χ^2 contingency test 97, 98, 129
  2 x 2 tables 132
  assumptions 133
  n x n tables 133
χ^2 goodness-of-fit test 97, 98, 114
  assumptions 115

A

AIC 301
Alternative hypothesis 93
Analysis of covariance 283
Analysis of variance 209
ANCOVA 283
ANOVA 209
  assumptions 217, 299
  autocorrelation 299
  data types 211
  degrees of freedom 213
  factors 210
  Fisher LSD 220
  fixed effects 222
  formula 212
  mean squares 213
  nested 285
  one-way 99
  planned comparisons 99, 218
  random effects 222
  repeated measures 290
  residuals 213
  R-square value 214
  split plot 290
  sums of squares 213
  unbalanced factorial 282
  unplanned comparisons 220
  variance components 224
  what you should report 215
Arithmetic mean 61

B

Bar graphs 37
Bartlett's test 100
Bias 195
Binomial distribution 81, 105
  cumulative probabilities 83, 106
  fitting 117
  mean 107
  probabilities 81, 106
  probability densities 83
  quantiles 84
  random numbers from 84
  standard error 107
Binomial test 97, 108, 152
Blinding 197
Blocking 198
Bootstrapping 317
Box plots 46

C

Central limit theorem 151
Chi-square distribution 89
  cumulative probabilities 89
  probability densities 89
  quantiles 89
  random numbers from 89
Coefficient of variation 62
Commands window 16
Confidence intervals 177, 219
  regression coefficients 244
Confounding variables 193
Contingency analysis 129
Correlation 227
  assumptions 231, 235
  confidence interval 229
  correlation coeficients 227
  Kendall's 101
  measurement error 235
  Pearson's 101, 228
  Spearman's rank 101, 233
  standard errors 229
  what to report 230, 234
Covariates 102, 198, 273, 283
Cumulative frequencies 49

D

Data 4
  changing 9
  creating 6, 10
  modifying 10
  transforming 10, 184
  types 9, 211
Data frames 16, 24
Data objects 16

Grouped bar plots 43
G-tests 138

H

Histograms 40
Hypothesis testing 93
  alternative hypothesis 93
  distribution shapes 98
  frequencies and proportions 97
  independence of categorical variables 97, 98
  multiple explanatory variables 102
  null hypothesis 93
  one-tailed tests 94
  one, two or n means 99
  one, two or n medians 99
  predicting proportions from a numeric value 98
  relationships between two numerical variables 101
  testing for normality 98
  two-tailed tests 94
  type I error 94
  type II error 94
  variances 100

I

Independent-samples *t*-test 99, 169
Interaction plots 201, 281
Interquartile range 63

K

Kendall's correlation 101, 233
Kolmogorov-Smirnov test 188
Kruskal-Wallis rank-sum test, KW rank test, KW test 100, 217
Kurtosis 62

L

Least squares 241
Levene's test 100, 177
Linear correlation 227
Linear models 303
  assumptions 303
Line graphs 51
Logistic regression 98, 142, 259
  binary response variable 259
Log-linear models 98, 142

M

Mann-Whitney *U* test 100, 188
MANOVA 297
Mean 61
Mean squares 213
Median 63
Mixed effects design (linear) 102, 287
  AIC 302
  model selection 302
Mosaic plot 45
Multiple linear regression 102, 263
  adjusted R-squared 266
  interpreting 268
  stepwise 267

N

Nested analysis of variance 285
Nested design 102, 273
Non-linear regression 102, 255
  asymptotic 255
  formula-free curve fitting 258
  polynomial 257
  quadratic 257
Non-parametric tests 186
  Kolmogorov-Smirnov test 188
  Kruskal-Wallis rank-sum test 100, 217
  Mann-Whitney *U*-test 188
  Sign test 187
  Wilcoxon rank-sum test 100, 188
  Wilcoxon signed-rank test 99
Normal distribution 85, 145
  approximation for the binomial distribution 151
  confidence interval for sample mean 159
  cumulative 88
  cumulative probabilities 88
  deviations from 181
  probability densities 88
  QQ plots 182
  quantiles 88
  random numbers from 88
  t-distribution for sample means 155
  testing for 181, 184
Null hypothesis 93

O
