# Abstract

**Title:** Health Literacy in Community Pharmacy

**Authors:** Sarah Anderson, Cassie Brownfield-Wilson, Kelly Madden, Lindsay Tarleton, Joe Zerka, Aleda M.H. Chen

**Abstract:** 48% of English-speaking patients are unable to obtain, process, understand, and utilize health information, and 30-50% of patients do not correctly adhere to their medications. The combination of chronic disease, poor health literacy, and poor medication adherence lead to increased health costs and hospitalization
