large number of Students sat for the Standard Public Examinations held by the Board of Education, the City and Guilds of London, the Royal Society of Arts, &c. The total number of Certificates obtained was 451.

The Mechanical and Electrical Engineering Classes have steadily increased in reputation and popularity, and are now a very prominent feature of our work. The Experimental Science and Mathematics Classes too enrolled as in previous years a large number of Students, who won credit for themselves and their Teachers, either by the lucrative positions which they achieved or the distinctions which they gained by Examination. We note the following as part of the record of these Classes :—

In the Fairfield Open Scholarship (Chemistry) one of the Students obtained First Place in Ireland.

Three of our Students have obtained important positions as Assistant Chemists in large works in Dublin.

Three Students have qualified as Teachers under the Department of Agriculture and Technical Instruction.

One Student obtained the highest marks in Practical Chemistry at his Degree Examination, T.C.D.

Six Students passed the First Professional Examination of the Royal College of Surgeons and others passed in the Engineering Course of the National University.

Of the Pharmaceutical Students three have finished their Course and qualified, one obtaining First Place in Chemistry at the Final Examination.

A lady Student obtained a Sizarship in Trinity College, Dublin.

Two Students obtained the B.Sc. Degree of the National University; another the B.Sc. Degree in the Queen's University, Belfast.

Two Students obtained high places in Civil Service Examinations for Junior Admiralty appointments.

In the open Competition for Entrance Scholarships at the National University, one Student gained a First Class Scholarship of £50 and another Student a Third Class Scholarship of £30.

One Student succeeded in obtaining a County Borough Scholarship, value £120, tenable at the National University.

A Student obtained a Teachership-in-training at the Royal College of Science.

Two Students passed "with Distinction" in the Advanced Mathematics Examination held under the Board of Education, London.

One Student obtained First Class Honours and Exhibition in the Second University Examination in Engineering and won a First Class Scholarship of £30 in the Third Year, Faculty of Engineering, University College, Dublin.

A Student was successful in obtaining the Degree of B.Sc., London University whilst another Student obtained the Intermediate Science Degree of that University.

A number of Students successfully passed the Entrance Examination to the Royal College of Science.

It is a pleasure to record that a recent Student of our Schools has this year obtained the Senior Moderatorship in Science of Trinity College, Dublin; and we are also glad to note that a number of recent Students have obtained important posts as Science Teachers at Pembroke, Belfast, Cork, and Ballymena.

Secondary School Science Teachers seeking the Department's qualifications, and Primary School Teachers preparing for National Board qualifications, took advantage to a large extent of our Classes in Mathematics and Experimental Science.

Many of our Science and Mathematical Classes are of University standard and a number of our Students are working for Degrees. In this connection it is to be regretted that our Students have to look to the University of London for a recognition which they might be offered in their own country; and if we have to give way to the just demands of Students and establish a Centre for

London University Examinations in our Technical Schools it will only be to an imperative necessity that we shall thus yield.

During the Session a number of Popular Lectures on scientific subjects were held in the Lecture Hall at Bolton Street. These were well attended and much appreciated. Our thanks are due to the Lecturers, some of whom came a long distance, for giving our citizens, and more especially our Students, the benefit of their special experience in various branches of education.

Appendix A. to this Report gives the names of the successful Students and Prize-winners resulting from the Examinations on the Session's work ; B. the number of Students enrolled in the several Classes ; C. Analysis of the Trades and Occupations of the Students ; D. List of the Subscribers and Prize Donors to the Schools. A statement of the Income and Expenditure concludes the Report.

T. A. FINLAY,

Chairman.
