Fourteenth Annual

International Conference on Information Systems

December 5-8, 1993 *Orlando, Florida*

CALL FOR PAPERS

VALUING DIVERSITY THROUGH INFORMATION SYSTEMS

The Program Committee of the International Conference on Information Systems (ICIS) invites the submission of papers to the Fourteenth Annual International Conference, to be held at The Hilton Hotel at Walt Disney World Village, Florida, December 5-8, 1993. All areas of theory and research in information systems, as well as innovative methods of teaching information systems, are appropriate for the Conference.

The theme for ICIS'93 is "Valuing Diversity Through Information Systems." Social, economic, and technical developments in the 1990s promise to produce a world that is diverse in several ways:

- diversity in society, as reflected in multicultural national character and changing demographics
- diversity in organizations, as reflected in collaborative networks, teams, and individuals
- diversity in technology, as reflected in media, networks, and architectures for information processing
- diversity in research, as reflected in the variety of quantitative and qualitative methods available for inquiry
- diversity in education, as reflected in multiple disciplines and learning opportunities

"Valuing diversity" suggests that diversity has inherent value that can be leveraged. Valuing diversity also suggests that diversity should be valued or honored. Information systems play potentially important roles in valuing diversity, and the Conference provides a forum for exploring those roles.

Contributions focusing on the Conference theme in the following specific areas are encouraged:

- methods for information system design, development, and implementation
- the characteristics of information systems and support technologies
- the social, economic, and ethical consequences of using IS
- the management of IS
- IS education and curriculum
- research methods relevant to IS

Contributions may be in the form of original Research Papers, Panels, or Research-in-Progress. All of these submissions will be refereed by the Program Committee and outside reviewers. The program will also contain invited presentations and/or tutorials.

Research Papers

Submitted research papers should be original, not under publication consideration elsewhere. The Program Committee encourages papers that focus on the Conference theme and that:

- employ novel theoretical, data collection, or analysis methods
- question, expand, and/or provide particularly interesting perspectives on information systems research or practice
- provide a theoretical-based description of experiences with information technology by individuals, groups, organizations, or governments
- give empirical data on interesting information systems phenomena
- make use of creative multi-institutional or multi-disciplinary research approaches

All research papers received by the submission deadline will be considered for presentation at the Conference. All submissions will be reviewed thoroughly and promptly, and detailed comments will be returned to the authors. All research papers accepted for ICIS will be published in full in the Conference Proceedings.

Panels

The Program Committee is soliciting proposals for panels that examine an innovative, controversial, or otherwise provocative issue of interest to the field. Proposals will go through a review process. The panel should focus on a common theme and should not be a collection of work in progress. The best panels at previous conferences have often been structured as a debate, giving opportunity for audience participation, but the Committee is open to new ideas. Prospective Panel Chairs are encouraged to discuss panel ideas with the Program Co-Chairs before submitting a panel proposal.

A panel proposal should be submitted by the Panel Chairperson, who will be responsible for coordinating the panel. The proposal should include a brief summary of the topic to be covered and the names and affiliations of two or three panelists who have made a commitment to participate. The Program Committee reserves the right to modify panel proposals in order to complement other parts of the Conference program. A one-page description of accepted panels will be published in the Conference Proceedings.

Research In Progress

A third type of submission sought by the Program Committee is descriptions of research in progress. Submissions of this type do not require complete analysis of results, although some preliminary results are necessary. Each research-in-progress submission is limited to eleven pages: a one-page abstract and a ten-page paper that covers the following topics:

1. Research question(s) being addressed
2. Theoretical foundations
3. Research methodology being used
4. Challenging issues that have arisen in conducting the research and approaches taken for addressing these issues
5. Preliminary results

Submitted research-in-progress papers will be refereed and evaluated on their relevance to the Conference theme, the insights provided for IS researchers, and the potential for important findings. A one-page abstract of selected papers will be published in the Proceedings.

Publication of Accepted Research Papers

ICIS is a forum for the sharing of the results of original research and ideas. Papers submitted for publication in the Proceedings must not have been published before nor should they have been submitted for publication to a journal or another conference at the time of submission to ICIS. Following the ICIS Program Committee's decision to publish or reject a paper, it may be submitted without prejudice to any journal. Many IS journals will consider for publication in revised form a paper presented at ICIS or published in the Proceedings if it meets their publication standards. This preserves the right of ICIS for first presentation and the journal's right for archival presentation.

ICIS Policy on Conference Appearances

To encourage broad participation, ICIS limits individual appearances on the ICIS program to only one role (i.e., as paper or tutorial presenter, panel member, session chair, or discussant). The only exception to this policy is for authors who have more than one paper accepted and for whom no co-authors are able to present the additional paper(s).

Awards

Three research papers presented at the Conference will be selected for Best Paper Awards of $1,000 each. One award will be given to the best overall Conference paper. Two awards will be given to papers that best capture the theme of the Conference.

Important Dates

Submission Deadline:	March 8, 1993
Acceptance Notification:	June 7, 1993
Final Version Due:	July 23, 1993
Conference:	December 5-8, 1993

Instructions to Authors

Five copies of complete papers or panel proposals must be received no later than March 8, 1993. Diskettes and electronically transmitted papers will not be accepted. The body of a research paper, exclusive of references, must not exceed 5,000 words (approximately 25 typewritten, double-spaced pages of 200 words per page). The body of a paper describing research in progress, exclusive of references, must not exceed 2,000 words. Authors are required to indicate the exact word count of their submission on the title page. Research papers exceeding 5,000 words and Research-in-Progress papers exceeding 2,000 words will not be reviewed but instead will be rejected and returned to the authors. To facilitate the blind refereeing process, the authors' names and affiliations should appear only on a separate title page. The language of the Conference is English.

Authors whose papers are selected and panelists who are members of accepted panels are expected to register for the Conference. Research papers not accompanied by the completed and signed submission form, available from the Program Co-Chair, will be rejected and returned to the author. Authors retain copyright ownership of papers published in the ICIS Proceedings.

Five copies of each submission should be sent to the Program Co-Chair:

Dr. Robert Bostrom
Department of Management
College of Business Administration
University of Georgia
Athens, Georgia 30602 USA
Phone: (706) 542-1294
E-Mail: BBOSTROM @ UGABUS
Fax: (706) 542-3743

For information on any aspect of the Conference other than program, panel, and paper submissions, contact the Conference Chair:

Dr. Robert Zmud
Department of Information and Management Science
College of Business
Florida State University
Tallahassee, Florida 32306 USA
Phone: (904) 644-4713
E-Mail: BZMUD @ FSUAVM
Fax: (904) 644-8225

The Conference is organized and managed by the International Conference on Information Systems. It is sponsored by the Society for Information Management (SIM Education Foundation) and The Institute of Management Sciences (College of Information Systems). It is presented in cooperation with the Association for Computing Machinery (Special Interest Group on Business Information Technology) and the International Federation for Information Processing (Technical Committee 8: Information Systems).
