Wes Whiteside—Species Information Sheet

I. Nomenclature

Family: Ebenaceae

Genus Species(Authority): Diospyros virginiana L.

Subspecies/Variety(Authority):

Cultivar:

Common Name: Persimmon

II. Origin (country and/or habitat)

Native/Rare Native/Uncommon Old World/Rare Old World/Uncommon

Diospyros virginiana has a native range from Nebraska, east through the Midwest to the East Coast into New York and Maryland, throughout the Southeast and down to Texas, including Utah and California (USDA 2011).

III. Habit

Tree Shrub Vine

Herbaceous Annual Herbaceous Biennial Herbaceous

Perennial

Flowering Season: May to June

Flower Color: White

Fruit Type: Berry

IV. Source of Plant Material

From where or whom obtained and when: *Diospyros virginiana* was grown from seed collected locally in the wild.

Propagule Material:

Seed Vegetative Whole Plant

Details:

Availability: *Diospyros virginiana* is occasionally available commercially, more so as named grafts, from specialty fruit nurseries; readily available in the wild within its range.

V. Cultural

Special Soil Type: Average

Soil Moisture: Wet Mesic Dry Other

VI. Additional Comments

Once the plants Wes planted started to bloom, he removed all but one of the males while retaining the females. Dr. Whiteside removes seedlings that pop up around the garden regularly.
