1. Explain the new knowledge (e.g. theories/ concepts/ issues/ research methods/ techniques) gained from the conference.

The papers presented at the conference dealt with several contemporary issues related to higher education. These issues included technical vocabulary size of engineering students at tertiary level, i-learning, Englishization, and teacher competency. Insights into revised and updated methodological techniques were proposed and presented to collect and analyse data which yielded interesting and practical findings.

2. Explain the feedback received on your presentation (Please indicate duration, Q&A and other relevant discussion).

Duration of Q&A was three minutes per presenter at the end of a 10-minute presentation. Only three questions were allowed for Q& A. Three questions were raised with regards to the effectiveness of current practices in professional development of teachers for technology integration in light of the findings, the need to revisit teacher professional development, and further research into teacher knowledge being translated into classroom practice.

3. Will there be any followup activities resulting from your participation in the conference (e.g. research collaboration, institutional visits)? State the activity and person(s) involved, if any.
