Publishing in Information Systems Journals (Panel)

Title: “Journal Editor’s Insight and Advice on Publishing Your Research”

Time:

Panel chair and affiliation: S. E. Kruck (Professor, James Madison University)

Participants and affiliations:

- S. E. Kruck – Journal of Information Systems Education (JISE)
- Jeretta Horn Nord – Journal of Computer Information Systems (JCIS)
- Gary Klein – Journal of the Association for Information Systems (JAIS)
- Suprateek Sarker - Journal of Information Technology Case Studies and Applications (JITCAR)
- Adam Mahmood - Journal of Organizational and End User Computing (JOEUC)
- Matti Rossi – Communications of the Association for Information Systems (CAIS)

Abstract: Interested in publishing your research? Editors from the Journal of Information Systems Education (JISE), Journal of Computer Information Systems (JCIS), Journal of the Association for Information Systems (JAIS), Journal of Information Technology Case Studies and Applications (JITCAR), Journal of Organizational and End User Computing (JOEUC), and Journal of Global Information Technology Management (JGITM) will be hosting a panel on publishing. In this session, you will hear directly from, and ask questions of, editors of these journals as to what they're looking for, how to avoid a rejection or endless R&R's. In addition, each editor will cover the review process and other opportunities to become involved. Attendees are encouraged to ask questions and explore publishing opportunities.

Journal of Information Systems Education (JISE) is an academic, blind peer-reviewed IS journal that focuses on IS education. JISE seeks original articles on current topics of special interests to information systems educators. JISE also publishes teaching tips and teaching cases (with instructor notes). Website: jise.org Email: editor@jise.org or jise@jmu.edu

Journal of Computer Information Systems (JCIS) is a blind refereed journal that serves as a forum for information systems and business professionals to publish their research and ideas. The premier publication of the International Association for Computer Information Systems (IACIS), each issue provides a wealth of timely and informative IT/IS related articles and research summaries. Website: iacis.org Email: jeretta.nord@okstate.edu

Journal of the Association for Information Systems (JAIS) is inclusive in topics, level and unit of analysis, theory, method, philosophical and research approach, reflecting all aspects of Information Systems globally. JAIS encourages innovative, interesting and rigorously developed conceptual and empirical contributions with a strong grounding in theory. Categories of works

include research papers, research practice, research perspectives, and editorial notes. Website: <http://aisel.aisnet.org/jais/>.

Journal of Information Technology Case Studies and Applications (JITCAR) was created to provide a high quality platform for scholars interested in case studies on contemporary Information Systems topics. JITCAR has steadily grown in stature and is now a globally respected case research journal, read by researchers, students, and practitioners alike. To continue to make the journal stronger and more visible, we are particularly interested in publishing methodological essays about case research that can serve as a guide for aspiring case study researchers and our future authors. Website: <http://jitcar.ivyp.org/>. Email: EIC@jitcar.org

Journal of Organizational and End User Computing (JOEUC) is an ISI-indexed double-blind refereed research journal that provides a forum to advance the practice and understanding of organizational and end user computing (OEUC). The journal publishes empirical, theoretical, and case-based research studies that show a significant contribution to the OEUC area by relating OEUC to organizational and end user performance, productivity, privacy, security, satisfaction, and strategic and competitive advantage Website: www.igi-global.com/joeuc

Communications of the Association for Information Systems (CAIS) is intended to foster the free flow of ideas within the IS community; its emphasis is on originality, importance, and cogency of ideas; it is also a vehicle for case studies, survey articles, tutorials, and other materials of general interest to the IS community. The primary role of a professional society is to facilitate communications among its members. *Communications of the Association for Information Systems* carries out this role by publishing articles on a wide range of subjects of interest to the membership beyond research results.
