HOW TO TALK TO A TECHIE

- Resist positivism & reductionism
- Target "open knowledge"
- Consider your map a tool for discovery

Data is maintained in Excel

PRACTICAL ADVICE

- Call it evidence, not data
- You want to add content yourself; aim for an open map3909 I
- You want to maintain content in Excel
- Plan for different types of evidence

“ONE-SHOT” VS. “SUSTAINED” MAPPING: TWO (BASIC) APPROACHES TO LITERATURE PEDAGOGY

Winter Jade Werner
Assistant Professor of English
Wheaton College (MA)
werner_winter@wheatoncollege.edu

AN INDEPENDENT STUDY & AN ENGLISH COURSE

Summer Independent Study:

- One-on-one summer research in Summer 2015, conducted from a distance (I was in Oregon, student stayed at Wheaton College).
- Lasted for roughly 1.5 months.
- Used ArcGIS.
- Culminated in complete map of locations mentioned or implied in *Heart of Darkness* and Conrad's Congo diary.
- Additionally, student was asked to develop one-hour lesson plan to teach mapping tool and present research to ENG 398 in Fall 2015.

ENG 398, Digital Victorians:

Brief Course Description:

- “This is a course that will introduce you to basic digital methods of literary analysis by way of Victorian literature. But, even more, this is a course that asks you to think critically about what *literary scholarship ought to do in the twenty-first century* – culturally, politically, and socially. I want you to push the bounds of literary criticism, and I want you to come away from this course with a deeply reflective and critical sense of your own identity as a scholar of literature. And, to do all this, you need to understand the history of criticism, comprehend the current debates on how to “do” criticism, as well as possess the drive to explore criticism in other forms.”
- 7 students.
- Overview of assortment of tools, including Annotation Studio, Voyant, Ngram Viewer, Lexos, and Juxta.
- Only 2 weeks on mapping tools. The first week focused on “one-shot mapping”

Mapping Heart of Darkness

Contact Info

Office and Office Hours:
Meneely 320
Mondays 3-4, Thursdays 2-3,
and by appointment

Email:
werner_winter@wheatoncoll.
ege.edu

This weekend, you will work with your partner to do the following:

1. Write down all **named** and **implied** locations in your part of the text;
2. Write down the **passages** and **page numbers** where each location appears;
3. Find images, video, or audio that correspond to that location;
4. Research (briefly) the historical, social, economic, and cultural significance of that location;
5. Compile your work into a single "pin" (something that we upload easily into either StoryMapJS, Historypin, or ArcGIS).

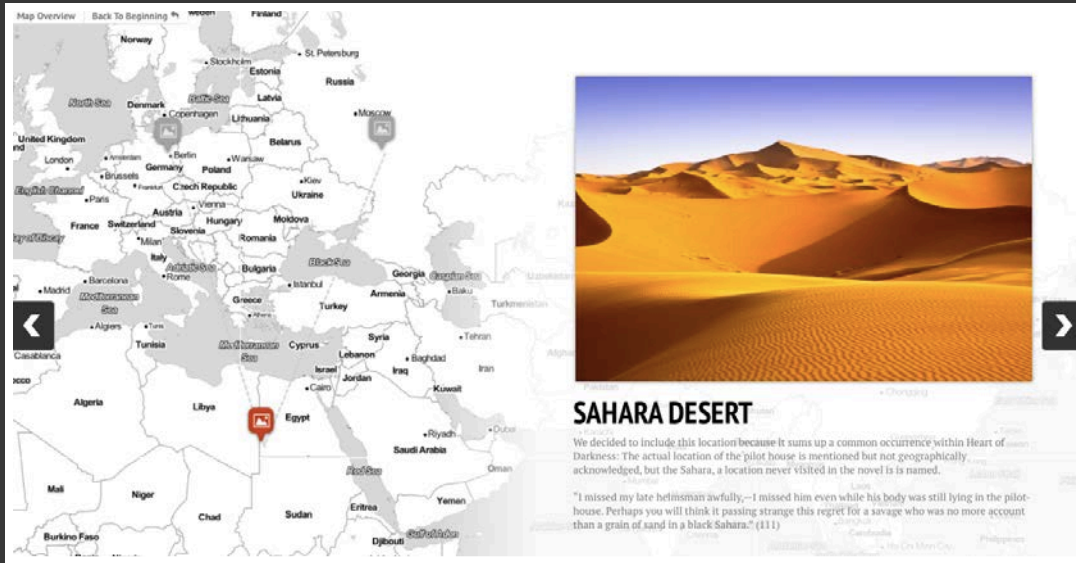

Remember, the breakdown for groups and parts of text is as follows:

Part 1: Josh, Tom R.
Part 2: Thomas H., Ali
Part 3: Sarah, Ava, Marion

Remember (as usual) to make notes on how doing this work affects your reading practice and understanding of the text!

What is “one-shot” mapping?

- A strategy to introduce students to LTAs (low threshold applications) for mapping within only two class periods.
- As a result, less emphasis placed on skills acquisition and more emphasis placed on conceptual questions that arise when we think of texts in spatial terms.
- Objectives:
 - Skills: To introduce two digital tools for telling stories/analyzing texts by way of maps.
 - Conceptual (narrow): To consider what “hidden patterns” (in Franco Moretti’s words) are brought to surface by focusing on the spatial world of text.
 - Conceptual (broad): To assess extent (if at all) that these digital tools challenge or modify “literary criticism”

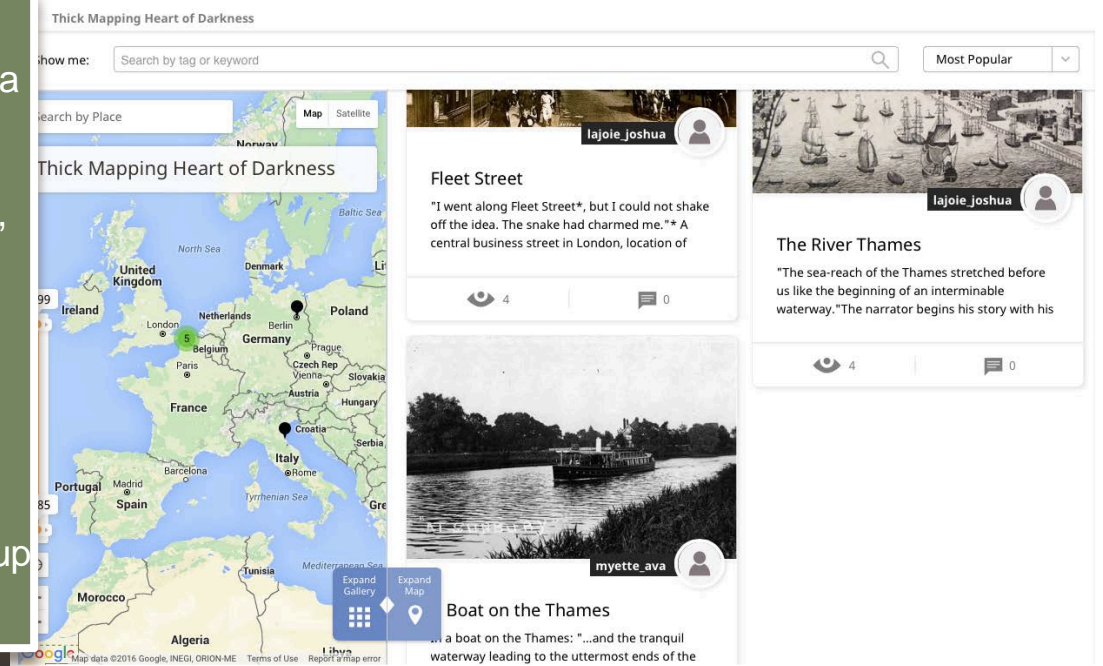

StoryMap JS

- Helps people “tell stories on the web that highlight the locations of a series of events”;
- Aesthetically appealing;
- Perhaps reemphasizes causal-chronological sequence of narrative;
- More conducive to individual work.

Historypin

- A digital gallery and map, providing a means for creating an open, crowdsourced archive of images, sound files, and text around a place, neighborhood, or location;
- Less aesthetically appealing (according to students);
- Gets rid of causal-chronological sequence of narrative;
- Because all “collections” are open, Historypin is more conducive to group work (with caveats).

StoryMap JS

Maps that tell stories.

Make a storymap now

Thick Mapping Heart of Darkness > Edit

Long description

ⓘ If you want to give a more detailed description, add it here. It will appear in the "about" section of your collection.

Created by ENG 398: Digital Victorians. Wheaton College, Norton, MA. 2015.

Add managers

You can add anyone else with a Historypin Profile to help you manage your collection. They will have the same editing rights as you.

Get in touch

If you like, please share the best way to get in touch with your collection, via email, post, telephone -

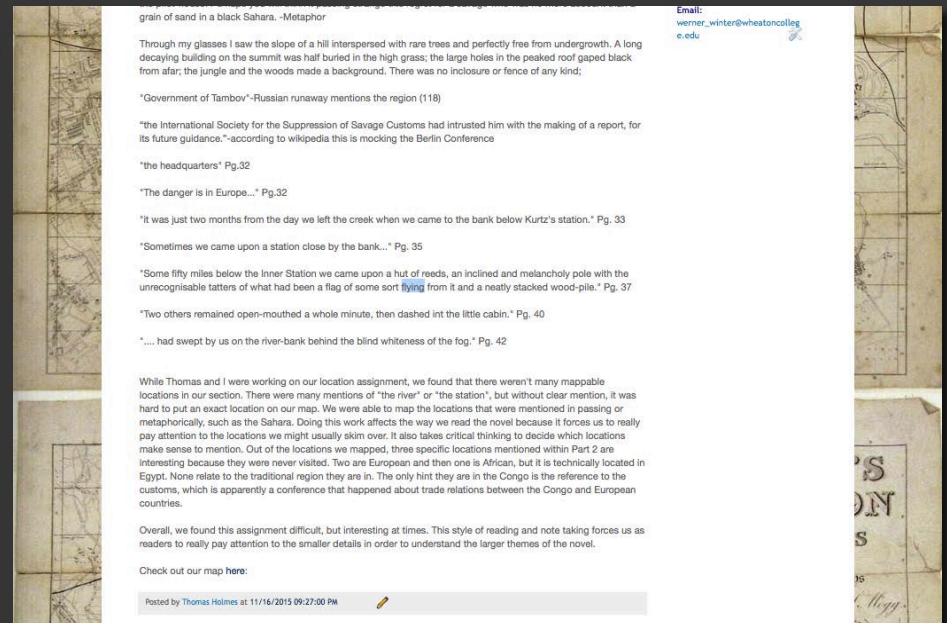

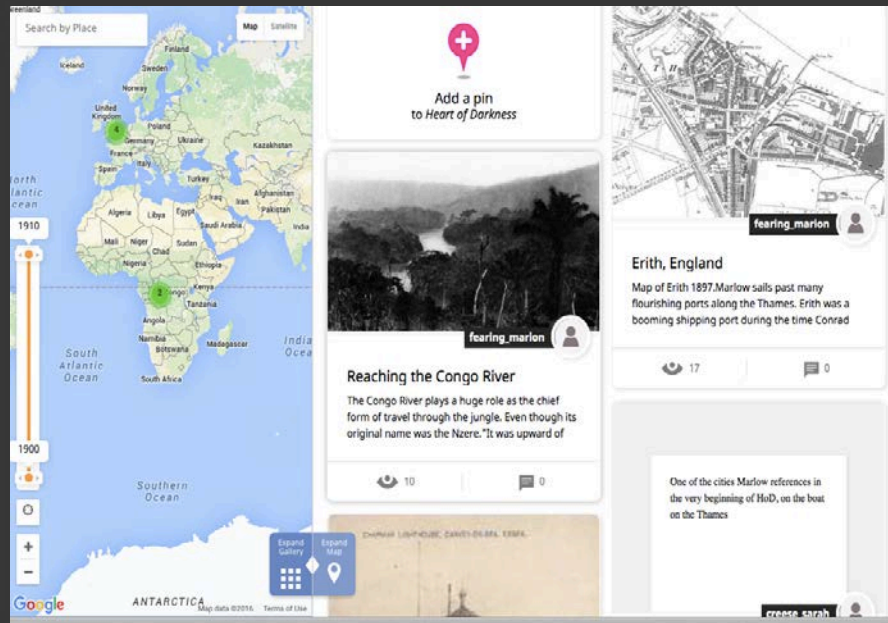

Prior to Class Period:

- Students read *Heart of Darkness*, making note of specific places mentioned. Students also read Franco Moretti's "Maps" from *Graphs, Maps, and Trees* to consider his suggestion that a literary map "offers a model of the narrative universe which rearranges its components in a non-trivial way, and may bring some hidden patterns to the surface" (54).
- Students used their Wheaton email (Google accounts) to create StoryMap JS and History Pin accounts.
- (Students emailed me to let me know their Historypin username, so I could add them to the *Heart of Darkness* collection I started)
- Students were instructed to explore StoryMap JS and Historypin for 15 min. each.

During Class Period:

- Students bring laptops to class (they can borrow from the library if they don't have their own);
- I introduced the backgrounds of each program;
- Students worked with partners for 45 minutes on application of their choice to

map locations they had recorded while reading *Heart of Darkness*. Each group was

After Class: Students continued work on their maps, following guidelines on course blog. They:

- Recorded all named and implied locations in assigned part of text.
- Found images, video, or audio corresponding to location.
- Researched (briefly) historical, social, economic, cultural significance of location.
- Compiled work into StoryMap JS or Historypin.
- Wrote a brief reflection.

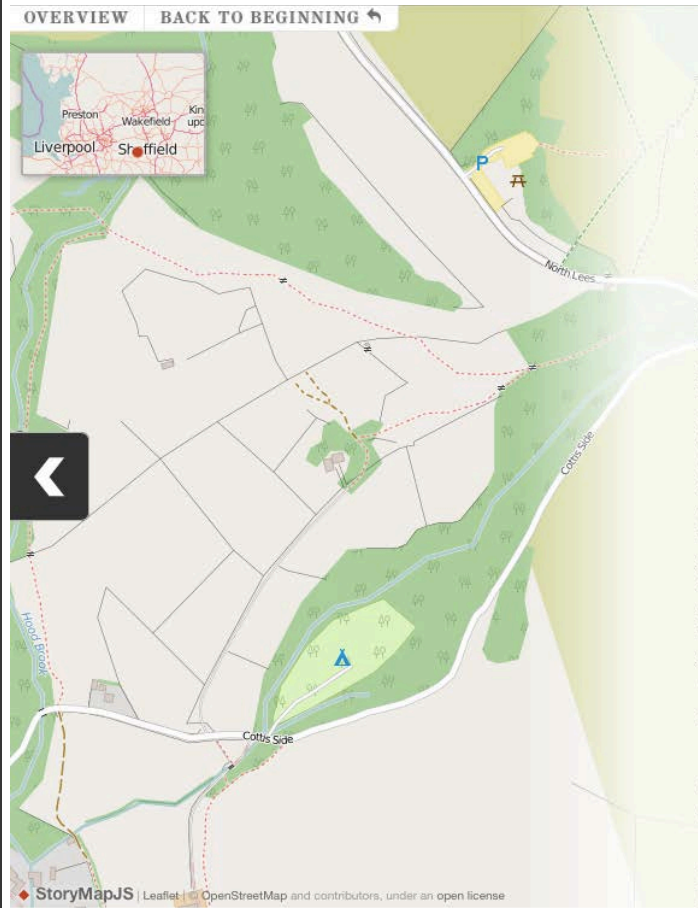

Next Class: Completed map; discussed reflections.

Outcomes: Mixed.

- Students put limited work into assignment because it was a busy time of year.
- Students complained how difficult it was to find *any* mappable location in *HoD*.
- Historypin was deeply unpopular.
- However, some interesting patterns emerged. The Part 2 Group noticed that while “there weren’t many mappable locations in [their] section,” they were “able to map the locations that were mentioned in passing or metaphorically.”

“The ‘Mapping *Jane Eyre*’ project I decided to pursue was intended to be an interactive map of locations in the novel *Jane Eyre* by Charlotte Brontë that would demonstrate how far Jane travels in the novel. I used textual evidence to figure out where Jane travels, how far, and how long she stayed in each place. I placed this information on each slide of the StoryMap JS mapping tool, and corresponded the fictional location with a real one. The actual locations were decided by using various biographies to reach a consensus on what inspired Brontë. I added pictures of the locations to help visualize the setting, and I added quotes from each section to help guide users into what happens at each location. I wanted to combine these new ways of looking at texts with amore traditional way.”

-Marion Fearing, Class of 2016

FERNDEAN

"He would have let the house, but could find no tenant, in consequence of its ineligible and insalubrious site. **Ferndean then remained uninhabited** and unfurnished, with the exception of some two or three rooms fitted up for the accommodation of the squire when he went there in the season to shoot.

To this house I came just ere dark on an evening marked by the characteristics of sad sky, cold gale, and continued small penetrating rain. **The last mile I performed on foot**, having dismissed the chaise and driver with the double remuneration I had promised. Even when within a very short distance of the manor-house, you could see nothing of it, so thick and dark grew the timber of the gloomy wood about it. Iron gates between granite pillars showed me where to enter, and passing through them, I found myself at once in the twilight of close-ranked trees. There was a grass-grown track descending the forest aisle between hoar and knotty shafts and under branched arches. I followed it, expecting soon to reach the dwelling; but it stretched on and on, it wound far and farther: no sign of habitation or grounds was visible." ~Chapter 37

"To be together is for us to be at once **as free as in solitude**, as gay as in company." ~Chapter 38

Scholars believe that Ferndean was based on **Norton Conyers**, a manor house located near Howarth.

Time Traveled from Morton: **Two days**
Miles Traveled from Thornfield to Ferndean: 30 miles

Outcomes, pt. 2: Later in the year, I had a student who decided to map *Jane Eyre* with StoryMap JS to see the extent to which the fictional geography of the novel corresponded with the actual geography of Yorkshire. She found that the novel largely *did* correspond to Brontë's Yorkshire, and she also found to her surprise that Jane travels roughly 400 miles over the course of the novel.

An infographic of the novel "Heart of Darkness"

A geographical layover of Joseph Conrad and Charlie Marlow's respective journeys -- real and fictional -- up the Congo River.

Description

This digital infographic represents a series of locations pertaining to Joseph Conrad's Victorian adventure novel "Heart of Darkness." I have chosen to map the novel because it might offer answers to some of the following questions:

- Will this way of offering criticism for HoD reveal anything about Conrad's so called racism? Are Conrad's choices meant for literary purposes, or because of ideologies that he held?
- Will it confirm the highly held notion that Conrad is Marlow?
- Will it call into question Marlow's reliability as a narrator, or Conrad as an author?
- Can mapping a **book** bring something new to the reading of a book? For example, will knowing that there is a total lack of location markers (on the map) between the Central and Inner Company Stations usher in a greater sense of scale and unknown, making the narrative more claustrophobic or lonely or lost for the reader?
- Does mapping the novel enhance the experience for the reader in any way?
- Can visual/graphic criticism be useful for different sorts of learners?

This project was inspired by the Digital Humanities and Historical Literary Criticism, as well as the Visual Arts. With this project, I have aimed to adapt critic Franco Moretti's concept of Distant Reading for the computer age, using the program ArcGIS. The prevailing drive behind this mapping project was to determine whether distant reading could be a valuable supplement to close reading.

The project consists of an interactive map which pin points the locations given in the narrative and Conrad's personal Congo Diary. Labels in **Green** represent locations where Conrad (the author) stopped at on his journey from London to Kisangani. Labels in **Orange** are places Conrad went stopped at but have not been confirmed as 100% accurate. They are educated guesses. Labels in **Purple** show locations either mentioned or alluded to in the narrative of "Heart of Darkness." Labels in **Blue** show locations mentioned in the narrative, but not stops on Marlow's journey. Users can browse the pins on the map, find out information about the various locations that inspired or existed in the narrative.

The Digital Humanities supplement the traditional humanities disciplines by adding a method which brings them into the digital age. Using an online program like ArcGIS, a map like this can be used as a teaching tool or an infographic database of information. At the click of a label, the user can learn about the locations mentioned in the text, or in Conrad's diary. Some of the annotations even have hyperlinked images for additional information.

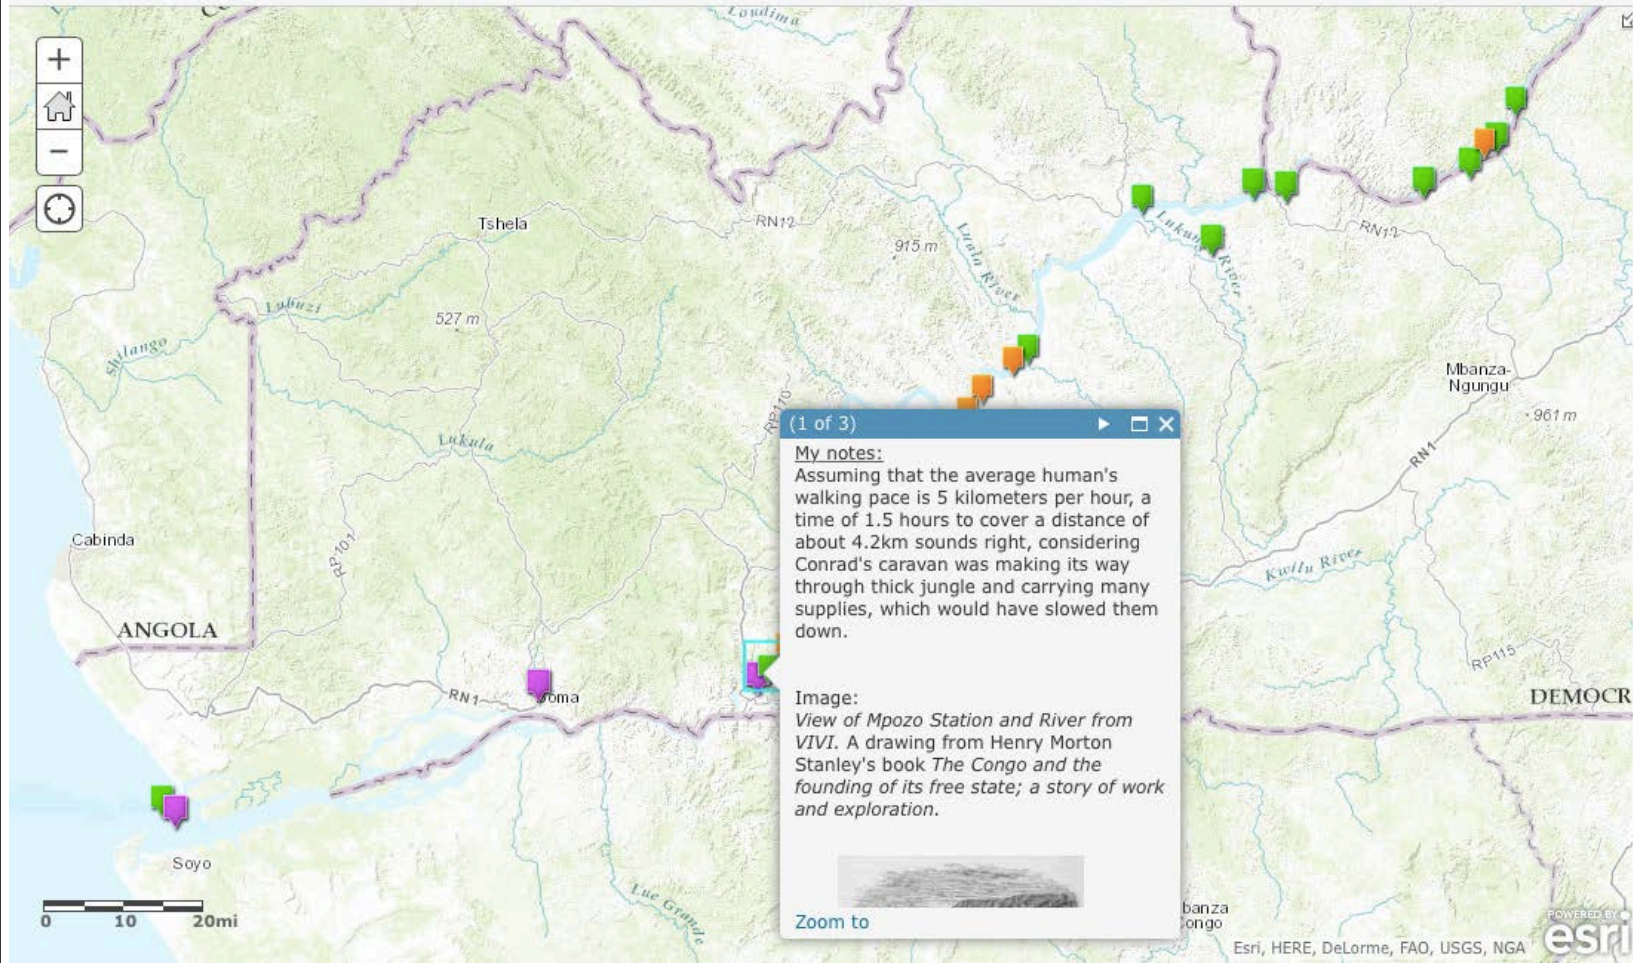

Not only does this project take full advantage of the database and interactivity, its visual nature may also help answer long debated questions. One debate, for example, is whether or not Conrad's apparent racism was a personally held ideology or the product of his time. The lack of Purple pins on Africa, compared to those on Europe, may suggest that Conrad wanted to paint Africa as this uncivilized wilderness. Conrad would, after all, have known that this was not the case since they are all mentioned in his Congo Diary, which are the included as the Green pins.

Maybe Conrad didn't mention the place names in Africa as a literary tool to enhance the isolation or vastness of the land that he was writing about, and was having Marlow dangerously trek through. This is an adventure story, remember?

Or Conrad might be omitting them because they don't matter. The story is about the events, not the locations! Maybe the dispersion of locations means absolutely nothing! But this mapping project has been worth it if only to offer another view/stance/critical eye on the text.

What is "Sustained" Mapping?

- Working one-on-one with a student on a long-term mapping project.
- Tom Rosenzweig spent this past summer teaching himself the online program ArcGIS. This tool has the functionality of StoryMap JS and Historypin, and is more powerful than both. It is thus more difficult to learn and hence not appropriate for a one- to two-class period exercise.

Green: Where Conrad stopped

Purple: Places mentioned in *HoD*

Orange: Places Conrad may have stopped, but can't be confirmed as 100% accurate.

TAKEAWAYS:

One-Shot Mapping:

Pros:

- Easy to implement;
- Sparks student interest in analyzing text spatially;
- Allows for class collaboration;
- Prompts new research questions about texts.

Cons:

- Not enough time to create meaningful maps;
- Tech difficulties;
- General dislike of Historypin compared to StoryMap JS.

Sustained Mapping:

Pros:

- Promotes independent research and development of research skills;
- Informative final project;
- Gives student mastery over a single tool and text(s);
- Accomplishment can be listed on resume.

Cons:

- Critical payoff disproportionate to amount of time spent on work;
- Unclear future for project;
- Frustration on part of student on not having community with whom to share final project.

Lessons for Future:

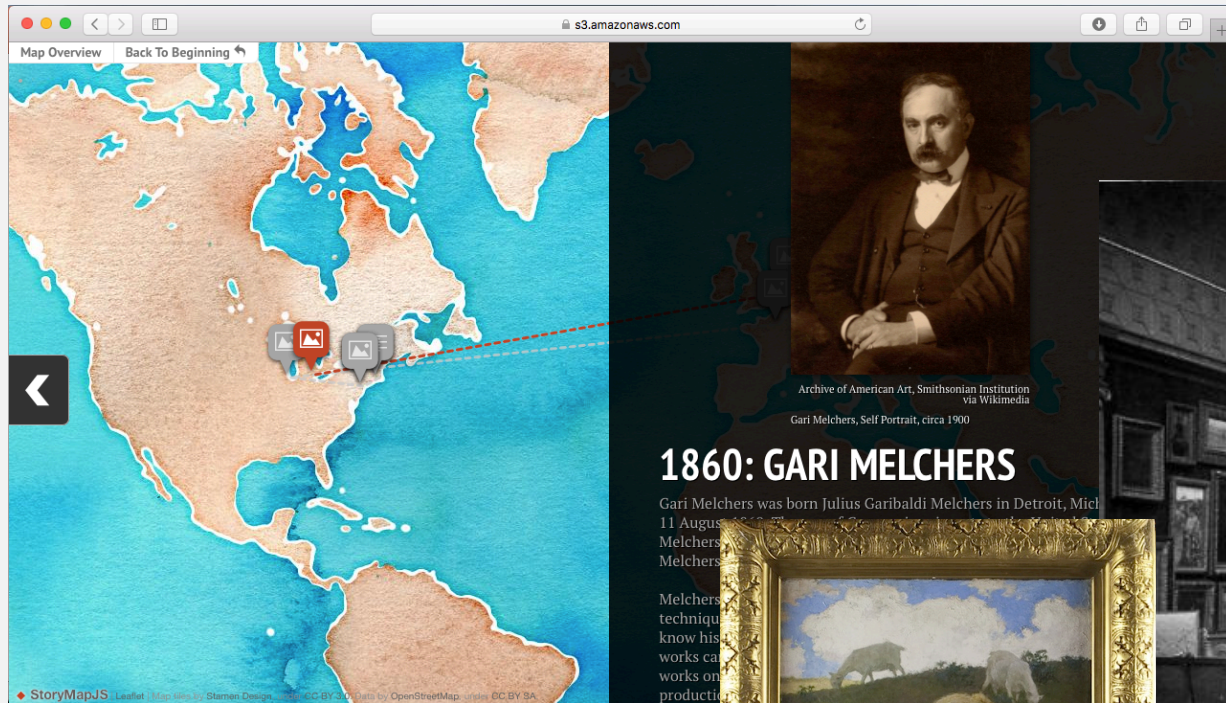

One-shot Mapping:

- Needs more than two class periods.
- Students prefer StoryMap JS; need strategy for class collaboration on this tool.
- Reflections might be more robust if completed later.

Sustained Mapping:

- More consideration of intended audience for project.
- Recognition of diminishing benefits in spending too long on project when student is *not* making large critical interventions.
- More consideration needed as to how to help student present/make accessible the research to larger community.

THE IMPETUS: *AUDREY, THE SHEPHERD LASS*

- 1886: Created in Holland
- 1889-1898: Expo (Paris, France) and the Paris Salon
- N.D.: Copenhagen, Denmark at the Exposition des Beaux-Arts Hamburg, Germany at the Grosse Kunstausstellung des Kunstvereins
- 1898: Sold to Potter & Bertha Palmer, Chicago, IL, USA
- 1898: Exhibited in Chicago, IL, USA
- 1899: Exhibited in Philadelphia, PA, USA
- Early 20th century: Displayed in Palmer home
- 1942: Sold at a Parke Bernet auction, likely to Jeannette Kittredge Watson, Class of 1902, in New York, NY, USA
- 1942-1957: Displayed in Watson home
- 1957: Donated to Wheaton College by Mrs. Watson

WHAT IS PROVENANCE?

- A record of ownership of a work of art or an antique, used as a guide to authenticity or quality. -*Google*
- History of ownership. -*MFA, Boston*
- From the French word *provenir*, which means "to come from," provenance is the history of ownership of a valued object... A full provenance provides a documented history that can help prove ownership, assign the work to a known artist, and establish the work of art's authenticity. –*Getty Institute*

WHY PROVENANCE MAPPING?

news.com

Archive of American Art, Smithsonian Institution
via Wikimedia

Gari Melchers, Self Portrait, circa 1900

1860: GARI MELCHERS

Gari Melchers was born Julius Garibaldi Melchers in Detroit, Michigan on 11 August 1860. The son of German immigrants to the United States, Melchers was raised by his mother and by his father Julius Theodore Melchers, a sculptor and arts educator.

Melchers worked primarily as a painter, creating oils on canvas. This technique was time consuming, but it arguably implies that he came to know his subjects well. Melchers's success in this medium means that his works can be more easily traced and were more likely to survive than works on paper. A catalogue raisonné of his work is currently in production.

THE ASSIGNMENT: BASICS

- 4 Iterations
 - FSEM 101 *Gift or Loot: Who Controls Cultural Property?* (Fall 2013)
 - ARTH 230 *Introduction to Museum Studies* (Spring 2014; Summer 2014; Fall 2015)
- 3 Digital Mapping Tools
 - Google Earth Maps (5)
 - Omeka Mini-Exhibitions (21)
 - Story Maps (13)
- Course evaluations & surveys
- 39 Objects

THE ASSIGNMENT: LEARNING OUTCOMES/GOALS

- Understand provenance and its relevance
- Understand narratives embodied in objects
- Use primary and secondary sources
 - Develop ability to "read" objects and images
- Strengthen research, writing, critical thinking, problem solving, and public speaking skills
- Increase comfort with ambiguity of research and with new technology
- Reinforce collaborative nature of learning
- Improve collection documentation
- Create means of promoting student work and collection to audiences on- and off-campus
- Develop teaching tools

THE ASSIGNMENT: COMPONENTS

- Choose object from Google Doc list
- Initial meeting to view object and related documentation
- In- and out-of-class workshops: public speaking; identifying images; metadata; mapping technologies.
- Annotated bibliography (GRADED)
- Draft report/digital map
- Research log
- Digital map (GRADED)
- Provenance report (GRADED)
- In-class presentation (GRADED)

THE ASSIGNMENT: RESOURCES

- Objects
- Permanent Collection files
- Library-based resources (physical and digital)
- Gebbie Archives & Special Collections
- Advancement Office (microfiche)
- Interviews with: faculty and staff; donors; gallery/auction house staff; previous owners; etc.
- Genealogy websites, e.g., familysearch.com, findmypast.com

PROVENANCE MAPPING: [GOOGLE EARTH](#)

FIRST-YEAR SEMINAR: GIFT OR LOOT? (FALL 2013)

PROVENANCE MAPPING: GOOGLE EARTH

The screenshot shows the Google Earth web interface. On the left, the 'Places' sidebar is expanded to show a list of locations, including 'La Dame Reformee', 'Abraham Bosse', 'Maximilian Willibald', 'The Liechtenstein Pri...', 'P&D Colnaghi Auctio', 'Metropolitan Museum', 'Lucien Goldschmidt Inc.', and 'Wheaton College Pe...'. The main map area shows a satellite view of New York City with a pop-up window for 'Lucien Goldschmidt Inc. New York City, NY'. The pop-up window contains the following text:

Lucien Goldschmidt Inc. New York City, NY

Lucien Goldschmidt Inc. was a well-known rare books shop and gallery located on 1117 Madison Ave and 84th Street in New York City, established by Lucien Goldschmidt in 1937 and closed in 1987. The shop dealt in European drawings, illustrated books, and French art books including original prints from Dürer, Picasso, and Matisse. Lucien Goldschmidt, born in Brussels in 1912 and educated at the College Royale Francais in Berlin, is considered one of the most important and influential antiquarian booksellers of the 20th century. According to a stamp on the back of 'La Dame Réformée' the print was received in the shop in 1958 from the MET and remained

The bottom of the interface shows the 'Layers' panel with 'Earth Gallery' selected, and the status bar at the bottom indicating the imagery date as 9/6/2015 and coordinates 40°46'45.28" N 73°57'35.34" W.

"MRS. PHILIP HALE (LILLIAN WESTCOTT HALE)"

Mrs. Philip Hale (Lillian Westcott Hale) was donated to Wheaton College in 1950 by Mrs. Marion Lolthrop (Class of 1907). Created by the famous gilded age American portraitist, William Merritt Chase between 1902 and 1914. The painting depicts Lillian Westcott Hale, a well established Boston artist, in a 3/4 pose looking down at the palette and brushes she is holding in her hands. The portrait is also known as *Lady in Black*, *Portrait of Mrs. Philip Hale*, or *Mrs. Lillian Westcott Hale*.

The story of Mrs. Hale, then Ms. Lillian Westcott, begins during Chase's visit to Mrs. Hale's art classes at the Hartford Art School in 1897. Chase spotted her talent and suggested that the 18 year-old and unmarried Lillian Westcott study under his tutelage in New York. In letters cited by biographer Erica Hirshler, Chase pleads with Mrs. Hale's mother, "Your daughter has decided talent. I would advise, by all means, that you help and encourage—in every way that you possibly can—the efforts made on her part..."^[1] Her Mother and teachers advised her against studying under Chase because of the scandal that could be caused by a young unmarried women studying unaccompanied under a man^[2]. There was also an idea circulating with the rise of women as artists that women needed to remain

single and live by a strict moral code to make quality art, this would chance thought her career which extended into 1960, but in 1899 it was a scandal when Mrs. Hale received Chase's scholarship at attended his progressive, open-air art school in Shinnecock, Long Island^[3]. In spite of this Mrs. Hale received a scholarship from Chase to attend his summer outdoor school in Long Island for the summer of 1899.

After the summer of 1899, Chase continued to occupy a studio in New York, while Lillian continued her studies at the School of Fine Arts in Boston. In 1902 Lillian became Mrs. Philip Hale as she married fellow Boston artist and teacher Philip Leslie Hale. The two lived together in Dedham and shared a studio in Boston. The story of Chase's *Lillian Westcott Hale* is more complicated.

DONATED TO WHEATON

Mrs. Marion Lewis Lothrop from the Detroit Free Press.

Wheaton College Alumni Relations Office.

On May 20th, 1950 Marion Lewis wrote to the college to inquire about donating her husbands family treasure and returning it to Massachusetts [1]. She also considered donating it to her husband's alma mater, Princeton University. However, as active alumni to Wheaton, she chose to give the painting to Wheaton College. She insisted that it be displayed where many people can see it, "Not tucked under the eaves somewhere," as she herself enjoyed looking at it very much [2]. The painting arrived at Wheaton later in 1950.

Wheaton College Permanent Collection

THE BARQUE EMMA GRACE

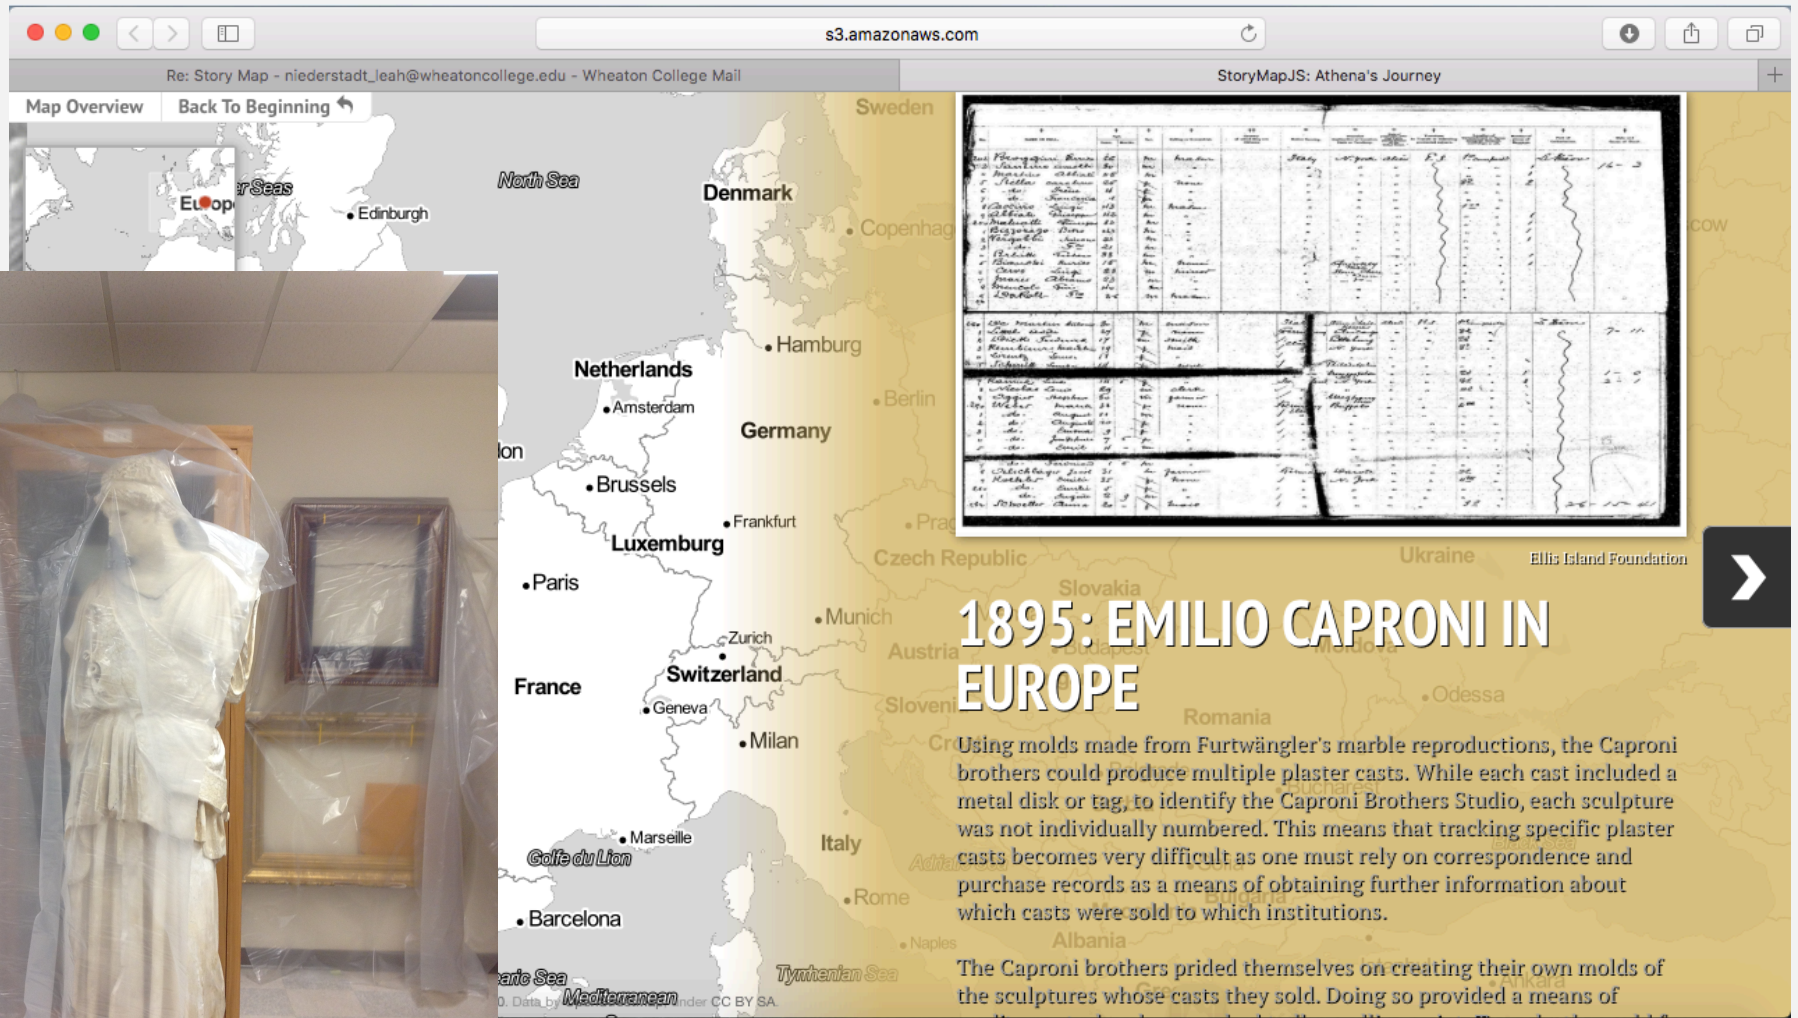

Seascapes and images of ships have long been a common theme for artists. In the 19th century, however, few paintings of ships were created by women and relatively few depicted women. The *Barque Emma Grace*, which was donated to Wheaton College in 2009, is therefore unusual, as it does both. Follow the *Barque's* journey to Wheaton.

PROVENANCE MAPPING: [STORYMAPJS](#)

The screenshot shows a browser window with the URL `s3.amazonaws.com`. The page title is "StoryMapJS: Athena's Journey". The map displays Europe with various cities labeled, including London, Amsterdam, Brussels, Paris, Zurich, Geneva, Milan, Rome, and Naples. A historical document is overlaid on the map, showing a table with columns for dates and locations. The document is titled "1895: EMILIO CAPRONI IN EUROPE".

Date	Location	Notes
1895	London	...
1895	Amsterdam	...
1895	Brussels	...
1895	Paris	...
1895	Zurich	...
1895	Geneva	...
1895	Milan	...
1895	Rome	...
1895	Naples	...

1895: EMILIO CAPRONI IN EUROPE

Using molds made from Furtwängler's marble reproductions, the Caproni brothers could produce multiple plaster casts. While each cast included a metal disk or tag, to identify the Caproni Brothers Studio, each sculpture was not individually numbered. This means that tracking specific plaster casts becomes very difficult as one must rely on correspondence and purchase records as a means of obtaining further information about which casts were sold to which institutions.

The Caproni brothers prided themselves on creating their own molds of the sculptures whose casts they sold. Doing so provided a means of

PROVENANCE MAPPING: KEY GOALS MET

SPRING 2014

- Improved comfort with ambiguity of research:
 - 4.33 post-project
- Improved comfort with new technology:
 - 4.22 post-project
- Improved research skills:
 - 4.56 post-project
- Prefer digital project: 5 out of 9
- Recommend project: 8 out of 9

FALL 2015

- Comfortable with ambiguity of research:
 - 3.00 pre-project
 - 4.25 post-project
- Comfortable with new technology:
 - 3.92 pre-project
 - 4.25 post-project
- Confident in my research skills:
 - 3.25 pre-project
 - 4.5 post-project
- Prefer digital project: 12 out of 12
- Recommend project: 12 out of 12

OBJECT INFORMATION

Object ID: 81.084
Creator: Unidentified (Three-line Group Vase-Painter)
Title: Greek Black-Figure Attic Amphora with Images on Both Sides
Date: circa 6th century BCE
Culture: Ancient Greek
Dimensions: 16.50 x 29.50 x 6.50 inches
Credit: Purchase of the Newell Bequest Fund
Provenance by Jillian Carlin, Class of 2014

Greek Black-Figure Attic Amphora with Images on Both Sides. Unknown Three-line Group Vase-Painter (circa 500 BCE), Ancient Greece. Image courtesy of Wheaton College Permanent Collection.

PROVENANCE MAPPING: KEY GOALS MET

-Sam Barnett, Anthropology, Class of 2016 (StoryMapJS)

“I didn’t like that I had to stop [the research]. My parents and friends... all saw how excited I was about the project... They said it sounded like a cool project and one that's important... I’m still obsessed with it.”

PROVENANCE MAPPING: KEY GOALS MET

-Emma Wynne, Art History and German Studies, Class of 2018 (StoryMapJS)

“I liked feeling like I was doing something useful for the collection, not simply writing a research paper for the sake of writing a research paper.”

PROVENANCE MAPPING: KEY GOALS MET

-Anonymous (Omeka)

“I think it should not be repeated because the parameters of the assignment cannot be controlled. Since the professor was not aware of the provenance of the object, she could not know how much, or how little, work she was assigning to her students. Further, since each project was different, different students had differing levels of difficulty in regards to their research. In addition, their [sic.] is no fair criteria for grading these projects. Someone may have worked incredibly hard but hit a dead end, or they might have just been lazy. There is no way to know. It is fundamentally unfair to grade different students differently. There should be an objective criterion, and that criterion was impossible for this assignment.”

PROVENANCE MAPPING: KEY GOALS MET

Samuel H. Elbert
Asian and Pacific Languages

PROVENANCE MAPPING: GOING FORWARD

- Modify graded components: remove report and add research log
- Continue using StoryMapJS
- Increase clarity about the learning-to-fail model and grading parameters
- Incorporate required meeting with LIS staff
- Modify assignment timeline to allow feedback on/edits to final map to be made by students, not faculty
- Trial "Gigapixel" story map to track Permanent Collections objects displayed on campus

Overview Back To Beginning

A CAMPUS SKETCH

In 1897, the new President of Wheaton Female Seminary, Reverend Dr. Samuel Valentine Cole, asked **Ralph Adams Cram** to design a campus that would accommodate expansion into a four-year, degree-granting institution. **Cram soon visited Wheaton**, initially creating a quick sketch of his proposed plan. (This early image of campus is now held in the college **archives**.) Cram's final design centered around a Court of Honor, which was completed in 1923 when Wallace Library opened.

Like Cram, Elizabeth captured her first impressions of campus in a sketch, one that closely resembles Cram's drawing created nearly 40 years before she arrived at Wheaton. Her sketch was included in a letter she wrote to her friend Norman in September 1933.
