Riassunto - Cataloghi del Museo di Storia Naturale dell'Università di Firenze, Sezione di Zoologia «La Specola». XXXI. Crustacea, Classe Malacostraca, Ordine Decapoda. Superfamiglie Dromioidea, Homoloidea, Aethroidea, Bellioidea, Calappoidea, Cancroidea, Carpilioidea, Cheiragonoidea, Corystoidea, Dairoidea, Dorippoidea, Eriphioidea. Sono elencati gli esemplari del phylum Crustacea, Classe Malacostraca, Ordine Decapoda, appartenenti alle seguenti famiglie: Dromiidae, Dynomenidae, Homolidae, Aethridae, Belliidae, Calappidae, Matutidae, Atelecyclidae, Cancridae, Pirimelidae, Carpiliidae, Cheiragonidae, Corystidae, Dacryopilumnidae, Dairidae, Dorippidae, Ethusidae, Eriphiidae, Menippidae, Oziidae, Platyxanthidae, conservati nelle collezioni della Sezione di Zoologia «La Specola» del Museo di Storia Naturale dell'Università di Firenze.

Parole chiave: Decapoda, sistematica, collezioni.

INTRODUCTION

The present catalogue gives a list of the Decapoda, Section Podotremata Guinot 1977 and the first part of the Section Eubrachyura Saint Laurent 1980 (superfamily Eriphioidea included), conserved in the Zoological Section «La Specola» of the Florence University Natural History Museum.

Most of the historical material was first studied and indexed in the latter half of the 19th century by Adolfo Targioni Tozzetti (1823-1902), curator of the Invertebrate Section, then followed by Angelo Senna (1866-

1952). The first specimens were two species collected during the cruise of the R/N «Magenta» (1865-1868), reported also by Targioni Tozzetti (1877) in his catalogue.

Besides past collections, a good part of the Museum holdings consist of specimens collected in Somalia and other East African countries, during research missions conducted by the Museum itself, by the «Spedizione Biologica in Somalia» (S.B.S.), by the «Centro di Faunistica Tropicale» of CNR (Italian National Research Council) (Pardi, 1976, 1982; Vannini, 2004) and by the Gruppo di Ricerche Scientifiche e Tecniche Subacquee (G.R.S.T.S. - Underwater Scientific & Technical Research Group) that worked in numerous tropical countries between 1966 and 1986 (G.R.S.T.S., 1986).

Several scientists studied the Somalian specimens, among them Chanan Lewinsohn (Dromioidea) (Lewinsohn, 1979), Colin McLay (Dromioidea) (McLay, 1999) and Bella Galil (Carpilioidea and Eriphioidea) (Galil & Vannini, 1990). The holotype and the paratype specimens of *Dromidia fenestrata* Lewinsohn (1979) are listed; presently the species is synonymized with *Cryptodromiopsis tridens* Borradaile 1903 (Lewinsohn, 1984).

The Mediterranean specimens were partly studied by Lucia Falciai (Falciai, 1997).

The systematic order of the present catalogue follows that proposed by Ng *et al.* (2008). Italian specimens were compared with the help of Froggia *et al.* (1995) and Boxshall *et al.* (2013). For each specimen, or group of specimens, the following data are reported: genus, species, author, year of description, nation, locality (with the Italian province abbreviation between brackets), date (as day.month.year) and collector, previous determinations and author, new authors in chronological order, number and sex of the specimens, and the Crustacea Malacostraca catalogue number (MZUF, in brackets).
