Ciencia abierta

Para qué?

- Mayor transparencia
- Ciencia más eficiente, con un mayor impacto
- ...y mayor visibilidad!

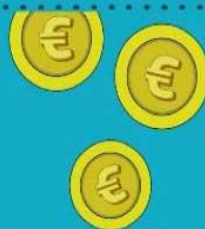

<https://www.fosteropenscience.eu/content/what-open-science-introduction>

WHY OPEN ACCESS TO SCIENTIFIC PEER-REVIEWED PUBLICATIONS?

GOOD FOR SCIENCE

allows scientists to build on previous research results and avoids unnecessary duplication of effort
improved quality and greater efficiency

GOOD FOR THE ECONOMY

speeds up innovation
faster progress to market

GOOD FOR SOCIETY

makes research available to individual citizens and to non-profit organisations
greater transparency

El acceso abierto (OA) no es un objetivo final en sí mismo, sino el primer paso para lograr una investigación académica transparente.

La ciencia abierta va más allá del acceso abierto a la literatura científica y a los datos de investigación, e incluye la apertura del proceso completo de investigación, revirtiendo a la sociedad.

Algunas iniciativas claves

OA 2020

<https://oa2020.org/be-informed/>

The screenshot shows the top navigation bar with 'open access 2020' on the left and 'be informed', 'take action', 'collaborate', 'learn more', 'events', 'news' on the right. The main content area features the heading 'ABOUT OA2020' and a list of menu items: 'be informed', 'About OA2020', 'How it Works', and 'Why it Matters'.

The OA2020 Initiative was established at the 12th Berlin Open Access conference, where thought leaders in the global Open Access movement came together to discuss concrete actions that would finally offer an incisive, feasible and rapid path to an open access information environment.

Building on the 2003 *Berlin Declaration on Open Access to Knowledge in the Sciences, Humanities, and the Pursuant, urgent Mission Statement* of 2013, OA2020 aims to facilitate the transition to open access by transforming the existing corpus of scientific journals from their current subscription system to open access.

The transformation envisioned by OA2020 is founded on analysis that shows there is enough money within journal publishing to allow for a transition to open access at a minimum – cost-neutral. This analysis is outlined in a widely-read *White Paper* from the Max Planck Digital Library in April 2015.

The screenshot shows the top navigation bar with 'open access 2020' on the left and 'be informed', 'take action', 'collaborate', 'learn more', 'events', 'news' on the right. The main content area features the heading 'TAKE ACTION' and a list of menu items: 'take action', 'Endorse OA2020', 'Create a Roadmap', 'Have Impact', 'Expression of Interest', 'List of Signatories', '14th Berlin Open Access Conference', and '13th Berlin Open Access Conference'. Below the menu is a bar chart with five red bars of varying heights.

TAKE ACTION

The Open Access movement has made many laudable efforts over the past 20 years, but progress is slow and we are still decades away from achieving the envisioned open information environment. Worse, even while new OA strategies make headway, the largest traditional publishers are fortifying their paywalls and extracting booming revenues through annual subscription price increases and hybrid publishing (double-dipping). In order to finally make open access the default in scholarly publishing, we need to take collective action and **divest of subscriptions, in order **to invest in Open Access**.**

ENDORSE OA2020

Plan S

<https://www.coalition-s.org/why-plan-s/>

Plan S
Making full and immediate Open Access a reality.

Why Plan S Principles and Implementation Who's involved About Contact

El acceso abierto (OA) no es un objetivo final en sí mismo, sino el primer paso para lograr una investigación académica transparente.

La ciencia abierta va más allá del acceso abierto a la literatura científica y a los datos de investigación. Tiene que ver con la apertura del proceso completo de investigación, revirtiendo a la sociedad.

Open Science, Open Scientists [Blog post de Leonid Schneider, 7 de diciembre de 2015] <https://forbetterscience.com/2015/12/07/open-science-open-scientists/>

Part I: The Plan S Principles

"With effect from 2021, all scholarly publications on the results from research funded by public or private grants provided by national, regional and international research councils and funding bodies, must be published in Open Access Journals on Open Access Platforms, or made immediately available through Open Access Repositories without embargo."

In addition:

01 Authors or their institutions retain copyright to their publications. All publications must be published under an open license, preferably the Creative Commons Attribution license (CC BY), in order to fulfil the requirements defined by the [Berlin Declaration](#):

06 The Funders encourage governments, universities, research organisations, libraries, academies, and learned societies to align their strategies, policies, and practices, notably to ensure transparency.

AmeliCA vs Plan S: mismo objetivo, dos estrategias distintas para lograr el acceso abierto.

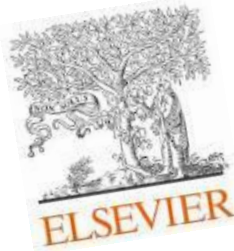

ACCESO ABIERTO BY ARIANNA BECERRIL-GARCÍA - 10 ENERO, 2019

El 4 de septiembre de 2018, un grupo de organizaciones nacionales de financiación de la investigación, con el apoyo de la Comisión Europea y el Consejo Europeo de Investigación (ERC por sus siglas en inglés), anunció el lanzamiento de cOAlition S, una iniciativa para hacer que el Acceso Abierto (AA) completo e inmediato a las publicaciones de investigación sea una realidad. Está construido alrededor del Plan S, que consta de un objetivo y 10 principios (Science Europe, 2019). Dicho objetivo es:

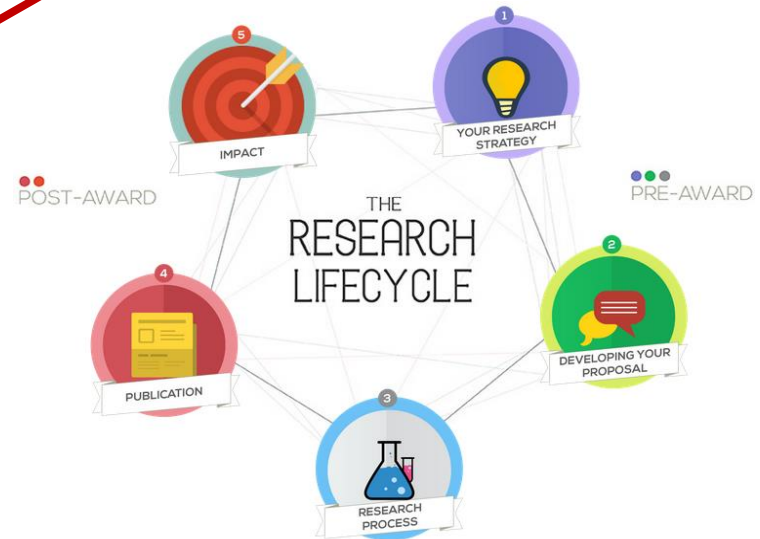

“Para 2020, las publicaciones científicas que resulten de investigaciones financiadas con subvenciones públicas otorgadas por los consejos de investigación y organismos de financiación nacionales y europeos participantes, deben publicarse en revistas de acceso abierto compatibles o en plataformas de acceso abierto compatibles”.

START MARKETWATCH TRANSFORMATIVE AGREEMENTS WORKFLOWS MORE RESOURCES

Guidelines for Transformative Agreements

Below are some of the fundamental guidelines of transformative agreements, as defined by the ESAC Initiative community; a listing of the specific requirements that have been adopted by national consortia and other organizations can be found here <https://esac-initiative.org/guidelines/>.

Transformative agreements are temporary and transitional.

Transformative agreements are meant to enable a swift and irreversible shift away from the subscription model on a global scale, affecting the financial and operational changes required for a fully open access publishing paradigm. While individual transformative agreements have the potential to convert 100% of a given institution or consortium's output to open access publishing, it is the sum of many agreements together that will induce the transition at scale. Naturally, wherein public funds and collective effort have assisted the transformation of a publisher's portfolio to open access, this should remain open access and not revert to paywall access under subscription models.

Navigate: [ESAC](#) > [TRANSFORMATIVE AGREEMENTS](#) > Guidelines for Transformative Agreements

Learn more...

The ESAC community regularly discusses mechanisms and terms of Transformative Agreements to ensure that they continue to effectively achieve their aim of accelerating the transition to open access. Get in touch with the ESAC Initiative to learn what steps you can take to initiate such a strategy.

QUESTION	ANSWER
FINANCIAL SHIFT Transformative agreements vary by their transformative mechanisms, meaning the way in which financing is shifted from the subscription side to open access publishing. What are the characteristics of this agreement to this regard?	Subscriptions partly converted to oa publishing fees
RISK SHARING How do entitlements for open access publishing correlate to the anticipated article output? Which mechanisms for risk sharing have been agreed in cases of exceeding or not reaching the number of oa publishing entitlements?	
OA COVERAGE Are all journals relevant to your affiliated authors (in which you expect them to publish) eligible for oa publishing under the agreement?	Yes
Are fully open access journals covered by the agreement?	No
OA LICENSE	CC-BY variations allowed
ARTICLE TYPES	Original research articles Review articles Communications
ACCESS COSTS What is the approximate share of access related costs of the overall agreement?	20%-50%

Assistance with Article Processing Charges (APC)

A number of funding options are available to authors

Research4Life initiative

Corresponding authors based in countries classified by Research4Life as 'Group A' and 'Group B' countries are eligible for a full APC waiver. Corresponding authors based in other countries, or who lack research funding or open access funds to draw upon, may apply for a discretionary waiver.

Open Access Membership

The Royal Society Open Access Membership programmes actively encourage open access in scholarly communication. Discounts of up to 25% are offered on each article processing charge. Prepay Membership enables an organisation to cover open access article processing charges incurred by its researchers upfront

Discretionary waivers

We will consider waiving the APC in cases where authors lack funds and are not eligible for other means of funding support. Editors are not made aware when a waiver has been granted and requests are independent of the peer review process.

OPEN ACCESS PUBLISHING AGREEMENT

- > Instructions and footnotes in blue should be deleted.
- > For options [in square brackets]: choose the applicable option. Options not chosen should be deleted.
- > For fields in [grey in square brackets]: enter the appropriate data.

ADDENDUM

(To be filled out by the beneficiary/author and the publisher. This model is not mandatory but reflects the obligations for the beneficiary under the H2020 grant agreements. It can be supplemented by further provisions agreed between the parties, provided they are compatible with the Grant Agreement. The Commission/Agency takes no responsibility for the use of this model.)

This 'Addendum' is between the following parties:

on the one part,

1. the publisher

[full official name (short name)], established in [official address in full], represented by [....],

and

on the other part,

1. 'the corresponding author':

[full name], [official address in full], represented by [....]

and the following other authors

2. [full name], [official address in full], represented by [....]

3. [full name], [official address in full], represented by [....]

[same for each author].

With this Addendum, the parties agree to complement and amend the attached Publication Agreement concerning the publication [insert name of publication] in the Journal [insert name of journal] with the following open access clause:

Open access

The author(s) retain(s) the right to:
