The background of the slide features a repeating pattern of stylized, irregularly shaped cells in shades of gray. Each cell contains a smaller, darker gray circle representing a nucleus. The cells are arranged in a dense, overlapping grid. A diagonal line of varying opacity, from light gray to dark gray, runs from the top right towards the bottom left, creating a sense of depth and movement.

REGULATION OF VASCULAR PERMEABILITY BY RHOGTPASES:

Fiat Lux!
(Let There Be Light!)
