## **IS Education: Future Challenges**

**Panel Chair:** Margaret Tan, National University of Singapore, Singapore

**Panelists:** John King, University of Irvine, USA  
Niels Bjorn-Andersen, Copenhagen Business School, Denmark  
Ting-Peng Liang, National Sun Yat-sen University, Taiwan

### **Abstract**

It is likely the traditional IS education that have been conducted at universities will take a different form in its content and context with the advent of sophisticated information technologies. Multimedia, cyberspace, digital libraries, just to mention a few, will provide us the challenges to revise our IS syllabi, in addition, to the dynamic and changing business environment.

This panel will discuss some of the views and trends of IS education in the United States, Europe, and the Asia Pacific region. What is the purpose of IS education? How will this purpose change in the future? Is there a model or framework for IS education? What is the best approach?
